Since a grazing trespass is not a criminal proceeding, it need not be proved beyond a reasonable doubt that a particular individual committed the trespass.

Fernando Herrera v. Bureau of Land Management, 38 IBLA 262 (Dec. 8, 1978)

A district manager's decision reached in the exercise of administrative discretion pursuant to the Taylor Grazing Act of 1934 may be regarded as arbitrary or capricious only where it is not supportable on any rational basis and the burden is on the appellant to show by substantial evidence that the decision is improper. A district manager's decision not to reissue a grazing lease for a certain area until that area is fenced and to reduce appellant's AUM's accordingly rests on a rational basis where the facts show that this unfenced area adjoins the bombing range and grazing thereon could result in trespass on the bombing range, inconsistent with the use of the range.

Colvin Cattle Co., Inc., 39 IBLA 176 (Jan. 30, 1979)

After holding a hearing pursuant to the Administrative Procedure Act, an administrative law judge may properly find that a person has committed a grazing trespass if that finding is in accordance with and supported by reliable, probative and substantial evidence.

Bureau of Land Management v. Holland Livestock Ranch et al., 39 IBLA 272 (Feb. 15, 1979) 86 I.D. 133

EVIDENCE--Continued

BURDEN OF PROOF--Continued

When the Government contests a mining claim on a charge of lack of discovery, the Government has the burden of proving a prima facie case; the burden then shifts to the mining claimant to prove by a preponderance of the evidence that discovery exists.

United States v. Ted G. Ax, 43 IBLA 146 (Sept. 28, 1979)

United States v. Ralph Page et al., 43 IBLA 390 (Oct. 31, 1979)

CREDIBILITY

A conjectural opinion on the possibility of a mining claimant's ability to market a common variety of gravel at a profit prior to July 23, 1955, is not credible evidence of marketability where specific evidence tends to show that development of a mining operation at that time was not then warranted by the marketplace conditions.

United States v. Clarion W. Taylor, Sr., and Gerald O'Connor, 19 IBLA 9 (Feb. 20, 1975)   82 I.D. 68

Under the Mining Claims Occupancy Act, 30 U.S.C. § 701 *et seq.* (1970), where the record includes a statement as to a principal place of residence which conflicts with a more detailed statement made under oath by the same person, the matter may be remanded for hearing in order to resolve the conflict and protect the rights of a third party.

Dwight H. and Verna K. Huston, 21 IBLA 24 (June 16, 1975)

While the existence of other land values does not qualify a locator's rights under the mining law if he has a valid claim, evidence of such other values may be considered in assessing the weight and credibility to be accorded the locator's testimony in determining whether a discovery has been made, and may be a factor in evaluating his bona fide intention to develop a mining operation.

United States v. J. R. Osborne et al. (Supp. on Judicial Remand), 28 IBLA 13 (Nov. 8, 1976)

Where an application to acquire Federal land is rejected by BLM for the reason that the applicant's own declaration of material facts stated in his application demonstrate conclusively that he is not entitled to the land as a matter of law, an effort on appeal to revise, amend, or deny the facts will not be considered absent a persuasive explanation of error in the application.

Andrew Petla, 43 IBLA 186 (Oct. 5, 1979)

CREDIBILITY OF WITNESSES

It is the responsibility of a mining claimant to present evidence supporting his allegation of bias on the part of Government mineral examiners testifying as to the validity of his claim in a contest proceeding, and a showing of Department affiliation does not discredit a witness.

United States v. J. D. Wilson, 44 IBLA 1 (Nov. 6, 1979)

EVIDENCE--Continued

CREDIBILITY OF WITNESSES--Continued

Common-law marriage is not established where one claiming to be the common-law wife of decedent testifies she cannot recall the time the alleged marriage occurred, and where her claim is not supported by a preponderance of other credible evidence, showing public assumption of the marriage relationship.

Estate of Edward Lockwood, Jr., 7 IBIA 271 (Nov. 20, 1979)

HEARSAY

The rule of evidence excluding hearsay is not strictly adhered to in administrative proceedings, particularly where the evidence, such as assay reports with a proper foundation concerning the sampling, submission of the samples for assaying, and the reputation of the assayer, is competent and relevant. After such reports are admitted, the factfinder may give them appropriate weight according to the circumstances surrounding the specific report.

United States v. Robert A. Bukke (Registered Agent), Valmines, Inc., et al., 32 IBLA 155 (Sept. 12, 1977)

The rule of evidence excluding hearsay is not strictly adhered to in administrative proceedings, particularly where the evidence, such as assay reports with a proper foundation concerning the sampling, submission of the samples for assaying, and the reputation of the assayer, is competent and relevant. After such reports are admitted, the factfinder may give the appropriate weight according to the circumstances surrounding the specific report. However, it is not improper to exclude an assay report where neither the assayer nor the sample-taker testifies concerning its origins, and no other foundation is laid for its introduction.

United States v. John R. Burt et al., 43 IBLA 363 (Oct. 29, 1979)

OFFICIAL NOTICE

Following a hearing under 43 CFR 2802.1-7, a decision increasing the charges for use and occupancy of a communication site is in error to the extent that the decision is based upon unspecified evidence not in the record and not made known to the user, and the decision must be set aside.

American Telephone and Telegraph Co. et al., 25 IBLA 341 (June 30, 1976)

The Board of Land Appeals may take official notice of the approved plats of official surveys.

Roland and Marie Oswald, 35 IBLA 79 (May 12, 1978)

PREPONDERANCE

Where the Government contests mining claims on a charge of lack of discovery of a valuable mineral deposit prior to the date when such minerals were no longer subject to such location, the Government must initially present sufficient evidence to establish a prima facie case. The burden then shifts to the claimant to show by a preponderance of credible evidence that a discovery has been made on each claim.

Where the expert witnesses called by the Government testify that prior to July 23, 1955, there was no profitable market for common variety minerals from the subject claims and that it would have been economic folly

EVIDENCE--Continued

PREPONDERANCE--Continued

to undertake the development a mine thereon, a prima facie case of invalidity has been made. Thereafter, upon the failure of the claimant to prove the contrary by a preponderance of credible evidence, a determination that the claims are invalid is obligatory.

United States v. Frank and Wanita Melluzzo (Supp. on Judicial Remand), 32 IBLA 46 (Sept. 2, 1977)

PRESUMPTIONS

One challenging the accuracy of an appraisal of water based on fair market value must show by substantial evidence the nature of the alleged error; where the appraisal has been conducted in accordance with generally accepted appraisal principles, allegations of error unsupported by evidence will be given little weight.

Park Center Water District and The Canon Heights Irrigation and Reservoir Co., 28 IBLA 368 (Feb. 3, 1977)
84 I.D. 87

Where a regulation requires that an oil and gas lease offer be accompanied by a separate statement, and appellant's offer is rejected for noncompliance therewith, appellant's showing that he has made it a past business practice to comply with the regulation in other instances must be regarded as evidence tending to support his assertion that he submitted the statement in this instance. However, such evidence, while cognizable, is insufficient to prove such an assertion without corroboration. A presumption of regularity supports the official acts of public officers and, absent clear evidence to contrary, it will be presumed that they have properly discharged their official duties.

David F. Owen, 31 IBLA 24 (June 20, 1977)

Where a regulation requires that an acquired lands oil and gas lease offer be accompanied by a separate statement as to the offeror's ownership of operating rights to the fractional mineral interest not owned by the United States, and the offer is rejected for noncompliance therewith, the offeror's bald assertion that he filed such statement is insufficient to prove such a fact without corroboration. A presumption of regularity supports the official acts of public officers and, absent clear evidence to the contrary, it will be presumed that they have properly discharged their official duties.

W. J. Langley, 32 IBLA 118 (Sept. 12, 1977)

In the absence of any evidence to the contrary, the validity of the dates, on which a lease was signed and became effective, appearing on the face of a lease included in the record will be presumed.

Arjay Oil Co., 33 IBLA 102 (Dec. 16, 1977)

In a Government contest, regular service of the complaint must be presumed, where no question is raised as to the validity of certified mail return receipts included in the record, regular on their face and indicating proper service.

United States v. Ronda Wiece and Leslie Wiece, 33 IBLA 290 (Jan. 10, 1978)

EVIDENCE--Continued

PRESUMPTIONS--Continued

Where BLM records show that the first-drawn applicant for an oil and gas lease paid his rental 1 day late, and is therefore disqualified, there is a legal presumption of regularity which supports the official acts of public officers and the proper discharge of their official duties.

Where a first-drawn oil and gas applicant offers evidence to show that his first year's advance rental was mailed sufficiently in advance so that, even if delayed, it would have arrived within the prescribed time, a legal presumption is raised that the payment was timely delivered.

Where the evidence in an administrative appeal raises countervailing legal presumptions of equal probative worth, a factfinding hearing may be ordered pursuant to 43 CFR 4.415.

Donald E. Jordan, 35 IBLA 290 (June 2, 1978)

Where BLM rejected appellant's offer for oil and gas lease because it failed to receive from him fractional interest statement required by 43 CFR 3130.4-4 (1975), and evidence affidavits by appellant and his wife were filed on appeal reciting that he mailed such statement with his entry card for simultaneous drawing, the presumption of administrative regularity obtains and appellant must be deemed to have not borne his risk of nonpersuasion.

Charles J. Babington, 36 IBLA 107 (July 14, 1978)

A mining claimant who is required by 43 CFR 3833.1-2(b), to file certificates of location with the Bureau of Land Management within 90 days of the date of location of his claims, has the burden of rebutting the presumption that Bureau officials properly discharged their official duties in receiving and date stamping all such certificates properly tendered to them. A mere assertion that Bureau officials did not properly discharge their duties fails to meet the claimant's burden of proof.

E. M. Koppen, 36 IBLA 379 (Aug. 31, 1978)

The issuance of a patent creates a presumption that all requisite steps and requirements of law and Departmental regulations have been satisfied.

Even if there were a mistake in the issuance of a patent, such mistake would justify this Department in recommending to the Attorney General that suit be commenced to cancel the patent only where: (1) the Government has an interest in the remedy by reason of its interest in the land; (2) the interest of some party to whom the Government is under obligation has suffered by reason of the patent; (3) the duty of the Government to the people so requires or (4) significant equitable considerations are involved.

Where more than 6 years have passed after the issuance of a patent, suit by the United States to vacate and annul the patent cannot be sustained, 43 U.S.C. § 1166 (1970), absent a positive showing of fraud practiced upon the United States.

H. E. Baldwin, 37 IBLA 215 (Oct. 12, 1978)

EVIDENCE--Continued

PRESUMPTIONS--Continued

Although in certain circumstances a rebutable presumption of a mining claim's validity may be indulged, the presumption does not arise to support an application for patent of the fee title. The patent applicant is the movant party, and as such it is his obligation to make a satisfactory showing of his entitlement under the law and regulations.

Brattain Contractors, Inc., 37 IBLA 233 (Oct. 18, 1978)

There is a legal presumption of regularity which supports the official acts of public officers and the proper discharge of their official duties.

Phillips Petroleum Co., 38 IBLA 344 (Dec. 22, 1978)

Delay caused by or attributable to the U.S. Postal Service is not sufficient to excuse late payment of rental except where reinstatement of a lease is at issue under 30 U.S.C. § 188(c) (1976). When BLM returns unacceptable payment to the offeror, a charge that delay in the return of the payment by the Postal Service caused his or her subsequent late rental payment is also an insufficient excuse absent evidence that the Postal Service acted improperly. There is a legal presumption of regularity which supports the official acts of public officers, and in the absence of clear evidence to the contrary, it will be presumed that they have properly discharged their official duties.

Gary Milske, 44 IBLA 21 (Nov. 6, 1979)

PRIMA FACIE CASE

Where the Government contests mining claims on a charge of lack of discovery of a valuable mineral deposit prior to the date when such minerals were no longer subject to such location, the Government must initially present sufficient evidence to establish a prima facie case. The burden then shifts to the claimant to show by a preponderance of credible evidence that a discovery has been made on each claim.

Where the expert witnesses called by the Government testify that prior to July 23, 1955, there was no profitable market for common variety minerals from the subject claims and that it would have been economic folly to undertake the development a mine thereon, a prima facie case of invalidity has been made. Thereafter, upon the failure of the claimant to prove the contrary by a preponderance of credible evidence, a determination that the claims are invalid is obligatory.

United States v. Frank and Wanita Melluzzo (Supp. on Judicial Remand), 32 IBLA 46 (Sept. 2, 1977)

Pursuant to the provision of 63 Oklahoma Statute 1-324, a birth certificate is prima facie evidence of the facts therein stated and unless rebutted is sufficient in and of itself.

Estate of Roland Loyd (Mokeadlemah) Botone, 7 IBIA 177 (Aug. 16, 1979)

STIPULATIONS

Upon a showing of probable error in prior order, a reopening pursuant to 43 CFR 206 and 4.242(a) is required. Where nationality of heirs was found to be relevant to the final order of distribution it was error to rely upon an agreed statement which was in conflict with evidence previously admitted to establish nationality.

Where a stipulation is used to establish material facts tending to prove nationality, and where nationality of heirs is a material issue in the probate proceedings, the administrative law judge must, pursuant to 43 CFR 4.232(c), determine that all parties and their attorneys understand the stipulation and its effect, and that all consent to the use of the stipulation as evidence to prove the agreed facts.

Where the record fails to establish the consent of all the parties to a stipulation of fact, the parties may be relieved from the stipulation in the interests of justice.

A stipulation is not binding upon the parties where the stipulation offered to establish facts concerning nationality contains an erroneous conclusion of law.

Estate of San Pierre Kilkakhan (Sam E. Hill), 7 IBIA 240 (Oct. 23, 1979)

SUFFICIENCY

Where, at the hearing of a mining claim contest, the transcript of a previous hearing in another related contest is received in evidence, those portions of the transcript which are relevant and material to the case at hand may form, or contribute to, the basis for the decision in the case, regardless of which party introduced the transcript in evidence.

Material which is principally valuable for use as fill, sub-base or ballast, for which ordinary earth or rock may be used, is not locatable under the mining laws, and even if the material is suitable for other purposes, its value for the above uses cannot be considered in determining its marketability as a valuable mineral deposit within the ambit of the general mining law.

In a contest of a mining claim located for common variety mineral materials prior to July 23, 1955, after which such locations were proscribed by law, where there has been no mining and no sales, the test of the validity of the claim is whether the claimant(s) could have mined and marketed the material profitably prior to that date and thereafter. The evidence tending to so show must relate to what a prudent man would have been reasonably justified in doing based upon the actual known circumstances at the time, not upon what he might have done if the proper conditions had then prevailed.

United States v. J. R. Osborne et al. (Supp. on Judicial Remand), 28 IBLA 13 (Nov. 8, 1976)

In a contest of a patent application for a lode mining claim, the Board of Land Appeals may remand the case for further hearing to complete the record regarding the (1) availability and expense of necessary financing, land and water, (2) the expense of labor, and (3) the expense of compliance with environmental protection laws.

United States v. Pittsburgh Pacific Co., 30 IBLA 388 (June 15, 1977) 84 I.D. 282

EVIDENCE--Continued

SUFFICIENCY--Continued

Where a regulation requires that an oil and gas lease offer be accompanied by a separate statement, and appellant's offer is rejected for noncompliance therewith, appellant's showing that he has made it a past business practice to comply with the regulation in other instances must be regarded as evidence tending to support his assertion that he submitted the statement in this instance. However, such evidence, while cognizable, is insufficient to prove such an assertion without corroboration. A presumption of regularity supports the official acts of public officers and, absent clear evidence to contrary, it will be presumed that they have properly discharged their official duties.

David F. Owen, 31 IBLA 24 (June 20, 1977)

The burden of the proponent is not simply to preponderate in the evidence produced; its burden is to produce a preponderance of credible evidence, and the trier of fact is not required to believe or give any weight to testimony which is inherently incredible.

United States v. Frank and Wanita Melluzzo (Supp. on Judicial Remand), 32 IBLA 46 (Sept. 2, 1977)

After holding a hearing pursuant to the Administrative Procedure Act, an administrative law judge may properly find that a person has committed a grazing trespass if that finding is in accordance with and supported by reliable, probative, and substantial evidence. Because a grazing trespass proceeding is not a criminal proceeding, it need not be proved beyond a reasonable doubt that a particular individual committed the trespass.

Bureau of Land Management v. Ross Babcock, 32 IBLA 174 (Sept. 15, 1977) 84 I.D. 475

Ordinarily the postmark date on a letter will be deemed the date of mailing. This inference may be rebutted on showing satisfactory, circumstantial evidence to lend credibility to an earlier date. A letter from postal authorities, acknowledging that a posted pickup schedule erroneously indicated pickups on Sundays and holidays, especially where the letter is accompanied by a photograph of the posted schedule, sufficiently corroborates lessee's contention that he mailed the rental payment prior to a Sunday and Monday holiday to rebut the inference resulting from a postmark of the following Tuesday.

Edward Malz, 33 IBLA 22 (Nov. 22, 1977)

Evidence that Forest Service land has been appraised at lower values and leased at lower rates than allegedly comparable Bureau of Land Management land will not suffice to overturn the latter's practices where no specific error in its methods has been shown.

Where a permittee introduces an alternative comparative sales analysis in opposition to that of the Bureau of Land Management, he must show by substantial and positive evidence why his analysis is valid and the Bureau of Land Management's invalid. Where the issue rests on the assertion of each party's expert on the validity of his respective analysis and the record fails to contain evidence by which this deadlock can be resolved, the case will be remanded for further factfinding.

Michael S. Deering, 33 IBLA 142 (Dec. 19, 1977)

EVIDENCE--Continued

SUFFICIENCY--Continued

An assertion by an alleged trespasser that he holds the right to graze and enclose Federal range must be documented to rebut the Government's prima facie case of trespass.

Joe Stewart, 33 IBLA 225 (Dec. 28, 1977)

Where land on which a valid settlement has been made and maintained according to the law under which it was made, was excepted from the effect of the withdrawal or reservation, occupancy of the land prior to reservation or withdrawal is insufficient to show exception where no filing has been made on the prior occupancy and the prior occupancy was not for homestead purposes.

Roland and Marie Oswald, 35 IBLA 79 (May 12, 1978)

Where BLM rejected appellant's offer for oil and gas lease because it failed to receive from him fractional interest statement required by 43 CFR 3130.4-4 (1975), and evidence affidavits by appellant and his wife were filed on appeal reciting that he mailed such statement with his entry card for simultaneous drawing, the presumption of administrative regularity obtains and appellant must be deemed to have not borne his risk of nonpersuasion.

Charles J. Babington, 36 IBLA 107 (July 14, 1978)

In a hearing held pursuant to the Administrative Procedure Act, evidence sufficient to support a decision must be reliable, probative, and substantial. 5 U.S.C. § 556(d) (1976).

Fernando Herrera v. Bureau of Land Management, 38 IBLA 262 (Dec. 8, 1978)

After holding a hearing pursuant to the Administrative Procedure Act, an administrative law judge may properly find that a person has committed a grazing trespass if that finding is in accordance with and supported by reliable, probative and substantial evidence.

Bureau of Land Management v. Holland Livestock Ranch et al., 39 IBLA 272 (Feb. 15, 1979) 86 I.D. 133

When on appeal a sufficient showing is made to call into question a determination that land lies within a known geologic structure of a producing oil or gas field, and a hearing is requested, the decision may be set aside and remanded for hearing.

Jack J. Bender, 40 IBLA 26 (Mar. 9, 1979)

Where, on appeal, a mining claimant alleges that he timely mailed the affidavits of assessment work to the proper BLM office but there is no evidence to indicate they were ever received, the claimant must bear the consequences of the loss and his inability to prove his allegation that they may have been received by the Bureau and subsequently lost.

Amanda Mining & Manufacturing Ass'n., 42 IBLA 144 (Aug. 16, 1979)

Roger Kuhn, 43 IBLA 182 (Sept. 28, 1979)

EVIDENCE--Continued

SUFFICIENCY--Continued

Decisions by BLM declaring mining claims abandoned and void for failure to file timely annual notices of intention to hold the claims or affidavits of assessment work will be vacated, notwithstanding the fact that BLM's records contain no such documents marked as timely filed, where the claimant is able to show that he mailed such documents to BLM and that it received them timely, and where it does not appear unlikely that BLM misplaced the documents or misconstrued their contents, owing to the absence of a numbering system and the similarity of the names of the claims to others.

E. Joe Swisher, 44 IBLA 44 (Nov. 19, 1979)

WEIGHT

Where the testimony and conclusions of an expert witness are based on careful examination of a mining claim by appropriate scientific methods, they will be accepted into evidence and given appropriate weight regardless of the fact that the witness may not be registered within that particular State as an expert in his field.

Cabot Sedgwick et al. v. C. M. Parker, 27 IBLA 256 (Oct. 20, 1976)

Where, at the hearing of a mining claim contest, the transcript of a previous hearing in another related contest is received in evidence, those portions of the transcript which are relevant and material to the case at hand may form, or contribute to, the basis for the decision in the case, regardless of which party introduced the transcript in evidence.

The testimony of a qualified geologist and professional mining evaluation engineer concerning the marketability of a deposit of sand and gravel at a particular time may be accorded substantial evidentiary weight under the standard in *Verrue* v. *United States*, 457 F.2d 1202 (9th Cir. 1972), if it is established that he was in the area at the time, had studied the local sand and gravel market and the factors which affected it, as well as the nature of the material and the methods and costs of removing, processing and marketing it.

In a contest of a mining claim located for common variety mineral materials prior to July 23, 1955, after which such locations were proscribed by law, where there has been no mining and no sales, the test of the validity of the claim is whether the claimant(s) could have mined and marketed the material profitably prior to that date and thereafter. The evidence tending to so show must relate to what a prudent man would have been reasonably justified in doing based upon the actual known circumstances at the time, not upon what he might have done if the proper conditions had then prevailed.

While the existence of other land values does not qualify a locator's rights under the mining law if he has a valid claim, evidence of such other values may be considered in assessing the weight and credibility to be accorded the locator's testimony in determining whether a discovery has been made, and may be a factor in evaluating his bona fide intention to develop a mining operation.

United States v. J. R. Osborne et al. (Supp. on Judicial Remand), 28 IBLA 13 (Nov. 8, 1976)

EVIDENCE--Continued

WEIGHT--Continued

Past evidence of successful mining activity has limited probative value in determining whether there is a present discovery of a valuable mineral deposit on a mining claim, and assay reports can be given little weight when they are not supported by evidence as to who took the sample assayed, where it was taken, and what procedures were followed in taking the sample.

United States v. Lee Nicholson et al., 31 IBLA 224 (July 7, 1977)

Assay reports have limited probative value as to the existence of a valuable mineral deposit on a mining claim when they are not supported by evidence as to how and where the samples were taken.

United States v. John S. Porter, 37 IBLA 312 (Oct. 25, 1978)

United States v. John R. Burt et al., 43 IBLA 363 (Oct. 29, 1979)

EXCHANGES OF LAND
(*See also* Indian Lands, Private Exchanges, State Exchanges, Wildlife Refuges and Projects--if included in this Index.)

GENERALLY

The appraised values of offered and selected lands in a land exchange application made pursuant to the Federal Land Policy and Management Act of 1976 are properly determined where such values are set in accordance with the Uniform Appraisal Standards for Federal Land Acquisitions.

Paul Kellerblock, 38 IBLA 160 (Dec. 5, 1978)

The Act of Mar. 20, 1922, authorized exchanges for the purpose of consolidating national forest lands, if two criteria were satisfied: (1) the public interest would be benefited thereby; and (2) the proffered lands were chiefly valuable for national forest purposes.

Petro Leasco, Inc., 42 IBLA 345 (Aug. 31, 1979)

Where private land exchange was for surface rights only and applicant's warranty deed mistakenly conveys a fee simple absolute, the facts concerning which are well-documented, on equitable principles an applicant may be entitled to issuance of a disclaimer of interest in the mineral estate. 43 U.S.C. § 1745 (1976).

Dennis Potts, 42 IBLA 355 (Sept. 11, 1979)

FOREST EXCHANGES

An application for satisfaction of forest lieu selection rights filed after Dec. 31, 1969, will be rejected, as all such claims which had not been satisfied on that date, or for which no satisfaction had been demanded, expired by operation of law.

A forest lieu selection right is extinguished when the base lands are reconveyed by the United States to the principal (the party who originally conveyed the land to the United States). The purported agent or attorney-in-fact of the principal has no rights thereafter against

EXCHANGES OF LAND--Continued

FOREST EXCHANGES--Continued

the United States even if he recorded his power of attorney and other selection documents prior to the reconveyance.

Ben Cohen, Ray C. Nordstrom, 21 IBLA 330 (Aug. 18, 1975)

The Act of Mar. 20, 1922, authorized exchanges for the purpose of consolidating national forest lands, if two criteria were satisfied: (1) the public interest would be benefited thereby; and (2) the proffered lands were chiefly valuable for national forest purposes.

Petro Leasco, Inc., 42 IBLA 345 (Aug. 31, 1979)

EXECUTIVE ORDERS AND PROCLAMATIONS

Because of the President's delegation of his nonstatutory withdrawal authority to the Secretary of the Interior by E.O. 10355, the Secretary was endowed with sufficient authority to withdraw lands in issue without reliance upon secs. 17(d)(1) and 17(d)(2) of Alaska Native Claims Settlement Act. Thus, distinctions between those two sections are not herein dispositive of question of Secretary's authority to withdraw lands in PLO 5250.

Harry H. Wilson, 35 IBLA 349 (June 19, 1978)

FEDERAL COAL MINE HEALTH AND SAFETY ACT OF 1969

GENERALLY

In an underground coal mine owned and operated by two partners who are also the only miners in such mine, there being no employees, such owner-operators and the mine are, nevertheless, subject to the provisions of the Act, where the coal extracted from such mine enters commerce by being transported interstate.

Charles T. Sink, 5 IBMA 217 (Oct. 31, 1975) 82 I.D. 535

ABATEMENT

Withdrawal Orders

When an inspector finds that an operator has failed to abate a violation within the time originally fixed in a sec. 104(b) notice, he abuses his enforcement discretion by issuing a withdrawal order if, in the circumstances, the time for abatement should be further extended. 30 U.S.C. § 814(b) (1970).

Old Ben Coal Co., 6 IBMA 294 (Sept. 16, 1976) 83 I.D. 335

ADMINISTRATIVE PROCEDURE

Appeals

In the absence of a showing of good cause and the presence of objection by an opposing party, the Interior Board of Mine Operations Appeals will not grant an appellant leave to amend its brief on appeal so as to recast existing arguments or to raise new issues.

In the Matter of Old Ben Coal Co. (No. 24 Mine), 5 IBMA 211 (Oct. 20, 1975) 82 I.D. 525

FEDERAL COAL MINE HEALTH AND SAFETY ACT OF 1969--Continued

ADMINISTRATIVE PROCEDURE--Continued

Appeals--Continued

In a civil penalty proceeding, where an administrative law judge applies an amended version of a mandatory standard alleged to have been violated in lieu of the version in effect at the time the citation was issued, he errs, and where he has made all of the basic findings necessary to apply the correct version of the pertinent mandatory standard to the facts, the Board may so apply the correct standard in the interests of saving time and expense, rather than remanding. 30 U.S.C. § 819 (1970); 43 CFR 4.603, 4.605, 4.505(b).

Lone Star Steel Co., 7 IBMA 257 (Mar. 15, 1977) 84 I.D. 103

Dismissals

Where it does not appear from the pleadings that the party charged by the Mining Enforcement and Safety Administration is a proper party to a penalty proceeding, the action is properly dismissed.

Ohio Mining Co., 4 IBMA 121 (Apr. 17, 1975) 82 I.D. 167

Defaults

Generally

Under 43 CFR 4.544, an administrative law judge abuses his discretion in denying a motion to enter a default for failure to file an answer where the sole excuse for such failure is the Respondent's voluntary refusal to assign personnel or hire an attorney to perform that task.

Karst-Robbins Coal Co., Inc., 6 IBMA 78 (Mar. 22, 1976) 83 I.D. 88

Affirmative Defenses

In a default proceeding, an administrative law judge errs by sua sponte raising an affirmative defense. 43 CFR 4.582.

P & P Coal Co., 6 IBMA 86 (Mar. 22, 1976) 83 I.D. 91

Hearings

Amendments to Pleadings

The Interior Board of Mine Operations Appeals will not overturn a procedural ruling by an administrative law judge disallowing an amendment to a pleading unless the record manifests an abuse of discretion by showing such ruling to have a clear prejudicial effect upon the objecting party.

Gay Coal, Inc., 7 IBMA 245 (Mar. 10, 1977) 84 I.D. 99

Parties

Where an operator filed legal identity reports under two different corporate names without noting the change, and where, in a proceeding to assess a civil penalty, the notices of violation and the petition for assessment use only one of the names, there is no basis for dismissal for failure to serve and join the corporate

FEDERAL COAL MINE HEALTH AND SAFETY ACT OF 1969--Continued

ADMINISTRATIVE PROCEDURE--Continued

Parties--Continued

alias if the respondent in fact has defended throughout the administrative proceeding.

Harlan No. 4 Coal Co., 4 IBMA 241 (June 6, 1975) 82 I.D. 284

Reconsideration

Where an initial decision has been issued and a notice of appeal has been filed with the Board of Mine Operations Appeals, an administrative law judge is precluded by 43 CFR 4.582(c) from granting a subsequently filed motion for reconsideration, there being no jurisdiction.

In the Matter of Old Ben Coal Co. (No. 24 Mine), 6 IBMA 138 (May 6, 1976) 83 I.D. 207

Rulemaking

The "approval" function of the Secretary with respect to roof control plans, exercised at the enforcement level by a MESA district manager under 30 CFR 75.200-4, is not subject to the rulemaking provisions of secs. 101 and 301(d) of the Act. 30 U.S.C. §§ 811, 861(d) (1970).

Bishop Coal Co., 5 IBMA 231 (Nov. 18, 1975) 82 I.D. 553

APPEALS

Generally

Where a party fails to raise an issue in prehearing pleadings, or at the hearing, it is precluded from doing so before the Board unless such issue involves jurisdiction or mootness.

Clinchfield Coal Co., 6 IBMA 319 (Sept. 27, 1976) 83 I.D. 350

The filing of a timely notice of appeal stays the effect of an initial decision by an administrative law judge by operation of law, preventing it from becoming final, but such a stay is not a restraint on further enforcement action by MESA based upon the notice of violation or order of withdrawal under review. 43 CFR 4.594.

Old Ben Coal Co., 7 IBMA 272 (Mar. 30, 1977) 84 I.D. 124

Penalties

Where the record shows that the administrative law judge has taken into consideration all relevant mitigating factors supported by the evidence, and has fixed the amount of the penalty accordingly, in the absence of a showing of an abuse of discretion on his part, the Board on appeal will not further modify the penalty assessed.

Peabody Coal Co., 7 IBMA 318 (May 20, 1977) 84 I.D. 202

FEDERAL COAL MINE HEALTH AND SAFETY ACT OF 1969--Continued

APPLICATIONS FOR REVIEW

Generally

An administrative law judge is limited to deciding those issues actually presented in an Application for Review and is not authorized to raise any other substantive question sua sponte unless it pertains to jurisdiction.

Eastern Associated Coal Corp., 4 IBMA 1 (Jan. 22, 1975) 82 I.D. 22

Investigations

In the circumstances of a given case, an administrative law judge may properly rule that a hearing, by itself, is sufficient to satisfy the requirement of sec. 105 of the Act that the Secretary shall cause an investigation to be made as he deems appropriate.

American Coal Co., 8 IBMA 64 (July 14, 1977) 84 I.D. 394

Issues

An administrative law judge may not decide an issue not properly raised in an Application for Review nor agreed upon by the parties unless it pertains to jurisdiction.

Kanawha Coal Co., 7 IBMA 158 (Dec. 21, 1976) 83 I.D. 704

Pleading

Where an applicant has filed an application for review containing an incomplete request for relief, but later makes clear all the specifics of the relief desired *without objection*, a responding party shall be deemed on appeal to have waived any claim of error below based upon an administrative law judge's decision to grant the portion of the relief ultimately requested but not mentioned in such application. 43 CFR 4.532(a)(1).

Old Ben Coal Co., 6 IBMA 294 (Sept. 16, 1976) 83 I.D. 335

BURDEN OF PROOF

The Secretary's burden of proof regulation, 43 CFR 4.587, does not govern the order of proof or the obligation to establish a prima facie case. Such regulation applies only to the determination of which party loses in whole or in part, as appropriate, where the evidence is in equipoise with respect to an element or elements of proof in dispute.

Zeigler Coal Co., 4 IBMA 88 (Mar. 31, 1975) 82 I.D. 111

CLOSURE ORDERS

Generally

An Order of Withdrawal will be vacated where it is served upon a person who is neither responsible for the violation or condition alleged nor for the safety of the miners involved.

United States Steel Corp., 4 IBMA 175 (May 19, 1975) 82 I.D. 246

FEDERAL COAL MINE HEALTH AND SAFETY ACT OF 1969--Continued

CLOSURE ORDERS--Continued

Generally--Continued

Vacation or termination of a sec. 104(a) order of withdrawal by MESA does not preclude review of such order where timely application therefor is made pursuant to sec. 105 of the Act.

Eastern Associated Coal Corp., 4 IBMA 298 (June 27, 1975)
82 I.D. 311

In an application for review of an imminent danger withdrawal order where the alleged imminently dangerous conditions relate to roof conditions, there is no guarantee from the face of a modification order issued by a different inspector 36 hours after the issuance of the original order that the conditions described in the modification existed at the time of the issuance of the original order.

A modification order issued 36 hours after issuance of an imminent danger order while allegedly curing defects in the description in the original order of conditions or practices, did not satisfy the requirement of promptness of notification implicit in the mandate of sec. 107 of the Act.

Armco Steel Corp. (On Reconsideration), 8 IBMA 245 (Feb. 13, 1978)
85 I.D. 36

Imminent Danger

Extensive accumulations of loose coal, coal dust, and float coal dust in the presence of potential sources of ignition will support a finding of imminent danger.

Old Ben Coal Co., 4 IBMA 198 (June 6, 1975) 82 I.D. 264

Extensive accumulations of loose coal and coal dust in the presence of a damaged trailing cable will support a finding of imminent danger.

Old Ben Coal Co., 4 IBMA 224 (June 6, 1975) 82 I.D. 277

In an application for review of a sec. 104(a) order, the order is properly vacated where the conditions cited therein constitute violations of the operator's roof control plan, but fail to show the roof to be unsafe or inadequately supported.

Zeigler Coal Co., 5 IBMA 132 (Sept. 19, 1975)
82 I.D. 441

DISCRIMINATION

Filing Period

The 30-day period in sec. 110(b)(2) of the Act for the filing of an application for review of alleged discriminatory conduct is a statute of limitations and is therefore an affirmative defense which is waived if not timely raised. 30 U.S.C. § 820(b)(2) (1970).

Phil Baker v. The North American Coal Co., 8 IBMA 164 (Sept. 30, 1977)
84 I.D. 877

FEDERAL COAL MINE HEALTH AND SAFETY ACT OF 1969--Continued

DISCRIMINATION--Continued

Intention

Any miner seeking relief from alleged discriminatory conduct in retaliation for a safety complaint who has not directly reported to the Secretary or his authorized representative must show that it was his intention to contact the Federal authorities before the protection of the Act is invoked.

Phil Baker v. The North American Coal Co., 8 IBMA 164 (Sept. 30, 1977)
84 I.D. 877

Scope of Review

A finding that an operator violated mandatory safety standards is irrelevant in a proceeding brought by a miner pursuant to sec. 110(b)(1) of the Act. 30 U.S.C. § 820(b)(1) (1970).

Phil Baker v. The North American Coal Co., 8 IBMA 164 (Sept. 30, 1977)
84 I.D. 877

ENTITLEMENT OF MINERS

Generally

Responsibility for the enforcement of sec. 203(b)(3) is vested in the Secretary of the Interior. 30 U.S.C. § 843(b)(3) (1970).

Pocahontas Fuel Co., 7 IBMA 121 (Dec. 20, 1976)
83 I.D. 650

Compensation

Generally

A claim for compensation under sec. 110(a) at the rate allowable for withdrawal orders issued for an unwarrantable failure to comply with a mandatory standard is not sustainable where such claim is predicated upon an imminent danger withdrawal order issued under sec. 104(a) of the Act.

Billy F. Hatfield et al. v. Southern Ohio Coal Co., 4 IBMA 259 (June 25, 1975)
82 I.D. 289

A shift for the purposes of sec. 110(a) of the Act begins at that time when payment begins and terminates when payment terminates. If a sec. 104(a) or 104(b) order of withdrawal is issued between shifts and it has not been terminated, the miners idled thereby in the following shift are entitled to full compensation by the operator at their regular rates of pay for the period they are idled, but for not more than 4 hours of such shift.

Island Creek Coal Co., 5 IBMA 276 (Dec. 3, 1975)
82 I.D. 598

Miners are entitled to compensation under sec. 110(a) of the Act when secs. 103(f) and 104(c) withdrawal orders are in effect concurrently even if the 103(f) order was issued first. Such compensation, however, is computed with reference only to the duration of the sec. 104(c) orders.

Roscoe Page et al. v. Valley Camp Coal Co., 6 IBMA 1 (Jan. 28, 1976)
83 I.D. 28

ENTITLEMENT OF MINERS--Continued

Compensation--Continued

Generally--Continued

The phrase "regular rate of pay," as used in sec. 203(b)(3), means the rate of compensation due a miner under his job classification under the current wage agreement.

Pocahontas Fuel Co., 7 IBMA 121 (Dec. 20, 1976)
83 I.D. 690

A claim for compensation under sec. 110(a) for miners idled by a withdrawal order issued under sec. 104(a) of the Act is sustainable only as to those miners specifically withdrawn from the mine or an area of the mine by the terms of the withdrawal order as issued.

A claim for compensation under sec. 110(a) at the rate allowable for withdrawal orders issued for an unwarrantable failure to comply with a mandatory standard is not sustainable where such claim is predicated upon an imminent danger withdrawal order issued under sec. 104(a) of the Act.

United Mine Workers of America (Local Union No. 1993) v. Consolidation Coal Co., 8 IBMA 1 (June 3, 1977)
84 I.D. 254

Dismissal

An application for compensation filed under sec. 110(a) of the Act may not be dismissed pursuant to motion in the prehearing stage if it states any claim upon which relief may be granted.

Billy F. Hatfield et al. v. Southern Ohio Coal Co., 4 IBMA 259 (June 25, 1975)
82 I.D. 289

Discharge

Generally

In order to conclude that a discharge occurs "by reason of the fact that" a miner has engaged in protected reporting activities, an administrative law judge must find that such discharge would not have occurred but for such activities. 30 U.S.C. § 820(b)(1)(A) (1970).

Steve Shapiro v. Bishop Coal Co., 6 IBMA 28 (Mar. 2, 1976)
83 I.D. 59

Legitimate Causes

Where an operator asserts and establishes a legitimate cause for discharge the applicant for review must show by affirmative and persuasive evidence that the invocation of such cause was a pretext for an unlawful motive in order to show a violation of sec. 110(b)(1). 30 U.S.C. § 820(b)(1) (1970).

Steve Shapiro v. Bishop Coal Co., 6 IBMA 28 (Mar. 2, 1976)
83 I.D. 59

ENTITLEMENT OF MINERS--Continued

Discrimination

Hearings

Pleading

Where an applicant for review seeks relief only for an allegedly discriminatory discharge, an allegation to the effect that an act which preceded such discharge was discriminatory states a conclusion of law which is mere surplusage. 30 U.S.C. § 820(b)(2) (1970). 43 CFR 4.562(d).

Steve Shapiro v. Bishop Coal Co., 6 IBMA 28 (Mar. 2, 1976)
83 I.D. 59

Good Faith

Any miner seeking relief from an allegedly discriminatory discharge or refusal to rehire in retaliation for a safety complaint to the Secretary or his authorized representative and a refusal to work must show as part of his prima facie case that his complaint was based upon a good faith belief that there was a dangerous condition or practice.

Glenn Munsey v. Smitty Baker Coal Co., Inc., Ralph Baker, Smitty Baker, and R & E Coal Co., 8 IBMA 43 (June 30, 1977)
84 I.D. 336

EVIDENCE

Adverse Witnesses

In a civil penalty proceeding brought pursuant to sec. 109(a)(3) of the Act, it is entirely proper for the Mining Enforcement and Safety Administration to call to the stand and examine the adverse party's principal witness and to rely upon such testimony in an effort to make out a prima facie case.

Karst-Robbins Coal Co., Inc., 6 IBMA 78 (Mar. 22, 1976)
83 I.D. 88

Credibility of Testimony

Where substantial evidence of record corroborates the finding of the trial judge that the testimony of the witness for one party is more credible than testimony of the witnesses for another party, the Board, on appeal, will not disturb such finding of credibility.

Mountaineer Coal Co., 6 IBMA 308 (Sept. 24, 1976)
83 I.D. 341

Credibility of Witnesses

In the absence of a clear and convincing showing of prejudicial error, a judge's findings as to witnesses' credibility will not be disturbed on appeal.

Old Ben Coal Co., 8 IBMA 19 (June 28, 1977)
84 I.D. 332

FEDERAL COAL MINE HEALTH AND SAFETY ACT OF 1969--Continued

EVIDENCE--Continued

Photographs

Probative Weight

Where photographs are introduced in evidence, particularly for the purpose of showing shade and color, and the party introducing such evidence fails to establish the accuracy thereof in terms of being true representations of the shade and color of the subject of such photographs, it is proper for the trier of fact to give no probative weight to such evidence.

Mountaineer Coal Co., 6 IBMA 308 (Sept. 24, 1976) 83 I.D. 341

Preponderance

Where the only evidence offered to prove a violation of 30 CFR 75.507 was the credible opinion of the inspector which was offset by the credible opinion of the operator's witness of equal expertise, the Board will not overturn the administrative law judge's determination that the fact of violation was not established by a preponderance of the evidence. 43 CFR 4.587.

Rushton Mining Co., 5 IBMA 170 (Sept. 26, 1975) 82 I.D. 457

Prima Facie Case

Withdrawal orders and assessments of civil penalties are "sanctions" within the meaning of sec. 7(d) of the Administrative Procedure Act, 5 U.S.C. § 556(d) (1970), and may be imposed only if the Government produces reliable, probative, and substantial evidence, that is to say, establishes a prima facie case.

Zeigler Coal Co., 4 IBMA 88 (Mar. 31, 1975) 82 I.D. 111

The mere showing by MESA that a methane monitor was not set to indicate a true reading does not in itself prove a prima facie violation under 30 CFR 75.313 in that the terms "operative" and "properly maintained" refer to the functional properties of the monitor and not its calibration which is encompassed within the term "frequently tested."

Mid-Continent Coal and Coke Co., 8 IBMA 204 (Nov. 10, 1977) 84 I.D. 919

Relevancy

Where an administrative law judge refuses to accord probative value to certain admitted evidence on the ground that such evidence is irrelevant, he errs when his conclusion of irrelevancy is based upon mere presumption and surmise without evidentiary foundation.

Mary E. Coal Co., Inc., 7 IBMA 98 (Nov. 24, 1976) 83 I.D. 579

Sufficiency

Where the evidence fails to show the composition of an accumulation of materials to be loose coal, coal dust, or other combustible matter and does show that the accumulated materials were soft and ranged from damp to wet, there is no basis upon which to conclude that a violation of 30 U.S.C. § 864(a) (1970) has occurred.

Bishop Coal Co., 4 IBMA 52 (Mar. 14, 1975) 82 I.D. 89

FEDERAL COAL MINE HEALTH AND SAFETY ACT OF 1969--Continued

EVIDENCE--Continued

Sufficiency--Continued

A violation of sec. 304(a) of the Act is not established where neither the notice, order, nor the evidence at hearing shows the nature and extent of the accumulation of loose coal, coal dust, or float coal dust.

Itmann Coal Co., 4 IBMA 61 (Mar. 18, 1975) 82 I.D. 96

HEARINGS

Generally

It is error for an administrative law judge to render a decision on the merits in a review proceeding where a hearing on the merits is neither held nor waived by the parties.

Perry-Ross Coal Co., 5 IBMA 5 (July 25, 1975) 82 I.D. 345

Abuse of Discretion

An administrative law judge does not abuse his discretion by entering a default against an operator for failure to appear at a scheduled hearing after waiting for 38 minutes, and where the operator offers no excuse on the day scheduled for hearing for its tardiness but on the next day explains to the judge that the delay was due to "unforeseen traffic conditions."

Rushton Mining Co., 6 IBMA 221 (June 29, 1976) 83 I.D. 256

Admissibility of Evidence

The precedent Notice and Orders underlying a sec. 104(c)(2) Order of Withdrawal are admissible in evidence to establish their existence in the sec. 104(c) chain as part of prima facie case.

Kentland-Elkhorn Coal Corp., 4 IBMA 166 (May 14, 1975) 82 I.D. 234

When an inspector-trainee observes conditions and practices in a mine relevant to a notice or order issued under the Act by an inspector, the former's testimony in regard thereto is not inadmissible on the ground that he is not an authorized representative of the Secretary.

American Coal Co., 8 IBMA 64 (July 14, 1977) 84 I.D. 354

Burden of Proof

Where MESA, in a review proceeding of a sec. 104(c)(2) Order of Withdrawal, fails to establish a prima facie case that the Order was validly issued pursuant to sec. 104(c) of the Act, the operator has no burden to present rebuttal evidence and is entitled to the relief requested.

Kentland-Elkhorn Coal Corp., 4 IBMA 166 (May 14, 1975) 82 I.D. 234

HEARINGS--Continued

Motions

The denial of a motion for a continuance will not be disturbed on appeal, unless it appears that the denial was an abuse of the trial judge's discretion and resulted in specific prejudice.

Zeigler Coal Co., 4 IBMA 30 (Jan. 28, 1975) 82 I.D. 36

Notice and Service

An operator must be given fair notice adequate to enable it to determine with reasonable certainty the type and number of violations charged by MESA as the basis for assessment of penalties.

Old Ben Coal Co., 4 IBMA 198 (June 6, 1975) 82 I.D. 264

An operator must be given fair notice adequate to enable it to determine with reasonable certainty the type and number of violations alleged by MESA as the basis for assessment of penalties.

Old Ben Coal Co., 4 IBMA 224 (June 6, 1975) 82 I.D. 277

An operator must be given adequate notice of the charge in a civil penalty proceeding brought under sec. 109 of the Act. 30 U.S.C. § 819 (1970). Failure by an operator to object to lack of due notice below, if the opportunity arises, results in a waiver of a claim of error based thereon.

Eastern Associated Coal Corp., 5 IBMA 185 (Sept. 30, 1975) 82 I.D. 506

An operator is given fair notice of the type and number of violations charged where an order of withdrawal specifically enumerates conditions and alleges that each such condition is a violation of a specific mandatory safety standard.

Clinchfield Coal Co., 6 IBMA 319 (Sept. 27, 1976) 83 I.D. 350

Pleading

The acceptance by the administrative law judge of an answer to an order to show cause indicating the operator's desire for hearing and the subsequent issuance of a notice scheduling a hearing relieve the operator of the obligation to file an additional answer, and matters set forth in the Petition for Assessment of Civil Penalty are deemed to have been generally denied by the operator.

Rushton Mining Co., 6 IBMA 221 (June 29, 1976) 83 I.D. 256

Powers of Administrative Law Judges

Where an operator is held in default an administrative law judge errs in dismissing the proceeding for assessment of civil penalties without making a determination on the merits that no violation of the Act has occurred.

Ardee Coal Co., 4 IBMA 112 (Apr. 16, 1975) 82 I.D. 163

HEARINGS--Continued

Powers of Administrative Law Judges--Continued

An administrative law judge is required by 5 U.S.C. § 556 (1970) to conduct a hearing in a strictly impartial manner, not as a representative of an investigative or prosecuting authority.

Old Ben Coal Co., 4 IBMA 224 (June 6, 1975) 82 I.D. 277

An administrative law judge exceeds his authority in ordering MESA to cease and desist issuance of sec. 104(a) orders of withdrawal.

Eastern Associated Coal Corp., 4 IBMA 298 (June 27, 1975) 82 I.D. 311

Where an individual complied with the "self-certification" requirements of the regulations, actions by an administrative law judge in determining that an individual was ineligible to practice before Department and by the Board of Mine Operations Appeals to continue further consideration of the appeal pending a decision on the issue by the Solicitor, were unauthorized since the denial of an individual's right to practice before the Department in these circumstances constituted a disciplinary action which is within the sole authority of the Solicitor to adjudicate; therefore, the matter should have been referred to the Solicitor at the outset and the appeal should not have been delayed without the express approval of the Solicitor.

Final Decision of the Solicitor in the Matter of the Eligibility of Mr. James B. Kyper to Represent Eastern Associated Coal Corp. and Affinity Mining Co. Before the Department of the Interior, M-36883 (Feb. 9, 1976) 83 I.D. 131

The authority of an administrative law judge to issue show cause orders pursuant to 43 CFR 4.544(b) necessarily implies the authority to consider whether a response is adequate in showing cause why a default decision should not be entered against the respondent.

Associated Drilling, Inc., 6 IBMA 152 (May 27, 1976) 83 I.D. 220

An administrative law judge may sequester witnesses upon proper motion, but he may *not generally* preclude an attorney from consulting with a willing witness. 43 CFR 4.582.

In a case, where the record shows that an administrative law judge has clearly and grossly abused his discretion to the prejudice of both parties by undue and improper interrogation of witnesses and unnecessary interference in the presentation of a case, the Board may grant a new hearing before another trier of fact. 43 CFR 4.603.

Jack W. Parks v. L & M Coal Corp., 7 IBMA 172 (Dec. 23, 1976) 83 I.D. 710

Summary Decisions

Where no party has moved for summary decision under 43 CFR 4.590, it is error for an administrative law judge to use that regulation as a basis for proceeding to a decision in the absence of a hearing.

Island Creek Coal Co. and Virginia Pocahontas Co., 7 IBMA 1 (Sept. 30, 1976) 83 I.D. 419

HEARINGS--Continued

Waiver

Where a party to a proceeding has requested a hearing and there has been no unequivocal waiver thereof in writing, a hearing is required to be conducted by the provisions of 43 CFR 4.588, and failure to do so constitutes reversible error.

Island Creek Coal Co. and Virginia Pocahontas Co., 7 IBMA 1 (Sept. 30, 1976) 83 I.D. 419

IMMINENT DANGER

Generally

An administrative law judge errs in construing sec. 104(a) of the Act to grant the Secretary discretion to issue a mandatory order directing an operator to perform any action other than to withdraw persons from an area of a coal mine affected by an imminent danger.

Eastern Associated Coal Corp., 4 IBMA 1 (Jan. 23, 1975) 82 I.D. 22

Extent of Withdrawal

In the review of a withdrawal order issued under sec. 104(a), the inconsistency between an inspector's finding of imminent danger and his failure to withdraw men from one of the areas logically affected thereby, should not be relied on directly to find that no imminent danger existed but it is not improper to rely on that inconsistency indirectly in determining the inspector's credibility at the hearing.

Old Ben Coal Co., 8 IBMA 19 (June 28, 1977) 84 I.D. 332

Proximate Peril

A proximate peril to life and limb constituting an *imminent* danger does not exist where the potential for a disaster is so remote and speculative that a reasonable man would estimate that such disaster would not occur prior to abatement if normal operations to extract coal continued.

Rochester & Pittsburgh Coal Co., 5 IBMA 51 (July 31, 1975) 82 I.D. 368

A condition of float coal dust accumulations in energized electrical rectifier and starting boxes where arcing and sparking normally occur constitutes an imminent danger. 30 U.S.C. § 814 (1970).

Pocahontas Fuel Co., 6 IBMA 14 (Feb. 4, 1976) 83 I.D. 37

INCOMBUSTIBLE DUST PROGRAMS

Evidence

Sufficiency

The unchallenged testimony of an inspector that he followed instructions (departmental directives) pertaining to the gathering and packaging of dust samples, together with a laboratory analysis of dust samples, unchallenged

INCOMBUSTIBLE DUST PROGRAMS--Continued

Evidence--Continued

Sufficiency--Continued

by the operator, showing insufficient incombustible content, constitutes sufficient evidence to establish a violation of 30 CFR 75.403.

Mary E. Coal Co., Inc., 7 IBMA 98 (Nov. 24, 1976) 83 I.D. 579

MANDATORY HEALTH STANDARDS

Bathhouse and Changeroom Facilities

A violation of 30 CFR 75.1712-2, requiring that bathing and change-room facilities be provided in a central location convenient to all the miners where such facilities serve the miners of more than one mine, is not proved when the evidence shows that the average distance from the six mines served is 2.1 miles and the portal of the mine farthest from such facilities is only 1.1 miles farther than the portal of the nearest mine.

Carbon Fuel Co., 6 IBMA 20 (Feb. 20, 1976) 83 I.D. 39

MANDATORY SAFETY STANDARDS

Accumulations of Combustible Materials

Generally

The phrase "shall be cleaned up and not permitted to accumulate" encompasses but one act of violation of the safety standard set forth in sec. 304(a) of the Act and in 30 CFR 75.400.

Old Ben Coal Co., 8 IBMA 98 (Aug. 17, 1977) 84 I.D. 459

Congressional Purpose

The Congressional purpose of the safety standard contained in sec. 304(a) of the Act was to *minimize*, rather than *eliminate*, the inevitable accumulations of combustible materials in active workings of coal mines so that they would be unlikely to contribute to coal mine fires or propagate coal mine explosions.

Old Ben Coal Co., 8 IBMA 98 (Aug. 17, 1977) 84 I.D. 459

Coal Mine Operator Responsibility

At least three specific obligations are imposed upon coal mine operators by the provisions of sec. 304(a) of the Act and 30 CFR 75.400: (1) to inaugurate and maintain regular programs to clean up combustible materials that inevitably accumulate as a result of ordinary and routine mining operations; (2) to clean up as promptly after discovery as reasonable, extraordinary accumulations of combustibles resulting from such incidents as roof falls, belt breakage, and haulage accidents; and (3) to diligently pursue prompt discovery of such accumulations in active workings.

Old Ben Coal Co., 8 IBMA 98 (Aug. 17, 1977) 84 I.D. 459

MANDATORY SAFETY STANDARDS--Continued

Accumulations of Combustible Materials--Continued

Elements of Proof

The elements of proof required to establish a violation of the safety standard under sec. 304(a) of the Act, or 30 CFR 75.400, are: (1) that an accumulation of coal dust, float coal dust deposited on rock dusted surfaces, loose coal, or other combustible materials existed in the active workings of a coal mine; (2) that the coal mine operator was aware, or, by the exercise of due diligence, should have been aware of the existence of such accumulation; and (3) that the operator failed to clean up such accumulation, or undertake cleanup, within a reasonable time after discovery, or after discovery should have been made.

Old Ben Coal Co., 8 IBMA 98 (Aug. 17, 1977) 84 I.D. 459

Reasonable Time

What constitutes a "reasonable time" within which an operator may clean up an accumulation after discovery, in order to avoid violation of sec. 304(a) of the Act, or 30 CFR 75.400, depends upon a case-by-case evaluation of the likelihood of the spillage to contribute to a mine fire or to propagate an explosion. Factors to be considered include the mass, extent, combustibility, and volatility of the accumulation, as well as its proximity to an ignition source.

Old Ben Coal Co., 8 IBMA 98 (Aug. 17, 1977) 84 I.D. 459

Violations

The mere presence of a deposit or accumulation of coal dust, float coal dust, loose coal or other combustible materials in active workings in a coal mine is not, by itself, a violation of sec. 304(a) of the Act or 30 CFR 75.400.

Where a large accumulation of combustible material was present in the active workings of a coal mine, consisting mostly of spillage caused by a defective beltline, and the coal mine operator, within a reasonable time after discovery, dispatched a sufficient number of mine personnel to promptly clean up the accumulation, the operator *did not permit* the accumulation, and thus, did not violate the safety standard of sec. 304(a) of the Act or 30 CFR 75.400.

Old Ben Coal Co., 8 IBMA 98 (Aug. 17, 1977) 84 I.D. 459

Electric Equipment

The provisions of 30 CFR 75.512 require, *inter alia*, that all electric equipment be maintained in a manner to assure safe operating conditions, and the failure to properly guard drive chains on electrically operated loading machines constitutes a violation of such mandatory safety standard.

Bell Coal Co., Inc., 5 IBMA 155 (Sept. 23, 1975) 82 I.D. 450

Incombustible Contents

Where an administrative law judge finds that the methods for testing incombustible content of samples are reliable, results obtained by such methods indicating insufficient incombustible content will support a finding of violation of 30 CFR 75.403.

Old Ben Coal Co., 4 IBMA 198 (June 6, 1975) 82 I.D. 264

Maintenance of Electric Equipment

Proof of defective brakes on a roof bolt machine and of a missing guard on a belt chain drive constitutes prima facie evidence of a failure to maintain electric equipment "properly." 30 CFR 75.512.

Eastern Associated Coal Corp., 5 IBMA 185 (Sept. 30, 1975) 82 I.D. 506

Methane Accumulations

Neither the Act nor the regulations provides that the mere presence of methane gas in excess of 1.0 volume per centum is per se a violation.

Mid-Continent Coal and Coke Co., 8 IBMA 204 (Nov. 10, 1977) 84 I.D. 919

Methane Tests

Sec. 303(h)(1) of the Act and its counterpart, 30 CFR 75.307, pertain only to methane tests at working places where electric equipment is operated or about to be operated. It is improper to cite an operator for violation of this standard when an operator fails to make methane tests at a working place where electrically operated equipment is neither present nor about to be operated.

United States Steel Corp., 5 IBMA 293 (Dec. 12, 1975) 82 I.D. 602

Permissibility

Generally

Once a permissibility specification becomes effective, machinery already or subsequently equipped with a part covered thereby cannot be maintained in permissible condition unless that part is kept in operational status.

Eastern Associated Coal Corp., 5 IBMA 185 (Sept. 30, 1975) 82 I.D. 506

Brakes on Electric Face Equipment

The failure to maintain the brakes on an off-standard shuttle car in operational condition is a violation of the operator's obligation under 30 CFR 75.503 to maintain electric face equipment in permissible condition. 30 CFR 18.20(f).

Eastern Associated Coal Corp., 5 IBMA 185 (Sept. 30, 1975) 82 I.D. 506

Schedule 2 G

Schedule 2 G, codified at 30 CFR Part 18, was effectively republished in accordance with sec. 101(j) of the Act, 30 U.S.C. § 811(j) (1970), at 35 FR 17890 (Nov. 20, 1970), where it was incorporated under 30 CFR 75.506.

Eastern Associated Coal Corp., 5 IBMA 185 (Sept. 30, 1975) 82 I.D. 506

MANDATORY SAFETY STANDARDS--Continued

Permissibility--Continued

Switches on Electric Face Equipment

The failure to maintain the reset mechanism on electric face equipment switches in operational condition is a violation of an operator's obligation under 30 CFR 75.505 to maintain electric face equipment in permissible condition. 30 U.S.C. § 878(i) (1970), 30 CFR 75.520.

Eastern Associated Coal Corp., 5 IBMA 185 (Sept. 30, 1975) 82 I.D. 506

Failure to maintain the reset mechanism on electric face equipment in operative condition is not a violation of an operator's obligation under 30 CFR 75.505 to maintain electric face equipment in permissible condition.

Eastern Associated Coal Corp. (On Reconsideration), 7 IBMA 14 (Sept. 30, 1976) 83 I.D. 425

Protective Equipment

Under 30 CFR 77.403, 36 FR 9364 (May 22, 1971), an operator was obliged to provide front-end loaders with roll protection, conditioned, however, on there being a necessity therefor, and when there was only an extremely slight chance of roll over, there was no such necessity and accordingly no obligation to do so.

Lone Star Steel Co., 7 IBMA 257 (Mar. 15, 1977) 84 I.D. 103

Recording Examinations

The results of examinations of emergency escapeways and facilities and for smokers' articles must be recorded weekly pursuant to 30 CFR 75.1801 as read in conjunction with 30 CFR 75.1702 and 30 CFR 75.1704.

Leckie Smokeless Coal Co., 5 IBMA 12 (July 29, 1975) 82 I.D. 353

Monthly examinations of circuit breakers and their auxiliary devices protecting high voltage circuits must be recorded monthly pursuant to 30 CFR 75.800-4 as read in conjunction with § 75.800-3 and § 75.1806.

Leckie Smokeless Coal Co., 5 IBMA 65 (Aug. 7, 1975) 82 I.D. 375

Roof Control

Under sec. 302(a) of the Act, the failure to prevent a person from proceeding beyond the last permanent roof support into an area lacking in the adequate temporary support required by the existing roof control plan constitutes a single violation. 30 U.S.C. § 862(a) (1970), 30 CFR 75.200.

Eastern Associated Coal Corp., 4 IBMA 184 (May 23, 1975) 82 I.D. 250

MANDATORY SAFETY STANDARDS--Continued

Roof Control--Continued

Individual provisions of a roof control plan, once adopted and approved by the Secretary are enforceable as mandatory standards as to the particular mine for which the plan was approved.

Zeigler Coal Co., 5 IBMA 132 (Sept. 19, 1975) 82 I.D. 441

A violation of 30 CFR 75.200 is established where it is shown that an operator failed to comply with the provisions of its approved roof control plan in that the roof bolting pattern prescribed therein was destroyed by loosening two roof bolts for use as cable anchors.

Peabody Coal Co., 8 IBMA 121 (Aug. 24, 1977) 84 I.D. 469

Roof Control Plans

Generally

An operator cannot be cited for a violation of a revision of a purported approved roof control plan unless such revision is first adopted by such operator. 30 U.S.C. § 862(a) (1970). 30 CFR 75.200, 75.200-2.

Bishop Coal Co., 5 IBMA 231 (Nov. 18, 1975) 82 I.D. 553

The obligation to "carry out" the provisions of an adopted, approved, and effective roof control plan is a mandatory safety standard. The failure to "carry out" particular provisions of the plan is a violation of such standard. 30 U.S.C. §§ 802(l), 826(a) (1970).

In the Matter of Affinity Mining Co. (Petitioner) v. MESA, UMWA (Respondents) (On Reconsideration), 6 IBMA 100 (Mar. 31, 1976) 83 I.D. 108

Evidence

Where the undisputed evidence adduced by MESA established that the operator failed to have crossbars installed when hillseams are encountered as required by the roof control plan, the Mining Enforcement and Safety Administration made out a prima facie case of violation of sec. 302(a) of the Act. 30 U.S.C. § 862(a) (1970). 30 CFR 75.200.

Dixie Fuel Co., Grays Knob Coal Co., 7 IBMA 71 (Nov. 9, 1976) 83 I.D. 551

Self-rescue Devices

Where a mine employee is observed underground without a self-rescue device, the operator properly may be held to be in violation of 30 CFR 75.1714-2(a).

Rushton Mining Co., 8 IBMA 255 (Feb. 16, 1978) 85 I.D. 63

Spalling Ribs

Neither the fact that a condition, such as spalling ribs, is difficult to control nor the fact that such a condition is a natural condition of the mining process precludes an inspector from properly issuing a notice

FEDERAL COAL MINE HEALTH AND SAFETY ACT OF 1969--Continued

MANDATORY SAFETY STANDARDS--Continued

Spalling Ribs--Continued

of violation of 30 CFR 75.200. 30 U.S.C. § 862(a) (1970).

Dixie Fuel Co., Grays Knob Coal Co., 7 IBMA 71 (Nov. 9, 1976) 83 I.D. 551

Ventilation Plan

Evidence of failure by an operator to adhere to its approved ventilation plan will support the issuance of a notice and order under sec. 104(b) of the Act.

Zeigler Coal Co., 4 IBMA 30 (Jan. 28, 1975) 82 I.D. 36

Evidence of failure by an operator to comply with the provisions of its approved ventilation plan constitutes a violation of 30 CFR 75.316.

Peabody Coal Co., 8 IBMA 121 (Aug. 24, 1977) 84 I.D. 469

Violations

Negligence

An operator's freedom from negligence is not a factor to be considered in determining whether a violation of a mandatory safety standard occurred.

Rushton Mining Co., 8 IBMA 255 (Feb. 16, 1978) 85 I.D. 63

MINES SUBJECT TO THE ACT

In an underground coal mine owned and operated by two partners who are also the only miners in such mine, there being no employees, such owner-operators and the mine are, nevertheless, subject to the provisions of the Act, where the coal extracted from such mine enters commerce by being transported interstate.

Charles T. Sink, 5 IBMA 217 (Oct. 31, 1975) 82 I.D. 535

MODIFICATION OF APPLICATION OF MANDATORY HEALTH STANDARDS

Jurisdiction

Sec. 301(c) of the Federal Coal Mine Health and Safety Act of 1969 does not authorize modification of the application of mandatory *health* standards (sec. 301(c) and 43 CFR 4.500).

Kanawha Coal Co., 5 IBMA 299 (Dec. 12, 1975) 82 I.D. 605

MODIFICATION OF APPLICATION OF MANDATORY SAFETY STANDARDS

Generally

A petition for Modification of the Application of a Mandatory Safety Standard will not be granted where petitioner alleges but does not establish that in all respects and at all times the modification sought will be as safe as, or safer than, the mandatory safety standard.

Kentland-Elkhorn Coal Corp., Eastern Coal Corp., 4 IBMA 130 (Apr. 30, 1975) 82 I.D. 195

FEDERAL COAL MINE HEALTH AND SAFETY ACT OF 1969--Continued

MODIFICATION OF APPLICATION OF MANDATORY SAFETY STANDARDS --Continued

Generally--Continued

An operator's Petition for Modification of the application of a mandatory safety standard will be denied where it fails to establish that the proposed alternative method will at all times guarantee no less than the same measure of safety protection to the miners as the mandatory standard.

Eastern Associated Coal Corp., 4 IBMA 273 (June 26, 1975) 82 I.D. 295

A petition for modification alleging in substance an erroneous interpretation of a mandatory safety standard by MESA does not state a claim upon which relief can be granted under sec. 301(c) of the Act. 30 U.S.C. § 861(c) (1970).

Itmann Coal Co., 6 IBMA 121 (Apr. 15, 1976) 83 I.D. 175

A petition for modification of the application of a regulation establishing criteria for approval of individual mine ventilation plans does not state a claim upon which relief can be granted under sec. 301(c) of the Act because such regulation is not a mandatory safety standard. 30 U.S.C. §§ 802(*l*), 861(c) (1970).

Old Ben Coal Co., 6 IBMA 163 (May 27, 1976) 83 I.D. 225

A Petition for Modification of the application of 30 CFR 75.1405 alleging that the mandatory standard does not apply to rubber-rail equipment which operates both on and off track fails to state a claim for which relief can be granted under sec. 301(c) of the Act. 30 U.S.C. § 861(c) (1970).

An administrative law judge lacks discretion under sec. 301(c) to grant an operator purely declaratory relief sought in a Petition for Modification of the application of a mandatory safety standard. 30 U.S.C. § 861(c) (1970).

Oneida Mining Co., North American Coal Corp., The Helen Mining Co., The Florence Mining Co., 6 IBMA 343 (Sept. 29, 1976) 83 I.D. 405

Where, in a proceeding to modify the application of the mandatory safety standard requiring that self-propelled electric face equipment be equipped with canopies or cabs (30 CFR 75.1710-1), a coal mine operator proves that the state of relevant mining operational conditions varies from time to time and does not remain static, it is error for the administrative law judge to grant relief on the basis of the state of such conditions at a particular point in time or at a particular operating location in the mine in disregard of the variability of these conditions.

It is error to grant relief in mining sections with mining heights above 56 inches where the Petition for Modification prayed for relief only in sections where the mining height is 56 inches or less.

It is error for the judge to deny all relief that is requested where the evidence of record will permit the granting of some relief.

Southern Ohio Coal Co., 7 IBMA 331 (May 23, 1977) 84 I.D. 268

MODIFICATION OF APPLICATION OF MANDATORY SAFETY STANDARDS --Continued

Automatic couplers

Where the evidence of record shows that a link aligner may not always be immediately available, as opposed to the ever-present automatic coupler, presenting an opportunity for a miner to position himself between mine cars to perform a coupling, a Petition for Modification to permit the use of link aligners must be denied as not providing the same degree of safety as automatic couplers in all respects and at all times.

Where the proponent of a Petition for Modification of the application of 30 CFR 75.1405 is unable to rebut evidence produced by MESA based upon measurements and calculations showing automatic couplers to be suitable for use in the subject mine with no diminution of safety to the miners, the Petition will be denied.

Canterbury Coal Co., 6 IBMA 276 (Sept. 13, 1976)
83 I.D. 325

Burden of Proof

Where an operator has established a prima facie case of diminution of safety, the issue of the availability of technology which would allow compliance with a mandatory safety standard without a diminution of safety is an affirmative defense available to the Mining Enforcement and Safety Administration, and it is not necessary for the operator to prove that *no* such technology exists in order to prevail.

Southern Ohio Coal Co., 7 IBMA 331 (May 23, 1977)
84 I.D. 208

Diminution of Safety

Where an operator presents prima facie evidence in a sec. 301(c) proceeding proving that the application of a mandatory standard to a particular mine will result in a diminution of safety to the miners in such mine in the form of greatly increased prospects of roof fall, and its case prevails by a preponderance of the evidence over that presented by opposing parties, the modification may be granted.

Cannelton Industries, Inc., 4 IBMA 74 (Mar. 21, 1975)
82 I.D. 102

Publication

Pursuant to subsection (c) of sec. 301, notice of receipt of a petition for modification must be published in the *Federal Register*, but such publication requirement does not apply to issuance of an adjudicative decision.

Cannelton Industries, Inc., 4 IBMA 74 (Mar. 21, 1975)
82 I.D. 102

Roof Control Plans

The Secretary's authority to approve or disapprove roof control plans and revisions thereof under sec. 302(a) of the Act has been delegated exclusively to MESA, and such plans are not subject to modification by way of petitions to modify the application of a mandatory standard filed pursuant to sec. 301(c) of the Act.

In the Matter of Affinity Mining Co. (Petitioner) v. Mining Enforcement and Safety Administration (Respondent), United Mine Workers of America (Respondent), 5 IBMA 36 (July 31, 1975) 82 I.D. 362

MODIFICATION OF APPLICATION OF MANDATORY SAFETY STANDARDS --Continued

Roof Control Plans--Continued

The application of particular provisions of a roof control plan is subject to modification under sec. 301(c) of the Act. 30 U.S.C. § 861(c) (1970).

In the Matter of Affinity Mining Co. (Petitioner) v. MESA, UMWA (Respondents) (On Reconsideration), 6 IBMA 100 (Mar. 31, 1976) 83 I.D. 108

NOTICES OF VIOLATION

Abatement

Respirable dust samples required to be taken pursuant to 30 CFR 70.250 may be taken during any shift so long as the miner whose work atmosphere is being sampled is employed in his usual occupation.

United States Steel Corp., 7 IBMA 109 (Nov. 29, 1976)
83 I.D. 584

Party to be Charged

Where trucks owned by a haulage contractor operate without backup alarms on coal mine property in violation of 30 CFR 77.410, and thus endanger the miners employed by the principal coal mine operator, the proper party to be charged in the resulting notice of violation is the principal coal mine operator, since it has the direct responsibility to assure the health and safety of such miners.

Peggs Run Coal Co., Inc., 5 IBMA 175 (Sept. 30, 1975)
82 I.D. 516

An owner-operator of a coal mine, rather than the independent contractor, was properly charged with a violation where its employees were endangered by the violation and it could have removed the hazard with a minimum of effort. Sec. 3(d) of the Act. 30 U.S.C. § 802(d).

West Freedom Mining Corp., Black Fox Mining and Development Corp., AB-HS Coal Corp., Perry-Ross Coal Co., 5 IBMA 329 (Dec. 17, 1975) 82 I.D. 618

Where the miners employed by an operator of a coal mine are exposed to a safety hazard created by the lack of required backup alarms on delivery trucks owned by a seller of coal and where the operator is in a realistic position to prevent or abate the violation with a minimum of due diligence, such operator is a proper party to be charged with the violation. 30 CFR 77.410.

Armco Steel Corp., 6 IBMA 64 (Mar. 15, 1976)
83 I.D. 77

Reasonableness of Time

In a review proceeding, an administrative law judge abuses his discretion under sec. 105(b) by vacating a notice of violation on the ground that the time originally fixed therein is unreasonably short because such action is inconsistent with the Secretary's statutory obligation under sec. 109 to assess a civil penalty for every violation of the mandatory health or safety standards. 30 U.S.C. § 815(b) (1970).

Old Ben Coal Co., 6 IBMA 294 (Sept. 16, 1976)
83 I.D. 335

NOTICES OF VIOLATION--Continued

Reasonableness of Time--Continued

Where a pattern of granting extensions of time is established to permit step-by-step accomplishment of an approved noise-control plan, an additional extension of time granted in conformance with such pattern will not be held by the Board to be unreasonable.

Kanawha Coal Co., 7 IBMA 158 (Dec. 21, 1976)
83 I.D. 704

Reportable Accidents

The unintentional covering by intentional roof fall of a continuous mining machine during pillar mining constitutes a reportable accident pursuant to sec. 103(e) of the Act, as implemented by 30 CFR 80.1(b)(10).

United States Steel Corp., 8 IBMA 156 (Sept. 30, 1977)
84 I.D. 825

Sufficiency

Where neither an order nor modification thereof describes a condition or practice constituting an alleged violation of a mandatory safety or health standard as required by sec. 104(e) of the Act, an administrative law judge is correct in vacating any proposed penalty assessment based on such inadequate notice. 30 U.S.C. § 814(e) (1970).

Ashland Mining and Development Co., Inc., 5 IBMA 259 (Nov. 19, 1975)
82 I.D. 578

Where a notice of violation does not clearly indicate which of two possible standards is alleged to be violated and an inspector's testimony supports neither the written description nor the section of the regulations cited, such notice is properly vacated.

Tilden Coal Co., 7 IBMA 57 (Oct. 15, 1976) 83 I.D. 515

It is improper to cite a general regulation governing ventilation plans where the alleged violation is based solely on an excessive accumulation of methane gas.

Mid-Continent Coal and Coke Co., 8 IBMA 204 (Nov. 10, 1977)
84 I.D. 919

PARTIES

Failure to Answer

Under 43 CFR 4.507, a "statutory party" who fails to file an initial responsive pleading loses its status as a party and is subject to dismissal.

Old Ben Coal Co., 5 IBMA 19 (July 30, 1975) 82 I.D. 355

Failure to Participate

Where a party to an application for review proceeding under sec. 105 of the Act deliberately and persistently fails to participate in such proceeding before the administrative law judge, it may be dismissed as a party within the discretion of the judge or the Interior

PARTIES--Continued

Failure to Participate--Continued

Board of Mine Operations Appeals. 30 U.S.C. § 815 (1970).

In the Matter of Old Ben Coal Corp. (No. 24 Mine), 4 IBMA 104 (Apr. 10, 1975)
82 I.D. 160

The Interior Board of Mine Operations Appeals will not overturn an administrative law judge's dismissal of a party in a review proceeding for deliberate and persistent failure to participate where no abuse of discretion has been shown.

Old Ben Coal Co., 5 IBMA 19 (July 30, 1975) 82 I.D. 355

The obligation of a representative of miners to file a responsive pleading under 43 CFR 4.507(c), in order to thereafter participate in the proceeding, arises after the operator has perfected service of the application for review upon such representative.

In the Matter of Alabama By-Products Corp. (Maxine Mine), 5 IBMA 100 (Aug. 25, 1975)
82 I.D. 409

PENALTIES

Admissibility of Previous Violations

Only those violations charged prior to those in issue, and for which penalties have been paid, settled by compromise, or finally ordered to be paid by the Department, are admissible as evidence in considering an operator's history of previous violations.

Peggs Run Coal Co., Inc., 5 IBMA 144 (Sept. 22, 1975)
82 I.D. 445

A violation for which a penalty is paid by an operator which is less than the amount originally assessed by MESA is admissible as evidence in considering an operator's history of previous violations. 30 U.S.C. § 819(a)(1) (1970).

Peggs Run Coal Co., Inc., 6 IBMA 212 (June 28, 1976)
83 I.D. 245

Amounts

In a sec. 109 de novo proceeding, an administrative law judge may determine an amount of civil penalty for violations charged and found to have occurred higher than that proposed by the MESA Assessment Office for such violations where such determination is based upon consideration of the statutory criteria and findings which justify his assessments.

Old Ben Coal Co., 4 IBMA 198 (June 6, 1975) 82 I.D. 264

Old Ben Coal Co., 4 IBMA 224 (June 6, 1975) 82 I.D. 277

Gay Coal, Inc., 7 IBMA 245 (Mar. 10, 1977) 84 I.D. 95

An obvious roof control violation which could have been discovered and abated by the operator, and which results

FEDERAL COAL MINE HEALTH AND SAFETY ACT OF 1969--Continued

PENALTIES--Continued

Amounts--Continued

in a roof fall injuring a miner, warrants a sizable penalty appropriate to the circumstances and commensurate with the deterrent intent of the Act.

Island Creek Coal Co., 6 IBMA 240 (June 30, 1976)
83 I.D. 264

Inasmuch as sec. 109 of the Act mandates the assessment of a civil penalty where a violation has been found to exist, it is error to assess a zero penalty in such circumstances because a zero penalty is no penalty. 30 U.S.C. § 819(a) (1970).

B. B. Coal Co., 7 IBMA 64 (Oct. 27, 1976) 83 I.D. 526

Criteria

Official Notice

Where an administrative law judge bases ultimate findings of fact upon officially noticed facts and leaves the record open for submission of rebuttal, the failure to take advantage of such opportunity for rebuttal results in waiver of objections.

Eastern Associated Coal Corp., 5 IBMA 185 (Sept. 30, 1975)
82 I.D. 506

Elements of Proof

Although the fact of violation of a mandatory health or safety standard by a corporate coal mine operator is a necessary element of proof, such proof is not legally required to be established in a separate or consolidated proceeding against such operator as a condition precedent to instituting a proceeding against an agent of such operator under sec. 109(c) of the Act. 30 U.S.C. § 819(c) (1970).

Everett L. Pritt, 8 IBMA 216 (Nov. 30, 1977)
84 I.D. 960

Existence of Violation

Generally

A violation of 30 CFR 75.517 is established where it is shown that the outer protective insulating jacket of a trailing cable is cut through to the extent that the inner phase lead insulation is exposed.

Old Ben Coal Co., 4 IBMA 224 (June 6, 1975) 82 I.D. 277

A violation of 30 CFR 75.805 is established where it is shown that Miller plugs, connectors of the singlephase variety, are being employed on high-voltage electrical equipment.

Peabody Coal Co., 7 IBMA 318 (May 20, 1977)
84 I.D. 202

Evidence

A fact may be inferred from circumstantial evidence, and such fact may be the basis of further inference leading to the ultimate or sought for fact.

FEDERAL COAL MINE HEALTH AND SAFETY ACT OF 1969--Continued

PENALTIES--Continued

Existence of Violation--Continued

Evidence--Continued

Where an inspector describes a condition alleging that a violation occurred during the working shift immediately preceding the shift in which the inspection is made, a prima facie case that the violation occurred during the preceding shift may be made out by means of an inference drawn from facts established by direct evidence, provided that such inference is more probable than any other inference which can be drawn from such facts.

Rushton Mining Co., 6 IBMA 329 (Sept. 29, 1976)
83 I.D. 399

Mitigation

The amounts assessed as civil penalties will not be disturbed where it appears that an administrative law judge has given weight to evidence of economic losses suffered as a result of a vacated withdrawal order.

Zeigler Coal Co., 5 IBMA 132 (Sept. 10, 1975)
82 I.D. 441

Economic losses suffered by an operator as a result of a vacated withdrawal order need not be considered as a mitigating factor in a penalty proceeding arising out of a condition or practice cited in such order where such losses are not affirmatively pleaded at or before the hearing. Sec. 109(a) of the Act. 30 U.S.C. § 819(a) (1970).

Zeigler Coal Co., 5 IBMA 338 (Dec. 17, 1975)
82 I.D. 622

Where a withdrawal order is found to be validly issued, economic loss due to such order is properly excluded from consideration as a mitigating factor in determining a penalty assessment pursuant to sec. 109(a) of the Act.

Zeigler Coal Co., 5 IBMA 356 (Dec. 19, 1975)
82 I.D. 636

Negligence

An operator can be liable for a civil penalty under sec. 109 of the Act even though there is no showing of negligence on his part. Negligence is considered solely in determining the amount of the penalty.

Webster County Coal Corp., 7 IBMA 264 (Mar. 16, 1977)
84 I.D. 111

Procedure of Assessment

A technical defect in the assessment process does not affect the jurisdiction of an administrative law judge and, in the absence of prejudice to a party, may be cured by an amendment to the petition.

Peabody Coal Co., 7 IBMA 318 (May 20, 1977)
84 I.D. 202

FEDERAL COAL MINE HEALTH AND SAFETY ACT OF 1969--Continued

PENALTIES--Continued

Reasonableness

In view of the operator's negligence in failing to provide "competent, substitute, supervisory personnel" and the seriousness of the resultant mandatory safety standard violation of 30 CFR 75.301, a civil penalty assessment of $400 is not excessive.

Rushton Mining Co., 8 IBMA 255 (Feb. 16, 1978)
85 I.D. 63

REGULATIONS

Generally

An operator's failure to notify MESA immediately of a gas ignition, in accordance with 30 CFR 80.11, constitutes a violation of sec. 103(e) of the Act (30 U.S.C. § 813(e) (1970)).

United States Steel Corp., 8 IBMA 230 (Dec. 21, 1977)
84 I.D. 1003

RESPIRATORY DUST PROGRAM

Generally

An operator may challenge whether scientific procedures set forth in the regulations were being complied with in a given case, but may not raise issues regarding their scientific reliability in an administrative proceeding inasmuch as such issues would pertain to the validity of the Secretary's regulations, a matter beyond the authority of the Board.

Eastern Associated Coal Corp., 5 IBMA 185 (Sept. 30, 1975)
82 I.D. 506

A notice of violation of 30 CFR 70.100(a) must be vacated where an operator overcomes MESA's prima facie case by establishing as an affirmative defense by a preponderance of the evidence that it was cited for concentrations of dust which are not wholly "respirable" within the meaning of the Act and regulations. 30 U.S.C. § 878(k) (1970) and 30 CFR 70.2(i).

Eastern Associated Coal Corp. (On Reconsideration), 7 IBMA 14 (Sept. 30, 1976)
83 I.D. 425

Coal dust particulates in excess of 5 microns in size are not "respirable dust" as a matter of law under 30 U.S.C. § 878(k) (1970) and 30 CFR 70.2(i).

Eastern Associated Coal Corp. (On Reconsideration En Banc), 7 IBMA 133 (Dec. 20, 1976)
83 I.D. 695

Sufficiency of Evidence

Under 30 CFR 70.220(a)(3), 35 FR 5544 (Apr. 3, 1970), MESA must prove the existence of an underlying notice of violation of 30 CFR 70.100(a) or (c) if the existence of such notice is in issue.

Eastern Associated Coal Corp., 5 IBMA 185 (Sept. 30, 1975)
82 I.D. 506

FEDERAL COAL MINE HEALTH AND SAFETY ACT OF 1969--Continued

REVIEW OF NOTICES AND ORDERS

Generally

The validity of the precedent notice and orders is not in issue in a proceeding for review of an order of withdrawal issued pursuant to sec. 104(c)(2) of the Act.

Kentland-Elkhorn Coal Corp., 4 IBMA 166 (May 14, 1975)
82 I.D. 234

Zeigler Coal Co., 5 IBMA 346 (Dec. 18, 1975)
82 I.D. 632

The validity of the precedent notice and order is not in issue in a proceeding for review of an Order of Withdrawal issued pursuant to sec. 104(c)(2) of the Act unless applications for review are filed within 30 days of the issuance of the precedent notice and order (43 CFR 4.530(c)).

Zeigler Coal Co., 6 IBMA 182 (June 22, 1976)
83 I.D. 232

In a proceeding for review of a sec. 104(c)(2) order of withdrawal, the validity, substantive or procedural, of a precedent sec. 104(c)(2) order of withdrawal is not in issue and may not be decided by the Office of Hearings and Appeals.

The erroneous and inarticulate comprehension of the standard for unwarrantable failure by the issuing inspector does not prejudice the operator where the facts as found support a conclusion of unwarrantable failure using the proper standard.

Pocahontas Fuel Co., 8 IBMA 136 (Sept. 28, 1977)
84 I.D. 488

Delegation

The Secretary has delegated his jurisdiction to review orders issued pursuant to sec. 103 of the Act to the Office of Hearings and Appeals for decision, initially by the administrative law judges, and ultimately by the Interior Board of Mine Operations Appeals.

Eastern Associated Coal Corp., 5 IBMA 74 (Aug. 15, 1975)
82 I.D. 392

Dismissal of Applications

Failure of the applicant for review to attend a prehearing conference after receiving notice of its scheduling is ground for dismissal of the application.

Perry-Ross Coal Co., 5 IBMA 5 (July 25, 1975)
82 I.D. 349

An application for review of a notice modifying an earlier notice of violation issued pursuant to sec. 104(b) of the Act should be dismissed where the condition cited in the earlier notice has been fully abated and a notice of termination issued.

Affinity Mining Co., 5 IBMA 126 (Sept. 15, 1975)
82 I.D. 439

REVIEW OF NOTICES AND ORDERS--Continued

Dismissal of Applications--Continued

A representative of miners has a statutory and regulatory right to review of a notice of termination containing a finding of abatement as an incident to a timely filed application for review of a previous sec. 104(b) notice of violation in which such representative contends that such notice fixed a time for abatement that was unreasonable. 30 U.S.C. § 815 (1970), 43 CFR 4.1, 4.500, 4.530, 4.533.

An application for review of an original or modified sec. 104(b) notice of violation filed by a representative of miners does not become moot merely because MESA issues a notice of termination containing a finding of abatement. 30 U.S.C. § 815 (1970).

Affinity Mining Co. (On Reconsideration), 6 IBMA 193 (June 25, 1976) 83 I.D. 236

Jurisdiction

The Secretary has both the jurisdiction and the obligation, upon appropriate application therefor, to review an order issued pursuant to sec. 103 of the Act.

Eastern Associated Coal Corp., 5 IBMA 74 (Aug. 15, 1975) 82 I.D. 392

The Secretary of the Interior has jurisdiction to assess a civil penalty under sec. 109(c) of the Act, 30 U.S.C. § 819(c) (1970), and such penalty is not criminal in nature.

In the Matter of Daniel Hensler, 5 IBMA 115 (Sept. 12, 1975) 82 I.D. 434

Notice and Service

Pursuant to sec. 105(a) of the Act, 30 U.S.C. § 815(a) (1970), and 30 CFR 81.5, an operator is obliged to serve an application for review on the appropriate representative of miners at the address listed in the valid, existing certificate of representation.

In the Matter of Alabama By-Products Corp. (Maxine Mine), 5 IBMA 100 (Aug. 25, 1975) 82 I.D. 409

Scope of Review

Where an administrative law judge erroneously finds the evidence of record to be in equipoise with respect to all disputed elements of proof, the Interior Board of Mine Operations Appeals may make its own findings from the record determining the preponderant weight of the evidence. 43 CFR 4.605.

Zeigler Coal Co., 4 IBMA 88 (Mar. 31, 1975) 82 I.D. 111

SECRETARIAL ORDERS

Generally

An order signed by the Secretary which establishes enforcement policy is binding throughout the Department, and its validity is neither procedurally nor substantively subject to challenge at the administrative level.

Republic Steel Corp., 5 IBMA 306 (Dec. 16, 1975) 82 I.D. 607

Cowin and Co., Inc., 6 IBMA 351 (Sept. 29, 1976) 83 I.D. 409

TEMPORARY RELIEF

Generally

Temporary relief from the effect of a notice of violation issued under sec. 104(b) in the form of an order by the Board restraining MESA from issuing an order of withdrawal thereunder during the pendency of a review proceeding pursuant to sec. 105 of the Act is expressly barred as a matter of law. 30 U.S.C. § 815(d) (1970), 43 CFR 4.572.

Old Ben Coal Co., 7 IBMA 272 (Mar. 30, 1977) 84 I.D. 124

UNAVAILABILITY OF EQUIPMENT, MATERIALS, OR QUALIFIED TECHNICIANS

Generally

A violation of a mandatory health or safety standard is not established where compliance is impossible due to the unavailability of equipment, materials, or qualified technicians.

Itmann Coal Co., 4 IBMA 61 (Mar. 18, 1975) 82 I.D. 96

Pleading and Proof

When a notice of violation or order of withdrawal is issued for failure to comply with a mandatory health or safety standard, there is a rebuttable presumption that required equipment, materials, and qualified technicians are available to the operator. 30 U.S.C. § 819(a)(1) (1970).

In a penalty proceeding involving an alleged failure to provide a methane monitor, the defense of unavailability of equipment is an affirmative defense which, to be sustained, must be pleaded and proved by the operator. 30 U.S.C. § 819(a)(1) (1970); 43 CFR 4.542.

P & P Coal Co., 6 IBMA 86 (Mar. 22, 1976) 83 I.D. 91

Sufficiency

The fact that equipment required to abate a condition is on order, standing alone, will not support a conclusion of unavailability of that equipment.

Robbins Coal Co., 5 IBMA 268 (Nov. 20, 1975) 82 I.D. 581

UNWARRANTABLE FAILURE

Generally

The phrase unwarrantable failure to comply means the failure of an operator to abate a condition or practice constituting a violation of a mandatory standard it knew or should have known existed, or the failure to abate such a condition or practice because of a lack of due diligence, or because of indifference or lack of reasonable care. 30 U.S.C. § 814(c) (1970).

Zeigler Coal Co., 7 IBMA 280 (Mar. 31, 1977) 84 I.D. 127

FEDERAL COAL MINE HEALTH AND SAFETY ACT OF 1969--Continued

UNWARRANTABLE FAILURE--Continued

Notices of Violation

Under sec. 105(a) of the Act, 30 U.S.C. § 815(a) (1970), an operator may file an application for review of a sec. 104(b) notice of violation with 104(c)(1) findings only if it wishes to challenge the reasonableness of time fixed for abatement. Subsequent to abatement, review of such notice under sec. 105(a) may be obtained only as an incident to the review of a related sec. 104(c)(1) withdrawal order.

Zeigler Coal Co. (On Reconsideration), 4 IBMA 139 (May 13, 1975) 82 I.D. 221

A notice of violation issued pursuant to sec. 104(c)(1) of the Act may not be challenged directly, by itself, in an Application for Review under sec. 105 of the Act where the violation cited therein has been abated.

Eastern Associated Coal Corp., 4 IBMA 184 (May 23, 1975) 82 I.D. 250

A violation of a mandatory standard is not "of such nature as could significantly and substantially contribute to the cause and effect of a mine safety or health hazard" if it poses either a purely technical instance of noncompliance or a source of any injury which has only a remote or speculative chance of coming to fruition. 30 U.S.C. § 814(c)(1) (1970).

A notice of violation may be issued under sec. 104(c)(1) without regard for the seriousness or gravity of the injury likely to result from the hazard posed by the violation, that is, an inspector need not find a risk of serious bodily harm, let alone of death. 30 U.S.C. § 814(c)(1) (1970).

Alabama By-Products Corp. (On Reconsideration), 7 IBMA 85 (Nov. 23, 1976) 83 I.D. 574

Withdrawal Orders

Generally

An Application for Review of a sec. 104(c)(2) withdrawal order is properly denied where the evidence shows that a violation occurred, that the condition or practice cited posed a probable risk of serious bodily harm or death, but short of imminent danger, and also, that the operator demonstrated a reckless disregard for the health and safety of the miners.

Zeigler Coal Co., 5 IBMA 346 (Dec. 18, 1975) 82 I.D. 632

Imminent Danger

Conditions or practices specified in an order should be considered collectively for the purpose of determining imminent danger. 30 U.S.C. § 814 (1970).

Zeigler Coal Co., 5 IBMA 356 (Dec. 19, 1975) 82 I.D. 636

VALIDITY OF REGULATIONS

The Board, as delegate of the Secretary, has not been empowered to entertain a challenge to the validity of regulations promulgated by the Secretary pursuant to sec. 508 of the Federal Coal Mine Health and Safety Act of 1969. 30 U.S.C. § 957 (1970); 43 CFR 4.1.

United Mine Workers of America v. Inland Steel Co., 6 IBMA 71 (Mar. 17, 1976) 83 I.D. 67

WITHDRAWAL ORDERS

Generally

A sec. 104(c)(2) withdrawal order is properly issued where it is shown that such order is based on a violation of a mandatory health or safety standard which is caused by the operator's unwarrantable failure to comply and no consideration need be given to whether the violation was of such a nature as could significantly and substantially contribute to the cause and effect of a mine safety or health hazard (30 U.S.C. § 814(c)(2) (1970)).

Zeigler Coal Co., 6 IBMA 182 (June 22, 1976) 83 I.D. 232

Old Ben Coal Co., 6 IBMA 229 (June 30, 1976) 83 I.D. 260

Old Ben Coal Co., 6 IBMA 234 (June 30, 1976) 83 I.D. 262

Failure to Abate

Where an inspector finds that a violation has not been abated within the time fixed for abatement, his authority under sec. 104(b) of the Act to issue either an extension of time or an order of withdrawal must be exercised reasonably based on the facts confronting him at the time. 30 U.S.C. § 814(b) (1970).

United States Steel Corp., 7 IBMA 109 (Nov. 29, 1976) 83 I.D. 584

Imminent Danger

Accumulations of loose coal, coal dust, and oil and grease together with sources of potential ignition will support a finding of imminent danger.

Zeigler Coal Co., 6 IBMA 132 (Apr. 30, 1976) 83 I.D. 204

A sec. 104(a) withdrawal order must be based on an imminent danger existing at the time of issuance of such order and cannot properly be based on a danger which is speculative, has subsided, or has been abated (30 U.S.C. §§ 801(j) and 814(a) (1970)).

Old Ben Coal Co., 6 IBMA 256 (July 13, 1976) 83 I.D. 294

Specificity

Where a sec. 104(a) withdrawal order fails to give *any* description of the conditions or practices assertedly creating the alleged imminent danger, the various portions of the Act relating to the sec. 104(e) requirement that orders issued contain a detailed description of such conditions or practices demand that such an order be vacated.

Armco Steel Corp., 8 IBMA 88 (Aug. 17, 1977) 84 I.D. 454

FEDERAL COAL MINE HEALTH AND SAFETY ACT OF 1969--Continued

WITHDRAWAL ORDERS--Continued

Unwarrantable Failure

The misfeasance of a preshift examiner in failing to detect the existence of a violation of the Act may be imputed to the operator so as to support a conclusion of unwarrantable failure on the operator's part.

Pocahontas Fuel Co., 8 IBMA 136 (Sept. 28, 1977)
84 I.D. 488

FEDERAL EMPLOYEES AND OFFICERS

GENERALLY

Bureau of Land Management personnel have no affirmative duty to take extraordinary measures to save an oil and gas lessee from the possible consequences of his own negligence.

Richard V. Bowman 19 IBLA 261 (Mar. 31, 1975)

Frank H. Crosby, 25 IBLA 160 (June 14, 1976)

Assertions, even if established, that employees of the Bureau of Land Management assured an oil and gas lessee that drilling a leasehold on the last day of the lease term was sufficient, without more, to extend the lease, and that the lessee relied upon such representations, afford the lessee no relief. Rights not authorized by law cannot be acquired through misinformation given by employees of the Bureau of Land Management.

Charles M. Goad, 25 IBLA 130 (June 7, 1976)

Bureau of Land Management personnel have no affirmative duty to take extraordinary measures to preserve an oil and gas lease or to save the lessee from the possible consequences of his own conduct of his affairs concerning such lease.

Where, by prearrangement, as part of a business negotiation, a third party assumes responsibility for the payment of the annual rentals for two oil and gas leases which subsequently terminate by operation of law when the rental check is dishonored by the drawee bank, the leases will not be reinstated on the strength of the lessee's naked assertion that the uncollectability of the check was deliberately contrived as part of a scheme to deprive him of the lease so that the third party could be granted the leases unlawfully by a Federal employee.

Stanley J. Pirtle, 26 IBLA 348 (Sept. 7, 1976)

It is not the responsibility of Bureau of Land Management employees to decipher ambiguous bids for outer continental shelf oil and gas leases in order to save the bidder from the consequences of his own negligence. A bid which was apparently intended for one tract and contains data appropriate for that tract, but identifies a different tract as the subject of the bid, is properly considered, and rejected as too low, for the identified tract.

Alaska Oil and Minerals Corp., 29 IBLA 224 (Mar. 23, 1977)
84 I.D. 114

FEDERAL EMPLOYEES AND OFFICERS--Continued

GENERALLY--Continued

A delay in the adjudication of an application by officers or employees of the Department cannot create rights in Federal property contrary to law.

Guy W. Franson, 30 IBLA 123 (May 12, 1977)

A Government mineral examiner, versed in mining engineering and/or geology is qualified to evaluate a mining claim for a particular mineral even though he does not possess specific experience as to that mineral.

United States v. Doris Conger Caldwell, 33 IBLA 153 (Dec. 19, 1977)

An agent of the Government has no authority to grant a right contrary to a statute of the Congress.

Amerada Hess Corp., 33 IBLA 293 (Jan. 18, 1978)

Personnel of BLM are not required to alter, modify, or correct an application for a right-of-way in order to conform such application to the requirements of the regulation under which it was filed.

Beehive Telephone Co., Inc., 38 IBLA 80 (Nov. 9, 1978)

AUTHORITY TO BIND GOVERNMENT

A contiguous landowner loses his preference right to purchase land offered at public sale when he fails to submit his preference right bid within the 30-day period provided by regulation; the Government's failure to return the check which accompanied his unsuccessful bid during this period, and his reliance on assurances it had been returned, do not excuse noncompliance with the preference right regulation, 43 CFR 2711.4(b)(1).

Basil B. Twist, 19 IBLA 75 (Feb. 26, 1975)

Bureau of Land Management personnel have no affirmative duty to take extraordinary measures to save an oil and gas lessee from the possible consequences of his own negligence.

Richard V. Bowman, 19 IBLA 261 (Mar. 31, 1975)

Frank H. Crosby, 25 IBLA 160 (June 14, 1976)

The authority of the Government to proceed with the determination of the validity of a mining claim is not barred by laches, because Government property is not to be disposed of contrary to law, despite any acquiescence, laches, or failure to act on the part of its officer or agents.

Montana Copper King Mining Co. et al., 20 IBLA 30 (Apr. 16, 1975)

An applicant for land under the Small Tract Act cannot acquire any right in the land by virtue of administrative delay in reappraising the land prior to issuance of patent. The mere filing of a small tract application does not create in the applicant any right or interest in the land.

George D. Jackson, 20 IBLA 253 (May 16, 1975)

FEDERAL EMPLOYEES AND OFFICERS--Continued

AUTHORITY TO BIND GOVERNMENT--Continued

Rights not authorized by law cannot be acquired through reliance on erroneous information given by employees of the Bureau of Land Management.

Wilfred S. Wood, 20 IBLA 284 (May 27, 1975)

Generally, the Government is not estopped from demanding oil and gas lease royalty payments it is owed, even if its employees may have made prior mistakes in accepting or computing the royalty.

Gulf Oil Corp. et al., 21 IBLA 1 (June 16, 1975)

Advice or information received over the telephone from personnel of the Bureau of Land Management does not constitute a "bill or decision rendered by" the Department under 30 U.S.C. § 188(b) (1970).

C. J. Iverson, 21 IBLA 312 (Aug. 14. 1975) 82 I.D. 386

Reliance upon erroneous or incomplete information provided by BLM employees cannot create any rights not authorized by law.

John F. Brown, 22 IBLA 133 (Sept. 26, 1975)

Margaret Hughey Hugus, 22 IBLA 146 (Sept. 30, 1975)

M. R. C. Croley, 32 IBLA 5 (Aug. 24, 1977)

Joe I. and Celina V. Sanchez, et al., 32 IBLA 228 (Sept. 20, 1977)

Vernon F. Sorenson, 32 IBLA 341 (Oct. 21, 1977)

Equitable estoppel will not operate to bar a mining claim contest or alter its result where it is not shown that some officer of the Government, who was authorized to declare the claims valid, falsely misrepresented to, or concealed material facts from the claimant concerning the validity of the claim with the intention that the claimant should act in reliance thereon, with the result that the claimant was thereby induced to do so, to his ultimate damage.

United States v. Bert L. Johnson, 23 IBLA 349 (Jan. 21, 1976)

Unauthorized acts by an employee of the Bureau of Indian Affairs cannot serve as the basis for conferring rights not authorized by law. Moreover, neither the Secretary of the Interior nor the Department is bound or estopped by such unauthorized acts.

Administrative Appeal of Joe McComas, 5 IBIA 125 (June 11, 1976) 83 I.D. 227

A noncompetitive oil and gas lease applicant's failure to submit the statement of interest of the other parties in interest to the offer is not excused, nor is the Department estopped to reject such an offer, by his reliance on the Department's prior erroneous issuance of a lease to the applicant on an offer which was deficient for the same reason.

Leon N. Flanagan et al., 25 IBLA 269 (June 24, 1976)

FEDERAL EMPLOYEES AND OFFICERS--Continued

AUTHORITY TO BIND GOVERNMENT--Continued

An applicant for a private land exchange cannot benefit from the doctrine of equitable estoppel where no agent of the Government who was authorized to consummate the exchange falsely and materially misrepresented to or concealed material facts from appellant concerning the Government's position with respect to the proposed exchange.

Siesta Investments, Inc., 28 IBLA 118 (Nov. 15, 1976)

Where an applicant for grazing privileges does not show the type of misconduct which would be a basis for estoppel against the Government, the provisions of 43 CFR 4115.2-1(e)(9)(i) and (e)(13)(i) cannot be waived on the basis of such misconduct.

A. L. Findley (Appellant), Vermillion Cliff Cattle Co. (Intervenor), 29 IBLA 262 (Mar. 25, 1977)

Reliance upon erroneous advice by Bureau of Land Management employees cannot estop the United States or confer upon an applicant any rights not authorized by law. 43 CFR 1810.3(c). Where it is not established that the asserted advice was erroneous, estoppel does not operate.

United States v. Ronald B. Tippetts, 29 IBLA 346 (Mar. 31, 1977)

Even if the Bureau of Land Management incorrectly noted a withdrawal order on a status plat and appellant purportedly relied on this status plat when locating his mining claim, the mining claim, located on withdrawn land, is null and void because reliance upon records maintained by land offices cannot operate to vest any right not authorized by law.

Rod Knight, 30 IBLA 224 (May 26, 1977)

As a general rule, an applicant is not entitled to rely upon misinformation or erroneous advice given by departmental employees to acquire any rights in public lands not authorized by law. A corporation filing an oil and gas lease offer, signed by an officer not designated in accordance with 43 CFR 3102.4-1 as authorized to act on its behalf, cannot rely on the fact that the officer's signature was accepted by the Department on documents filed in unrelated matters to excuse its failure to provide the mandatory authorization.

Emerald Oil Co., 31 IBLA 119 (June 24, 1977)

The Government is not estopped from applying new provisions enacted in an amendment to the Mineral Leasing Act to an application for modification of an existing coal lease on account of laches, administrative delay, or misrepresentation by Government employees of the fact of Federal ownership of the land sought in the application.

Estate of Malcolm N. McKinnon, 31 IBLA 290 (July 22, 1977)

Reliance upon erroneous and incomplete information provided by Federal employees cannot create any rights not authorized by law.

Mark W. Moore and John L. Dutra, 33 IBLA 32 (Nov. 25, 1977)

FEDERAL EMPLOYEES AND OFFICERS--Continued

AUTHORITY TO BIND GOVERNMENT--Continued

The authority of the Government to proceed with the withdrawal of public lands, after a Federal agency has filed an application for such action, which withdraws that land from mineral location, will not be barred by laches because of lapse of time.

William J. Smith, Sr., et al., 33 IBLA 47 (Nov. 25, 1977)

The failure of a noncompetitive oil and gas lease offeror to complete the date on the simultaneous oil and gas drawing entry card is not excused, and the Department is not estopped to reject such an offer, by his reliance on the Department's prior erroneous issuance of a lease in acceptance of an offer which was deficient for the same reason.

Tina A. Regan, 33 IBLA 213 (Dec. 21, 1977)

An agent of the Government has no authority to grant a right contrary to a statute of the Congress.

Amerada Hess Corp., 33 IBLA 293 (Jan. 10, 1978)

The general rule is that reliance on erroneous or incomplete information provided by Federal employees cannot create any rights not authorized by law.

Belton E. Hall, 33 IBLA 349 (Jan. 18, 1978)

WZL Investment Corp., 36 IBLA 355 (Aug. 31, 1978)

Dermot S. McGlinchey, 38 IBLA 211 (Dec. 6, 1978)

The Government is not estopped from collecting royalty payments which are owed, even if it has accepted improper payments in the past.

Foote Mineral Co., 34 IBLA 285 (Apr. 17, 1978)
85 I.D. 171

Long-term belief by Federal officers that land was subject to a valid patent, when, in fact, the land could not legally have been conveyed because of withdrawal or reservation, does not serve as a basis for divesting the Government of title to the land by estoppel.

Roland and Marie Oswald, 35 IBLA 79 (May 12, 1978)

Reliance upon erroneous information provided by employees of the Bureau of Land Management cannot create any rights not authorized by law. The fact that a coal prospecting permittee alleges he was assured by BLM employees that he would receive permit extensions does not prevent the applicability of subsequent legislation which prohibits such extensions from causing his extension applications to be rejected.

Island Creek Coal Co., 35 IBLA 247 (May 30, 1978)
85 I.D. 161

Where BLM reduced grazier's privileges because of his loss of ownership of base property from which his qualifications had not in fact been transferred away for attachment to other property owned by grazier, equitable estoppel is not invoked against BLM since grazier by his own testimony at hearing showed that he was not ignorant of true facts as to lack of transfer back of grazing qualifications and that he did not in fact rely to his detriment on BLM official's representations on that transfer back.

Roger J. Rasmusson, 36 IBLA 98 (July 13, 1978)

Where a mining claimant alleges that forest rangers allowed him to build and occupy a cabin on the claim without informing him that it was illegal to do so, it is not appropriate to estop the Government from declaring the claim null and void, for several reasons: mere acquiescence in an action is not "affirmative misconduct" by a Government employee, as it was not false representation or concealment of material facts done with the intent that the claimant rely thereon; the impression created by the inaction of the forest rangers was not erroneous and, so, claimant was not misled, as he could rightfully move the cabin to the site and occupy it as long as so doing was incident to mineral development of a valid mining claim; and because the claimant should have known that he could not live on the premises indefinitely despite his failure to develop the claim, and that he would have to move the cabin or lose it, if the claim was declared null and void.

The Government is not barred from declaring a mining claim null and void by the doctrine of laches.

United States v. Joseph Larsen and Ferris Larsen, 36 IBLA 130 (July 25, 1978)

Reliance upon erroneous advice provided by a non-Governmental filing service cannot relieve an oil and gas applicant of an obligation imposed on him by regulation.

John G. Keane, 37 IBLA 364 (Nov. 2, 1978)

Reliance upon erroneous or incomplete information provided by employees of the Bureau of Land Management cannot create any rights not authorized by law.

Juan Munoz, 39 IBLA 72 (Jan. 24, 1979)

J. A. Masek, 40 IBLA 123 (Mar. 27, 1979)

John C. Schandelmeier, 42 IBLA 240 (Aug. 22, 1979)

Tilden Holloway, Roland Wright, 43 IBLA 134 (Sept. 28, 1979)

Reliance on erroneous information provided by Federal employees cannot create any rights not authorized by law.

W. R. and Margaret W. Collier, 39 IBLA 81 (Jan. 24, 1979)

Southern California Motorcycle Club, Inc., Sierra Club, 42 IBLA 164 (Aug. 17, 1979)

Erroneous issuance by BLM of oil and gas lease on other withdrawn land in area of tract for which appellant submitted lease offer does not effect restoration to leasing of latter withdrawn tract.

E. M. Tully, 39 IBLA 137 (Jan. 29, 1979)

FEDERAL EMPLOYEES AND OFFICERS--Continued

AUTHORITY TO BIND GOVERNMENT--Continued

Reliance upon erroneous notations to a BLM serial register page or incomplete information provided by BLM employees cannot create any rights not authorized by law.

Alver C. Duncan, 39 IBLA 144 (Jan. 29, 1979)

Estoppel to preclude a charge of trespass is not invoked against BLM where BLM's partially completed fences on Federal land do not restrain cattle and there is no evidence that BLM agreed to construct and/or maintain said fences for the benefit of the grazier, and such grazier was at all times aware of these facts.

The grazing regulations (43 CFR 4140.1(b)(1), *inter alia*) (formerly 43 CFR 4112.3-1(a) and (b)) place the responsibility of controlling cattle squarely on the grazier, and Government range management policies as implemented under acts of Congress cannot be asserted to bar sanctions where trespasses have been proved, or to estop BLM from alleging trespasses.

Bureau of Land Management v. Holland Livestock Ranch et al., 39 IBLA 272 (Feb. 15, 1979) 86 I.D. 133

The authority of the United States to enforce a public right or protect a public interest, including its right to cancel invalid mining claims which encumber the public lands, is not vitiated or lost by acquiescence of its officers or agents, or by their laches or delays in the performance of their duties. Regardless of this rule, laches is not appropriate where it appears that the Government's failure to act probably resulted from unfamiliarity with existence of these mining claims.

Equitable estoppel against the Government will not lie where there has been no affirmative misconduct by an authorized agent or officer resulting in a misrepresentation of fact upon which a party was led to rely to his ultimate detriment.

Dorothy Smith, 39 IBLA 306 (Feb. 23, 1979)

The Government is not estopped from rejecting oil and gas lease offers because the offerors' leasing agent alleges that he relied on a representation by officers of BLM that his disclaimer of his interest in the offer was valid and therefore failed to amend his service agreement with his clients to remove the interest-creating provision, where it appears that BLM did not in fact so represent.

Frederick W. Lowey et al., 40 IBLA 381 (May 14, 1979)

Reliance on incomplete information supplied by Bureau of Land Management employees cannot estop the United States or excuse compliance with a regulation.

Fred S. Ghelarducci, 41 IBLA 277 (June 28, 1979)

INTEREST IN LANDS

Where a sec. 15 grazing lease is issued to an applicant whose brother is an employee of this Department, and such employee owns stock in the corporation that owns the contiguous fee land, control over which the applicant asserts as the basis for his preference right to the grazing lease, such applicant cannot be granted the desired grazing lease. Any such lease must be canceled when the facts are called to the Department's attention. This result occurs under 43 CFR 7.2 and 7.3 which prohibit any employee from acquiring or retaining any interest in the lands or resources administered by the Bureau of Land Management. The prohibition extends to any interest in land which in any manner is connected with or involves the use of the grazing resources administered by the Bureau of Land Management.

Donald E. and Nancy P. Jansen (On Reconsideration), 19 IBLA 154 (Mar. 14, 1975) 82 I.D. 93

The regulations governing Departmental employees' rights to hold a direct or indirect interest in public lands must be construed *in pari materia* with the regulations governing qualification to hold a grazing lease under sec. 15 of the Taylor Grazing Act, 43 U.S.C. § 315m (1970). A non-employee may be disqualified from holding a lease by his business relationship with an employee if the issuance of the lease would create an interest in public land proscribed by regulation.

Donald E. and Nancy P. Jansen (On Reconsideration), 23 IBLA 374 (Feb. 4, 1976)

MEMBERS OF CONGRESS

One of the functions of the Department of Justice is to construe the laws under which other Government Departments act, 28 U.S.C. § 512 (1970), and when the Department of Justice has advised the Department of the Interior that it has construed a conflict of interest statute affecting Members of Congress and has determined that it is permissible for the spouse of a member of Congress to hold a grazing lease for national resource lands under certain circumstances, that opinion is binding on this Department, and a grazing lease is properly issued when the applicant has satisfied the criteria set forth by the Department of Justice.

Joseph T. Kurkowski, 24 IBLA 58 (Feb. 23, 1976)

FEDERAL LAND POLICY AND MANAGEMENT ACT OF 1976

GENERALLY

An appeal to the Board of Land Appeals will be dismissed where the enactment of the Federal Land Policy and Management Act renders moot the questions on appeal.

Silver Peak Townsite (Trustee), 30 IBLA 357 (June 30, 1977)

An application filed in 1976 to make a stock-raising homestead entry is properly rejected because the homesteading provisions of the Stock-raising Homestead Act were impliedly repealed by the Taylor Grazing Act and were expressly repealed by the Federal Land Policy and Management Act.

A petition-application for a homestead entry outside of Alaska requires classification of the land, confers no rights upon an applicant and must be rejected because the Federal Land Policy and Management Act repealed the homestead laws effective on the date of the Act as to lands outside Alaska.

Daniel A. Anderson, 31 IBLA 162 (July 1, 1977)

GENERALLY--Continued

Under the Federal Land Policy and Management Act of 1976 and interim guidelines issued pursuant thereto, special use permit applications for access roads over public land are properly processed as right-of-way applications. 43 U.S.C. § 1761. The Bureau of Land Management correctly denies such an application where it has determined, in conformance with the Act and interim guidelines, that an access road would neither be in the public interest nor facilitate land management policy.

Edwin L. Rumpf, Jr., 31 IBLA 367 (Aug. 1, 1977)

Until such time as the Department promulgates regulations, policy guidelines or criteria implementing sec. 302 of the Federal Land Policy and Management Act of 1976, the Bureau of Land Management may properly defer action on the proposed creation of an estate in Federal land thereunder.

Treva L. Berger. 31 IBLA 389 (Aug. 19, 1977)

A right-of-way for a communication site for which application was made under the Act of Mar. 4, 1911, shall conform to the provisions of the Federal Land Policy and Management Act of 1976, sec. 510, 90 Stat. 2743, 2782, when application for grant was pending on Oct. 21, 1976.

Four States Television, Inc., 32 IBLA 205 (Sept. 19, 1977)

Under sec. 402(c) of the Federal Land Policy and Management Act of 1976, 43 U.S.C.A. § 1752(c) (West Supp. 1977), the holder of an expiring grazing lease receives first priority for the new lease if the requirements of sec. 402(c) are met. Therefore, a conflicting applicant is properly denied the lease where the renewal applicant meets those requirements.

Allen B. Prouse, 32 IBLA 311 (Sept. 30, 1977)
84 I.D. 874

George T. McDonald, Cascade Ranches, Inc., 35 IBLA 75 (May 12, 1978)

Under sec. 402(c) of the Federal Land Policy and Management Act of 1976, 43 U.S.C.A. § 1752(c) (West Supp. 1977), the holder of an expiring lease shall be given first priority for receipt of the new lease as long as the lessee is in compliance with the rules and regulations issued and the terms and conditions in the lease. Therefore, if the holder of an expiring lease loses control of the private property contiguous to public land which gave him a preference right to a lease under 43 CFR 4121.2-1(c), he is not entitled to first priority for receipt of a new lease.

Mark K. Trask. 32 IBLA 395 (Nov. 9, 1977)

Sec. 310 of the Federal Land Policy and Management Act of 1976 provides that, prior to promulgation of new regulations, the Secretary will administer the public lands under existing regulations to the extent practical. Issuance of a right-of-way permit for an electrical power transmission line prior to the promulgation of new regulations under sec. 504 of the Act is permissible under the authority in sec. 310.

The fact that various of the existing regulations in 43 CFR Part 2800, governing issuance of rights-of-way, are not wholly consistent with the Federal Land Policy Management Act of 1976 does not render invalid a BLM decision granting a right-of-way under the authority of sec. 310 of that Act.

Sec. 505, Federal Land Policy and Management Act of 1976, does not require that preliminary planning considerations be enumerated on the face of a grant of a right-of-way.

The third party participation provision of sec. 102(a)(5), Federal Land Policy and Management Act of 1976, is entirely satisfied by a series of public hearings held prior to the grant of a power transmission right-of-way.

David Smith Ranches et al. (Appellants), Colorado Ute Electric Ass'n, Inc. (Intervenor). 33 IBLA 7 (Nov. 15, 1977)

Under sec. 310 of the Federal Land Policy and Management Act of 1976, 43 U.S.C.A. § 1764(g) (West Supp. 1977), charges for rights-of-way on public lands are in general to be paid annually rather than in advance for a longer period pursuant to 43 CFR 2802.1-7(a).

XYZ Television, Inc., 33 IBLA 60 (Dec. 8, 1977)

Under sec. 314(b) of the Federal Land Policy and Management Act of Oct. 21, 1976, 43 U.S.C. § 1744(b) (West Supp. 1977), and 43 CFR 3833.1-2, the owner of a mining claim located after Oct. 21, 1976, must file a notice of recordation of the claim with the proper Bureau of Land Management office within 90 days of location of the claim. Failure to make a timely filing of the notice requires that the Bureau refuse to accept the notice and declare the claim to be null and void.

The failure of a mining claimant to file the notice of recordation required by sec. 314(b) of the Federal Land Policy and Management Act of Oct. 21, 1976, 43 U.S.C. § 1744(b) (West Supp. 1977), cannot be excused on the basis of equitable estoppel where no discussion covering the 90-day requirement was had between the Department and appellant's representatives.

Northwest Citizens for Wilderness Mining Co., Inc., 33 IBLA 317 (Jan. 16, 1978)

Applications for rights-of-way on public lands pending on Oct. 21, 1976, are to be considered as applications under the Federal Land Policy and Management Act of 1976, but, to the extent practical, existing regulations will govern the administration of the public lands until new regulations are issued.

Continental Telephone of California, 34 IBLA 374 (May 1, 1978)

Under sec. 314(b) of the Federal Land Policy and Management Act of Oct. 21, 1976, 43 U.S.C. § 1744(b) (West Supp. 1977), and 43 CFR 3833.1-2, the owner of a mining claim located after Oct. 21, 1976, must file a notice of recordation of the claim with the proper Bureau of Land Management office within 90 days of location of the claim. Failure to make a timely filing of the notice requires that the Bureau refuse to accept the notice and declare the claim to be null and void.

R. Wade Holder et al., 35 IBLA 169 (May 22, 1978)

FEDERAL LAND POLICY AND MANAGEMENT ACT OF 1976--Continued

GENERALLY--Continued

Under sec. 314(a) of the Federal Land Policy and Management Act of 1976, the owner of an unpatented mining claim must file a notice of intention to hold his claim prior to Dec. 31 of the calendar year following the date of location of such claim, or the claim shall be deemed conclusively to have been abandoned.

Donald H. Little. 37 IBLA 1 (Sept. 6, 1978)

Juan Munoz. 39 IBLA 72 (Jan. 24, 1979)

Applications for rights-of-way on public lands pending on Oct. 21, 1976, are to be considered as filed under the Federal Land Policy and Management Act of 1976.

Arnold E. Bedell. 37 IBLA 22 (Sept. 12, 1978)

Under sec. 314(b) of the Federal Land Policy and Management Act of Oct. 21, 1976, 43 U.S.C. § 1744(b) (1976), and 43 CFR 3833.1-2, the owner of an unpatented lode or placer mining claim located after Oct. 21, 1976, shall, within 90 days after the date of location of such claim, file in the proper BLM office a copy of the official record of the notice of location or certificate of location. Failure to file such instruments shall be deemed conclusively to constitute an abandonment of the mining claim by the owner.

James P. Giancarlo. 37 IBLA 88 (Sept. 22, 1978)

Leland H. Bray. 37 IBLA 120 (Oct. 3, 1978)

Roy N. Dykes. 39 IBLA 32 (Jan. 15, 1979)

Phillip H. Gardiner et al.. 41 IBLA 391 (July 24, 1979)

The Small Tract Act, *as amended*, 43 U.S.C. § 682a *et seq.* (1970) was repealed by sec. 702 of the Federal Land Policy and Management Act of 1976 (FLPMA), 90 Stat. 2787, and no land may be purchased under th Act. Where a State Office decision approves an application for purchase of a tract of land filed pursuant to the Small Tract Act in order to correct an error in a land description in another patent previously issued to appellants under the Small Tract Act, the decision will be reversed and the case remanded to the State Office for determination of whether the original patent may be corrected under sec. 316 of FLPMA, Correction of Conveyance Documents, 43 U.S.C. § 1746 (1970).

Richard O. Dale et al.. 38 IBLA 175 (Dec. 6, 1978)

Where the owner of unpatented mining claims located after Oct. 21, 1976, fails to file evidence of annual assessment work or a notice of intention to hold the claims prior to Dec. 31 of the year following the calendar year in which the claims were *located*, the claims are properly deemed abandoned and void pursuant to sec. 314 of the Federal Land Policy and Management Act of Oct. 21, 1976, 43 U.S.C.A. § 1744 (Supp. 1978), and 43 CFR 3833.2-1(b)(1) and 43 CFR 3833.4(a).

Public Service Co. of Oklahoma. 38 IBLA 193 (Dec. 6, 1978)

The Small Tract Act, 43 U.S.C. § 682a-e (1970), was repealed by sec. 702, Federal Land Policy and Management Act of 1976, Oct. 21, 1976, P.L. 94-579, 90 Stat. 2787. Renewal of a small tract lease was discretionary under the former Small Tract Act, so there was no right to renewal of a small tract lease preserved by sec. 701 of FLPMA. Any use or occupancy of the public domain granted subsequent to Oct. 21, 1976, must be under authority contained in FLPMA.

FEDERAL LAND POLICY AND MANAGEMENT ACT OF 1976--Continued

GENERALLY--Continued

Arthur G. Lane, Jr.. 38 IBLA 297 (Dec. 14, 1978)

Department of the Interior, as agency of executive branch of Government, is not proper forum to decide whether or not statute enacted by Congress is constitutional.

Al Sherman. 38 IBLA 300 (Dec. 14, 1978)

Where off-road vehicles pose a potential threat to plants proposed for listing under the Endangered Species Act of 1973, 87 Stat. 884, as endangered, and interfere with the educational and scientific value of an area of the public lands which its status as a registered natural landmark under the Historic Sites Act, *as amended*, 16 U.S.C. §§ 461-467 (1976), seeks to enhance, the BLM may close such area of the public lands to off-road vehicular use, pending further study, pursuant to the multiple use management provisions of the Federal Land Policy and Management Act of 1976, 43 U.S.C. §§ 1732 and 1733 (1976).

California Ass'n of Four-Wheel Drive Clubs et al.. 38 IBLA 361 (Dec. 29, 1978)

Authority to dispose of land within Alaska railroad townsites under 43 U.S.C. § 975b (1970) was repealed by sec. 704(a) of the Federal Land Policy and Management Act of 1976.

Because issuance of a patent removes the land from Departmental jurisdiction, it is not proper to issue that patent simultaneously with dismissal of a protest against the patent application because such action deprives the protester of his right to review and precludes compliance with 43 U.S.C.A. § 1701(a)(5) (West Supp. 1978) which mandates objective administrative review of initial decisions.

Matanuska-Susitna Borough, Inc.. 38 IBLA 362 (Dec. 29, 1978)

The Federal Land Policy and Management Act of 1976, 43 U.S.C.A. § 1702(h) (West Supp. 1978), providing for sustained yield management of timber resources, and 16 U.S.C. §§ 594, 594-1 (1970), which direct a policy of preserving forest resources from insect infestation and damage, envisage that the Department is under an obligation to protect timber from such ravages, including without limitation, the sale of timber so affected.

George Jalbert et al.. 39 IBLA 205 (Feb. 2, 1979)

Under sec. 314(b) of the Federal Land Policy and Management Act of Oct. 21, 1976, 43 U.S.C. § 1744(b) (1976), and 43 CFR 3833.1-2, the owner of a mining claim located after Oct. 21, 1976, must file a notice of recordation of the claim with the proper Bureau of Land Management office within 90 days of location of the claim, or the claim is deemed abandoned and void.

Dale C. Belor. 40 IBLA 80 (Mar. 22, 1979)

Jim Spicer. 42 IBLA 208 (Aug. 27, 1979)

FEDERAL LAND POLICY AND MANAGEMENT ACT OF 1976--Continued

GENERALLY--Continued

R.S. 2387, 2388 and 2389, 43 U.S.C. §§ 718-720 (1976), were repealed by sec. 703 of the Federal Land Policy and Management Act of 1976 (FLPMA), 90 Stat. 2790, and any transfer of land for a townsite within a National Forest after the effective date of FLPMA, Oct. 21, 1976, must be made under authority of sec. 213 of that Act. The filing of an application under other statutes prior to the enactment of FLPMA does not constitute a valid existing right which would survive FLPMA.

Townsite of Liberty, 40 IBLA 317 (Apr. 30, 1979)

The Federal Land Policy and Management Act, 43 U.S.C. § 1701 *et seq*. (1976), does not establish any reserved rights in BLM lands.

The management programs mandated by Congress in such Acts as the Taylor Grazing Act and FLPMA require the appropriation of water by the United States in order to assure the success of the programs and carry out the objectives established by Congress.

Sec. 701(g) of FLPMA, 43 U.S.C. § 1701 notes (1976), maintains the status quo in the relationship between the States and the Federal Government on water, and allows for (a) the continued appropriation of unappropriated nonnavigable waters on the public domain by private persons pursuant to State law as authorized by the Desert Land Act; (b) the right of the United States to use unappropriated water for the congressionally recognized and mandated purposes set forth in legislation providing for the management of the public domain; and (c) application by the United States to secure water rights pursuant to State law for these purposes.

FLPMA, the Taylor Grazing Act, the O&C Act, and other statutes permit the United States to appropriate water for the diverse purposes found in the various statutes.

FLPMA authorizes the BLM to appropriate water for such uses as fish and wildlife maintenance and protection, scenic value preservation, and human consumption, and protection of areas of critical environmental concern.

Federal Water Rights of the National Park Service, Fish and Wildlife Service, Bureau of Reclamation and the Bureau of Land Management, M-36914 (June 25, 1979)
86 I.D. 553

"Public Lands." Land within an interim conveyance to a Native Corporation is no longer "public land" under the Federal Land Policy and Management Act nor subject to Bureau of Land Management jurisdiction to issue rights-of-way under that Act.

New England Fish Co., 42 IBLA 200 (Aug. 22, 1979)

Sec. 314 of the Federal Land Policy and Management Act of 1976 was enacted to establish a Federal recording system for mining claims to facilitate Federal land use planning and management. Failure to comply with the mandatory filing requirements constitutes abandonment of the claim and the land reverts to the status of public domain.

In the absence of a specific regulation or policy directive specifying the type of proof necessary for recordation, the Bureau of Land Management should liberally consider attempts by a mining claimant under sec. 314 of the Federal Land and Policy Management Act to record notice of a mining claim where proof of recording cannot be made and 30 U.S.C. § 38 (1976) is relied upon for holding the claim, and before rejecting a filing for such a claim, BLM should request further evidence from the claimant which it would consider satisfactory. Such evidence should include at a minimum the name the claim is and has been known by, the name and address of the claimant, an adequate description of the claim, the type of claim, the time of holding and working the claim to meet a State's statute of limitations and, if possible, the date of the origin of claimant's title and facts as to continuation of possession of the claim, and any other information available showing a chain of title to the claimant and bearing upon the possession and occupancy of the claim for mining purposes, and other information which the Bureau of Land Management deems essential to meet the purposes of the recordation provision.

FEDERAL LAND POLICY AND MANAGEMENT ACT OF 1976--Continued

GENERALLY--Continued

Phillip Sayer, 42 IBLA 296 (Aug. 27, 1979)

The regulation, 43 CFR 3833.2-1(b)(1), requiring evidence of assessment work to be filed prior to Dec. 31 of the year following location of the claim, is mandatory. Failure to comply therewith must result in a finding that the claim has been abandoned.

Donald L. Fulgham, 42 IBLA 330 (Aug. 30, 1979)

The Federal Land Policy and Management Act of 1976 requires, among other things, (1) a determination by the Secretary of Agriculture that the public interest will be well served by a proposed national forest exchange; (2) that evaluation of the public interest shall fully consider the panoply of Federal, State, and local needs enumerated; and (3) that the Secretary shall find that the values and objectives to be served by Federal lands, if retained, do not exceed the values of, and public objectives serviceable by, the proffered lands if acquired.

Petro Leasco, Inc., 42 IBLA 345 (Aug. 31, 1979)

Pursuant to 43 U.S.C. § 1712(e)(3) (1976), a wholly owned Government corporation may acquire and hold rights as a citizen under the Mining Law of 1872.

John B. Meadows, 43 IBLA 35 (Sept. 12, 1979)

Departmental regulations 43 CFR Subpart 3109 and 43 CFR 3120.2-3, and sec. 603 of the Federal Land Policy and Management Act of 1976 provide ample authority for the Bureau of Land Management to require oil and gas lessees to agree to wilderness protection stipulations.

Palmer Oil and Gas Co., 43 IBLA 115 (Sept. 24, 1979)

The regulations governing recordation of mining claims are mandatory, and failure to comply therewith must result in a finding that the claim has been abandoned. Where appellants timely file for record an "amended" location notice, accompanied by the original location notice which is untimely on its face, the mining claim is properly deemed abandoned as to the original location, but not as to the "amended" claim if it is a relocation of the claim under the law.

Walter T. Paul, James H. Beyer, 43 IBLA 119 (Sept. 24, 1979)

GENERALLY--Continued

Regulation 43 CFR 3833.1-2(d) states that a location notice for each mining claim, millsite, or tunnel site filed for recordation shall be accompanied by a service fee. As this is a mandatory requirement, there is no recordation unless the documents are accompanied by the stated fee, or until it is paid. Therefore, where a notice of location of a claim or site is submitted to BLM for recordation on Dec. 14, 1977, and the filing fee therefor is not paid to BLM until Feb. 10, 1978, the recordation date of the notice is Feb. 10, 1978.

Joe B. Cashman, 43 IBLA 239 (Oct. 10, 1979)

A proposed Federal timber sale does not violate the principle of multiple use embodied in the Federal Land Policy and Management Act of 1976, 43 U.S.C. § 1701 (1976), where it involves Oregon and California revested land committed by the Act of Aug. 28, 1937, 43 U.S.C. § 1181a (1976), to dominant use management for commercial forestry.

Elaine Mikels et al., 44 IBLA 51 (Nov. 19, 1979)

Under sec. 314 of the Federal Land Policy and Management Act of Oct. 21, 1976, 43 U.S.C § 1744 (1976), and 43 CFR 3833.1-2, the owner of a lode mining claim must file a notice of recordation of the claim with the proper Bureau of Land Management Office within 90 days of location of the claim. Failure to so file is deemed conclusively to constitute an abandonment of the claim by the owner.

Faith C. Hartman, 44 IBLA 310 (Dec. 31, 1979)

ASSESSMENT WORK

The owner of an unpatented mining claim located after Oct. 21, 1976, but in the calendar year 1976, must file an affidavit of assessment work or a notice of intention to hold the mining claim prior to Dec. 31 of the following calendar year, 1977, or the claim will be conclusively deemed to have been abandoned.

For the purposes of filing affidavits of assessment work or notices of intention to hold a mining claim, the date of location is the date as defined in the pertinent regulation, 43 CFR 3833.0-5(h), not the date on which the owner completes the last step in locating and recording a mining claim as required by State law.

Paul S. Coupey, 35 IBLA 112 (May 15, 1978)

The owner of an unpatented mining claim located after Oct. 21, 1976, but in the calendar year 1976, must file an affidavit of assessment work or a notice of intention to hold the mining claim prior to Dec. 31 of the following calendar year, 1977, or the claim will be conclusively deemed to have been abandoned.

For the purposes of filing affidavits of assessment work or notices of intention to hold a mining claim, the date of location is the date as defined in the pertinent regulation, 43 CFR 3833.0-5(h).

Donald L. Nordwick, 36 IBLA 238 (Aug. 14, 1978)

ASSESSMENT WORK--Continued

The owner of an unpatented mining claim located after Oct. 21, 1976, but in the calendar year 1976, must file an affidavit of assessment work or a notice of intention to hold the mining claim prior to Dec. 31 of the following calendar year, 1977, or the claim will be conclusively deemed to have been abandoned.

W. A. Starr and Ida Elaie McGilley, 38 IBLA 74 (Nov. 5, 1978)

Under 43 CFR 3833.2-1(b), the owner of an unpatented mining claim located after Oct. 21, 1976, but in the calendar year 1976, must file an affidavit of assessment work or a notice of intention to hold the mining claim prior to Dec. 31 of the following calendar year, 1977, or the claim will be conclusively deemed to have been abandoned, under 43 CFR 3833.4(a).

John B. Caurruthers, 38 IBLA 77 (Nov. 9, 1978)

Under the Federal Land Policy and Management Act of 1976, 43 U.S.C. § 1744(a)(2) (1976), if an unpatented mining claim located after Oct. 21, 1976, is not supported annually by either an affidavit of assessment work or notice of intention to hold, the claim will be conclusively deemed abandoned and void, despite appellant's statement there was no intent to abandon and that failure to file was an oversight.

Nuclear Power and Energy Co. and R-2, Inc., 41 IBLA 142 (June 14, 1979)

Where the owner of an unpatented mining claim located prior to Oct. 21, 1976, fails to file an affidavit of assessment work or notice of intention to hold the claim on or before Dec. 31 of the calendar year following the calendar year in which he recorded the claim in the BLM office, his claim is properly deemed conclusively to have been abandoned.

Charles and Pete Carson, 41 IBLA 302 (June 29, 1979)

Under the Federal Land Policy and Management Act of 1976, sec. 314, 43 U.S.C. § 1744 (1976), the owner of an unpatented mining claim located on Oct. 10, 1977, must file an affidavit of assessment work or a notice of intention to hold the mining claim prior to Dec. 31 of the following calendar year, 1978, or the claim will be conclusively deemed to have been abandoned.

Bruce Parks, 42 IBLA 18 (July 25, 1979)

Under the Federal Land Policy and Management Act of 1976, § 314, 43 U.S.C. § 1744 (1976), the owner of unpatented mining claims located in 1977 must file an affidavit of assessment work or a notice of intention to hold the claim prior to Dec. 31 of the following calendar year, 1978, or the claim will be conclusively deemed to have been abandoned. Where an appellant asserts on appeal that he timely mailed proof of labor to the Bureau of Land Management, but the documents were not received by that office, the documents cannot be considered as filed with that office unless and until they are received by it.

John Newkirk et al., 42 IBLA 292 (Aug. 27, 1979)

James E. Yates, 42 IBLA 391 (Sept. 11, 1979)

FEDERAL LAND POLICY AND MANAGEMENT ACT OF 1976--Continued

ASSESSMENT WORK--Continued

Where the owner of an unpatented mining claim located prior to Oct. 21, 1976, fails to file an affidavit of assessment work or notice of intention to hold the claim on or before Dec. 31 of the calendar year following the calendar year in which he recorded the claim in the BLM office, his claim is properly deemed conclusively to have been abandoned and to be null and void.

A State law which requires filing of proof of assessment work which requirement is more liberal than the recordation requirement of the Federal Land Policy and Management Act of 1976, § 314a, 43 U.S.C. § 1744 (1976), cannot override the more onerous requirements of the latter, since Article VI, Clause 2 of the Federal Constitution makes the Constitution, and laws and treaties made in conformity therewith, the supreme law of the land.

James V. Joyce, 42 IBLA 383 (Sept. 11, 1979)

Under the Federal Land Policy and Management Act of 1976, sec. 314, 43 U.S.C. § 1744 (1976), the owner of unpatented mining claims located in 1977 must file affidavits of assessment work or notices of intention to hold the claims prior to Dec. 31 of the following calendar year, 1978, or the claims will be conclusively deemed to have been abandoned, and may properly be declared void.

Ernest K. Lehmann and Associates, 43 IBLA 1 (Sept. 11, 1979)

For the purposes of filing affidavits of assessment work or notices of intention to hold a mining claim, the date of location of the claim is the date as defined in 43 CFR 3833.0-5(h).

Under 43 U.S.C. § 1744(a) (1976), the owner of an unpatented mining claim located after Oct. 21, 1976, but in the calendar year 1976, must file an affidavit of assessment work or a notice of intention to hold the mining claim prior to Dec. 31 of the following calendar year, 1977, or the claim will be conclusively deemed to have been abandoned. Sec. 1744(a) does not conflict with 30 U.S.C. § 28 (1976) which pertains to the year in which the first affidavit of assessment work must be recorded.

Charlie Carnal, Walter Peck, and Edward Borzansky, 43 IBLA 10 (Sept. 11, 1979)

Regulation 43 CFR 3833.1-2(d) states that a location notice for each mining claim, millsite, or tunnel site filed for recordation shall be accompanied by a service fee. As this is a mandatory requirement, there is no recordation unless the documents are accompanied by the stated fee, or until it is paid. Therefore, where a notice of location of a claim or site is submitted to BLM for recordation on Dec. 14, 1977, and the filing fee therefor is not paid to BLM until Feb. 10, 1978, the recordation date of the notice is Feb. 10, 1978.

Joe B. Cashman, 43 IBLA 239 (Oct. 10, 1979)

The owner of an unpatented mining claim located after Oct. 21, 1976, must file an affidavit of assessment work or a notice of intention to hold the mining claim prior to Dec. 31 of the calendar year following the year in which the claim was located or the claim will be conclusively deemed to have been abandoned.

Lester L. Rhoads, 43 IBLA 380 (Oct. 31, 1979)

The owner of an unpatented mining claim located after Oct. 21, 1976, must file with the appropriate office of the Bureau of Land Management an affidavit of assessment work or a notice of intention to hold the mining claim prior to Dec. 31 of the following calendar year or the claim will be conclusively deemed to have been abandoned.

William A. Berry, 44 IBLA 162 (Nov. 30, 1979)

Where the owner of an unpatented mining claim located prior to Oct. 21, 1976, fails to file an affidavit of assessment work or notice of intention to hold the claim on or before the last day of the calendar year following the year the claim was recorded with BLM, the claim is properly deemed void.

Valda Waters, 44 IBLA 272 (Dec. 26, 1979)

DISCLAIMERS OF INTEREST

The Bureau of Land Management should suspend action on applications for recordable disclaimers of interest filed pursuant to sec. 315 of the Federal Land Policy and Management Act of 1976 where no regulations have been issued under which action may be taken and where there is no contrary policy directive.

Grace Cooley Coleman, Leota Ferrell, 35 IBLA 236 (May 26, 1978)

Where private land exchange was for surface rights only and applicant's warranty deed mistakenly conveys a fee simple absolute, the facts concerning which are well-documented, on equitable principles an applicant may be entitled to issuance of a disclaimer of interest in the mineral estate. 43 U.S.C. § 1745 (1976).

Dennis Potts, 42 IBLA 355 (Sept. 11, 1979)

EXCHANGES

The appraised values of offered and selected lands in a land exchange application made pursuant to the Federal Land Policy and Management Act of 1976 are properly determined where such values are set in accordance with the Uniform Appraisal Standards for Federal Land Acquisitions.

Paul Kellerblock, 38 IBLA 160 (Dec. 5, 1978)

The Federal Land Policy and Management Act of 1976 requires, among other things, (1) a determination by the Secretary of Agriculture that the public interest will be well served by a proposed national forest exchange; (2) that evaluation of the public interest shall fully consider the panoply of Federal, State, and local needs enumerated; and (3) that the Secretary shall find that the values and objectives to be served by Federal lands, if retained, do not exceed the values of, and public objectives serviceable by, the proffered lands if acquired.

Petro Leasco, Inc., 42 IBLA 345 (Aug. 31, 1979)

FEDERAL LAND POLICY AND MANAGEMENT ACT OF 1976--Continued

EXCHANGES--Continued

Under the Federal Land Policy and Management Act of 1976, 43 U.S.C. § 1716(a) (1976), the Bureau of Land Management may reject an application to exchange public lands for private lands as not in the public interest in order to protect a significant waterfowl habitat.

Staley Anderson, 44 IBLA 58 (Nov. 20, 1979)

GRAZING LEASES AND PERMITS

A decision renewing a grazing lease and rejecting a conflicting application which is rendered in accordance with the governing statutory standard set out in sec. 402(c) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. § 1752(c) (___ Supp. 197_), will not be overturned in the absence of convincing reasons that the award is not warranted.

Fancher Bros., 33 IBLA 262 (Jan. 5, 1978)

A decision made under 43 CFR 4.470 *et seq.* regarding future use of the Federal Range will be set aside if it is necessary that issues involved therein be considered under regulations newly promulgated pursuant to Federal Land Policy and Management Act of 1976.

United States v. View Point Ranches, 37 IBLA 357 (Oct. 31, 1978)

Where two preference right applicants file conflicting applications for a grazing lease, sec. 402(c) of FLPMA, 43 U.S.C. § 1752(c) (1976), mandates issuance of the new lease to the holder of the expiring lease provided that the holder of the expiring lease maintains his or her preference right qualifications and is otherwise in conformance with the applicable rules and regulations.

Earl M. Platt, 43 IBLA 41 (Sept. 18, 1979) 86 I.D. 458

PERMITS

Temporary use permits for purposes associated with rights-of-way issued under sec. 501 of the Federal Land Policy and Management Act of 1976, may only be issued pursuant to sec. 504(a) of that Act.

The provisions of sec. 504(a) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. § 1764(a) (1976), do not authorize the issuance of temporary use permits either as a preconstruction permit absent an existing right-of-way or for use as a transmission site right-of-way.

James W. Smith, 44 IBLA 275 (Dec. 26, 1979)

PUBLIC PARTICIPATION

Public notice and hearing is not required by the *Code of Federal Regulations* prior to closure of areas of the public lands to outdoor recreation use pursuant to 43 CFR 6010.4, implementing the multiple use management provisions of the Federal Land Policy and Management Act of 1976, 43 U.S.C. §§ 1732 and 1733 (1976).

California Ass'n of Four-Wheel Drive Clubs et al., 38 IBLA 361 (Dec. 29, 1978)

FEDERAL LAND POLICY AND MANAGEMENT ACT OF 1976--Continued

RECORDATION OF AFFIDAVIT OF ASSESSMENT WORK OR NOTICE OF INTENTION TO HOLD MINING CLAIM

A notice of location or certificate of location of a mining claim is a separate and distinct document from an affidavit of assessment work or a notice of intention to hold a mining claim and the filing of the one does not satisfy the requirement that the other be filed.

The holding of a mining claim and the diligent pursuance of mining activities on it does not relieve its owner of the obligation imposed by statute to file an affidavit of assessment work or a notice of intention to hold a mining claim.

Reliance upon erroneous advice or incomplete information provided by BLM employees cannot relieve the owner of a mining claim of an obligation imposed on him by statute or relieve him of the consequences imposed by a statute for his failure to comply with its requirements.

Paul S. Coupey, 35 IBLA 112 (May 15, 1978)

A notice of location or certificate of location of a mining claim is a separate and distinct document from an affidavit of assessment work or a notice of intention to hold a mining claim and the filing of the one does not satisfy the requirement that the other be filed.

Ronald L. Nordwick, 36 IBLA 238 (Aug. 14, 1978)

Where the owner of unpatented mining claims located after Oct. 21, 1976, fails to file evidence of annual assessment work or a notice of intention to hold the claims prior to Dec. 31 of the year following the calendar year in which the claims were *located*, the claims are properly deemed abandoned and void pursuant to sec. 314 of the Federal Land Policy and Management Act of Oct. 21, 1976, 43 U.S.C.A. § 1744 (Supp. 1978), and 43 CFR 3833.2-1(b)(1) and 43 CFR 3833.4(a).

Public Service Co. of Oklahoma, 38 IBLA 193 (Dec. 6, 1978)

Appellant's prior filings of mining claim documents with BLM do not relieve him of filing obligations imposed by sec. 314 of Federal Land Policy and Management Act and implementing regulations at 43 CFR Subpart 3833, which are binding.

Al Sherman, 38 IBLA 300 (Dec. 14, 1978)

Under the Federal Land Policy and Management Act of 1976, 43 U.S.C. § 1744(a)(2) (1976), if an unpatented mining claim located after Oct. 21, 1976, is not supported annually by either an affidavit of assessment work or notice of intention to hold, the claim will be conclusively deemed abandoned and void, despite appellant's statement there was no intent to abandon and that failure to file was an oversight.

Nuclear Power and Energy Co. and E-Z, Inc., 41 IBLA 142 (June 14, 1979)

Reliance upon erroneous advice or incomplete information provided by BLM employees cannot relieve the owner of a mining claim of an obligation imposed on him by statute or relieve him of the consequences imposed by a statute for his failure to comply with its requirements.

Clair W. Caldwell et al., 42 IBLA 139 (Aug. 16, 1979)

RECORDATION OF AFFIDAVIT OF ASSESSMENT WORK OR NOTICE OF INTENTION TO HOLD MINING CLAIM--Continued

Department of the Interior, as agency of executive branch of Government, is not proper forum to decide whether or not as to mining claims the recordation provisions of the Federal Land Policy and Management Act of 1976 are constitutional.

For the purposes of filing affidavits of assessment work or notices of intention to hold a mining claim, the date of location of the claim is the date as defined in 43 CFR 3833.0-5(h).

Charlie Carnal, Walter Peck, and Edward Porzansky, 43 IBLA 10 (Sept. 11, 1979)

Regulation 43 CFR 3833.1-2(d) states that a location notice for each mining claim, millsite, or tunnel site filed for recordation shall be accompanied by a service fee. As this is a mandatory requirement, there is no recordation unless the documents are accompanied by the stated fee, or until it is paid. Therefore, where a notice of location of a claim or site is submitted to BLM for recordation on Dec. 14, 1977, and the filing fee therefor is not paid to BLM until Feb. 10, 1978, the recordation date of the notice is Feb. 10, 1978.

Joe B. Cashman, 43 IBLA 239 (Oct. 10, 1979)

43 CFR 3833.1-2(d) states that a location notice for each mining claim, millsite, or tunnel site filed for recordation shall be accompanied by a service fee. As this is a mandatory requirement, there is no recordation unless the documents are accompanied by the stated fee, or until it is paid. Therefore, where a notice of location of a mining claim is submitted to BLM for recordation on Sept. 30, 1977, and the filing fee therefore is not paid to BLM until July 18, 1978, the recordation date of the notice of location is July 18, 1978. In the circumstances, the evidence of annual assessment work performed during the preceding assessment year or a notice of intention to hold the mining claim must be filed in the proper BLM office on or before Oct. 22, 1979, pursuant to 43 CFR 3833.2-1(a). Duly promulgated regulations have the force and effect of law and are binding on the Department.

NRG Mining, Inc., 44 IBLA 126 (Nov. 27, 1979)

Where the owner of an unpatented mining claim located prior to Oct. 21, 1976, fails to file an affidavit of assessment work or notice of intention to hold the claim on or before the last day of the calendar year following the year the claim was recorded with BLM, the claim is properly deemed void.

Valda Waters, 44 IBLA 272 (Dec. 26, 1979)

RECORDATION OF MINING CLAIMS AND ABANDONMENT

Land which has been patented without a reservation of minerals to the United States or which otherwise has been removed from the operation of the United States mining laws is not available for the location of mining claims. Mining claims located on such land after it is so removed are null and void ab initio. Attempts to record such claims under 43 U.S.C.A. § 1744 (West Supp. 1978) are properly rejected.

The Bureau of Land Management may require maps of mining claims meeting the requirements of 43 CFR 3833.1-2(c)(7) before accepting the recordation of the claims under 43 U.S.C.A. § 1744 (West Supp. 1977).

RECORDATION OF MINING CLAIMS AND ABANDONMENT--Continued

Paul S. Coupey, 33 IBLA 178 (Dec. 20, 1977)

Under sec. 314(b) of the Federal Land Policy and Management Act of Oct. 21, 1976, 43 U.S.C. § 1744(b) (West Supp. 1977), and 43 CFR 3833.1-2, the owner of a mining claim located after Oct. 21, 1976, must file a notice of recordation of the claim with the proper Bureau of Land Management office within 90 days of location of the claim. Failure to make a timely filing of the notice requires that the Bureau refuse to accept the notice and declare the claim to be null and void.

Northwest Citizens for Wilderness Mining Co., Inc., 33 IBLA 317 (Jan. 16, 1978)

R. Wade Holder et al., 35 IBLA 169 (May 22, 1978)

Owners of unpatented mining claims located after Oct. 21, 1977, must file a copy of the official record of the notice of location or certificate of location with the appropriate State Office of the Bureau of Land Management within 90 days of the date of location notwithstanding that the filing would be required prior to the promulgation of regulations implementing sec. 314 of the Federal Land Policy and Management Act of 1976.

Pelton E. Hall, 33 IBLA 349 (Jan. 18, 1978)

Under sec. 314(b) of the Federal Land Policy and Management Act of 1976, mining claims located after Oct. 21, 1976, must be recorded at the office of the Bureau of Land Management designated by the Secretary of the Interior, within 90 days after the date of location. By regulation the BLM State Offices are designated the proper offices for mining claim recordations.

Failure to record mining claims in accordance with sec. 314 of the Federal Land Policy and Management Act of 1976 is deemed conclusively to constitute abandonment of the claims. Filing the recordation documents in a Bureau of Land Management District Office, rather than in the proper State Office, the day before the expiration of the 90-day statutory deadline for recordation does not constitute timely recordation. In such circumstances, the BLM State Office properly rejected the recordations upon receipt of the documents after the 90-day deadline had passed.

Irwin W. Sweeney, 34 IBLA 205 (Mar. 23, 1978)

Pursuant to sec. 314(b) of the Federal Land Policy and Management Act of 1976, a copy of the official record of the notice of location of a mining claim must be filed within 90 days after location of the claim. In computing this period the date of location is not counted but the last day of the period is. Thus, when a claim is located on Sept. 1, 1977, a notice filed on Dec. 1, 1977, is 1 day late, Nov. 30, 1977, being the 90th day.

Robert Thompson, 34 IBLA 319 (Apr. 24, 1978)

"Date of location." Date of location of a mining claim is no later than the date on which the claimant certified he had complied with all requirements of law, as indicated by his signature on the notice and certificate of location. The date of recording the location notice of a mining claim in the county records has no bearing on the "date of location" of the claim, from which the 90-day period for recordation in BLM under FLPMA begins.

Under sec. 314(b) of the Federal Land Policy and Management Act of 1976, mining claims located after Oct. 21, 1976, must be recorded at the office of the Bureau of Land Management designated by the Secretary of the Interior, within 90 days after the date of location. By regulation the BLM State Offices are designated the proper offices for mining claim recordations each within its area of jurisdiction. BLM State Offices properly refuse to record notices of location of mining claims not received by the proper BLM State Office before the end of the 90-day period set by statute.

Ronald Coulam, 35 IBLA 35 (May 8, 1978)

Under sec. 314(b) of the Federal Land Policy and Management Act of 1976, mining claims located after Oct. 21, 1976, must be recorded in the proper office of the Bureau of Land Management within 90 days from the date of location, not within 90 days from the date the claims were recorded under State law. BLM properly refuses to accept for recordation notices of location filed after the 90-day period.

Doyle Mason, 35 IBLA 40 (May 8, 1978)

For the purposes of filing affidavits of assessment work or notices of intention to hold a mining claim, the date of location is the date as defined in the pertinent regulation, 43 CFR 3833.0-5(h), not the date on which the owner completes the last step in locating and recording a mining claim as required by State law.

A notice of location or certificate of location of a mining claim is a separate and distinct document from an affidavit of assessment work or a notice of intention to hold a mining claim and the filing of the one does not satisfy the requirement that the other be filed.

Paul S. Coupey, 35 IBLA 112 (May 15, 1978)

For the purposes of filing affidavits of assessment work or notices of intention to hold a mining claim, the date of location is the date as defined in the pertinent regulation, 43 CFR 3833.0-5(h).

A notice of location or certificate of location of a mining claim is a separate and distinct document from an affidavit of assessment work or a notice of intention to hold a mining claim and the filing of the one does not satisfy the requirement that the other be filed.

Ronald L. Nordwick, 36 IBLA 238 (Aug. 14, 1978)

Where certificates of location as to mining claims have not been filed (received and date stamped) at the proper Bureau of Land Management office within 90 days of the date of location, as required by the regulation, 43 CFR 3833.1-2(b), for claims located after Oct. 21, 1976, the Bureau must refuse to accept the certificates and declare the claims to be null and void.

Neither the Federal Land Policy and Management Act of 1976 nor the applicable regulations make provision for relief where the death of an employee instructed to file certificates of location for the mining claims of his employer, as required by 43 CFR 3833.1-2(b), causes the filing to be more than 90 days after the date of location of the claims.

R. P. Rossen, 36 IBLA 379 (Aug. 31, 1978)

Under sec. 314(a) of the Federal Land Policy and Management Act of 1976, the owner of an unpatented mining claim must file a notice of intention to hold his claim prior to Dec. 31 of the calendar year following the date of location of such claim, or the claim shall be deemed conclusively to have been abandoned.

Donald B. Little, 37 IBLA 1 (Sept. 6, 1978)

Juan Munoz, 39 IBLA 72 (Jan. 24, 1979)

Under sec. 314(b) of the Federal Land Policy and Management Act of 1976 (FLPMA), 43 U.S.C.A. § 1744 (Supp. 1978), unless the required copy of the official record of location is filed in the proper BLM office within 90 days from the date of location, a mining claim located after Oct. 21, 1976, is void, and any later filing of the notice is invalid.

G. Antolini & Son, 37 IBLA 13 (Sept. 8, 1978)

William E. Rhodes, 38 IBLA 127 (Nov. 22, 1978)

Under sec. 314(b) of the Federal Land Policy and Management Act of Oct. 21, 1976, 43 U.S.C. § 1744(b) (1976), and 43 CFR 3833.1-2, the owner of an unpatented lode or placer mining claim located after Oct. 21, 1976, shall, within 90 days after the date of location of such claim, file in the proper BLM office a copy of the official record of the notice of location or certificate of location. Failure to file such instruments shall be deemed conclusively to constitute an abandonment of the mining claim by the owner.

James P. Giancarlo, 37 IBLA 88 (Sept. 22, 1978)

Leland B. Pray, 37 IBLA 120 (Oct. 3, 1978)

Roy M. Byron, 39 IBLA 32 (Jan. 15, 1979)

Phillip E. Gardiner et al., 41 IBLA 391 (July 24, 1979)

Appellant's prior filings of mining claim documents with BLM do not relieve him of filing obligations imposed by sec. 314 of Federal Land Policy and Management Act and implementing regulations at 43 CFR Subpart 3833, which are binding.

Al Sherman, 38 IBLA 300 (Dec. 14, 1978)

The owner of an unpatented mining claim located after Oct. 21, 1976, on Federal land shall file within 90 days after the date of location of that claim in the proper BLM office a copy of the official record of the notice or certificate of location of the claim filed under State law. A copy of the notice or certificate shall be supplemented by, inter alia: (1) a map with a scale of not less than one-quarter inch to a mile showing the survey or protraction grids on which there will be depicted the location of the claim or site; and (2) a $5 service fee (nonreturnable) for each claim filed. Failure to file such instruments within the proper time period shall be deemed conclusively to constitute an abandonment of the mining claim, and it shall be void.

Where a mining claim is located after the enactment of the Federal Land Policy and Management Act of 1976 (Oct. 21, 1976), but before the date of promulgation of regulations implementing the statutory requirements of the Act relative to the recordation of mining claims, a regulation having retroactive effects may nonetheless be sustained in spite of such retroactivity if it is reasonable.

Elbert O. Jensen, 39 IBLA 62 (Jan. 17, 1979)

Under sec. 314(b) of the Federal Land Policy and Management Act of Oct. 21, 1976, 43 U.S.C. § 1744(b) (1976), and 43 CFR 3822.1-2, the owner of a mining claim located after Oct. 21, 1976, must file a notice of recordation of the claim with the proper Bureau of Land Management office within 90 days of location of the claim, or the claim is deemed abandoned and void.

Dale C. Delor, 40 IBLA 88 (Mar. 22, 1979)

Jim Spicer, 42 IBLA 288 (Aug. 27, 1979)

Under sec. 314(b) of the Federal Land Policy and Management Act of 1976, 43 U.S.C.A. § 1744 (Supp. 1978), unless the required copy of the official record of location is filed in the proper BLM office within 90 days from the date of location, a mining claim located after Oct. 21, 1976, is void, and any later filing of the notice is invalid.

Lawrence A. Landry, 40 IBLA 212 (Apr. 10, 1979)

Under sec. 314(b) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. § 1744 (1976), and 43 CFR 3833.1-2, the owner of a mining claim located after Oct. 21, 1976, must file a notice of recordation of the claim with the proper Bureau of Land Management office within 90 days of location of the claim. A notice must be received and date stamped in the BLM office within the 90-day period to be timely filed.

M. J. Reeves, 41 IBLA 92 (June 4, 1979)

Carl Dowler, Roy Stewart, 44 IBLA 192 (Nov. 30, 1979)

Under 43 CFR 3833.2-1(b), the owner of unpatented mining claims located after Oct. 21, 1976, in the calendar year 1977, must file affidavits of assessment work or notices of intention to hold the mining claims prior to Dec. 31 of the following calendar year, 1978, or the claims will be conclusively deemed to have been abandoned under 43 CFR 3833.4(a).

Blackburn Enterprises, 41 IBLA 115 (June 11, 1979)

Under the Federal Land Policy and Management Act of 1976, 43 U.S.C. § 1744(a)(2) (1976), if an unpatented mining claim located after Oct. 21, 1976, is not supported annually by either an affidavit of assessment work or notice of intention to hold, the claim will be conclusively deemed abandoned and void, despite appellant's statement there was no intent to abandon and that failure to file was an oversight.

Nuclear Power and Energy Co. and P-2, Inc., 41 IBLA 142 (June 14, 1979)

The owner of an unpatented mining claim relocated before Oct. 21, 1976, has until Oct. 21, 1979, in which to record his notice of location with BLM. However, if he elects to record in 1977, he must file an affidavit of assessment work or a notice of intention to hold the mining claim prior to Dec. 31 of the following year, 1978, and each year thereafter, or the claim will be conclusively deemed to have been abandoned.

William L. Rucinski, 42 IBLA 56 (Aug. 1, 1979)

Where a person purchases a mining claim originally located on or before Oct. 21, 1976, the requirements of 43 CFR 3833.1-2(a) concerning claims located *prior* to the enactment of FLPMA apply, and the purchaser has until Oct. 21, 1979, to submit a copy of the official record of the notice of certificate of the claim filed under State law. In these circumstances, the 90-day filing deadline set out in 43 CFR 3833.1-2(b) for claims located *after* the enactment of FLPMA does not apply.

Warren E. Pierce, 42 IBLA 91 (Aug. 13, 1979)

Under 43 CFR 3833.2-1(a), the owner of unpatented mining claims located before Oct. 21, 1976, in the calendar year 1978, and recorded with the Bureau of Land Management (BLM) in 1977, must file affidavits of assessment work or notices of intention to hold the mining claims prior to Dec. 31 of each calendar year after recording, or the claims will be conclusively deemed to have been abandoned under 43 CFR 3833.4(a).

Clair R. Caldwell et al., 42 IBLA 139 (Aug. 16, 1979)

Under 43 CFR 3833.2-1, the owner of two unpatented mining claims, one located Sept. 16, 1976, and recorded with BLM May 3, 1977, and one located Feb. 1, 1977, and recorded with BLM Feb. 17, 1977, must have filed affidavits of assessment work or notices of intention to hold the mining claims for both claims prior to Dec. 31 of the calendar year, 1978, to prevent the claims from being conclusively deemed to have been abandoned under 43 CFR 3833.4(a).

Amanda Mining & Manufacturing Ass'n., 42 IBLA 144 (Aug. 16, 1979)

Under 43 CFR 2091.6-4 and 2627.4(b), the filing of an application by State of Alaska to select lands segregates those lands from all subsequent appropriations, including locations under the mining law. A mining claim located on land which has been segregated and closed to mineral entry is properly declared null and void ab initio.

John C. Schandelmeier, 42 IBLA 240 (Aug. 22, 1979)

Sec. 314 of the Federal Land Policy and Management Act of 1976 was enacted to establish a Federal recording system for mining claims to facilitate Federal land use planning and management. Failure to comply with the mandatory filing requirements constitutes abandonment of the claim and the land reverts to the status of public domain.

In the absence of a specific regulation or policy directive specifying the type of proof necessary for recordation, the Bureau of Land Management should liberally consider attempts by a mining claimant under sec. 314 of the Federal Land and Policy Management Act to record notice of a mining claim where proof of recording cannot be made and 30 U.S.C. § 38 (1976) is relied upon for holding the claim, and before rejecting a filing for such a claim, BLM should request further evidence from the claimant which it would consider satisfactory. Such evidence should include at a minimum the name the claim is and has been known by, the name and address of the claimant, an adequate description of the claim, the type of claim, the time of holding and working the claim to meet a State's statute of limitations and, if possible, the date of the origin of claimant's title and facts as to continuation of possession of the claim, and any other information available showing a chain of title to the claimant and bearing upon the possession and occupancy of the claim for mining purposes, and other information which the Bureau of Land Management deems essential to meet the purposes of the recordation provision.

Philip Sayer, 42 IBLA 296 (Aug. 27, 1979)

The regulation, 43 CFR 3833.2-1(b)(1), requiring evidence of assessment work to be filed prior to Dec. 31 of the year following location of the claim, is mandatory. Failure to comply therewith must result in a finding that the claim has been abandoned.

Donald L. Fulgham, 42 IBLA 338 (Aug. 30, 1979)

The regulations governing recordation of mining claims are mandatory, and failure to comply therewith must result in a finding that the claim has been abandoned. Where appellants timely file for record an "amended" location notice, accompanied by the original location notice which is untimely on its face, the mining claim is properly deemed abandoned as to the original location, but not as to the "amended" claim if it is a relocation of the claim under the law.

Walter T. Paul, James E. Meyer, 43 IBLA 119 (Sept. 24, 1979)

Under 43 CFR 3833.2-1 the owner of unpatented mining claims located after Oct. 21, 1976, and recorded with the Bureau of Land Management in Nov. 1977, must have filed affidavits of assessment work or notices of intention to hold the mining claims prior to Dec. 31, 1978, to prevent the claims from being conclusively deemed to have been abandoned under 43 CFR 3833.4(a).

Roger Kuhn, 43 IBLA 182 (Sept. 28, 1979)

Since an amended notice merges with the original notice, the filing of the amended notice, for purposes of recordation under either sec. 8 of the Mining in the Parks Act, 90 Stat. 1342, 1343, 16 U.S.C. § 1907 (1976), or sec. 314 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2744, 2769, 43 U.S.C. § 1744 (1976), together with such other information required by the applicable regulations, constitutes compliance with the recording requirements of those Acts.

R. Gail Tibbetts et al., 43 IBLA 210 (Oct. 5, 1979)
86 I.D. 538

Regulation 43 CFR 3833.1-2(d) states that a location notice for each mining claim, millsite, or tunnel site filed for recordation shall be accompanied by a service fee. As this is a mandatory requirement, there is no recordation unless the documents are accompanied by the stated fee, or until it is paid. Therefore, where a notice of location of a claim or site is submitted to BLM for recordation on Dec. 14, 1977, and the filing fee therefor is not paid to BLM until Feb. 10, 1978, the recordation date of the notice is Feb. 10, 1978.

Joe B. Cashman, 43 IBLA 239 (Oct. 10, 1979)

Under 43 CFR 3833.2-1(c), the owner of unpatented mining claims located after Oct. 21, 1976, in the calendar year 1977, must file affidavits of assessment work or notices of intention to hold the mining claims on or before Dec. 30 of the following calendar year, 1978, or the claims will be conclusively deemed to have been abandoned under 43 CFR 3833.4(a).

Where a claimant is not required to do any assessment work under the general mining laws, but is nevertheless required to file under 43 CFR 3833.1-2(c), he must file a notice of intention to hold the claims in lieu of an affidavit of assessment work performed.

Silvertip Exploration & Mining, 43 IBLA 250 (Oct. 10, (1979)

Under 43 U.S.C. § 1744 (1976), and 43 CFR 3833.2-1(a), the owners of unpatented mining claims located before Oct. 21, 1976, and recorded with BLM in 1977, must file affidavits of assessment work or notices of intention to hold the mining claims prior to Dec. 31 of each calendar year following the calendar year of recording, or the claims will be conclusively deemed to have been abandoned under 43 U.S.C. § 1744(c) (1976), and 43 CFR 3833.4. Mining claimants are not relieved of the requirement to timely file their documents when they mistakenly mailed them to the wrong city, as the documents cannot be considered as filed until they are received by the proper office of the Bureau of Land Management.

Dennis J. Mertz and Randy Mack, 43 IBLA 302 (Oct. 17, 1979)

Unpatented mining claims are properly deemed to have been abandoned and declared void where a claimant fails to comply with the requirements of the recording law by showing that a copy of the claimant's notice of intention to hold the claim (where an affidavit of assessment work is not filed), was filed in the local jurisdiction's office where notices of the location of the claims are recorded.

R. B. Wadleigh, 44 IBLA 11 (Nov. 6, 1979)

Decisions by BLM declaring mining claims abandoned and void for failure to file timely annual notices of intention to hold the claims or affidavits of assessment work will be vacated, notwithstanding the fact that BLM's records contain no such documents marked as timely filed, where the claimant is able to show that he mailed such documents to BLM and that it received them timely, and where it does not appear unlikely that BLM misplaced the documents or misconstrued their contents, owing to the absence of a numbering system and the similarity of the names of the claims to others.

Under 43 CFR 3833.2-1(a) and 3833.4(a), the owner of an unpatented mining claim located before Oct. 21, 1976, notice of which is recorded with BLM in the calendar year 1977, must file an affidavit of assessment work or a notice of intention to hold the claim on or before Dec. 30 of the following calendar year, 1978, or the claim will be conclusively deemed to have been abandoned.

E. Joe Swisher, 44 IBLA 44 (Nov. 19, 1979)

RECORDATION OF MINING CLAIMS AND ABANDONMENT--Continued

A copy of a recorded instrument which includes all of the information required by statute and regulation for the Federal recordation of mining claims and which is timely filed in the proper BLM office will be deemed sufficient to avert the conclusive presumption that the claims are abandoned and void, notwithstanding that the instrument is styled "Affidavit of Discovery," rather than "Notice" or "Certificate" of location.

William K. Moore, 44 IBLA 93 (Nov. 20, 1979)

43 CFR 3833.1-2(d) states that a location notice for each mining claim, millsite, or tunnel site filed for recordation shall be accompanied by a service fee. As this is a mandatory requirement, there is no recordation unless the documents are accompanied by the stated fee, or until it is paid. Therefore, where a notice of location of a mining claim is submitted to BLM for recordation on Sept. 30, 1977, and the filing fee therefore is not paid to BLM until July 18, 1978, the recordation date of the notice of location is July 18, 1978. In the circumstances, the evidence of annual assessment work performed during the preceding assessment year or a notice of intention to hold the mining claim must be filed in the proper BLM office on or before Oct. 22, 1979, pursuant to 43 CFR 3833.2-1(a). Duly promulgated regulations have the force and effect of law and are binding on the Department.

NRG Mining, Inc., 44 IBLA 126 (Nov. 27, 1979)

Under sec. 314 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. § 1744 (1976), and 43 CFR 3833.1-2, the owner of a mining claim located after Oct. 21, 1976, must file a notice of recordation of the claim with the proper Bureau of Land Management office within 90 days of location of the claim. Failure to file such notice shall be deemed conclusively to constitute an abandonment of the mining claim by the owner.

Raymond W. Quigley, 44 IBLA 250 (Dec. 19, 1979)

Where the owner of an unpatented mining claim located prior to Oct. 21, 1976, fails to file an affidavit of assessment work or notice of intention to hold the claim on or before the last day of the calendar year following the year the claim was recorded with BLM, the claim is properly deemed void.

Valda Waters, 44 IBLA 272 (Dec. 26, 1979)

Under sec. 314 of the Federal Land Policy and Management Act of Oct. 21, 1976, 43 U.S.C § 1744 (1976), and 43 CFR 3833.1-2, the owner of a lode mining claim must file a notice of recordation of the claim with the proper Bureau of Land Management Office within 90 days of location of the claim. Failure to so file is deemed conclusively to constitute an abandonment of the claim by the owner.

Faith C. Hartman, 44 IBLA 310 (Dec. 31, 1979)

REPEALERS

Repeal of the homestead laws renders moot the question of whether a private contestant can earn a preference right to enter by procuring the cancellation of a contestee's homestead entry for reasons not shown by Bureau of Land Management (BLM) records.

Wesley Laverne Edwards v. Paul Unruh, 33 IBLA 277 (Jan. 5, 1978)

BLM has discretion to reject public sale applications pursuant to R.S. 2455, repealed by the Federal Land Policy and Management Act of 1976, effective Oct. 21, 1976, where the sale has not been held by this date. The filing of a public sale application creates no rights under sec. 701(a) of FLPMA which prevent BLM from exercising its discretion to dismiss the application.

Suzanne A. Halliday, 34 IBLA 219 (Mar. 27, 1978)

The Small Tract Act, as amended, 43 U.S.C. § 682a et seq. (1970) was repealed by sec. 702 of the Federal Land Policy and Management Act of 1976 (FLPMA), 90 Stat. 2787, and no land may be purchased under this Act. Where a State Office decision approves an application for purchase of a tract of land filed pursuant to the Small Tract Act in order to correct an error in a land description in another patent previously issued to appellants under the Small Tract Act, the decision will be reversed and the case remanded to the State Office for determination of whether the original patent may be corrected under sec. 316 of FLPMA, Correction of Conveyance Documents, 43 U.S.C. § 1746 (1970).

Richard O. Dale et al., 38 IBLA 175 (Dec. 6, 1978)

The Small Tract Act, 43 U.S.C. § 682a-e (1970), was repealed by sec. 702, Federal Land Policy and Management Act of 1976, Oct. 21, 1976, P.L. 94-579, 90 Stat. 2787. Renewal of a small tract lease was discretionary under the former Small Tract Act, so there was no right to renewal of a small tract lease preserved by sec. 701 of FLPMA. Any use or occupancy of the public domain granted subsequent to Oct. 21, 1976, must be under authority contained in FLPMA.

Arthur G. Lane, Jr., 38 IBLA 297 (Dec. 14, 1978)

Authority to dispose of land within Alaska railroad townsites under 43 U.S.C. § 975b (1970) was repealed by sec. 704(a) of the Federal Land Policy and Management Act of 1976.

Matanuska-Susitna Borough, Inc., 38 IBLA 362 (Dec. 29, 1978)

The Act of Feb. 15, 1901, 43 U.S.C. § 959 (1970), was repealed by sec. 706 of the Federal Land Policy and Management Act of 1976 (FLPMA), 90 Stat. 2793, and any use or occupancy of public land granted subsequent to the effective date of FLPMA, Oct. 21, 1976, must be issued under authority of that Act. In authorizing the Secretary to grant rights-of-way, FLPMA provides that the Secretary shall require the applicant to submit certain information relating to the right-of-way, and a State Office notice enumerating such requirements is consistent with FLPMA.

William J. Colman, 40 IBLA 180 (Apr. 3, 1979)

FEDERAL LAND POLICY AND MANAGEMENT ACT OF 1976--Continued

REPEALERS--Continued

R.S. 2387, 2388 and 2389, 43 U.S.C. §§ 718-720 (1976), were repealed by sec. 703 of the Federal Land Policy and Management Act of 1976 (FLPMA), 90 Stat. 2790, and any transfer of land for a townsite within a National Forest after the effective date of FLPMA, Oct. 21, 1976, must be made under authority of sec. 213 of that Act. The filing of an application under other statutes prior to the enactment of FLPMA does not constitute a valid existing right which would survive FLPMA.

Townsite of Liberty, 40 IBLA 317 (Apr. 30, 1979)

The Alaska townsite laws, 43 U.S.C. §§ 732-736 (1970), were repealed by the Federal Land Policy and Management Act of 1976, sec. 703(a), 90 Stat. 2789, so that no rights under the townsite laws could be derived from occupancy commenced after Oct. 21, 1976.

Stu Mach, 43 IBLA 306 (Oct. 17, 1979)

RIGHTS-OF-WAY

An application for a communication site under 43 U.S.C. § 961 (1970) should be denied where utilization of an existing right-of-way is practical under 43 U.S.C. § 1763 (19__) and where the proposed site would have an adverse impact on the environment.

"Practical." Under 43 U.S.C. § 1763 (19__), utilization of a nearby existing communication site is practical where the site is suitable and the expense of utilization would not be unreasonable as compared with environmental damage from a proliferation of sites.

Jicarilla Apache Indian Tribe, 29 IBLA 57 (Feb. 16, 1977)

Under 43 CFR 2802.1-7(e), the charge for a right-of-way on public lands may be revised upon compliance with procedural requirements at any time 5 years or more from the date when the rate was initially established.

XYZ Television, Inc., 32 IBLA 317 (Sept. 30, 1977)

Under sec. 310 of the Federal Land Policy and Management Act of 1976, 43 U.S.C.A. § 1764(g) (West Supp. 1977), charges for rights-of-way on public lands are in general to be paid annually rather than in advance for a longer period pursuant to 43 CFR 2802.1-7(a).

XYZ Television, Inc., 33 IBLA 80 (Dec. 8, 1977)

Although a right-of-way granted under the Act of Jan. 21, 1895, was previously subject to cancellation by the authorized officer for non-use pursuant to 43 CFR 2802.2-3, the Federal Land Policy and Management Act of 1976 provides that suspension or termination of a right-of-way requires an appropriate administrative proceeding pursuant to 5 U.S.C. § 554 (1970), except where the right-of-way provides by its terms that it will terminate in such event.

Western Aggregates of Mineral & Rock, Inc., 34 IBLA 164 (Mar. 14, 1978)

FEDERAL LAND POLICY AND MANAGEMENT ACT OF 1976--Continued

RIGHTS-OF-WAY--Continued

Sec. 503 of the Federal Land Policy and Management Act of 1976 gives the Secretary discretionary authority with respect to issuance of rights-of-way. It would not be in public interest to grant appellant right-of-way because of inadequate water flow in Shoshone River and because of potential interference with planning for a modification of Buffalo Bill Dam. A decision by BLM, made in exercise of its discretion, to reject a water pipeline right-of-way application will be affirmed when the record shows the decision to be a reasoned analysis of factors involved made in due regard for public interest, and no sufficient reason to disturb decision is shown.

Broken H Ranch Co., 34 IBLA 182 (Mar. 21, 1978)

Approval of a domestic water pipeline right-of-way application filed under the Act of Feb. 15, 1901, is within the discretion of the Secretary of the Interior. Approval of such an application remains a discretionary matter under the Federal Land Policy and Management Act of 1976, 43 U.S.C.A. §§ 1761-1771 (West Supp. 1977). Neither an application for a right-of-way nor the building of a pipeline on public land without prior authorization earns an applicant a right to a right-of-way under these statutes.

A decision rejecting an application for a domestic water pipeline right-of-way will be affirmed when the record shows the decision to be a reasoned analysis of the factors involved made in due regard for the public interest, and no sufficient reason to disturb the decision is shown.

Stanley S. Leach, Roxanna M. Leach, 35 IBLA 53 (May 5, 1978)

Applications for rights-of-way on public lands pending on Oct. 22, 1976, are to be considered as applications under Title V of the Federal Land Policy and Management Act of 1976, but existing regulations will govern the administration of public lands to the extent practical until new regulations are promulgated.

Under sec. 504(g) of the Federal Land Policy and Management Act of 1976, 43 U.S.C.A. § 1764(g) (West Supp. 1978), payments for use of right-of-way sites should be on an annual basis at the fair market value unless the annual payment would be less than $100. Therefore, although lands may be appraised for a longer future period of time, lump-sum payments for future years may not be demanded for amounts exceeding the statutory amount; instead charges for such amounts should be made on an annual basis.

Full Circle, Inc., 35 IBLA 325 (June 19, 1978)
85 I.D. 207

Donald B. Clark, C. Reinhart & Son, Inc., Hartwell Excavating Co., 39 IBLA 182 (Jan. 31, 1979)

The Act of Feb. 15, 1901, 43 U.S.C. § 959 (1970), was repealed by sec. 706 of the Federal Land Policy and Management Act of 1976 (FLPMA), 90 Stat. 2793, and any use or occupancy of public land granted subsequent to the effective date of FLPMA, Oct. 21, 1976, must be issued under authority of that Act. In authorizing the Secretary to grant rights-of-way, FLPMA provides that the Secretary shall require the applicant to submit certain information relating to the right-of-way, and a State Office notice enumerating such requirements is consistent with FLPMA.

William J. Colman, 40 IBLA 180 (Apr. 3, 1979)

RIGHTS-OF-WAY--Continued

Under the Federal Land Policy and Management Act of 1976, approval for a right-of-way for a timber access road is discretionary. A decision by BLM rejecting such an application will be affirmed when the record shows the decision to be a reasoned analysis of the factors involved, made with due regard for the public interest.

Lowell Durham, 40 IBLA 209 (Apr. 10, 1979)

Pending applications for rights-of-way filed under the Acts of Feb. 15, 1901, and Mar. 4, 1911, shall be considered as applications under the Federal Land Policy and Management Act of 1976.

The granting of a right-of-way under FLPMA and the superseded Acts of Feb. 15, 1901, and Mar. 4, 1911, is within the Secretary's discretion and neither the filing of the application nor the existence of improvements earns appellant a right to the right-of-way. No rights vest in the applicant until the grant is approved by the Secretary. An application for a right-of-way is properly rejected where the land is in an interim conveyance to a Native Corporation.

"Public Lands." Land within an interim conveyance to a Native Corporation is no longer "public land" under the Federal Land Policy and Management Act nor subject to Bureau of Land Management jurisdiction to issue rights-of-way under that Act.

New England Fish Co., 42 IBLA 200 (Aug. 22, 1979)

Where, on appeal from the denial of a protest to the issuance of a right-of-way, an appellant does not show that issuance of the right-of-way was contrary to the law or applicable regulations, a decision rejecting the protest will be affirmed.

James W. Smith, 44 IBLA 275 (Dec. 26, 1979)

RULES AND REGULATIONS

As between two preference right applicants for land offered at public sale under the Isolated Tract Act, 43 U.S.C. § 1171 (1970), departmental regulation 43 CFR 2711.4(b)(2) continues in effect pursuant to 43 U.S.C.A. §§ 1713, 1740 (West Supp. 1977) and is strictly construed with regard to the deadline for making the required showing of fee title to contiguous land.

Although the Federal Land Policy and Management Act, 43 U.S.C.A. § 1701 et seq. (West Supp. 1977), repealed the Isolated Tract Act, 43 U.S.C. § 1171 (1970), where a public sale was held prior to Oct. 21, 1976, with the decision to hold the sale fully supported by land use plans, and there is an explicit finding that disposal criteria of the Federal Land Policy and Management Act have been met, final certificate and patent may be issued to the highest preference right bidder pursuant to 43 CFR 2711.4 et seq.

L. A. Gillette, 33 IBLA 182 (Dec. 21, 1977)

The Bureau of Land Management should suspend action on applications for recordable disclaimers of interest filed pursuant to sec. 315 of the Federal Land Policy and Management Act of 1976 where no regulations have been issued under which action may be taken and where there is no contrary policy directive.

Grace Cooley Coleman, Leota Ferrell, 35 IBLA 236 (May 26, 1978)

RULES AND REGULATIONS--Continued

Appellant's prior filings of mining claim documents with BLM do not relieve him of filing obligations imposed by sec. 314 of Federal Land Policy and Management Act and implementing regulations at 43 CFR Subpart 3833, which are binding.

Al Sherman, 38 IBLA 300 (Dec. 14, 1978)

Where a mining claim is located after the enactment of the Federal Land Policy and Management Act of 1976 (Oct. 21, 1976), but before the date of promulgation of regulations implementing the statutory requirements of the Act relative to the recordation of mining claims, a regulation having retroactive effects may nonetheless be sustained in spite of such retroactivity if it is reasonable.

Elbert O. Jensen, 39 IBLA 62 (Jan. 17, 1979)

43 CFR 3833.1-2(d) states that a location notice for each mining claim, millsite, or tunnel site filed for recordation shall be accompanied by a service fee. As this is a mandatory requirement, there is no recordation unless the documents are accompanied by the stated fee, or until it is paid. Therefore, where a notice of location of a mining claim is submitted to BLM for recordation on Sept. 30, 1977, and the filing fee therefore is not paid to BLM until July 18, 1978, the recordation date of the notice of location is July 18, 1978. In the circumstances, the evidence of annual assessment work performed during the preceding assessment year or a notice of intention to hold the mining claim must be filed in the proper BLM office on or before Oct. 22, 1979, pursuant to 43 CFR 3833.2-1(a). Duly promulgated regulations have the force and effect of law and are binding on the Department.

NRG Mining, Inc., 44 IBLA 126 (Nov. 27, 1979)

SALES

As between two preference right applicants for land offered at public sale under the Isolated Tract Act, 43 U.S.C. § 1171 (1970), departmental regulation 43 CFR 2711.4(b)(2) continues in effect pursuant to 43 U.S.C.A. §§ 1713, 1740 (West Supp. 1977) and is strictly construed with regard to the deadline for making the required showing of fee title to contiguous land.

Although the Federal Land Policy and Management Act, 43 U.S.C.A. § 1701 et seq. (West Supp. 1977), repealed the Isolated Tract Act, 43 U.S.C. § 1171 (1970), where a public sale was held prior to Oct. 21, 1976, with the decision to hold the sale fully supported by land use plans, and there is an explicit finding that disposal criteria of the Federal Land Policy and Management Act have been met, final certificate and patent may be issued to the highest preference right bidder pursuant to 43 CFR 2711.4 et seq.

L. A. Gillette, 33 IBLA 182 (Dec. 21, 1977)

A decision to return an application for a public sale constitutes an action adverse to the applicant by an officer of the Bureau of Land Management and is thus appealable to the Board of Land Appeals under 43 CFR 4.410.

It is a proper exercise of discretion under the Federal Land Policy and Management Act of 1976 for the Bureau of Land Management to refuse to process and to reject applications for public sale pending on the date of the Act, even though it will continue to process bids and

SALES--Continued

preference right applications for a sale held prior to the Act.

United Park City Mines Co., 33 IBLA 358 (Jan. 18, 1978)

SERVICE CHARGES

The owner of an unpatented mining claim located after Oct. 21, 1976, on Federal land shall file within 90 days after the date of location of that claim in the proper BLM office a copy of the official record of the notice or certificate of location of the claim filed under State law. A copy of the notice or certificate shall be supplemented by, *inter alia*: (1) a map with a scale of not less than one-quarter inch to a mile showing the survey or protraction grids on which there will be depicted the location of the claim or site; and (2) a $5 service fee (nonreturnable) for each claim filed. Failure to file such instruments within the proper time period shall be deemed conclusively to constitute an abandonment of the mining claim, and it shall be void.

Where a mining claim is located after the enactment of the Federal Land Policy and Management Act of 1976 (Oct. 21, 1976), but before the date of promulgation of regulations implementing the statutory requirements of the Act relative to the recordation of mining claims, a regulation having retroactive effects may nonetheless be sustained in spite of such retroactivity if it is reasonable.

Elbert O. Jensen, 39 IBLA 62 (Jan. 17, 1979)

WILDERNESS

Sec. 603 requires the Secretary to study all roadless areas of 5,000 acres or more and roadless islands with wilderness characteristics, and report his recommendations to the President as to the suitability or nonsuitability for preservation as wilderness of each such area. The Secretary may not make multiple-use tradeoffs in determining which public land areas qualify for wilderness study status.

For the purpose of BLM wilderness review, the term "roadless" means the absence of roads which have been improved and maintained by mechanical means to insure relatively regular and continuous use. A way maintained solely by the passage of vehicles does not constitute a road.

Sec. 603(a) requires that the Secretary report to the President by July 1, 1980, his recommendations as to the suitability for wilderness preservation of all formally identified natural or primitive areas designated prior to Nov. 1, 1975. Only those areas for which a notice of designation was published in the *Federal Register* are subject to this accelerated review and reporting requirement.

Sec. 603 of FLPMA does not apply to those areas of the Oregon and California and Coos Bay Wagon Road lands which are being managed for commercial timber production. Sec. 603 does apply to those areas not being managed for commercial timber production.

Prior to completion of the initial wilderness inventory and identification of the wilderness study areas, wilderness characteristics must be evaluated before the Secretary authorizes any new activities which would destroy wilderness qualities. Discretionary activities must be conditioned to prevent impairment of an area's potential for wilderness designation.

WILDERNESS--Continued

During the review of wilderness study areas, and until Congress acts on the President's recommendations, the Secretary must manage study areas to prevent impairment of their suitability for wilderness designation, with certain limited exceptions.

Management of sec. 603 study areas should be guided by the principle that developmental activity must be carefully regulated to insure it is compatible with wilderness, or that its imprint on wilderness is temporary.

Sec. 603 provides that mining, grazing, and mineral leasing may continue in wilderness study areas in the same manner and degree as on Oct. 21, 1976, even if impairment of an area's suitability for wilderness results.

The words "existing" and "manner and degree" in sec. 603(c) should be read in conjunction with the words "mining and grazing uses" to establish as a benchmark the physical and aesthetic impact a mining or grazing activity was having on an identified or potential wilderness study area on Oct. 21, 1976.

The existing mining use exception for mining and mineral leasing is limited geographically by the area of active development, and the logical adjacent continuation of the existing activity, not necessarily the boundary of the particular mining claim or mineral lease on which the operation is located.

When the impact from mining and grazing activities on a wilderness study area differs in manner and degree from the impact from such activity on Oct. 21, 1976, the Secretary must regulate the activity to prevent impairment of the area's suitability for preservation as wilderness.

The word "existing" in sec. 603(c) modifies "mineral leasing" in the same manner as it modifies "mining and grazing uses."

The Secretary is vested with the authority and responsibility to regulate all activities in wilderness study areas to prevent unnecessary and undue degradation and to afford environmental protection.

Areas under review for designation as wilderness remain available for appropriation under the mining laws, unless withdrawn for reasons other than protection of wilderness.

Interpretation of Sec. 603 of the Federal Land Policy and Management Act of 1976 - Bureau of Land Management (BLM) Wilderness Study, M-36910 (Feb. 13, 1979)
86 I.D. 89

Where the land embraced in a proposed oil and gas lease, to be issued subsequent to the enactment of the Federal Land Policy and Management Act of 1976, 43 U.S.C. § 1701 (1976), has been identified as having wilderness characteristics and is being reviewed for possible preservation as wilderness pursuant to sec. 603 of that Act, it is proper for the Bureau of Land Management to require the execution of a special stipulation providing that consent to oil and gas operations will not be given if it is determined that such operations will impair the land's wilderness characteristics.

Where the land embraced in a proposed oil and gas lease has been identified as having wilderness characteristics and is being reviewed for possible preservation as wilderness pursuant to sec. 603 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. § 1782 (1976), it is proper for the Bureau of Land Management to require the execution of a special stipulation providing that oil and gas operations are subject to regulation where

FEDERAL LAND POLICY AND MANAGEMENT ACT OF 1976--Continued

WILDERNESS--Continued

the obvious aim is protecting the wilderness values inherent in the land.

Reserve Oil, Inc., et al., 42 IBLA 190 (Aug. 22, 1979)

FEDERAL METAL AND NONMETALLIC MINE SAFETY ACT

IMMINENT DANGER WITHDRAWAL ORDERS

Dismissal

Allegations of invalidity ab initio with respect to an imminent danger withdrawal order constitute a legally sufficient claim for relief under secs. 9 and 11 of the Act. 30 U.S.C. §§ 728, 730 (1970).

In the Matter of Kennecott Copper Corp. (Bingham Mine), 6 IBMA 288 (Sept. 15, 1976) 83 I.D. 329

Mootness

Abatement of a condition or practice which gave rise to a sec. 8(a) imminent danger withdrawal order does not render moot an application for review and annulment of such order under secs. 9 and 11 of the Act. 30 U.S.C. §§ 727(a), 728, 730 (1970).

In the Matter of Kennecott Copper Corp. (Bingham Mine), 6 IBMA 288 (Sept. 15, 1976) 83 I.D. 329

FEDERAL PROPERTY AND ADMINISTRATIVE SERVICES ACT

(See also Surplus Property--if included in this Index.)

Where oil and gas deposits in lands acquired by the United States and devoted to use for military purposes become "surplus property" under the Federal Property and Administrative Services Act, such deposits may be leased only under the provisions of that Act, and are not subject to leasing under the Mineral Leasing Act for Acquired Lands.

Paradox Oil and Gas Co., 22 IBLA 242 (Oct. 22, 1975)

Lands acquired for military purposes and subsequently disposed of as surplus property under the Federal Property and Administrative Services Act with a reservation of mineral rights to the United States are not subject to leasing under the Mineral Leasing Act for Acquired Lands. Oil and gas leases on such land may issue only under the provisions of the Federal Property and Administrative Services Act, which requires competitive bidding.

Capitol Oil Corp., 33 IBLA 392 (Jan. 26, 1978)

FEES

(See also Accounts--if included in this Index.)

The Bureau of Land Management, in the exercise of its discretionary power to issue special land use permits, may establish special fee assessments for off-road vehicle (ORV) events.

The filing of an application for a special land use permit does not vest in the applicant any rights which preclude the Bureau of Land Management from requiring compliance with fee assessments adopted after the date of such filing but before issuance of the permit. In the absence of a provision that pending applications are to be exempted from the effects of the change in fee requirements, the applicant must comply with the fee assessment in effect at the time of the issuance of the special land use permit.

An applicant's special land use permit application does not fall within the "firm commitment" exception of a Bureau of Land Management instruction memorandum requiring revised fee assessments for off-road vehicle (ORV) permits where, subsequent to issuance and notice of the memorandum, the application is still in the preliminary processing stage requiring additional pre-event meetings, the applicant's acceptance of special stipulations, and further staff investigation and review before approval; however, the case will be remanded for further consideration where the District Office decision does not determine whether the application falls within the memorandum exception which permits the honoring of "negotiations which have progressed too far to negate."

Walt's Racing Ass'n, 18 IBLA 359 (Jan. 30, 1975)

Where notice of proposed rulemaking to change certain filing fees and to impose other charges has been published in the Federal Register, but no final rules have been published, the old schedule of fees will remain in effect until such time as the new rules are finally adopted, published, and made effective.

Arizona Public Service Co., 20 IBLA 120 (Apr. 28, 1975)

An applicant's special land use permit application does not fall within a Bureau of Land Management instruction memorandum exception which permits the honoring of past "negotiations which have progressed too far to negate," in lieu of the new revised fee assessment required by the memorandum for off-road vehicle events, where at the time of issuance and notice of the memorandum only preliminary negotiations had occurred which could still be negated.

Walt's Racing Ass'n, 22 IBLA 238 (Oct. 22, 1975)

"Rural Electrification Administration projects." A right-of-way holder is not excused from payment of rental under 43 CFR 2802.1-7(c), by virtue of holding an REA loan, where such holder is neither a cooperative or nonprofit organization.

Continental Telephone of the West, 35 IBLA 279 (June 2, 1978) 85 I.D. 188

43 CFR 4125.1-1(m)(3) provides that a grazing lease may be canceled for failure to make timely payment of grazing fees pursuant to 43 CFR 4125.1-1(h). The fact that cash was not available at the time payment was due; that executor of appellant estate relied upon his wife who failed to make timely payment; and that the wife was notified of a death in the family after the due date, does not justify the failure to pay the fee by the required date.

Reese Hennagan Estate, 36 IBLA 399 (Sept. 5, 1978)

FISH AND WILDLIFE SERVICE

The issuance of sodium prospecting permits is discretionary with the Secretary of the Interior, and the Secretary may refuse to issue permits for lands withdrawn for wildlife purposes if the use of the lands

FISH AND WILDLIFE SERVICE--Continued

for mineral prospecting and development activities would adversely affect the wildlife habitat.

Where the regulations and Departmental and BLM Manuals do not specifically state how disputes between the Fish and Wildlife Service and the Bureau of Land Management over issuing sodium prospecting permits for lands within wildlife refuge areas are to be resolved, but the Departmental manuals indicate that such decisions are to be made by the Secretary and the BLM Manual directs that such applications be forwarded to the Washington Office, a decision of a State Office rejecting an application for a sodium prospecting permit will be set aside and the case remanded for processing in accordance with the Departmental and BLM Manuals.

Vernal E. Bess et al., 27 IBLA 4 (Sept. 17, 1976)

FREEDOM OF INFORMATION ACT (Act of June 5, 1967)

Denial of request for USGS's estimates of present value of royalties and taxes based on proprietary and confidential information furnished by sources outside Government is legally supportable under exemptions (4) and (9) of Freedom of Information Act (FOIA) since release would be the same as releasing the proprietary and confidential information from which estimates were derived as well as the geological and geophysical data. Further, exemption (5) of FOIA may be used as a basis for protecting presale estimates of value for a tract on which no bids are received since this is part of Departmental's deliberative process of decisionmaking.

Freedom of Information Act, Appeal of Tenneco, M-36918
(Jan. 30, 1979) 86 I.D. 661

GEOLOGICAL SURVEY

There is no authority for a State Director, Bureau of Land Management, to make a determination of a known geothermal resources area. Instead, the authority has been delegated by the Secretary of the Interior to the Director, Geological Survey. KGRA determinations must be based upon the evidentiary factors stated in sec. 2(e) of the Geothermal Steam Act of 1970.

Hydrothermal Energy and Minerals, Inc., 18 IBLA 393
(Feb. 7, 1975) 82 I.D. 60

Hydrothermal Energy and Minerals, Inc., 19 IBLA 136
(Mar. 6, 1975)

Delta Funds, Inc., 19 IBLA 185 (Mar. 18, 1975)

An Oil and Gas Supervisor of the Geological Survey has authority to demand prejudgment interest based upon the failure of an oil and gas lessee to pay timely royalties owed to the Government, despite the fact that the Supervisor is an employee of the Executive Branch.

Where an oil and gas lessee appeals from a decision of an Oil and Gas Supervisor's determination that additional royalties are due to the Government, and simultaneously files a request for suspension of the ruling, which is granted by the Geological Survey "until further notice," prejudgment interest continues to accrue during the period of the suspension. This conclusion is premised on the doctrine that interest is compensation for delay in payment.

A demand by the Geological Survey for prejudgment interest for delayed payment of additional royalties owed to the Government is not necessarily unenforceable in

GEOLOGICAL SURVEY--Continued

the courts because it was not asserted as a counterclaim under Rule 13(a) of the Federal Rules of Civil Procedure.

Atlantic Richfield Co., 21 IBLA 98 (June 30, 1975)
82 I.D. 316

The Bureau of Land Management has no authority to make a determination of a known geothermal resources area; such authority rests with the Geological Survey.

Robert C. Harper, 24 IBLA 44 (Feb. 23, 1976)

Applications for phosphate prospecting permits are properly rejected by the Bureau of Land Management upon the basis of a determination by the Geological Survey that the lands applied for contain workable deposits of phosphate thus making the lands subject to the leasing provisions rather than the prospecting provisions of the Mineral Leasing Act. A review of the technical data relied upon by the Geological Survey in making its determination is not required where no evidence is submitted on appeal demonstrating error in that determination.

William E. Martin, 24 IBLA 271 (Mar. 30, 1976)

A determination by the United States Geological Survey that certain lands under a public sale application are valuable for various leasable minerals will not be disturbed in the absence of a clear showing by the applicant that such determination was improperly made.

The Kemmerer Coal Co., 26 IBLA 127 (July 30, 1976)

Where the Bureau of Land Management rejects a public sale application based on a determination by Geological Survey that certain lands encompassed by a public sale application contain workable coal deposits and Geological Survey's conclusion that the exercise of surface rights will unreasonably interfere with operations under the mineral leasing law, the case will be remanded for further consideration when the bare conclusion of the Geological Survey is unsupported by any facts and where there is a lack of evidence in the record to support such conclusion.

Edward H. Swartz, 27 IBLA 308 (Oct. 29, 1976)

Authority to make determinations of known geothermal resources area has been delegated to the Geological Survey by the Secretary of the Interior. Where such determination is based upon any or all of the evidentiary factors stated 30 U.S.C. § 1001(e) (1970) and appellant does not show that the determination is in error, the determination will stand.

Earth Power Corp., 29 IBLA 37 (Feb. 16, 1977)

Authority to make determinations of known geothermal resource areas has been delegated to the Geological Survey by the Secretary of the Interior. Where such determination is based upon the evidentiary factors set forth in 30 U.S.C. § 1001(e) (1970), and on appeal appellant fails to establish any error in a Geological Survey determination of a known geothermal resources area, the determination will stand.

The Geological Survey, as the delegate of the Secretary, has a continuous obligation to review the evidentiary factors set forth in 30 U.S.C. § 1001(e) (1970), to determine whether an area should be designated as a known geothermal resources area. Such an obligation necessarily envisions the review of

GEOLOGICAL SURVEY--Continued

factors which individually may or may not afford a sufficient basis for the designation, but which taken collectively clearly establish a sufficient predicate for determination of a known geothermal resources area.

Nancy J. Moffitt et al., 30 IBLA 107 (May 2, 1977)

A determination of an Area Oil and Gas Supervisor, Geological Survey, that a subsequent joinder could not effectuate commitment of an oil and gas lease to a unit agreement prior to expiration of the lease is properly set aside by the Director, Geological Survey, as not being within the authority of the Area Oil and Gas Supervisor to determine.

Bruce Anderson, 30 IBLA 179 (May 19, 1977)

A known geothermal resources area determination must be based upon one or more of the evidentiary factors set forth in 30 U.S.C. § 1001(e) (1970), and where the Geological Survey, as the delegate of the Secretary, makes such a determination based on all available data, regardless of whether such data were previously known, the determination will stand, absent a showing of error by one questioning the designation.

Nancy J. Moffitt et al. (On Reconsideration), 31 IBLA 191 (July 5, 1977)

Estoppel will not be applied against the Government when the sole basis for so doing is a statement by an applicant for a prospecting permit that a Geological Survey employee indicated that he could file the application in his own name, since this statement was not necessarily a misrepresentation, and since in any event the applicant had no right to rely on this statement because the Geological Survey is not the agency authorized to make representations as to the proper filing of prospecting applications.

Willadean Patton, Essex Minerals, Inc., National Bulk Carriers, Inc., 32 IBLA 350 (Oct. 21, 1977)

A mining plan submitted to the U.S. Geological Survey is properly classified a "new operation" as defined by 30 CFR 211.1(d)(1)(iii) where as of the date of its submission to the Department, the Department has not completed its environmental impact analysis involving the area in which the mining plan is located, nor has it, as of that date, commenced and expended substantial resources in the preparation or completion of that analysis.

Routt County Development, Ltd., 33 IBLA 130 (Dec. 19, 1977)

The Geological Survey is the Secretary's technical expert in matters concerning coal permits and leases and the Secretary is entitled to rely on its reasoned analysis.

Where a request to modify a coal lease by adding acreage to it is rejected by the BLM solely on the basis of conclusory statement of the Geological Survey that the area applied for is capable of being developed as part of an independent operation and the factual basis for that conclusion does not appear in the record, the decision will be set aside and the case remanded for the compilation of a more complete record and readjudication of the request.

Intermountain Exploration Co., 35 IBLA 15 (May 4, 1978)

GEOLOGICAL SURVEY--Continued

A determination by the United States Geological Survey that certain lands in an application for sale under the Unintentional Trespass Act, 43 U.S.C. §§ 1431-1435 (1970), are underlain with coal, and that sale of the surface rights would interfere with the operation of the Mineral Leasing Act of 1920, will not be disturbed in the absence of a clear showing by the applicant that the determination was improperly made.

Bace Cox, 38 IBLA 340 (Dec. 20, 1978)

It is not proper to deny a creditable request for approval of unavoidable delay time under sec. 16 of the Santa Ynez Unit Agreement, even though the Geological Survey considers the unit agreement extended by diligent drilling operations.

Exxon Co., U.S.A., 41 IBLA 118 (June 13, 1979)

The U.S. Geological Survey is the technical expert of the Department in matters concerning geologic evaluation of oil and gas lease production, and the Secretary is entitled to rely on the Survey's determinations, as to the extent of the participating area of a unit, absent a clear showing of error.

Amoco Production Co., 41 IBLA 348 (July 11, 1979)

Generally the Geological Survey may reconsider and modify or revoke its own decision in the absence of an appeal to the Board of Land Appeals. However, the filing of an appeal to the Board removes the matter from the jurisdiction of Survey pending disposition of the appeal.

Where Geological Survey and one of two parties to a compulsory unitization of two outer continental shelf oil and gas leases request a remand of a Survey decision for further consideration, and certain issues raised on appeal would appropriately be better first considered by Survey, the case will be remanded to Survey. In the circumstances, a request to stay implementation of Survey's prior decision may be granted by the Board unless and until Survey acts upon the request when it reconsiders the case.

Sun Oil Co., 42 IBLA 254 (Aug. 23, 1979)

Where the U.S. Geological Survey has determined from available geologic and other data that a participating area of 1,000 acres is the proper size for a producing well under an approved unit agreement, this Board may rely upon reports of the Survey setting forth the conclusions reached without examining the technical data upon which the reports were based.

A determination by the U.S. Geological Survey that certain land is within the participating area of a producing oil or gas well established pursuant to an approved unit agreement will not be set aside where it is not arbitrary or capricious and is supported by competent evidence, and the appellant has not demonstrated by a clear and definite showing that the determination was in error.

Margaret E. Obie et al., 43 IBLA 326 (Oct. 29, 1979)

GEOTHERMAL LEASES

GENERALLY

A noncompetitive geothermal lease application must include all available lands within a surveyed or protracted section. If it describes less, the application is properly rejected as to such section.

Austral Oil Co., Inc., 21 IBLA 243 (Aug. 11, 1975)

Land may properly be declared to be in a known geothermal resources area only upon a finding by the Geological Survey of sufficient competitive interest, where such interest, in the opinion of the Geological Survey, would engender a belief in men who are experienced in the subject matter that the prospects for extraction of geothermal steam or associated resources are good enough to warrant expenditures for that purpose.

Robert C. Harper, 24 IBLA 44 (Feb. 23, 1976)

Where the reason given for the partial rejection of a noncompetitive geothermal lease application is that the Environmental Analysis Record has recommended against leasing the lands because they lie within an area associated with historic trails, and the records indicate that the State Office has approved leasing similar areas subject to protective stipulations, the decision will be set aside and the case remanded for further consideration to determine whether the lands should be leased with protective stipulations.

Richard C. Hoefle, 24 IBLA 181 (Mar. 16, 1976)

Kirk Greene, 24 IBLA 262 (Mar. 29, 1976)

It is proper to afford a geothermal lease applicant the benefit of a regulation, adopted after the filing of his application, absent the impairment of third party rights and adverse impact on the interests of the United States. Where a geothermal lease regulation requires the filing of a compliance bond as a condition precedent to issuance of a lease, and that regulation is amended during the pendency of an application to require such a bond only as a condition precedent to entry on the leased lands, the holder of the application may be granted a lease under the amended requirement, if all else be regular.

Christopher A. Marks, 26 IBLA 84 (July 19, 1976)

Where an issue which gives rise to an appeal is mooted during the pendency of the appeal, the appeal will not be dismissed where the priority of the application is dependent upon the correctness of the original decision.

Where an oil and gas lease offeror files a partial withdrawal of lands described in her application during the pendency of an appeal from a decision rejecting her offer in its entirety, the withdrawal is effective *ex instanti* when filed, and may not be ignored simply on the basis that it was permissible to have included those lands in the application.

Caroline L. Hunt, 26 IBLA 218 (Aug. 17 1976)

The U.S. Geological Survey is the Secretary's technical expert in matters concerning geologic evaluation of tracts of land offered at a sale of competitive geothermal steam leases and the Secretary is entitled to rely on its reasoned analysis.

Getty Oil Co., 27 IBLA 269 (Oct. 26, 1976)

GEOTHERMAL LEASES--Continued

GENERALLY--Continued

A decision rejecting a geothermal application in part may be set aside and the case remanded where the appellant requests an opportunity to consult with the Bureau of Reclamation which objected to issuance of the lease, and the decision itself notes that Bureau's objection as the basis for the decision, but there is no explanation of why the leasing proposal would interfere with some other Federal function or would be contrary to the public interest pursuant to 43 CFR 3201.1-2.

Thermal Resources, Inc., 28 IBLA 361 (Feb. 2, 1977)

This Department may lease national forest lands for geothermal resources only with the consent of the Department of Agriculture. The Bureau of Land Management is bound by the finding of that Department that geothermal leasing for such lands is inimical to the public interest.

William A. Hendrey, 33 IBLA 71 (Dec. 5, 1977)

This Department may lease national forest lands for geothermal resources only with the consent of the Department of Agriculture. The Bureau of Land Management is bound by the requirement of that Department that the particular national forest lands so leased be subject to nonsurface occupancy stipulations.

Alaska Pacific Lumber Co., 36 IBLA 68 (July 12, 1978)

Decisions by BLM to refrain from leasing certain lands for geothermal resources will be set aside and the cases remanded where a lease applicant shows on appeal that such decisions failed to take into account relevant considerations of public interest.

California Geothermal, Inc., 37 IBLA 172 (Oct. 10, 1978)

Secretary of Interior has authority under Geothermal Steam Act, 30 U.S.C. §§ 1002-03 (1976), and implementing regulations, 43 CFR 3220.6(c), to reject bids submitted at competitive geothermal lease sales when such bids are deemed to be inadequate in dollar amount.

Union Oil Co., 38 IBLA 373 (Dec. 29, 1978)

A stipulation requiring an offeror under a geothermal resources lease to provide a certified statement by a qualified archaeologist concerning the existence of archaeological values on lands to be disturbed by the lessee and to accept reasonable conditions of use for the protection of such areas and which requires the lessee to bear the cost of salvaging objects of antiquity is reasonable and will be upheld.

Western Oil Shale Corp., 41 IBLA 105 (June 11, 1979)

It is proper to reject an application for a geothermal resources lease where equitable title to the resource in issue is doubtful.

Dennis Potts, 42 IBLA 355 (Sept. 11, 1979)

GEOTHERMAL LEASES--Continued

ACREAGE LIMITATIONS

A noncompetitive geothermal lease application must include all available lands within a surveyed or protracted section. If it describes less, the application is properly rejected as to such section.

Robert G. Lynn, 19 IBLA 167 (Mar. 17, 1975)

Where an application for a noncompetitive geothermal steam lease includes 2,598.98 acres of land, thereby exceeding the 2,560 acre limitation by 38.98 acres and the applicant, under 43 CFR 3210.2-1(c) is required to include all available lands within a section, the rule of approximation operates to allow the excess when the excess is smaller than the amount by which the area would be less than 2,560 acres if the irregular subdivision, in this case a section, were excluded.

Caroline L. Hunt, 26 IBLA 218 (Aug. 17, 1976)

The special rule of approximation for geothermal lease offers is applied by subtracting from the total acreage of the offer the acreage of the irregular subdivision which caused the excess acreage. Where a geothermal lease offer describes four complete sections and the area embraced in the application exceeds the acreage limit because one or more of the sections is irregular, the offer may be considered if deletion of the irregular section (or one of them if there is more than one) would cause an acreage deficiency (acreage limit less acreage described in the offer) greater than the excess acreage resulting from inclusion of the section.

Nelson B. Hunt, 27 IBLA 365 (Nov. 4, 1976)

APPLICATIONS

Generally

An application for a lease of geothermal resources within a riverbed not under jurisdiction of the United States is properly rejected.

Milan S. Papulak, 19 IBLA 139 (Mar. 7, 1975)

An application for a noncompetitive lease of geothermal resources in the name of a corporation is properly rejected where it is not accompanied by a statement as to corporate qualifications, or a reference by serial number to a record in which such statement previously had been filed.

E & B Investments, Inc., 19 IBLA 141 (Mar. 7, 1975)

A noncompetitive geothermal lease application must include all available lands within a surveyed or protracted section. If it describes less, the application is properly rejected as to such section.

Lands within a known geothermal resources area (KGRA) are not available for noncompetitive leasing. Where lands included in a geothermal lease application are determined to be within a KGRA, and such determination is made after the filing of the application but before the issuance of a lease, or amendment thereto, pursuant to such application, the application must be rejected as to such lands.

Robert G. Lynn, 19 IBLA 167 (Mar. 17, 1975)

GEOTHERMAL LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

Where the applicant for a noncompetitive lease of geothermal resources is not the sole party in interest and the application is not accompanied by separate statements signed by each of the interested parties, setting forth the nature of the agreement between them and their qualifications to hold such interests in geothermal resources leases, the application must be rejected.

California Geothermal, Inc., 19 IBLA 268 (Apr. 7, 1975)

An application for a noncompetitive geothermal lease must be rejected with respect to land described in the application which, although not within a known geothermal resources area (KGRA) at the time the application is filed, is designated as being within a KGRA before a lease is issued for said land.

Baumgartner Cos., 21 IBLA 133 (July 14, 1975)

A noncompetitive geothermal lease application must include all available lands within a surveyed or protracted section. If it describes less, the application is properly rejected as to such section.

Austral Oil Co., Inc., 21 IBLA 243 (Aug. 11, 1975)

A noncompetitive geothermal resources lease application must include all available land within a surveyed or protracted section. If it fails to include a metes and bounds description of a nonnavigable riverbed within the section, the application is properly rejected as to the whole of the section.

Charles J. Heringer, 21 IBLA 254 (Aug. 11, 1975)

Where a noncompetitive geothermal resources lease application indicates that the applicant is not the sole party in interest and is not accompanied by the information required by 43 CFR 3202.2-5 with respect to the nature of the agreement between the parties in interest and their qualifications, the offer must be rejected even if the applicant is, in fact, contrary to the information disclosed on the lease application, the sole party in interest, where such fact is unknown to the BLM.

An application for a noncompetitive lease of geothermal resources in the name of a corporation is properly rejected where it is not accompanied by a statement as to corporate qualifications or a reference by serial number to a record in which such statement previously had been filed.

Central Nevada Corp., 21 IBLA 308 (Aug. 14, 1975)

Until a final authoritative judicial determination is made of the title to geothermal resources in lands patented with a reservation of all minerals to the United States, a geothermal lease application which omits such patented lands from a section will not be considered in compliance with 43 CFR 3210.2-1(c) requiring all available lands in a section to be described in the lease application. However, the application may be suspended as to that section, rather than rejected, until the title question is resolved.

Energy Partners, Edward B. Towne, 21 IBLA 352 (Aug. 25, 1975)

GEOTHERMAL LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

When the Bureau of Land Management rejects geothermal lease offers on the mistaken basis that the lands embraced within the offers are situated within a particular critical natural area excluded from leasing, but in fact the lease offers are for lands not within that critical natural area but may be in another, the cases must be remanded for further consideration because the decisions fail to disclose a proper basis for rejection of the lease offers.

Kirk Greene, 24 IBLA 113 (Mar. 1, 1976)

When the Bureau of Land Management rejects geothermal lease offers on the basis that the lands embraced within the offers are situated within a critical natural area excluded from leasing, but the record indicates the basis for rejection may be that the lands applied for are associated with historic trails where leasing activity has been approved subject to protective stipulations, the decisions will be set aside and the cases remanded for further clarification and consideration by the Bureau to determine whether the lands should be leased subject to protective stipulations.

Christian F. Murer, 24 IBLA 383 (Apr. 29, 1976)

Where an issue which gives rise to an appeal is mooted during the pendency of the appeal, the appeal will not be dismissed where the priority of the application is dependent upon the correctness of the original decision.

Where an application for a noncompetitive geothermal steam lease includes 2,598.98 acres of land, thereby exceeding the 2,560 acre limitation by 38.98 acres and the applicant, under 43 CFR 3210.2-1(c) is required to include all available lands within a section, the rule of approximation operates to allow the excess when the excess is smaller than the amount by which the area would be less than 2,560 acres if the irregular subdivision, in this case a section, were excluded.

Where an oil and gas lease offeror files a partial withdrawal of lands described in her application during the pendency of an appeal from a decision rejecting her offer in its entirety, the withdrawal is effective *eo instanti* when filed, and may not be ignored simply on the basis that it was permissible to have included those lands in the application.

Caroline L. Hunt, 26 IBLA 218 (Aug. 17, 1976)

A decision by the Bureau of Land Management to refrain from leasing certain lands for geothermal resources will be upheld when the record shows the decision to be a reasoned analysis of the factors involved based upon considerations of public interest, and no sufficient reason to disturb the decision is shown.

When the reason given for the rejection of noncompetitive geothermal lease applications is that the lands lie within an area associated with historic trails, and the records indicate that the Bureau of Land Management has approved leasing similar areas subject to protective stipulations, the decision will be set aside and the case remanded for further consideration to determine whether these lands should be leased with protective stipulations.

When the reason given by the Bureau of Land Management for the rejection of noncompetitive geothermal lease applications is that the lands lie within a critical natural area, but the Environmental Analysis Record recommendations to exclude lands from leasing have not been uniformly followed and the Record itself describes various protective measures which would mitigate adverse environmental impact, the decisions will be remanded to determine whether these lands should be leased with protective stipulations.

When the Bureau of Land Management rejects geothermal lease applications on the mistaken basis that the lands are situated within a particular critical natural area excluded from leasing, the cases must be remanded for further consideration because the decisions fail to disclose a proper basis for rejection.

Southern Union Production Co., 27 IBLA 54 (Sept. 23, 1976)

Where a noncompetitive geothermal lease application describes all the lands in a certain section by legal subdivisions and the section contains an available unsurveyed lake bed, the lease offer will be rejected as to such section because of the applicant's failure to describe the unsurveyed lake bed by metes and bounds as required by 43 CFR 3203.4(b).

Lamar Hunt, 27 IBLA 397 (Nov. 5, 1976)

Where an application for a geothermal resource lease is filed for all the land available within a surveyed or protracted section, as required by regulation, but the application is then reduced to less than all such land by voluntary withdrawal, the offer is properly rejected.

Chevron Oil Co., 28 IBLA 386 (Feb. 4, 1977)

A geothermal lease application is properly rejected to the extent that it includes land which has been reconveyed to the United States but which has only been opened to applications under the nonmineral public land laws.

Chevron Oil Co., 32 IBLA 275 (Sept. 27, 1977)

This Department may lease national forest lands for geothermal resources only with the consent of the Department of Agriculture. The Bureau of Land Management is bound by the finding of that Department that geothermal leasing for such lands is inimical to the public interest.

William A. Hendrey, 33 IBLA 71 (Dec. 5, 1977)

Where lands in issue formerly were included in a now terminated geothermal lease, and no *Federal Register* listing of units for re-leasing had been made as of time appellant filed her noncompetitive geothermal lease application, BLM properly rejected her offer in accordance with 43 CFR 3211.1. Appellant's argument that reasonable time for such listing had passed from termination of former lease to filing of appellant's offer does not state an exception to requirements of 43 CFR 3211.1.

Laura J. Spangler, 35 IBLA 29 (May 5, 1978)

GEOTHERMAL LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

This Department may lease national forest lands for geothermal resources only with the consent of the Department of Agriculture. The Bureau of Land Management is bound by the requirement of that Department that the particular national forest lands so leased be subject to nonsurface occupancy stipulations.

Alaska Pacific Lumber Co., 36 IBLA 88 (July 12, 1978)

A geothermal lease offer filed for lands which are withdrawn for the Department of Defense from all forms of appropriation under the public land laws, including the mining and mineral leasing laws, is properly rejected. Where an offer to lease lands for geothermal resources cannot be accepted because the lands are withdrawn and not available for leasing, the offer will be rejected and may not be held in suspense until the land may become available for such leasing.

Sulphur River Exploration, Inc., 36 IBLA 307 (Aug. 21, 1978)

A decision rejecting an application for a geothermal resources lease because the United States does not own the mineral resource will be set aside and the case remanded when the land status records reflect ostensible legal title in the Federal Government.

Dennis Potts, 36 IBLA 329 (Aug. 28, 1978)

A decision by BLM to refrain from leasing certain lands for geothermal resources will be upheld when the record shows the decision to be a reasoned analysis of the factors involved based upon considerations of public interest, and no sufficient reason to disturb the decision is shown.

When the reason given for the rejection of noncompetitive geothermal lease applications is that the lands possess a high visual quality, and neither the EAR nor the remaining documents of record clearly bear out such a determination and where it appears that BLM has issued leases on adjacent lands, the decisions rejecting the leases will be set aside and the cases remanded for further consideration to determine whether the lands should be leased with protective stipulations.

California Geothermal, Inc., 37 IBLA 172 (Oct. 10, 1978)

An application for lease of geothermal resources within a wildlife refuge is properly rejected because leasing of such areas is specifically prohibited by the Geothermal Resources Act and 43 CFR 3201.1-6.

Antoinette Carter, 37 IBLA 222 (Oct. 12, 1978)

It is proper to reject an application for a geothermal resources lease where equitable title to the resource in issue is doubtful.

Dennis Potts, 42 IBLA 355 (Sept. 11, 1979)

GEOTHERMAL LEASES--Continued

APPLICATIONS--Continued

Amendments

A noncompetitive geothermal lease application which fails to include all available lands within a surveyed or protracted section, as required by regulation, 43 CFR 3210.2-1(c), is properly rejected as to such section. An amendment of the land description in a noncompetitive geothermal lease application received after the close of the monthly filing period in which the initial offer was filed will not be allowed.

Edward B. Towne, 21 IBLA 304 (Aug. 14, 1975)

A noncompetitive geothermal lease application which fails to include all available lands within a surveyed or protracted section, as required by regulation, 43 CFR 3210.2-1(c), is properly rejected as to such section. An amendment of the land description in such an application received after the close of the monthly filing period in which the initial application was filed will not be allowed.

Energy Partners, Edward B. Towne, 21 IBLA 352 (Aug. 25, 1975)

Description

A noncompetitive geothermal lease application which fails to include all available lands within a surveyed or protracted section, as required by regulation 43 CFR 3210.2-1(c), is properly rejected as to such section. An amendment of the land description in a noncompetitive geothermal lease application received after the close of the monthly filing period in which the initial offer was filed will not be allowed.

Edward B. Towne, 21 IBLA 304 (Aug. 14, 1975)

A noncompetitive geothermal lease application which fails to include all available lands within a surveyed or protracted section, as required by regulation 43 CFR 3210.2-1(c), is properly rejected as to such section. An amendment of the land description in such an application received after the close of the monthly filing period in which the initial application was filed will not be allowed.

Energy Partners, Edward B. Towne, 21 IBLA 352 (Aug. 25, 1975)

ASSIGNMENTS OR TRANSFERS

A geothermal lease which has automatically terminated by operation of law for failure to submit the annual rental timely may be reinstated only where the lessee shows that the late payment of the rental was either justified or not due to a lack of reasonable diligence. The fact that an assignment application is pending does not justify a late payment of the rental either by the lessee or by the prospective assignee.

Supron Energy Corp., 40 IBLA 68 (Mar. 16, 1979)

BONDS

It is proper to afford a geothermal lease applicant the benefit of a regulation, adopted after the filing of his application, absent the impairment of third party rights and adverse impact on the interests of the United States. Where a geothermal lease regulation requires the filing of a compliance bond as a condition precedent to issuance of a lease, and that regulation is amended during the pendency of an application to

GEOTHERMAL LEASES--Continued

BONDS--Continued

require such a bond only as a condition precedent to entry on the leased lands, the holder of the application may be granted a lease under the amended requirement, if all else be regular.

Christopher A. Marks, 26 IBLA 84 (July 19, 1976)

A regulation which provides that coverage of nationwide oil and gas bond in force at the effective date of the regulation may be expanded by a rider to include geothermal resources leases does not permit a replacement nationwide oil and gas bond executed after the effective date of the regulation to be so modified to include geothermal resources operations.

Mono Power Co., 37 IBLA 100 (Sept. 28, 1978)

COMPETITIVE LEASES

Sec. 4 of Geothermal Steam Act of 1970 authorizes competitive bidding as sole basis for issuance of geothermal leases for lands determined to be within a KGRA.

Sec. 4 of Geothermal Steam Act of 1970 directs competitive bidding for geothermal leases on lands which are determined to be within a KGRA before the issuance of a lease on such lands, even though the KGRA determination is made after the pertinent application is filed.

Competitive bidding requirements of first sentence of sec. 4 of Geothermal Steam Act of 1970 apply to those applications filed during Jan. 1974 filing period, and State Office rejections of appellant's Jan. 1974 noncompetitive lease applications are proper under 43 CFR 3210.4.

Hydrothermal Energy and Minerals, Inc., 18 IBLA 393 (Feb. 7, 1975) 82 I.D. 60

Sec. 4 of Geothermal Steam Act of 1970 directs competitive bidding for geothermal leases on lands which are determined to be within a KGRA before the issuance of a lease on such lands, even though the KGRA determination is made after the pertinent application is filed.

Competitive bidding requirements of first sentence of sec. 4 of Geothermal Steam Act of 1970 apply to those applications filed during Jan. 1974 filing period, and State Office rejections of appellant's Jan. 1974 noncompetitive lease applications are proper under 43 CFR 3210.4.

Hydrothermal Energy and Minerals, Inc., 19 IBLA 136 (Mar. 6, 1975)

Sec. 4 of the Geothermal Steam Act of 1970 authorizes competitive bidding as the sole basis for issuance of geothermal resources leases for lands determined to be within a KGRA.

Charles J. Heringer, 21 IBLA 254 (Aug. 11, 1975)

Sec. 4 of the Geothermal Steam Act of 1970 authorizes competitive bidding as the sole basis for issuance of geothermal resources leases for lands determined to be within a known geothermal resources area, whether the KGRA determination is made before or after a noncompetitive application is filed.

Anadarko Production Co., 24 IBLA 132 (Mar. 4, 1976)

Caroline L. Hunt, 26 IBLA 178 (Aug. 9, 1976)

GEOTHERMAL LEASES--Continued

COMPETITIVE LEASES--Continued

Sec. 4 of the Geothermal Steam Act of 1970 directs competitive bidding for geothermal leases on lands within a known geothermal resource area under regulations formulated by the Secretary of the Interior. Where the Department has promulgated regulations pursuant to this section which provides the Secretary's authorized officer with the reserved right to reject any and all bids submitted for a competitive geothermal lease sale, and that reserved right is publicized in the sale notice, the Government is not obligated to accept any bid which might be considered inadequate.

The U.S. Geological Survey is the Secretary's technical expert in matters concerning geologic evaluation of tracts of land offered at a sale of competitive geothermal steam leases and the Secretary is entitled to rely on its reasoned analysis.

Getty Oil Co., 27 IBLA 269 (Oct. 26, 1976)

30 U.S.C. § 1003 (1970) authorizes competitive bidding as the sole basis for issuance of geothermal resources leases for lands determined to be within a known geothermal resources area, whether the KGRA determination is made before or after a noncompetitive application is filed.

Earth Power Corp., 29 IBLA 37 (Feb. 16, 1977)

Secretary of Interior has authority under Geothermal Steam Act, 30 U.S.C. §§ 1002-03 (1976), and implementing regulations, 43 CFR 3220.6(c), to reject bids submitted at competitive geothermal lease sales when such bids are deemed to be inadequate in dollar amount.

On appeal from a determination of United States Geological Survey under 30 U.S.C. §§ 1002-03 (1976), rejecting offeror's competitive geothermal lease bid as too low, offeror has the burden of showing that the rejection is arbitrary and capricious and that Survey has no rational basis for rejection of the bid.

While the Department has discretion as to whether to grant a hearing to an offeror whose high bid is rejected for a competitive geothermal lease, a hearing is not in the public interest where offeror has not explained a procedure in which particular facts could be effectively utilized in an alternative formula for computing minimum bids.

Union Oil Co., 38 IBLA 373 (Dec. 29, 1978)

CONSENT OF AGENCY

The directives of 30 U.S.C. § 1014(b) (1970) and 43 CFR 3201.1-3 are mandatory, and unless the Forest Service gives its consent to the geothermal leasing of the national forest lands in dispute, the Department of the Interior may not issue leases on those lands.

Earth Power Corp. et al., 32 IBLA 357 (Oct. 21, 1977)

DESCRIPTION OF LAND

A noncompetitive geothermal lease application which fails to include all available lands within a surveyed or protracted section, as required by regulation, 43 CFR 3210.2-1(c), is properly rejected as to such section. An amendment of the land description in a noncompetitive geothermal lease application received after the close of the monthly filing period in which the initial offer was filed will not be allowed.

Edward B. Towne, 21 IBLA 304 (Aug. 14, 1975)

GEOTHERMAL LEASES--Continued

DISCRETION TO LEASE

Where the reason given for the partial rejection of a noncompetitive geothermal lease application is that the Environmental Analysis Record has recommended against leasing the lands because they lie within an area associated with historic trails, and the records indicate that the State Office has approved leasing similar areas subject to protective stipulations, the decision will be set aside and the case remanded for further consideration to determine whether the lands should be leased with protective stipulations.

Richard C. Hoefle, 24 IBLA 181 (Mar. 16, 1976)

Kirk Greene, 24 IBLA 262 (Mar. 29, 1976)

An exercise of the Secretary's discretion to refrain from issuing a geothermal lease for a given tract of land is neither arbitrary nor capricious where the decision is arrived at after detailed study of environmental factors and is based upon considerations of public interest. In such a situation, the Board will not ordinarily substitute its independent judgment for that of the technical experts employed by the Department to make recommendations within their field of expertise.

Eason Oil Co., Robert G. Lynn, 24 IBLA 221 (Mar. 24, 1976)

A decision by the Bureau of Land Management to refrain from leasing certain lands for geothermal resources will be upheld when the record shows the decision to be a reasoned analysis of the factors involved based upon considerations of public interest, and no sufficient reason to disturb the decision is shown.

When the reason given for the rejection of noncompetitive geothermal lease applications is that the lands lie within an area associated with historic trails, and the records indicate that the Bureau of Land Management has approved leasing similar areas subject to protective stipulations, the decision will be set aside and the case remanded for further consideration to determine whether these lands should be leased with protective stipulations.

When the reason given by the Bureau of Land Management for the rejection of noncompetitive geothermal lease applications is that the lands lie within a critical natural area, but the Environmental Analysis Record recommendations to exclude lands from leasing have not been uniformly followed and the Record itself describes various protective measures which would mitigate adverse environmental impact, the decisions will be remanded to determine whether these lands should be leased with protective stipulations.

When the Bureau of Land Management rejects geothermal lease applications on the mistaken basis that the lands are situated within a particular critical natural area excluded from leasing, the cases must be remanded for further consideration because the decisions fail to disclose a proper basis for rejection.

Southern Union Production Co., 27 IBLA 54 (Sept. 23, 1976)

Issuance of a lease for geothermal resources is within the discretion of the Secretary of the Interior. Thus, the filing of an offer for a noncompetitive lease for geothermal steam resources creates no vested rights in the offeror and the offer must be rejected if the lands are found to be within a known geothermal resources area at any time prior to the issuance of a lease.

Earth Power Corp., 29 IBLA 37 (Feb. 16, 1977)

This Department may lease national forest lands for geothermal resources only with the consent of the Department of Agriculture. The Bureau of Land Management is bound by the finding of that Department that geothermal leasing for such lands is inimical to the public interest.

William A. Hendrey, 33 IBLA 71 (Dec. 5, 1977)

An exercise of the Secretary's discretion to refrain from issuing a geothermal lease for a given tract of land will generally be upheld where the decision is arrived at after detailed study of environmental factors and is based upon considerations of public interest. In such a situation, the Board will not ordinarily substitute its independent judgment for that of the technical experts employed by the Department to make recommendations within their field of expertise.

Cortez, Inc., 34 IBLA 239 (Mar. 28, 1978)

An exercise of the Secretary's discretion by Bureau of Land Management State Office to refrain from issuing a geothermal lease for a given tract of land will be sustained where the decision is arrived at after detailed study of environmental factors and is based upon considerations of public interest.

The Anschutz Corp., 34 IBLA 270 (Mar. 31, 1978)

Where lands in issue formerly were included in a now terminated geothermal lease, and no *Federal Register* listing of units for re-leasing had been made as of time appellant filed her noncompetitive geothermal lease application, BLM properly rejected her offer in accordance with 43 CFR 3211.1. Appellant's argument that reasonable time for such listing had passed from termination of former lease to filing of appellant's offer does not state an exception to requirements of 43 CFR 3211.1.

Laura J. Spangler, 35 IBLA 29 (May 5, 1978)

The decision whether or not to issue a particular geothermal lease is within the discretion of the Secretary of the Interior. A decision by the Bureau of Land Management that a lease should not be issued for certain lands will be generally upheld when the record shows the decision to be the result of a reasoned analysis of the environmental and public interest factors involved. The burden is on the applicant to show that the land will not be adversely affected as BLM described in rejecting the application.

Oxy Petroleum, Inc., 36 IBLA 59 (June 30, 1978)

This Department may lease national forest lands for geothermal resources only with the consent of the Department of Agriculture. The Bureau of Land Management is bound by the requirement of that Department that the particular national forest lands so leased be subject to nonsurface occupancy stipulations.

Alaska Pacific Lumber Co., 36 IBLA 88 (July 12, 1978)

A decision by BLM to refrain from leasing certain lands for geothermal resources will be upheld when the record shows the decision to be a reasoned analysis of the factors involved based upon considerations of public interest, and no sufficient reason to disturb the decision is shown.

When the reason given for the rejection of noncompetitive geothermal lease applications is that the lands possess a high visual quality, and neither the EAR nor the remaining documents of record clearly bear out such a determination and where it appears that BLM has issued leases on adjacent lands, the decisions rejecting the leases will be set aside and the cases remanded for further consideration to determine whether the lands should be leased with protective stipulations.

California Geothermal, Inc., 37 IBLA 172 (Oct. 10, 1978)

Secretary of Interior has authority under Geothermal Steam Act, 30 U.S.C. §§ 1002-03 (1976), and implementing regulations, 43 CFR 3220.6(c), to reject bids submitted at competitive geothermal lease sales when such bids are deemed to be inadequate in dollar amount.

California Geothermal, Inc., 37 IBLA 172 (Oct. 10, 1978)

FIRST-QUALIFIED APPLICANT

Where a noncompetitive geothermal resources lease application indicates that the applicant is not the sole party in interest and is not accompanied by the information required by 43 CFR 3202.2-5 with respect to the nature of the agreement between the parties in interest and their qualifications, the offer must be rejected even if the applicant is, in fact, contrary to the information disclosed on the lease application, the sole party in interest, where such fact is unknown to the BLM.

An application for a noncompetitive lease of geothermal resources in the name of a corporation is properly rejected where it is not accompanied by a statement as to corporate qualifications or a reference by serial number to a record in which such statement previously had been filed.

Central Nevada Corp., 21 IBLA 308 (Aug. 14, 1975)

HEARINGS

While the Department has discretion as to whether to grant a hearing to an offeror whose high bid is rejected for a competitive geothermal lease, a hearing is not in the public interest where offeror has not explained a procedure in which particular facts could be effectively utilized in an alternative formula for computing minimum bids.

Union Oil Co., 38 IBLA 373 (Dec. 29, 1978)

KNOWN GEOTHERMAL RESOURCES AREA

There is no authority for a State Director, Bureau of Land Management to make a determination of a known geothermal resources area. Instead, that authority has been delegated by the Secretary of the Interior to the Director, Geological Survey. KGRA determinations must be based upon the evidentiary factors stated in sec. 2(e) of the Geothermal Steam Act of 1970.

Sec. 4 of Geothermal Steam Act of 1970 authorizes competitive bidding as sole basis for issuance of geothermal leases for lands determined to be within a KGRA.

Sec. 4 of Geothermal Steam Act of 1970 directs competitive bidding for geothermal leases on lands which are determined to be within a KGRA before the issuance of a lease on such lands, even though the KGRA determination is made after the pertinent application is filed.

Competitive bidding requirements of first sentence of sec. 4 of Geothermal Steam Act of 1970 apply to those applications filed during Jan. 1974 filing period, and

GEOTHERMAL LEASES--Continued

KNOWN GEOTHERMAL RESOURCES AREA--Continued

State Office rejections of appellant's Jan. 1974 noncompetitive lease applications are proper under 43 CFR 3210.4.

Hydrothermal Energy and Minerals, Inc., 18 IBLA 353 (Feb. 7, 1975) 82 I.D. 60

There is no authority for a State Director, Bureau of Land Management, to make a determination of a known geothermal resources area. Instead, the authority has been delegated by the Secretary of the Interior to the Director, Geological Survey. KGRA determinations must be based upon the evidentiary factors stated in sec. 2(e) of the Geothermal Steam Act of 1970.

Sec. 4 of Geothermal Steam Act of 1970 directs competitive bidding for geothermal leases on lands which are determined to be within a KGRA before the issuance of a lease on such lands, even though the KGRA determination is made after the pertinent application is filed.

Competitive bidding requirements of first sentence of sec. 4 of Geothermal Steam Act of 1970 apply to those applications filed during Jan. 1974 filing period, and State Office rejections of appellant's Jan. 1974 noncompetitive lease applications are proper under 43 CFR 3210.4.

Hydrothermal Energy and Minerals, Inc., 19 IBLA 136 (Mar. 6, 1975)

Lands within a known geothermal resources area (KGRA) are not available for noncompetitive leasing. Where lands included in a geothermal lease application are determined to be within a KGRA, and such determination is made after the filing of the application but before the issuance of a lease, or amendment thereto, pursuant to such application, the application must be rejected as to such lands.

Robert G. Lynn, 19 IBLA 167 (Mar. 17, 1975)

There is no authority for a State Director, Bureau of Land Management, to make a determination of a known geothermal resources area. Instead, that authority has been delegated by the Secretary of the Interior to the Director, Geological Survey. KGRA determinations must be based upon the evidentiary factors stated in sec. 2(e) of the Geothermal Steam Act of 1970.

Delta Funds, Inc., 19 IBLA 185 (Mar. 18, 1975)

An application for a noncompetitive geothermal lease must be rejected with respect to land described in the application which, although not within a known geothermal resources area (KGRA) at the time the application is filed, is designated as being within a KGRA before a lease is issued for said land.

Baumgartner Cos., 21 IBLA 133 (July 14, 1975)

There is no authority for a State Director, Bureau of Land Management, to make a determination of a known geothermal resources area. KGRA determinations must be based upon the evidentiary factors stated in sec. 2(e) of the Geothermal Steam Act of 1970.

Sec. 4 of the Geothermal Steam Act of 1970 authorizes competitive bidding as the sole basis for issuance of

GEOTHERMAL LEASES--Continued

KNOWN GEOTHERMAL RESOURCES AREA--Continued

geothermal resources leases for lands determined to be within a KGRA.

Charles J. Heringer, 21 IBLA 254 (Aug. 11, 1975)

The Bureau of Land Management has no authority to make a determination of a known geothermal resources area; such authority rests with the Geological Survey.

Land may properly be declared to be in a known geothermal resources area only upon a finding by the Geological Survey of sufficient competitive interest, where such interest, in the opinion of the Geological Survey, would engender a belief in men who are experienced in the subject matter that the prospects for extraction of geothermal steam or associated resources are good enough to warrant expenditures for that purpose.

It is unnecessary for the Secretary to consult with men experienced in the exploitation of geothermal steam to make a determination of a known geothermal resources area. It is sufficient that he entertain the opinion that any or all of the elements delineated in 30 U.S.C. § 1001(e) (1970), would engender a belief in such men that the prospects for extraction of geothermal steam or associated geothermal resources are good enough to warrant expenditures of money for that purpose.

Robert C. Harper, 24 IBLA 44 (Feb. 23, 1976)

Sec. 4 of the Geothermal Steam Act of 1970 authorizes competitive bidding as the sole basis for issuance of geothermal resources leases for lands determined to be within a known geothermal resources area, whether the KGRA determination is made before or after a noncompetitive application is filed.

Anadarko Production Co., 24 IBLA 132 (Mar. 4, 1976)

Caroline L. Hunt, 26 IBLA 178 (Aug. 9, 1976)

It is unnecessary for the Secretary, or his delegate, to consult with men experienced in the exploitation of geothermal steam to make a determination of a known geothermal resources area. It is sufficient that he entertain the opinion that any or all of the elements delineated in 30 U.S.C. § 1001(e) (1970), would engender a belief in such men that the prospects for extraction of geothermal steam or associated geothermal resources are good enough to warrant expenditures of money for that purpose.

Authority to make determinations of known geothermal resources area has been delegated to the Geological Survey by the Secretary of the Interior. Where such determination is based upon any or all of the evidentiary factors stated 30 U.S.C. § 1001(e) (1970) and appellant does not show that the determination is in error, the determination will stand.

30 U.S.C. § 1003 (1970) authorizes competitive bidding as the sole basis for issuance of geothermal resources leases for lands determined to be within a known geothermal resources area, whether the KGRA determination is made before or after a noncompetitive application is filed.

Issuance of a lease for geothermal resources is within the discretion of the Secretary of the Interior. Thus, the filing of an offer for a noncompetitive lease for geothermal steam resources creates no vested rights in the offeror and the offer must be rejected if the lands are found to be within a known geothermal resources area at any time prior to the issuance of a lease.

Earth Power Corp., 29 IBLA 37 (Feb. 16, 1977)

Authority to make determinations of known geothermal resource areas has been delegated to the Geological Survey by the Secretary of the Interior. Where such determination is based upon the evidentiary factors set forth in 30 U.S.C. § 1001(e) (1970), and on appeal appellant fails to establish any error in a Geological Survey determination of a known geothermal resources area, the determination will stand.

The Geological Survey, as the delegate of the Secretary, has a continuous obligation to review the evidentiary factors set forth in 30 U.S.C. § 1001(e) (1970), to determine whether an area should be designated as a known geothermal resources area. Such an obligation necessarily envisions the review of factors which individually may or may not afford a sufficient basis for the designation, but which taken collectively clearly establish a sufficient predicate for determination of a known geothermal resources area.

Nancy J. Moffitt et al., 30 IBLA 107 (May 2, 1977)

A known geothermal resources area determination must be based upon one or more of the evidentiary factors set forth in 30 U.S.C. § 1001(e) (1970), and where the Geological Survey, as the delegate of the Secretary, makes such a determination based on all available data, regardless of whether such data were previously known, the determination will stand, absent a showing of error by one questioning the designation.

Nancy J. Moffitt et al. (On Reconsideration), 31 IBLA 191 (July 5, 1977)

LANDS SUBJECT TO

An application for a lease of geothermal resources within a riverbed not under jurisdiction of the United States is properly rejected.

Milan S. Parolak, 19 IBLA 139 (Mar. 7, 1975)

A noncompetitive geothermal lease application must include all available lands within a surveyed or protracted section. If it describes less, the application is properly rejected as to such section.

Austral Oil Co., Inc., 21 IBLA 243 (Aug. 11, 1975)

Until a final authoritative judicial determination is made of the title to geothermal resources in lands patented with a reservation of all minerals to the United States, a geothermal lease application which omits such patented lands from a section will not be considered in compliance with 43 CFR 3210.2-1(c) requiring all available lands in a section to be described in the lease application. However, the application may be suspended as to that section, rather than rejected, until the title question is resolved.

Energy Partners, Edward B. Towne, 21 IBLA 352 (Aug. 25, 1975)

GEOTHERMAL LEASES--Continued

LANDS SUBJECT TO--Continued

Where the reason given for the partial rejection of a noncompetitive geothermal lease application is that the Environmental Analysis Record has recommended against leasing the lands because they lie within an area associated with historic trails, and the records indicate that the State Office has approved leasing similar areas subject to protective stipulations, the decision will be set aside and the case remanded for further consideration to determine whether the lands should be leased with protective stipulations.

Richard C. Hoefle, 24 IBLA 181 (Mar. 16, 1976)

Kirk Greene, 24 IBLA 262 (Mar. 29, 1976)

When the Bureau of Land Management rejects geothermal lease offers on the basis that the lands embraced within the offers are situated within a critical natural area excluded from leasing, but the record indicates the basis for rejection may be that the lands applied for are associated with historic trails where leasing activity has been approved subject to protective stipulations, the decisions will be set aside and the cases remanded for further clarification and consideration by the Bureau to determine whether the lands should be leased subject to protective stipulations.

Christian F. Murer, 24 IBLA 383 (Apr. 29, 1976)

A geothermal lease application is properly rejected to the extent that it includes land which has been reconveyed to the United States but which has only been opened to applications under the nonmineral public land laws.

Chevron Oil Co., 32 IBLA 275 (Sept. 27, 1977)

Where lands in issue formerly were included in a now terminated geothermal lease, and no *Federal Register* listing of units for re-leasing had been made as of time appellant filed her noncompetitive geothermal lease application, BLM properly rejected her offer in accordance with 43 CFR 3211.1. Appellant's argument that reasonable time for such listing had passed from termination of former lease to filing of appellant's offer does not state an exception to requirements of 43 CFR 3211.1.

Laura J. Spangler, 35 IBLA 29 (May 5, 1978)

A geothermal lease offer filed for lands which are withdrawn for the Department of Defense from all forms of appropriation under the public land laws, including the mining and mineral leasing laws, is properly rejected. Where an offer to lease lands for geothermal resources cannot be accepted because the lands are withdrawn and not available for leasing, the offer will be rejected and may not be held in suspense until the land may become available for such leasing.

Sulphur River Exploration, Inc., 36 IBLA 307 (Aug. 21, 1978)

An application for lease of geothermal resources within a wildlife refuge is properly rejected because leasing of such areas is specifically prohibited by the Geothermal Resources Act and 43 CFR 3201.1-6.

Antoinette Carter, 37 IBLA 222 (Oct. 12, 1978)

GEOTHERMAL LEASES--Continued

LANDS SUBJECT TO--Continued

It is proper to reject an application for a geothermal resources lease where equitable title to the resource in issue is doubtful.

Dennis Potts, 42 IBLA 355 (Sept. 11, 1979)

NONCOMPETITIVE LEASES

Sec. 4 of Geothermal Steam Act of 1970 authorizes competitive bidding as sole basis for issuance of geothermal leases for lands determined to be within a KGRA. Sec. 4 of Geothermal Steam Act of 1970 directs competitive bidding for geothermal leases on lands which are determined to be within a KGRA before the issuance of a lease on such lands, even though the KGRA determination is made after the pertinent application is filed.

Competitive bidding requirements of first sentence of sec. 4 of Geothermal Steam Act of 1970 apply to those applications filed during Jan. 1974 filing period, and State Office rejections of appellant's Jan. 1974 noncompetitive lease applications are proper under 43 CFR 3210.4.

Hydrothermal Energy and Minerals, Inc., 18 IBLA 393 (Feb. 7, 1975)
82 I.D. 60

Sec. 4 of Geothermal Steam Act of 1970 directs competitive bidding for geothermal leases on lands which are determined to be within a KGRA before the issuance of a lease on such lands, even though the KGRA determination is made after the pertinent application is filed.

Competitive bidding requirements of first sentence of sec. 4 of Geothermal Steam Act of 1970 apply to those applications filed during Jan. 1974 filing period, and State Office rejections of appellant's Jan. 1974 noncompetitive lease applications are proper under 43 CFR 3210.4.

Hydrothermal Energy and Minerals, Inc., 19 IBLA 136 (Mar. 6, 1975)

A noncompetitive geothermal lease application must include all available lands within a surveyed or protracted section. If it describes less, the application is properly rejected as to such section.

Lands within a known geothermal resources area (KGRA) are not available for noncompetitive leasing. Where lands included in a geothermal lease application are determined to be within a KGRA, and such determination is made after the filing of the application but before the issuance of a lease, or amendment thereto, pursuant to such application, the application must be rejected as to such lands.

Robert G. Lynn, 19 IBLA 167 (Mar. 17, 1975)

An application for a noncompetitive geothermal lease must be rejected with respect to land described in the application which, although not within a known geothermal resources area (KGRA) at the time the application is filed, is designated as being within a KGRA before a lease is issued for said land.

Baumgartner Cos., 21 IBLA 133 (July 14, 1975)

Sec. 4 of the Geothermal Steam Act of 1970 authorizes competitive bidding as the sole basis for issuance of geothermal resources leases for lands determined to be within a KGRA.

Charles J. Heringer, 21 IBLA 254 (Aug. 11, 1975)

Where a noncompetitive geothermal resources lease application indicates that the applicant is not the sole party in interest and is not accompanied by the information required by 43 CFR 3202.2-5 with respect to the nature of the agreement between the parties in interest and their qualifications, the offer must be rejected even if the applicant is, in fact, contrary to the information disclosed on the lease application, the sole party in interest, where such fact is unknown to the BLM.

An application for a noncompetitive lease of geothermal resources in the name of a corporation is properly rejected where it is not accompanied by a statement as to corporate qualifications or a reference by serial number to a record in which such statement previously had been filed.

Central Nevada Corp., 21 IBLA 308 (Aug. 14, 1975)

Sec. 4 of the Geothermal Steam Act of 1970 authorizes competitive bidding as the sole basis for issuance of geothermal resources leases for lands determined to be within a known geothermal resources area, whether the KGRA determination is made before or after a noncompetitive application is filed.

Anadarko Production Co., 24 IBLA 132 (Mar. 4, 1976)

Caroline L. Hunt, 26 IBLA 178 (Aug. 9, 1976)

Where an application for a noncompetitive geothermal steam lease includes 2,598.98 acres of land, thereby exceeding the 2,560 acre limitation by 38.98 acres and the applicant, under 43 CFR 3210.2-1(c) is required to include all available lands within a section, the rule of approximation operates to allow the excess when the excess is smaller than the amount by which the area would be less than 2,560 acres if the irregular subdivision, in this case a section, were excluded.

Caroline L. Hunt, 26 IBLA 218 (Aug. 17, 1976)

Where a noncompetitive geothermal lease application describes all the lands in a certain section by legal subdivisions and the section contains an available unsurveyed lake bed, the lease offer will be rejected as to such section because of the applicant's failure to describe the unsurveyed lake bed by metes and bounds as required by 43 CFR 3203.4(b).

Lamar Hunt, 27 IBLA 397 (Nov. 5, 1976)

30 U.S.C. § 1003 (1970) authorizes competitive bidding as the sole basis for issuance of geothermal resources leases for lands determined to be within a known geothermal resources area, whether the KGRA determination is made before or after a noncompetitive application is filed.

Issuance of a lease for geothermal resources is within the discretion of the Secretary of the Interior. Thus, the filing of an offer for a noncompetitive lease for geothermal steam resources creates no vested rights in the offeror and the offer must be rejected if the lands are found to be within a known geothermal resources area at any time prior to the issuance of a lease.

Earth Power Corp., 29 IBLA 37 (Feb. 16, 1977)

REINSTATEMENT

A geothermal resource lease automatically terminates by operation of law if the lessee fails to pay the annual rental on or before the anniversary date, and a terminated lease may only be reinstated if it is shown that the failure to pay the lease rental timely was justifiable or not due to a lack of reasonable diligence.

The standards of reasonable diligence and justifiable delay govern reinstatement of oil and gas leases as well as geothermal leases, and principles established in oil and gas lease reinstatement cases generally govern cases involving reinstatement of geothermal leases as well.

The submission of an unsigned check the day before the anniversary date of a geothermal resource lease does not constitute timely payment of rental and such a lease terminates by operation of law. The fact that a signed check was not sent until after the anniversary date precludes a finding of reasonable diligence, and because the failure to sign the original check was the result of inadvertence or employee error, it is a matter within the control of the lessee and therefore does not constitute justification for late payment.

Page T. Jenkins, 33 IBLA 135 (Dec. 19, 1977)

A geothermal resource lease automatically terminates by operation of law if the lessee fails to pay the annual rental on or before the anniversary date, and a terminated lease may only be reinstated if the lessee shows that the failure to pay the rental timely was justifiable or not due to a lack of reasonable diligence. Where late payment was caused by circumstances arising from the change in postal rates 3 days prior to the due date, the lease may be reinstated.

Ronald E. Stone, 37 IBLA 306 (Oct. 23, 1978)

A geothermal lease which has automatically terminated by operation of law for failure to submit the annual rental timely may be reinstated only where the lessee shows that the late payment of the rental was either justified or not due to a lack of reasonable diligence. The fact that an assignment application is pending does not justify a late payment of the rental either by the lessee or by the prospective assignee.

Supron Energy Corp., 40 IBLA 68 (Mar. 16, 1979)

To constitute a justifiable excuse for delay in making a rental payment sufficient to warrant reinstatement of a lease terminated for late payment of rental, a lessee must show that the delay was caused by factors outside his control which were the proximate cause of his failure to pay the rental timely. The negligence of an employee in failing to convey essential information to his employer regarding the necessity of making a timely payment does not constitute justification.

O'Brien Resources Corp., Thermal Power Co., 41 IBLA 367 (July 23, 1979)

GEOTHERMAL LEASES--Continued

RENTALS

A geothermal lease is automatically terminated when the lessee fails to pay the advance rental on or before the anniversary date of the lease.

Timely tender of a check which, when presented, is dishonored properly by the bank on which it is drawn does not constitute timely payment.

Caroline L. Hunt, 43 IBLA 314 (Oct. 22, 1979)

STIPULATIONS

A stipulation requiring an offeror under a geothermal resources lease to provide a certified statement by a qualified archaeologist concerning the existence of archaeological values on lands to be disturbed by the lessee and to accept reasonable conditions of use for the protection of such areas and which requires the lessee to bear the cost of salvaging objects of antiquity is reasonable and will be upheld.

Western Oil Shale Corp., 41 IBLA 105 (June 11, 1979)

TERMINATION

A geothermal resource lease automatically terminates by operation of law if the lessee fails to pay the annual rental on or before the anniversary date, and a terminated lease may only be reinstated if it is shown that the failure to pay the lease rental timely was justifiable or not due to a lack of reasonable diligence.

The standards of reasonable diligence and justifiable delay govern reinstatement of oil and gas leases as well as geothermal leases, and principles established in oil and gas lease reinstatement cases generally govern cases involving reinstatement of geothermal leases as well.

The submission of an unsigned check the day before the anniversary date of a geothermal resource lease does not constitute timely payment of rental and such a lease terminates by operation of law. The fact that a signed check was not sent until after the anniversary date precludes a finding of reasonable diligence, and because the failure to sign the original check was the result of inadvertence or employee error, it is a matter within the control of the lessee and therefore does not constitute justification for late payment.

Page T. Jenkins, 33 IBLA 135 (Dec. 19, 1977)

Under 30 U.S.C. § 1004(c) (1970) and 43 CFR 3205.3-2(a), a geothermal resources lease is automatically terminated when the lessee fails to pay advance rental on or before the anniversary date of the lease. Rental payment which arrives at a BLM State Office by Western Union after normal business hours on the anniversary date constitutes payment on the next business day, and is accordingly untimely, so that the lease is properly regarded as having automatically terminated by operation of law.

Failure to make full payment of rental on a geothermal resources lease on or before its anniversary date automatically terminates the lease. Where a lessee has not filed a formal written relinquishment on or before the anniversary date of the lease, as required by 43 CFR 3244.1, his lease account is chargeable with and he is liable to pay advance rental on all of his leasehold on or before the anniversary date. The lessee is not permitted, in lieu of filing a formal relinquishment, to relinquish part of his leasehold by submitting partial payment designated as rental only for the specific acreage he desires to retain.

Robert L. Wheeler, 33 IBLA 371 (Jan. 23, 1978)

GEOTHERMAL LEASES--Continued

TERMINATION--Continued

A geothermal resource lease automatically terminates by operation of law if the lessee fails to pay the annual rental on or before the anniversary date, and a terminated lease may only be reinstated if the lessee shows that the failure to pay the rental timely was justifiable or not due to a lack of reasonable diligence. Where late payment was caused by circumstances arising from the change in postal rates 3 days prior to the due date, the lease may be reinstated.

Ronald E. Stone, 37 IBLA 306 (Oct. 23, 1978)

A geothermal lease which has automatically terminated by operation of law for failure to submit the annual rental timely may be reinstated only where the lessee shows that the late payment of the rental was either justified or not due to a lack of reasonable diligence. The fact that an assignment application is pending does not justify a late payment of the rental either by the lessee or by the prospective assignee.

Supron Energy Corp., 40 IBLA 68 (Mar. 16, 1979)

A geothermal lease is automatically terminated when the lessee fails to pay the advance rental on or before the anniversary date of the lease.

Timely tender of a check which, when presented, is dishonored properly by the bank on which it is drawn does not constitute timely payment.

Caroline L. Hunt, 43 IBLA 314 (Oct. 22, 1979)

GEOTHERMAL RESOURCES

A reservation of geothermal resources under the Geothermal Steam Act of 1970 may be inserted in a patent issued for an Indian allotment granted under the fourth section of the General Allotment Act.

Heirs of Carrie Bethel, 29 IBLA 210 (Mar. 22, 1977)

Under 43 U.S.C. § 852(a)(1) (1970), *as amended* by sec. 25 of the Geothermal Steam Act of 1970, 30 U.S.C. § 1024 (1970), a State may select lands with geothermal potential as indemnity for base lands lost by it from its grant for common schools without a reservation to the United States of the geothermal rights therein, provided that these base lands also have geothermal potential.

Per sec. 25 of the Geothermal Steam Act of 1970, geothermal resources are treated under 43 U.S.C. § 852(a) (1970) as other leasable minerals, rather than as oil and gas, so that a State need not submit as base for indemnity selection of lands which have been classified by the Geological Survey as being within a "KGRA" (known geothermal resource area) lands which also are classified as KGRA, but instead need only submit base lands classified by GS as having geothermal potential.

Where BLM has issued a clear list giving a State title to lands selected as indemnity for lost school lands but erroneously reserving to the United States geothermal rights to these selected lands, these geothermal rights are still within the power of the United States to dispose of, and the Department still exercises jurisdiction over them, so that the Board of Land Appeals may correct BLM's error by ordering that these

GEOTHERMAL RESOURCES--Continued

rights be given to the State by deleting the reservation thereof in the clear list.

Where the record indicates that there may be gross disparity between the value of lands selected by a State as indemnity for lost school lands and the value of base lands submitted by the State in support of the selection, the matter will be remanded to the BLM for revaluation of the lands. If the revaluation reveals a gross disparity, the BLM shall withhold further action until judicial resolution of the propriety of the "grossly disparate value" policy.

State of California, 33 IBLA 160 (Dec. 20, 1977)

GRAZING AND GRAZING LANDS

Where a sec. 15 grazing lease is issued to an applicant whose brother is an employee of this Department, and such employee owns stock in the corporation that owns the contiguous fee land, control over which the applicant asserts as the basis for his preference right to the grazing lease, such applicant cannot be granted the desired grazing lease. Any such lease must be canceled when the facts are called to the Department's attention. This result occurs under 43 CFR 7.2 and 7.3 which prohibit any employee from acquiring or retaining any interest in the lands or resources administered by the Bureau of Land Management. The prohibition extends to any interest in land which in any manner is connected with or involves the use of the grazing resources administered by the Bureau of Land Management.

Donald E. and Nancy P. Janson (On Reconsideration), 19 IBLA 154 (Mar. 14, 1975) 82 I.D. 93

Where the record does not clearly show whether either or both of two grazing lease applicants are preference right applicants and does not reflect consideration of all of the factors mandated by 43 CFR 4121.2-1(d)(2) for evaluating conflicting grazing lease applications, a decision awarding the lease to one of the parties will be set aside and the case remanded for further consideration.

Elmer M. Johnson, 20 IBLA 111 (Apr. 25, 1975)

Improvement of land by fencing, and use as horse pasture, constitutes agricultural use which does not qualify as "trade, manufacture, or other productive industry" within the meaning of the Act of May 14, 1898, *as amended*, 43 U.S.C. § 687a (1970), regardless of the type of business in connection with which the pasturage is desired.

Evelyn M. Bunch, 25 IBLA 44 (May 13, 1976)

The denial of a private landowner's request that the Bureau of Land Management share in the expenses of constructing a fence between Federal and private land will be upheld where the landowner has failed to show a valid legal or factual reason for granting the request.

John L. Time and Ruth E. Blomgren, 30 IBLA 317 (June 6, 1977)

Where the alleged trespasser makes no allegations of a specific and substantial nature regarding whether or not a trespass has in fact occurred, the procedure authorized by 43 CFR 9239.3-2(c)(4) limiting a hearing "to the determination of the amount of damages, value of the forage consumed, and any other amounts considered to be due the United States as a result of said trespass" does not result in a denial of due process.

A hearing on the issue of whether or not a trespass was willful or not clearly willful is authorized by 43 CFR 9239.3-2(c)(4) because a finding on this issue affects the rate at which the value of the forage consumed shall be computed pursuant to 43 CFR 9239.3-2(c)(2).

In determining whether grazing trespasses are willful, intent sufficient to establish willfulness may be shown by proof of facts which objectively show that the circumstances do not comport with the notion that the trespasser acted in good faith or innocent mistake or that his conduct was so lacking in reasonableness or responsibility that it became reckless or negligent.

Since a grazing trespass is not a criminal proceeding, it need not be proved beyond a reasonable doubt that a particular individual committed the trespass.

Evidence is insufficient to support a finding of a willful trespass where it fails to show that the alleged trespasser intended to disregard the regulation prohibiting trespass or that he was plainly indifferent to its requirements or that he acted with gross neglect of a known duty.

Where the administrative law judge does not make a finding as to whether a trespass was willful or not clearly willful, the Board of Land Appeals may make this finding based upon the record as if it were sitting as trier of fact.

Where BLM has impounded five horses found to be trespassing on public lands closed to grazing and no notice and hearing are afforded to the owner of said animals prior to impoundment because the owner is unknown to BLM, the due process rights of said owner are not violated. The procedures authorized by 43 CFR 9239.3-2(c)(3) do not violate due process.

The Property Clause of the United States Constitution art. IV, § 3, cl. 2, gives Congress the power over the public lands "to control their occupancy and use, to protect them from trespass and injury and to prescribe the conditions upon which others may obtain rights in them." When Congress so acts, the Federal legislation necessarily overrides conflicting State laws under the Supremacy Clause. U.S. Constitution art. IV, cl. 2.

Fernando Herrera v. Bureau of Land Management, 38 IBLA 262 (Dec. 6, 1978)

Where an applicant for a range improvement project involving alteration of the Native range by reseeding with non-Native species and requiring the expenditure of a large sum of public funds does not show that there is an urgent situation requiring immediate improvement of the range as proposed, a decision by the BLM range manager denying the application because management framework and allotment management plans have not been formulated is properly affirmed, as, ordinarily, such a venture should not be undertaken without the type of information these plans are intended to provide.

Loyd Sorensen, Von L. Sorensen, Kenneth Jones, 41 IBLA 354 (July 20, 1979)

GRAZING LEASES

GENERALLY

A determination by a district manager of the grazing capacity of lands offered for a sec. 15 grazing lease will not be overturned in the absence of a clear showing of error. The burden of proof is upon the party challenging such determination to show that the decision is erroneous or that he has not been dealt with fairly.

An appeal from a district manager's decision reducing the authorized use of lands offered under a sec. 15 grazing lease will be dismissed where the grazing season covered by the term of the proposed lease has expired and the appellant must meet a precondition before any future lease issues. The dismissal, however, will be without prejudice to the appellant's submitting evidence to the district manager to disprove the determination of the carrying capacity of the range, if he otherwise meets the precondition for a lease.

John T. Murtha, 19 IBLA 97 (Mar. 4, 1975)

Where a sec. 15 grazing lease is issued to an applicant whose brother is an employee of this Department, and such employee owns stock in the corporation that owns the contiguous fee land, control over which the applicant asserts as the basis for his preference right to the grazing lease, such applicant cannot be granted the desired grazing lease. Any such lease must be canceled when the facts are called to the Department's attention. This result occurs under 43 CFR 7.2 and 7.3 which prohibit any employee from acquiring or retaining any interest in the lands or resources administered by the Bureau of Land Management. The prohibition extends to any interest in land which in any manner is connected with or involves the use of the grazing resources administered by the Bureau of Land Management.

Donald E. and Nancy P. Jansen (On Reconsideration), 19 IBLA 154 (Mar. 14, 1975) 82 I.D. 93

The regulations pertaining to sec. 15 grazing leases provide that a corporation is a qualified applicant for a lease if it is a corporation whose controlling interest is vested in persons who are engaged in the livestock business. 43 CFR 4121.1-1(b). Where the corporate applicant itself is engaged in a livestock business such a showing is sufficient for the corporation to meet this requirement without the need for those holding a controlling interest in the corporation to make an additional showing that they are engaged in a livestock operation in their individual capacities.

Defenders of Wildlife, 19 IBLA 219 (Mar. 25, 1975)

Where the record does not clearly show whether either or both of two grazing lease applicants are preference right applicants and does not reflect consideration of all of the factors mandated by 43 CFR 4121.2-1(d)(2) for evaluating conflicting grazing lease applications, a decision awarding the lease to one of the parties will be set aside and the case remanded for further consideration.

Elmer M. Johnson, 20 IBLA 111 (Apr. 25, 1975)

The regulations governing Departmental employees' rights to hold a direct or indirect interest in public lands must be construed *in pari materia* with the regulations governing qualification to hold a grazing lease under sec. 15 of the Taylor Grazing Act, 43 U.S.C. § 315m (1970). A non-employee may be disqualified from holding a lease by his business relationship with an employee if the issuance of the lease would create an interest in public land proscribed by regulation.

Donald E. and Nancy P. Jansen (On Reconsideration), 23 IBLA 374 (Feb. 4, 1976)

One of the functions of the Department of Justice is to construe the laws under which other Government Departments act, 28 U.S.C. § 512 (1970), and when the Department of Justice has advised the Department of the Interior that it has construed a conflict of interest statute affecting Members of Congress and has determined that it is permissible for the spouse of a Member of Congress to hold a grazing lease for national resource lands under certain circumstances, that opinion is binding on this Department, and a grazing lease is properly issued when the applicant has satisfied the criteria set forth by the Department of Justice.

Joseph T. Kurkowski, 24 IBLA 58 (Feb. 23, 1976)

A decision renewing a sec. 15 grazing lease and rejecting a conflicting application, rendered in compliance with the standard prescribed by 43 CFR 4121.2-1(d)(2), will not be overturned in the absence of convincing reasons that the award is not warranted.

Where conflicting applications have been filed for a sec. 15 grazing lease and proper range management can be obtained from either applicant, and where both have an equal need for the land, the applicant seeking a renewal based on historical use generally will be favored.

Dorr Cornelison, 24 IBLA 155 (Mar. 15, 1976)

A determination by a district manager of the grazing capacity of lands offered for a sec. 15 grazing lease will not be overturned in the absence of a clear showing of error. The burden of proof is upon the party challenging such determination to show that the decision is erroneous or that he has not been dealt with fairly.

Kaser Brothers, 24 IBLA 265 (Mar. 29, 1976)

A grazing lease is properly canceled because of the lessee's loss of control of the lands which were recognized as the basis of the preference right to the lease.

W. Doyle Wood, Jane L. Wood, 25 IBLA 261 (June 23, 1976)

R. Richard Wendling, 31 IBLA 214 (July 6, 1977)

An appeal from a decision of the Bureau of Land Management rejecting a grazing lease application and approving a conflicting application will not be summarily dismissed for failure to serve an adverse party who is not specifically designated as such in the decision appealed from. A decision of the Bureau of Land Management that a conflicting applicant has a preference right to the grazing lease will be affirmed when the applicant appealing fails to indicate any error in the decision.

Jack Sedman, 25 IBLA 277 (June 25, 1976)

GRAZING LEASES--Continued

GENERALLY--Continued

The regulations do not require that a lessee be given advance notice of nonrenewal of a grazing lease, nor is he entitled to rely upon an asserted assurance that he could have the lease as long as he desired.

It is proper to reject an application for renewal of a grazing lease where the land applied for is of such character that livestock grazing would be detrimental to other uses of the land such as wildlife and recreational uses.

Carl Peterson, 25 IBLA 328 (June 30, 1976)

The regulations do not provide for hearings as a matter of right on trespass violations involving a sec. 15 grazing lessee. For the Board of Land Appeals to exercise its discretion under 43 CFR 4.415 and order a hearing, the appellant must allege facts which, if proved, would entitle him to the relief sought.

Rodney Rolfe and Ronald J. Rolfe, 25 IBLA 331 (June 30, 1976) 83 I.D. 269

One who has laid claim, pursuant to the Wild Free-Roaming Horses and Burros Act, to horses on the public lands and who does not remove them within a reasonable period, is subject to having the renewal of his grazing lease denied.

Truman and Velma Cross, 29 IBLA 4 (Feb. 7, 1977)

A preference right applicant is properly determined to have lost control of non-Federal leased lands which constitute the basis for the preference and thereafter his sec. 15 grazing lease is subject to cancellation where (1) the lessor of the preference land notifies the BLM that the applicant's private lease has been terminated for delinquent rental; (2) the provisions of the private lease on record with the BLM clearly indicate the lessor has ample authority to cancel that lease at his discretion; and (3) after confrontation with these circumstances by a BLM show cause notice, the applicant does not deny he has lost control of his base lands, nor does he provide positive or substantive evidence that he still controls the private leased base lands.

Charles A. Mitchell, Jr., 30 IBLA 1 (Apr. 1, 1977)

Under the terms and conditions in 43 CFR 4125.1-1(i) placed by the Department on the continued effectiveness of grazing leases, as allowed by sec. 15 of the Taylor Grazing Act, a grazing lease may be canceled in its entirety in order to use the land included in it as a wildlife habitat.

Under sec. 402(g) of the Federal Land Policy and Management Act, except in cases of emergency, a cancellation of a grazing lease by the Government after Oct. 21, 1976, may not be given effect until 2 years after the lessee has received notification of the cancellation of the lease. This provision is construed as applicable to all existing grazing leases, licenses and permits, including those issued prior to the Act.

Bill M. Fraser, 30 IBLA 277 (June 1, 1977)

Implementation of the Taylor Grazing Act of 1934 is committed to the discretion of the Secretary of the Interior. A decision made in the exercise of that discretion must contain such a statement of reasons in support of the decision as will establish that the discretion has been exercised in a manner that is neither arbitrary nor capricious. Review on the issue of abuse of discretion is limited to an inquiry whether the statement of reasons establishes a rational and defensible basis for the decision below.

Andrew E. L. Anderson et al., 32 IBLA 123 (Sept. 12, 1977)

Under sec. 402(c) of the Federal Land Policy and Management Act of 1976, 43 U.S.C.A. § 1752(c) (West Supp. 1977), the holder of an expiring grazing lease receives first priority for the new lease if the requirements of sec. 402(c) are met. Therefore, a conflicting applicant is properly denied the lease where the renewal applicant meets those requirements.

Allen B. Prouse, 32 IBLA 311 (Sept. 30, 1977) 84 I.D. 674

George T. McDonald, Cascade Ranches, Inc., 35 IBLA 75 (May 12, 1978)

Under sec. 402(c) of the Federal Land Policy and Management Act of 1976, 43 U.S.C.A. § 1752(c) (West Supp. 1977), the holder of an expiring lease shall be given first priority for receipt of the new lease as long as the lessee is in compliance with the rules and regulations issued and the terms and conditions in the lease. Therefore, if the holder of an expiring lease loses control of the private property contiguous to public land which gave him a preference right to a lease under 43 CFR 4121.2-1(c), he is not entitled to first priority for receipt of a new lease.

Where an area manager's decision divides the sec. 15 grazing use of a tract of public land between two applicants on the assumption that both are qualified preference right claimants, and it is determined on appeal that one claimant is not qualified, the decision will be set aside and the case remanded to the Bureau of Land Management for determination of the rights of the other applicant.

Mark E. Trask, 32 IBLA 395 (Nov. 9, 1977)

A decision renewing a grazing lease and rejecting a conflicting application which is rendered in accordance with the governing statutory standard set out in sec. 402(c) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. § 1752(c) (___ Supp. 197_), will not be overturned in the absence of convincing reasons that the award is not warranted.

Fancher Bros., 33 IBLA 262 (Jan. 5, 1978)

Where record indicates no dispute that there was grazing use of public lands in issue from 1951 to 1975 by current grazing lease applicant's predecessors in interest, followed by 1-year hiatus in valid grazing use prior to current applicant's filing for lease, since length of hiatus was reasonable under circumstances, and since general intention of historical use criterion in 43 CFR 4121.2-1(d)(2) was not contradicted during break in valid grazing use, BLM was not arbitrary in applying historical use criterion in favor of one applicant in a case involving conflicting grazing lease applications. Here, hiatus was approximately one grazing season and was occasioned by purchase at foreclosure sale of preference lands by first mortgagee, who

GRAZING LEASES--Continued

GENERALLY--Continued

conveyed those lands 1 year later to current applicant, a grazing operator.

Considering record as a whole, Board concludes that neither of appellants has shown that District Office decision apportioning, on basis of historical use in favor of one appellant and topography in favor of other appellant, grazing lands between two lease applicants was arbitrary or capricious, or without rational basis, or inequitable.

John Rattray, Elmer L. Wilson, 36 IBLA 282 (Aug. 21, 1978)

An area manager's decision apportioning lands between two grazing lease applicants ordinarily will not be disturbed where both applicants have equal preference rights, the apportionment is consistent with the regulatory criteria of 43 CFR 4121.2-1(d)(2), and the decision is not shown to be arbitrary or capricious. However, where a new statute, sec. 402 of the Federal Land Policy and Management Act of 1976, 43 U.S.C.A. § 1752(c) (West Supp. 1978), dictates that in certain circumstances "the holder of the expiring permit or lease shall be given first priority for receipt of the new permit or lease," the apportionment must be conformed therewith.

In view of 43 U S.C.A. § 1752(c) (West Supp. 1978), which dictates that in certain circumstances the present grazing user shall have a right of first refusal for any new lease, 43 CFR 4110.5 (43 FR 29070), must be read *in pari materia* therewith and with 43 CFR 4130.2(e) (43 FR 29072) to be construed as a valid regulation and must be interpreted not to apply where the present grazing user desires a new lease and otherwise meets the statutory and regulatory criteria.

Harvey Sheehan and Hazel Holland Hudon, 39 IBLA 56 (Jan. 16, 1979) 86 I.D. 51

A district manager's decision reached in the exercise of administrative discretion pursuant to the Taylor Grazing Act of 1934 may be regarded as arbitrary or capricious only where it is not supportable on any rational basis and the burden is on the appellant to show by substantial evidence that the decision is improper. A district manager's decision not to reissue a grazing lease for a certain area until that area is fenced and to reduce appellant's AUM's accordingly rests on a rational basis where the facts show that this unfenced area adjoins the bombing range and grazing thereon could result in trespass on the bombing range, inconsistent with the use of the range.

Under the Supremacy Clause, U.S. Const., art. VI, cl. 2, Federal laws, including Federal grazing regulations, override conflicting State laws with respect to public lands.

Colvin Cattle Co., Inc., 39 IBLA 176 (Jan. 30, 1979)

Where two conflicting grazing lease applications are filed under the Taylor Grazing Act, *as amended*, 43 U.S.C. § 314m (1976), and one applicant owns base property of 320 acres which supports a preference right for the grazing lease, which base property the other applicant formerly leased from a previous owner to support a grazing lease, the grazing lease is properly issued to the applicant who is the present owner of the base property because such property has historically been used in connection with that grazing lease and the base controlled by the other applicant is only 80 acres.

A decision of the district manager rejecting a grazing lease application will not be disturbed on appeal in the absence of a showing that the decision is not reasonable or does not comport with statutory or regulatory standards, and where the decision appealed from is consonant with good range management.

Ted Crum, 40 IBLA 129 (Mar. 28, 1979)

In view of 43 U.S.C. § 1752(c) (1976), which dictates that in certain circumstances the holder of the expiring grazing lease shall be given first priority for receipt of the new lease, a district manager's decision apportioning lands between conflicting lease applicants will not be disturbed where holders of the expiring lease receive the land except for a portion and do not appeal the award of the portion to a conflicting applicant, thus waiving their preference right to said portion.

Cub River Stockmen's Ass'n, 42 IBLA 26 (July 26, 1979)

APPLICATIONS

The regulations require that a qualified applicant for a sec. 15 grazing lease be engaged in the livestock business and have a need for the land. Therefore, unless an applicant owns livestock for business purposes, or is a recognized livestock operator who temporarily or due to circumstances beyond his control does not own any livestock, he is not qualified to be awarded a lease.

Ralph E. Nolan, 18 IBLA 432 (Feb. 14, 1975)

The regulations pertaining to sec. 15 grazing leases provide that a corporation is a qualified applicant for a lease if it is a corporation whose controlling interest is vested in persons who are engaged in the livestock business. 43 CFR 4121.1-1(b). Where the corporate applicant itself is engaged in a livestock business such a showing is sufficient for the corporation to meet this requirement without the need for those holding a controlling interest in the corporation to make an additional showing that they are engaged in a livestock operation in their individual capacities.

Defenders of Wildlife, 19 IBLA 219 (Mar. 25, 1975)

A district manager's renewal of a grazing lease and the denial of a conflicting lease application will not be disturbed where both applicants have equal preference rights and the award was based upon the regulatory criterion of historical use and there are no convincing reasons warranting a change of lessee.

George Aspis, 20 IBLA 115 (Apr. 25, 1975)

In order to qualify as a preference right applicant for a grazing lease on public land under sec. 15 of the Taylor Grazing Act, the applicant must own or lawfully occupy contiguous private land the proper use of which requires issuance of a grazing lease. Use or occupancy of contiguous public land under a sec. 15 grazing lease does not, by itself, qualify to establish a preference right over contiguous owners or lawful occupants of private lands. The fact an applicant once owned contiguous land and had a lease for the land is irrelevant in determining his present preference status.

Ralph C. Lorenz, 24 IBLA 1 (Feb. 4, 1976)

GRAZING LEASES--Continued

APPLICATIONS--Continued

A decision renewing a sec. 15 grazing lease and rejecting a conflicting application, rendered in compliance with the standard prescribed by 43 CFR 4121.2-1(d)(2), will not be overturned in the absence of convincing reasons that the award is not warranted.

Where conflicting applications have been filed for a sec. 15 grazing lease and proper range management can be obtained from either applicant, and where both have an equal need for the land, the applicant seeking a renewal based on historical use generally will be favored.

Dorr Cornelison, 24 IBLA 155 (Mar. 15, 1976)

A grazing lease is properly denied when utilization of the leased property could have a substantial adverse effect on the environment and the Bureau of Land Management is under court order forbidding approval of such activity pending the preparation, filing and acceptance of an environmental impact statement.

Robert H. Jones, James E. Jones, 25 IBLA 93 (June 2, 1976)

The regulations do not require that a lessee be given advance notice of nonrenewal of a grazing lease, nor is he entitled to rely upon an asserted assurance that he could have the lease as long as he desired.

It is proper to reject an application for renewal of a grazing lease where the land applied for is of such character that livestock grazing would be detrimental to other uses of the land such as wildlife and recreational uses.

Carl Peterson, 25 IBLA 376 (June 30, 1976)

A district manager's renewal of a grazing lease and the denial of a conflicting lease application will not be disturbed where both applicants have equal preference rights and the award was based upon regulatory criteria including historical use and needs of the applicants, and there are no convincing reasons warranting a change of lessee.

Where a district manager renews a grazing lease and denies a conflicting application, he may require as a condition to continuance of the lease that the applicant for the lease renewal fence that portion of National Resource Lands adjacent to land leased by the conflicting applicant, in order to prevent trespass of the livestock belonging to the applicant for the lease renewal.

Wesley Leininger, 28 IBLA 93 (Nov. 15, 1976)

In order to qualify as a preference right applicant for a grazing lease on public land under sec. 15 of the Taylor Grazing Act, the applicant must own or control contiguous or cornering private land, the proper use of which requires issuance of a grazing lease. The fact that an applicant once owned contiguous land and had a lease for the public land is irrelevant in determining his present preference status.

Mark E. Frank, 32 IBLA 395 (Nov. 9, 1977)

GRAZING LEASES--Continued

APPLICATIONS--Continued

A decision renewing a grazing lease and rejecting a conflicting application which is rendered in accordance with the governing statutory standard set out in sec. 402(c) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. § 1752(c) (___ Supp. 197_), will not be overturned in the absence of convincing reasons that the award is not warranted.

Past use of public land for grazing in trespass does not constitute cognizable historical use for the purpose of resolving conflicting applications for a grazing lease.

An applicant to purchase land under R.S. 2455 gains no rights in the land therefrom as against the United States and is not entitled to preferential treatment on an application for a grazing lease of the same land.

Fancher Bros., 33 IBLA 262 (Jan. 5, 1978)

Priority of filing is not one of criteria listed in 43 CFR 4121.2-1(d)(2) for adjudicating conflicting grazing lease applications. Therefore, one appellant's filing for lease before other appellant gives former no rights superior to latter's.

John Rattray, Elmer L. Wilson, 36 IBLA 282 (Aug. 21, 1978)

Where a decision rejects an application for an Alaska grazing lease because of an asserted Secretarial policy against granting such applications for land withdrawn pursuant to sec. 17(d)(2) of the Alaska Native Claims Settlement Act, 43 U.S.C. § 1616(d)(2) (Supp. V 1975), but the record on appeal is incomplete with respect to the existence of such policy, the record should be remanded for further documentation.

Neither an application for an Alaska grazing lease nor an application for assignment of a grazing lease confer upon the applicant a right to a lease, the granting thereof being discretionary and subject to any changes in Secretarial policy.

The Board of Land Appeals will not exercise its de novo review authority to deny applications for Alaska grazing leases on the basis of trespass where (1) trespass was not cited as a reason for denial of the applications in the decision under appeal, (2) the record does not provide a clear basis for determining the applicant's responsibility for the trespass, and (3) there is no record of compliance with the procedures specified in 43 CFR 9239.0-9(b).

Kenneth E. Fusch, 37 IBLA 346 (Oct. 27, 1978)

Where two conflicting grazing lease applications are filed under the Taylor Grazing Act, as amended, 43 U.S.C. § 314m (1976), and one applicant owns base property of 320 acres which supports a preference right for the grazing lease, which base property the other applicant formerly leased from a previous owner to support a grazing lease, the grazing lease is properly issued to the applicant who is the present owner of the base property because such property has historically been used in connection with that grazing lease and the base controlled by the other applicant is only 80 acres.

A decision of the district manager rejecting a grazing lease application will not be disturbed on appeal in the absence of a showing that the decision is not reasonable

GRAZING LEASES--Continued

APPLICATIONS--Continued

or does not comport with statutory or regulatory standards, and where the decision appealed from is consonant with good range management.

Ted Crum, 40 IBLA 129 (Mar. 28, 1979)

APPORTIONMENT OF LAND

Where an area manager's decision divides the sec. 15 grazing use of a tract of public land between two applicants on the assumption that both are qualified preference right claimants, and it is determined on appeal that one claimant is not qualified, the decision will be set aside and the case remanded to the Bureau of Land Management for determination of the rights of the other applicant.

Mark E. Trask, 32 IBLA 395 (Nov. 9, 1977)

Priority of filing is not one of criteria listed in 43 CFR 4121.2-1(d)(2) for adjudicating conflicting grazing lease applications. Therefore, one appellant's filing for lease before other appellant gives former no rights superior to latter's.

Where record indicates no dispute that there was grazing use of public lands in issue from 1951 to 1975 by current grazing lease applicant's predecessors in interest, followed by 1-year hiatus in valid grazing use prior to current applicant's filing for lease, since length of hiatus was reasonable under circumstances, and since general intention of historical use criterion in 43 CFR 4121.2-1(d)(2) was not contradicted during break in valid grazing use, BLM was not arbitrary in applying historical use criterion in favor of one applicant in a case involving conflicting grazing lease applications. Here, hiatus was approximately one grazing season and was occasioned by purchase at foreclosure sale of preference lands by first mortgagee, who conveyed those lands 1 year later to current applicant, a grazing operator.

Considering record as a whole, Board concludes that neither of appellants has shown that District Office decision apportioning, on basis of historical use in favor of one appellant and topography in favor of other appellant, grazing lands between two lease applicants was arbitrary or capricious, or without rational basis, or inequitable.

John Rattray, Elmer L. Wilson, 36 IBLA 282 (Aug. 21, 1978)

An area manager's decision apportioning lands between two grazing lease applicants ordinarily will not be disturbed where both applicants have equal preference rights, the apportionment is consistent with the regulatory criteria of 43 CFR 4121.2-1(d)(2), and the decision is not shown to be arbitrary or capricious. However, where a new statute, sec. 402 of the Federal Land Policy and Management Act of 1976, 43 U.S.C.A. § 1752(c) (West Supp. 1978), dictates that in certain circumstances "the holder of the expiring permit or lease shall be given first priority for receipt of the new permit or lease," the apportionment must be conformed therewith.

In view of 43 U.S.C.A. § 1752(c) (West Supp. 1978), which dictates that in certain circumstances the present grazing user shall have a right of first refusal for any new lease, 43 CFR 4110.5 (43 FR 29070), must be read *in pari materia* therewith and with 43 CFR 4130.2(e) (43 FR 29072) to be construed as a valid regulation and must be interpreted not to apply where

GRAZING LEASES--Continued

APPORTIONMENT OF LAND--Continued

the present grazing user desires a new lease and otherwise meets the statutory and regulatory criteria.

Harvey Sheehan and Hazel Holland Hudson, 39 IBLA 56 (Jan. 16, 1979) 86 I.D. 51

In view of 43 U.S.C. § 1752(c) (1976), which dictates that in certain circumstances the holder of the expiring grazing lease shall be given first priority for receipt of the new lease, a district manager's decision apportioning lands between conflicting lease applicants will not be disturbed where holders of the expiring lease receive the land except for a portion and do not appeal the award of the portion to a conflicting applicant, thus waiving their preference right to said portion.

Cub River Stockmen's Ass'n, 42 IBLA 26 (July 26, 1979)

ASSIGNMENT

Where a reduction in the authorized use of land leased pursuant to sec. 15 of the Taylor Grazing Act is required in order to conform to the actual grazing capacity of the land, the full amount of that reduction must be imposed immediately rather than gradually. Where acceptance of the reduction is made a condition precedent for the approval of an assignment and for the issuance of a new lease, the assignee and prospective lessee will be held to have the same right to appeal the reduction as the original lessee.

Duke W. Evans et al., 26 IBLA 15 (July 7, 1976)

CANCELLATION OR REDUCTION

A grazing lease issued pursuant to sec. 15 of the Taylor Grazing Act is properly canceled where the lessee has violated the terms of the lease and the regulations by subleasing lands within the area of the lease.

Coronado Development Corp., 19 IBLA 71 (Feb. 26, 1975)

Earl G. and Robert E. Murphy, 24 IBLA 124 (Mar. 2, 1976)

Where a reduction in the authorized use of lands subject to a sec. 15 grazing lease is required to conform to the grazing capacity of such lands as determined by a district manager, the full amount of the downward adjustment must be imposed immediately.

An appeal from a district manager's decision reducing the authorized use of lands offered under a sec. 15 grazing lease will be dismissed where the grazing season covered by the term of the proposed lease has expired and the appellant must meet a precondition before any future lease issues. The dismissal, however, will be without prejudice to the appellant's submitting evidence to the district manager to disprove the determination of the carrying capacity of the range, if he otherwise meets the precondition for a lease.

John T. Murtha, 19 IBLA 97 (Mar. 4, 1975)

Where a sec. 15 grazing lease is issued to an applicant whose brother is an employee of this Department, and such employee owns stock in the corporation that owns the contiguous fee land, control over which the applicant asserts as the basis for his preference right to the grazing lease, such applicant cannot be granted the desired grazing lease. Any such lease must be canceled when the facts are called to the Department's attention. This result occurs under 43 CFR 7.2 and 7.3 which prohibit any employee from acquiring or retaining any interest in the lands or resources administered by the Bureau of Land Management. The prohibition extends to any interest in land which in any manner is connected with or involves the use of the grazing resources administered by the Bureau of Land Management.

Donald E. and Nancy P. Jasson (On Reconsideration), 19 IBLA 154 (Mar. 14, 1975) 82 I.D. 93

An appeal from a decision canceling a grazing lease for loss of control of non-Federal lands upon which the lease was based will be dismissed where the lease has expired by its terms. The dismissal will be without prejudice to a new lease application for the grazing lands which the appellant may decide to submit.

Ralph Rogers, 22 IBLA 31 (Sept. 10, 1975)

Under the Alaska Grazing Act, 43 U.S.C. § 316 *et seq.* (1970), issuance of a grazing lease appropriates the lands and segregates them from public domain, barring them from use and occupancy for Native allotment purposes until the Department takes action to exclude lands from lease.

Edward P. Naughton, 23 IBLA 134 (Dec. 23, 1975)

A grazing lease is properly canceled because of the lessee's loss of control of the lands which were recognized as the basis of the preference right to the lease.

W. Doyle Wood, Jane L. Wood, 25 IBLA 261 (June 23, 1976)

E. Richard Wendling, 31 IBLA 214 (July 6, 1977)

When the holder of a grazing lease is found to have violated regulations and the terms of his lease because his cattle have trespassed on Federal land, his lease may be canceled when lesser sanctions have proved to be of no effect or when the nature of the violation demands such severity. However, a decision canceling a lease will be set aside where the district manager relied upon alleged trespasses of which the lessees had no notice and which occurred after a show cause notice had issued, and the case will be remanded for further proceedings.

Rodney Rolfe and Ronald J. Rolfe, 25 IBLA 331 (June 30, 1976) 83 I.D. 269

Where a reduction in the authorized use of land leased pursuant to sec. 15 of the Taylor Grazing Act is required in order to conform to the actual grazing capacity of the land, the full amount of that reduction must be imposed immediately rather than gradually. Where acceptance of the reduction is made a condition precedent for the approval of an assignment and for the issuance of a new lease, the assignee and prospective lessee will be held to have the same right to appeal the reduction as the original lessee.

While a determination of the grazing capacity of public lands will not ordinarily be overturned in the absence of a clear showing of error, a hearing may be ordered to resolve conflicts in the opinions of different experts where the lessee has made a substantial and believable offer of proof which, if true, would show error in the Bureau of Land Management's determination.

Duke W. Evans et al., 26 IBLA 15 (July 7, 1976)

In accordance with 43 CFR 4125.1-1(i)4, and with the terms of a sec. 15 grazing lease, Taylor Grazing Act, *as amended*, 43 U.S.C. § 315m (1970), a preference right lease will be terminated upon loss of control by the lessee of non-Federal lands which have been recognized as the basis for the issuance of that lease.

Charles A. Mitchell, Jr., 30 IBLA 1 (Apr. 1, 1977)

Under the terms and conditions in 43 CFR 4125.1-1(i) placed by the Department on the continued effectiveness of grazing leases, as allowed by sec. 15 of the Taylor Grazing Act, a grazing lease may be canceled in its entirety in order to use the land included in it as a wildlife habitat.

Under sec. 402(g) of the Federal Land Policy and Management Act, except in cases of emergency, a cancellation of a grazing lease by the Government after Oct. 21, 1976, may not be given effect until 2 years after the lessee has received notification of the cancellation of the lease. This provision is construed as applicable to all existing grazing leases, licenses and permits, including those issued prior to the Act.

Bill W. Fraser, 30 IBLA 277 (June 1, 1977)

Where a sec. 15 grazing lessee loses control of lands recognized as the basis for her preference right to a portion of the lands within the grazing lease, the Bureau of Land Management properly cancels the grazing lease as to those lands.

When a sec. 15 grazing lease is canceled in part for loss of control of preference lands, allegations concerning the lessee's control of other lands contiguous to the grazing lease, or concerning a possible conflicting applicant's lack of qualifications to hold a grazing lease, are not relevant to show cause why the grazing lease should not be canceled in part.

Remedies for an alleged breach of a private lease agreement involving preference lands for a sec. 15 grazing lease must be sought in the appropriate courts and not before the Department of the Interior, which has no jurisdiction over such matters.

Where the Bureau of Land Management erroneously described a portion of the land listed in a notice to show cause why a grazing lease should not be canceled in part, the lessee is not denied due process where the land could not be confused with other lands in the grazing lease, where BLM corrected and explained its mistake in the subsequent decision, where no prejudice from the mistake is alleged or evident, and where the lessee has had every opportunity to present her arguments on the issues involved in the BLM actions.

If a grazing lease, canceled in part for loss of control of preference lands, expires by its terms prior to decision on the appeal of the cancellation and if the grazing lease is renewed solely because the appellate decision has not been rendered, with no consideration of the lessee's or conflicting preference rights, the Board of Land Appeals will consider the appeal of the cancellation as applicable to the renewed lease.

Evelyn Gleason, 35 IBLA 23 (May 5, 1978)

GRAZING LEASES--Continued

CANCELLATION OR REDUCTION--Continued

43 CFR 4125.1-1(m)(3) provides that a grazing lease may be canceled for failure to make timely payment of grazing fees pursuant to 43 CFR 4125.1-1(h). The fact that cash was not available at the time payment was due; that executor of appellant estate relied upon his wife who failed to make timely payment; and that the wife was notified of a death in the family after the due date, does not justify the failure to pay the fee by the required date.

Reese Hennagan Estate, 36 IBLA 399 (Sept. 5, 1978)

The regulations of this Department have the force and effect of law, and are binding upon the Secretary and those who exercise his delegated authority. A grazing lease is properly canceled where the lessee fails to pay the rental pursuant to 43 CFR 4125.1-1(h) and 4125.1-1(m)(3). The Boards of Appeal of this Department have no authority to declare a Secretary's regulation invalid.

Sombrero Ranches, Inc., 38 IBLA 327 (Dec. 19, 1978)

A district manager's decision reached in the exercise of administrative discretion pursuant to the Taylor Grazing Act of 1934 may be regarded as arbitrary or capricious only where it is not supportable on any rational basis and the burden is on the appellant to show by substantial evidence that the decision is improper. A district manager's decision not to reissue a grazing lease for a certain area until that area is fenced and to reduce appellant's AUM's accordingly rests on a rational basis where the facts show that this unfenced area adjoins the bombing range and grazing thereon could result in trespass on the bombing range, inconsistent with the use of the range.

Colvin Cattle Co., Inc., 39 IBLA 176 (Jan. 30, 1979)

A grazing lease issued under the Alaska Grazing Act, 43 U.S.C. § 316 *et seq.* (1970), appropriates the lands and segregates them from the public domain, barring them from use and occupancy for Native allotment purposes until the Department takes action to exclude lands from the lease.

Herman Anderson, Jr., Nicholas Pestrikoff, Anthony Drabek, 41 IBLA 296 (June 29, 1979)

PREFERENCE RIGHT APPLICANTS

The regulations require that a qualified applicant for a sec. 15 grazing lease be engaged in the livestock business and have a need for the land. Therefore, unless an applicant owns livestock for business purposes, or is a recognized livestock operator who temporarily or due to circumstances beyond his control does not own any livestock, he is not qualified to be awarded a lease.

Ralph E. Nolan, 19 IBLA 432 (Feb. 14, 1975)

Where a sec. 15 grazing lease is issued to an applicant whose brother is an employee of this Department, and such employee owns stock in the corporation that owns the contiguous fee land, control over which the applicant asserts as the basis for his preference right to the grazing lease, such applicant cannot be granted the desired grazing lease. Any such lease must be canceled when the facts are called to the Department's attention. This result occurs under 43 CFR 7.2 and 7.3 which prohibit any employee from acquiring or retaining any interest in the lands or resources administered by the Bureau of Land Management. The prohibition extends to any interest in land which in any manner is connected with or involves the use of the grazing resources administered by the Bureau of Land Management.

GRAZING LEASES--Continued

PREFERENCE RIGHT APPLICANTS--Continued

Donald E. and Nancy P. Jansen (On Reconsideration), 19 IBLA 154 (Mar. 14, 1975) 82 I.D. 93

Where the record does not clearly show whether either or both of two grazing lease applicants are preference right applicants and does not reflect consideration of all of the factors mandated by 43 CFR 4121.2-1(d)(2) for evaluating conflicting grazing lease applications, a decision awarding the lease to one of the parties will be set aside and the case remanded for further consideration.

Elmer M. Johnson, 20 IBLA 111 (Apr. 25, 1975)

A district manager's renewal of a grazing lease and the denial of a conflicting lease application will not be disturbed where both applicants have equal preference rights and the award was based upon the regulatory criterion of historical use and there are no convincing reasons warranting a change of lessee.

George Annis, 20 IBLA 115 (Apr. 25, 1975)

The regulations governing Departmental employees' rights to hold a direct or indirect interest in public lands must be construed *in pari materia* with the regulations governing qualification to hold a grazing lease under sec. 15 of the Taylor Grazing Act, 43 U.S.C. § 315m (1970). A nonemployee may be disqualified from holding a lease by his business relationship with an employee if the issuance of the lease would create an interest in public land proscribed by regulation.

Donald E. and Nancy P. Jansen (On Reconsideration), 23 IBLA 374 (Feb. 4, 1976)

In order to qualify as a preference right applicant for a grazing lease on public land under sec. 15 of the Taylor Grazing Act, the applicant must own or lawfully occupy contiguous private land the proper use of which requires issuance of a grazing lease. Use or occupancy of contiguous public land under a sec. 15 grazing lease does not, by itself, qualify to establish a preference right over contiguous owners or lawful occupants of private lands. The fact an applicant once owned contiguous land and had a lease for the land is irrelevant in determining his present preference status.

Ralph O. Lorenz, 24 IBLA 1 (Feb. 4, 1976)

A district manager's renewal of a grazing lease and the denial of a conflicting lease application will not be disturbed where both applicants have equal preference rights and the award was based upon regulatory criteria including historical use and needs of the applicants, and there are no convincing reasons warranting a change of lessee.

Wesley Leininger, 28 IBLA 93 (Nov. 15, 1976)

GRAZING LEASES--Continued

PREFERENCE RIGHT APPLICANTS--Continued

A preference right applicant is properly determined to have lost control of non-Federal leased lands which constitute the basis for the preference and thereafter his sec. 15 grazing lease is subject to cancellation where (1) the lessor of the preference land notifies the BLM that the applicant's private lease has been terminated for delinquent rental; (2) the provisions of the private lease on record with the BLM clearly indicate the lessor has ample authority to cancel that lease at his discretion; and (3) after confrontation with these circumstances by a BLM show cause notice, the applicant does not deny he has lost control of his base lands, nor does he provide positive or substantive evidence that he still controls the private leased base lands.

Charles A. Mitchell, Jr., 30 IBLA 1 (Apr. 1, 1977)

In order to qualify as a preference right applicant for a grazing lease on public land under sec. 15 of the Taylor Grazing Act, the applicant must own or control contiguous or cornering private land, the proper use of which requires issuance of a grazing lease. The fact that an applicant once owned contiguous land and had a lease for the public land is irrelevant in determining his present preference status.

Where an area manager's decision divides the sec. 15 grazing use of a tract of public land between two applicants on the assumption that both are qualified preference right claimants, and it is determined on appeal that one claimant is not qualified, the decision will be set aside and the case remanded to the Bureau of Land Management for determination of the rights of the other applicant.

Mark E. Trask, 32 IBLA 395 (Nov. 9, 1977)

Priority of filing is not one of criteria listed in 43 CFR 4121.2-1(d)(2) for adjudicating conflicting grazing lease applications. Therefore, one appellant's filing for lease before other appellant gives former no rights superior to latter's.

Where record indicates no dispute that there was grazing use of public lands in issue from 1951 to 1975 by current grazing lease applicant's predecessors in interest, followed by 1-year hiatus in valid grazing use prior to current applicant's filing for lease, since length of hiatus was reasonable under circumstances, and since general intention of historical use criterion in 43 CFR 4121.2-1(d)(2) was not contradicted during break in valid grazing use, BLM was not arbitrary in applying historical use criterion in favor of one applicant in a case involving conflicting grazing lease applications. Here, hiatus was approximately one grazing season and was occasioned by purchase at foreclosure sale of preference lands by first mortgagee, who conveyed those lands 1 year later to current applicant, a grazing operator.

Considering record as a whole, Board concludes that neither of appellants has shown that District Office decision apportioning, on basis of historical use in favor of one appellant and topography in favor of other appellant, grazing lands between two lease applicants was arbitrary or capricious, or without rational basis, or inequitable.

John Rattray, Elmer L. Wilson, 36 IBLA 202 (Aug. 21, 1978)

Where two conflicting grazing lease applications are filed under the Taylor Grazing Act, *as amended*, 43 U.S.C. § 315m (1976), and one applicant owns base property of 320 acres which supports a preference right for the grazing lease, which base property the other applicant formerly leased from a previous owner to support a grazing lease, the grazing lease is properly issued to the applicant who is the present owner of the base property because such property has historically been used in connection with that grazing lease and the base controlled by the other applicant is only 80 acres.

Ted Crum, 40 IBLA 129 (Mar. 28, 1979)

Where two preference right applicants file conflicting applications for a grazing lease, sec. 402(c) of FLPMA, 43 U.S.C. § 1752(c) (1976), mandates issuance of the new lease to the holder of the expiring lease provided that the holder of the expiring lease maintains his or her preference right qualifications and is otherwise in conformance with the applicable rules and regulations.

Earl W. Platt, 43 IBLA 81 (Sept. 18, 1979) 86 I.D. 458

RENEWAL

A district manager's renewal of a grazing lease and the denial of a conflicting lease application will not be disturbed where both applicants have equal preference rights and the award was based upon the regulatory criterion of historical use and there are no convincing reasons warranting a change of lessee.

George Annis, 20 IBLA 115 (Apr. 25, 1975)

A decision renewing a sec. 15 grazing lease and rejecting a conflicting application, rendered in compliance with the standard prescribed by 43 CFR 4121.2-1(d)(2), will not be overturned in the absence of convincing reasons that the award is not warranted.

Loyd Cornelison, 24 IBLA 155 (Mar. 15, 1976)

A grazing lease is properly denied when utilization of the leased property could have a substantial adverse effect on the environment and the Bureau of Land Management is under court order forbidding approval of such activity pending the preparation, filing and acceptance of an environmental impact statement.

Robert M. Jones, James E. Jones, 25 IBLA 93 (June 7, 1976)

The regulations do not require that a lessee be given advance notice of nonrenewal of a grazing lease, nor is he entitled to rely upon an asserted assurance that he could have the lease as long as he desired.

It is proper to reject an application for renewal of a grazing lease where the land applied for is of such character that livestock grazing would be detrimental to other uses of the land such as wildlife and recreational uses.

Carl Peterson, 25 IBLA 328 (June 30, 1976)

GRAZING LEASES--Continued

RENEWAL--Continued

Where a reduction in the authorized use of land leased pursuant to sec. 15 of the Taylor Grazing Act is required in order to conform to the actual grazing capacity of the land, the full amount of that reduction must be imposed immediately rather than gradually. Where acceptance of the reduction is made a condition precedent for the approval of an assignment and for the issuance of a new lease, the assignee and prospective lessee will be held to have the same right to appeal the reduction as the original lessee.

Rube W. Evans et al., 26 IBLA 15 (July 7, 1976)

A district manager's renewal of a grazing lease and the denial of a conflicting lease application will not be disturbed where both applicants have equal preference rights and the award was based upon regulatory criteria including historical use and needs of the applicants, and there are no convincing reasons warranting a change of lessee.

Where a district manager renews a grazing lease and denies a conflicting application, he may require as a condition to continuance of the lease that the applicant for the lease renewal fence that portion of National Resource Lands adjacent to land leased by the conflicting applicant, in order to prevent trespass of the livestock belonging to the applicant for the lease renewal.

Wesley Leininger, 28 IBLA 93 (Nov. 15, 1976)

Where by final judgment a court has ordered that until an appropriate environmental impact statement is issued, the Bureau of Land Management will issue authorization for livestock grazing only on an annual basis, a grazing lease can be renewed only on an annual basis, even though the grazing unit has been pledged as security for a bona fide loan.

Ralph H. and Jacqueline L. Rainwater, 31 IBLA 377 (Aug. 8, 1977)

Under sec. 402(c) of the Federal Land Policy and Management Act of 1976, 43 U.S.C.A. § 1752(c) (West Supp. 1977), the holder of an expiring grazing lease receives first priority for the new lease if the requirements of sec. 402(c) are met. Therefore, a conflicting applicant is properly denied the lease where the renewal applicant meets those requirements.

Allen E. Prouse, 32 IBLA 311 (Sept. 30, 1977)
84 I.D. 874

George I. McDonald, Cascade Ranches, Inc., 35 IBLA 75 (May 12, 1978)

Under sec. 402(c) of the Federal Land Policy and Management Act of 1976, 43 U.S.C.A. § 1752(c) (West Supp. 1977), the holder of an expiring lease shall be given first priority for receipt of the new lease as long as the lessee is in compliance with the rules and regulations issued and the terms and conditions in the lease. Therefore, if the holder of an expiring lease loses control of the private property contiguous to public land which gave him a preference right to a lease under 43 CFR 4121.2-1(c), he is not entitled to first priority for receipt of a new lease.

Mark E. Frank, 32 IBLA 395 (Nov. 9, 1977)

GRAZING LEASES--Continued

RENEWAL--Continued

A decision renewing a grazing lease and rejecting a conflicting application which is rendered in accordance with the governing statutory standard set out in sec. 402(c) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. § 1752(c) (___ Supp. 197_), will not be overturned in the absence of convincing reasons that the award is not warranted.

Past use of public land for grazing in trespass does not constitute cognizable historical use for the purpose of resolving conflicting applications for a grazing lease.

Fancher Bros., 33 IBLA 262 (Jan. 5, 1978)

Where two preference right applicants file conflicting applications for a grazing lease, sec. 402(c) of FLPMA, 43 U.S.C. § 1752(c) (1976), mandates issuance of the new lease to the holder of the expiring lease provided that the holder of the expiring lease maintains his or her preference right qualifications and is otherwise in conformance with the applicable rules and regulations.

Earl W. Platt, 43 IBLA 81 (Sept. 18, 1979) 86 I.D. 476

GRAZING PERMITS AND LICENSES

GENERALLY

A decision denying an application for 100 percent nonuse of grazing privileges and requiring applicants to initiate substantial active use within 2 years or suffer revocation of their base property qualifications will be affirmed where the applicant is not engaged in the livestock business, has not used his grazing privileges for many years, and where nonuse is not necessary for range conservation, animal health, or other justifiable cause.

Floyd and Corwin Silva, 20 IBLA 237 (May 15, 1975)

Where by final judgment a court has determined that an environmental impact statement must be filed under 42 U.S.C. § 4332 (1970) according to a particular schedule for the grazing lease program in a particular area, such an approved schedule will be followed by the Department.

Sidney Brooks et al., 22 IBLA 177 (Sept. 30, 1975)

The term "grazing trespass" as used in the context of the Federal Range Code refers to the grazing of livestock on Federal land without an appropriate license or permit or in violation of the terms and conditions of a license or permit, and not to any other special meaning ascribed under other laws and circumstances if inconsistent with this usage.

Although a respondent in a grazing license trespass hearing brought by the Bureau of Land Management has the right to be represented and aided by legal counsel, the Department has no duty or responsibility under the Constitution or the Administrative Procedure Act to provide such counsel for him.

Where a permittee was found to have committed repeated grazing trespasses, a fine of twice the commercial rate for foraging such animals was warranted in accordance with the regulations.

Where a grazing trespass is willful, grossly negligent, or repeated, disciplinary action in the form of suspension, reduction, or revocation, or denial of renewal of a grazing license or permit may be warranted. The

GRAZING PERMITS AND LICENSES--Continued

GENERALLY--Continued

regulatory factors, together with any mitigating circumstances, should be considered to determine the extent of the reduction or other disciplinary action.

Where the record of a grazing trespass case does not support a finding of mitigating or extenuating circumstances which would warrant changing a 20-percent reduction of a grazing permittee's active use qualifications for two grazing seasons, an administrative law judge's order of such a reduction will be upheld.

Eldon Brinkerhoff, 24 IBLA 324 (Apr. 21, 1976)
83 I.D. 185

Sanctions may not be imposed upon a grazing license pursuant to 43 CFR 4113.1 for certain alleged activity, unless such activity violates the terms or conditions of the license, the Taylor Grazing Act, a provision of 43 CFR Part 4110, or of any approved special rule.

The Secretary of the Interior or his delegate is not obligated to issue a grazing permit or license to an applicant; the issuance of such permits or licenses is committed to agency discretion; therefore, the Secretary may refuse to issue or to renew such license where the applicant, to enhance his grazing operation, has violated the terms of a statute or regulation prohibiting the killing of wildlife.

Renewal of a grazing license by a district manager is not an abuse of discretion where the licensee is accused of illegally killing bald and golden eagles but no administrative hearing or judicial proceeding has yet been held to determine said licensee's guilt, where nonrenewal would not necessarily prevent the licensee from continuing to graze cattle pending disposition of such proceeding, and where the renewed license contains a provision allowing for its reduction, cancellation, or revocation in the event the licensee is found to have illegally killed eagles after an administrative or judicial proceeding.

Where the transferee of a grazing license has knowledge that such license might be in jeopardy because of illegal activities allegedly involving his transferor, a hearing to determine the guilt of the transferor would serve no useful purpose where the alleged principal culprit of the illegal activities is dead, all criminal charges against the transferor have been dismissed, and the transfer itself does not appear to have been made to escape the imposition of sanctions.

National Wildlife Federation (Appellant) v. Bolton Ranch, Inc. (Respondent), 24 IBLA 391 (May 3, 1976)

Where the number of cattle grazing on the Federal range exceeds the number allowed by license and such excess is attributable solely to appellants' lack of control over their cattle and their lack of diligence in taking corrective action after being informed by the Bureau that the excess existed, a finding of willful trespass is warranted.

Cesar and Robert Siard, 26 IBLA 29 (July 8, 1976)

A district manager's decision denying a grazing permit for 10 domestic horses, based on the fact that such a denial was required for proper range management and for protection of wild horses under the Wild Free-Roaming Horses and Burros Act, 85 Stat. 649-51, will be overruled where evidence presented at a hearing shows that granting the permit will not interfere with BLM's management of the wild horses under the Act.

Chester Baker, 26 IBLA 257 (Aug. 18, 1976)

GRAZING PERMITS AND LICENSES--Continued

GENERALLY--Continued

A grazing permittee under sec. 3 of the Taylor Grazing Act does not have an absolute right to a permit renewal even though denial thereof will impair the value of his grazing unit which is pledged as security for a bona fide loan. The Department may refuse to renew such a permit when the public interest requires that the subject land be preserved from unnecessary injury, exchanged, disposed of, or reclassified for alternate public use. Similarly, if the Department may deny renewal outright under the above circumstances, the Department may renew such a permit for a lesser term than previously allowed pending completion of a Management Framework Plan and an Allotment Management Plan which are oriented not only to livestock grazing, but also to multiple use management which includes such concerns as land and water conservation, environmental protection, and other resource management objectives which can be achieved by reclassification of national resource lands and manipulation of grazing activity.

"Such permit" as used in sec. 3 of the Taylor Grazing Act, 43 U.S.C. § 315b (1970), providing for a renewal of a grazing permit does not mean only a permit identical with the terms and provisions of the original.

Where by final judgment a court has ordered that until an appropriate environmental impact statement is issued the BLM will issue authorization for livestock grazing only on an annual basis, a grazing permit can be renewed for only 1 year, even though the grazing unit has been pledged as security for a bona fide loan.

[illegible] Ranch, Inc., 27 IBLA 340 (Nov. 4, 1976) 83 I.D. 582

Where a range survey was conducted giving no consideration to annual forage growth and there is evidence that annual forage plants, at times, comprise up to 50 percent of the available forage; that cattle prefer annual forage; that some annual forage was available even in the very dry survey year; annual forage growth should be considered in determining the carrying capacity of the Federal range.

Rachel [illegible], [illegible] and [illegible],
28 IBLA 264 (Dec. 20, 1976)

An agreement between the BLM, a State Cooperative State Grazing District, and an individual permittee allocating a share of the Federal range for which base properties are qualified does not create a vested right to grazing privileges in the licensee or permittee, but the grazing privileges remain subject to the Federal Range Code.

Where an agreement with State agencies and the BLM is made subject to all the provisions of the Federal Range Code, the provisions of the Range Code pertaining to the transfer of range privileges and loss of base property are controlling.

Where the base property to which grazing privileges are attached is National Wildlife Range administered by the U.S. Fish and Wildlife Service, which leases the property through cooperative farming agreements to private individuals for farming, FWS's determination of who is its lessee must be accepted by the BLM.

The issuance of a grazing license for the next grazing year to a new lessee for lands in a National Wildlife Range administered by the United States Fish and Wildlife Service is not premature when the FWS has stated that the existing lease has been terminated and a new one for the next year issued to the new licensee.

The issuance of a grazing license to an applicant who controls base property, to which grazing privileges

GRAZING PERMITS AND LICENSES--Continued

GENERALLY--Continued

have been historically attached, and who can demonstrate that he has a year round operation, is not arbitrary or capricious.

Allan Stratman (President), Two Crow Land & Cattle Co. and William Bow, Jr. (Manager), Two Crow Ranch Corp. (Appellants) v. Bureau of Land Management (Respondent), William Harris (Intervenor), 30 IBLA 203 (May 31, 1977)

In an appeal before an administrative law judge of a decision adversely affecting the interests of a grazing licensee, upon the failure of the licensee to appear and to present his case, the administrative law judge may properly dismiss the licensee's grazing appeal with prejudice pursuant to 43 CFR 4.474(b).

Fillmore Ranches, 30 IBLA 282 (June 1, 1977)

Where there is a final administrative determination of the assessment of damages for a grazing trespass by a licensee, no license or permit should thereafter be issued or renewed until payment of the assessed amount.

Under the Supremacy Clause, U.S. Const., art. VI, cl. 2, Federal laws, including Federal grazing regulations, override conflicting State laws with respect to public lands.

Bureau of Land Management v. Ross Babcock, 32 IBLA 174 (Sept. 15, 1977) 84 I.D. 475

Holders of grazing permits under sec. 3 of the Taylor Grazing Act whose permits give them grazing rights for public lands which are subsequently traversed by a power line right-of-way grant have standing to appeal the decision granting the right-of-way.

David Smith Ranches et al. (Appellants), Colorado Ute Electric Ass'n, Inc. (Intervenor), 33 IBLA 7 (Nov. 15, 1977)

A decision of a district manager to consolidate and assign fence maintenance responsibilities to various grazing permittees will be upheld on appeal where a permittee attacking such decision fails to establish that the assignment was arbitrary and capricious.

Bert N. Smith, Paul N. Smith v. Bureau of Land Management et al., 36 IBLA 47 (June 30, 1978)

Where BLM reduced grazier's privileges because of his loss of ownership of base property from which his qualifications had not in fact been transferred away for attachment to other property owned by grazier, equitable estoppel is not invoked against BLM since grazier by his own testimony at hearing showed that he was not ignorant of true facts as to lack of transfer back of grazing qualifications and that he did not in fact rely to his detriment on BLM official's representations on that transfer back.

Duane J. Rasmussen, 36 IBLA 90 (July 13, 1978)

A decision made under 43 CFR 4.470 *et seq.* regarding future use of the Federal Range will be set aside if it is necessary that issues involved therein be considered under regulations newly promulgated pursuant to Federal Land Policy and Management Act of 1976.

United States v. View Point Ranches, 37 IBLA 357 (Oct. 31, 1978)

Estoppel to preclude a charge of trespass is not invoked against BLM where BLM's partially completed fences on Federal land do not restrain cattle and there is no evidence that BLM agreed to construct and/or maintain said fences for the benefit of the grazier, and such grazier was at all times aware of these facts.

The grazing regulations (43 CFR 4140.1(b)(1), *inter alia*) (formerly 43 CFR 4112.3-1(a) and (b)) place the responsibility of controlling cattle squarely on the grazier, and Government range management policies as implemented under acts of Congress cannot be asserted to bar sanctions where trespasses have been proved, or to estop BLM from alleging trespasses.

An administrative law judge's finding that trespasses were willful, grossly negligent, and repeated will not be disturbed on appeal where the record amply supports such finding.

Where penalties imposed by two administrative law judges for trespasses are supported by the records and comport with the prescriptions of the regulations they will not be modified on appeal except insofar as they conflict with respect to a particular grazier in a particular grazing district.

Bureau of Land Management v. Holland Livestock Ranch et al., 39 IBLA 272 (Feb. 15, 1979) 86 I.D. 133

Where an applicant for a range improvement project involving alteration of the Native range by reseeding with non-Native species and requiring the expenditure of a large sum of public funds does not show that there is an urgent situation requiring immediate improvement of the range as proposed, a decision by the BLM range manager denying the application because management framework and allotment management plans have not been formulated is properly affirmed, as, ordinarily, such a venture should not be undertaken without the type of information these plans are intended to provide.

Lloyd Sorensen, Von L. Sorensen, Kenneth Jones, 41 IBLA 354 (July 20, 1979)

Past trespass, trespass damages, and trespass settlements may properly be considered in determining whether trespasses are repeated for the purpose of computing the damages to be assessed.

Bureau of Land Management v. Harris Brothers, 42 IBLA 46 (July 31, 1979)

ADJUDICATION

A decision by a district manager denying a requested award of grazing privileges must state the reasons therefore, and not simply the conclusion that the applicant is not qualified.

Ervin J. Crowder, 20 IBLA 305 (May 30, 1975)

GRAZING PERMITS AND LICENSES--Continued

ADJUDICATION--Continued

An application for grazing privileges based on newly discovered past grazing qualifications is properly rejected when licenses and permits have been issued for more than 3 consecutive years based on the allotment adjudication from which the application at issue seeks to deviate. 43 CFR 4115.2-1(e)(13)(i).

Phil J. Hillberry, 24 IBLA 283 (Mar. 31, 1976)

An adjudication of grazing privileges will not be set aside on appeal if it is reasonable and substantially complies with the provisions of the Federal Range Code for Grazing Districts, 43 CFR Part 4110.

Rachel Ballow, Henry A. Rice and Sam J. Johnson,
28 IBLA 264 (Dec. 20, 1976)

Where an applicant for grazing privileges does not show the type of misconduct which would be a basis for estoppel against the Government, the provisions of 43 CFR 4115.2-1(e)(9)(i) and (e)(13)(i) cannot be waived on the basis of such misconduct.

Where base property qualifications have been recognized and grazing licenses thereon have been granted for 3 or more consecutive years to a third party, an applicant is barred by 43 CFR 4115.2-1(e)(13)(i) from seeking readjudication, although the Bureau of Land Management has the authority under subsec. (e)(13)(ii) to make adjustments when necessary to comply with the Federal Range Code for Grazing Districts.

Upon failure to apply for base property qualifications for 2 consecutive years, under 43 CFR 4115.2-1(e)(9)(i) an applicant loses any claim to grazing privileges which he had transferred to another, where the exceptions in the section are not applicable.

Upon approval of an application for transfer of class 1 qualifications, the transfer is effective as of the date of filing of the application, and the base property from which the transfer is made thereupon loses its qualifications to the extent indicated in the transfer.

A. D. Findley (Appellant), Vermillion Cliff Cattle Co. (Intervenor), 29 IBLA 262 (Mar. 25, 1977)

A decision made under 43 CFR 4.470 *et seq.* regarding future use of the Federal Range will be set aside if it is necessary that issues involved therein be considered under regulations newly promulgated pursuant to Federal Land Policy and Management Act of 1976.

United States v. View Point Ranches, 37 IBLA 357
(Oct. 31, 1978)

ADMINISTRATIVE LAW JUDGE

In an appeal before an administrative law judge of a decision adversely affecting the interests of a grazing licensee, upon the failure of the licensee to appear and to present his case, the administrative law judge may properly dismiss the licensee's grazing appeal with prejudice pursuant to 43 CFR 4.474(b).

Fillmore Ranches, 30 IBLA 202 (June 1, 1977)

GRAZING PERMITS AND LICENSES--Continued

ADMINISTRATIVE LAW JUDGE--Continued

Administrative hearings required in grazing trespass cases are not an unlawful exercise of judicial power and meet constitutional requirements and the standards of the Administrative Procedure Act. The constitutional requirement of due process is not violated merely because an administrative law judge is employed by the Department of the Interior.

Bureau of Land Management v. Ross Babcock, 32 IBLA 174
(Sept. 15, 1977) 84 I.D. 475

APPEALS

The doctrine of administrative finality, the administrative counterpart of res judicata, ordinarily bars reopening the issue of a permittee's class 1 base property qualifications resolved in a prior Departmental decision, but will not prevent modification of a decision to correct a conclusion inconsistent with the legal ruling of the case and apparently the result of an oversight as to the basis of the factual finding upon which it relies.

E. T. Cowgill et al., 19 IBLA 274 (Apr. 7, 1975)

While 43 CFR 4.470(b) bars subsequent challenge to "matters adjudicated" in a final decision of a District Manager when no appeal of that decision is undertaken, the presence or absence of excess forage in successive growing seasons is not a matter subject to this prohibition.

A decision by a district manager denying a requested award of grazing privileges must state the reasons therefore, and not simply the conclusion that the applicant is not qualified.

Ervin J. Crowder, 20 IBLA 305 (May 30, 1975)

Appellant's earlier failure to protest and appeal a decision rejecting his challenge to another grazier's base property commensurability rating, bars him from appealing a subsequent decision rejecting an application containing the same challenge.

A district manager's failure to hold an Advisory Board meeting on a grazing applicant's protest is mooted by a subsequent regulatory amendment terminating graziers' rights to an Advisory Board meeting on protests. In any event, the case would not be remanded for such a meeting when there is no prejudice because the applicant is foreclosed by the grazing regulations from the possibility of prevailing on his protest.

Phil J. Hillberry, 24 IBLA 283 (Mar. 31, 1976)

The right to appeal a decision of a district manager is not necessarily limited to an applicant for a grazing license or permit, but may belong to "any other person" adversely affected by such decision. 43 CFR 4.470(a) and (b).

Any other person within the context of 43 CFR 4.470 includes one who has standing to protest or appeal a decision of the district manager. An organization which alleges that one or more of its members has been adversely affected by such a decision may be considered "any other person" within the meaning of the regulation.

National Wildlife Federation (Appellant) v. Eclipse Ranch, Inc. (Respondent), 24 IBLA 341 (May 3, 1976)

GRAZING PERMITS AND LICENSES--Continued

APPEALS--Continued

In an appeal before an administrative law judge of a decision adversely affecting the interests of a grazing licensee, upon the failure of the licensee to appear and to present his case, the administrative law judge may properly dismiss the licensee's grazing appeal with prejudice pursuant to 43 CFR 4.474(b).

Fillmore Ranches, 30 IBLA 282 (June 1, 1977)

When a Federal grazing permittee signs a written trespass settlement and pays, without protest, the amount claimed by BLM in connection with such settlement, the issue of that trespass cannot later be reopened at a hearing before an administrative law judge.

Cloverleaf Land and Livestock Co., 34 IBLA 113 (Feb. 28, 1978)

A decision of a district manager to consolidate and assign fence maintenance responsibilities to various grazing permittees will be upheld on appeal where a permittee attacking such decision fails to establish that the assignment was arbitrary and capricious.

Bert N. Smith, Paul N. Smith v. Bureau of Land Management et al., 36 IBLA 47 (June 30, 1978)

An appeal from a decision of an administrative law judge dismissing an appeal relating to grazing privileges for failure to state clearly and concisely the reasons for appeal will be dismissed where appellant does not clearly show error in the decision being appealed.

Kendall Brady, 42 IBLA 361 (Aug. 31, 1979)

BASE PROPERTY (LAND)

Generally

The doctrine of administrative finality, the administrative counterpart of res judicata, ordinarily bars reopening the issue of a permittee's class 1 base property qualifications resolved in a prior Departmental decision, but will not prevent modification of a decision to correct a conclusion inconsistent with the legal ruling of the case and apparently the result of an oversight as to the basis of the factual finding upon which it relies.

T. T. Cowgill et al., 19 IBLA 274 (Apr. 7, 1975)

An application for grazing privileges based on newly discovered past grazing qualifications is properly rejected when licenses and permits have been issued for more than 3 consecutive years based on the allotment adjudication from which the application at issue seeks to deviate. 43 CFR 4115.2-1(e)(13)(i).

Phil J. Hillberry, 24 IBLA 263 (Mar. 31, 1976)

Land within a National Wildlife Range administered by the United States Fish and Wildlife Service and leased to individuals through a cooperative farming agreement is privately controlled land within the meaning of the pertinent regulations and qualifies base property.

GRAZING PERMITS AND LICENSES--Continued

BASE PROPERTY (LAND)--Continued

Generally--Continued

Allen Strateman (President), Two Crow Land & Cattle Co., and William Roe, Jr. (Manager), Two Crow Ranch Corp. (Appellants) v. Bureau of Land Management (Respondent), William Harris (Intervenor), 30 IBLA 243 (May 31, 1977)

Ownership or Control

Under 43 CFR 4115.2-1(e)(8), loss of ownership or control of base property results in the termination of grazing privileges based on such property so that thereafter it is not possible to obtain a transfer of the privileges to other property owned by the lessee.

Charles Stewart, 26 IBLA 160 (Aug. 4, 1976)

Where an agreement with State agencies and the BLM is made subject to all the provisions of the Federal Range Code, the provisions of the Range Code pertaining to the transfer of range privileges and loss of base property are controlling.

Under 43 CFR 4115.2-1(e)(8) loss of base property results in the termination of grazing privileges based thereon so that thereafter it is not possible to obtain the transfer of the privileges to other property owned by the licensee.

Allen Strateman (President), Two Crow Land & Cattle Co., and William Roe, Jr. (Manager), Two Crow Ranch Corp. (Appellants) v. Bureau of Land Management (Respondent), William Harris (Intervenor), 30 IBLA 243 (May 31, 1977)

The loss of ownership or control of base property results in the loss of grazing privileges attached thereto and requires the cancellation of the license, in the absence of a timely application for transfer of grazing privileges to new base property.

Fillmore Ranches, 30 IBLA 282 (June 1, 1977)

Provision of 43 CFR 4115.2-1(e)(8)(i) for termination of grazing permit upon permittee's loss of ownership or control of base property is mandatory.

Roger J. Rasmussen, 36 IBLA 98 (July 13, 1978)

Where a grazing permittee owned base property taken in condemnation proceedings by the United States, but a Federal district court has stayed the United States from taking exclusive possession of the property and granted joint possession to the condemnor agency and the permittee pending disposition of an appeal on a motion to revest the property in the permittee, implementation of a decision canceling grazing privileges for loss of control of base property under 43 CFR 4110.1 (1977) will be stayed in accordance with the court order.

Bureau of Land Management v. William J. Thomas, 41 IBLA 110 (June 11, 1979)

GRAZING PERMITS AND LICENSES--Continued

BASE PROPERTY (LAND)--Continued

Transfers

Under 43 CFR 4115.2-1(e)(8), loss of ownership or control of base property results in the termination of grazing privileges based on such property so that thereafter it is not possible to obtain a transfer of the privileges to other property owned by the lessee.

Charles Stewart. 26 IBLA 160 (Aug. 4, 1976)

Where an agreement with State agencies and the BLM is made subject to all the provisions of the Federal Range Code, the provisions of the Range Code pertaining to the transfer of range privileges and loss of base property are controlling.

Under 43 CFR 4115.2-1(e)(8) loss of base property results in the termination of grazing privileges based thereon so that thereafter it is not possible to obtain the transfer of the privileges to other property owned by the licensee.

Where an applicant for a transfer of grazing privileges attached to base property is not a lessee without whose own operations the qualifications of the base property would not have been established, the consent of the owner of the property is required and where the United States Fish and Wildlife Service owns or controls the base properties, its consent is required.

Allan Stratman (President), Two Crow Land & Cattle Co. and William Roe, Jr. (Manager), Two Crow Ranch Corp. (Appellants) v. Bureau of Land Management (Respondent), William Harris (Intervenor). 30 IBLA 263 (May 31, 1977)

A timely transfer of grazing license privileges to new base property may be made only while the original base property is within the ownership or control of the licensee, and transfer may not be made following sale of the original property.

Fillmore Ranches. 30 IBLA 282 (June 1, 1977)

BASE PROPERTY (WATER)

Where base property qualifications have been recognized and grazing licenses thereon have been granted for 3 or more consecutive years to a third party, an applicant is barred by 43 CFR 4115.2-1(e)(13)(i) from seeking readjudication, although the Bureau of Land Management has the authority under subsec. (e)(13)(ii) to make adjustments when necessary to comply with the Federal Range Code for Grazing Districts.

Upon failure to apply for base property qualifications for 2 consecutive years, under 43 CFR 4115.2-1(e)(9)(i) an applicant loses any claim to grazing privileges which he had transferred to another, where the exceptions in the section are not applicable.

Upon approval of an application for transfer of class 1 qualifications, the transfer is effective as of the date of filing of the application, and the base property from which the transfer is made thereupon loses its qualifications to the extent indicated in the transfer.

R. G. Fielder (Appellant), Vermillion Cliff Cattle Co. (Intervenor). 29 IBLA 262 (Mar. 25, 1977)

GRAZING PERMITS AND LICENSES--Continued

CANCELLATION OR REDUCTION

A decision denying an application for 100 percent nonuse of grazing privileges and requiring applicants to initiate substantial active use within 2 years or suffer revocation of their base property qualifications will be affirmed where the applicant is not engaged in the livestock business, has not used his grazing privileges for many years, and where nonuse is not necessary for range conservation, animal health, or other justifiable cause.

Floyd and Corwin Silva. 30 IBLA 237 (May 17, 1977)

The term "two consecutive years" in 43 CFR 4115.2-1(e)(9) means 2 consecutive application years from the date established by a district manager as the deadline for filing grazing applications.

Under 43 CFR 4115.2-1(e)(9), cancellation of a grazing license is proper when a user of the Federal range fails to include in an application for grazing license renewal, the base property qualifications (for active, nonuse, or combination thereof) on or before the duly established filing date for two consecutive grazing seasons, regardless of whether the lands surrounding the leased lands are controlled by licensee and his relatives.

John Rudzroth. 21 IBLA 91 (June 27, 1975)

Where a grazing trespass is willful, grossly negligent, or repeated, disciplinary action in the form of suspension, reduction, or revocation, or denial of renewal of a grazing license or permit may be warranted. The regulatory factors, together with any mitigating circumstances, should be considered to determine the extent of the reduction or other disciplinary action.

Where the record of a grazing trespass case does not support a finding of mitigating or extenuating circumstances which would warrant changing a 20-percent reduction of a grazing permittee's active use qualifications for two grazing seasons, an administrative law judge's order of such a reduction will be upheld.

Eldon Brinkerhoff. 24 IBLA 324 (Apr. 21, 1976)
83 I.D. 185

Under 43 CFR 4115.2-1(e)(8), loss of ownership or control of base property results in the termination of grazing privileges based on such property so that thereafter it is not possible to obtain a transfer of the privileges to other property owned by the lessee.

Even if it be established that the Department had not applied in other cases regulation 43 CFR 4115.2-1(e)(8), which requires termination of grazing privileges upon loss of ownership or control of base property, such failure to apply the regulation is not authority to further disregard the regulation.

Prior recognition of grazing privileges based on licensee's erroneous statement of ownership of base property does not estop the Department from canceling the privileges when it becomes aware of the facts.

Charles Stewart. 26 IBLA 160 (Aug. 4, 1976)

A grazing permittee under sec. 3 of the Taylor Grazing Act does not have an absolute right to a permit renewal even though denial thereof will impair the value of his grazing unit which is pledged as security for a bona fide loan. The Department may refuse to renew such a permit when the public interest requires that the subject land be preserved from unnecessary injury, exchanged, disposed of, or reclassified for alternate

GRAZING PERMITS AND LICENSES--Continued

CANCELLATION OR REDUCTION--Continued

public use. Similarly, if the Department may deny renewal outright under the above circumstances, the Department may renew such a permit for a lesser term than previously allowed pending completion of a Management Framework Plan and an Allotment Management Plan which are oriented not only to livestock grazing, but also to multiple use management which includes such concerns as land and water conservation, environmental protection, and other resource management objectives which can be achieved by reclassification of national resource lands and manipulation of grazing activity.

Hat Ranch, Inc., 27 IBLA 340 (Nov. 4, 1976) 83 I.D. 542

The loss of ownership or control of base property results in the loss of grazing privileges attached thereto and requires the cancellation of the license, in the absence of a timely application for transfer of grazing privileges to new base property.

Fillmore Ranches, 30 IBLA 282 (June 1, 1977)

Under 43 CFR 9239.3-2(e), the repetitive nature of grazing trespasses coupled with a negligent failure of licensee to take corrective action supports a finding of willful trespass.

Calvin C. Johnson, 35 IBLA 306 (June 2, 1978)

Provision of 43 CFR 4115.2-1(e)(8)(i) for termination of grazing permit upon permittee's loss of ownership or control of base property is mandatory.

Roger J. Rasmusson, 36 IBLA 98 (July 13, 1978)

An administrative law judge's finding that trespasses were willful, grossly negligent, and repeated will not be disturbed on appeal where the record amply supports such finding.

Where penalties imposed by two administrative law judges for trespasses are supported by the records and comport with the proscriptions of the regulations they will not be modified on appeal except insofar as they conflict with respect to a particular grazier in a particular grazing district.

Bureau of Land Management v. Holland Livestock Ranch et al., 39 IBLA 272 (Feb. 15, 1979) 86 I.D. 133

FEDERAL RANGE CODE

Where base property qualifications have been recognized and grazing licenses thereon have been granted for 3 or more consecutive years to a third party, an applicant is barred by 43 CFR 4115.2-1(e)(13)(i) from seeking readjudication, although the Bureau of Land Management has the authority under subsec. (e)(13)(ii) to make adjustments when necessary to comply with the Federal Range Code for Grazing Districts.

Upon failure to apply for base property qualifications for 2 consecutive years, under 43 CFR 4115.2-1(e)(9)(i) an applicant loses any claim to grazing privileges which he had transferred to another, where the exceptions in the section are not applicable.

Upon approval of an application for transfer of class 1 qualifications, the transfer is effective as of the date of filing of the application, and the base property from which the transfer is made thereupon loses its qualifications to the extent indicated in the transfer.

A. C. Findley (Appellant), Vermillion Cliff Cattle Co. (Intervenor), 29 IBLA 262 (Mar. 25, 1977)

A decision made under 43 CFR 4.470 et seq. regarding future use of the Federal Range will be set aside if it is necessary that issues involved therein be considered under regulations newly promulgated pursuant to Federal Land Policy and Management Act of 1976.

United States v. View Point Ranches, 37 IBLA 357 (Oct. 31, 1978)

HEARINGS

In an appeal before an administrative law judge of a decision adversely affecting the interests of a grazing licensee, upon the failure of the licensee to appear and to present his case, the administrative law judge may properly dismiss the licensee's grazing appeal with prejudice pursuant to 43 CFR 4.474(b).

Fillmore Ranches, 30 IBLA 282 (June 1, 1977)

RANGE SURVEYS

A determination by the Bureau of Land Management of the carrying capacity of a unit of the Federal range based on a range survey will not be disturbed in the absence of positive evidence of error.

Rachel Ballow, Henry A. Rice and Sam J. Johnson, 28 IBLA 264 (Dec. 20, 1976)

TRESPASS

A cattle trespass decision rendered by an administrative law judge may be set aside and remanded where the decision does not include a statement of findings and conclusions, and the reasons or basis therefor, on all material issues of fact, law or discretion as required for initial decisions under 5 U.S.C. § 557 (1970) and 43 CFR 4.475.

Where a grazing district cattle trespass complaint refers to previous trespasses by the base property owner, he is served with the complaint, and the record indicates he intervened at the hearing thereon but the decision issued makes no mention thereof, the decision appealed from may be set aside and remanded for clarification.

United States v. John J. Casey, 22 IBLA 358 (Nov. 14, 1975) 82 I.D. 546

The term "grazing trespass" as used in the context of the Federal Range Code refers to the grazing of livestock on Federal land without an appropriate license or permit or in violation of the terms and conditions of a license or permit, and not to any other special meaning ascribed under other laws and circumstances if inconsistent with this usage.

Where a permittee was found to have committed repeated grazing trespasses, a fine of twice the commercial rate for foraging such animals was warranted in accordance with the regulations.

Where a grazing trespass is willful, grossly negligent, or repeated, disciplinary action in the form of suspension, reduction, or revocation, or denial of renewal

GRAZING PERMITS AND LICENSES--Continued

TRESPASS--Continued

of a grazing license or permit may be warranted. The regulatory factors, together with any mitigating circumstances, should be considered to determine the extent of the reduction or other disciplinary action.

In determining whether grazing trespasses are "willful," intent sufficient to establish willfulness may be shown by proof of facts which objectively show that the circumstances do not comport with the notion that the trespasser acted in good faith or innocent mistake, or that his conduct was so lacking in reasonableness or responsibility that it became reckless or negligent.

Where the record of a grazing trespass case does not support a finding of mitigating or extenuating circumstances which would warrant changing a 20-percent reduction of a grazing permittee's active use qualifications for two grazing seasons, an administrative law judge's order of such a reduction will be upheld.

Eldon Brinkerhoff, 24 IBLA 324 (Apr. 21, 1976)
83 I.D. 185

Where the number of cattle grazing on the Federal range exceeds the number allowed by license and such excess is attributable solely to appellants' lack of control over their cattle and their lack of diligence in taking corrective action after being informed by the Bureau that the excess existed, a finding of willful trespass is warranted.

Where, in an effort to negotiate a compromise settlement of an alleged grazing trespass, a rancher concedes that the trespass occurred to the extent of a specific number of animal unit months of forage, but the proposed settlement is not consummated and the case goes to a hearing on its merits, evidence of the purported admissions made by the party during such negotiations must be excluded as not competent to show either the fact or the extent of the trespass alleged.

Where it has been determined that a grazing trespass on the Federal range is clearly willful, the value of the forage consumed shall be computed and assessed at $4 per animal unit month, or twice the commercial rate if such amount is higher. Where the commercial rate is $4.90, the assessment of damages shall be at the rate of $9.80 per animal unit month.

Cesar and Robert Siard, 26 IBLA 29 (July 8, 1976)

One who grazes livestock in a grazing allotment without authorization prior to the issuance of a license commits a grazing trespass.

Under existing regulations, where a grazing trespass is not clearly willful, damages are to be computed at the rate of $2 per AUM of Federal forage consumed or the commercial rate, whichever is greater.

Where there is a final administrative determination of the assessment of damages for a grazing trespass by a licensee, no license or permit should thereafter be issued or renewed until payment of the assessed amount.

When 33 percent of the available forage in a grazing allotment is on Federal land and the remainder is on private land, it is appropriate to find that 33 percent of the forage consumed by cattle throughout the allotment was Federal forage, in the absence of evidence to the contrary.

Pursuant to the Property Clause of the U.S. Const. art. IV, § 3, cl. 2, Congress has enacted the Taylor Grazing Act, 43 U.S.C. § 315 et seq. (1970), and other statutory authority which empower the Secretary of the Interior to define what conduct constitutes a grazing trespass and to determine whether or not an individual has committed a trespass.

There is no constitutional right to a jury trial in an administrative proceeding such as a grazing trespass hearing.

Administrative hearings required in grazing trespass cases are not an unlawful exercise of judicial power and meet constitutional requirements and the standards of the Administrative Procedure Act. The constitutional requirement of due process is not violated merely because an administrative law judge is employed by the Department of the Interior.

Where cattle are admitted to an allotment at the beginning of the usual grazing season but prior to the issuance of a license for that season, and payment is later made by a check which recites that it is "payment in full for 1975 grazing fee," the Bureau of Land Management may properly deposit the check, allotting part of the proceeds for the grazing license for the rest of the season, and deposit the remainder of the proceeds in a suspense account pending resolution of the trespass. Such action indicates that the check was not accepted in settlement of the trespass damages, and cashing the check does not constitute an accord and satisfaction of the trespass damages.

Bureau of Land Management v. Ross Babcock, 32 IBLA 174
(Sept. 15, 1977)
84 I.D. 475

Where the owner of base property ranchland formally leases out grazing privileges on his own lands and on appurtenant Federal lands, all stock subsequently grazed by the lessee under the terms of the lease will be attributed to the lessor for purposes of calculating trespass liability.

A BLM decision canceling base property qualifications for allegedly willful and repeated trespass is properly voided on appeal where such violations were not charged in the initial Order to Show Cause, and where such Order to Show Cause was not issued by the State Director as is required by 43 CFR 9239.3-2(e).

The retroactive issuance of a grazing permit for livestock foraging on Federal rangeland will moot a charge of trespass to the extent that such permit covers the same days, livestock, and rangelands which are the subject of the trespass charge.

Cloverleaf Land and Livestock Co., 34 IBLA 113
(Feb. 28, 1978)

Under 43 CFR 9239.3-2(e), the repetitive nature of grazing trespasses coupled with a negligent failure of licensee to take corrective action supports a finding of willful trespass.

On appeal from a show cause proceeding under 43 CFR 9239.3-2(e), a requirement for ear-tagging of cattle recommended by a district manager and imposed by an administrative law judge will be set aside where the grazer objected thereto and was not accorded proper opportunity to offer evidence thereon. 43 CFR 4112.3-2(a)(4).

Calvin C. Johnson, 35 IBLA 306 (June 2, 1978)

GRAZING PERMITS AND LICENSES--Continued

TRESPASS--Continued

Where the alleged trespasser makes no allegations of a specific and substantial nature regarding whether or not a trespass has in fact occurred, the procedure authorized by 43 CFR 9239.3-2(c)(4) limiting a hearing "to the determination of the amount of damages, value of the forage consumed, and any other amounts considered to be due the United States as a result of said trespass" does not result in a denial of due process.

A hearing on the issue of whether or not a trespass was willful or not clearly willful is authorized by 43 CFR 9239.3-2(c)(4) because a finding on this issue affects the rate at which the value of the forage consumed shall be computed pursuant to 43 CFR 9239.3-2(c)(2).

In determining whether grazing trespasses are willful, intent sufficient to establish willfulness may be shown by proof of facts which objectively show that the circumstances do not comport with the notion that the trespasser acted in good faith or innocent mistake or that his conduct was so lacking in reasonableness or responsibility that it became reckless or negligent.

Since a grazing trespass is not a criminal proceeding, it need not be proved beyond a reasonable doubt that a particular individual committed the trespass.

Evidence is insufficient to support a finding of a willful trespass where it fails to show that the alleged trespasser intended to disregard the regulation prohibiting trespass or that he was plainly indifferent to its requirements or that he acted with gross neglect of a known duty.

Where the administrative law judge does not make a finding as to whether a trespass was willful or not clearly willful, the Board of Land Appeals may make this finding based upon the record as if it were sitting as trier of fact.

Where BLM has impounded five horses found to be trespassing on public lands closed to grazing and no notice and hearing are afforded to the owner of said animals prior to impoundment because the owner is unknown to BLM, the due process rights of said owner are not violated. The procedures authorized by 43 CFR 9239.3-2(c)(3) do not violate due process.

The Property Clause of the United States Constitution art. IV, § 3, cl. 2, gives Congress the power over the public lands "to control their occupancy and use, to protect them from trespass and injury and to prescribe the conditions upon which others may obtain rights in them." When Congress so acts, the Federal legislation necessarily overrides conflicting State laws under the Supremacy Clause. U.S. Constitution art. IV, cl. 2.

Fernando Herrera v. Bureau of Land Management, 38 IBLA 262 (Dec. 8, 1978)

Where the evidence as to specific trespass indicates that of a number of cattle counted some were located on private intermingled land, but there were no barriers, either natural or artificial, which would have prevented the cattle on private land from going onto the public land, it is proper to find that all cattle counted would tend to consume forage at a rate proportional to the ratio of forage available on private and public lands.

An administrative law judge's finding that trespasses were willful, grossly negligent, and repeated will not be disturbed on appeal where the record amply supports such finding.

Where penalties imposed by two administrative law judges for trespasses are supported by the records and comport with the proscriptions of the regulations they will not be modified on appeal except insofar as they conflict with respect to a particular grazier in a particular grazing district.

Bureau of Land Management v. Holland Livestock Ranch et al., 39 IBLA 272 (Feb. 15, 1979) 86 I.D. 1

Past trespass, trespass damages, and trespass settlements may properly be considered in determining whether trespasses are repeated for the purpose of computing the damages to be assessed.

Where the evidence shows that the commercial rate for forage ranged from $2.50 to $9.50 per AUM, an Administrative Law Judge's computation of damages, using $3.50 as the base figure, cannot be said to be unreasonable under 43 CFR 9239.3-2 (1976).

Bureau of Land Management v. Harris Brothers, 42 IBLA 4 (July 31, 1979)

HEARINGS

(See also Administrative Procedure, Civil Rights, Endangered Species Conservation Act, Federal Coal Mine Health and Safety Act of 1969, Federal Metal and Nonmetallic Mine Safety Act, Geothermal Leases, Grazing Permits and Licenses, Indian Probate, Mining Claims, Multiple Mineral Development Act, Rules of Practice, Surface Resources Act, Water Pollution Control--if included in this Index.)

Where the party bearing the risk of nonpersuasion does not appear at a hearing ordered pursuant to 43 CFR 4.415, that party's appeal is properly dismissed.

Stanley G. West, 18 IBLA 337 (Jan. 10, 1975)

Where one who protests the performance and acceptance of a survey of land, identified by the cadastral engineer making the survey as public domain land, offers probative evidence that changes arose because of avulsion rather than accretion and so the land is not in fact Federally owned, a hearing will be ordered to receive and consider such evidence and to ascertain the facts.

Joe S. Dent and Delores L. Dent, 18 IBLA 375 (Jan. 30, 1975)

If an applicant for a headquarters site does not allege facts that, if taken as true, show that she uses the site in connection with a trade, manufacture, or other productive industry, the Bureau of Land Management may cancel her claim without a hearing.

LaVeta C. Schoephorster, 19 IBLA 90 (Mar. 3, 1975)

When an appellant asserts facts which do not on their face sustain the contentions on appeal, this Board will deny a request for a hearing to determine the asserted issues of fact. 43 CFR 4.415.

Nola Grace Ptasynski, Barbara C. Lisco, 19 IBLA 129 (Mar. 5, 1975)

HEARINGS--Continued

In connection with a mining claim located on land withdrawn for reclamation and power purposes, where (1) no notice of location was filed during a later period in which the land was open for entry subject to 30 U.S.C. §§ 621, 623-24 (1970), (2) there are no intervening rights, (3) a claimant alleges that he held and worked the land, while open to entry, for the requisite number of years under 30 U.S.C. § 38 (1970) and the applicable state statute of limitations, and (4) he alleges that a discovery of a valuable mineral deposit has been made, it is necessary to consider the effect of § 621 *et seq*., and to hold a hearing if required to resolve questions of fact.

Ralph Page, 19 IBLA 255 (Mar. 31, 1975)

Where at a hearing held pursuant to sec. 2 of the Mining Claims Rights Restoration Act, 30 U.S.C. § 621(b) (1970), the mining claimant, prior to the taking of any evidence, enters into a stipulation while laboring under confusion as to the effect of the stipulation, and the stipulation legally precludes all forms of placer mining on his claim, the decision below relying on the stipulation will be reversed and the case remanded for a full hearing on the merits.

Dwight Brooks, 20 IBLA 100 (Apr. 25, 1975)

Under the Mining Claims Occupancy Act, 30 U.S.C. § 701 *et seq*. (1970), where the record includes a statement as to a principal place of residence which conflicts with a more detailed statement made under oath by the same person, the matter may be remanded for hearing in order to resolve the conflict and protect the rights of a third party.

Dwight H. and Verna K. Huston, 21 IBLA 24 (June 16, 1975)

An applicant for a Native allotment has no right to a hearing, and none is required where there is no offer of proof which indicates that the findings of the State Office were incorrect, or where an offer of evidence is unaccompanied by a satisfactory explanation why it was not submitted to the State Office within the time provided.

Alexandra Atchak, 23 IBLA 81 (Dec. 12, 1975)

A Native allotment applicant is not entitled to a hearing as a matter of right inasmuch as the issuance of an allotment is discretionary with the Secretary of the Interior. A hearing is not appropriate when there is no offer of proof which if established would impel a different legal conclusion.

Kathryn Kluska, 23 IBLA 284 (Jan. 12, 1976)

Under 43 CFR 2802.1-7(e), which provides that charges for use and occupancy of a communication site on public lands may be revised after notice and an opportunity for hearing, it is improper to increase such charges without following the prescribed procedure.

Following a hearing under 43 CFR 2802 1-7, a decision increasing the charges for use and occupancy of a communication site is in error to the extent that the decision is based upon unspecified evidence not in the record and not made known to the user, and the decision must be set aside.

American Telephone and Telegraph Co. et al., 25 IBLA 341 (June 30, 1976)

HEARINGS--Continued

The allowance of a request for a hearing before an administrative law judge in a protest against a survey by the Bureau of Land Management is within the discretion of the Board of Land Appeals. There is no right to such a hearing.

R. A. Mikelson, 26 IBLA 1 (July 6, 1976)

The fact that assessment work has been performed on a mining claim does not estop the Government from determining the validity of a claim by proper proceedings giving adequate notice and an opportunity for a hearing where there are disputed determinative facts. However, where the claim was located after land has been withdrawn from mining, it is proper for the Bureau of Land Management to declare a claim null and void ab initio without a hearing.

Roy R. Cummins, 26 IBLA 223 (Aug. 17, 1976)

Where the Bureau of Land Management determines that an Alaska Native allotment application should be rejected because the land was not used and occupied by the applicant, the BLM shall issue a contest complaint pursuant to 43 CFR 4.451 *et seq*. Upon receiving a timely answer to the complaint, which answer raises a disputed issue of material fact, the Bureau will forward the case file to the Hearings Division, Office of Hearings and Appeals, Department of the Interior, for assignment of an administrative law judge, who will proceed to schedule a hearing at which the applicant may produce evidence to establish entitlement to his allotment.

Donald Peters, 26 IBLA 235 (Aug. 17, 1976)
83 I.D. 308

John Moore et al., 40 IBLA 321 (Apr. 30, 1979)
86 I.D. 279

Under 43 CFR 2802.1-7(e), which provides that charges for a right-of-way on public lands may be revised after notice and an opportunity for hearing, it is improper to increase such charges without following the prescribed procedure.

Paradise Oil, Water and Land Development, Inc., 26 IBLA 374 (Sept. 8, 1976)

Under 43 U.S.C. § 961 (1970) and 43 CFR 2802.1-7(a), an applicant has no right to a hearing in connection with original charges for use and occupancy of a communication site, and a hearing pursuant to a request under 43 CFR 4.415 will not be granted where applicant fails to make specific allegations or offer specific proof to show in what factors a Departmental appraisal is in error.

Mountain States Telephone and Telegraph Co., 26 IBLA 393 (Sept. 16, 1976)
83 I.D. 332

Where an attorney files an answer to a contest concerning mining claims on behalf of certain individuals, who, during the pendency of the contest proceedings, transfer their interests in the mining claims to a corporation of which they are major stockholders and Directors, and the attorney represents those individuals and the corporation at the contest hearing, the corporation is bound by the determination reached therein, even though the corporation may not have received actual notice of the contest.

HEARINGS--Continued

Service of a document upon a person's attorney of record constitutes effective service upon such person.

A request for postponement made more than 10 days prior to a hearing is properly denied where there has been no showing of good cause and proper diligence. A contestee's request for postponement is properly denied when (1) a contestee only seeks postponement in order to pursue an exchange of land for the claims; and (2) the administrative law judge rules that the contestant may seek to dismiss the contest if an exchange is contemplated and the contestant does not wish to abate the contest proceedings.

A request for postponement made at a hearing or within 10 days of a hearing is properly denied where there has been no showing of an extreme emergency which could not have been anticipated and which justifies beyond question the granting of a postponement. This standard is not met by a party's assertion that it has not had adequate opportunity to prepare a defense where such difficulty could have been anticipated before the request was made.

Where a mineral examiner testifies on the basis of his examination of mining claims that the mineral values on the claims are insufficient to support a finding of discovery, a prima facie case against the validity of the claims has been established, and where the contestees walked out of the hearing and did not submit evidence to rebut the prima facie case, the claims must be declared invalid.

United States v. Mine Development Corp. et al., 27 IBLA 238 (Oct. 18, 1976)

Where the Bureau of Land Management orders a resurvey of a section to identify the boundaries of public land within the section, a private landowner may protest the resurvey and, where the protesting landowner points up a serious contradiction between the resurvey and the topographic calls accompanying the original plat, it is proper to remand the case for a fact hearing.

Domenico A. Tussio et al., 30 IBLA 92 (Apr. 29, 1977)

Upon a determination that production has ceased on an oil and gas lease in its extended term by reason of such production because the well on the lease is no longer capable of production in paying quantities, the lessees of record are entitled to notice and an opportunity to request a hearing on the issue of the productive capacity of the well where they have presented evidence raising an issue of fact regarding the status of the well.

Universal Resources Corp. et al., 31 IBLA 61 (June 23, 1977)

The rule of evidence excluding hearsay is not strictly adhered to in administrative proceedings, particularly where the evidence, such as assay reports with a proper foundation concerning the sampling, submission of the samples for assaying, and the reputation of the assayer, is competent and relevant. After such reports are admitted, the factfinder may give them appropriate weight according to the circumstances surrounding the specific report.

United States v. Robert A. Bukke (Registered Agent), Valumines, Inc., et al., 32 IBLA 155 (Sept. 12, 1977)

HEARINGS--Continued

After holding a hearing pursuant to the Administrative Procedure Act, an administrative law judge may properly find that a person has committed a grazing trespass if that finding is in accordance with and supported by reliable, probative, and substantial evidence. Because a grazing trespass proceeding is not a criminal proceeding, it need not be proved beyond a reasonable doubt that a particular individual committed the trespass.

There is no constitutional right to a jury trial in an administrative proceeding such as a grazing trespass hearing.

Administrative hearings required in grazing trespass cases are not an unlawful exercise of judicial power and meet constitutional requirements and the standards of the Administrative Procedure Act. The constitutional requirement of due process is not violated merely because an administrative law judge is employed by the Department of the Interior.

Bureau of Land Management v. Ross Babcock, 32 IBLA 178 (Sept. 15, 1977) 84 I.D. 475

An applicant has no right to a hearing in connection with original Federal charges for use and occupancy of a communication site, and in the absence of any specific assertion showing error in the appraisal, the appraisal will be sustained on appeal if it is properly formulated.

XYZ Television, Inc., 33 IBLA 80 (Dec. 8, 1977)

Although a right-of-way granted under the Act of Jan. 21, 1895, was previously subject to cancellation by the authorized officer for non-use pursuant to 43 CFR 2802.2-3, the Federal Land Policy and Management Act of 1976 provides that suspension or termination of a right-of-way requires an appropriate administrative proceeding pursuant to 5 U.S.C. § 554 (1970), except where the right-of-way provides by its terms that it will terminate in such event.

Western Aggregates of Mineral & Rock, Inc., 34 IBLA 164 (Mar. 14, 1978)

A request for a hearing will be denied in the absence of an assertion of fact which, if proved true, would entitle appellant to the relief sought.

Foote Mineral Co., 34 IBLA 285 (Apr. 17, 1978) 85 I.D. 171

Where the State Office determines that an oil and gas lease committed to a unit has expired at the end of its primary term because there is not within it or the unit a well capable of production in paying quantities, the lessee is entitled to notice and an opportunity for a hearing on that issue where it has presented evidence that raises an issue of fact regarding the status of wells in the unit.

Manhattan Resources, Inc., 34 IBLA 346 (Apr. 26, 1978)

When the United States contests a mining claim for lack of discovery of a valuable mineral deposit, a crucial date for the existence or nonexistence of the discovery is the date of the hearing. Where a mining claimant has shown no justification for her failure to offer evidence of a discovery at the hearing nor shown any likelihood that further evidence could be presented to change the result, a request on appeal for additional time to explore the claim for additional evidence of minerals will be denied, and an administrative law

HEARINGS--Continued

judge's decision declaring the claim null and void will be affirmed.

United States v. Thelma O. Crismon, 34 IBLA 381 (May 2, 1978)

When the Bureau of Land Management has appraised the damages for a mineral trespass under 43 CFR Part 9230, a hearing will not be ordered and an appraisal will not be disturbed in the absence of an offer of specific substantial evidence that the determination is incorrect.

Western Nuclear, Inc., 35 IBLA 146 (May 22, 1978)
85 I.D. 129

Where land has long been devoted to a particular public purpose such as inclusion in a forest reserve, laches may bar an application filed pursuant to the Transportation Act of 1940, 49 U.S.C. § 65(b) (1970) and 43 U.S.C. § 898 (1970), in which case a hearing need not be ordered to determine whether a railroad's purchaser was an innocent purchaser for value.

Southern Pacific Transportation Co., Donald K. Lee, Charles Siller v. United States Forest Service, 35 IBLA 270 (June 2, 1978)

Where the evidence in an administrative appeal raises countervailing legal presumptions of equal probative worth, a factfinding hearing may be ordered pursuant to 43 CFR 4.415.

Donald E. Jordan, 35 IBLA 290 (June 2, 1978)

It requires a substantial showing of bias to disqualify a hearing officer in administrative proceedings or to justify a charge that the hearing was unfair.

United States v. Richard R. Kingdon and Edith F. Kingdon, 36 IBLA 11 (June 27, 1978)

The notice and opportunity for hearing envisaged by 43 CFR 2802.1-7(e) requires at a minimum that the lessee be provided with a copy of the appraisal report, that he be permitted to appear before the decisionmaker, that the decisionmaker not be the person who made or approved the appraisal, and that adequate records of the hearing conducted pursuant to the regulations be maintained.

Circle L, Inc., 36 IBLA 260 (Aug. 15, 1978)

Donald H. Clark, C. Reinhart & Son, Inc., Hartwell Excavating Co., 39 IBLA 182 (Jan. 31, 1979)

Where there exist factual questions about the location of section and subdivisional corners in a dependent resurvey, the Board of Land Appeals may order a hearing pursuant to 43 CFR 4.415 to resolve these questions.

In challenging the Government resurvey, appellant has the burden of establishing by clear and convincing evidence that the resurvey is not an accurate retracement and reestablishment of the lines of the original survey.

Bethel C. Vernon, 37 IBLA 226 (Oct. 16, 1978)

HEARINGS--Continued

A request for a hearing will be denied when the facts are not in dispute and the determination rests on questions of law.

Estate of Charles D. Ashley, 37 IBLA 367 (Nov. 2, 1978)
85 I.D. 403

While the Department has discretion as to whether to grant a hearing to an offeror whose high bid is rejected for a competitive geothermal lease, a hearing is not in the public interest where offeror has not explained a procedure in which particular facts could be effectively utilized in an alternative formula for computing minimum bids.

Unico Oil Co., 38 IBLA 373 (Dec. 29, 1978)

Where there are conflicting applications for a lot in a Native townsite and the evidence as to who has the better claim is vague and inconclusive, the townsite trustee should submit the matter for a hearing before an administrative law judge. 43 CFR 2565.4(b).

James T. Friedman, 39 IBLA 229 (Feb. 12, 1979)

When on appeal a sufficient showing is made to call into question a determination that land lies within a known geologic structure of a producing oil or gas field, and a hearing is requested, the decision may be set aside and remanded for hearing.

Jack J. Pender, 40 IBLA 26 (Mar. 9, 1979)

Mining claims purportedly located on land not available for such location confer no property right upon the locator, and may be declared null and void ab initio without a hearing under 5 U.S.C. § 554 et seq. (1976).

"Contest." A decision declaring claims located on withdrawn lands to be null and void ab initio is not a "contest" and regulations under 43 CFR 4.451 et seq., relating to mining contests, have no application.

Delmer McLean et al., 40 IBLA 34 (Mar. 15, 1979)

Where production has ceased on an oil and gas lease extended by production, and the record is unclear whether the conditions prescribed by 30 U.S.C. § 226(f) (1976) precluding termination of the lease have occurred, the case will be remanded to the Bureau of Land Management to reconsider with the Geological Survey if the lease has terminated, including a determination whether the lessee began reworking or drilling operations within 60 days after cessation of production and diligently prosecuted such operations before attaining production as asserted by him on appeal. A hearing should be held, if necessary, to resolve disputed facts.

Vern H. Bolinder and Julienne J. Bolinder, 40 IBLA 164 (Apr. 3, 1979)

Where the Geological Survey, in making its decision, has reviewed the same information submitted on appeal to the Board of Land Appeals to show that there was a well capable of producing oil or gas in paying quantities on the date the lease expired, and there are no disputed facts, but only a dispute on the proper application of the law to those facts and legal interpretations, a hearing is not warranted in the case.

American Resources Management Corp., 40 IBLA 195 (Apr. 5, 1979)

HEARINGS--Continued

Where Bureau of Land Management determines an application for a Native allotment should be rejected for failure to establish use and occupancy of the land, Bureau of Land Management should initiate a contest proceeding pursuant to 43 CFR 4.451 et seq.

Frederick Phillips et al., 41 IBLA 169 (June 22, 1979)

Ella S. Sheldon et al., 42 IBLA 276 (Aug. 27, 1979)

Elena Bartman, 43 IBLA 284 (Oct. 17, 1979)

Where the Bureau of Land Management (BLM) determines that an Alaska Native allotment application should be rejected in part because the Native did not use all of the land applied for, the BLM shall initiate a contest proceeding pursuant to 43 CFR 4.451 et seq.

Frank Bulland, 41 IBLA 207 (June 27, 1979) 86 I.D. 342

Where legal conclusions are reached in an appellate decision upon undisputed facts, and there has been no proffer of further facts which could compel different legal conclusions, no useful purpose would be served for a hearing, and a request therefor is properly denied.

Floyd L. Anderson, Sr., 41 IBLA 280 (June 28, 1979)
86 I.D. 345

Peter Panruk, 43 IBLA 69 (Sept. 19, 1979)

Nicky Nickoli, 43 IBLA 296 (Oct. 17, 1979)

A hearing is properly ordered where there exist issues of fact the resolution of which will determine whether an oil and gas lease concluding its primary term was converted from rental status to royalty status. Appellant shall have the burden of proof to establish by a preponderance of the evidence (a) that the Dolezal-Government #1 well was capable of producing oil and gas in paying quantities on Oct. 31, 1978, or (b) that there was a discovery of oil or gas in paying quantities on lease W 15891 on Oct. 31, 1978. If either (or both) of these propositions is established, the subject lease was not subject to automatic termination by law for failure to make timely rental payment.

Coronado Oil Co., 42 IBLA 235 (Aug. 22, 1979)

Where an applicant for a Native allotment alleges for the first time on appeal his use and occupancy of lands prior to their withdrawal, a decision rejecting the Native's application shall be vacated and the case remanded to BLM for its consideration of appellant's new evidence.

Charles L. John, 42 IBLA 260 (Aug. 27, 1979)

A second hearing of a Government mining contest will not be afforded where a claimant was given notice and an opportunity to appear at a hearing, where he was actually present at the hearing, and where nothing has been submitted which suggests that another hearing would produce a different result. A petition to reopen a hearing of a Government mining contest will be denied when the contestee offers no valid justification for the neglect to offer evidence which was or could have been available at the original hearing. A further hearing will not be ordered merely to afford a claimant an additional opportunity to explore and make a discovery.

United States v. Andy Syndked, 42 IBLA 313 (Aug. 29, 1979)

The rule of evidence excluding hearsay is not strictly adhered to in administrative proceedings, particularly where the evidence, such as assay reports with a proper foundation concerning the sampling, submission of the samples for assaying, and the reputation of the assayer, is competent and relevant. After such reports are admitted, the factfinder may give the appropriate weight according to the circumstances surrounding the specific report. However, it is not improper to exclude an assay report where neither the assayer nor the sample-taker testifies concerning its origins, and no other foundation is laid for its introduction.

United States v. John R. Burt et al., 43 IBLA 363 (Oct. 29, 1979)

Where Bureau of Land Management determines that an application for a Native allotment is invalid because the facts are not as stated in the application, Bureau of Land Management should initiate a contest proceeding pursuant to 43 CFR 4.450 - 4.452-9.

Amy Tukrook Nukerigak, 44 IBLA 313 (Dec. 31, 1979)

HOMESTEADS (ORDINARY)
(See also Additional Homesteads, Enlarged Homesteads, Reclamation Homesteads, Soldiers' Additional Homesteads, Stock-Raising Homesteads--if included in this Index.)

GENERALLY

No person shall be permitted to make homestead entry or settle upon lands reserved for irrigation purposes until the Secretary of the Interior establishes the unit of acreage per entry and publicly announces the availability of water for irrigation.

Richard E. Crill et al., 18 IBLA 428 (Feb. 14, 1975)

An application for homestead entry for land in a national forest must be rejected as the Secretary of the Interior has no authority to permit such a disposition.

Gustavus A. Bremer et ux., 21 IBLA 15 (June 16, 1975)

No person shall be permitted to make homestead entry or settle upon lands reserved for irrigation purposes until the Secretary of the Interior shall have established the unit of acreage per entry and publicly announced the availability of water for irrigation.

Lewis R. Eslick, 24 IBLA 237 (Mar. 24, 1976)

The affidavit of a witness in support of a homestead entryman's final proof will not be considered where it was given in the presence of the entryman, 43 CFR 1823.2-2, as it is the policy of the Department to assure that the testimony of a witness is his own and not that of the entryman.

Estate of Leo Philpott (Deceased), 28 IBLA 60 (Nov. 10, 1976)

HOMESTEADS (ORDINARY)--Continued

GENERALLY--Continued

Where a homestead entryman has cleared and broken ground and allowed a portion of the cleared, plowed acreage to grow up with a species of native wheat grass, such acreage is not "cultivated" within the meaning of 43 CFR 2567.5(b), and the entryman's final proof is properly rejected where it shows on its face that the native grass acreage constituted an indispensable portion of the entryman's attempt at meeting the cultivation requirements of the homestead laws. Since there was not substantial compliance with the cultivation requirements, equitable adjudication cannot be properly invoked.

Clarence Ray Mathis, 29 IBLA 150 (Mar. 4, 1977)

A request to reconsider a 1968 decision by the Department rejecting final proof for a homestead entry and canceling the entry is properly rejected in the absence of a showing of "extraordinary circumstances." In the absence of compelling legal or equitable reasons for reconsideration, the principle of res judicata, and its counterpart, finality of administrative action, will operate to bar consideration of a new appeal arising from a later proceeding involving the same claim and the same issues.

Pekka K. Merikallio, 30 IBLA 157 (May 18, 1977)

The filing of a petition-application is treated as a petition for classification of the land. The mere filing of the application does not vest in the applicant any interest in the land and repeal of the authorizing statute mandates rejection of the application.

Arthur B. Wallace, 30 IBLA 239 (May 31, 1977)

Where the initial actions of a homesteader are inconsistent in that he appears to initiate his claim both by settlement and by application for allowed entry, the nature of his claim will be determined by the type of official form used by him to initiate the claim, and by his actions with regard thereto.

John Anthony Consla v. Robert L. Wetherelt, 30 IBLA 311 (June 6, 1977)

By regulation, final proof of compliance with the homestead laws must be filed within 5 years, failing which the homestead is subject to cancellation, although, in proper cases the time for filing final proof may be extended. However, the statutory life of a homestead claim or entry cannot be extended beyond 5 years, during which time all other requirements must be performed. An extension of the time for filing final proof is not an extension of the time for performing acts of compliance.

Where during the 5-year term of a homestead there is a failure to comply with the residence and cultivation requirements and the requirement of a habitable house, and where subsequent efforts meet only the requirement for a habitable house, there can be no equitable adjudication based on substantial compliance with the homestead law.

Henry E. Reeves, 31 IBLA 242 (July 18, 1977)

HOMESTEADS (ORDINARY)--Continued

GENERALLY--Continued

A homestead claimant in Alaska may be given credit for residence, cultivation and improvements after the time his homestead application is filed but before allowance of entry where the land was subject to appropriation by him or included in an entry against which he had initiated a contest resulting in cancellation of the entry.

John B. Dean, 34 IBLA 330 (Apr. 26, 1978) 85 I.D. 81

Where both an original survey prior to the issuance of a patent and a dependent resurvey after issuance indicate that a homestead patent has issued on land within a national forest, the patent is invalid notwithstanding that the Federal Government may not by means of a second survey affect property rights acquired under an official survey.

Where an entryman has mistakenly applied for and received a patent on one parcel of land which was not the land he actually occupied, he is not entitled to receive a patent on the land actually occupied by virtue of the fact that the statutes of limitation on the issuance and cancellation of patents has run.

Roland and Marie Oswald, 35 IBLA 79 (May 12, 1978)

An entryman's final proof is properly rejected when it is defective on its face, with the final proof showing that the applicable cultivation requirements have not been met.

Ronald E. Geiger, 37 IBLA 33 (Sept. 18, 1978)

The Board lacks jurisdiction to adjudicate the validity of homestead entries; the Board, rather, adjudicates the effect of ANCSA on such entries.

Appeal of Carmel J. McIntyre, 4 ANCAB 24 (Nov. 30, 1979) 86 I.D. 663

AMENDMENT

Where a homestead entry has been located on land later included within a withdrawal "subject to valid existing rights," the withdrawal attaches to the land within the homestead upon cancellation of the entry. An amendment of a homestead entry cannot include lands within a canceled adjoining entry to which a withdrawal has attached.

Pekka K. Merikallio, 30 IBLA 157 (May 18, 1977)

Prior to the enactment of sec. 316 of the Federal Land Policy and Management Act of 1976, the Secretary of the Interior's authority to correct patents could not be exercised to divest the Government's title to land that was withdrawn or reserved at the time of the mistaken entry. Whether sec. 316 authorizes amendment of a patent in such situations is to be determined in the first instance by the BLM.

Roland and Marie Oswald, 35 IBLA 79 (May 12, 1978)

APPLICATIONS

The statement by the BLM State Office that appellant's petition-application is regular on its face is merely a preliminary determination the application will be considered and the process will be set in action to classify the land. The decision to classify land for

HOMESTEADS (ORDINARY)--Continued

APPLICATIONS--Continued

a certain purpose is discretionary with the Secretary of the Interior.

The filing of a petition-application is treated as a petition for classification of the land. The mere filing of the application does not vest in the applicant any interest in the land and repeal of the authorizing statute mandates rejection of the application.

Arthur R. Wallace, 30 IBLA 239 (May 31, 1977)

Where the initial actions of a homesteader are inconsistent in that he appears to initiate his claim both by settlement and by application for allowed entry, the nature of his claim will be determined by the type of official form used by him to initiate the claim, and by his actions with regard thereto.

Where a homestead in Alaska is initiated by an application for allowed entry, the filing of the application creates a valid existing right which is protected from the effect of a subsequent withdrawal which is subject to valid existing rights.

Where a homestead in Alaska is initiated by an application to enter, the statutory period for compliance with the requirements of the homestead laws begins to run on the date of allowance of the entry.

John Anthony Consla v. Robert L. Wetherelt, 30 IBLA 311 (June 6, 1977)

A petition-application for a homestead entry outside of Alaska requires classification of the land, confers no rights upon an applicant and must be rejected because the Federal Land Policy and Management Act repealed the homestead laws effective on the date of the Act as to lands outside Alaska.

Daniel A. Anderson, 31 IBLA 162 (July 1, 1977)

The rejection of a homestead application in Alaska merely because there are prior-filed homestead applications for the same land is improper and premature where no action has been taken on the conflicting applications. If a prior-filed application is allowed, the land comes within an allowed entry of record and a junior application must be rejected thereafter. However, if the prior application is rejected or withdrawn, it no longer bars allowance of a junior application.

John R. Dean, 34 IBLA 330 (Apr. 26, 1978) 85 I.D. 81

CLASSIFICATION

The statement by the BLM State Office that appellant's petition-application is regular on its face is merely a preliminary determination the application will be considered and the process will be set in action to classify the land. The decision to classify land for a certain purpose is discretionary with the Secretary of the Interior.

The filing of a petition-application is treated as a petition for classification of the land. The mere filing of the application does not vest in the applicant any interest in the land and repeal of the authorizing statute mandates rejection of the application.

Arthur R. Wallace, 30 IBLA 239 (May 31, 1977)

HOMESTEADS (ORDINARY)--Continued

CLASSIFICATION--Continued

A petition-application for a homestead entry outside of Alaska requires classification of the land, confers no rights upon an applicant and must be rejected because the Federal Land Policy and Management Act repealed the homestead laws effective on the date of the Act as to lands outside Alaska.

Daniel A. Anderson, 31 IBLA 162 (July 1, 1977)

CONTESTS

A charge that the entryman failed to cultivate the required acreage in the second entry year is not sustained where the contestant's evidence consists mainly of a general statement by a few persons concluding that the entryman's mode of cultivation was inadequate. In the face of testimony to the contrary by contestee's witnesses which leaves the evidence in equipoise, contestant has not met his burden of convincingly establishing the fact of the entryman's failure to cultivate in the second entry year.

Thomas E. Kimball v. William Henry Selby, 20 IBLA 23 (Apr. 16, 1975)

A private contest brought against an Alaskan homestead entry charging that the entryman failed to meet the minimum cultivation requirements for the second entry year must be dismissed when it is disclosed that such information was of record in the Bureau of Land Management office at the time the complaint was filed.

Olan B. Christie v. Larry E. O'Gleskee, 23 IBLA 155 (Dec. 23, 1975)

"Final entry." When an amended homestead final proof has been submitted, the term "final entry" in the proviso in sec. 7, Act of Mar. 3, 1891, 26 Stat. 1098, *as amended*, 43 U.S.C. § 1165 (1970), refers to the submission, to the proper officials, of the amended final proof and required fees.

Under sec. 7, Act of Mar. 3, 1891, 26 Stat. 1098, *as amended*, 43 U.S.C. § 1165 (1970), which requires issuance of a patent 2 years after receipt upon final proof for a homestead entry, a contest against an entry should not be dismissed where the complaint was filed within 2 years following the submission of additional affidavits amending the entryman's deficient final proof, despite the fact that the receipt in connection with the deficient proof had been issued more than 2 years before filing of the complaint and the receipt had never been canceled or a new receipt issued.

United States v. Joe W. Bryant, 25 IBLA 247 (June 23, 1976)

A contest complaint is properly dismissed where the only basis for cancellation of the homestead suggested by it is failure to comply with the residence and cultivation requirements of the homestead law, and where the time for compliance with these requirements by the entryman has not yet begun.

John Anthony Consla v. Robert L. Wetherelt, 30 IBLA 311 (June 6, 1977)

HOMESTEADS (ORDINARY)--Continued

CONTESTS--Continued

A private contest decision canceling a disputed homestead entry will, in the absence of a timely and proper appeal, cut off all rights which the contestee may have acquired by his entry, and this result will not be affected by the fact that the contestee failed to appear at the contest hearing and, through his own neglect, failed to receive notice of the decision of the administrative law judge.

Repeal of the homestead laws renders moot the question of whether a private contestant can earn a preference right to enter by procuring the cancellation of a contestee's homestead entry for reasons not shown by Bureau of Land Management (BLM) records.

The question of whether a private contestant has procured the cancellation of a contestee's entry for reasons not shown by records of the BLM, is a factual question which is unrelated to the subject matter jurisdiction of the tribunal and which is entirely ancillary to the prior and primary question of the validity of the contestee's entry.

The fact that BLM is not a party to a private contest proceeding does not affect the force or validity of a decision rejecting a final proof.

Wesley Laverne Edwards v. Paul Unruh, 33 IBLA 277 (Jan. 5, 1978)

A private contest complaint which does not set out in clear and concise language a statement of the facts constituting the grounds of contest is properly dismissed.

Eugene A. Whitmill, 34 IBLA 123 (Mar. 2, 1978)

Where the only properly corroborated fact alleged by private contestant related to situs of contestee's residence in 1975 and thereafter, but precomplaint record included assertion by contestee that he lived on homestead in 1972, 1973, and 1974, the contestant has not thereby alleged facts which, if proved, would require cancellation of entry, and contest must be dismissed under 43 CFR 4.450-5(a).

Although in his summary dismissal of private contest against homestead entry administrative law judge discussed issues upon which contestant had failed to submit corroborated allegations of fact along with his complaint, such action by judge did not relieve contestant of his burden of filing corroboration, despite provisions of 43 CFR 4.450-4(b) allowing judge to "raise issues in connection with deciding a contest."

Administrative law judge properly dismissed without a hearing a private homestead entry contest in which complaint failed to allege corroborated facts which, if proved, would provide sufficient basis for cancellation of entry.

Where contestant in private homestead entry contest appeals to Board of Land Appeals and makes certain assignments of error by administrative law judge, but allegations of fact upon which those assignments are based were not corroborated at filing of contest complaint, and issues raised by those assignments were not raised in complaint, such assignments are not material for purposes of appeal to the Board.

Ernest C. Lamb v. Richard B. Stoffel, 36 IBLA 201 (Aug. 3, 1978)

HOMESTEADS (ORDINARY)--Continued

CONTESTS--Continued

A summary dismissal of a private contest against an Alaska homestead becomes a final administrative ruling on that contest when the contestant, instead of appealing the dismissal, files a second contest which must be considered an entirely new action. When a final departmental adjudication has been made, the doctrine of administrative finality, which is the administrative counterpart of the principle of res judicata, generally bars consideration of a new appeal arising from a later proceeding involving the same homestead and the same issue.

A private contest brought against an Alaska homestead charging that the entryman had failed to meet any of the residence or cultivation requirements of the law must be dismissed where the statutory life of the entry has previously expired without the entryman filing final proof and information was already of record in the BLM office that the entryman had done nothing during the life of the entry to perfect the claim. 43 CFR 4.450-1.

Joe C. Amberger, 43 IBLA 178 (Sept. 28, 1979)

CULTIVATION

A homestead entryman is irretrievably in default on his entry where he failed to meet the cultivation requirements in the second, third, and during the growing season of the fourth year of the entry, when he left the land in September of the fourth year for the avowed purpose of making money to complete his improvements.

Arthur Lloyd Zellweger, 19 IBLA 118 (Mar. 5, 1975)

The breaking, planting or seeding, and tillage for a crop which constitute cultivation of the soil of a homestead entry must include such acts and be done in such manner as to be reasonably calculated to produce profitable results.

Where it appears that land has been hand seeded and rolled with a log in a similar manner as used on other homestead entries in the area, and where it is not established that such seeding and rolling is not an unreasonable practice for the type of land and weather conditions involved, the entryman's acts may be found to have been calculated to produce profitable results, notwithstanding his efforts failed to produce a useful crop.

A charge that the entryman failed to cultivate the required acreage in the second entry year is not sustained where the contestant's evidence consists mainly of a general statement by a few persons concluding that the entryman's mode of cultivation was inadequate. In the face of testimony to the contrary by contestee's witnesses which leaves the evidence in equipoise, contestant has not met his burden of convincingly establishing the fact of the entryman's failure to cultivate in the second entry year.

Thomas B. Kimball v. William Henry Selby, 20 IBLA 23 (Apr. 16, 1975)

Where a homestead claimant submits a final proof which shows on its face that he has not cultivated the full area required, and the record reflects that he has not qualified for military credit or reduction in the cultivation requirements, action rejecting final proof and canceling the claim may be suspended to permit the entryman to apply to purchase not more than 5 acres under the Homesite Act of May 26, 1934, failing which the proof will be finally rejected and the claim canceled.

James B. Murphey, 20 IBLA 129 (May 5, 1975)

Where a homestead entryman submits the testimony of two witnesses with his final proof and that testimony does not show that the entryman has complied with the cultivation and residence requirements of the law, the final proof is defective on its face; final proof which is defective on its face will be rejected and the homestead entry canceled.

Estate of Lon Philpott (Deceased), 28 IBLA 68 (Nov. 10, 1976)

Cultivation of a homestead entry must include the breaking, planting or seeding and tillage for a crop and be done in such a manner as to be reasonably calculated to produce profitable results.

The acts performed in attempted satisfaction of the cultivation requirements of the homestead law must be done in good faith seeking to establish a profitable agricultural operation on the entry.

An entryman who performs the minimum acts of cultivation, and seeds late in the last growing season and soon thereafter files final proof, who does not visit the entry to see the results of his attempts or pursue any further agricultural activity on the entry, and who does not establish that he had a market or use for the crop he could have grown, and where the results are meager, has not demonstrated that he made a good faith attempt to comply with the agricultural requirements of the homestead act.

United States v. Leonard F. Nelson (Supp. I), 28 IBLA 314 (Jan. 14, 1977)

Where a homestead entryman has cleared and broken ground and allowed a portion of the cleared, plowed acreage to grow up with a species of native wheat grass, such acreage is not "cultivated" within the meaning of 43 CFR 2567.5(b), and the entryman's final proof is properly rejected where it shows on its face that the native grass acreage constituted an indispensable portion of the entryman's attempt at meeting the cultivation requirements of the homestead laws. Since there was not substantial compliance with the cultivation requirements, equitable adjudication cannot be properly invoked.

Clarence Ray Mathis, 29 IBLA 150 (Mar. 4, 1977)

Wherein one year the homestead land is leveled and seed is hand broadcast on the ground in late October after the first frost in Alaska, and the following year seed is simply scattered on the snow by a claimant who asserts he is "not a farmer at all" and does not know whether this is accepted practice, the cultivation requirements of the law have not been substantially met.

A homestead claimant who contracts for the planting of "enough acreage to satisfy the homestead law" in an essentially worthless hay crop in an area of Alaska where there are no livestock, and with no intention to harvest or utilize it even though it successfully matured, has performed only a token compliance which is, prima facie, demonstrative of bad faith. A good faith

devotion of the land to productive and profitable agricultural use is essential to satisfy the purpose and intent of the agricultural land entry laws.

Henry E. Reeves, 31 IBLA 242 (July 18, 1977)

FINAL PROOF

The breaking, planting or seeding, and tillage for a crop which constitute cultivation of the soil of a homestead entry must include such acts and be done in such manner as to be reasonably calculated to produce profitable results.

Where it appears that land has been hand seeded and rolled with a log in a similar manner as used on other homestead entries in the area, and where it is not established that such seeding and rolling is not an unreasonable practice for the type of land and weather conditions involved, the entryman's acts may be found to have been calculated to produce profitable results, notwithstanding his efforts failed to produce a useful crop.

Thomas E. Kimball v. William Henry Selby, 20 IBLA 23 (Apr. 16, 1975)

Where a homestead claimant submits a final proof which shows on its face that he has not cultivated the full area required, and the record reflects that he has not qualified for military credit or reduction in the cultivation requirements, action rejecting final proof and canceling the claim may be suspended to permit the entryman to apply to purchase not more than 5 acres under the Homesite Act of May 26, 1934, failing which the proof will be finally rejected and the claim canceled.

James B. Murphey, 20 IBLA 129 (May 5, 1975)

In proper circumstances, the issuance of an order to show cause why final proof should not be rejected and entry canceled, is within the discretionary authority of the Bureau of Land Management in adjudicating a homestead application.

Under sec. 7, Act of Mar. 3, 1891, 26 Stat. 1098, *as amended*, 43 U.S.C. § 1165 (1970), an order to show cause why final proof should not be rejected and entry canceled, which order requires the showing of a material fact, is considered a contest or protest.

The showing of "kind of crop planted" and "quantity of crop harvested" are reasonable requirements for final proof submitted for an Alaska homestead.

"Final entry." When an amended homestead final proof has been submitted, the term "final entry" in the proviso in sec. 7, Act of Mar. 3, 1891, 26 Stat. 1098, *as amended*, 43 U.S.C. § 1165 (1970), refers to the submission, to the proper officials, of the amended final proof and required fees.

Under sec. 7, Act of Mar. 3, 1891, 26 Stat. 1098, *as amended*, 43 U.S.C. § 1165 (1970), which requires issuance of a patent 2 years after receipt upon final proof for a homestead entry, a contest against an entry should not be dismissed where the complaint was filed within 2 years following the submission of additional affidavits amending the entryman's deficient final proof, despite the fact that the receipt in connection with the deficient proof had been issued more than 2 years before filing of the complaint and the receipt had never been canceled or a new receipt issued.

United States v. Joe W. Bryant, 25 IBLA 247 (June 23, 1976)

HOMESTEADS (ORDINARY)--Continued

FINAL PROOF--Continued

The affidavit of a witness in support of a homestead entryman's final proof will not be considered where it was given in the presence of the entryman, 43 CFR 1823.2-2, as it is the policy of the Department to assure that the testimony of a witness is his own and not that of the entryman.

Where a homestead entryman submits the testimony of two witnesses with his final proof and that testimony does not show that the entryman has complied with the cultivation and residence requirements of the law, the final proof is defective on its face; final proof which is defective on its face will be rejected and the homestead entry canceled.

Estate of Lon Philpott (Deceased), 28 IBLA 68 (Nov. 10, 1976)

By regulation, final proof of compliance with the homestead laws must be filed within 5 years, failing which the homestead is subject to cancellation, although, in proper cases the time for filing final proof may be extended. However, the statutory life of a homestead claim or entry cannot be extended beyond 5 years, during which time all other requirements must be performed. An extension of the time for filing final proof is not an extension of the time for performing acts of compliance.

Henry E. Reeves, 31 IBLA 242 (July 18, 1977)

A homestead claimant in Alaska may be given credit for residence, cultivation and improvements after the time his homestead application is filed but before allowance of entry where the land was subject to appropriation by him or included in an entry against which he had initiated a contest resulting in cancellation of the entry.

"Subject to appropriation by him." The provision in 43 CFR 2511.4-2(a) permitting credit for residence and cultivation by a homestead entryman before the date of entry if during that period the land was "subject to appropriation by him" does not refer to land for which there were prior-filed homestead applications which are subsequently withdrawn or rejected. Therefore, until action is taken on prior-filed applications, final proof filed by a junior homestead applicant should not be rejected merely because the land is subject to the prior applications.

The mere fact homestead final proof in Alaska is filed before allowance of the homesteader's application for entry does not preclude consideration of the final proof if entry is allowed.

John E. Dean, 34 IBLA 330 (Apr. 26, 1978)   85 I.D. 81

LANDS SUBJECT TO

An application to make homestead entry on land embraced in a first-form reclamation withdrawal is properly rejected.

No person shall be permitted to make homestead entry or settle upon lands reserved for irrigation purposes until the Secretary of the Interior shall have established the unit of acreage per entry and publicly announced the availability of water for irrigation.

Richard E. Crill et al., 18 IBLA 428 (Feb. 14, 1975)

Lewis M. Balick, 24 IBLA 237 (Mar. 24, 1976)

Dallas C. Qualman et al., 36 IBLA 119 (July 25, 1978)

HOMESTEADS (ORDINARY)--Continued

LANDS SUBJECT TO--Continued

An application for homestead entry for land in a national forest must be rejected as the Secretary of the Interior has no authority to permit such a disposition.

Gustavus A. Fisher et ux., 21 IBLA 15 (June 16, 1975)

The filing of an amended Alaska State Selection, after a prior trade and manufacturing site claim for which a notice of location was recorded is canceled and closed of record but where the cancellation has not been posted on the records, segregates the land it describes from further appropriations based on application or settlement and location.

Margaret L. Klatt, Allan D. Klatt, 23 IBLA 59 (Dec. 11, 1975)

An application to make homestead entry on land embraced in a first-form reclamation withdrawal is properly rejected.

Clifford Prisbrey, 24 IBLA 108 (Mar. 1, 1976)

Where a homestead entry has been located on land later included within a withdrawal "subject to valid existing rights," the withdrawal attaches to the land within the homestead upon cancellation of the entry. An amendment of a homestead entry cannot include lands within a canceled adjoining entry to which a withdrawal has attached.

Pekka E. Merikallio, 30 IBLA 157 (May 18, 1977)

A powersite classification effects withdrawal of lands to the full extent described therein as of publication in the *Federal Register*, even if the extent of the land withdrawn by it is not accurately entered subsequently on land-status maps, and, notwithstanding this error, lands classified by it are withdrawn under sec. 24 of the Federal Power Act from settlement under the homestead laws, so that a notice of location settlement claim and final proof concerning these lands is properly rejected.

Henry E. Reeves, 31 IBLA 242 (July 18, 1977)

The rejection of a homestead application in Alaska merely because there are prior-filed homestead applications for the same land is improper and premature where no action has been taken on the conflicting applications. If a prior-filed application is allowed, the land comes within an allowed entry of record and a junior application must be rejected thereafter. However, if the prior application is rejected or withdrawn, it no longer bars allowance of a junior application.

John E. Dean, 34 IBLA 330 (Apr. 26, 1978)   85 I.D. 81

Where land on which a valid settlement has been made and maintained according to the law under which it was made, was excepted from the effect of the withdrawal or reservation, occupancy of the land prior to reservation or withdrawal is insufficient to show exception where no filing has been made on the prior occupancy and the prior occupancy was not for homestead purposes.

Roland and Marie Oswald, 35 IBLA 79 (May 12, 1978)

HOMESTEADS (ORDINARY)--Continued

RESIDENCE

A homestead claimant who fails to establish residence on the land within 1 year after initiating the claim has failed to comply with the law and his entry must be canceled.

Robert A. Rice, Jr., 22 IBLA 291 (Nov. 3, 1975)

Pursuant to 43 CFR 2567.5(a)(1), a homestead entryman in Alaska must establish residence upon the land within 6 months of the date of allowance of the entry or within a maximum period of 12 months, if a 6-month extension of time was requested and granted. These periods do not commence at the time of the filing of the application.

Albert A. Howe, 26 IBLA 386 (Sept. 15, 1976)

Where a homestead entryman submits the testimony of two witnesses with his final proof and that testimony does not show that the entryman has complied with the cultivation and residence requirements of the law, the final proof is defective on its face; final proof which is defective on its face will be rejected and the homestead entry canceled.

Estate of Lon Philpott (Deceased), 28 IBLA 68 (Nov. 10, 1976)

To establish residency on a homestead there must be the intent to make the desired public lands the entryman's home, and also the intent to no longer have a home at the former residence; the law permits an entryman to have two residences, but he may have only one home.

An entryman who, at the time he seeks to establish residence on the entry, owns a house which he leases furnished for 6 and 1/2 months and to which he returns a few days after he has completed the required 7 months on the entry did not establish his home on the entry in good faith, and thus has not met the residence requirement of the homestead law.

A homestead entry made with no intention of establishing a permanent bona fide home on the entry, but merely with a view to submitting a showing sufficient to support occupancy for the briefest time permitted under the law must be canceled, notwithstanding the proof offered shows full technical compliance with respect to inhabitancy of the land for the period required by the law.

United States v. Leonard F. Nelson (Supp. I), 28 IBLA 314 (Jan. 14, 1977)

SECOND ENTRY

An application for a second homestead entry under the Act of Sept. 5, 1914, is properly rejected in the absence of sufficient showing that the applicant lost, forfeited, or abandoned the original entry through no fault of his own or because of matters beyond his control.

Arthur Lloyd Zellweger, 19 IBLA 118 (Mar. 5, 1975)

SETTLEMENT

No person shall be permitted to make homestead entry or settle upon lands reserved for irrigation purposes until the Secretary of the Interior shall have established the unit of acreage per entry and publicly announced the availability of water for irrigation.

Richard F. Crill et al., 18 IBLA 428 (Feb. 14, 1975)

Lewis M. Kalick, 24 IBLA 237 (Mar. 24, 1976)

Dallas C. Qualman et al., 36 IBLA 119 (July 25, 1978)

Where the initial actions of a homesteader are inconsistent in that he appears to initiate his claim both by settlement and by application for allowed entry, the nature of his claim will be determined by the type of official form used by him to initiate the claim, and by his actions with regard thereto.

John Anthony Consla v. Robert L. Wetherelt, 30 IBLA 311 (June 6, 1977)

Where a notice of location of settlement claim is filed covering land which is not available for entry, the notice must be rejected and cannot be suspended to await the possible restoration of the land to entry.

A powersite classification effects withdrawal of lands to the full extent described therein as of publication in the Federal Register, even if the extent of the land withdrawn by it is not accurately entered subsequently on land-status maps, and, notwithstanding this error, lands classified by it are withdrawn under sec. 24 of the Federal Power Act from settlement under the homestead laws, so that a notice of location settlement claim and final proof concerning these lands is properly rejected.

Henry E. Reeves, 31 IBLA 242 (July 18, 1977)

INDIAN ALLOTMENTS ON PUBLIC DOMAIN

GENERALLY

A reservation of geothermal resources must be imposed upon a patent issued for an Indian allotment under the fourth section of the General Allotment Act on land known to be valuable for such geothermal resources, even though the allotment is based upon settlement established prior to any withdrawal of the public domain and antedated the knowledge of the geothermal resources, but the application for patent was made subsequent to an application for withdrawal of the land to protect the geothermal resources.

Heirs of Carrie Bethel, 29 IBLA 210 (Mar. 22, 1977)

With respect to Indian allotments on national forest lands, the Secretary of Agriculture or his delegate is required by statute to determine whether the land is more valuable for agriculture or grazing purposes than for the timber thereon. Once the conclusion that the land is more valuable for agriculture or grazing is reached, it is the function of the Secretary of the Interior and/or his delegate to adjudicate the application including determination of the legal sufficiency of applicant's use and occupancy.

The granting of an Indian allotment in a national forest, assuming that the statutory criteria have been met, is within the discretion of the Secretary of the Interior and is not a mere ministerial duty.

INDIAN ALLOTMENTS ON PUBLIC DOMAIN--Continued

GENERALLY--Continued

Viability of an Indian allotment from an economic standpoint is a legitimate consideration in the exercise of the Secretary's discretionary authority over allotments. However, land in an Indian allotment application may be considered together with adjacent land owned by the applicant in determining viability. Past history of use of the land to provide a livelihood is a relevant factor.

Lorinda L. Hulsman, 32 IBLA 280 (Sept. 27, 1977)

Where the Secretary of Agriculture has made a determination pursuant to sec. 31 of the Act of June 25, 1910, 36 Stat. 863, 25 U.S.C. § 337 (1976), that lands within a national forest are of no value for the timber found thereon and are of negligible value for agricultural or grazing purposes, the Secretary of the Interior may reject the allotment where the record shows that the land in question is not a viable economic agricultural unit.

Samuel C. George, 39 IBLA 399 (Mar. 2, 1979)

CLASSIFICATION

In applying the statutory criteria to an Indian allotment application for land in a national forest under the Forest Allotment Act of June 25, 1910, 25 U.S.C. § 337 (1970), the Secretary of the Interior is bound by the determination of the Secretary of Agriculture that the land is more valuable for the timber found thereon than for agricultural or grazing purposes. An application must be rejected where there is such a determination and there is neither confusion regarding the basis of the report nor error apparent on the face of the report.

Merlin W. Tripp, Sr., 21 IBLA 85 (June 27, 1975)

In a decision on a request for reconsideration, the earlier decision holding that an application for an Indian allotment under sec. 4 of the General Allotment Act of Feb. 8, 1887, as amended, 25 U.S.C. § 334 (1970), is properly reduced from 160 to 80 acres will be sustained where a Bureau of Land Management detailed report of field examination shows the land to be nonirrigable agricultural in character.

Edgar L. Cerday, 25 IBLA 229 (June 21, 1976)

With respect to Indian allotments on national forest lands, the Secretary of Agriculture or his delegate is required by statute to determine whether the land is more valuable for agriculture or grazing purposes than for the timber thereon. Once the conclusion that the land is more valuable for agriculture or grazing is reached, it is the function of the Secretary of the Interior and/or his delegate to adjudicate the application including determination of the legal sufficiency of applicant's use and occupancy.

Lorinda L. Hulsman, 32 IBLA 280 (Sept. 27, 1977)

In applying the statutory criteria to an Indian allotment application for land in a national forest under the Forest Allotment Act of June 25, 1910, 25 U.S.C. § 337 (1970), the Secretary of the Interior is bound by the determination of the Secretary of Agriculture that the land has no value for agricultural or grazing purposes. An application will be remanded for further report from the Department of Agriculture where there is not a clear determination that the land is or is not more valuable for agriculture or grazing than for its timber.

Samuel C. George, 35 IBLA 19 (May 5, 1978)

LANDS SUBJECT TO

In applying the statutory criteria to an Indian allotment application for land in a national forest under the Forest Allotment Act of June 25, 1910, 25 U.S.C. § 337 (1970), the Secretary of the Interior is bound by the determination of the Secretary of Agriculture that the land is more valuable for the timber found thereon than for agricultural or grazing purposes. An application must be rejected where there is such a determination and there is neither confusion regarding the basis of the report nor error apparent on the face of the report.

Merlin W. Tripp, Sr., 21 IBLA 85 (June 27, 1975)

Sec. 4 of the General Allotment Act of Feb. 8, 1887, authorizes the Secretary of the Interior to issue allotments to Indians where the Indians have made settlement upon public lands "not otherwise appropriated." Pending final action on the matter, public lands are not open to Indian allotment settlement and disposition following the filing and noting of an application by the Bureau of Land Management for a proposed withdrawal; regulation 43 CFR 2091.2-5(a) provides that the noting of an application for withdrawal on the official plats maintained in the proper land office shall temporarily segregate the subject land from settlement under the public land laws to the extent that the withdrawal applied for, if effected, would prevent such forms of disposal. Following issuance of a public land order withdrawing the subject land, Indian allotment applications previously held in a suspense status are properly rejected.

Thurman Banks et al., 22 IBLA 205 (Oct. 15, 1975)

Withdrawal of land in 1940, inclusion of the land in a grazing lease under authority of the Alaska Grazing Act of Mar. 4, 1927, revocation of the withdrawal in 1961, and selection of the land by the State of Alaska under authority of the Statehood Act in 1963 while the grazing lease was still extant, effectively kept the land closed to the initiation of rights under the Native Allotment Act at all times during the period from 1940 to the revocation of the Allotment Act on Dec. 18, 1971, by sec. 18 of the Alaska Native Claims Settlement Act.

Herman Haakanson, 23 IBLA 54 (Dec. 4, 1975)

In a decision on a request for reconsideration, the earlier decision holding that an application for an Indian allotment under sec. 4 of the General Allotment Act of Feb. 8, 1887, as amended, 25 U.S.C. § 334 (1970), is properly reduced from 160 to 80 acres will be sustained where a Bureau of Land Management detailed report of field examination shows the land to be nonirrigable agricultural in character.

Edgar L. Cerday, 25 IBLA 229 (June 21, 1976)

A reservation of geothermal resources under the Geothermal Steam Act of 1970 may be inserted in a patent issued for an Indian allotment granted under the fourth section of the General Allotment Act.

Heirs of Carrie Bethel, 29 IBLA 210 (Mar. 22, 1977)

LANDS SUBJECT TO--Continued

In applying the statutory criteria to an Indian allotment application for land in a national forest under the Forest Allotment Act of June 25, 1910, 25 U.S.C. § 337 (1970), the Secretary of the Interior is bound by the determination of the Secretary of Agriculture that the land has no value for agricultural or grazing purposes. An application will be remanded for further report from the Department of Agriculture where there is not a clear determination that the land is or is not more valuable for agriculture or grazing than for its timber.

Samuel C. George, 35 IBLA 19 (May 5, 1978)

Where the Secretary of Agriculture has made a determination pursuant to sec. 31 of the Act of June 25, 1910, 36 Stat. 863, 25 U.S.C. § 337 (1976), that lands within a national forest are of no value for the timber found thereon and are of negligible value for agricultural or grazing purposes, the Secretary of the Interior may reject the allotment where the record shows that the land in question is not a viable economic agricultural unit.

Samuel C. George, 39 IBLA 399 (Mar. 2, 1979)

Native occupancy and use commenced at a time when land is withdrawn from settlement, location, sale, or entry provides no basis for a Native allotment. Withdrawal of the land in 1940 by Exec. Order No. 8344, inclusion of the land in a grazing lease and homesite, and the subsequent selection of the land by the State of Alaska in 1966 have effectively kept the land closed to the initiation of rights under the Act of May 17, 1906, at all times during the period from 1940 to Dec. 18, 1971, when the Act was repealed by the Alaska Native Claims Settlement Act.

Although the Department has adhered to the principle of protecting Indian occupancy on public lands, it also has the responsibility of protecting rights of others to public land tenure, including persons who have been granted grazing leases under the Alaska Grazing Act of Mar. 4, 1927, *as amended*, 43 U.S.C. §§ 316, 316a-316o (1976).

Milton R. Pagano, 41 IBLA 214 (June 27, 1979)

Native use and occupancy commenced at a time when land is otherwise appropriated and segregated from such use and occupancy provides no basis for a claim under the Act of May 17, 1906. Inclusion of the subject lands in 1932 in a grazing lease, withdrawal of the lands in 1940, selection of the lands in 1967 by the State of Alaska, and subsequent withdrawals in 1973 pursuant to the Alaska Native Claims Settlement Act have effectively kept the lands closed to the initiation of rights under the Act of May 17, 1906, at all times during the period from 1932 to Dec. 18, 1971, when the Act was repealed by sec. 18 of the Alaska Native Claims Settlement Act.

Although the Department has adhered to the principle of protecting Indian occupancy on public lands, it also has the responsibility of protecting rights of others to public land tenure, including persons who have been granted grazing leases under the Alaska Grazing Act of Mar. 4, 1927, *as amended*, 43 U.S.C. §§ 316, 316a-316c (1976).

Magnel E. Drabek, 41 IBLA 219 (June 27, 1979)

LANDS SUBJECT TO--Continued

Settlement on land in Alaska which is subject to a grazing lease issued under the Alaska Grazing Act of Mar. 4, 1927, 43 U.S.C. §§ 316, 316a-316c (1976), does not create any rights by virtue of such settlement under the Alaska Native Allotment Act, 43 U.S.C. §§ 270-1 to 270-3 (1970), repealed by 43 U.S.C. § 1617 (1976), since such land is segregated from adverse appropriation at least until the Department takes action to cancel the grazing lease *pro tanto*, but the grazing lease does not preclude the filing of a State selection application which, when filed, segregates the land from all appropriation based upon settlement or location.

Floyd L. Anderson, Sr., 41 IBLA 280 (June 28, 1979)
86 I.D. 345

Withdrawal of land in 1940, inclusion of the land in a grazing lease under authority of the Alaska Grazing Act of Mar. 4, 1927, revocation of the withdrawal in 1961, and selection of the land by the State of Alaska under authority of the Statehood Act in 1963 effectively kept the land closed to the initiation of rights under the Native Allotment Act at all times during the period from 1940 to the revocation of the Allotment Act on Dec. 18, 1971, by sec. 18 of the Alaska Native Claims Settlement Act.

Norman Orheim, Billy Boskofsky, Jr. (As Heir of Nicholas Boskofsky), 41 IBLA 338 (July 11, 1979)

Where an applicant for a Native allotment alleges use and occupancy of lands which had previously been withdrawn in accordance with sec. 24, Federal Water Power Act of June 10, 1920, an application is properly denied despite the fact that a public land order designating the area a powersite classification is issued subsequent to the applicant's commencement of use and occupancy. Lands included in an application for powersite development under the Act shall from the date of filing of the application be reserved from entry, location, or other disposal under the laws of the United States, unless otherwise directed by the Federal Power Commission or by Congress.

Lindberg Alexander, 41 IBLA 382 (July 23, 1979)

Withdrawn lands are not open to appropriation under the Native Allotment Act. Appellant's settlement upon a tract of land withdrawn from entry is a trespass, and such settlement does not provide a basis for any claim to the land.

Publication in the *Federal Register* of PLO No. 3432 withdrawing certain lands in Alaska from all forms of appropriation under the public land laws, except leasing under the mineral leasing laws, gives valid notice of its contents.

Elizabeth J. Martini, 42 IBLA 82 (Aug. 13, 1979)

Lands included in an application for powersite development under the Federal Power Act of June 10, 1920, 16 U.S.C. § 818 (1976), shall from the date of filing of the application be reserved from entry, location, or other disposal under the laws of the United States, unless otherwise directed by the Federal Power Commission or by Congress.

Charles L. John, 42 IBLA 260 (Aug. 27, 1979)

INDIAN ALLOTMENTS ON PUBLIC DOMAIN--Continued

SETTLEMENT

Settlement on land in Alaska which is subject to a grazing lease issued under the Alaska Grazing Act of Mar. 4, 1927, 43 U.S.C. §§ 316, 316a-316o (1976), does not create any rights by virtue of such settlement under the Alaska Native Allotment Act, 43 U.S.C. §§ 270-1 to 270-3 (1970), repealed by 43 U.S.C. § 1617 (1976), since such land is segregated from adverse appropriation at least until the Department takes action to cancel the grazing lease *pro tanto*, but the grazing lease does not preclude the filing of a State selection application which, when filed, segregates the land from all appropriation based upon settlement or location.

Floyd L. Anderson, Sr., 41 IBLA 280 (June 28, 1979)
86 I.D. 345

INDIAN ECONOMIC ENTERPRISES

BUY INDIAN ACT

The provisions of the Act of June 25, 1910 (36 Stat. 861, 25 U.S.C. § 47 (1970)), commonly referred to as the "Buy Indian" Act, plainly bestow discretionary authority on the Secretary of the Interior with respect to the purchase of products and labor of Indian industry.

Administrative Appeal of Means Construction Co. et al. v. Commissioner of Indian Affairs, 5 IBIA 242 (Nov. 5, 1976)

INDIAN LANDS
(*See also* Indian Probate--if included in this Index.)

GENERALLY

Sec. 8 of the Act of Apr. 23, 1904, 33 Stat. 302, providing for survey and allotment of lands within the Flathead Indian Reservation, excepts from mineral entry those lands classified as "timber land" by a Presidential Commission, and the Department of the Interior has no authority to overturn such classification and declare the "timber lands" more valuable as "mineral lands."

Lands set apart as an Indian reservation cease to be a part of the public domain. A mining claim located on Indian lands not opened to entry is void ab initio.

Unless there is an express provision to the contrary effect, lands contained in an Indian reservation are segregated for the benefit of the Indians, and withdrawn from the operation of the public land laws, including the mining laws.

Montana Copper King Mining Co. et al., 20 IBLA 30 (Apr. 16, 1975)

The Department of the Interior does not have the authority to modify a statute ratifying an agreement with an Indian tribe on the grounds of fraud or coercion in the execution of the agreement.

Title to Certain Land Within the Boundaries of the Fort Yuma Indian Reservation as Established by the Executive Order of Jan. 9, 1884, M-36886 (Jan. 18, 1977)
84 I.D. 1

INDIAN LANDS--Continued

GENERALLY--Continued

The provision in 43 CFR 3825.1(b) that failure to pay annual rental on or before the anniversary date of a mining claim located in the Papago Indian Reservation "shall be deemed sufficient grounds for invalidating the claim" is directory, not mandatory. Where the mining claimant does not pay rental for 2 years on two claims and is 1-1/2 years late on other claims, and where he has not paid the rental prior to receiving decisions from the Bureau of Land Management holding the claims invalid, the mining claims must be held invalid.

Lewis P. Ellsworth, Jr., 33 IBLA 26 (Nov. 22, 1977)

The holder of a mining claim located within the Papago Indian Reservation under sec. 3 of the Act of June 18, 1934, 48 Stat. 984 (repealed, Act of May 27, 1955, 69 Stat. 67), is required to make the annual rental payment for the claim in advance (on or before the anniversary date of location of the claim). A decision invalidating a claim will be upheld where proceedings to void the claim are not initiated until several months after the rental due date, there is no evidence the rent was paid for the year, and appellant admits the failure to pay was an oversight.

John A. Cooley, 36 IBLA 245 (Aug. 14, 1978)

The Alaska Native Claims Settlement Act extinguished aboriginal occupancy claims of Alaska Natives; such claims cannot serve as a bar to a State selection, nor preclude the State from challenging Native allotment applications conflicting with its selection.

Under the "functional" standard to determine administrative standing set forth in *Koniag, Inc.* v. *Andrus*, 580 F.2d 601 (D.C. Cir. 1978), *cert. denied*, 99 S. Ct. 733 (1979), the State of Alaska has standing to challenge Native allotment applications conflicting with its selection applications even if the land is within a Native village selection area under the Alaska Native Claims Settlement Act. The State has standing under Departmental regulations to initiate private contests against such conflicting Native allotment applications.

State of Alaska et al., 41 IBLA 315 (July 11, 1979)
86 I.D. 361

The collection of a yearly rental pursuant to the provisions of 43 CFR 3825.1(b) for a mining claim situated within the Papago Indian Reservation in no way presages the existence of a valid mining claim based on the discovery of a valuable mineral deposit.

United States v. J. C. Wilson, 44 IBLA 1 (Nov. 6, 1979)

ALLOTMENTS

Generally

The Quapaw Indians were allotted under the Act of Mar. 2, 1895, 28 Stat. 876, 907. The initial period of restrictions against alienation contained in this Act was extended by subsequent amendments to Mar. 3, 1971.

Estate of Louis Harvey Quapaw, 4 IBIA 263 (Dec. 23, 1975)
82 I.D. 640

INDIAN LANDS--Continued

ALLOTMENTS--Continued

Generally--Continued

Where a Native allotment application is filed before the death of an applicant, proof of the applicant's use and occupancy, if otherwise timely, may be filed by the appropriate official of the Bureau of Indian Affairs pursuant to 43 CFR 2561.2(a) after the applicant's death. A decision rejecting the application because the proof was filed after the applicant's death must be set aside where the proof is not inconsistent with the application. Further proceedings must be served upon the heirs, known or unknown, by appropriate service, and also upon conflicting claimants, such as the State of Alaska.

Ernest L. Olson, Jr. (Deceased), 41 IBLA 179 (June 22, 1979)

Assuming, in the light most favorable to appellant, that the allotments at issue were subject to the final proviso of sec. 9 of the Act of Mar. 2, 1889, 25 Stat. 888, 891, we find no language in this or other sections of the Act evidencing an intention on the part of Congress that allotments--to be valid--required approval by the Oglala Sioux Tribe.

Appellant's contention that under sec. 22 of the Act of June 30, 1834, 4 Stat. 729, 733 (25 U.S.C. § 194 (1976)), the burden of proof cannot be assigned to the tribe is without merit. The issue framed by appellant does not align "Indians" against "whites." The primary relief sought by the tribe is the cancellation of trust patents which can only be held by Indians.

The issuance of a trust patent for an Indian allotment carries with it a presumption of proper performance as well as the implied finding of every fact made a prerequisite to the patent's issue.

In addition to contravening rights bestowed by the tribe's own constitution, appellant's position that members of the tribe cannot obtain fee patents to individually owned trust land violates express guarantees contained in the General Allotment Act and the Indian Reorganization Act, as amended.

Administrative Appeal of Oglala Sioux Tribe v. Commissioner of Indian Affairs and Richard Tall (PBD-10542), 7 IBIA 188 (Sept. 5, 1979) 86 I.D. 425

Alienation

Pursuant to the Act of July 28, 1955, 69 Stat. 392, as amended (25 U.S.C. § 608 (1970)), and 25 CFR 121.17 et seq., an Indian owner of trust land who consents to sell her interest to the Yakima Tribe is legally entitled to the fair market value therefor.

The party challenging the terms or conditions of a sale of Indian land bears the burden of proving the violation or misconduct alleged.

The individual Indian seller has not upheld her burden of disproving the validity of the Mar. 1976 appraisal as the basis for sale of her land in Oct. 1976, nor has she demonstrated through the proposed testimony of witnesses or other possible evidence, any necessity for ordering a hearing on this question.

Where the subject appraisal was based on the land's "highest and best use" and 5 of the 80 acres were considered by the BIA appraiser as contributing no value in such a market, the appellant erroneously construed the appraisal as a determination that 5 acres of her land were without value for any purpose.

Under the circumstances of this case, no prejudicial error occurred as a result of the BIA appraiser's failure to estimate the worth, or lack thereof, of an old abandoned structure on appellant's land.

Administrative Appeal of Hazel Hawk Visser v. Area Director, Portland Area Office, Bureau of Indian Affairs, 7 IBIA 22 (Feb. 17, 1978)

Patents

Applications

Application for patent in fee will be denied where applicant is found incapable of properly or adequately managing her own affairs.

Administrative Appeal of Ethel H. Not Afraid v. Area Director, Billings, et al., 3 IBIA 235 (Jan. 31, 1975) 82 I.D. 51

CEDED LANDS

The Mineral Leasing Act of 1920 is not applicable to lands of the Wind River Indian Reservation which were ceded by the Indians to the United States in trust for disposition but were subsequently restored to tribal ownership. Such lands may be leased only under the Act of May 11, 1938, 25 U.S.C. § 396a et seq. (1970).

The Mineral Leasing Act of 1920 is not applicable to the ceded but undisposed of lands of the Wind River Indian Reservation. Such lands may be leased only under the Act of Aug. 21, 1916, 39 Stat. 519.

General Crude Oil Co., 19 IBLA 285 (Mar. 26, 1975)

The Agreement of Dec. 8, 1893, between the Yuma (now Quechan) Indians and the United States, ratified in sec. 17 of the Act of Aug. 15, 1894, was an absolute, present cession of any and all interests of the Indians to the nonirrigable lands in the Fort Yuma Indian Reservation created by Executive Order of Jan. 9, 1884.

Sec. 25 of the Act of Apr. 21, 1904, which authorized the application of the Reclamation Act of 1902 to the Yuma Indian Reservation, did not repeal by implication sec. 17 of the Act of Aug. 15, 1894, which provided for the cession, reclamation and allotment of the Reservation, and is in no way inconsistent with the 1894 Act.

Assuming that the Act of Aug. 15, 1894, was a conditional rather than an absolute cession by the Yuma (now Quechan) Indians of their rights to the nonirrigable lands in the Fort Yuma Indian Reservation, all material conditions on the part of the United States were met, and the cession has occurred.

The administrative treatment of land as reservation land under the jurisdiction of the Bureau of Indian Affairs for many purposes is not dispositive of the status of the land in the face of clear legislation demonstrating that it was absolutely ceded, even without conflicting administrative treatment of the lands as public domain or under the jurisdiction of the Reclamation Service. The Department has the authority to resolve disputes and correct errors in the status of lands within its jurisdiction.

Title to Certain Land Within the Boundaries of the Fort Yuma Indian Reservation as Established by the Executive Order of Jan. 9, 1884, M-36886 (Jan. 18, 1977) 84 I.D. 1

INDIAN LANDS--Continued

CEDED LANDS--Continued

When interpreting Federal agreements and statutes pertaining to Indian Affairs, one must consider the legislative history, as well as surrounding circumstances and subsequent administrative practices to determine what the parties intended, and in particular, what the Indians understood the agreement to mean. Doubtful expressions are to be resolved in the Indians' favor.

Congressional intent to modify or abrogate Indian property rights must be clear and cannot be lightly inferred.

The Agreement of Dec. 4, 1893, between the Yuma (now Quechan) Indians and the United States, ratified in the Act of Aug. 15, 1894 (28 Stat. 286, 332) provided for a conditional cession of the nonirrigable land of the Fort Yuma Reservation. The conditions which included allotment and sale of surplus irrigable land and the opening of nonirrigable lands to settlement and entry, did not occur during the decade following the agreement and ratifying statute.

Title to Certain Lands Within the Boundaries of the Fort Yuma (now called Quechan) Indian Reservation, M-36908 (Jan. 2, 1979) 86 I.D. 3

CONTRACTS

Formation and Validity

Bids and Awards

Mistakes

Where the Bureau of Indian Affairs knew or should have known of the bidder's mistake, a bidder on Indian lands is entitled to recover deposits where he is guilty of mistake in misreading of specification.

Administrative Appeal of Douglas Stout v. Commissioner, Bureau of Indian Affairs, 5 IBIA 260 (Dec. 3, 1976) 83 I.D. 603

FEE LANDS

A decision by the Bureau of Land Management canceling fee simple patents issued to Indians and simultaneously issuing new Indian trust patents is not subject to review by the Board of Land Appeals, which has no jurisdiction in the matter, where the decision was made at the direction of the Assistant Secretary for Indian Affairs.

Blue Star, Inc., Atomic Western, Inc., Fremont Energy Corp., Ivor Adair, 41 IBLA 333 (July 11, 1979)

FORESTRY

Timber Sales Contract

Administrative Fees

Determining the reasonableness of administrative fees assessed under authority of 25 CFR 141.18 is a matter requiring the exercise of discretionary authority and as such the issue must be directed to the Assistant Secretary for Indian Affairs for resolution.

The Board of Indian Appeals may not resolve a discretionary matter without clear authority from the Secretary.

INDIAN LANDS--Continued

FORESTRY--Continued

Timber Sales Contract--Continued

Administrative Fees--Continued

Under existing regulations neither the Superintendent nor the Area Director had the authority to require collection of other than a 5 percent fee from appellant in the absence of special instructions from the Secretary.

The Secretary or the Assistant Secretary for Indian Affairs has authority to reduce the fixed fees described at 25 CFR 141.18 regardless of whether the charge is for timber sold under regular supervision.

Administrative Appeal of Helen S. Kirschling v. Bureau of Indian Affairs, 7 IBIA 36 (Mar. 17, 1978)

GRAZING

Generally

The Bureau of Indian Affairs is not required to withdraw allotted land from a range unit designated for grazing in accordance with 25 CFR 151 merely because a majority of the owners in the allotment have requested withdrawal.

Administrative Appeal of Iris Bear Heels v. Aberdeen Area Director, 6 IBIA 253 (Dec. 15, 1977)

Appeals

Generally

A person who has no interest that would be adversely affected by the outcome of an appeal is not an interested party and service of an appeal on such person is not necessary under 25 CFR 2.11(a).

Administrative Appeal of James Rosenberg v. Area Director, Portland Area Office, 6 IBIA 124 (Aug. 1, 1977) 84 I.D. 439

Sales

Generally

Submission of more than one bid on any one unit by any given bidder is considered proper unless prohibited by the sale terms.

Administrative Appeal of James Rosenberg v. Area Director, Portland Area Office, 6 IBIA 124 (Aug. 1, 1977) 84 I.D. 439

Indian Preference

Generally

Privilege of meeting high sealed bids of non-Indians in grazing sales is limited to adult tribal members, Indian corporations and Indian Associations according to preference determined by the governing body and concurred in writing by the Area Director.

Administrative Appeal of Jake Ring et al. v. Area Director, Aberdeen, 6 IBIA 137 (Aug. 10, 1977)

INDIAN LANDS--Continued

IRRIGATION

Sec. 25 of the Act of Apr. 21, 1904 (33 Stat. 189, 224), which authorized the application of the 1902 Reclamation Act to the Fort Yuma and Colorado River Reservations, and which provided for the allotment and sale of surplus irrigable lands on those reservations, was unrelated to and was not intended to effect the conditional cession provided for in the 1893 agreement and the 1894 ratifying statute.

Title to Certain Lands Within the Boundaries of the Fort Yuma (now called Quechan) Indian Reservation, M-36908 (Jan. 2, 1979) 86 I.D. 3

LEASES AND PERMITS

Generally

A lease canceled by the Superintendent of an Indian Agency for nonpayment of rent is not reinstated when rents are subsequently accepted pending an administrative appeal.

Administrative Appeal of Wayne H. Evans v. Aberdeen Area Director et al., 4 IBIA 202 (Nov. 14, 1975)

Except where prohibited by statute or regulations a lease which remains executory in part may be canceled or abandoned by mutual consent.

Cancellation or abandonment of a lease may be implied from acts of the parties in negotiating for a new lease concerning the same property or subject matter.

Upon issuance of a show cause letter by the Bureau of Indian Affairs, and it appearing that the alleged violation can be corrected, the lessee shall be given a reasonable opportunity to cure the breach.

Administrative Appeal of Harold Hansen v. Area Director, Aberdeen Area Office, et al., 5 IBIA 4 (Jan. 20, 1976)

Leases may be granted by the Secretary pursuant to 25 CFR 131.2(a)(4) only where adult owners who qualify under 25 CFR 131.3 are unable to agree upon a lease.

Administrative Appeal of James Morgan, Jr. v. Area Director, Aberdeen Area Office, et al., 5 IBIA 14 (Jan. 22, 1976) 83 I.D. 20

Where an oil and gas lease on Indian allotted lands provides for a term of years and as much longer thereafter as oil and gas is produced in paying quantities, upon failure to achieve production during the primary period the lease terminates by its own terms.

An oil and gas lease on Indian lands will not be extended beyond the primary term by the mere assertion of the lessee, after the lease has expired, that the lease had been committed to a unitized area which contained a producing well. Where the record shows that the lessee did not comply with the terms of the lease or the regulations requiring the lease to affirmatively seek approval of the Secretary of the Interior to officially commit the lease to a producing unit, outside events had no effect on the lease, and the lease expired by its own terms.

A communitization agreement involving an oil and gas lease for Cheyenne-Arapaho allotted lands may properly be approved by the Area Director, BIA, pursuant to 25 CFR 172.24 where that agreement incorporates all the terms and conditions of a State pooling order which joined the lessee with all other holders of mineral interests in the other tracts involved in the unit agreement.

Cotton Petroleum Corp. v. Samedan Oil Corp., 25 IBIA 13 (Feb. 8, 1977)

Oil and gas produced from leases of Fort Peck tribal lands cannot be taxed by the State of Montana.

The taxation proviso contained in 25 U.S.C. § 398 (1970) does not apply to leases entered into under the 1938 Mineral Leasing Act (25 U.S.C. §§ 396a-396f (1970)). States cannot tax the production of oil and gas from such leases.

Tax Status of the Production of Oil and Gas from Leases of Fort Peck Tribal Lands under the 1938 Mineral Leasing Act, M-36896 (Nov. 7, 1977) 84 I.D. 905

Farming and Grazing

The restricted allotment of any Indian may be leased for farming or grazing purposes by the allottee or his heirs, subject to the approval of the superintendent or other officer in charge of the reservation where the land is located, under such rules and regulations as the Secretary of the Interior may prescribe.

Administrative Appeal of W. J. P. Graham and William S. Graham v. Area Director, B.I.A., Billings, and All Other Interested Parties, 4 IBIA 205 (Nov. 19, 1975) 82 I.D. 568

Grazing

Allocation

Generally

A tribal governing body may authorize the allocation of grazing privileges for tribal and tribally controlled Government land to Indian corporations, Indian associations, and adult tribal members.

Administrative Appeal of Sally Ann Pankratz and Aurelia Spencer v. Superintendent, Fort Belknap Agency; Area Director, Billings Area Office; Fort Belknap Community Council; and Arnold Allen, 4 IBIA 231 (Nov. 26, 1975) 82 I.D. 585

Revocation or Cancellation

The Superintendent may revoke or withdraw all or any part of a grazing permit by cancellation or modification on 180 days written notice for allocated Indian use.

Administrative Appeal of Sally Ann Pankratz and Aurelia Spencer v. Superintendent, Fort Belknap Agency; Area Director, Billings Area Office; Fort Belknap Community Council; and Arnold Allen, 4 IBIA 231 (Nov. 26, 1975) 82 I.D. 585

INDIAN LANDS--Continued

LEASES AND PERMITS--Continued

Long-term Business/Agriculture

Generally

In the absence of any qualifications, the plain and ordinary construction or meaning of the term gross receipts as contained in the lease must be given.

Administrative Appeal of Palm Patencio Co., Inc., et al. v. Winifred Patencio Preckwinkle et al., 5 IBIA 37 (Mar. 2, 1976)

If definition of gross receipts and other pertinent lease provisions governing rental consideration are unambiguous the plain terms must control. Otherwise, resort may be had to rules of construction and relevant parol evidence to assist in ascertaining the intentions of the parties.

Administrative Appeals of Thunderbird Theater Co., Inc., Solon F. and Marian T. Burns, Shell Oil Co. v. Commissioner, Bureau of Indian Affairs, et al., 6 IBIA 240 (Nov. 29, 1977)

Cancellation

A lease may be canceled by the Secretary, at the request of the lessor where lessee has failed to carry out specific provisions of the lease.

Administrative Appeal of Sessions, Inc. (A California Corp.) v. Richard Amado Miguel (Lessor), Lease No. PSL-35, 4 IBIA 84 (July 10, 1975) 82 I.D. 331

Rentals

Acceptance of rentals by a lessor subsequent to default on specific provisions of the lease by the lessee does not constitute waiver of items in default in the absence of showing that lessor voluntarily or intentionally waived the requirements under the lease.

Administrative Appeal of Sessions, Inc. (A California Corp.) v. Richard Amado Miguel (Lessor), Lease No. PSL-35, 4 IBIA 84 (July 10, 1975) 82 I.D. 331

The 20-percent limitation regarding rental adjustments appearing only in the ARBITRATION clause of the subject lease has no application to rental adjustments which may be effected pursuant to the RENTAL ADJUSTMENT clause of the lease and regulations.

Administrative Appeal of Norman R. Byrd v. Commissioner, Bureau of Indian Affairs, 7 IBIA 142 (May 11, 1979)

Waiver

Generally

Acceptance of rentals by a lessor subsequent to default on specific provisions of the lease by the lessee does not constitute waiver of items in default in the absence of showing that lessor voluntarily or intentionally waived the requirements under the lease.

Administrative Appeal of Sessions, Inc. (A California Corp.) v. Richard Amado Miguel (Lessor), Lease No. PSL-35, 4 IBIA 84 (July 10, 1975) 82 I.D. 331

INDIAN LANDS--Continued

PATENT IN FEE

Generally

Under regulations in effect before Apr. 24, 1973, issuance of a fee patent to a competent Indian applicant was considered by the Department to be mandatory. On the foregoing date, however, 25 CFR Part 121 was revised to reflect the authority derived from the authorizing Acts and to allow the exercise of discretion in the issuance of fee patents.

Administrative Appeal of Oglala Sioux Tribe v. Commissioner of Indian Affairs and Richard Tall (BBD-10562), 7 IBIA 188 (Sept. 5, 1979) 86 I.D. 425

Jurisdiction

Issuance of a patent in fee on a trust allotment results in the Secretary's loss of jurisdiction and authority thereover.

Administrative Appeal of James P. Bowen v. Superintendent, Northern Cheyenne Agency, et al., 3 IBIA 224 (Jan. 21, 1975) 82 I.D. 19

A decision by the Bureau of Land Management canceling fee simple patents issued to Indians and simultaneously issuing new Indian trust patents is not subject to review by the Board of Land Appeals, which has no jurisdiction in the matter, where the decision was made at the direction of the Assistant Secretary for Indian Affairs.

Blue Star, Inc., Atomic Western, Inc., Tremont Energy Corp., Ivor Adair, 41 IBLA 333 (July 11, 1979)

RESERVATION BOUNDARY

Where an Indian tribe acquired title to land under treaty, an erroneous survey of a boundary which became the boundary of an adjacent wilderness area, could be administratively corrected and control would be restored to the tribe under 16 U.S.C. § 473 (1970).

Taos Pueblo Tract C, M-36884 (Oct. 28, 1976) 83 I.D. 529

Once boundaries of a reservation are established, neither the boundaries nor title to tracts within them can be altered or abolished without a clear statement of Congressional intent to do so.

Opinion on the Boundaries of and Status of Title to Certain Lands Within the Colville and Spokane Indian Reservations, M-36887 (Feb. 2, 1977) 84 I.D. 72

RIGHTS-OF-WAY

It was not error for the administrative law judge to interpret ambiguous provisions of the subject right-of-way as if they were agreed to in an easement by contract through consideration of the intentions of the parties. If the easement was created by Federal grant, intentions of the parties could still be examined to resolve ambiguous language.

The intention of the parties was that appellant would consummate a lease of tribal tidelands as a condition to receiving the grant of a right-of-way over the tidelands.

INDIAN LANDS--Continued

RIGHTS-OF-WAY--Continued

Appellant was required to complete a lease of tribal tidelands before it could subject them to public use. The foremost condition of the right-of-way grant was that the public not have access to tribal tidelands before a shellfish protection plan could be incorporated in a lease of the tidelands.

There was an unauthorized opening of the right-of-way by appellant before completion of a tidelands lease agreement.

Appellant was required to make improvements on the right-of-way before it could be opened to the public. The Bureau of Indian Affairs was entitled to cancel the right-of-way grant in accordance with 25 CFR 161.20(a) when appellant violated this condition.

Administrative Appeal of Whatcom County Park Board (Appellant) v. Area Director, Portland Area Office, Bureau of Indian Affairs (Respondent), Lummi Indian Tribe (Intervenor), 6 IBIA 196 (Nov. 28, 1977)
84 I.D. 938

SUB-SURFACE ESTATES

An oil and gas lease offer must be rejected as to lands applied for which are held in trust for Indians and are not available under the Mineral Leasing Act. Even though the minerals in these lands have been reserved to the United States, mineral development is not possible at this time because the language of the exchange act under which the lands were acquired requires further promulgation of special regulations by the Secretary as a condition precedent to such development.

Thomas D. Chace, 31 IBLA 13 (June 17, 1977)

TAXATION

The taxation proviso contained in 25 U.S.C. § 398 (1970) does not apply to leases entered into under the 1938 Mineral Leasing Act (25 U.S.C. §§ 396a-396f (1970)). States cannot tax the production of oil and gas from such leases.

Tax Status of the Production of Oil and Gas from Leases of Fort Peck Tribal Lands under the 1938 Mineral Leasing Act, M-36896 (Nov. 7, 1977) 84 I.D. 905

The taxation proviso contained in 25 U.S.C. § 398c (1970) does not apply to leases entered into under the 1938 Leasing Act (25 U.S.C. §§ 396a-396f (1970)). States cannot tax tribal royalties from such leases.

Tax Status of the Production of Oil and Gas from Jicarilla Apache Tribal Lands Under the 1938 Indian Mineral Leasing Act, M-36896 (Supp.) (Mar. 2, 1979)
86 I.D. 181

TRESPASS

Damages

Notice and demand for collection of damages for trespass on Indian lands are prerequisites to filing suit in Federal district court to collect damages for trespass and is not subject to appeal under 25 CFR Part 2.

INDIAN LANDS--Continued

TRIBAL RIGHTS IN ALLOTTED LANDS

Absent regulation requiring otherwise the most equitable valuation date would be the date the Tribe elects to purchase the property of a noneligible heir or devisee.

The Board is not bound by the Bureau of Indian Affairs' appraisal, report, and findings contained therein. Instead, the Board will give consideration to the complete record, including the BIA appraisal, report and findings in arriving at its findings and determination.

Estate of Cecelia Smith Vergote (Borger), Morris A. (K.) Charles and Caroline J. Charles (Brendale), 5 IBIA 96 (May 21, 1976) 83 I.D. 209

Absent controlling guidelines in the statute concerning valuation date (fair market value) it is more equitable to charge the Yakima Tribe the fair market value of the property as of the date the Tribe elected to purchase same, i.e., Jan. 25, 1974.

Estate of Tesens (Timens) Vivian Gardafee, 5 IBIA 113 (May 27, 1976) 83 I.D. 216

A statutory option held by the Tribe to take such interests in lands which pass to specific heirs or devisees who are not enrolled members of the Tribe does not vest any rights in said interests until payment by the Tribe of the fair market value as determined by the administrative law judge, after hearing if demanded, plus unpaid interest.

Fair-market value date is considered to be the date of hearing to determine value or if no hearing, the date the judge makes an independent finding and judgment as to the fair market value of the interest to be taken.

Estate of Edward Lewis Pitt, 6 IBIA 156 (Oct. 17, 1977)
84 I.D. 854

The action of the Land Committee of the Yakima Tribe in voting to acquire allotted land at the fair market value as determined by the Bureau of Indian Affairs after an appraisal constituted an offer to purchase and not an acceptance of an offer.

Administrative Appeal of Hazel Hawk Visser v. Area Director, Portland Area Office, Bureau of Indian Affairs, 7 IBIA 22 (Feb. 17, 1978)

The fair market value date is considered to be the date of hearing to determine value.

Interest is due and payable only on the unpaid balance of the fair market value as determined from the date of filing the election to take by the Tribe.

A statutory option held by the Tribe to take interest in land under the Act of Dec. 31, 1970 (84 Stat. 1874, 25 U.S.C. § 607 (1970)), does not vest any right in such interests until payment by the Tribe of the fair market value as determined by the administrative law judge after hearing if demanded, plus interest.

Estate of Joseph Simmons, Sr., 7 IBIA 43 (Mar. 31, 1978)

INDIAN PROBATE

(See also Indian Lands, Indian Tribes--if included in this Index.)

GENERALLY

Where the constitutionality of the Act of Dec. 31, 1970 (25 U.S.C. § 607 (1970), 84 Stat. 1874), is challenged in court, the parties are not precluded from entering into a stipulation for settlement upon which the court may enter a consent judgment rendering a ruling upon the constitutional issue unnecessary.

Estate of Benjamin Harrison Stowby (Deceased Yakima Allottee No. 2455) and Estate of Mary G. Guiney Harrison (Deceased Colville Allottee No. S-925), 3 IBIA 243 (Feb. 4, 1975) 82 I.D. 55

The Department of the Interior does not have the authority to declare a statute unconstitutional as being in violation of the Constitution of the United States.

Estate of Joyce Mary James, 4 IBIA 81 (June 20, 1975)

Indians specifically excluded from the General Allotment Act are precluded from invoking rights extended by the Act or amendment thereto. However, simply because the Quapaws were allotted under a separate act of Congress does not support a conclusion that the heirship provisions of the General Allotment Act cannot be applied to them.

Where no section of the General Allotment Act suggests that the Quapaws were to be excluded from the Act's provisions and where no section of the Quapaw Allotment Act suggests the inapplicability of the General Allotment Act to allotted Quapaw lands, there lies a reasonable basis for jointly interpreting these Acts. The correctness of applying the heirship provisions of the General Allotment Act to the Quapaws is conclusively established because the Quapaw Allotment Act fails to adopt State law.

Estate of Louis Harvey Quapaw, 4 IBIA 263 (Dec. 23, 1975) 82 I.D. 640

The Department of the Interior does not have authority to declare a Federal statute unconstitutional.

Estate of William (Kenoa) Jackson, 6 IBIA 52 (May 4, 1977)

Omitted Indian heirs are entitled to an order showing their relationship to decedent as a matter of protecting their heritage, regardless of the de minimis value of the estate.

Estate of Alexander Joseph Williams, 6 IBIA 132 (Aug. 2, 1977)

ADMINISTRATIVE PROCEDURE

Generally

The administrative law judge's order determining heirs failed to satisfy requirements of the Administrative Procedure Act because of the absence of a statement of "findings and conclusions, and the reasons or basis therefore, on all the material issues of fact, law, or discretion presented on the record." 5 U.S.C.A. § 557(c). Under this circumstance, we believe it is

INDIAN PROBATE--Continued

ADMINISTRATIVE PROCEDURE--Continued

Generally--Continued

appropriate to consider appellant's new evidence on appeal and we conclude that such evidence justifies a rehearing on the issue of decedent's marital status prior to Dec. 16, 1953.

Estate of Mitchell Robert Cusearts (Kunski), 6 IBIA 10 (Jan. 27, 1977)

Applicability to Indian Probate

Opportunity to be represented and to be present and cross-examine witnesses in all the law requires as prerequisite of full administrative hearing.

Estate of Minnie Moses Capp, 7 IBIA 266 (Nov. 15, 1979)

The Board of Indian Appeals has authority to reverse findings of fact by an administrative law judge even when not clearly in error. But an administrative law judge will not be reversed when his decision turns upon findings concerning credibility, which in turn are based upon the demeanor of witnesses, and such findings are supported by substantial evidence.

Estate of Edward Lockwood, Jr., 7 IBIA 271 (Nov. 20, 1979)

Official Notice, Record

Official notice of documents and records will not be taken unless they are introduced in evidence or unless an order or stipulation provides to the contrary.

Estate of Peahnor (Mabell) (Mable) Mahseet, 5 IBIA 27 (Feb. 23, 1976)

ADOPTION (See also CHILDREN, ADOPTED--if included in this Index.)

Generally

An alleged adoption cannot be recognized where it has not been effected under any of the provisions of 25 U.S.C. § 372a (1970).

Estate of William (Kenoa) Jackson, 6 IBIA 52 (May 4, 1977)

APPEAL

Administrative Law Judge as Trier of Facts

An administrative law judge's finding based on that part of the evidence which printed words do not preserve are not ordinarily reviewable by the agency, and the administrative law judge's findings on veracity must not be overturned without very substantial preponderance in testimony as recorded.

Estate of Albin (Alvin) Shenasy, 7 IBIA 70 (July 3, 1978)

INDIAN PROBATE--Continued

APPEAL--Continued

Administrative Law Judge as Trier of Facts--Continued

It has been consistently held that an examiner's (presently administrative law judge) findings based on that part of the evidence which printed words do not preserve are not ordinarily reviewable by the agency, and examiner's findings on veracity must not be overturned without very substantial preponderance in testimony as recorded.

Estate of Fannie Wewrebe Choate, 7 IBIA 171 (July 31, 1979)

The weight and credibility of evidence are matters properly considered by an administrative law judge in the first instance. His findings, when in accord with the preponderance of the substantial and probative evidence adduced, will not be disturbed.

Where there is sufficient evidence to support the finding and testimony is conflicting the determination of witness credibility and the findings of the fact by examiner (now administrative law judge) will not be disturbed because only he had the opportunity to hear and observe the witnesses.

Estate of Roland Lord (Hokeadleah) Botone, 7 IBIA 177 (Aug. 16, 1979)

The weight and credibility of evidence are matters properly considered by an administrative law judge (in this matter, Examiner of Inheritance, Assistant Commissioner, Assistant Secretary of the Interior) in the first instance. His findings, when in accord with the preponderance of the substantial and probative evidence adduced, will not be distributed.

Estate of Guo-la a/k/a Thomas Jones, 7 IBIA 181 (Aug. 28, 1979)

The weight and credibility of evidence are matters properly considered by an administrative law judge in the first instance. His findings, when in accord with the preponderance of the substantial and probative evidence adduced, will not be disturbed.

An administrative law judge may upon his own motion or upon motion of any party in interest schedule a supplemental hearing, if he deems it necessary.

Estate of Mary Chippewa Jackson, 7 IBIA 224 (Oct. 15, 1979)

Extension of Time for Filing

That part of 43 CFR 4.22(f)(1) that precludes extensions of time for filing notices of appeal is jurisdictional from which there is no further administrative appeal or remedy.

Estate of Gei-kaun-mah (Mark), 4 IBIA 129 (Aug. 20, 1975) 82 I.D. 408

Matters Considered on Appeal

Jurisdiction is fundamental to the Board's reviewing authority and it will be examined on appeal even though not raised as an issue previously.

INDIAN PROBATE--Continued

APPEAL--Continued

Matters Considered on Appeal--Continued

Newly discovered evidence is to be presented in support of a petition for a rehearing and will not be considered on an appeal.

Estate of Louis Harvey Chance, 4 IBIA 263 (Dec. 23, 1975) 82 I.D. 640

The Board is not required to consider new evidence first raised on appeal. However, were the Department disposed to ignoring its own regulations governing when new evidence shall be considered, appellants' case still would not be bolstered by an exceptional consideration of evidence now tendered.

Estate of Harold Henry, 5 IBIA 132 (June 18, 1976)

To apply the doctrine that newly discovered evidence shall not be considered on appeal would be unjust to appellant in this case who by virtue of the lack of findings and conclusions in the administrative law judge's original order was unable to perceive the nature of new evidence required to support a valid petition for rehearing.

Estate of Mitchell Robert Quapita (Kunchi), 6 IBIA 10 (Jan. 27, 1977)

Timely Filing

The date the petition is received in the Department of the Interior, rather than the date it was mailed, controls.

Estate of Cato T. Papiabiz (Tomes), 4 IBIA 132 (Aug. 20, 1975)

An appeal not filed within the time specified under Departmental Probate regulations will not be entertained and will be dismissed.

Estate of Edward Alphous Jones, 5 IBIA 138 (June 16, 1976)

Estate of George (Sharkrock) White Antelope, 7 IBIA 166 (Dec. 6, 1978)

Appeals not timely filed under the regulations will be rejected and dismissed.

Estate of Johnny Bill Justis, 7 IBIA 9 (Jan. 30, 1978)

ATTORNEYS AT LAW

Generally

There is no existing requirement that the Secretary of the Interior furnish counsel to parties in Indian probate proceedings conducted in accordance with 43 CFR 4.200 *et seq.* Secondly, the absence of eligible private counsel from an Indian probate hearing, standing alone, does not present sufficient justification for requiring a rehearing in order to receive additional evidence.

Under the circumstances of a contested will which includes a devise of property to a brother long dead, a "self-proved will" does not pass muster by perfunctory questioning of witnesses. Further, although the task of the administrative law judge to develop a complete

INDIAN PROBATE--Continued

ATTORNEYS AT LAW--Continued

Generally--Continued

record may be made more difficult by the absence of counsel for the parties, this important function must still be satisfied.

An administrative law judge is obligated to advise Indian parties of their right to counsel in Indian probate proceedings. When parties voluntarily proceed with a hearing without counsel the administrative law judge shoulders an additional responsibility.

Estate of Peahner (Mabel) (Mable) Mahseet, 5 IBIA 27 (Feb. 23, 1976)

The administrative law judge shoulders additional responsibility in developing a complete record when parties proceed with a hearing without counsel. In this case the Board is satisfied that the administrative law judge fully utilized the hearings to bring forth all the facts.

Estate of Harold Humpy, 5 IBIA 132 (June 18, 1976)

Administrative law judges bear an additional responsibility when parties voluntarily proceed with probate proceedings without counsel. Here the record shows that the administrative law judge has done all which could reasonably be expected in assisting the aggrieved parties pursue their claims.

Estate of Simpson Mokusille, 5 IBIA 178 (Sept. 24, 1976)

The administrative law judge has an added responsibility to make a complete record when the parties appear without counsel. Appellant was not denied due process by proceeding to conduct contest of decedent's will without assistance of legal counsel.

Estate of George Tsalote, 7 IBIA 261 (Oct. 30, 1979)

Fees

Reasonable fees may be allowed attorney for petitioner in a Departmental reopening where attorney petitions for their allowance and his client agrees that they should be paid, then such fees may be ordered paid from Indian client's recovered distributive share.

Estate of Charley (Jack) Santio, 4 IBIA 244 (Dec. 2, 1975)

Where briefs on appeal indicate a contingency fee arrangement has been made for attorney's fees, provisions of 25 U.S.C. §§ 1, 2, 81, 372, and 373 (1976), and 43 CFR 4.281 require approval of the fee arrangements by the Department.

Estate of San Pierre Kilkakhan (Sam E. Hill), 7 IBIA 240 (Oct. 23, 1979)

Provisions of 43 CFR 4.281 allow the administrative law judge to set a reasonable attorney's fee upon a proper showing by a party in an Indian probate matter. The basis for the fee set must be made to appear of record.

Estate of Frances Agnes Primeaux Stabler Iron Roubedeaux, 7 IBIA 254 (Oct. 25, 1979)

INDIAN PROBATE--Continued

CANADIAN INDIAN (*See also* NATIONAL OF ANOTHER COUNTRY--if included in this Index.)

Where evidence regarding nationality of heirs is conflicting and incomplete, another hearing is required to resolve the question.

Estate of San Pierre Kilkakhan (Sam E. Hill), 7 IBIA 240 (Oct. 23, 1979)

CHILDREN, ADOPTED (*See also* ADOPTION--if included in this Index.)

Indian Custom Adoptions

An Indian custom adoption, alleged to have been made prior to the date of the Act of July 8, 1940 (54 Stat. 746, 25 U.S.C. § 372a (1970)), cannot be recognized as valid unless the adoption is recorded, as provided in the Act, during the lifetime of the adoptive parents.

Estate of Milward Wallace Ward, 4 IBIA 97 (July 16, 1975)
82 I.D. 381

An Indian custom adoption, alleged to have been made prior to the effective date of the Act of July 8, 1940, cannot be recognized as valid unless the adoption is recorded, as provided in the Act, during the lifetime of the adoptive parent.

Before an adoption by Indian custom, made prior to July 8, 1940, shall be recognized as valid, it shall be recorded with the superintendent of the agency.

Estate of Mary Chippewa Jackson, 7 IBIA 224 (Oct. 15, 1979)

CHILDREN, ILLEGITIMATE

Generally

In a case of illegitimacy, it is a reasonable presumption that an unmarried father may refrain from widely proclaiming parenthood.

Estate of Louis Harvey Quapaw, 4 IBIA 263 (Dec. 23, 1975)
82 I.D. 640

In a case of illegitimacy, it is a reasonable presumption that a father may refrain from widely proclaiming parenthood. Here, however, the decedent had sworn before an officer of the court that he was the father of the appellee.

Estate of Asa Cottonwood, 7 IBIA 138 (Apr. 10, 1979)

CLAIM AGAINST ESTATE (*See also* DIVORCE--if included in this Index.)

Generally

Appellant fails to refer to any persuasive authority which directs against the submission of a general claim against a deceased Indian's trust estate on someone else's behalf. In the absence of a specific regulation to this effect in 43 CFR 4.250 *et seq.*, regarding claims against estates, we believe it would be inequitable for this Board to nullify an individual Indian's proved claim on the merely technical basis that the claim was filed for and not by the claimant.

In fairness to individual Indian claimants who have had neither the benefit of their own counsel nor guidance from the administrative law judge which could have averted a correctable alleged error in the manner of a

INDIAN PROBATE--Continued

CLAIM AGAINST ESTATE (*See also* DIVORCE--if included in this Index.)--Continued

Generally--Continued

claim presentation, it is no stretch of the Secretary's administrative authority to uphold such a claim on appeal despite a showing of such possible error.

Estate of Wahweraee B. Perquewah, 5 IBIA 169 (Aug. 24, 1976)

Care and Support

A claim for services rendered the decedent has been consistently denied where there is no evidence of any agreement to pay at the time the services were alleged to have been rendered, and no expectation on the part of the claimant that they would be paid for.

Estate of Edith Anderson Pretty Bird Perron, 6 IBIA 41 (Mar. 17, 1977)

A general promise of compensation given by decedent for care and support of decedent's daughter is not invalid or unenforceable merely because specific sums or terms of compensation were not recited in the promise.

Estate of Lucille Mathilda Callous Leg Ireland, 6 IBIA 120 (July 21, 1977)

Claim by devisee under a will for amount for care and support of decedent must be disallowed where not supported by facts and where the claimant had no expectation of payment, and none had been promised by decedent.

Estate of Cleveland Iron Shooter, 7 IBIA 212 (Sept. 12, 1979)

Limitation on Actions

It was within the authority of the administrative law judge to disallow appellant's claim where the evidence shows that a similar claim would be barred under State law as untimely.

Estate of Lawrence Ecoffey, 5 IBIA 85 (Apr. 16, 1976)

Proof of Claim

An unsecured creditor is hard-pressed to overcome objections to his claim if he fails to appear at the probate hearing. This possibility is conveyed to general creditors in the notice of hearing.

Estate of Lawrence Ecoffey, 5 IBIA 85 (Apr. 16, 1976)

Alleged failure of hospital receiving Federal funding under Hill-Burton Act to provide free care as required by the Act does not bar the hospital's claim for care in an Indian probate proceeding where neither decedent nor those claiming to be his heirs had exhausted administrative procedures required by the Act to establish decedent's entitlement to free hospital care.

Estate of Cleveland Iron Shooter, 7 IBIA 212 (Sept. 12, 1979)

INDIAN PROBATE--Continued

CLAIM AGAINST ESTATE (*See also* DIVORCE--if included in this Index.)--Continued

Secured Claim

Generally

If the tribal credit board is correct in its assertion that its claim is secured by a valid Assignment of Trust Income and Power to Lease, legal steps may be taken outside the probate of decedent's estate to seek redress.

Estate of Lawrence Ecoffey, 5 IBIA 85 (Apr. 16, 1976)

Source of Funds for Payment

Hospital bill in an amount larger than cash assets of trust estate must be paid according to regulations governing such payment as established by the Secretary of the Department of the Interior at 43 CFR 4.250 and 4.252.

Estate of Cleveland Iron Shooter, 7 IBIA 212 (Sept. 12, 1979)

CODE OF FEDERAL REGULATIONS (43 CFR Part 4 formerly Title 25 Part 15-Interpretation & Construction)

Generally

Hospital bill in an amount larger than cash assets of trust estate must be paid according to regulations governing such payment as established by the Secretary of the Department of the Interior at 43 CFR 4.250 and 4.252.

Estate of Cleveland Iron Shooter, 7 IBIA 212 (Sept. 12, 1979)

COMPROMISE SETTLEMENTS

Generally

Absent approval by an authorized representative of the Secretary of the Interior a document purporting to constitute a primary devisee's relinquishment of her inherited interest of a deceased Indian's trust estate can be given no effect. Nor can such an instrument be the basis for a compromise settlement pursuant to 43 CFR 4.207 when the primary devisee disavows the alleged agreement before the administrative law judge.

Estate of Charles Red Breath Bear, 6 IBIA 36 (Feb. 14, 1977)
84 I.D. 97

DETERMINATION OF HEIRS BY WAIVER OR AGREEMENT

Generally

Absent approval by an authorized representative of the Secretary of the Interior a document purporting to constitute a primary devisee's relinquishment of her inherited interest of a deceased Indian's trust estate can be given no effect. Nor can such an instrument be the basis for a compromise settlement pursuant to 43 CFR 4.207 when the primary devisee disavows the alleged agreement before the administrative law judge.

Estate of Charles Red Breath Bear, 6 IBIA 36 (Feb. 14, 1977)
84 I.D. 97

INDIAN PROBATE--Continued

DETERMINATION OF HEIRS BY WAIVER OR AGREEMENT--Continued

Generally--Continued

Where prior determination of heirship by agreement is questioned and it appears an agreed heir may not have been entitled to take, the circumstances of the case require the estate be reopened.

Estate of San Pierre Kilbakhan (Sam E. Hill), 7 IBIA 240 (Oct. 23, 1979)

DIVORCE

Generally

The issue of divorce in this case is not controlled by the laws of the State of Washington. The evidence establishes that the separation between the decedent and appellant commenced in 1958, 5 years before the Act of Aug. 15, 1953, 67 Stat. 589 (Public Law 280), was invoked by Washington in its assumption of civil jurisdiction over Indians.

Estate of John Ignace, 5 IBIA 50 (Mar. 19, 1976)

Indian Custom

Generally

Assuming that a resolution adopted by the Business Committee of the Kalispel Tribe on May 8, 1975, which disavows the validity of Indian-custom divorces between Kalispel Indians married by the Catholic Church represents a formally approved ordinance or by-law of the Tribe, it cannot be given the retroactive effect of invalidating previous divorces which were consummated in accordance with recognized Indian custom.

Since it is well established that an Indian-custom divorce dissolves a ceremonial marriage as well as an Indian-custom marriage, the relevant fact in this case is whether the custom of the tribe permits divorce by a permanent separation of the parties. The church custom of particular members of the tribe, whether Catholic or some other religious order, has no bearing unless it can be shown that the tribe adopted specific laws or customs of the church as its own.

Estate of John Ignace, 5 IBIA 50 (Mar. 19, 1976)

A divorce in accordance with Indian custom may be accomplished unilaterally by either of the parties to a marriage. The fact of a separation, plus an intention on the part of at least one of the parties that the separation shall be permanent, established by competent evidence is sufficient to terminate a marriage.

An Indian custom divorce dissolves a ceremonial marriage as well as an Indian custom marriage.

Estate of Henry Frank Racine, 7 IBIA 1 (Jan. 10, 1978)

In order to accomplish an Indian custom divorce by either of the parties to the marriage, it is necessary to establish by convincing evidence that a separation occurred plus the intent on the part of at least one of the parties that the separation was permanent.

Estate of Matthew Cook, 7 IBIA 62 (May 5, 1978)

INDIAN PROBATE--Continued

DIVORCE--Continued

Indian Custom--Continued

Generally--Continued

A divorce in accordance with Indian or tribal custom has long been recognized by the Congress, the courts, and the Department.

The courts have recognized Indian-custom divorces so long as the Indians continue in tribal relations.

In recognizing the validity of Indian-custom divorces, no distinction is made in the kind of marriage which such divorce dissolves so long as the parties contracting the marriage and effecting the divorce are Indian wards of the Government and living in tribal relations.

A divorce by Indian custom may be accomplished unilaterally by either of the parties to the marriage.

The validity of Indian-custom divorce depends on whether the parties were living in tribal relations and whether it was an accepted and recognized custom of the tribe involved.

Estate of Harold Emery, 7 IBIA 118 (Mar. 29, 1979)
86 I.D. 213

To establish an Indian custom divorce, it must be shown the parties were living in "tribal relations" and both the custom relied upon and specific conduct in conformity to custom must also appear. The evidence is insufficient to show Indian custom divorce where there is no evidence that Indian custom divorce was practiced by the tribe to which the marriage partners belonged, and where the conduct of the partners indicated no such practice was intended.

Estate of Frances Agnes Primeaux Stabler Iron Bordeaux, 7 IBIA 254 (Oct. 25, 1979)

DOWER

Generally

Dower may be properly denied a widow disinherited by will since there is no constitutional right to it and the State law providing dower is inoperative upon Indian Trust lands generally.

Estate of Louis Baptist, 5 IBIA 69 (Mar. 8, 1976)

Dower does not fall to the widow as an heir of her husband, but by virtue of her marital right and without regard to the law relating to the rights of heirs.

Estate of Mary Chippewa Jackson, 7 IBIA 220 (Oct. 15, 1979)

EVIDENCE

Generally

The general rule that an administrative law judge's finding of testamentary capacity rendered after consideration of conflicting testimony will not be disturbed on appeal is not an unqualified rule. The judge's finding must be supported by substantial evidence and the evidence relied upon must be competent.

Estate of Peahney (Mabell) (Mable) Mahseet, 5 IBIA 23 (Feb. 23, 1976)

INDIAN PROBATE--Continued

EVIDENCE--Continued

Generally--Continued

In order for an administrative law judge's finding to be upheld or sustained, the finding must be supported by a preponderance of the evidence.

Estate of Alvin Hudson. 5 IBIA 174 (Sept. 2, 1976)

Department rules of evidence permit consideration of affidavits or other evidence not ordinarily admissible under the generally accepted rules of evidence. When a crucial witness who stands to gain nothing from the outcome of an estate is prevented from personally appearing at a hearing for reasons of health, her sworn testimony by way of affidavit should be given due consideration. Here, such an affidavit was also bolstered by other probative evidence.

Estate of Alexander Joseph Williams. 6 IBIA 132 (Aug. 2, 1977)

Where a stipulation is used to establish material facts tending to prove nationality, and where nationality of heirs is a material issue in the probate proceedings, the administrative law judge must, pursuant to 43 CFR 4.232(c), determine that all parties and their attorneys understand the stipulation and its effect, and that all consent to the use of the stipulation as evidence to prove the agreed facts.

Where the record fails to establish the consent of all the parties to a stipulation of fact, the parties may be relieved from the stipulation in the interests of justice.

A stipulation is not binding upon the parties where the stipulation offered to establish facts concerning nationality contains an erroneous conclusion of law.

Estate of San Pierre Kilbakhan (Sam E. Hill). 7 IBIA 240 (Oct. 23, 1979)

The burden of proof as to testamentary incapacity in Indian Probate proceedings is on those contesting the will.

Estate of Winnie Moves Camp. 7 IBIA 266 (Nov. 15, 1979)

Conflicting Testimony

An administrative law judge's findings based on that part of the evidence which printed words do not preserve, such as demeanor and conduct of witnesses, are not ordinarily reviewable. This case however turns on interpretation of documentary evidence and affidavits which this panel is equally qualified to evaluate on appeal.

Estate of Alexander Joseph Williams. 6 IBIA 132 (Aug. 2, 1977)

Where there is sufficient evidence to support the findings and the testimony is conflicting, the determination of witness credibility and the findings of fact of the Examiner (now administrative law judge) will not be disturbed.

Estate of Mary Chippewa Jackson. 7 IBIA 224 (Oct. 15, 1979)

INDIAN PROBATE--Continued

EVIDENCE--Continued

Hearsay Evidence

Alleged declarations of the decedent were properly considered in this case under an exception to the hearsay evidence rule. In addition, Departmental regulations bestow broad authority upon the administrative law judge to consider evidence "not ordinarily admissible under the generally accepted rules of evidence." 43 CFR 4.232(b).

Estate of Harold Emery. 5 IBIA 132 (June 16, 1976)

It has long been recognized that though hearsay evidence lacks certain guarantees of trustworthiness such as amenability to cross-examination, it may yet be relevant and have probative value. At any rate, we do not think the hearsay rule is applicable to administrative proceedings so long as the evidence upon which an order is ultimately based is both substantial and has probative value.

The requirement that the administrative findings accord with the substantial evidence does not forbid administrative utilization of probative hearsay in making such findings.

Estate of Gus-la a/k/a Thomas Jones. 7 IBIA 181 (Aug. 28, 1979)

Newly Discovered Evidence

Newly discovered evidence is to be presented in support of a petition for a rehearing and will not be considered on an appeal.

Estate of Louis Harvey Chapoose. 4 IBIA 263 (Dec. 23, 1975) 82 I.D. 640

There is no existing requirement that the Secretary of the Interior furnish counsel to parties in Indian probate proceedings conducted in accordance with 43 CFR 4.200 *et seq*. Secondly, the absence of eligible private counsel from an Indian probate hearing, standing alone, does not present sufficient justification for requiring a rehearing in order to receive additional evidence.

Estate of Peahnee (Mabel) (Mable) Mahseet. 5 IBIA 27 (Feb. 23, 1976)

The Board is not required to consider new evidence first raised on appeal. However, were the Department disposed to ignoring its own regulations governing when new evidence shall be considered, appellants' case still would not be bolstered by an exceptional consideration of evidence now tendered.

Estate of Harold Emery. 5 IBIA 132 (June 16, 1976)

To apply the doctrine that newly discovered evidence shall not be considered on appeal would be unjust to appellant in this case who by virtue of the lack of findings and conclusions in the administrative law judge's original order was unable to perceive the nature of new evidence required to support a valid petition for rehearing.

The administrative law judge's order determining heirs failed to satisfy requirements of the Administrative

INDIAN PROBATE--Continued

EVIDENCE--Continued

Newly Discovered Evidence--Continued

Procedure Act because of the absence of a statement of "findings and conclusions, and the reasons or basis therefore, on all the material issues of fact, law, or discretion presented on the record." 5 U.S.C.A. § 557(c). Under this circumstance, we believe it is appropriate to consider appellant's new evidence on appeal and we conclude that such evidence justifies a rehearing on the issue of decedent's marital status prior to Dec. 16, 1953.

Estate of Mitchell Robert Cusempts (Russell), 6 IBIA 10 (Jan. 27, 1977)

Newly discovered evidence may be presented in support of the petition for rehearing but the Board is not required to consider it on appeal.

Estate of Hank Cluette, 6 IBIA 47 (Apr. 1, 1977)

Newly discovered evidence which is the same in nature as that previously considered does not present for consideration any new facts or evidence relative to petitioner's paternity and is merely cumulative of evidence already presented.

Estate of Goo-la a/k/a Thomas Jones, 7 IBIA 181 (Aug. 28, 1979)

Presumptions

Although the marriage provisions of a law and order code may be interpreted as recognizing as valid only marriages accomplished by licensing and ceremony, there is a strong public policy favoring marriage which advises that a marraige should be presumed valid unless disproved. This presumption has been extended to marriage by Indian custom.

Estate of Johnnie Holmes, 4 IBIA 175 (Oct. 31, 1975)
82 I.D. 531

In a case of illegitimacy, it is a reasonable presumption that an unmarried father may refrain from widely proclaiming parenthood.

Estate of Louis Harvey Quaray, 4 IBIA 263 (Dec. 23, 1975)
82 I.D. 640

In a case of illegitimacy, it is a reasonable presumption that a father may refrain from widely proclaiming parenthood. Here, however, the decedent had sworn before an officer of the court that he was the father of the appellee.

Estate of Asa Cottonwood, 7 IBIA 138 (Apr. 10, 1979)

Statutory presumption favoring legitimacy of children born within 10 months of divorce may be overcome by strong contrary evidence. Where husband of appellee's mother stated that he separated from appellee's mother several years before the birth of appellee and that another man was the father of appellee, and his statement was supported by other evidence and the circumstances of the case, the presumption was overcome.

Where petitioner at hearing reopening estate failed to produce new evidence to show original order distributing estate 22 years earlier was in error, the evidence was insufficient to permit modification of the original order. Testimony which is merely cumulative of prior evidence or which elaborates prior evidence is not sufficient to overturn the first order.

EVIDENCE--Continued

Presumptions--Continued

Estate of Tie Tieyah, 7 IBIA 234 (Oct. 17, 1979)

Proof of Marriage

Although the marriage provisions of a law and order code may be interpreted as recognizing as valid only marriages accomplished by licensing and ceremony, there is a strong public policy favoring marriage which advises that a marriage should be presumed valid unless disproved. This presumption has been extended to marriage by Indian custom.

Estate of Johnnie Holmes, 4 IBIA 175 (Oct. 31, 1975)
82 I.D. 531

Requests for Discovery

The Department's regulations concerning the rights of parties to submit discovery request, 43 CFR 4.220 *et seq.*, were designed to facilitate the achievement of a full and complete hearing. The regulations do not provide that an administrative law judge should reopen discovery after a hearing to assist aggrieved parties in a search for new evidence. However, where a hearing de novo has been found to be required, it is appropriate to reopen discovery for all parties up to the time that a new hearing is scheduled.

Estate of Peahnee (Mabel) (Mable) Mahseet, 5 IBIA 27 (Feb. 23, 1976)

HALF BLOOD

Generally

State statutes of descent and distribution as construed and interpreted by the highest court of the State involved will be considered by the Department as controlling in trust heirship proceedings.

Estate of Hubert Franklin Cook, 5 IBIA 42 (Mar. 4, 1976)
83 I.D. 75

HEARING (*See also* ADMINISTRATIVE PROCEDURE, REHEARING--if included in this Index.)

Generally

Although Indian probate proceedings need not be open, public hearings, parties in interest cannot be excluded therefrom.

Estate of Rena Marie Edge, 7 IBIA 53 (Apr. 25, 1978)

Full and Complete

A full and complete hearing is had on proof of a will when all parties are afforded an opportunity to present evidence and to cross-examine witnesses.

Estate of Biensteppie (Maggie) Whiz Abbott, 4 IBIA 12 (Apr. 17, 1975)
82 I.D. 169
(*See also* 7 IBIA 53, 85 I.D. 617 (1978).)

INDIAN PROBATE--Continued

HEARING (See also ADMINISTRATIVE PROCEDURE, REHEARING--if included in this Index.)--Continued

Full and Complete--Continued

The administrative law judge shoulders additional responsibility in developing a complete record when parties proceed with a hearing without counsel. In this case the Board is satisfied that the administrative law judge fully utilized the hearings to bring forth all the facts.

Estate of Harold Emery, 5 IBIA 132 (June 18, 1976)

The administrative law judge has an added responsibility to make a complete record when the parties appear without counsel. Appellant was not denied due process by proceeding to conduct contest of decedent's will without assistance of legal counsel.

Estate of George Tsalote, 7 IBIA 261 (Oct. 30, 1979)

When a party to an Indian probate proceeding appears without an attorney, the administrative law judge has a duty not to be a mere umpire, but to see that all relevant facts are developed.

Where a party to an Indian probate proceeding was not represented by counsel and was obviously unprepared for proper presentation of testimony and ignorant of significance of the facts, the administrative law judge had the duty to see that all relevant facts and circumstances, both favorable and unfavorable to the parties, were brought out.

Estate of Joe (Jose) Elvino Juancho, 7 IBIA 294 (Dec. 4, 1979)

Notice

Agency Superintendents are required to furnish all wills in their custody to the administrative law judge upon the maker's death, not only the latest will, since a decedent's purported last will and testament shall not be deemed valid "unless and until it shall have been approved by the Secretary of the Interior." 25 U.S.C. § 373 (1970). Accordingly, the term "each party in interest" to whom specific notice of hearing is required by 43 CFR 4.211(b), should include all devisees of all wills of a decedent which are in the Superintendent's custody at decedent's death, as well as decedent's heirs at law.

Estate of Fannie Newrobe Choate, 6 IBIA 144 (Sept. 9, 1977)

HEARING EXAMINER (See also ADMINISTRATIVE LAW JUDGE--if included in this Index.)

Authority

In administrative hearings, the hearing examiner (now administrative law judge) has wide latitude as to all phases of the conduct of the hearing, including the manner in which the hearing will proceed.

Estate of Mary Chippewa Jackson, 7 IBIA 224 (Oct. 15, 1979)

INDIAN PROBATE--Continued

HOMESTEAD RIGHT

Generally

The Department of the Interior has recognized homestead rights in those cases where such rights have been found necessary and purposeful in the distribution of intestate estates under State law.

Estate of Ellen Phillips, 7 IBIA 100 (Dec. 6, 1978) 85 I.D. 438

INDIAN REORGANIZATION ACT of June 18, 1934 (WHEELER-HOWARD ACT) (25 U.S.C. § 464 et seq.)

Generally

The Indian Reorganization Act, generally, recognizes two classes of persons who may take testator's lands by devise, that is, any member of the tribe having jurisdiction over such lands and legal heirs of the testator.

Estate of Lucinda Shelton Joe, 5 IBIA 50 (Feb. 4, 1976)

Estate of Davey Cleveland, 5 IBIA 72 (Apr. 15, 1976) 83 I.D. 170

Estate of Phoebe Shanta Wilson, 6 IBIA 75 (May 12, 1977) 84 I.D. 187

The Act recognizes two classes of persons who may take testator's lands by devise, that is, any member of the Tribe having jurisdiction over such lands and legal heirs of the testator or testatrix.

Estate of William (Kenoal) Jackson, 6 IBIA 52 (May 4, 1977)

Estate of Dorothy Sheldon, 7 IBIA 11 (Feb. 7, 1978) 85 I.D. 31

Construction of Section 4

The words "or any heirs of such member" found in sec. 4 (25 U.S.C. § 464 (1970)) were early concluded by the Solicitor to mean those who would, in absence of the will, have been entitled to share in the estate.

Estate of Davey Cleveland, 5 IBIA 72 (Apr. 15, 1976) 83 I.D. 170

"Any heir of such member" as used in sec. 464 means those who would, in the absence of a will, have been entitled to share in the estate.

Estate of William (Kenoal) Jackson, 6 IBIA 52 (May 4, 1977)

Estate of Dorothy Sheldon, 7 IBIA 11 (Feb. 7, 1978) 85 I.D. 31

Sec. 4 of Indian Reorganization Act of 1934 (25 U.S.C. § 464 (1976)) is not unconstitutionally discriminatory against named devisee of decedent's will where the Act operates to achieve a recognized aim of Indian legislation.

The reorganization of the Rosebud Sioux Tribe under a constitution and bylaws and a charter, pursuant to the Indian Reorganization Act of 1934, is a reasonable application of the Act and conforms to standards of reasonableness required in such cases. The self-determination, by the Tribe, of its own membership, *INDIAN PROBATE*--Continued

INDIAN REORGANIZATION ACT of June 18, 1934 (WHEELER-HOWARD ACT) (25 U.S.C. § 464 *et seq.*) --Continued

Construction of Section 4--Continued

was in furtherance of the Congressional purpose expressed by the 1934 Act, and was properly approved by the Department concerned.

So long as a scheme for testamentary disposition established by law and regulation conforms to some generally accepted purpose for disposition and organization of Indian trust property it will not be disturbed by the courts.

Estate of Cleveland Iron Shooter, 7 IBIA 212 (Sept. 12, 1979)

Nonapplicability

Certain provisions of the Indian Reorganization Act, including the section which dictates who may take testator's land by devise, do not apply to certain named Indian tribes in Oklahoma, including the Kiowa, Comanche, and Apache tribes.

Estate of Phoebe Shanta Wilson, 6 IBIA 75 (May 12, 1977) 84 I.D. 187

INHERITING (*See also* CHILDREN ADOPTED, CHILDREN ILLEGITIMATE--if included in this Index.)

Non-Indian

The United States has no interest to protect in trust lands inherited by a non-Indian, therefore not obligated to provide services or protection to such a person.

Administrative Appeal of James P. Bowen v. Superintendent, Northern Cheyenne Agency, et al., 3 IBIA 224 (Jan. 21, 1975) 82 I.D. 19

JUDICIAL REVIEW

Generally

Where the constitutionality of the Act of Dec. 31, 1970 (25 U.S.C. § 607 (1970), 84 Stat. 1874), is challenged in court, the parties are not precluded from entering into a stipulation for settlement upon which the court may enter a consent judgment rendering a ruling upon the constitutional issue unnecessary.

Estate of Benjamin Harrison Stowby (Deceased Yakima Allottee No. 2455) and Estate of Mary G. Guiney Harrison (Deceased Colville Allottee No. S-925), 3 IBIA 243 (Feb. 4, 1975) 82 I.D. 55

MARRIAGE

Common Law

To enter into a valid common-law marriage there has to be an actual and mutual agreement to enter into marital relationship, permanent and exclusive of all others, between capable persons in law making such contract, consummated by their cohabitation as man and wife or their mutual assumption openly of the marital duties and obligations.

Estate of Guo-la a/k/a Thomas Jones, 7 IBIA 181 (Aug. 28, 1979)

INDIAN PROBATE--Continued

MARRIAGE--Continued

Common Law--Continued

The evidence was insufficient to establish a common-law marriage where the parties did not hold themselves out to be married, and where one of the parties refused to publicly and openly acknowledge marriage to the other.

Estate of Frances Acres Primeaux Stabler Iron Bourdeaux, 7 IBIA 254 (Oct. 25, 1979)

Common-law marriage is not established where one claiming to be the common-law wife of decedent testifies she cannot recall the time the alleged marriage occurred, and where her claim is not supported by a preponderance of other credible evidence, showing public assumption of the marriage relationship.

Estate of Edward Lockwood, Jr., 7 IBIA 271 (Nov. 20, 1979)

Common Law and Indian Custom Distinguished

Proof at hearing tended to show Indian marriage customs were no longer practiced by the tribe concerned, and that the parties looked only to applicable State laws to regulate their domestic affairs. Indian custom marriage is not synonymous with common-law marriage, but requires proof of Indian marriage customs and conformity in practice to those customs by persons living in "tribal relations."

Estate of Frances Acres Primeaux Stabler Iron Bourdeaux, 7 IBIA 254 (Oct. 25, 1979)

Indian Custom

Generally

In the absence of controlling Federal legislation or formal tribal action, marriages of Indians living in tribal relation may be contracted and dissolved in accordance with Indian custom.

Estate of Henry Frank Racine, 7 IBIA 1 (Jan. 10, 1978)

A marriage contract between members of an Indian tribe in accordance with the customs of such tribe, where the tribal relations and government existed at the time of such marriage, and there is no Federal statute rendering the tribal customs invalid, will be recognized and upheld by the courts of this State (Oklahoma) as a regular and valid marriage for all purposes. Such marriages are not to be treated as common-law marriages, but as legal marriages, according to the custom of the tribe.

Estate of Guo-la a/k/a Thomas Jones, 7 IBIA 181 (Aug. 28, 1979)

Proof of Marriage

Where a law and order code contains no express provision nullifying an Indian custom marriage and where State law affirmatively recognizes such marriage, an uncontested determination of heirship handed down two decades ago which is consistent with State law respecting valid marriages, ought not be disturbed.

Estate of Johnnie Holmes, 4 IBIA 175 (Oct. 31, 1975) 82 I.D. 531

INDIAN PROBATE--Continued

MARRIAGE--Continued

Proof of Marriage--Continued

As between two alleged common law marriages, the law favors the most recent in time over a relationship between two who formerly were married.

Estate of Phillip Tooisgah, 4 IBIA 189 (Nov. 13, 1975)
82 I.D. 541

Proof of a marriage must be established by clear and convincing evidence by the one alleging such a marriage.

Estate of Matthew Cook, 7 IBIA 62 (May 5, 1978)

NOTICE OF HEARING

Generally

It is incumbent upon one claiming lack of notice of a hearing by the Interior Department to determine heirs of a deceased allottee to make a showing of such lack.

Estate of Tenie Teanie Lean Jack Wagon Hill Reyes, 4 IBIA 156 (Oct. 17, 1975) 82 I.D. 522

PLEADING (*See also* APPEAL, PETITION FOR REHEARING--if included in this Index.)

Extension of Time

A timely request for an extension of time was submitted to the appropriate office on Oct. 15, 1976, as a result of the personal visit by appellant's representative to the Agency Superintendent that day, during which time Bureau assistance was provided in drafting such request.

Where an extension request was sent to the wrong office for filing on account of incorrect advice from Department personnel who are responsible for knowing right procedures, the Department is estopped from denying such request on grounds that it was not filed at the proper place.

Estate of James Andrews White, a/k/a James P. Andrews, 6 IBIA 79 (May 24, 1977) 84 I.D. 241

RECONSIDERATION (*See also* APPEAL: RECONSIDERATION--if included in this Index.)

Generally

Indian probate regulations do not contain any provisions for reconsideration of a matter which has been finally determined by the Secretary of the Interior, yet he has the inherent power to reopen and review administrative determinations when some new factors such as newly discovered evidence or fraud are involved.

A request for reconsideration of the action of the Department in approving a will which is based upon an allegation of undue influence, or fraud in its procurement, will be denied where no evidence is furnished in support of the allegation.

Estate of Ruth Wahcotaty (Williams or Daukei) (Caddo Allottee No. 19), 3 IBIA 270 (Mar. 7, 1975)

INDIAN PROBATE--Continued

RECONSIDERATION (*See also* APPEAL: RECONSIDERATION--if included in this Index.)--Continued

Generally--Continued

Indian probate regulations do not contain any provisions for reconsideration of a matter which has been finally determined by the Secretary of the Interior, yet he has the inherent power to reopen and review administrative determinations when some new factors such as newly discovered evidence or fraud are involved.

Estate of San Pierre Kilkakhan (Sam E. Bill), 5 IBIA 12 (Jan. 21, 1976)

Estate of Peter Feather Earring Cleveland, 6 IBIA 118 (July 15, 1977)

REHEARING

Generally

An order denying a rehearing is proper when the petition for rehearing alleging newly discovered evidence fails to state any other grounds which would require a rehearing and, accordingly, an appeal from the denial will be dismissed.

Estate of Milward Wallace Ward, 4 IBIA 97 (July 18, 1975) 82 I.D. 341

Newly discovered evidence is to be presented in support of a petition for a rehearing and will not be considered on an appeal.

Estate of Louis Harvey Quardy, 4 IBIA 263 (Dec. 23, 1975) 82 I.D. 640

Petition for rehearing based upon newly discovered evidence shall be accompanied by affidavits of witnesses stating fully what the new testimony is to be. It shall also state justifiable reasons for the failure to discover and present that evidence tendered as new at the hearing held prior to the issuance of the original decision and order.

Estate of Louis Baptist, 5 IBIA 48 (Mar. 8, 1976)

The Board is not required to consider new evidence first raised on appeal. However, were the Department disposed to ignoring its own regulations governing when new evidence shall be considered, appellants' case still would not be bolstered by an exceptional consideration of evidence now tendered.

Estate of Harold Hungry, 5 IBIA 132 (June 18, 1976)

To apply the doctrine that newly discovered evidence shall not be considered on appeal would be unjust to appellant in this case who by virtue of the lack of findings and conclusions in the administrative law judge's original order was unable to perceive the nature of new evidence required to support a valid petition for rehearing.

The administrative law judge's order determining heirs failed to satisfy requirements of the Administrative Procedure Act because of the absence of a statement of "findings and conclusions, and the reasons or basis therefore, on all the material issues of fact, law, or discretion presented on the record." 5 U.S.C.A. § 557(c). Under this circumstance, we believe it is

INDIAN PROBATE--Continued

REHEARING--Continued

Generally--Continued

appropriate to consider appellant's new evidence on appeal and we conclude that such evidence justifies a rehearing on the issue of decedent's marital status prior to Dec. 16, 1953.

Estate of Mitchell Robert Quaempts (Kuneki), 6 IBIA 10 (Jan. 27, 1977)

A petition for rehearing which is based upon newly discovered evidence will be denied where it is not supported by justifiable reasons for failure to discover and present that evidence, rendered as new, at the hearing held prior to the issuance of the decision.

A petition for rehearing which is based upon newly discovered evidence will be denied where it is not accompanied by affidavits of witnesses stating fully what the new testimony is to be.

Estate of Adeline Andrews White, 6 IBIA 94 (June 1, 1977)

But for certain errors committed by the Superintendent's office, appellant would have perfected a proper request for rehearing. In the interest of justice, the extenuating circumstances in this case compel a finding that appellant filed a petition for rehearing which, not having been rejected, was acceptable.

Estate of Fannie Newrobe Choate, 6 IBIA 144 (Sept. 9, 1977)

A rehearing will be granted where a party has been denied a full opportunity to be heard.

Estate of Matthew Cook, 7 IBIA 62 (May 5, 1978)

Petition to rehear (directed to order approving will) is deficient where supported by two affidavits of expected new testimony which do not tend to contradict any of the findings of fact upon which the disputed order is based. Where one of the affidavits is from a witness who previously testified and the other statement is not relevant to the execution of the contested will and merely repeats other testimony given at the hearing, there is no factual basis offered upon which a rehearing can be ordered.

Estate of George Tsalote, 7 IBIA 261 (Oct. 30, 1979)

Pleading, Timely Filing

A petition for rehearing filed with an Examiner of Inheritance was properly denied by the Examiner where the petition was not filed within the period prescribed by the applicable regulations.

Where a petition for rehearing was not filed in the appropriate office of the Department of the Interior until the 61st day after entry of the original order, the Hearing Examiner lacked authority to extend the time for filing thereof and had no jurisdiction to determine the substantive issues raised in the petition on their merits.

Estate of Andrew Jackson Marsh, 4 IBIA 106 (July 29, 1975)

INDIAN PROBATE--Continued

REHEARING--Continued

Pleading, Timely Filing--Continued

The administrative law judge did not commit error in denying a rehearing to parties who failed to file a timely request for rehearing, even though the petitions were filed only 1 day late.

Administrative law judges bear an additional responsibility when parties voluntarily proceed with probate proceedings without counsel. Here the record shows that the administrative law judge has done all which could reasonably be expected in assisting the aggrieved parties pursue their claims.

Estate of Simpson Nokusille, 5 IBIA 178 (Sept. 24, 1976)

In computing the time for filing a petition for rehearing, where the last day of the 60-day period so computed falls on a Saturday, Sunday, Federal legal holiday, or other nonbusiness day, it is not to be included.

Estate of Adeline Andrews White, 6 IBIA 94 (June 1, 1977)

A petition for rehearing mailed on the 60th day but not received in the Department of the Interior on or before the 60th day has not been timely filed.

Estate of Roger Rogue Tosee, 7 IBIA 7 (Jan. 13, 1978)

REOPENING

Generally

Although the Superintendent of an Indian agency has no interest in the outcome, he is a proper official of the Bureau of Indian Affairs to file a petition for reopening, under the authority of 43 CFR 4.242.

Estate of John Mahkuk, 3 IBIA 291 (Mar. 20, 1975)

Estate of Rebecca (Wahbmame) Pigeon or Rebecca White Pigeon or Ahn Wahn Ke, 4 IBIA 168 (Oct. 30, 1975)

A petition for the reopening of Indian heirship proceedings must be submitted within the period of time prescribed in the Departmental regulations.

Estate of Rose Old Bear Wilson, 4 IBIA 62 (June 2, 1975)

A petition for the reopening of an Indian heirship proceeding filed 12 years after the Department had determined the heirs of the Indian decedent will be denied as untimely.

A request for a reopening filed years after the expiration of the period allowed will be denied even where the request for reopening is made by one who was not given an opportunity to be heard and who would clearly be entitled to the relief sought if his petition had been timely made.

Estate of Ke-i-ze or Julian Sandoval, 4 IBIA 115 (Aug. 18, 1975)
82 I.D. 402

INDIAN PROBATE--Continued

REOPENING--Continued

Generally--Continued

In the absence of a showing that a manifest injustice is possible if a case closed for more than 3 years is not reopened, a petition for reopening will not be allowed.

When the evidence before the examiner was uncontradicted as to the factual determination of marriage, and a request for reopening exceeds by 22 years an uncontested determination of heirship, the usual reluctance to avoid disturbance of a factfinder's decision takes on greater emphasis.

Even if petitioners were entitled to their requested relief, which is unsupported by the record, an untimely petition can be denied -- even for a petitioner who was not given an opportunity to be heard in the original proceeding.

Estate of Johnnie Holmes, 4 IBIA 175 (Oct. 31, 1975)
82 I.D. 531

The Secretary of the Interior has inherent power to reopen and review administrative determinations purporting to dispose finally of Departmental proceedings when some factor, such as newly discovered evidence or fraud, is brought to his attention.

Estate of San Pierre Kilkakhan (Sam E. Hill), 4 IBIA 242 (Dec. 2, 1975)

The decision to reopen this estate is supported by the fact that the allegations made in the petition to reopen are not contradicted by other evidence appearing in the record and because the allegations can easily be proved by an examination of available witnesses and reliable documentary evidence.

Omission of an heir is a type of injustice which Departmental regulations permitting reopening were designed to correct.

Estate of Opie Samuel Bordeaux, Sr., 5 IBIA 24 (Feb. 10, 1976)

While requests for reopening estates closed for more than 3 years face rigid requirements under Departmental regulations, exceptional cases arise in which such petitions should be granted.

Generally, three elements must be satisfied to justify reopening an estate which has been closed a long time. First, it must appear that a manifest injustice will likely prevail if the petition to reopen is denied. Second, it should be demonstrated by compelling proof that the delay in requesting relief was not occasioned by the lack of diligence on the part of the petitioning parties. Third, there should exist a possibility for correction of the error.

Estate of David Marksman, 5 IBIA 56 (Mar. 29, 1976)

In the Matter of the Estates of Morgan Black and Mary Grant Black, 5 IBIA 219 (Oct. 28, 1976)

Estate of Peter Feather Earring Cleveland, 6 IBIA 44 (Mar. 30, 1977)

INDIAN PROBATE--Continued

REOPENING--Continued

Generally--Continued

Under the former provisions of 25 CFR 15.18 (now 43 CFR 4.242) reopenings are limited to those persons who had no notice of the original proceedings and were not on the reservation, thus, one in attendance at the original hearing or who had notice has no standing to file a petition to reopen.

Estate of Russell Harold Robb, 5 IBIA 92 (May 10, 1976)

Requests for reopening estates closed more than 3 years face rigid requirements under Departmental regulations and will be granted only in exceptional cases.

Estate of Bert Dog Trail, 5 IBIA 122 (June 8, 1976)

Pursuant to 43 CFR 4.242(h), the Board is not required to reopen an estate closed for more than 3 years unless a probable manifest injustice can be shown.

Estate of Mary Soldierwolf, 5 IBIA 146 (July 13, 1976)

The Board has frequently held that petitions to reopen closed estates require compelling proof that delays in requesting relief have not been occasioned by lack of diligence on the part of petitioning parties.

Where continued effect has been given to a natural disposition of property for over 53 years, the reopening of an estate based on alleged failures of a conditional devisee who is no longer alive to defend his inherited interest would risk greater possible injustices than such reopening could hope to prevent.

Estate of Annie Bear, 5 IBIA 149 (July 21, 1976)

The Superintendent of an Indian agency is a proper official of the Bureau of Indian Affairs to file a petition for reopening under the authority of 43 CFR 4.242, although he has no interest in the outcome of such petition.

An Indian will may be presented for probate even though the estate of the decedent has been distributed as intestate property.

It would be unconscionable for the Secretary of the Interior to fail to give effect to a Departmentally approved will of a deceased Indian which was misfiled by the Agency, unless it can be demonstrated by way of a hearing that the provisions of the will should not be followed.

Estate of Joan (Joanna) Horsechief, 5 IBIA 162 (Sept. 29, 1976)
83 I.D. 362

Under the provisions of 43 CFR 4.242 reopenings are limited to those persons who had no notice of the original proceedings and were not on the reservation, thus, one in attendance at the original hearing or who had actual notice has no standing to file a petition to reopen.

Estate of Ella Ashbough Randall Genereaux, 5 IBIA 248 (Nov. 10, 1976)

INDIAN PROBATE--Continued

REOPENING--Continued

Generally--Continued

Where no cogent reasons are alleged and the petition for reopening is submitted after the statutory period for filing, a reopening will not be allowed.

Estate of Throws First, 6 IBIA 28 (Feb. 4, 1977)
84 I.D. 253

It is permissible to reopen an estate on grounds that such action will possibly lead to petitioners' enrollment in the tribe and therefore correction of a manifest injustice.

It is incumbent on the Department to redistribute interests in trust land in the course of reopening estates when such redistribution is possible as failure to do so would be in violation of the Secretary's trust responsibility to heirs of allotted land.

Estate of Tennyson B. Saupitty, 6 IBIA 140 (Sept. 2, 1977)

In order to justify reopening of an estate that has been closed in excess of the 3-year limitation found in 43 CFR 4.242(h) three elements must generally be satisfied. First, it must appear that a manifest injustice will likely prevail if a petition for reopening is denied. Secondly, it must be demonstrated that the delay in requesting relief was not occasioned by the lack of diligence on the part of the petitioner. Thirdly, there must exist a possibility for correction of the manifest injustice.

Estate of Leonard (Raymond) Cooper, 7 IBIA 5 (Jan. 11, 1978)

Upon a showing of probable error in prior order, a reopening pursuant to 43 CFR 206 and 4.242(a) is required. Where nationality of heirs was found to be relevant to the final order of distribution it was error to rely upon an agreed statement which was in conflict with evidence previously admitted to establish nationality.

Estate of Sam Pierre Kilkakhan (Sam E. Hill), 7 IBIA 240 (Oct. 23, 1979)

Standing to Petition for Reopening

The petitioner, grandsons of the testatrix who are not heirs at law, cannot be considered to be persons with "an interest in the estate" which is the recognized standard governing who may seek reopening.

Estate of Mary Soldierwolf, 5 IBIA 146 (July 13, 1976)

Waiver of Time Limitation

A petition to reopen filed more than 3 years after the final determination of heirs will be granted when there is compelling proof that the delay was not occasioned by the lack of diligence on the part of the petitioning party.

Estate of Francis or Frank DeMarrias (Deceased Sisseton-Wahpeton Sioux Allottee No. SW-381-757), 3 IBIA 218 (Jan. 3, 1975)

INDIAN PROBATE--Continued

REOPENING--Continued

Waiver of Time Limitation--Continued

To avoid perpetuating a manifest injustice, a petition to reopen filed more than 3 years after the final determination of the heirs will be granted where compelling proof is shown that the delay was not occasioned by the lack of diligence on the part of the petitioning party.

Estate of Mollie Kinsman Pomona (Deceased Unallotted Hopi Indian), 3 IBIA 232 (Jan. 31, 1975)

Estate of Charley (Jack) Santio, 4 IBIA 244 (Dec. 2, 1975)

It is in the public interest to require Indian Probate proceedings be concluded within some reasonable time in order that property rights of heirs and devisees in Indian trust allotments be stabilized.

Estate of Virginia Kemp, Penn, Lyon, Webster, Woodhull, Stabler (Osage Unallotted), 3 IBIA 256 (Feb. 6, 1975)

Estate of Rose Old Bear Wilson, 4 IBIA 62 (June 2, 1975)

Estate of Ke-i-ze or Julian Sandoval, 4 IBIA 115 (Aug. 18, 1975)
82 I.D. 40

An administrative law judge is without power to reopen a case after the passage of 3 years from the date the judge enters the order, but the Secretary is not bound by the limitations of 43 CFR 4.242 and he has authority at any time to review on proper grounds.

Estate of John Mahkuk, 3 IBIA 291 (Mar. 20, 1975)

Estate of Rebecca (Wahbsese) Pigeon or Rebecca White Pigeon or Ahn Wahn Ke, 4 IBIA 168 (Oct. 30, 1975)

Petition to reopen filed more than 3 years after the final determination of heirs will not be granted unless there is compelling proof that the delay was not occasioned by lack of diligence on the part of the petitioning party.

It is in the public interest to require Indian Probate proceedings be concluded within some reasonable time in order that the property rights of heirs and devisees of trust allotments be stabilized.

Estate of Everett Morah, 4 IBIA 25 (Apr. 18, 1975)

The Secretary is not bound by the limitations of 43 CFR 4.242 and he may at any time review and reopen estates on proper grounds.

Estate of Henry Max Brouillette, 4 IBIA 48 (May 2, 1975)

An administrative law judge is without power to reopen a case after the passage of 3 years from the date the judge enters the order, but the Secretary is not bound by the limitations of 43 CFR 4.242 and he may waive the time limitations when some factor, such as newly discovered evidence or fraud is brought to his attention.

Estate of Annie Shandreau Graveen, 4 IBIA 226 (Nov. 21, 1975)

INDIAN PROBATE--Continued

REOPENING--Continued

Waiver of Time Limitation--Continued

Where probate was not undertaken until 10 years after decedent's death and the petitioner did not learn of the probate hearing until another 3 years later, the Board is not inclined to deny the petition to reopen for untimeliness.

Estate of Opie Samuel Bordeaux, Sr., 5 IBIA 24 (Feb. 10, 1976)

An estate which has been closed for 13 years may be reopened under extraordinary circumstances to add an omitted heir to the original determination of heirs, notwithstanding the estate is no longer intact, so as to protect the omitted heir if additional property of the decedent is later discovered and to provide a consistent heirship record.

Estate of Oscar Bubuna Deloria, 5 IBIA 34 (Feb. 26, 1976)

A petition to reopen on the grounds of lack of notice, filed more than 3 years after the entry of the order determining heirs, will not be granted unless there is compelling proof that the delay was not occasioned by the petitioner's lack of diligence.

Estate of Enoch Abraham, 5 IBIA 89 (Apr. 22, 1976)

Estate of Russell Harold Robb, 5 IBIA 92 (May 10, 1976)

SECRETARY'S AUTHORITY

Generally

The Act of June 25, 1910 (36 Stat. 855), 25 U.S.C. § 372 (1970), gives the Secretary of the Interior statutory authority to determine heirship whether an estate is a trust allotment or a restricted allotment.

The Act of June 25, 1910, confers jurisdiction upon the Secretary to determine heirs beyond a proceeding involving the original allottee. The Secretary's responsibility under the Act is to determine heirship of all Indians who die intestate possessed of trust or restricted property and such responsibility does not terminate until the trusteeship or period of restriction expires.

Estate of Louis Harvey Quapaw, 4 IBIA 263 (Dec. 23, 1975)
82 I.D. 640

The Department of the Interior does not have authority to declare a Federal statute unconstitutional.

Estate of William (Konoal Jackson, 6 IBIA 52 (May 4, 1977)

Proceedings for the determination of a deceased Indian's heirs in a case over which the Department had no jurisdiction must be dismissed.

Estate of Gladys Marie Bellmard (Randall, Preston, Harris) Wilson, 7 IBIA 111 (Dec. 29, 1978)
86 I.D. 1

INDIAN PROBATE--Continued

SECRETARY'S AUTHORITY--Continued

Generally--Continued

A proceeding for the determination of the heirs of a deceased Indian instituted in a case over which the Department has no jurisdiction must be dismissed.

Estate of William E. Hicks, 7 IBIA 115 (Feb. 14, 1979)

Jurisdiction of the Courts

The Secretary is bound by the order of a court only as to those issues and as to those individuals before the court.

Where issues are decided by the Secretary which do not become the subject of litigation, the Secretary's decision is final as to those issues not litigated.

Estate of John J. Akers, 3 IBIA 300 (Mar. 26, 1975)
82 I.D. 108

STATE LAW

Generally

Where no section of the General Allotment Act suggests that the Quapaws were to be excluded from the Act's provisions and where no section of the Quapaw Allotment Act suggests the inapplicability of the General Allotment Act to allotted Quapaw lands, there lies a reasonable basis for jointly interpreting these Acts. The correctness of applying the heirship provisions of the General Allotment Act to the Quapaws is conclusively established because the Quapaw Allotment Act fails to adopt State law.

Estate of Louis Harvey Quapaw, 4 IBIA 263 (Dec. 23, 1975)
82 I.D. 640

Applicability to Indian Probate, Intestate Estates

Generally

The Department is not foreclosed from considering as evidence in an heirship determination an affidavit of paternity which was not executed in accordance with State law.

Estate of Terrance Wayne White Bear, 7 IBIA 80 (July 27, 1978)

Under sec. 5 of the General Allotment Act, 25 U.S.C. § 348 (1976), the Department is required to apply the law of the State in which the allotment is located in determining the heirs of the deceased allottee.

Estate of Ellen Phillips, 7 IBIA 100 (Dec. 6, 1978)
85 I.D. 438

Applicability to Indian Probate, Testate

Compliance with State laws setting forth requirements for the execution of wills is not required in the execution of Indian wills disposing of trust or restricted property.

Estate of Hissetennie (Maggie) Whiz Abbott, 4 IBIA 12 (Apr. 17, 1975)
82 I.D. 169
(See also 2 IBIA 53, 80 I.D. 617 (1974).)

INDIAN PROBATE--Continued

STATE LAW--Continued

Applicability to Indian Probate, Testate--Continued

The Secretary of the Interior is not bound by State law in passing on the validity of wills of Indians disposing of trust property except where otherwise provided by Congress.

Estate of Hank Cluette, 6 IBIA 47 (Apr. 1, 1977)

TRIBAL COURTS

Generally

Decrees of Tribal courts regarding domestic relations of Indians have generally been recognized by the Department of the Interior, State courts, and Federal courts.

Estate of Clark Joseph Robinson, 7 IBIA 74 (July 26, 1978)
85 I.D. 294

TRUST PROPERTY

Generally

Judgments entered against allottees of restricted land are voidable.

Despite strict laws prohibiting the alienation and encumbrance of restricted land, the Secretary has authority to approve an agreement made by an allottee for the disposition of oil income from restricted property.

Estate of Phillip Tooisgah, 4 IBIA 189 (Nov. 13, 1975)
82 I.D. 541

The Act of June 25, 1910 (36 Stat. 855), 25 U.S.C. § 372 (1970), gives the Secretary of the Interior statutory authority to determine heirship whether an estate is a trust allotment or a restricted allotment.

Estate of Louis Harvey Quapaw, 4 IBIA 263 (Dec. 23, 1975)
82 I.D. 640

Where trust patents for allotments for lands were issued in conformity with the General Allotment Act and contained usual provision that the United States would hold lands subject to statutory provisions and restrictions for a period of years, in trust for the sole use and benefit of Indians, and lands were chiefly valuable for their timber, the restraint upon alienation, effected by terms of trust patents, extended to timber and proceeds derived therefrom as well as to lands.

Estate of Elizabeth C. Jensen McMaster, 5 IBIA 61 (Apr. 6, 1976)
83 I.D. 145

In the event that the court approved agreement signed by decedent constituted a judgment against trust property, it is null and void absent approval by the Secretary of the Interior.

Estate of Asa Cottonwood, 7 IBIA 138 (Apr. 10, 1979)

INDIAN PROBATE--Continued

WILLS (*See also* INHERITING--if included in this Index.)

Generally

There is no statute or regulation that would disqualify a non-Indian, as such, as devisee of real property located on the Kiowa-Comanche-Apache Indian Reservation in Oklahoma.

Estate of Vincent Victorio Natalish, Jr., 5 IBIA 1 (Jan. 19, 1976)

Under the circumstances of a contested will which includes a devise of property to a brother long dead, a "self-proved will" does not pass muster by perfunctory questioning of witnesses. Further, although the task of the administrative law judge to develop a complete record may be made more difficult by the absence of counsel for the parties, this important function must still be satisfied.

Estate of Peahbor (Mabel) (Mable) Mahseet, 5 IBIA 27 (Feb. 23, 1976)

It is not a valid basis for overturning an Indian's will that certain relatives were not included in a devise of property.

Estate of Mary Soldierwolf, 5 IBIA 146 (July 13, 1976)

An Indian will may be presented for probate even though the estate of the decedent has been distributed as intestate property.

Estate of Joan (Joanna) Horsechief, 5 IBIA 182 (Sept. 29, 1976)
83 I.D. 362

There is a strong presumption that one who takes the time to write a will does not intend to die intestate.

Estate of Dorothy Sheldon, 7 IBIA 11 (Feb. 7, 1978)
85 I.D. 31

Under the circumstances of this case, appellant's paternity is not an issue cognizable by the Department in probating her mother's will. In accordance with sec. 8(b) of the Administrative Procedure Act findings should be limited to issues necessary to the disposition of a case.

Estate of Vera Marie Edge, 7 IBIA 53 (Apr. 25, 1978)

Where contested will contains devise which recites that devisee is "caring for me in my old age," the will is not, under the circumstances described at the hearing, conditioned upon continued residence by decedent with devisee of will.

Estate of George Tsalote, 7 IBIA 261 (Oct. 30, 1979)

Approval of Will

A copy of a will can be admitted to probate only if proper execution of the original can be proved.

For the Secretary to withhold approval of testator's will in this case, which omits his illegitimate child and sole heir at law, would be tantamount to applying a "just and equitable" standard in passing on an Indian's

INDIAN PROBATE--Continued

WILLS (*See also* INHERITING--if included in this Index.) --Continued

Approval of Will--Continued

will, which is the precise error in Departmental judgment previously condemned by the Supreme Court.

Estate of Anthony Bitseedy, 5 IBIA 270 (Dec. 17, 1976)

Where the scrivener was not in the reasonable vicinity of the place of hearing, departmental procedures do not require that he be produced in a will contest where testamentary capacity is proved by other evidence.

Estate of Hank Cluette, 6 IBIA 47 (Apr. 1, 1977)

Children, Disinheritance of

For the Secretary to withhold approval of testator's will in this case, which omits his illegitimate child and sole heir at law, would be tantamount to applying a "just and equitable" standard in passing on an Indian's will, which is the precise error in Departmental judgment previously condemned by the Supreme Court.

Estate of Anthony Bitseedy, 5 IBIA 270 (Dec. 17, 1976)

Construction of

It is incumbent upon the administrative law judge under existing regulations in testate cases to construe the provisions of a will.

Estate of Herman Coando, 5 IBIA 140 (June 22, 1976)
83 I.D. 229

The Board realizes that the Department's Oct. 26, 1927, order approving will construes the devise to John Sherman to be conditional upon his taking care of testatrix's son, petitioner in this case, but, based on the scant record developed in the original probate proceeding, it is not beyond reason that this construction was erroneous.

Estate of Annie Bear, 5 IBIA 149 (July 21, 1976)

In construing a will, the court is faced with the situation as it existed when the will was drawn and must consider all surrounding circumstances, the objects sought to be obtained and endeavor to determine what was in the testator's mind when he made the requests, and the court must not make a new will for testator or testatrix or warp his language in order to obtain a result which the court might feel to be right.

It is well established that, in construing a will the courts will seek for and give effect to the intent, scheme, or plan of the testator, if it be lawful.

The intent must be gathered when possible from the words of the will, construed in their natural and obvious sense.

Estate of Dorothy Sheldon, 7 IBIA 11 (Feb. 7, 1978)
85 I.D. 31

INDIAN PROBATE--Continued

WILLS (*See also* INHERITING--if included in this Index.) --Continued

Contest

Provisions of 25 CFR 4.233(c) requiring testimony of attesting witnesses to contested will to be taken at hearing on probate of will are mandatory when witnesses are available.

Estate of Joseph Caddo a.k.a. James Joseph Caddo and Jim Butler, 7 IBIA 286 (Nov. 28, 1979)

Dependent Relative Revocation

For a revocation clause of an Indian will to be effective the will itself must be admitted to probate.

Estate of Anthony Bitseedy, 5 IBIA 270 (Dec. 17, 1976)

Disapproval of Will

Regardless of scope of administrative law judge's authority to grant or withhold approval of the will of an Indian under statute, there is not vested in the judge power to revoke a will which reflects a rational testamentary scheme disposing of trust or restricted property.

Estate of Gerald Martinez, Sr., 5 IBIA 162 (Aug. 13, 1976)
83 I.D. 162

Regardless of scope of administrative law judge's authority to grant or withhold approval of the will of an Indian under statute, there is not vested in the judge the power to revoke or rewrite a will or a part thereof which reflects a rational testamentary scheme disposing of trust or restricted property.

Estate of Dorothy Sheldon, 7 IBIA 11 (Feb. 7, 1978)
85 I.D. 31

Failure to Mention Child

The failure of a testator to provide for his wife or child or children in a will does not invalidate the will.

Estate of George Yellow Wolf, 5 IBIA 70 (Apr. 13, 1976)

Failure to Mention Spouse

The failure of a testator to provide for his wife or child or children in a will does not invalidate the will.

Estate of George Yellow Wolf, 5 IBIA 70 (Apr. 13, 1976)

Holographic Will

A holographic will that does not meet the requirement of attestation by two disinterested adult witnesses is invalid.

Estate of Emory Dennis Jones, 7 IBIA 164 (June 29, 1979)

INDIAN PROBATE--Continued

WILLS (*See also* INHERITING--if included in this Index.) --Continued

Insane Delusions

There is a difference between an insane delusion and a false belief. A belief is not an insane delusion where it is arrived at through a process of reasoning, even though such reasoning may be faulty, incorrect or illogical.

Estate of George E. Easley, IA-T-32 (July 13, 1978)

Lost Will

An Indian will may be presented for probate even though the estate of the decedent has been distributed as intestate property.

Estate of Joan (Joanna) Horsechief, 5 IBIA 182 (Sept. 29, 1976) 83 I.D. 362

Proof of Will

Departmental regulations require that an Indian will be executed in writing and attested by two disinterested adult witnesses.

Estate of Anthony Bitseedy, 5 IBIA 270 (Dec. 17, 1976)

Facts of the case justified a finding by the administrative law judge that there was a failure to prove will where testimony to show testamentary act was scanty and where purported will was undated and was marked "signed copy."

Estate of Cleveland Iron Shooter, 7 IBIA 212 (Sept. 12, 1979)

Provisions of 25 CFR 4.233(c) requiring testimony of attesting witnesses to contested will to be taken at hearing on probate of will are mandatory when witnesses are available.

Estate of Joseph Caddo a.k.a. James Joseph Caddo and Jim Butler, 7 IBIA 286 (Nov. 28, 1979)

Publication

There is no requirement in the regulations or elsewhere that the attesting witnesses be present at the same time, or sign in the presence of the testatrix, or that the testatrix acknowledge her subscription to the will to the witnesses, or that she "publish" said instrument by declaring it to be her last will.

Estate of Hiemstennie (Maggie) Whiz Abbott, 4 IBIA 12 (Apr. 17, 1975) 82 I.D. 169
(*See also* 2 IBIA 53, 80 I.D. 617 (1974).)

There is no requirement in the Indian probate regulations or the applicable statutes that the testatrix, at the time of the execution of her will, "publish" the same by openly declaring it to be her last will and testament.

Estate of Fannie Newrobe Choate, 7 IBIA 171 (July 31, 1979)

INDIAN PROBATE--Continued

WILLS (*See also* INHERITING--if included in this Index.) --Continued

Revocation

For a revocation clause of an Indian will to be effective the will itself must be admitted to probate.

Estate of Anthony Bitseedy, 5 IBIA 270 (Dec. 17, 1976)

Self-proved Wills

Under the circumstances of a contested will which includes a devise of property to a brother long dead, a "self-proved will" does not pass muster by perfunctory questioning of witnesses. Further, although the task of the administrative law judge to develop a complete record may be made more difficult by the absence of counsel for the parties, this important function must still be satisfied.

Estate of Peahner (Mabel) (Mable) Pahsset, 5 IBIA 27 (Feb. 23, 1976)

State Law

Applicability to Indian Probate, Testate

A power of appointment is a power of disposition given to a person or persons over property not their own, by someone who directs the mode in which that power shall be exercised by a particular instrument. It is an authorization to do an act which the owner granting the power might himself by law fully perform.

A power of appointment included in a purported Indian will concerning trust allotments or restricted personal property is not valid unless first approved by the Secretary of the Interior or his duly appointed subordinate.

Estate of Daniel J. Pierre, 6 IBIA 17 (Jan. 28, 1977) 84 I.D. 68

Testamentary Capacity

Generally

To be competent to make a will the testatrix had to know without prompting not only who were the natural objects of her bounty but also the nature and extent of the property of which she was about to dispose, and the consequences of the dispositions which she was making.

Estate of Joseph Red Eagle, 4 IBIA 52 (May 30, 1975) 82 I.D. 256

The general rule that an administrative law judge's finding of testamentary capacity rendered after consideration of conflicting testimony will not be disturbed on appeal is not an unqualified rule. The judge's finding must be supported by substantial evidence and the evidence relied upon must be competent.

Under the circumstances of a contested will which includes a devise of property to a brother long dead, a "self-proved will" does not pass muster by perfunctory questioning of witnesses. Further, although the task of the administrative law judge to develop a complete record may be made more difficult by the absence of counsel for the parties, this important function must still be satisfied.

Estate of Peahner (Mabel) (Mable) Pahsset, 5 IBIA 27 (Feb. 23, 1976)

INDIAN PROBATE--Continued

WILLS (*See also* INHERITING--if included in this Index.) --Continued

Testamentary Capacity--Continued

Generally--Continued

The burden of proof as to testamentary incapacity in Indian probate proceedings is on the one contesting the will, and an aged Indian is not deemed to be incapacitated from making a valid will by being a chronic alcoholic or by being unable to manage his own affairs.

Estate of Louis Baptist, 5 IBIA 48 (Mar. 8, 1976)

Testator's reference to unrelated sole devisee as his "nephew" in his last will and testament is possible evidence bearing on the mental capacity of testator, but such reference is not in itself dispositive of the issue of alleged testamentary incapacity. From a consideration of all the evidence, we hold that testator's reference to devisee as his "nephew" in his will does not show that decedent was unable to recognize the natural objects of his bounty or that he was otherwise in an irrational state when the will was executed.

Estate of Hank Cluette, 6 IBIA 47 (Apr. 1, 1977)

A judge's findings regarding testamentary capacity will not be set aside where supported by evidence adduced at a probate hearing on the will.

Estate of Felix Walking, a/k/a Philip Walking, 6 IBIA 153 (Oct. 12, 1977)

A testator does not lack testamentary capacity merely because he is unable to manage his own business affairs or is under guardianship.

Estate of George B. Easley, IA-T-32 (July 13, 1978)

The burden of proof as to testamentary incapacity in Indian probate proceedings is on those contesting the will, and an Indian is not deemed to be incompetent to make a will by virtue of her being unable to manage her own property or business affairs or by appointment of a guardian for her.

Being aged and uneducated, being unable to read or write, being unable to understand the English language, and possessing impaired hearing and poor eyesight are conditions that do not necessarily disqualify one from making a will.

Estate of Fannie Newrobe Choate, 7 IBIA 171 (July 31, 1979)

Inability to read the English language alone does not prevent one from making a valid will, even though the will is written in English.

Estate of George Tsalote, 7 IBIA 261 (Oct. 30, 1979)

Alcohol

Testimony of physician, based on his treatment and observation of testator at various times, to the effect that testator may have suffered permanent brain damage and disease but which is inconclusive as to whether testatory had testamentary capacity does not support a finding of testamentary incapacity when the scrivener and other witnesses testified that from their conversations with and observations of testator at and/or about the time the will was executed they believed him to be sober, alert and in all respects competent to make a will.

Estate of Arnold Ross, 5 IBIA 277 (Dec. 21, 1976)

Undue Influence

Generally

Undue influence must be a "wrongful influence," and influence acquired through kindness, affection, or attention, especially of one relative for another, is not wrongful.

Estate of George B. Easley, IA-T-32 (July 13, 1978)

To invalidate a will on the ground of undue influence contestants must show such influence to have been exerted to the extent of destroying the free will of the testatrix or that the will of another was substituted for that of the testatrix and this amounts to more than the opportunity or possibility that undue influence was brought to bear on the testatrix.

Estate of Fannie Newrobe Choate, 7 IBIA 171 (July 31, 1979)

Estate of Minnie Moves Camp, 7 IBIA 266 (Nov. 15, 1979)

Whether undue influence had been exerted to obtain will of testator in feeble health and dependent situation is the sole issue in case where the will was obtained with the assistance of testator's son-in-law who stood to benefit under the will made and who used a power of attorney to make gifts of testator's money to others.

Estate of Joseph Caddo a.k.a. James Joseph Caddo and Jim Butler, 7 IBIA 286 (Nov. 28, 1979)

Failure to Establish, Generally

To invalidate an Indian will because of undue influence, it must be shown: (1) that the decedent was susceptible to being dominated by another; (2) that the person allegedly influencing the decedent in the execution of the will was capable of controlling his mind and actions; (3) that such person, at the time of the testamentary act, did exert influence upon the decedent of a nature calculated to induce or coerce him to make a will contrary to his own desires; and (4) that the will is contrary to the decedent's own desires.

Estate of Hiemstennie (Maggie) Whiz Abbott, 4 IBIA 12 (Apr. 17, 1975) 82 I.D. 169
(*See also* 2 IBIA 53, 80 I.D. 617 (1974).)

Undue influence will not be presumed where the evidence affirmatively discloses that the beneficiary of a will who accompanied the testator to the office of the scrivener was not present when the terms of the will were discussed or when the will was executed.

Estate of Arnold Ross, 5 IBIA 277 (Dec. 21, 1976)

INDIAN PROBATE--Continued

WILLS (*See also* INHERITING--if included in this Index.) --Continued

Undue Influence--Continued

Failure to Establish, Generally--Continued

It is proper to deny a petition for rehearing in the matter of the approval of the last will and testament of a deceased Indian where the record satisfactorily shows that the will was properly executed by one possessing the requisite testamentary capacity.

Estate of Winnie Moves Camp, 7 IBIA 266 (Nov. 15, 1979)

Failure to Establish, Opportunity

The Department of the Interior has held consistently that mere suspicion or an opportunity to influence testator's mind will not sustain an allegation of undue influence where convincing proof is lacking that a person did actually exert influence or there was pressure operating directly upon the testamentary act.

Estate of Joseph Red Eagle, 4 IBIA 52 (May 30, 1975)
82 I.D. 256

The mere fact that a beneficiary in a will or other grandchildren were in a position to exert undue influence on the testator is insufficient to establish the invalidity of the will, when convincing proof that the beneficiary or others actually exerted undue influence is lacking.

Estate of Arnold Ross, 5 IBIA 277 (Dec. 21, 1976)

The Department of the Interior has consistently held that mere suspicion or an opportunity to influence testatrix's mind will not sustain an allegation of undue influence where convincing proof is lacking that a person did actually exert influence or there was pressure operating directly upon the testamentary act.

Estate of Fannie Newrobe Choate, 7 IBIA 171 (July 31, 1979)

Unnatural Will

The fact that an Indian Testator believes he has no heir and that his property would escheat to the State should he die intestate does not affect a devise under his will.

Estate of Vincent Victorio Natalish, Jr., 5 IBIA 1 (Jan. 19, 1976)

For the Secretary to withhold approval of testator's will in this case, which omits his illegitimate child and sole heir at law, would be tantamount to applying a "just and equitable" standard in passing on an Indian's will, which is the precise error in Departmental judgment previously condemned by the Supreme Court.

Estate of Anthony Bitseedy, 5 IBIA 270 (Dec. 17, 1976)

INDIAN PROBATE--Continued

WILLS (*See also* INHERITING--if included in this Index.) --Continued

Unnatural Will--Continued

An unequal distribution by will to the natural objects of testator's bounty does not constitute an inequitable or unnatural will.

Estate of George E. Tesley, IA-T-32 (July 13, 1976)

Witnesses, Attesting

An attesting witness is disqualified from acting in an attesting capacity only if his interest in the will is of a fixed, certain, and vested pecuniary character, or one which otherwise gives him a direct and immediate beneficial right under the will.

There is no requirement in the regulations or elsewhere that the attesting witnesses be present at the same time, or sign in the presence of the testatrix, or that the testatrix acknowledge her subscription to the will to the witnesses, or that she "publish" said instrument by declaring it to be her last will.

Estate of Hiemstennie (Maggie) Whiz Abbott, 4 IBIA 12 (Apr. 17, 1975)
82 I.D. 169
(*See also* 2 IBIA 53, 80 I.D. 617 (1974).)

Departmental regulations require that an Indian will be executed in writing and attested by two disinterested adult witnesses.

Estate of Anthony Bitseedy, 5 IBIA 270 (Dec. 17, 1976)

An Indian of the age of 21 years or over and of testamentary capacity, who has any right, title, or interest in trust property, may dispose of such property by a will executed in writing and attested by two disinterested adult witnesses.

Estate of Perry Dennis Juneau, 7 IBIA 164 (June 29, 1979)

Applicable Departmental regulations do not require that the attesting witness know the language of the testatrix; it is required that the witness merely know that she is acting as an attesting witness.

Estate of Fannie Newrobe Choate, 7 IBIA 171 (July 31, 1979)

Facts of the case justified a finding by the administrative law judge that there was a failure to prove will where testimony to show testamentary act was scanty and where purported will was undated and was marked "signed copy."

Estate of Cleveland Iron Shooter, 7 IBIA 212 (Sept. 12, 1979)

WITNESSES

Cross-examination

A full and true disclosure of the facts was denied when only the presiding judge was permitted to ask questions of a crucial witness. This procedure violated sec. 7(c) of the Administrative Procedure Act.

Estate of Rosa Marie Edge, 7 IBIA 53 (Apr. 25, 1978)

INDIAN PROBATE--Continued

WITNESSES--Continued

Observation by Administrative Law Judge

Where testimony is conflicting, the factual findings of the administrative law judge will not be disturbed because he had the opportunity to observe and hear the witnesses.

Estate of Hiemstennie (Maggie) Whiz Abbott, 4 IBIA 12 (Apr. 17, 1975) 82 I.D. 169
(*See also* 2 IBIA 53, 80 I.D. 617 (1974).)

YAKIMA TRIBES

Generally

Absent regulations requiring otherwise the most equitable valuation date would be the date the Tribe elects to purchase the property of a noneligible heir or devisee.

Estate of Cecelia Smith Vergote (Borger), Morris A. (K.) Charles and Caroline J. Charles (Frendale), 5 IBIA 96 (May 21, 1976) 83 I.D. 209

Absent controlling guidelines in the statute concerning valuation date (fair market value), it is more equitable to charge the Yakima Tribe the fair market value of the property as of the date the Tribe elected to purchase same, *i.e.*, Jan. 25, 1974.

Estate of Temens (Timens) Vivian Gardafee, 5 IBIA 113 (May 27, 1976) 83 I.D. 216

A statutory option held by the Tribe to take such interests in lands which pass to specific heirs or devisees who are not enrolled members of the Tribe does not vest any rights in said interests until payment by the Tribe of the fair market value as determined by the administrative law judge, after hearing if demanded, plus unpaid interest.

Fair-market value date is considered to be the date of hearing to determine value or if no hearing, the date the judge makes an independent finding and judgment as to the fair market value of the interest to be taken.

Estate of Edward Lewis Pitt, 6 IBIA 156 (Oct. 17, 1977) 84 I.D. 854

The fair market value date is considered to be the date of hearing to determine value.

Interest is due and payable only on the unpaid balance of the fair market value as determined from the date of filing the election to take by the Tribe.

A statutory option held by the Tribe to take interest in land under the Act of Dec. 31, 1970 (84 Stat. 1874, 25 U.S.C. § 607 (1970)), does not vest any right in such interests until payment by the Tribe of the fair market value as determined by the administrative law judge after hearing if demanded, plus interest.

Estate of Joseph Simmons, Sr., 7 IBIA 43 (Mar. 31, 1978)

Valuation Reports

The Board is not bound by the Bureau of Indian Affairs' appraisal, report and findings contained therein. Instead, the Board will give consideration to the complete record, including the BIA appraisal, report and findings in arriving at its findings and determination.

Estate of Cecelia Smith Vergote (Borger), Morris A. (K.) Charles and Caroline J. Charles (Frendale), 5 IBIA 96 (May 21, 1976) 83 I.D. 209

INDIAN TRIBES
(*See also* Indian Probate--if included in this Index.)

GENERALLY

Title I of the Highway Beautification Act, 79 Stat. 1028, which applies to all "public lands or reservations of the United States," does not apply to Indian reservations.

Public Law 280, 67 Stat. 588-90, did not grant to States general civil regulatory powers over Indian reservations. Nor could this be accomplished by Departmental regulation, Secretarial Order or other directive.

California's Outdoor Advertising Act, implementing the Highway Beautification Act, 79 Stat. 1028, may not be applied to non-Indian lessees on the Morongo Indian Reservation.

The Department's policy established in 1965 of requiring lessees of Indian lands in California to comply with State standards regulating land use and development can be achieved without subjecting developing tribal governments to the full enforcement powers of the State, viz., through adding appropriate State standards to the provisions of any lease.

Administrative Appeal of the Morongo Band of Mission Indians v. Area Director, Sacramento Area Office, 7 IBIA 299 (Dec. 13, 1979) 86 I.D. 660

ATTORNEYS

Fees

In the absence of an approved contract as required by 25 U.S.C. § 476 (1970), fees for legal services allegedly performed during the interim will not be allowed.

Administrative Appeal of Roy T. Pobley v. Commissioner of Indian Affairs and Jicarilla Apache Tribe, 4 IBIA 1 (Apr. 4, 1975) 82 I.D. 119

CONSTITUTION, BYLAWS AND ORDINANCES

Nomination and election of tribal officers are governed by the provisions of its constitution.

Administrative Appeal of Doc Pewewardy v. Commissioner, Bureau of Indian Affairs, et al., 3 IBIA 259 (Feb. 12, 1975)

INDIAN TRIBES--Continued

CONSTITUTION, BYLAWS AND ORDINANCES--Continued

The organic law of the Hopi Tribe found in a constitution authorized by statute, formulated and adopted by the tribal members and approved by the Secretary of the Interior, should be construed for its ultimate meaning under the same rules as are applied in the construction of State and Federal constitutions and statutes.

Administrative Appeal of The Hopi Indian Tribe v. Commissioner, Bureau of Indian Affairs, 4 IBIA 134 (Sept. 26, 1975) 82 I.D. 452

The Department of the Interior has generally deferred to the tribe or tribal council when the interpretation of a constitution involves two reasonable alternatives.

Administrative Appeal of Ralph Davis v. Commissioner, Bureau of Indian Affairs and Sac and Fox Tribe of Oklahoma, 4 IBIA 228 (Nov. 25, 1975)

Acts of Tribal Chairmen done in contravention of their respective Tribal Constitutions and Bylaws are void from their inception and not binding upon their respective Tribes.

Administrative Appeal of Joe McComas, 5 IBIA 125 (June 11, 1976) 83 I.D. 227

The Department is not bound by a tribal ordinance regulating trust property where such ordinance violates provisions of the tribal constitution and bylaws which the Secretary has sworn to uphold.

Administrative Appeal of Oglala Sioux Tribe v. Commissioner of Indian Affairs and Richard Tall (PRO-10542), 7 IBIA 188 (Sept. 5, 1979) 86 I.D. 425

ELECTIONS

Generally

Nomination and election of tribal officers are governed by the provisions of its constitution.

Administrative Appeal of Doc Pewewardy v. Commissioner, Bureau of Indian Affairs, et al., 3 IBIA 259 (Feb. 12, 1975)

ENROLLMENT

For purposes of which the tribe has complete control, the tribe conclusively determines membership; but where Departmental action is authorized, the Department may approve or disapprove the membership rolls of the tribe.

Administrative Appeal of Jennifer Rae McQueen, A Minor, By Hazel McQueen, As Next Friend v. Confederated Salish and Kootenai Tribes, Flathead Reservation, Montana, 4 IBIA 65 (June 3, 1975) 82 I.D. 261

HUNTING AND FISHING

On Reservation

18 U.S.C. § 1165 (1970) confirms the right of Indian Tribes to control, regulate and license hunting and fishing within their reservations.

JUDGMENT FUNDS

The preparation of a plan providing for the use and distribution of judgment funds under the Act of Oct. 19, 1973 (25 U.S.C. § 1401 *et seq.*, 87 Stat. 466) by the Secretary of the Interior to be submitted to the Congress for approval entails the exercise of the Secretary's discretion and is beyond the authority delegated to the Board of Indian Appeals in (211 D.M. 13.7) Dec. 14, 1973.

Administrative Appeal of Benedict Jozhe and Ft. Sill Apaches v. Commissioner of Indian Affairs, 3 IBIA 266 (Feb. 25, 1975)

JURISDICTION

18 U.S.C. § 1165 (1970) confirms the right of Indian Tribes to control, regulate and license hunting and fishing within their reservations.

Opinion on the Boundaries of and Status of Title to Certain Lands Within the Colville and Spokane Indian Reservations, M-36887 (Feb. 2, 1977) 84 I.D. 72

An Indian tribe may exercise criminal jurisdiction over its members concurrently with a State where the State has assumed jurisdiction over the tribe's reservation pursuant to the Act of Aug. 15, 1953, P.L. 280, 67 Stat. 588, 18 U.S.C. § 1162 (1976).

Criminal Jurisdiction on the Seminole Reservations in Florida, M-36907 (Nov. 14, 1978) 85 I.D. 433

SOVEREIGN POWERS

An Indian tribe may exercise criminal jurisdiction over its members concurrently with a State where the State has assumed jurisdiction over the tribe's reservation pursuant to the Act of Aug. 15, 1953, P.L. 280, 67 Stat. 588, 18 U.S.C. § 1162 (1976).

Criminal Jurisdiction on the Seminole Reservations in Florida, M-36907 (Nov. 14, 1978) 85 I.D. 433

TRIBAL AUTHORITY

The organic law of the Hopi Tribe found in a constitution authorized by statute, formulated and adopted by the tribal members and approved by the Secretary of the Interior, should be construed for its ultimate meaning under the same rules as are applied in the construction of State and Federal constitutions and statutes.

Administrative Appeal of The Hopi Indian Tribe v. Commissioner, Bureau of Indian Affairs, 4 IBIA 134 (Sept. 26, 1975) 82 I.D. 452

The Department of the Interior has generally deferred to the tribe or tribal council when the interpretation of a constitution involves two reasonable alternatives.

Administrative Appeal of Ralph Davis v. Commissioner, Bureau of Indian Affairs and Sac and Fox Tribe of Oklahoma, 4 IBIA 228 (Nov. 25, 1975)

INDIAN TRIBES--Continued

TRIBAL AUTHORITY--Continued

Acts of Tribal Chairmen done in contravention of their respective Tribal Constitutions and Bylaws are void from their inception and not binding upon their respective Tribes.

Administrative Appeal of Joe McComan, 5 IBIA 125 (June 11, 1976) 83 I.D. 227

Tribes as a treaty right have the authority to impose restrictions or limitations as to who may be permitted to travel within a closed area of a reservation.

Administrative Appeal of Frank L. Glasgey, Jr., 7 IBIA 92 (Aug. 17, 1978)

INDIAN WATER AND POWER RESOURCES

GENERALLY

Sec. 5(b) of the Act of May 25, 1948 (62 Stat. 269) is not applicable to those tribal lands upon which the Flathead Irrigation Project's Kerr Substation and Switchyard are located.

Relocation of Flathead Irrigation Project's Kerr Substation and Switchyard, M-36735 (Supp.) (Sept. 24, 1976) 83 I.D. 346

IRRIGATION PROJECTS

A recreation and public purposes application must be rejected for lands temporarily withdrawn for an irrigation project to benefit Indians. Such a withdrawal is effective until specifically revoked, even though it is made on a temporary basis and has been in effect for more than 50 years.

Elko County Board of County Supervisors, 29 IBLA 220 (Mar. 23, 1977)

INDIANS

GENERALLY

A recreation and public purposes application must be rejected for lands temporarily withdrawn for an irrigation project to benefit Indians. Such a withdrawal is effective until specifically revoked, even though it is made on a temporary basis and has been in effect for more than 50 years.

Elko County Board of County Supervisors, 29 IBLA 220 (Mar. 23, 1977)

CRIMINAL JURISDICTION

An Indian tribe may exercise criminal jurisdiction over its members concurrently with a State where the State has assumed jurisdiction over the tribe's reservation pursuant to the Act of Aug. 15, 1953, P.L. 280, 67 Stat. 588, 18 U.S.C. § 1162 (1976).

INDIANS--Continued

WELFARE

Where the manual for the conduct of the business of the Bureau of Indian Affairs is issued by the Commissioner under authority delegated by the Secretary, the Board of Indian Appeals lacks jurisdiction to declare the policy reflected by the provisions of the manual to be improper or void or unconstitutional.

Administrative Appeal of Hannah Pinnesand, A Native Alaska Indian v. Commissioner of Indian Affairs, 3 IBIA 263 (Feb. 25, 1975)

INTERVENTION

Where a grazing district cattle trespass complaint refers to previous trespasses by the base property owner, he is served with the complaint, and the record indicates he intervened at the hearing thereon but the decision issued makes no mention thereof, the decision appealed from may be set aside and remanded for clarification.

United States v. John J. Casey, 22 IBLA 358 (Nov. 14, 1975) 82 I.D. 546

Intervention, by right, as a full party in a contest proceeding is only recognized where the individual seeking intervention has the necessary interest to maintain a private contest independently under 43 CFR 4.450-1.

The extent of the participation in a contest hearing to be afforded "interested individuals" who do not have a sufficient interest to maintain a private contest is committed to the sound discretion of the administrative law judge. Among the factors which are properly considered are: the desires of the original parties; the likelihood that the party seeking intervention will provide information which would not be forthcoming without its participation; and the cost which must be borne by both the contestant and the contestee by the nature and scope of the intervention granted.

United States v. United States Pumice Co., 37 IBLA 153 (Oct. 5, 1978)

JUDICIAL REVIEW

(See also Administrative Procedure--if included in this Index.)

Where the Board of Land Appeals, by a previous decision, has held that a particular oil and gas lease offer must be rejected, and the rejected applicant files suit for judicial review of that decision in the United States District Court, and also files a contemporaneous appeal to the Board from a BLM decision implementing the Board's decision, the Board will defer to the Court's jurisdiction and make no decision on the merits of the appeal, which is subject to summary dismissal by the Board.

Donald W. Cover (Appellant), Alfred L. Easterday (Appellee), 36 IBLA 181 (July 31, 1978)

Where the holder of an oil and gas lease on the Outer Continental Shelf has filed a suit in a Federal district court to recover certain royalties paid under his lease, the Board of Land Appeals will affirm a decision of the Director, Geological Survey, holding in abeyance the lessee's request for a refund while the suit is pending.

Tenneco Oil Co., 41 IBLA 195 (June 22, 1979)

LACHES

Where land has long been devoted to a particular public purpose such as inclusion in a forest reserve, laches may bar an application filed pursuant to the Transportation Act of 1940, 49 U.S.C. § 65(b) (1970) and 43 U.S.C. § 898 (1970), in which case a hearing need not be ordered to determine whether a railroad's purchaser was an innocent purchaser for value.

Southern Pacific Transportation Co., Donald K. Lee, Charles Siller v. United States Forest Service, 35 IBLA 270 (June 2, 1978)

The authority of the United States to enforce a public right or protect a public interest is not vitiated or lost by acquiescences of its officers or agents, or by their laches, neglect of duty, failure to act, or delays in the performance of their duties.

United States v. Maurice L. Wilson, 38 IBLA 305 (Dec. 14, 1978)

United States is not subject to a defense of laches in an action to enforce a public right. Thus, where BLM took approximately 2 years to declare reversion to United States of title to land patented with reversionary clause under Recreation and Public Purposes Act, appellants may find no relief in equitable doctrine of laches.

Roberta Thompson and Richard Lee Burnham, 38 IBLA 333 (Dec. 20, 1978)

LIEU SELECTIONS

An application by a State for an indemnity school and land selection is not subject to rejection for the sole reason that the base lands are less valuable than the selected lands.

When a State files an indemnity school land application and selects lands withdrawn for leasable minerals and it is determined that disposal of such lands would unreasonably interfere with operations under the mineral leasing laws, such application may be rejected. However, when the State offers to waive the reserved leasable minerals and to allow reasonable surface entry for development and removal of the minerals, the application should be reevaluated in light of such offer.

State of New Mexico, 24 IBLA 135 (Mar. 8, 1976)

Where land had been conveyed to the United States pursuant to the Act of June 4, 1897, ch. 2, 30 Stat. 11, 36, as a base for forest lieu selection rights, and a purported color of title claim was initiated at a time when the land had not been opened to the operation of the public land laws, the color of title claim is not cognizable as valid under 43 U.S.C. § 1068 (1970).

Estate of John C. Brinton, 25 IBLA 283 (June 28, 1976)

The acceptance by a State of other lands as indemnity for lands lying within the meander line of a nonnavigable lake adjacent to the granted upland school section, was a relinquishment of any interest in the adjacent land underlying the lake as an incident to the grant of the school section to the extent such land lies within the linear boundaries of the school section, and precludes the assertion of a State claim to such lands.

State of Montana, 28 IBLA 124 (Nov. 16, 1976)

LIEU SELECTIONS--Continued

Under 43 U.S.C. § 852(a)(1) (1970), *as amended* by sec. 25 of the Geothermal Steam Act of 1970, 30 U.S.C. § 1024 (1970), a State may select lands with geothermal potential as indemnity for base lands lost by it from its grant for common schools without a reservation to the United States of the geothermal rights therein, provided that these base lands also have geothermal potential.

For sec. 25 of the Geothermal Steam Act of 1970, geothermal resources are treated under 43 U.S.C. § 852(a) (1970) as other leasable minerals, rather than as oil and gas, so that a State need not submit as base for indemnity selection of lands which have been classified by the Geological Survey as being within a "KGRA" (known geothermal resource area) lands which also are classified as KGRA, but instead need only submit base lands classified by GS as having geothermal potential.

Where BLM has issued a clear list giving a State title to lands selected as indemnity for lost school lands but erroneously reserving to the United States geothermal rights to these selected lands, these geothermal rights are still within the power of the United States to dispose of, and the Department still exercises jurisdiction over them, so that the Board of Land Appeals may correct BLM's error by ordering that these rights be given to the State by deleting the reservation thereof in the clear list.

Where the record indicates that there may be gross disparity between the value of lands selected by a State as indemnity for lost school lands and the value of base lands submitted by the State in support of the selection, the matter will be remanded to the BLM for revaluation of the lands. If the revaluation reveals a gross disparity, the BLM shall withhold further action until judicial resolution of the propriety of the "grossly disparate value" policy.

State of California, 33 IBLA 160 (Dec. 20, 1977)

LOWER COLORADO RIVER LAND USE

Where it is indicated that a proposed BLM management plan may require termination of permits now granting occupancy of lands in the Lower Colorado River Land Use Area on a renewable basis annually, it is not an abuse of discretion to deny approval to an assignment of such a permit pending final approval of the management plan.

Kenneth Caughlin, Scott Thomas, D-77-4 (Oct. 16, 1977)

It is not an abuse of discretion or arbitrary or capricious for the District Manager, Yuma District, to deny requests for renewals of residential permits in the Parker Strip, Lower Colorado River Land Use Area, for 5 years, in lieu of the existing permits of indefinite term subject to annual renewal, where the permits are subject to the provision that the United States may terminate the permits after 90 days written notice.

Earl W. Archer et al., Robert F. Moore et al., D-78-1, D-78-2 (Aug. 9, 1978)

It is proper to cancel a residential cabin site permit in the Lower Colorado River Land Use Area for continued commercial use in violation of the terms of the permit.

Asa E. Haynes, Wanda L. Russell, D-76-8 (Aug. 31, 1976)

LOWER COLORADO RIVER LAND USE--Continued

A permit for use of land in the Lower Colorado River Area is properly terminated where construction, unauthorized by the terms of the permit, is undertaken by individuals occupying the premises, whose earlier application for an assignment of rights of the permittee has been rejected by BLM.

Robert D. Wall, D-79-7 (Aug. 23, 1979)

MATERIALS ACT

Where approval of an application to purchase sand and gravel pursuant to the Materials Disposal Act of 1947 is opposed by a Native village which has already selected the land on which the sand and gravel is located, and to whom conveyance is imminent, the application will be rejected.

Clarence Wren, 20 IBLA 47 (Apr. 21, 1975)

It would not be improper to issue a free use permit to a qualified applicant for land included in, and segregated by, an airport lease application where the airport lease applicant is a governmental entity and it consents to the issuance of the free use permit and such issuance is consistent with the public interest.

Good Roads District No. 1, 25 IBLA 123 (June 7, 1976)

Where a contract for the sale of vegetative resources (pine nuts) contains a disclaimer of warranty by the vendor (Government) as to the quantity of resources sold, the parties are deemed to have contracted on the assumption that there was doubt as to the quantity, and the risk with respect to such factor must be considered to have been assumed by the purchaser as one of the elements of the bargain. Thus, the fact that the quantity of the resource available for harvesting turned out to be less than was expected at the time of contracting is not a basis for a claim to a refund.

Where appellant alleges a loss of vegetative resources (pine nuts) which he purchased occurring subsequent to the time of contracting and prior to severance, due to severe and unusual damage by birds, and the contract of sale provides that the risk of loss shall remain in the Government and not pass to purchaser until such vegetative resources have been severed or extracted, appellant's claim for a refund is governed by the risk of loss provision rather than a disclaimer of warranty as to quantity contained in a separate part of the contract.

Alma LeBaron, Jr., 25 IBLA 164 (June 14, 1976)

Minerals which are subject to location under the general mining law on public land outside the Lake Mead Recreation Area are subject to the leasing provisions of the Act of Oct. 8, 1964, within the Recreation Area. But, minerals which are disposable by sale under the 1947 Materials Act when situated outside the Recreation Area are also subject to such disposal within it.

Rilite Aggregate Co., 26 IBLA 197 (Aug. 11, 1976)

The Bureau of Land Management, under 43 CFR 5442.3, has the authority to reject bids submitted for timber sales where it rationally determines that rejection is in the Government's interest.

Cabax Mills, 32 IBLA 225 (Sept. 20, 1977)

MATERIALS ACT--Continued

A party seeking a partial refund of the purchase price under the risk of loss provision of a contract for the cash sale of vegetative resources pursuant to the Materials Act of July 31, 1947, must present substantial evidence of the quantity of resources lost which otherwise would have been harvested.

Alma E. LeBaron, Jr., 32 IBLA 299 (Sept. 29, 1977)

Where the purchaser of rock under a cash sale contract authorized by the Materials Act of July 31, 1947, as amended, 30 U.S.C. § 601 et seq. (1970), fails to remove any of the rock and requests a credit for the purchase price, such a request will be denied as being tantamount to a refund and purchaser under a fixed unit material sale is not entitled to a refund even though the amount of material removed is less than the estimated total volume shown in the contract.

Weyerhaeuser Co., 33 IBLA 259 (Jan. 5, 1978)

The purchaser of rock under a cash sale contract authorized by the Materials Act of July 31, 1947, as amended, 30 U.S.C. § 601 et seq. (1970), is entitled to a refund, based on resale value less administrative costs, for rock covered by the contract which is available but not removed from the site by such purchaser.

Weyerhaeuser Co. (On Reconsideration), 34 IBLA 244 (Mar. 28, 1978)

A decision by a Bureau of Land Management District Office rejecting an application for an extension of a mineral materials sale contract solely for the reason it was not timely filed in accordance with 43 CFR 3610.7 will be set aside and remanded for the authorized officer to determine whether the application may be considered as timely pursuant to 43 CFR 1821.2-2(g). This section permits the authorized officer to consider a document as being timely filed except where the law does not permit him to do so, the rights of a third party or parties have intervened, or the authorized officer determines that further consideration of the document would unduly interfere with the orderly conduct of business.

Don Holland Materials, Inc., 35 IBLA 133 (May 22, 1978)

In a competitive materials sale, submission of the required 10 percent deposit in cash with the sealed bid is permissible under the regulations and not a ground for rejection of the highest bid. Therefore, a protest against acceptance of the bid for that reason is properly denied.

Roy Blake, 38 IBLA 151 (Dec. 5, 1978)

MILLSITES

(See also Mining Claims--if included in this Index.)

GENERALLY

Mining claims and millsites located upon land which has been previously withdrawn from entry under the mining laws by a first-form reclamation withdrawal are void ab initio. Because Departmental Order No. 2515 delegated authority to revoke such a withdrawal to the Bureau of Reclamation with the concurrence of the Bureau of Land Management, the land remains withdrawn from mining locations when the Bureau of Land Management does not

MILLSITES--Continued

GENERALLY--Continued

concur with the recommendation of the Bureau of Reclamation to revoke the withdrawal and restore the land to entry.

J. P. Hinds et al., 25 IBLA 67 (June 1, 1976)
83 I.D. 275

Where a millsite is not being used for mining or milling purposes in connection with a mining claim owned by the owner of the millsite, and at the time of contest there is no quartz mill or reduction works on the site, the millsite must be declared null and void.

United States v. Aloys A. Dietemann and Doris E. L. Dietemann, 26 IBLA 356 (Sept. 8, 1976)

United States v. Wayne E. Highley, 30 IBLA 21 (Apr. 7, 1977)

DETERMININATION OF VALIDITY

When the Government contests a mining claim, by practice it has assumed the burden of going forward with sufficient evidence to establish a prima facie case; the burden of going forward then shifts to the claimant to show by a preponderance of the evidence that his claim is valid. Likewise, a millsite claimant has the burden of establishing the validity of his claim by a preponderance of the evidence.

United States v. Aloys A. Dietemann and Doris E. L. Dietemann, 26 IBLA 356 (Sept. 8, 1976)

Where millsites are not used for mining or milling purposes in conjunction with a mining claim, and where no quartz or reduction works exist on the millsites, the millsites are properly declared null and void.

United States v. Robert A. Rukke (Registered Agent), Valumines, Inc., et al., 32 IBLA 155 (Sept. 12, 1977)

A mineral claimant who has not made a discovery of a valuable mineral deposit within the limits of his lode or placer mining claims is not the proprietor of a "vein, lode or placer" within the context of 30 U.S.C. § 42 (1970), and cannot establish any right to a millsite claim based on such unperfected mining locations.

United States v. Ray Paden, 33 IBLA 380 (Jan. 25, 1978)

Where the primary reason for the State Office rejection of a millsite application appears to be that the Environment Protection Agency has recommended against the issuance of a patent because of possible adverse effects on the environment which the Federal Government will not be able to control if patent issues, the decision of the State Office will be reversed where the applicant shows that he has fulfilled the requirement of 30 U.S.C. § 42 (1970), and where the State having jurisdiction over the operation after patent issues has a strict environmental protection law with safeguards against possible adverse effects on the environment.

Utah International, Inc., 36 IBLA 219 (Aug. 8, 1978)

MILLSITES--Continued

DETERMININATION OF VALIDITY--Continued

Where a millsite is located in conjunction with certain mining claims which are found to be invalid, and the millsite is not being used for any purpose associated with mining, the mere presence of water on the millsite which could be used for mining or milling in the event such activities should transpire is not sufficient to support a finding that the millsite claim is valid.

United States v. Emmett C. Harder, 42 IBLA 206 (Aug. 22, 1979)

Three classes of millsites are authorized by 30 U.S.C. § 42 (1976): (1) those occupied by the proprietor of a vein or lode for mining and milling purposes; (2) those that have thereon quartz mills or reduction works; and (3) those that are used by the proprietor of a placer claim for mining, milling, processing, beneficiation, or other operations in connection with such claim.

The validity of an independent millsite claim, *i.e.*, one not located ancillary to a valid mining claim, depends upon three factors: (1) the claim must be used in good faith for a mining or milling purpose; (2) it must contain a quartz mill or reduction works on the premises for processing mineral material from a vein or lode; and (3) it must be operated in an ongoing and more or less continuous manner for custom work. Where a quartz mill or reduction works is operated sporadically only as a "spare time" enterprise, the millsite is properly declared invalid.

United States v. Ray Paden, 44 IBLA 253 (Dec. 19, 1979)

INDEPENDENT

Three classes of millsites are authorized by 30 U.S.C. § 42 (1976): (1) those occupied by the proprietor of a vein or lode for mining and milling purposes; (2) those that have thereon quartz mills or reduction works; and (3) those that are used by the proprietor of a placer claim for mining, milling, processing, beneficiation, or other operations in connection with such claim.

The validity of an independent millsite claim, *i.e.*, one not located ancillary to a valid mining claim, depends upon three factors: (1) the claim must be used in good faith for a mining or milling purpose; (2) it must contain a quartz mill or reduction works on the premises for processing mineral material from a vein or lode; and (3) it must be operated in an ongoing and more or less continuous manner for custom work. Where a quartz mill or reduction works is operated sporadically only as a "spare time" enterprise, the millsite is properly declared invalid.

United States v. Ray Paden, 44 IBLA 253 (Dec. 19, 1979)

PATENTS

Where the primary reason for the State Office rejection of a millsite application appears to be that the Environment Protection Agency has recommended against the issuance of a patent because of possible adverse effects on the environment which the Federal Government will not be able to control if patent issues, the decision of the State Office will be reversed where the applicant shows that he has fulfilled the requirement of 30 U.S.C. § 42 (1970), and where the State having jurisdiction over the operation after patent issues has a strict environmental protection law with safeguards against possible adverse effects on the environment.

Utah International, Inc., 36 IBLA 219 (Aug. 8, 1978)

MINERAL LANDS

GENERALLY

As only nonmineral lands may be appropriated under the law pertaining to headquarters sites, where the Geological Survey reports that a tract of entered land is nonmineral in character and the Bureau of Land Management therefore formally advises the claimant that the tract is subject to settlement or occupancy and officially acknowledges his claim, and the claimant thereafter complies fully with the law and applies for patent, a subsequent determination that the land is mineral in character will not vitiate the claim unless it is established that the original finding of nonmineral character was error, and that facts in existence at the time equitable title passed required a determination that the land was then mineral. Due process permits such action to be taken only after proper notice and opportunity for hearing.

Wilfred S. Wood, 20 IBLA 284 (May 27, 1975)

Where, after statehood, a designated school section is surveyed and returned as mineral land (coal) known to be mineral in character prior to the date when the rights of the State would have attached, and where prior to the Act of Jan. 25, 1927 (44 Stat. 1026), the land is withdrawn for national forest purposes, title to the section did not pass to the State.

Malcolm N. McKinnon, 23 IBLA 1 (Nov. 25, 1975)

Lands known to be mineral in character (except for coal or iron) at the time of definite location of a railroad are excluded from the grant of place lands to the railroad even though the lands may later lose their mineral character.

Southern Pacific Transportation Co., Jay R. Fogal; Lloyd D. Hayes (Intervenor), 23 IBLA 232 (Jan. 9, 1976)
83 I.D. 1

When the Bureau of Land Management has appraised the damages for a mineral trespass under 43 CFR Part 9230, a hearing will not be ordered and an appraisal will not be disturbed in the absence of an offer of specific substantial evidence that the determination is incorrect.

Western Nuclear, Inc., 35 IBLA 146 (May 22, 1978)
85 I.D. 129

The purpose of 30 U.S.C. § 38 (1976) whereby a person or association may establish a right to patent lands which said person or association has held and worked for a period equal to the statute of limitations is to obviate the necessity of proving formal compliance with requirements for locating a claim, but not to dispense with proof of discovery.

United States v. Leroy S. Johnson et al., 39 IBLA 337 (Feb. 28, 1979)

DETERMINATION OF CHARACTER OF

As only nonmineral lands may be appropriated under the law pertaining to headquarters sites, where the Geological Survey reports that a tract of entered land is nonmineral in character and the Bureau of Land Management therefore formally advises the claimant that the tract is subject to settlement or occupancy and officially acknowledges his claim, and the claimant thereafter complies fully with the law and applies for patent, a subsequent determination that the land is mineral in character will not vitiate the claim unless

MINERAL LANDS--Continued

DETERMINATION OF CHARACTER OF--Continued

it is established that the original finding of nonmineral character was error, and that facts in existence at the time equitable title passed required a determination that the land was then mineral. Due process permits such action to be taken only after proper notice and opportunity for hearing.

Wilfred S. Wood, 20 IBLA 284 (May 27, 1975)

To establish the mineral character of railroad grant lands under the Act of July 1, 1862, 12 Stat. 489, *as amended* by the Act of July 2, 1864, 13 Stat. 356, it must be shown that known conditions--which may include geological conditions, discoveries of minerals in adjacent land and other observable external conditions upon which prudent and experienced men are known to be accustomed to act--are such as reasonably to engender the belief that the land contains mineral of such quality and quantity as to render its extraction profitable and justify expenditures to that end.

In a hearing on a patent application filed under the Transportation Act of 1940, 49 U.S.C. § 65(b) (1970), the Government has the obligation of making a prima facie case of mineral character between the date the railroad line was definitely located and the date of purchase, whereupon the applicant has the burden of establishing nonmineral character by a preponderance of the evidence.

Land included in an application under sec. 321(b) of the Transportation Act of 1940 is properly determined to be mineral in character between the date the railroad line was definitely located and the date of purchase where the land was covered by mining claims, evidence of extensive and successful mining on adjacent lands was established, and the subject land had similar surface geologic conditions when compared with the surface mineralization on adjacent lands having valuable mineral deposits.

Southern Pacific Co., Heirs of George H. Wedekind, 20 IBLA 365 (June 12, 1975)

A determination that land was known to be valuable for minerals leasable under the Mineral Leasing Act of Feb. 25, 1920, 30 U.S.C. § 181 *et seq.* (1970), at the time mining claims for such land were located, will be upheld where there has been a hearing on the question and the mining claimant has failed to produce evidence to overcome such a classification.

United States v. Long Beach Salt Co., 23 IBLA 41 (Dec. 2, 1975)

The period for determination by the Department of the Interior whether public land included within the primary limits of a legislative grant-in-aid of the construction of a railroad which excepts mineral land is mineral in character extends to the time of issuance of patent to the railroad company.

When the Department of the Interior finds that public land within the place limits of a legislative grant-in-aid of the construction of a railroad was mineral in character and the railroad company challenges such finding, a hearing should be granted at which the Department has the obligation of making a prima facie case of mineral character, whereupon the company has the burden of establishing nonmineral character by a preponderance of the evidence.

Southern Pacific Transportation Co., Jay R. Fogal; Lloyd D. Hayes (Intervenor), 23 IBLA 232 (Jan. 9, 1976)
83 I.D. 1

MINERAL LANDS--Continued

DETERMINATION OF CHARACTER OF--Continued

The filing of a phosphate prospecting permit application creates no vested rights in the applicant, and the application must be rejected if the land described therein is determined to be subject to the competitive leasing provisions of the Mineral Leasing Act. Rejection is required even if the application was filed prior to the ascertainment of the extent of workability of the phosphate bed underlying the applied for land, which finding requires competitive leasing of the land.

Applications for phosphate prospecting permits are properly rejected by the Bureau of Land Management upon the basis of a determination by the Geological Survey that the lands applied for contain workable deposits of phosphate thus making the lands subject to the leasing provisions rather than the prospecting provisions of the Mineral Leasing Act. A review of the technical data relied upon by the Geological Survey in making its determination is not required where no evidence is submitted on appeal demonstrating error in that determination.

William F. Martin, 24 IBLA 271 (Mar. 30, 1976)

A previous determination by the Department of the Interior in a proceeding different from a mining claim contest that land was mineral in character is not evidence of a discovery of a valuable mineral deposit in a mining contest.

United States v. Alex Bechthold, 25 IBLA 77 (June 1, 1976)

Under 30 U.S.C. § 262 (1970), a valuable deposit of sodium must be leased competitively even though the Geological Survey determination that lands are so known may have been made subsequent to appellant's filing of its application.

Permian Mud Service, Inc., 31 IBLA 150 (June 30, 1977)
84 I.D. 342

To establish the mineral character of railroad grant lands under the Act of July 1, 1862 (12 Stat. 489), *as amended*, it must be shown that known conditions--which may include geological conditions, discoveries of minerals in adjacent land and other observable external conditions upon which prudent and experienced men are known to be accustomed to act--on the critical date are such as reasonably to engender the belief that the land contains mineral of such quality and in such quantity as to render its extraction profitable and justify expenditures to that end.

When the Department of the Interior finds that public land within the place limits of a grant to a railroad under the Act of July 1, 1862, *as amended*, was mineral in character and the railroad company, filing for patent on behalf of an alleged bona fide purchaser from it, challenges such finding, a hearing should be granted at which the Department has the obligation of making a prima facie case of mineral character, whereupon the company has the burden of establishing nonmineral character by a preponderance of the evidence, and the bona fides of the purchaser.

Southern Pacific Transportation Co., 32 IBLA 218 (Sept. 19, 1977)

MINERAL LANDS--Continued

LEASES

An application for a hardrock preference-right lease is properly rejected where the permittee does not demonstrate the existence of a workable deposit of the mineral for which the permit was issued, within the term of the permit.

The Hanna Mining Co., 20 IBLA 149 (May 5, 1975)

Where application is made to lease reserved minerals in lands patented to the State of California for park or other public purposes, the regulations do not require the discovery of a workable deposit of mineral of commercial quantity and quality as a pre-condition to the issuance of the lease. Indeed, a lease affords the only authority for the conduct of exploratory operations.

George W. Wright, Sr. (Deceased), 22 IBLA 280 (Oct. 30, 1975)

The National Park Service is not an "executive department, independent establishment or instrumentality" within the meaning of 43 CFR 3501.2-6. The Department is therefore not bound by the granting or withholding of consent by the Service for a mineral lease on National Park Service lands.

Minerals which are subject to location under the general mining law on public land outside the Lake Mead Recreation Area are subject to the leasing provisions of the Act of Oct. 8, 1964, within the Recreation Area. But, minerals which are disposable by sale under the 1947 Materials Act when situated outside the Recreation Area are also subject to such disposals within it.

A decision to reject an application for a mineral lease within the Lake Mead Recreation Area will be sustained in the absence of a showing that the authorized officer acted unreasonably in rejecting the lease for reasons relating to environmental protection.

Pilite Aggregate Co., 26 IBLA 197 (Aug. 11, 1976)

An application for a prospecting permit cannot be suspended and is properly rejected where the lands applied for are unavailable because they are private lands awaiting transfer of title to the United States.

LeRoy Pedersen, 31 IBLA 124 (June 30, 1977)

Under 30 U.S.C. § 262 (1970), a valuable deposit of sodium must be leased competitively even though the Geological Survey determination that lands are so known may have been made subsequent to appellant's filing of its application.

Under 30 U.S.C. §§ 162 and 262 (1970), valuable deposits of sodium compounds are not open to location and disposition under the mining laws, but may be disposed of only under the Mineral Leasing Act, except for certain claims under 43 CFR 3501.1-1(b), existent at passage of Mineral Leasing Act of 1920 which have since been maintained in accordance with statute and regulation.

Permian Mud Service, Inc., 31 IBLA 150 (June 30, 1977)
84 I.D. 342

MINERAL LANDS--Continued

MINERAL RESERVATION

Where application is made to lease reserved minerals in lands patented to the State of California for park or other public purposes, the regulations do not require the discovery of a workable deposit of mineral of commercial quantity and quality as a pre-condition to the issuance of the lease. Indeed, a lease affords the only authority for the conduct of exploratory operations.

George W. Wright, Sr. (Deceased), 22 IBLA 280 (Oct. 30, 1975)

Where material involving a prior mineral reservation on acquired lands is first submitted on appeal, and the effect of a State statute and State court decree is in issue, it is appropriate to remand the case to the BLM State Office for further consideration.

A. W. Henderson, 30 IBLA 8 (Apr. 4, 1977)

Under 43 U.S.C. § 852(a)(1) (1970), *as amended* by sec. 25 of the Geothermal Steam Act of 1970, 30 U.S.C. § 1024 (1970), a State may select lands with geothermal potential as indemnity for base lands lost by it from its grant for common schools without a reservation to the United States of the geothermal rights therein, provided that these base lands also have geothermal potential.

Per sec. 25 of the Geothermal Steam Act of 1970, geothermal resources are treated under 43 U.S.C. § 852(a) (1970) as other leasable minerals, rather than as oil and gas, so that a State need not submit as base for indemnity selection of lands which have been classified by the Geological Survey as being within a "KGRA" (known geothermal resource area) lands which also are classified as KGRA, but instead need only submit base lands classified by GS as having geothermal potential.

Where BLM has issued a clear list giving a State title to lands selected as indemnity for lost school lands but erroneously reserving to the United States geothermal rights to these selected lands, these geothermal rights are still within the power of the United States to dispose of, and the Department still exercises jurisdiction over them, so that the Board of Land Appeals may correct BLM's error by ordering that these rights be given to the State by deleting the reservation thereof in the clear list.

Where the record indicates that there may be gross disparity between the value of lands selected by a State as indemnity for lost school lands and the value of base lands submitted by the State in support of the selection, the matter will be remanded to the BLM for revaluation of the lands. If the revaluation reveals a gross disparity, the BLM shall withhold further action until judicial resolution of the propriety of the "grossly disparate value" policy.

State of California, 33 IBLA 160 (Dec. 20, 1977)

As to gravel, interpretations of the mineral reservation in patents issued by the United States under the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970), must be consistent with the established rule that land grants are to be construed favorably to the Government, that nothing passes except what is conveyed in clear language, and that if there are doubts they are resolved for the Government, not against it.

In determining whether gravel is included in a mineral reservation in a patent issued under the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970), the interpretation of the reservation must take into account the intended use for which the land was conveyed and those uses which the Government intended to reserve.

A patent of land under the Stock-Raising Homestead Act, 43 U.S.C. § 291 *et seq.* (1970), was not generally intended to give the grantee the right to use the land for mineral development and mineral development was to proceed only under the mineral laws.

"*Ejusdem generis*." The *ejusdem generis* rule of construction may not be invoked to exclude gravel from the scope of a reservation of "all the coal and other minerals" in patents issued under the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970), because this rule of construction can only be effectively applied where there is a series of specific terms which define a class so that one may construe a general term by reference to that class.

Sec. 9 of the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970), contemplates the Department of the Interior retaining continuing jurisdiction and administration of mineral deposits reserved by that Act.

"Public lands." Under 43 CFR 9239.0-7 which defines a trespass, the term "public lands" includes mineral deposits reserved under the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970).

The declaration in the Surface Resources Act, 30 U.S.C. § 611 (1970), that no deposit of common varieties of gravel shall be deemed a valuable mineral deposit within the meaning of the mining laws, was not intended to operate as a conveyance, to holders of patents, of any minerals reserved under the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970).

Gravel in a valuable deposit is a mineral reserved to the United States in patents issued under the Stock-Raising Homestead Act, 43 U.S.C. § 299 (1970).

Western Nuclear, Inc., 35 IBLA 146 (May 22, 1978)
85 I.D. 129

A bond filed by a mining claim owner, covering lands patented under the Stock-Raising Homestead Act of Dec. 29, 1916, *as amended*, 43 U.S.C. §§ 291-301 (1970), need only be set in an amount to cover damages to crops, improvements, and the value of the land for grazing purposes within the limits of the mining claim. The *ad damnum* of the bond does not have to be sufficient to cover damages caused by a disruption of the surface owner's entire grazing operation.

Where surface owners object to the amount of a bond, submitted to the Bureau of Land Management under sec. 9 of the Stock-Raising Homestead Act of Dec. 29, 1916, *as amended*, 43 U.S.C. § 299 (1970), as being inadequate in amount, request a hearing thereon, but fail to tender any evidence which would impel the conclusion that a hearing is likely to be productive and meaningful, the request for a hearing is properly denied.

Elmer Silvers et al., 42 IBLA 11 (July 25, 1979)

NONMINERAL ENTRIES

A Bureau of Land Management decision rejecting a selection application by the State of Utah under its Miner's Hospital Grant because the land is deemed mineral in character due to a classification as valuable for oil, gas, and coal will be set aside because it failed to consider relevant statutes and regulations permitting

MINERAL LANDS--Continued

NONMINERAL ENTRIES--Continued

selections of land valuable for minerals leasable under the Mineral Leasing Acts with a reservation of the minerals to the United States.

A State selection application for lands valuable for leasable minerals may be rejected where it is determined that the disposal of the surface rights will unreasonably interfere with current or contemplated operations under the Mineral Leasing Acts and there is a proper basis in the record for such a determination which is unrefuted by the applicant. However, if there is no substantiation in the record for the determination and a State asserts error, the case will be remanded to the Bureau of Land Management to reconsider the determination, with the Geological Survey, and substantiate the basis of any future determination.

State of Utah, Department of Natural Resources, 38 IBLA 85 (Nov. 15, 1978)

PROSPECTING PERMITS

A permit issued pursuant to sec. 402 of the President's Reorganization Plan No. 3 of 1946, and the Act of June 30, 1950, 16 U.S.C. § 508b (1970), shall not exceed the 20 years' duration. During the 20-year period at any time valuable minerals are discovered the permittee has the right to apply for a mining permit.

The Hanna Mining Co., 20 IBLA 149 (May 5, 1975)

The issuance of sodium prospecting permits is discretionary with the Secretary of the Interior, and the Secretary may refuse to issue permits for lands withdrawn for wildlife purposes if the use of the lands for mineral prospecting and development activities would adversely affect the wildlife habitat.

Where the regulations and Departmental and BLM Manuals do not specifically state how disputes between the Fish and Wildlife Service and the Bureau of Land Management over issuing sodium prospecting permits for lands within wildlife refuge areas are to be resolved, but the Departmental manuals indicate that such decisions are to be made by the Secretary and the BLM Manual directs that such applications be forwarded to the Washington Office, a decision of a State Office rejecting an application for a sodium prospecting permit will be set aside and the case remanded for processing in accordance with the Departmental and BLM Manuals.

Vernal E. Bess et al., 27 IBLA 4 (Sept. 17, 1976)

The Bureau of Land Management may issue a sodium prospecting permit for lands adjacent to areas withdrawn for wildlife conservation purposes subject to a stipulation which provides that, in the event of discovery of an exploitable sodium deposit, no preference right lease will be issued unless hydrologic and other environmental analyses indicate that sodium ore can be removed without a significant adverse environmental impact on the wildlife habitat within the withdrawn areas.

David E. Hughes, 27 IBLA 46 (Sept. 23, 1976)

Lands which have been designated by the Act of Aug. 13, 1949, as public domain are not leasable under the Mineral Leasing Act for Acquired Lands or Reorganization Plan No. 3 of 1946, even though they may have been acquired lands prior to the Act of Aug. 13, 1949. A prospecting permit for uranium on such lands will be denied.

MINERAL LANDS--Continued

PROSPECTING PERMITS--Continued

John R. Meadows, 30 IBLA 14 (Apr. 4, 1977)

An application for extension of a hardrock prospecting permit is properly denied where the permittee has not met the conditions imposed by the permit terms and the regulations. Where extension of a prospecting permit is conditioned upon the drilling of an adequate test well or the excavation of an adequate trench pursuant to a prospecting plan approved in advance by the Mining Supervisor, Geological Survey, the allegation on appeal of certain research regarding location of former mines, electromagnetic surveys, and similar activities will not suffice to justify an extension.

Fred G. Cansler, 30 IBLA 273 (June 1, 1977)

An application for a prospecting permit cannot be suspended and is properly rejected where the lands applied for are unavailable because they are private lands awaiting transfer of title to the United States.

LeRoy Pedersen, 31 IBLA 124 (June 30, 1977)

Where the regulation allows the filing of an application for a prospecting permit on a copy of the approved form not correctly reproduced, and the application contains a statement that the applicant agrees to be bound by the term conditions on the approved form, an application which consists of a copy of only the first page of a two-page form is properly rejected when it is not accompanied by the required statement.

Where the regulations, 43 CFR 3511.2-4(a) and (b), allow an applicant for a prospecting permit to file a new application if his first was defective, but the defect is curable, the new application has priority only as of the date it is filed and does not retain the priority of the first application.

UOP, Inc., 31 IBLA 142 (June 30, 1977)

Under 30 U.S.C. §§ 162 and 262 (1970), valuable deposits of sodium compounds are not open to location and disposition under the mining laws, but may be disposed of only under the Mineral Leasing Act, except for certain claims under 43 CFR 3501.1-1(b), existent at passage of Mineral Leasing Act of 1920 which have since been maintained in accordance with statute and regulation.

Permian Mud Service, Inc., 31 IBLA 150 (June 30, 1977)
84 I.D. 302

An applicant for prospecting permits is not the "sole party in interest," within the meaning of 43 CFR 3500.0-5(a), where another party participates in the preparation and filing of the application, and where an agreement exists at the time of filing under which the applicant is bound to assign to the other party any advantages gained by him from the applications.

Where a party is not the sole party in interest in applications for prospecting permits, his applications must be rejected under 43 CFR 3511.2-4(a)(7) if they do not comply with the mandatory provisions of 43 CFR 3502.7, which require submission of statements of all

MINERAL LANDS--Continued

PROSPECTING PERMITS--Continued

parties' respective interests and of any agreement between them, and submission of evidence of the qualifications of all parties to hold prospecting permits.

Where a party files applications for prospecting permits as an attorney-in-fact of another party, he must disclose his status as an agent by designating his principal as the "applicant" on the application forms, and must, under 43 CFR 3502.3-1 and 3502.6-1(a), file statements of qualifications for both himself and his principal, as well as a copy of the agreement establishing his power of attorney, or his applications must be rejected under 43 CFR 3511.2-4(a)(7).

Willadean Patton, Essex Minerals, Inc., National Bulk Carriers, Inc., 32 IBLA 350 (Oct. 21, 1977)

Where a question arises on appeal as to the reasonableness of certain stipulations required prior to the issuance of uranium prospecting permits on lands administered by the Forest Service, the case will be remanded to allow the Forest Service and Bureau of Land Management to reexamine such stipulations.

Robert B. Schick, 34 IBLA 250 (Mar. 28, 1978)

A prospecting permit for coal is properly canceled under 43 CFR 3511.4-2(a)(1) for failure to pay annual rental on or before the anniversary date, as extended. An application for a preference right coal lease is properly rejected if it is based on prospecting permits which have been canceled for failure to pay rental timely.

Cortella Coal Corp., 35 IBLA 172 (May 23, 1978)

MINERAL LEASING ACT

(*See also* Coal Leases and Permits, Geothermal Leases, Oil and Gas Leases, Phosphate Leases and Permits, Potassium Leases and Permits, Sodium Leases and Permits--if included in this Index.)

GENERALLY

A determination that land was known to be valuable for minerals leasable under the Mineral Leasing Act of Feb. 25, 1920, 30 U.S.C. § 181 *et seq.* (1970), at the time mining claims for such land were located, will be upheld where there has been a hearing on the question and the mining claimant has failed to produce evidence to overcome such a classification.

Mining claims located in 1933 under the general mining laws, 30 U.S.C. § 21 *et seq.* (1970), on lands known to be valuable for minerals subject to leasing under the Mineral Leasing Act of Feb. 25, 1920, 30 U.S.C. § 181 *et seq.* (1970), are null and void ab initio because in 1933 such lands were not open to location and disposition under the mining laws; however, since the passage of the Act of Aug. 12, 1953, 30 U.S.C. § 501 (1970), and the Multiple Mineral Development Act of Aug. 13, 1954, 30 U.S.C. § 521 *et seq.* (1970), it is possible to locate a mining claim on lands covered by a mineral permit or lease, or application therefor, or which are known to be valuable for leasable minerals, but the leasable minerals are reserved to the United States.

United States v. Long Beach Salt Co., 23 IBLA 41 (Dec. 2, 1975)

MINERAL LEASING ACT--Continued

GENERALLY--Continued

The Mineral Leasing Act of 1920 vests the Department of the Interior with the discretion to lease public lands for oil and gas, including public lands in the national forests. Although this Department gives most careful consideration to the recommendations of the Forest Service, the latter does not have a veto power over public land leasing.

Chevron Oil Co., 24 IBLA 159 (Mar. 15, 1976)

A sodium prospecting permittee who applies for a preference right sodium lease, alleging with supportive data that he has discovered a valuable deposit of sodium and that the land is chiefly valuable for sodium, as required by sec. 24 of the Mineral Leasing Act of 1920, *as amended*, 30 U.S.C. § 262 (1970), is entitled to a hearing conducted in accordance with sec. 5 of the Administrative Procedure Act, 5 U.S.C. § 554 (1970), before his lease application may be finally rejected for failure to prove such a discovery.

Marine Minerals Corp., 25 IBLA 153 (June 10, 1976)

When deciding whether issuance of a phosphate prospecting permit is appropriate, the Bureau of Land Management is entitled to rely on the reasoned opinion of Geological Survey as its technical expert. A mineral determination made by Geological Survey will not be disturbed in the absence of a clear and definite showing of error. However, when Survey later changes its own determination, the case will be remanded for further consideration.

Philip Shaiman, 25 IBLA 177 (June 14, 1976)

The Secretary of the Interior has complete discretion to determine whether the surface of public land reported as valuable for any leasable mineral should be disposed of and a nonmineral application may be allowed only if it is determined by the proper officer with the concurrence of the Director, Geological Survey, that the disposal of the lands under the nonmineral application will not unreasonably interfere with current or contemplated operations under the Mineral Leasing Act.

The Somerset Coal Co., 26 IBLA 127 (July 30, 1976)

Minerals which are subject to location under the general mining law on public land outside the Lake Mead Recreation Area are subject to the leasing provisions of the Act of Oct. 8, 1964, within the Recreation Area. But, minerals which are disposable by sale under the 1947 Materials Act when situated outside the Recreation Area are also subject to such disposals within it.

Dilite Aggregate Co., 26 IBLA 197 (Aug. 11, 1976)

The Mineral Leasing Act of 1920, *as amended and supplemented*, most recently by the Coal Leasing Amendments Act of 1975, allows the Secretary to authorize development of coal leases by methods which were not utilized by the industry at the time of passage of the 1920 Act. The broad grants of authority to the Secretary in the 1920 Act allow technological developments in the coal mining industry.

In Situ Gasification of Coal, M-36890 (May 24, 1977) 84 I.D. 244

MINERAL LEASING ACT--Continued

GENERALLY--Continued

The U.S. Geological Survey is the technical expert of the Department of the Interior in matters concerning geologic evaluations. The Bureau of Land Management is entitled to rely on mineral determinations of Survey, such as qualification of a test well as a discovery well defined by a unit agreement, in the absence of a clear and definite showing of error.

Corrine Grace, 30 IBLA 296 (June 1, 1977)

Oil and gas leases of Indian lands entered into under the 1938 Mineral Leasing Act (25 U.S.C. §§ 396a-396f (1970)) are not subject to the taxation proviso contained in 25 U.S.C. § 398 (1970). The 1924 Act's (25 U.S.C. § 398) taxation proviso applies to leases entered into under the 1891 Mineral Leasing Act (25 U.S.C. § 397 (1970)).

Fort Peck tribal lands are not "bought and paid for" under 25 U.S.C. § 397 (1970).

Tax Status of the Production of Oil and Gas from Leases of Fort Peck Tribal Lands under the 1938 Mineral Leasing Act, M-36896 (Nov. [illegible], 1977) 84 I.D. 905

"Other related products." "Other associated deposits." When sodium or potassium brines are covered by leases conveying the exclusive right to mine and dispose of sodium compounds and other related products or potassium compounds and other associated deposits, the leases convey the exclusive rights to all minerals dissolved in the brine, including lithium.

"Leasing Act minerals." The Multiple Mineral Development Act, 30 U.S.C. § 524 (1970), reserved all Leasing Act minerals to the United States, and no rights to deposits of Leasing Act minerals are open to location under the mining laws under 30 U.S.C. § 525 (1970). "Leasing Act minerals" is defined as "all minerals which, upon Aug. 13, 1954, are provided in the mineral leasing laws to be disposed of thereunder." 30 U.S.C. § 530 (1970). Because leases for sodium, potassium, and "other related products" are authorized pursuant to 30 U.S.C. §§ 262, 282 (1970), "other related products" along with sodium and potassium fall within the category of Leasing Act minerals which include lithium which is dissolved in a sodium or potassium brine.

Foote Mineral Co., 34 IBLA 285 (Apr. 17, 1978) 85 I.D. 171

Where an applicant for a preference right coal lease fails to respond to a request for further information needed to process his application within a prescribed period of not less than 60 days, under 43 CFR 3521.1(g)(3), BLM properly rejected the lease application.

The failure of an applicant for a preference right coal lease to respond to a request for further information needed to process his application is not excused because he relied on a third party who failed to recognize that such action was required.

Cortella Coal Corp., 35 IBLA 172 (May 23, 1978)

The Federal coal program was substantially revised in 1975 by the Secretary in proper exercise of his discretion. The Bureau of Land Management did not act in an arbitrary and capricious manner when, under the new coal policy, it suspended applications for coal prospecting permit extensions and the applications were eventually rejected because the Federal Coal Leasing Amendments Act of 1975 removed the authority to grant coal prospecting permit extensions. A program pursued

MINERAL LEASING ACT--Continued

GENERALLY--Continued

for a period of time under a statutory grant of discretionary authority may be reviewed and revised at any time provided it is not done in an arbitrary manner and is done within the authority granted by Congress.

Island Creek Coal Co., 35 IBLA 247 (May 30, 1978) 85 I.D. 161

Thomas C. Woodward, 35 IBLA 262 (May 31, 1978)

Sec. 9(b) of the Administrative Procedure Act, *as amended*, 5 U.S.C. § 558(c) (1976), does not apply to coal prospecting permit extension applications because the prospecting is not an "activity of a continuing nature" within the meaning of the statute. As the Federal Coal Leasing Amendments Act of 1975, 90 Stat. 1083, 30 U.S.C. § 201 (1976), removed the Secretary of the Interior's discretion to grant extensions, applications for preference right leases filed after expiration of the initial 2-year permit term, and during pendency of extension applications, cannot be issued.

Rosebud Coal Sales Co., 37 IBLA 251 (Oct. 18, 1978) 85 I.D. 396

Applications for rights-of-way for oil and gas pipelines, or amendments thereto which were pending at the time of the passage of the Trans-Alaska Pipeline Authorization Act of Nov. 16, 1973, 87 Stat. 579, amending sec. 28 of the Mineral Leasing Act, 30 U.S.C. § 185 (1976), may only be granted pursuant to the provisions of that Act.

Alaska Pipeline Co., 38 IBLA 1 (Nov. 8, 1978)

The Secretary may, in computing the fair market value of coal to be leased competitively under privately owned surface, assume a limited surface owner consent cost, based on losses and costs to the surface estate and operation and similar evaluations, regardless of the actual price paid or the amount which a surface owner could otherwise demand for consent.

Assumption of a limited surface owner consent cost to be used in place of actual cost in the computation of fair market value of coal to be leased competitively is necessary to ensure receipt of fair market value by the public as required by 30 U.S.C. § 201(a) (1976).

In the exercise of his discretion to lease under the Mineral Leasing Act, the Secretary has authority to decline to issue a coal lease where surface owner consent costs prevent the public from realizing a fair return on the value of the coal.

Coal Leasing Program -- Relationship of the Cost of Surface Owner Consent to Receipt of Fair Market Value for Federally Owned Coal, M-36909 (Jan. 15, 1979) 86 I.D. 28

Where Bureau of Land Management terminates a sodium lease because lessee failed to submit justification for holding a lease in excess of the acreage limitation, the decision will be set aside upon submission or explanation of failure to provide written information, and the case will be remanded for the State Office to determine whether the information submitted on appeal justifies continued lease tenure.

Olin Corp., 39 IBLA 161 (Jan. 29, 1979)

MINERAL LEASING ACT--Continued

GENERALLY--Continued

Oil and gas leases of Indian lands entered into under the 1938 Mineral Leasing Act (25 U.S.C. §§ 396a-396f (1970)) are not subject to the taxation proviso contained in 25 U.S.C. § 398c (1970).

Tax Status of the Production of Oil and Gas from Jicarilla Apache Tribal Lands Under the 1938 Indian Mineral Leasing Act, M-36896 (Supp.) (Mar. 2, 1979) 86 I.D. 181

BLM may properly readjust a coal lease issued pursuant to the terms of sec. 7, Mineral Leasing Act, 30 U.S.C. § 207 (1970), within a reasonable time after expiration of its 20-year period with or without notice by BLM to the lessee prior to expiration of the 20-year period.

The failure of BLM to readjust a coal lease issued pursuant to the terms of sec. 7, Mineral Leasing Act, 30 U.S.C. § 207 (1970), prior to or immediately after expiration of its 20-year period does not constitute a waiver of BLM's right to readjust said lease.

BLM is not estopped to readjust a coal lease issued pursuant to the terms of sec. 7, Mineral Leasing Act, 30 U.S.C. § 207 (1970), by its failure to readjust said lease prior to or immediately after expiration of its 20-year period.

BLM's readjustment of a coal lease issued pursuant to the terms of sec. 7, Mineral Leasing Act, 30 U.S.C. § 207 (1970), after expiration of the 20-year lease term does not violate a lessee's rights under the fifth amendment of the United States Constitution.

BLM's readjustment of a coal lease issued pursuant to the terms of sec. 7, Mineral Leasing Act, 30 U.S.C. § 207 (1970), after expiration of the 20-year term does not violate the Mining and Minerals Policy Act of 1970, 30 U.S.C. § 21(a) (1976), national policy in favor of coal development, and a certain cooperative agreement between the State of Wyoming and the Department of the Interior.

California Portland Cement Co., Rosebud Coal Sales Co., 40 IBLA 339 (May 10, 1979)

The initial terms of any new competitive mineral lease must conform to the statutory minimum production royalty rate then applicable to that type of mineral lease. Competitive and noncompetitive mineral leases for coal, phosphate, potassium, sodium, and oil shale are subject to periodic readjustment of their terms and conditions. Such readjustments must conform to the statutory minimum production royalty rates then applicable.

The lease readjustment process and the sec. 39 royalty reduction process may not be merged into a single process where this would result in a readjusted production royalty rate below the applicable statutory minimum. The sec. 39 determination must be made independently.

In determining whether a permittee is entitled to a preference right lease the Secretary must consider all legal and economic conditions affecting the proposed operation of the lease as of the time of the determination, including the applicable statutory minimum production royalty rate. A preference right lease must provide for a production royalty rate in conformity with the statutory minimum rate applicable at the time of issuance.

Reduction of Production Royalties Below Statutory Minimum Rates, M-36920 (Dec. 11, 1979) 87 I.D. 69 (1980)

MINERAL LEASING ACT--Continued

APPLICABILITY

A silicate will be considered to be a sodium silicate and subject to disposal under the Mineral Leasing Act either where the sodium within the deposit is commercially valuable or where the sodium is essential to the existence of the mineral.

United States v. Union Carbide Corp., 31 IBLA 72 (June 24, 1977) 84 I.D. 309

Under 30 U.S.C. §§ 162 and 262 (1970), valuable deposits of sodium compounds are not open to location and disposition under the mining laws, but may be disposed of only under the Mineral Leasing Act, except for certain claims under 43 CFR 3501.1-1(b), existent at passage of Mineral Leasing Act of 1920 which have since been maintained in accordance with statute and regulation.

Permian Mud Service, Inc., 31 IBLA 150 (June 30, 1977) 84 I.D. 342

CONSENT OF AGENCY

The Mineral Leasing Act of 1920 vests the Department of the Interior with the discretion to lease public lands for oil and gas, including public lands in the national forests. Although this Department gives most careful consideration to the recommendations of the Forest Service, the latter does not have a veto power over public land leasing.

Chevron Oil Co., 24 IBLA 159 (Mar. 15, 1976)

ENVIRONMENT

The drawing of an offer for a noncompetitive lease in a simultaneous oil and gas lease drawing creates no vested rights in the offeror, and the offeror cannot compel the issuance of a lease before an environmental analysis has been made where the Bureau of Land Management has determined that the environmental analysis is necessary for the protection of the resources of the particular area.

Paula J. Jones, 24 IBLA 76 (Feb. 24, 1976)

A decision suspending oil and gas lease applications for public land in a national forest because the Forest Service has not prepared an environmental impact statement on a roadless area will be set aside and the cases remanded for the Bureau of Land Management, in the exercise of its delegated discretion to lease public lands for oil and gas, first to determine whether the Bureau should prepare an environmental impact statement as the lead agency responsible for mineral leasing, and then to act on the offers accordingly.

Chevron Oil Co., 24 IBLA 159 (Mar. 15, 1976)

In exercising the Secretary of the Interior's discretionary authority to lease known sodium deposits under the Mineral Leasing Act, an application to have the lands leased is properly rejected where it appears that the land applied for and surrounding environment near a national recreation area may be more severely damaged than most other sites within the known sodium leasing area, there is local governmental and other opposition

ENVIRONMENT--Continued

to the leasing, and Bureau of Land Management and Forest Service officials recommend preparation of an Environmental Impact Statement for the entire known sodium area before leasing further lands in the area.

Eugene V. Simons, 26 IBLA 208 (Aug. 16, 1976)

It is proper to include environmental protection stipulations in a phosphate lease even though the stipulations apply to privately owned surface lands overlying the federally reserved mineral estate under lease or to privately owned lands used in conjunction with the lease.

Cominco American, Inc., 26 IBLA 329 (Sept. 1, 1976)

LANDS SUBJECT TO

The Mineral Leasing Act of 1920 is not applicable to lands of the Wind River Indian Reservation which were ceded by the Indians to the United States in trust for disposition but were subsequently restored to tribal ownership. Such lands may be leased only under the Act of May 11, 1938, 25 U.S.C. § 396a *et seq.* (1970).

The Mineral Leasing Act of 1920 is not applicable to the ceded but undisposed of lands of the Wind River Indian Reservation. Such lands may be leased only under the Act of Aug. 21, 1916, 39 Stat. 519.

General Crude Oil Co., 19 IBLA 245 (Mar. 28, 1975)

Under 30 U.S.C. §§ 162 and 262 (1970), valuable deposits of sodium compounds are not open to location and disposition under the mining laws, but may be disposed of only under the Mineral Leasing Act, except for certain claims under 43 CFR 3501.1-1(b), existent at passage of Mineral Leasing Act of 1920 which have since been maintained in accordance with statute and regulation.

Permian Mud Service, Inc., 31 IBLA 150 (June 30, 1977)
84 I.D. 342

"Other related products." "Other associated deposits." When sodium or potassium brines are covered by leases conveying the exclusive right to mine and dispose of sodium compounds and other related products or potassium compounds and other associated deposits, the leases convey the exclusive rights to all minerals dissolved in the brine, including lithium.

"Leasing Act minerals." The Multiple Mineral Development Act, 30 U.S.C. § 524 (1970), reserved all Leasing Act minerals to the United States, and no rights to deposits of Leasing Act minerals are open to location under the mining laws under 30 U.S.C. § 525 (1970). "Leasing Act minerals" is defined as "all minerals which, upon Aug. 13, 1954, are provided in the mineral leasing laws to be disposed of thereunder." 30 U.S.C. § 530 (1970). Because leases for sodium, potassium, and "other related products" are authorized pursuant to 30 U.S.C. §§ 262, 282 (1970), "other related products" along with sodium and potassium fall within the category of Leasing Act minerals which include lithium which is dissolved in a sodium or potassium brine.

Foote Mineral Co., 34 IBLA 285 (Apr. 17, 1978)
85 I.D. 171

LANDS SUBJECT TO--Continued

Oil and gas under a reservoir right-of-way may not be leased under the Mineral Leasing Act of 1920, 30 U.S.C. § 181 *et seq.* (1970), but may only be leased to the holder of the right-of-way, his assignee, or to adjacent owners or their lessees in accordance with the Act of May 21, 1930, 30 U.S.C. § 301 (1970); therefore, offers filed under the Mineral Leasing Act for such lands are properly rejected.

Alice Hays, 36 IBLA 313 (Aug. 23, 1978)

Lands situated within the boundaries of incorporated cities, towns, or villages are excluded from oil and gas leasing under the Mineral Leasing Act, *as amended*, 30 U.S.C. § 181 (1970). If drainage occurs on such lands by reason of wells drilled on adjacent lands, agreements with the owners thereof may be entered into by the Bureau of Land Management pursuant to 43 CFR 3100.3.

Hawthorn Oil Co., 37 IBLA 91 (Sept. 22, 1978)

A prospecting permit which embraces land which is not "unclaimed" and "undeveloped" is a nullity and void as a conveyance of any interest in that land. Land in a mining claim remains "unclaimed" land for the purposes of M-36893 so long as the claim is not validated by discovery of a valuable locatable mineral deposit at the date of permit issuance. Surface disturbing mineral activities, associated with delineation of a mineral ore body which could reasonably be expected to disclose knowledge of an area's coal potential constitute development. The bona fide purchaser provisions of sec. 27(h)(2) of the Mineral Leasing Act do not apply to permits which embrace land that is claimed or developed.

Effect and Implementation of Solicitor's Opinion M-36893 on "Unclaimed, Undeveloped," M-36893 (Supp.) (Nov. 19, 1979)
86 I.D. 627

METHODS OF DEVELOPMENT

The Mineral Leasing Act of 1920, *as amended and supplemented*, most recently by the Coal Leasing Amendments Act of 1975, allows the Secretary to authorize development of coal leases by methods which were not utilized by the industry at the time of passage of the 1920 Act. The broad grants of authority to the Secretary in the 1920 Act allow technological developments in the coal mining industry.

In Situ Gasification of Coal, M-36890 (May 24, 1977)
84 I.D. 244

RENTALS

The Bureau of Land Management is authorized by regulation 43 CFR 3524.1-4(a)(2)(i) to impose a reasonable bonus per acre as a condition to modifying a phosphate lease by adding land to it noncompetitively.

Cominco American, Inc., 26 IBLA 329 (Sept. 1, 1976)

ROYALTIES

"Gross value at the point of shipment to market." The royalty rate for products mined and disposed of under sodium and potassium leases must be imposed on the "gross value of the sodium (or potassium) compounds and other related products at the point of shipment to market," which means the gross value of a refined product for sale in an established market, and in general, no

MINERAL LEASING ACT--Continued

ROYALTIES--Continued

deductions may be allowed for costs incurred in developing a product to a marketable condition except for the price of reagents which are chemically combined with the product sold from the lease.

The Government is not estopped from collecting royalty payments which are owed, even if it has accepted improper payments in the past.

The statute of limitations for filing claims on behalf of the Government in a Federal court need not be invoked in an administrative adjudicative proceeding to determine royalties due to the United States under mineral leases.

Foote Mineral Co., 34 IBLA 285 (Apr. 17, 1978)
85 I.D. 171

Sec. 39 of the Mineral Leasing Act authorizes the Secretary to reduce the royalty on coal, oil and gas, oil shale, phosphate, sodium, potassium, and sulphur leases in the interest of conservation whenever in his judgment it is necessary to do so in order to promote development, or whenever in his judgment the leases cannot be successfully operated under the terms provided therein.

Sec. 39 of the Mineral Leasing Act authorizes the Secretary to reduce production royalties on coal, oil and gas, phosphate, sodium, potassium, and sulphur leases below the statutory minimum rates established for those minerals.

The Federal Coal Leasing Amendments Act of 1975 left in effect the Secretary's authority under sec. 39 of the Mineral Leasing Act to reduce production royalties on coal leases below the statutory minimum rate.

The initial terms of any new competitive mineral lease must conform to the statutory minimum production royalty rate then applicable to that type of mineral lease. Competitive and noncompetitive mineral leases for coal, phosphate, potassium, sodium, and oil shale are subject to periodic readjustment of their terms and conditions. Such readjustments must conform to the statutory minimum production royalty rates then applicable.

The lease readjustment process and the sec. 39 royalty reduction process may not be merged into a single process where this would result in a readjusted production royalty rate below the applicable statutory minimum. The sec. 39 determination must be made independently.

Reduction of Production Royalties Below Statutory Minimum Rates, M-36920 (Dec. 11, 1979) 87 I.D. 69 (1980)

MINERAL LEASING ACT FOR ACQUIRED LANDS

GENERALLY

An oil and gas lease offer which is not accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States is properly rejected.

Judith Walker, Ginger Lawhon, 18 IBLA 410 (Feb. 10, 1975)

MINERAL LEASING ACT FOR ACQUIRED LANDS--Continued

GENERALLY--Continued

Government mineral leases are subject to the same rules of construction as those applied in interpreting a contract between two private parties.

While a general rule of contract construction provides that when two provisions of a lease conflict, and one is a printed form while the other is a typed or written addendum, the latter provision will be given force and effect over the former, this rule is only relevant where the two provisions cannot be reconciled.

The addition to a standard lease clause, reserving to the Secretary the right to establish reasonable minimum values for minerals mined, of an insertion which spells out how the gross value is to be set does not deprive the Secretary of the reserved right where the application of the added provisions would deprive the United States of any payment for a recoverable associated mineral.

St. Joe Minerals Corp., 20 IBLA 272 (May 15, 1975)

An acquired lands oil and gas lease offer, for lands in which the United States owns only a fractional mineral interest, successfully drawn at a noncompetitive lease simultaneous drawing is defective and is properly rejected when the applicant fails to accompany his offer with the statement required by the regulation showing the extent of his ownership of operating rights to the fractional mineral interest not owned by the United States.

George B. Isbell, Jr., 20 IBLA 312 (May 30, 1975)

An acquired lands lease offer for land in which the United States owns only a fractional mineral interest is defective and subject to rejection when the applicant fails to accompany his offer with the statement required by the regulations showing the extent of his ownership of operating rights to the fractional mineral interest not owned by the United States. Under the regular or "over-the-counter" filing procedure, however, if the offeror subsequently submits his statement regarding ownership of operating rights prior to a final decision rejecting the offer, the defect may be considered cured with priority of filing as of the time the statement was filed.

John Oakason, Jean Oakason, 21 IBLA 185 (July 28, 1975)

An applicant for an acquired lands oil and gas lease may properly be required to furnish the Bureau of Land Management with certain title information in the county recorder's offices as a precondition to lease issuance if the Bureau has insufficient title information.

Jean Oakason, 22 IBLA 33 (Sept. 10, 1975)

An acquired lands oil and gas lease offer for lands in which the United States owns only a fractional mineral interest is defective and is properly rejected when the applicant fails to accompany the offer with the statement required by the regulation showing the extent of ownership of operating rights to the fractional mineral interest not owned by the United States.

Margaret Hughes Hughes, 22 IBLA 146 (Sept. 30, 1975)

Michael Shearn, 24 IBLA 259 (Mar. 29, 1976)

Robert L. Williams, 24 IBLA 311 (Apr. 20, 1976)

Mary Nan Spear, 25 IBLA 34 (May 5, 1976)

Beatrice B. Marchand, 26 IBLA 180 (Aug. 9, 1976)

MINERAL LEASING ACT FOR ACQUIRED LANDS--Continued

GENERALLY--Continued

An applicant for an acquired lands oil and gas lease may properly be required to furnish the Bureau of Land Management with reasonable title information in the county recorder's offices as a precondition to lease issuance.

Jean Oakason, 22 IBLA 311 (Nov. 10, 1975)

An acquired lands oil and gas lease offer for lands in which the United States owns only a fractional mineral interest is defective and is properly rejected when the applicant fails to accompany the offer with the statement required by 43 CFR 3130.4-4 showing the extent of ownership of operating rights for the fractional mineral interest not owned by the United States.

June Brooks, 25 IBLA 326 (June 30, 1976)

A simultaneous acquired lands oil and gas lease offer for lands in which the United States owns only a fractional mineral interest is defective and is properly rejected when the applicant fails to accompany his offer with the statement required by the regulation showing the extent of his ownership of operating rights to the fractional mineral interests not owned by the United States, nor can such defect be cured by submitting the information on appeal.

Jelenko Stefanovic, 26 IBLA 229 (Aug. 17, 1976)

An acquired lands oil and gas lease offer, for lands in which the United States owns only a fractional mineral interest, is defective and is properly rejected when the applicant fails to accompany its offer with the statement required by the regulation showing the extent of its ownership of operating rights to the fractional mineral interest not owned by the United States. Under the regular or "over-the-counter" filing procedure, however, if the offeror submits its statement of operating rights with its appeal, the defect may be considered cured with priority of filing as of that time.

Arkansas Western Gas Co., 27 IBLA 207 (Oct. 6, 1976)

An oil and gas lease offer for acquired lands in which the United States owns a fractional mineral interest must be accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States. An offer which is defective for failure to comply with this mandatory regulation must be rejected.

Frank O. Wells, 28 IBLA 113 (Nov. 15, 1976)

Susan H. Smith, 28 IBLA 173 (Nov. 24, 1976)

An oil and gas lease offer for acquired lands in which the United States owns a fractional mineral interest, filed before Sept. 30, 1976, must have been accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States. An offer which was defective for failure to comply with this mandatory regulation must be rejected where it was filed in the simultaneous drawing procedure.

Duncan Miller, 29 IBLA 1 (Feb. 7, 1977)

Mary Ann Spear, 31 IBLA 386 (Aug. 16, 1977)

MINERAL LEASING ACT FOR ACQUIRED LANDS--Continued

GENERALLY--Continued

An oil and gas lease offer for acquired lands in which the United States owns a fractional mineral interest must be accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States. When an offeror submits, on appeal, a copy of such statement but the date on the statement differs from the date on the card, and the offeror does not allege he filed the statement simultaneously with the offer, such offer must be rejected for failure to comply with a mandatory regulation.

Duncan Miller, 29 IBLA 83 (Feb. 16, 1977)

An oil and gas lease offer for acquired lands in which the United States owns a fractional mineral interest, filed before Oct. 20, 1976, must have been accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States. An offer which was defective for failure to comply with this mandatory regulation must be rejected where it was filed in the simultaneous drawing procedure.

Vernon C. Powell, 30 IBLA 70 (Apr. 18, 1977)

Where noncompetitive acquired lands oil and gas lease offers were allegedly deposited on the cashier's counter in the proper Bureau of Land Management office prior to close of business on a certain day, yet were not discovered by a Bureau employee until 8 a.m. the following day and date-time stamped as filed at 10 a.m. on such day, a protest and petition to amend the filing date of such offers are properly denied where the offeror produces no evidence to support her claim other than her personal affidavit; where no Bureau employee saw the offeror in the Bureau office at the time she claimed to have been there; where no Bureau employee saw the offers on the counter until the following day; and where third-party rights are involved.

Laura J. Spangler, 30 IBLA 265 (May 31, 1977)

CONSENT OF AGENCY

The Mineral Leasing Act for Acquired Lands of 1947, *as amended*, 30 U.S.C. §§ 351-359 (1970), requires that the consent of the administrative agency having jurisdiction of the acquired land described in a lease offer be obtained prior to the issuance of an oil and gas lease for such land. The Department of the Interior has no discretionary authority to lease such land where the consent is withheld.

Frederick L. Smith, 21 IBLA 239 (Aug. 11, 1975)

Sallie B. Sanford, 24 IBLA 31 (Feb. 17, 1976)

Charles B. Bajek and Frederick L. Smith, 29 IBLA 330 (Mar. 31, 1977)

Geo, Inc., 34 IBLA 27 (Feb. 14, 1978)

Where the agency or Federal instrumentality involved denies its consent to favorable consideration of an application under the Mineral Leasing Act for Acquired Lands, 30 U.S.C. §§ 351-359 (1970), the application must be rejected.

Lesco, Inc. (Appellant), Tennessee Valley Authority (Respondent), 23 IBLA 194 (Jan. 6, 1976)

CONSENT OF AGENCY--Continued

Under the Mineral Leasing Act for Acquired Lands of 1947, as amended, 30 U.S.C. §§ 351-359 (1970), if the lands embraced within an oil and gas lease application are under surface jurisdiction of a service or bureau within the Department of the Interior, as are the National Park Service and the Bureau of Reclamation, the consent of the Secretary of the Interior is necessary under the Act to the leasing of the land. Where the National Park Service recommends that oil and gas leases for lands within the boundaries of the Chickasaw National Recreation Area be rejected in order to maintain the area for the purposes for which it was established, it is proper to accept this recommendation and reject the offers.

Delphine Shear, David L. Shear, 29 IBLA 33 (Feb. 10, 1977)

Where acquired lands are under the jurisdiction of a bureau of the Department of the Interior, the Secretary is the one whose consent is necessary to the leasing of the land. The Bureau's views, of course, will be considered carefully. Where its views are merely conclusionary, it is proper to remand the case to ascertain the factual basis of such conclusions and whether leasing would be permissible if coupled with appropriate stipulations. The Bureau of Reclamation is not an "agency" within the ambit of that term in the Acquired Lands Mineral Leasing Act. 30 U.S.C. §§ 351-59 (1970).

The Mineral Leasing Act for Acquired Lands, as amended, 30 U.S.C. §§ 351-59 (1970), requires that the consent of the administrative agency having jurisdiction of the acquired land described in a lease offer be obtained prior to the issuance of an oil and gas lease for such land. The Department of the Interior has no authority to lease such land where the consent is withheld.

Walter W. Sapp, 29 IBLA 319 (Mar. 30, 1977)

The Bureau of Reclamation is not an "agency" within the ambit of that term in the Acquired Lands Mineral Leasing Act, 30 U.S.C. §§ 351-59 (1970). Where acquired lands are under the jurisdiction of a Bureau of the Department of the Interior, it is the Secretary's consent which is necessary to the leasing of land. The Bureau's views will be given careful consideration. However, where such views are merely conclusional, it is proper to remand the case to ascertain the factual basis for such conclusions and to determine whether leasing may be permissible if coupled with appropriate stipulations.

Shell Oil Co., 30 IBLA 187 (May 19, 1977)

Kent E. Peterson, 30 IBLA 199 (May 20, 1977)

A recommendation by the Bureau of Reclamation that issuing oil and gas leases on acquired land under its administration would jeopardize further acquisitions, should be given careful consideration, but the Bureau of Land Management must independently evaluate whether issuing the leases would be in the public interest.

An independent evaluation of whether the issuance of oil and gas leases on acquired lands would be in the public interest need, in some cases, consist only of an examination of the general character of the land. Where, however, the offeror raises material factual questions, these must be considered.

Harris B. Pender, 33 IBLA 216 (Dec. 22, 1977)

CONSENT OF AGENCY--Continued

The Bureau of Land Management must reject a noncompetitive oil and gas lease offer for acquired lands under the jurisdiction of the Department of the Air Force where the latter agency withholds its consent from the issuance of a lease.

Capitol Oil Corp., 33 IBLA 392 (Jan. 26, 1978)

Where acquired lands are under the jurisdiction of the Bureau of Reclamation, its opinion as to the desirability of issuing an oil and gas lease under the Mineral Leasing Act for Acquired Lands is not controlling, although its views will be considered carefully. Rather, it is up to the Bureau of Land Management to assemble information and to determine on the Department's behalf whether such a lease may be issued.

Andrew E. Bartley, 35 IBLA 137 (May 22, 1978)

LANDS SUBJECT TO

An offer for an oil and gas lease under the Mineral Leasing Act for Acquired Lands may properly be rejected where there is uncertainty regarding the title to the oil and gas deposits.

Shell Oil Co., 20 IBLA 292 (May 27, 1975)

Lands or mineral interests acquired by purchase by the Tennessee Valley Authority for the development of mineral resources are not subject to leasing under the Mineral Leasing Act for Acquired Lands.

Leeco, Inc. (Appellant), Tennessee Valley Authority (Respondent), 23 IBLA 194 (Jan. 6, 1976)

Because the Mineral Leasing Act for Acquired Lands specifically excludes the leasing of land located within an incorporated city, town, or village, a noncompetitive oil and gas lease offer for acquired land within the boundaries of such a city, town, or village is properly rejected.

James L. Santy, 25 IBLA 390 (July 6, 1976)

An oil and gas lease offer made pursuant to the Mineral Leasing Act for Acquired Lands is properly rejected where the subject lands are not acquired lands but, rather, are patented with a reservation of mineral rights in the United States.

John C. Clay, 28 IBLA 353 (Jan. 24, 1977)

Lands acquired for military purposes and subsequently disposed of as surplus property under the Federal Property and Administrative Services Act with a reservation of mineral rights to the United States are not subject to leasing under the Mineral Leasing Act for Acquired Lands. Oil and gas leases on such land may issue only under the provisions of the Federal Property and Administrative Services Act, which requires competitive bidding.

Capitol Oil Corp., 33 IBLA 392 (Jan. 26, 1978)

MINERAL LEASING ACT FOR ACQUIRED LANDS--Continued

LANDS SUBJECT TO--Continued

The Mineral Leasing Act for Acquired Lands does not exclude from oil and gas leasing those lands underlying the Missouri River within the boundaries of the Fort Berthold Indian Reservation as established by the Treaty of Fort Laramie (1851) and the Executive Order of Apr. 12, 1870, which were reacquired by the United States from the Indian tribes. The exclusion in the Act for submerged lands refers to submerged *coastal* lands, as set forth in 43 CFR 3101.2-1(g).

Impel Energy Corp., 42 IBLA 105 (Aug. 16, 1979)

Lands which were acquired for development of their uranium deposits are not subject to oil and gas leasing under the Mineral Leasing Act for Acquired Lands.

Esdras K. Hartley, 44 IBLA 66 (Nov. 20, 1979)

MINERALS EXPLORATION

(*See also* Defense Minerals Exploration--if included in this Index.)

Where application is made to lease reserved minerals in lands patented to the State of California for park or other public purposes, the regulations do not require the discovery of a workable deposit of mineral of commercial quantity and quality as a pre-condition to the issuance of the lease. Indeed, a lease affords the only authority for the conduct of exploratory operations.

George W. Wright, Sr. (Deceased), 22 IBLA 280 (Oct. 30, 1975)

Where the declared administrative policy is to refuse permission for geophysical exploration on lands controlled by sec. 17(d)(1) of the Alaska Native Claims Settlement Act and the subject lands are under consideration for possible inclusion in the national forest system, a decision refusing such permission will be affirmed.

Shell Oil Co., 28 IBLA 378 (Feb. 4, 1977)

An application for permit to drill for oil and gas in a designated Potash Area is properly denied where the applicant fails to show that his application comes within either of the two exceptions to the policy in favor of potash development enunciated in an Order of the Secretary, dated Oct. 7, 1975, 40 FR 51486.

Belco Petroleum Corp., 42 IBLA 150 (Aug. 16, 1979)

MINES AND MINING

The Mining and Minerals Policy Act of 1970, 30 U.S.C. § 21a (1970), does not require the granting of permission for placer mining operations on land within a powersite withdrawal where such operations would probably interfere with other uses of the land.

United States v. Edward J. Connolly, Jr., Idaho Fish and Game Department (Intervenor), 40 IBLA 30 (Mar. 15, 1979)

MINING CLAIMS

(*See also* Multiple Mineral Development Act, Surface Resources Act--if included in this Index.)

GENERALLY

When one whose application for patent for a mining claim has been rejected requests a hearing to present evidence on the controlling issues of fact involved in the rejection of the application, such request must be granted.

If mining claimants possess the essential qualifications as to citizenship, and if they peacefully entered and occupied the land and discovered a valuable mineral deposit thereon at a time when both the land and the mineral were subject to appropriation under the mining laws, and if they thereafter remained in peaceful, exclusive possession and openly worked the claim for the period prescribed by the State statute of limitations for mining claims, and expended at least the minimum amount of money prescribed by law in the improvement of the claim, they have thereby established their right to receive a patent pursuant to 30 U.S.C. § 38 (1970) notwithstanding their error in locating and recording their claim under the statute pertaining to placer locations rather than properly under the lode mining law, assuming that there has been no intervening loss of discovery.

Estate of Arthur C. W. Bowen (Deceased), 18 IBLA 375 (Jan. 30, 1975)

The Secretary of the Interior is charged with seeing that valid mining claims are recognized, invalid ones eliminated and the rights of the public preserved.

Richard E. and Shirley A. Jarrett, 19 IBLA 78 (Feb. 27, 1975)

The authority of the Government to proceed with the determination of the validity of a mining claim is not barred by laches, because Government property is not to be disposed of contrary to law, despite any acquiescence, laches, or failure to act on the part of its officer or agents.

Montana Copper King Mining Co., et al., 20 IBLA 30 (Apr. 16, 1975)

The Department of the Interior has the right to contest the validity of an unpatented mining claim at any time until patent issues.

A judgment is not conclusive of a fact erroneously assumed when the fact was not actually litigated and determination thereof was not essential to the decision.

United States v. Bert L. Johnson, 23 IBLA 349 (Jan. 21, 1976)

Where a contestee makes a timely response to a Government complaint in a mining contest, which can reasonably be construed as a general denial of the allegations contained in the complaint, the response will be considered a sufficient answer within the contemplation of the regulations. The allegations then cannot be taken as admitted and the mining claim declared null and void without a hearing.

United States v. Cliff Libby, 24 IBLA 39 (Feb. 19, 1976)

MINING CLAIMS--Continued

GENERALLY--Continued

A mining claim is a claim to property which may not be declared invalid without proper notice and an adequate opportunity for an agency hearing in accordance with due process of law. That due process consists of notice and opportunity for hearing and it suffices if the claimant is afforded the opportunity to be present and heard. The fact that the claimant, after filing a timely answer to the contest complaint, refused to attend that hearing and produce evidence does not vitiate the due process he has received.

United States v. Carl Bellamy. 25 IBLA 50 (May 14, 1976)

When title to an entire in-place school section has passed to the State, the United States no longer has a property interest therein and the land is no longer subject to location under the mining laws.

J. P. Hinds et al., 25 IBLA 67 (June 1, 1976)
83 I.D. 275

The Wild and Scenic Rivers Act withdrew from appropriation under the mining laws the minerals in Federal lands which constitute the bed or bank or are situated within one-quarter mile of the bank of any river listed as a potential addition to the Wild and Scenic River System. This withdrawal does not extend to minerals in lands near tributaries of designated rivers unless the tributaries were expressly included.

Walter B. Freeman et al., 25 IBLA 150 (June 10, 1976)

Water is not a mineral which is locatable under the general mining law.

The bottling and distribution for sale of spring water for human consumption does not constitute the mining of a valuable mineral deposit under the general mining law.

Robert L. Beery et al., 25 IBLA 287 (June 28, 1976)
83 I.D. 249

The Department of the Interior may contest the validity of any unpatented mining claims located on public land, including claims located within powersite withdrawals; the Department's authority to contest the validity of mining claims was not diminished by the Mining Claims Rights Restoration Act of 1955.

David Loring Gamble, Darrel Houglum, 26 IBLA 249
(Aug. 18, 1976)

A petition for deferment of assessment work may only be granted pursuant to 43 CFR 3852.1, where "legal impediments" exist which affect the right of a mining claimant to enter upon the surface of a claim or group of claims. That there has been no administrative determination of the validity of the claims, possible trespass actions are threatened, and there is a Federal court suit pending concerning the claims, do not constitute "legal impediments" within the ambit of the Act of June 21, 1949, 30 U.S.C. § 28b-e (1970), and a petition for deferment of assessment work will be denied.

Portland General Electric Co., L. C. Cortright, 29 IBLA
165 (Mar. 9, 1977)

MINING CLAIMS--Continued

GENERALLY--Continued

The notation on public records of the Bureau of Land Management of a request for withdrawal has a segregative effect on land included in a mining location, so that in a contest proceeding, the claimants must show that they had made a discovery of a valuable mineral deposit before the time of posting of the withdrawal application.

United States v. John L. Maley and James E. Engel.
29 IBLA 201 (Mar. 22, 1977)

In determining whether a deposit of clay is locatable as a valuable mineral deposit under the mining laws, there is a distinction between a deposit considered to be a common or ordinary clay, which is not locatable, and a locatable deposit having exceptional qualities useful and marketable for purposes for which common clays cannot be used.

"Common Clay." A "common clay" not locatable under the mining laws does not include clay having exceptional qualities which meets refractory and other quality standards for highgrade ceramic products or other products requiring a high refractoriness, or which is useful for certain industrial uses, such as in the oil and oil well drilling industries, outside the manufacture of general clay products. It does include, however, clay usable or used only for structural and other heavy clay products, for pressed or face brick, as well as ordinary brick, and for pottery and ordinary earthenware and stoneware. The fact industrial and technological changes may make a certain clay deposit valuable for a given major manufacturer of brick, tile and other clay products, because it meets its peculiar specifications for blends with other raw materials, does not warrant a change from Departmental precedents and a strong Congressional policy establishing that clay usable only for such purposes is a common clay not locatable under the mining laws.

United States v. Thomas J. Peck et al., 29 IBLA 357
(Mar. 31, 1977)
84 I.D. 137

Where a mining claim is located on lands at a time when the official records of the Bureau of Land Management showed such lands to be subject to a proposed withdrawal from operation of the mining laws, that mining claim is null and void ab initio.

Jack E. Cance et al., 30 IBLA 112 (May 2, 1977)

A mining claim located after Oct. 21, 1976, for which a notice of recordation required to be filed by sec. 314(b) of the Federal Land Policy and Management Act of 1976, has not been filed within 90 days from the date of location is void, and the Department may not accept or give force to a notice of recordation filed after the 90-day period.

Effect of Failure to Record Timely Under Sec. 314(b), Federal Land Policy and Management Act of 1976, M-36889
(May 17, 1977)
84 I.D. 188

The Bureau of Land Management, in exercise of its authority to regulate the acquisition of rights in the public lands, may contest any unpatented mining claim located on public land under its jurisdiction to determine, among other things, if the claimant has discovered on his mining claim a valuable mineral deposit as required by 30 U.S.C. § 22 (1970).

United States v. Gwendolyn McClurg et al., 31 IBLA 8
(June 15, 1977)

MINING CLAIMS--Continued

GENERALLY--Continued

Government witnesses in a contest proceeding who are qualified by education and experience are competent to testify as experts with reference to the prudent man rule.

United States v. A. O. Bartell, 31 IBLA 47 (June 23, 1977)

A petition for deferment of annual assessment work will not be granted where a claimant alleges only that the claims in question are the subject of litigation and that it would be unwise to engage in any development until a resolution of that litigation is reached.

Charlestone Stone Products, Inc., 32 IBLA 22 (Aug. 30, 1977)

A locator of a mining claim on public land has taken only the initial step in seeking to secure a gratuity from the Government and obtains no rights against the United States until there has been a discovery of a valuable mineral deposit within the limits of the claim.

United States v. R. E. Rodgers and Barbara J. Rodgers, 32 IBLA 77 (Sept. 2, 1977)

Land is segregated from entry under the mining laws when a proposed withdrawal of the lands from mineral entry is noted on the official records of the Bureau of Land Management and a mining claim located after that time is null and void ab initio.

The segregative effect of an application by a Federal agency for withdrawal of land from mineral entry is not affected by the provision in the published proposal that further hearings and investigations may be held.

The authority of the Government to proceed with the withdrawal of public lands, after a Federal agency has filed an application for such action, which withdraws that land from mineral location, will not be barred by laches because of lapse of time.

William J. Smith, Sr., et al., 33 IBLA 47 (Nov. 25, 1977)

The Bureau of Land Management may require maps of mining claims meeting the requirements of 43 CFR 3833.1-2(c)(7) before accepting the recordation of the claims under 43 U.S.C.A. § 1744 (West Supp. 1977).

Paul S. Coupey, 33 IBLA 178 (Dec. 20, 1977)

Where a corporation allegedly acquired a group of unpatented mining claims, but the instruments of conveyance and the abstract of title are subject to various objections by the Government's title examiner, which the corporation finds are difficult or impossible to cure, the corporation nonetheless may receive a patent to the claims pursuant to the Act of July 9, 1870 (R.S. § 2332; 30 U.S.C. § 38 (1970)), by demonstrating its qualifications under that Act.

Alaska Placer Co., 33 IBLA 187 (Dec. 21, 1977)
84 I.D. 990

MINING CLAIMS--Continued

GENERALLY--Continued

A mining claim located after Oct. 21, 1976, for which a notice of recordation required to be filed by sec. 314(b) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. § 1744) has not been filed within 90 days from the date of location is void, and no force and effect can be given to a notice of recordation filed after the 90-day period.

Southwestern Exploration Associates, 33 IBLA 240 (Dec. 28, 1977)

The purpose of an amended location is to cure imperfections and correct errors, which in the absence of intervening rights relates back to the date of original location. An amended location made while land is withdrawn from mineral entry is ineffectual.

Ray L. Virgin, 33 IBLA 354 (Jan. 18, 1978)

The Secretary of the Interior is charged with seeing that valid mining claims are recognized, invalid ones eliminated, and the rights of the public preserved.

A mining claimant must comply both with Federal law and with such State requirements as are not inconsistent with Federal mining provisions.

In order for a mining claimant to maintain a possessory right in a claim under Arizona law, the locator must file within 90 days a copy of the location notice in the county in which the claim is located.

The United States and a city which has filed an application to purchase land pursuant to the Recreation and Public Purposes Act are adverse claimants who may take advantage of the failure of a mining claimant to perform annual assessment.

A classification of the lands under the Recreation and Public Purposes Act, 43 U.S.C. § 869 (1970), *as amended*, segregates the land from all other forms of appropriation under the public land laws including the mining laws when the classification is noted on the Bureau of Land Management State Office records.

Under Arizona law a failure to perform the tasks enunciated in 27 ARS 203 within the specified time will be deemed to be an abandonment of a mining claim.

H. B. Webb, 34 IBLA 362 (May 1, 1978)

"Subject to valid existing rights." The Secretary of the Interior in making withdrawals "subject to valid existing rights" in PLO 5179 and PLO 5250 intended exceptions to withdrawal to apply in behalf of only those claimants who themselves held such valid rights at time of withdrawal. The Secretary did not intend existence of another's valid rights on withdrawal date to restrain withdrawal so as to allow a topfiling claimant to enter pertinent lands after withdrawal date and independently establish rights under mining laws.

Harry H. Wilson, 35 IBLA 349 (June 19, 1978)

The Wild and Scenic Rivers Act withdrew from appropriation under the mining laws the minerals in Federal lands which constitute the bed or bank or are situated within one-quarter mile of the bank of any river listed as a potential addition to the Wild and Scenic River System. Land within one-quarter mile of the bank of the Illinois River, Oregon, a river designated in sec.

MINING CLAIMS--Continued

GENERALLY--Continued

5(a) of the Act as a potential addition to the system, is withdrawn from mineral entry and therefore, not available for mining claims.

The location of a mining claim simply to maintain a road and insure access to other claims beyond is not a legitimate purpose within the scope or intention of the general mining law.

Robert Cornett, 36 IBLA 84 (July 12, 1978)

A mining claim is properly declared null and void ab initio where the land on which it is located was segregated by a formal forest exchange application, which withdrew the selected public lands from location under the mining laws prior to the time that the mineral location was made.

Charles A. Morrison, 36 IBLA 372 (Aug. 31, 1978)

Land which has been patented without a reservation of minerals to the United States or which otherwise has been removed from the operation of the United States' mining laws is not available for the location of mining claims. Mining claims located on such land after it is so removed are null and void ab initio.

Federal-American Partners, 37 IBLA 330 (Oct. 26, 1978)

Unless the statute creating the area specifically provides otherwise, areas within the National Park system are not open for location of mining claims.

Tom Brown, 37 IBLA 381 (Nov. 6, 1978)

Pursuant to 43 CFR 2091.2-5, an application for withdrawal temporarily precludes entry on the land in derogation thereof, from the time the application is noted on the records until revocation thereof is also noted on the records, and such withdrawal is not deemed to have expired despite the fact that the withdrawal application was noted on the records 7 years prior to location of the mining claim.

A mining claim located in part on land withdrawn for a utility corridor and segregated from mineral entry is null and void ab initio as to such land.

Earl D. Woody, Winton E. White, 38 IBLA 385 (Dec. 29, 1978)

Where it is determined that a person or association, they and their grantors, have met the fundamental requirements of the possessory rights section of the mining laws, 30 U.S.C. § 38 (1976), i.e., where they have held and worked their claims in this instance for the qualifying period of 5 years under the Arizona statute of limitations covering actions to recover real property, they are entitled to a patent to those areas where there are no conflicting mining claims, regardless of the fact that the claims were improperly located as placer claims for perlite lode deposits.

United States v. Estate of Arthur C. W. Bowen (Deceased), and Superior Perlite Mines, Inc. (Contestees), Harborlite Corp. (Intervenor), 38 IBLA 390 (Jan. 8, 1979)

MINING CLAIMS--Continued

GENERALLY--Continued

A petition for deferment of assessment work may only be granted pursuant to 43 CFR 3852.1, where "legal impediments" exist which affect the right of a mining claimant to enter upon the surface of a claim or group of claims. Pending litigation, which does not, in and of itself, preclude access to the mining claims does not constitute "legal impediments" within the ambit of the Act of June 21, 1949, 30 U.S.C. § 28b (1976), and a petition for deferment of assessment work will be denied.

A mining claimant petitioning for temporary deferment of annual assessment work is required by 43 CFR 3852.2(a) to file the petition in duplicate, and to attach a copy of notice to the public to one copy of the petition. The copy of the public notice must show on its face that it has been duly filed or recorded. Failure to meet this requirement will cause the petition to be denied.

Don Hesselgesser, 39 IBLA 75 (Jan. 24, 1979)

Designation of a river for potential addition to the national wild and scenic rivers system, pursuant to the Wild and Scenic Rivers Act of 1968, as amended, 16 U.S.C. § 1271 et seq. (1976), withdraws Federal lands constituting the bed or bank or within one-quarter mile of the bank of such river from all forms of appropriation under the mining laws, and on appeal the mining claimant bears the burden of showing by survey or other evidence that his claim is outside the withdrawn area.

Barry C. Binning, 39 IBLA 390 (Feb. 28, 1979)

Lands segregated on the public records by a proposed withdrawal posted Apr. 6, 1973, or a Recreational and Public Purposes Classification filed Nov. 13, 1956, were not available for the location of mining claims, and claims thereafter located are null and void ab initio.

"Contest." A decision declaring claims located on withdrawn lands to be null and void ab initio is not a "contest" and regulations under 43 CFR 4.451 et seq., relating to mining contests, have no application.

Delmer McLean et al., 40 IBLA 34 (Mar. 15, 1979)

Sec. 314 of the Federal Land Policy and Management Act of 1976 was enacted to establish a Federal recording system for mining claims to facilitate Federal land use planning and management. Failure to comply with the mandatory filing requirements constitutes abandonment of the claim and the land reverts to the status of public domain.

In the absence of a specific regulation or policy directive specifying the type of proof necessary for recordation, the Bureau of Land Management should literally consider attempts by a mining claimant under sec. 314 of the Federal Land and Policy Management Act to record notice of a mining claim where proof of recording cannot be made and 30 U.S.C. § 38 (1976) is relied upon for holding the claim, and before rejecting a filing for such a claim, BLM should request further evidence from the claimant which it would consider satisfactory. Such evidence should include at a minimum the name the claim is and has been known by, the name and address of the claimant, an adequate description of the claim, the type of claim, the time of holding and working the claim to meet a State's statute of limitations and, if possible, the date of the origin of claimant's title and facts as to continuation of possession of the claim, and any other information available showing a chain of title to the claimant and bearing upon the possession and occupancy of the claim for mining purposes, and other information which the Bureau of Land Management deems essential to meet the purposes of the recordation provision.

Philip Sayer, 42 IBLA 296 (Aug. 27, 1979)

Pursuant to 43 U.S.C. § 1712(e)(3) (1976), a wholly owned Government corporation may acquire and hold rights as a citizen under the Mining Law of 1872.

John B. Meadows, 43 IBLA 35 (Sept. 12, 1979)

It is a cardinal principle of mining law that mineralization that only warrants further prospecting or exploration in an effort to ascertain whether sufficient mineral might be found to justify mining development does not constitute a valuable mineral deposit.

United States v. Edward T. McHenry et al., 43 IBLA 122 (Sept. 26, 1979)

For the purpose of Departmental adjudication, an amended location is one made in furtherance of an earlier valid location, while a relocation is one which is adverse to the prior location.

An amended location notice generally relates back, where no adverse rights have intervened, to the date of the original location. To the extent, however, that an amended location merely furthers rights acquired by a valid subsisting location and does not embrace additional or new land, withdrawal of land subject to existing rights will not prevent the amended location from relating back to the original location.

Since an amended notice merges with the original notice, the filing of the amended notice, for purposes of recordation under either sec. 8 of the Mining in the Parks Act, 90 Stat. 1342, 1343, 16 U.S.C. § 1907 (1976), or sec. 314 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2744, 2769, 43 U.S.C. § 1744 (1976), together with such other information required by the applicable regulations, constitutes compliance with the recording requirements of those Acts.

Except for claims held under 30 U.S.C. § 38 (1976), a failure to record a mining claim as required by State law, coupled with a withdrawal of the land prior to any curative action, invalidates the claim, and thus precludes subsequent amendment of the claim.

An oral transfer of a mining claim, though contrary to the statute of frauds, will not serve to invalidate the claim, and a person subsequently seeking to record the claim will be afforded the opportunity to prove that the transfer actually occurred.

Where there are factual questions relating to whether action taken subsequent to a withdrawal is in the nature of an amendment or whether it constitutes a relocation, the mineral claimant will be granted the opportunity to show that the subsequent action was a permissible amendment.

R. Gail Tibbetts et al., 43 IBLA 210 (Oct. 5, 1979)
86 I.D. 538

The Department of the Interior has the right to contest the validity of an unpatented mining claim at any time until patent issues.

United States v. J. D. Wilson, 44 IBLA 1 (Nov. 6, 1979)

An amended location notice generally relates back to the date of the original location notice, that is, to the extent that an amended location merely furthers rights acquired by a prior subsisting location and does not embrace additional or new land, withdrawal of land subject to existing rights prior to the filing of the amended location and subsequent to the original location will not invalidate the claims.

Where there are factual questions relating to whether refilings subsequent to a withdrawal were in the nature of an "amended locations" or whether they constituted "relocations," the matter must be referred for a hearing to allow the claimant the opportunity to show that subsequent filings have been amended locations, and that it is thus the successor in an unbroken chain of title dating back to the original location.

American Resources, Ltd., 44 IBLA 220 (Dec. 11, 1979)

ABANDONMENT

Under Arizona law a failure to perform the tasks enunciated in 27 ARS 203 within the specified time will be deemed to be an abandonment of a mining claim.

H. E. Webb, 34 IBLA 362 (May 1, 1978)

The owner of an unpatented mining claim located after Oct. 21, 1976, but in the calendar year 1976, must file an affidavit of assessment work or a notice of intention to hold the mining claim prior to Dec. 31 of the following calendar year, 1977, or the claim will be conclusively deemed to have been abandoned.

Paul S. Coupey, 35 IBLA 112 (May 15, 1978)

Ronald L. Nordwick, 36 IBLA 238 (Aug. 14, 1978)

W. A. Starr and Ida Elsie Potiller, 38 IBLA 74 (Nov. 9, 1978)

Under 43 CFR 3833.2-1(b), the owner of an unpatented mining claim located after Oct. 21, 1976, but in the calendar year 1976, must file an affidavit of assessment work or a notice of intention to hold the mining claim prior to Dec. 31 of the following calendar year, 1977, or the claim will be conclusively deemed to have been abandoned, under 43 CFR 3833.4(a).

John R. Carruthers, 38 IBLA 77 (Nov. 9, 1978)

Under 43 CFR 3833.2-1(b), the owner of unpatented mining claims located after Oct. 21, 1976, in the calendar year 1977, must file affidavits of assessment work or notices of intention to hold the mining claims prior to Dec. 31 of the following calendar year, 1978, or the claims will be conclusively deemed to have been abandoned under 43 CFR 3833.4(a).

Blackburn Enterprises, 41 IBLA 115 (June 11, 1979)

Where the owner of an unpatented mining claim located prior to Oct. 21, 1976, fails to file an affidavit of assessment work or notice of intention to hold the claim on or before Dec. 31 of the calendar year following the calendar year in which he recorded the claim in the BLM office, his claim is properly deemed conclusively to have been abandoned.

Charles and Pete Caress, 41 IBLA 302 (June 29, 1979)

MINING CLAIMS--Continued

ABANDONMENT--Continued

Under the Federal Land Policy and Management Act of 1976, sec. 314, 43 U.S.C. § 1744 (1976), the owner of an unpatented mining claim located on Oct. 10, 1977, must file an affidavit of assessment work or a notice of intention to hold the mining claim prior to Dec. 31 of the following calendar year, 1978, or the claim will be conclusively deemed to have been abandoned.

Bruce Parke, 42 IBLA 18 (July 25, 1979)

The owner of an unpatented mining claim relocated before Oct. 21, 1976, has until Oct. 21, 1979, in which to record his notice of location with BLM. However, if he elects to record in 1977, he must file an affidavit of assessment work or a notice of intention to hold the mining claim prior to Dec. 31 of the following year, 1978, and each year thereafter, or the claim will be conclusively deemed to have been abandoned.

William L. Rucinski, 42 IBLA 56 (Aug. 1, 1979)

Under 43 CFR 3833.2-1(a), the owner of unpatented mining claims located before Oct. 21, 1976, in the calendar year 1978, and recorded with the Bureau of Land Management (BLM) in 1977, must file affidavits of assessment work or notices of intention to hold the mining claims prior to Dec. 31 of each calendar year after recording, or the claims will be conclusively deemed to have been abandoned under 43 CFR 3833.4(a).

Clair B. Caldwell et al., 42 IBLA 139 (Aug. 16, 1979)

Under 43 CFR 3833.2-1, the owner of two unpatented mining claims, one located Sept. 16, 1976, and recorded with BLM May 3, 1977, and one located Feb. 1, 1977, and recorded with BLM Feb. 17, 1977, must have filed affidavits of assessment work or notices of intention to hold the mining claims for both claims prior to Dec. 31 of the calendar year, 1978, to prevent the claims from being conclusively deemed to have been abandoned under 43 CFR 3833.4(a).

Where, on appeal, a mining claimant alleges that he timely mailed the affidavits of assessment work to the proper BLM office but there is no evidence to indicate they were ever received, the claimant must bear the consequences of the loss and his inability to prove his allegation that they may have been received by the Bureau and subsequently lost.

Amanda Mining & Manufacturing Ass'n., 42 IBLA 144 (Aug. 16, 1979)

Under the Federal Land Policy and Management Act of 1976, § 314, 43 U.S.C. § 1744 (1976), the owner of unpatented mining claims located in 1977 must file an affidavit of assessment work or a notice of intention to hold the claim prior to Dec. 31 of the following calendar year, 1978, or the claim will be conclusively deemed to have been abandoned. Where an appellant asserts on appeal that he timely mailed proof of labor to the Bureau of Land Management, but the documents were not received by that office, the documents cannot be considered as filed with that office unless and until they are received by it.

John Newkirk et al., 42 IBLA 292 (Aug. 27, 1979)

James E. Yates, 42 IBLA 391 (Sept. 11, 1979)

MINING CLAIMS--Continued

ABANDONMENT--Continued

Sec. 314 of the Federal Land Policy and Management Act of 1976 was enacted to establish a Federal recording system for mining claims to facilitate Federal land use planning and management. Failure to comply with the mandatory filing requirements constitutes abandonment of the claim and the land reverts to the status of public domain.

Philip Sayer, 42 IBLA 296 (Aug. 27, 1979)

Where the owner of an unpatented mining claim located prior to Oct. 21, 1976, fails to file an affidavit of assessment work or notice of intention to hold the claim on or before Dec. 31 of the calendar year following the calendar year in which he recorded the claim in the BLM office, his claim is properly deemed conclusively to have been abandoned and to be null and void.

A State law which requires filing of proof of assessment work which requirement is more liberal than the recordation requirement of the Federal Land Policy and Management Act of 1976, § 314a, 43 U.S.C. § 1744 (1976), cannot override the more onerous requirements of the latter, since Article VI, Clause 2 of the Federal Constitution makes the Constitution, and laws and treaties made in conformity therewith, the supreme law of the land.

James V. Joyce, 42 IBLA 383 (Sept. 11, 1979)

Under the Federal Land Policy and Management Act of 1976, sec. 314, 43 U.S.C. § 1744 (1976), the owner of unpatented mining claims located in 1977 must file affidavits of assessment work or notices of intention to hold the claims prior to Dec. 31 of the following calendar year, 1978, or the claims will be conclusively deemed to have been abandoned, and may properly be declared void.

Ernest K. Lehmann and Associates, 43 IBLA 1 (Sept. 11, 1979)

Under 43 U.S.C. § 1744(a) (1976), the owner of an unpatented mining claim located after Oct. 21, 1976, but in the calendar year 1976, must file an affidavit of assessment work or a notice of intention to hold the mining claim prior to Dec. 31 of the following calendar year, 1977, or the claim will be conclusively deemed to have been abandoned. Sec. 1744(a) does not conflict with 30 U.S.C. § 28 (1976) which pertains to the year in which the first affidavit of assessment work must be recorded.

Charlie Carnal, Walter Beck, and Edward Borzanski, 43 IBLA 10 (Sept. 11, 1979)

Under 43 CFR 3833.2-1 the owner of unpatented mining claims located after Oct. 21, 1976, and recorded with the Bureau of Land Management in Nov. 1977, must have filed affidavits of assessment work or notices of intention to hold the mining claims prior to Dec. 31, 1978, to prevent the claims from being conclusively deemed to have been abandoned under 43 CFR 3833.4(a).

Where, on appeal, a mining claimant alleges that he timely mailed the affidavits of assessment work to the proper BLM office but there is no evidence to indicate they were ever received, the claimant must bear the consequences of the loss and his inability to prove his allegation that they may have been received by the Bureau and subsequently lost.

Roger Kuhn, 43 IBLA 182 (Sept. 28, 1979)

MINING CLAIMS--Continued

ABANDONMENT--Continued

Under 43 CFR 3833.2-1(c), the owner of unpatented mining claims located after Oct. 21, 1976, in the calendar year 1977, must file affidavits of assessment work or notices of intention to hold the miing claims on or before Dec. 30 of the following calendar year, 1978, or the claims will be conclusively deemed to have been abandoned under 43 CFR 3833.4(a).

Where a claimant is not required to do any assessment work under the general mining laws, but is nevertheless required to file under 43 CFR 3833.1-2(c), he must file a notice of intention to hold the claims in lieu of an affidavit of assessment work performed.

Silvertip Exploration & Mining, 43 IBLA 250 (Oct. 10, (1979)

Under 43 U.S.C. § 1744 (1976), and 43 CFR 3833.2-1(a), the owners of unpatented mining claims located before Oct. 21, 1976, and recorded with BLM in 1977, must file affidavits of assessment work or notices of intention to hold the mining claims prior to Dec. 31 of each calendar year following the calendar year of recording, or the claims will be conclusively deemed to have been abandoned under 43 U.S.C. § 1744(c) (1976), and 43 CFR 3833.4. Mining claimants are not relieved of the requirement to timely file their documents when they mistakenly mailed them to the wrong city, as the documents cannot be considered as filed until they are received by the proper office of the Bureau of Land Management.

Dennis J. Mertz and Sandy Mack, 43 IBLA 302 (Oct. 17, 1979)

The owner of an unpatented mining claim located after Oct. 21, 1976, must file an affidavit of assessment work or a notice of intention to hold the mining claim prior to Dec. 31 of the calendar year following the year in which the claim was located or the claim will be conclusively deemed to have been abandoned.

Lester L. Rhoads, 43 IBLA 380 (Oct. 31, 1979)

Unpatented mining claims are properly deemed to have been abandoned and declared void where a claimant fails to comply with the requirements of the recording law by showing that a copy of the claimant's notice of intention to hold the claim (where an affidavit of assessment work is not filed), was filed in the local jurisdiction's office where notices of the location of the claims are recorded.

R. B. Wadleigh, 44 IBLA 11 (Nov. 6, 1979)

Decisions by BLM declaring mining claims abandoned and void for failure to file timely annual notices of intention to hold the claims or affidavits of assessment work will be vacated, notwithstanding the fact that BLM's records contain no such documents marked as timely filed, where the claimant is able to show that he mailed such documents to BLM and that it received them timely, and where it does not appear unlikely that BLM misplaced the documents or misconstrued their contents, owing to the absence of a numbering system and the similarity of the names of the claims to others.

Under 43 CFR 3833.2-1(a) and 3833.4(a), the owner of an unpatented mining claim located before Oct. 21, 1976, notice of which is recorded with BLM in the calendar year 1977, must file an affidavit of assessment work or a notice of intention to hold the claim on or before Dec. 30 of the following calendar year, 1978, or the

claim will be conclusively deemed to have been abandoned.

E. Joe Swisher, 44 IBLA 44 (Nov. 19, 1979)

A copy of a recorded instrument which includes all of the information required by statute and regulation for the Federal recordation of mining claims and which is timely filed in the proper BLM office will be deemed sufficient to avert the conclusive presumption that the claims are abandoned and void, notwithstanding that the instrument is styled "Affidavit of Discovery," rather than "Notice" or "Certificate" of location.

William E. Moore, 44 IBLA 93 (Nov. 20, 1979)

The owner of an unpatented mining claim located after Oct. 21, 1976, must file with the appropriate office of the Bureau of Land Management an affidavit of assessment work or a notice of intention to hold the mining claim prior to Dec. 31 of the following calendar year or the claim will be conclusively deemed to have been abandoned.

William A. Perry, 44 IBLA 162 (Nov. 30, 1979)

ASSAYS

The rule of evidence excluding hearsay is not strictly adhered to in administrative proceedings, particularly where the evidence, such as assay reports with a proper foundation concerning the sampling, submission of the samples for assaying, and the reputation of the assayer, is competent and relevant. After such reports are admitted, the factfinder may give them appropriate weight according to the circumstances surrounding the specific report.

United States v. Robert A. Bukke (Registered Agent), Valumines, Inc., et al., 32 IBLA 155 (Sept. 12, 1977)

The rule of evidence excluding hearsay is not strictly adhered to in administrative proceedings, particularly where the evidence, such as assay reports with a proper foundation concerning the sampling, submission of the samples for assaying, and the reputation of the assayer, is competent and relevant. After such reports are admitted, the factfinder may give the appropriate weight according to the circumstances surrounding the specific report. However, it is not improper to exclude an assay report where neither the assayer nor the sample-taker testifies concerning its origins, and no other foundation is laid for its introduction.

United States v. John E. Fort et al., 43 IBLA 363 (Oct. 29, 1979)

ASSESSMENT WORK

An appeal from a decision denying a petition for deferment of annual assessment work on mining claims will be dismissed where the petitioner files evidence with its appeal showing that the assessment work was subsequently performed.

Hibernia Silver Mines, Inc., 20 IBLA 12 (Apr. 14, 1975)

MINING CLAIMS--Continued

ASSESSMENT WORK--Continued

A petition for deferment of assessment work may only be granted pursuant to 43 CFR 3852.1, where "legal impediments" exist which affect the right of a mining claimant to enter upon the surface of a claim or group of claims. That there has been no administrative determination of the validity of the claims, possible trespass actions are threatened, and there is a Federal court suit pending concerning the claims, do not constitute "legal impediments" within the ambit of the Act of June 21, 1949, 30 U.S.C. § 28b-e (1970), and a petition for deferment of assessment work will be denied.

Portland General Electric Co., L. C. Cortright, 29 IBLA 165 (Mar. 9, 1977)

A petition for deferment of annual assessment work will not be granted where a claimant alleges only that the claims in question are the subject of litigation and that it would be unwise to engage in any development until a resolution of that litigation is reached.

Charlestone Stone Products, Inc., 32 IBLA 22 (Aug. 30, 1977)

Since a "legal impediment" which would justify the granting of a deferment to perform annual assessment work is only one which interdicts the mining claimant from access to the claim, the fact that the mining claimant is involved in a pending proceeding seeking an arrangement under Chapter XI of the Bankruptcy Act does not constitute such an impediment. While this circumstance may prevent the claimant from expending his assets to perform assessment work, it does not restrict his access to the claim.

Oliver Reese, 34 IBLA 103 (Feb. 27, 1978)

In order for a mining claimant to maintain a possessory right in a claim under Arizona law, the locator must file within 90 days a copy of the location notice in the county in which the claim is located.

The United States and a city which has filed an application to purchase land pursuant to the Recreation and Public Purposes Act are adverse claimants who may take advantage of the failure of a mining claimant to perform annual assessment.

H. B. Webb, 34 IBLA 362 (May 1, 1978)

The owner of an unpatented mining claim located after Oct. 21, 1976, but in the calendar year 1976, must file an affidavit of assessment work or a notice of intention to hold the mining claim prior to Dec. 31 of the following calendar year, 1977, or the claim will be conclusively deemed to have been abandoned.

For the purposes of filing affidavits of assessment work or notices of intention to hold a mining claim, the date of location is the date as defined in the pertinent regulation, 43 CFR 3833.0-5(h), not the date on which the owner completes the last step in locating and recording a mining claim as required by State law.

A notice of location or certificate of location of a mining claim is a separate and distinct document from an affidavit of assessment work or a notice of intention to hold a mining claim and the filing of the one does not satisfy the requirement that the other be filed.

The holding of a mining claim and the diligent pursuance of mining activities on it does not relieve its owner of the obligation imposed by statute to file an affidavit of assessment work or a notice of intention to hold a mining claim.

Paul S. Coupey, 35 IBLA 112 (May 15, 1978)

In order for a mining claimant to qualify for deferment of his annual assessment work under 30 U.S.C. § 28b (1970), his access to his mining claims must be interdicted. The mere fact the mining claims are involved in litigation over possessory rights does not justify granting a deferment of annual assessment work.

John W. MacGuire, 35 IBLA 117 (May 15, 1978)

A "legal impediment" which would justify the granting of a deferment to perform annual assessment work is only one which interdicts the mining claimant from access to the claim. Where there is no indication in the record that the claimant prior to the decision appealed from has attempted to make satisfactory arrangements with the surface owners covering possible surface damage or has negotiated with such owners concerning his access, his access has not been interdicted and the petition for deferment was properly denied.

A. J. Maurer, Jr., 36 IBLA 4 (June 27, 1978)

Although pending litigation with respect to ownership of mining claims does not in itself establish grounds for deferment of assessment work thereon, a court injunction against entry upon the claims by the locator constitutes a "legal impediment" to entry which will support a deferment.

Continental Oil Co., 36 IBLA 65 (June 30, 1978)

The owner of an unpatented mining claim located after Oct. 21, 1976, but in the calendar year 1976, must file an affidavit of assessment work or a notice of intention to hold the mining claim prior to Dec. 31 of the following calendar year, 1977, or the claim will be conclusively deemed to have been abandoned.

For the purposes of filing affidavits of assessment work or notices of intention to hold a mining claim, the date of location is the date as defined in the pertinent regulation, 43 CFR 3833.0-5(h).

A notice of location or certificate of location of a mining claim is a separate and distinct document from an affidavit of assessment work or a notice of intention to hold a mining claim and the filing of the one does not satisfy the requirement that the other be filed.

Ronald L. Nordwick, 36 IBLA 238 (Aug. 14, 1978)

The owner of an unpatented mining claim located after Oct. 21, 1976, but in the calendar year 1976, must file an affidavit of assessment work or a notice of intention to hold the mining claim prior to Dec. 31 of the following calendar year, 1977, or the claim will be conclusively deemed to have been abandoned.

W. A. Starr and Ida Elsie Rotiller, 38 IBLA 74 (Nov. 9, 1978)

MINING CLAIMS--Continued

ASSESSMENT WORK--Continued

Under 43 CFR 3833.2-1(b), the owner of an unpatented mining claim located after Oct. 21, 1976, but in the calendar year 1976, must file an affidavit of assessment work or a notice of intention to hold the mining claim prior to Dec. 31 of the following calendar year, 1977, or the claim will be conclusively deemed to have been abandoned, under 43 CFR 3833.4(a).

John R. Carruthers, 38 IBLA 77 (Nov. 9, 1978)

Under sec. 2 of the Act of June 21, 1949, 30 U.S.C. § 28c (1976), deferment of annual assessment work for mining claims may only be granted for 2 years, and a petition for deferment beyond the authorized 2-year period is properly denied.

The Dredge Corp., 38 IBLA 178 (Dec. 6, 1978)

John S. Herr, 40 IBLA 158 (Mar. 30, 1979)

A petition for deferment of assessment work may only be granted pursuant to 43 CFR 3852.1, where "legal impediments" exist which affect the right of a mining claimant to enter upon the surface of a claim or group of claims. Pending litigation, which does not, in and of itself, preclude access to the mining claims does not constitute "legal impediments" within the ambit of the Act of June 21, 1949, 30 U.S.C. § 28b (1976), and a petition for deferment of assessment work will be denied.

A mining claimant petitioning for temporary deferment of annual assessment work is required by 43 CFR 3852.2(a) to file the petition in duplicate, and to attach a copy of notice to the public to one copy of the petition. The copy of the public notice must show on its face that it has been duly filed or recorded. Failure to meet this requirement will cause the petition to be denied.

Don Hesselgesser, 39 IBLA 75 (Jan. 24, 1979)

Under the Federal Land Policy and Management Act of 1976, 43 U.S.C. § 1744(a)(2) (1976), if an unpatented mining claim located after Oct. 21, 1976, is not supported annually by either an affidavit of assessment work or notice of intention to hold, the claim will be conclusively deemed abandoned and void, despite appellant's statement there was no intent to abandon and that failure to file was an oversight.

Nuclear Power and Energy Co. and E-2, Inc., 41 IBLA 142 (June 14, 1979)

Where the owner of an unpatented mining claim located prior to Oct. 21, 1976, fails to file an affidavit of assessment work or notice of intention to hold the claim on or before Dec. 31 of the calendar year following the calendar year in which he recorded the claim in the BLM office, his claim is properly deemed conclusively to have been abandoned.

Charles and Pete Caress, 41 IBLA 302 (June 29, 1979)

A provision of State law, relating to assessment work on mining claims, which is more liberal than the requirements of Federal law, cannot override such Federal law. Article IV, § 3, cl. 2, of the Federal Constitution

MINING CLAIMS--Continued

ASSESSMENT WORK--Continued

vests in the Congress authority to promulgate appropriate laws governing the public lands and other property of the United States.

Under the Federal Land Policy and Management Act of 1976, sec. 314, 43 U.S.C. § 1744 (1976), the owner of an unpatented mining claim located on Oct. 10, 1977, must file an affidavit of assessment work or a notice of intention to hold the mining claim prior to Dec. 31 of the following calendar year, 1978, or the claim will be conclusively deemed to have been abandoned.

Bruce Parks, 42 IBLA 18 (July 25, 1979)

Under the Federal Land Policy and Management Act of 1976, § 314, 43 U.S.C. § 1744 (1976), the owner of unpatented mining claims located in 1977 must file an affidavit of assessment work or a notice of intention to hold the claim prior to Dec. 31 of the following calendar year, 1978, or the claim will be conclusively deemed to have been abandoned. Where an appellant asserts on appeal that he timely mailed proof of labor to the Bureau of Land Management, but the documents were not received by that office, the documents cannot be considered as filed with that office unless and until they are received by it.

John Newkirk et al., 42 IBLA 292 (Aug. 27, 1979)

James E. Yates, 42 IBLA 391 (Sept. 11, 1979)

Where the owner of an unpatented mining claim located prior to Oct. 21, 1976, fails to file an affidavit of assessment work or notice of intention to hold the claim on or before Dec. 31 of the calendar year following the calendar year in which he recorded the claim in the BLM office, his claim is properly deemed conclusively to have been abandoned and to be null and void.

A State law which requires filing of proof of assessment work which requirement is more liberal than the recordation requirement of the Federal Land Policy and Management Act of 1976, § 314a, 43 U.S.C. § 1744 (1976), cannot override the more onerous requirements of the latter, since Article VI, Clause 2 of the Federal Constitution makes the Constitution, and laws and treaties made in conformity therewith, the supreme law of the land.

James V. Joyce, 42 IBLA 383 (Sept. 11, 1979)

Under the Federal Land Policy and Management Act of 1976, sec. 314, 43 U.S.C. § 1744 (1976), the owner of unpatented mining claims located in 1977 must file affidavits of assessment work or notices of intention to hold the claims prior to Dec. 31 of the following calendar year, 1978, or the claims will be conclusively deemed to have been abandoned, and may properly be declared void.

Ernest K. Lehmann and Associates, 43 IBLA 1 (Sept. 11, 1979)

For the purposes of filing affidavits of assessment work or notices of intention to hold a mining claim, the date of location of the claim is the date as defined in 43 CFR 3833.0-5(h).

Under 43 U.S.C. § 1744(a) (1976), the owner of an unpatented mining claim located after Oct. 21, 1976, but in the calendar year 1976, must file an affidavit of assessment work or a notice of intention to hold the mining claim prior to Dec. 31 of the following calendar year, 1977, or the claim will be conclusively deemed to have been abandoned. Sec. 1744(a) does not conflict

MINING CLAIMS--Continued

ASSESSMENT WORK--Continued

with 30 U.S.C. § 28 (1976) which pertains to the year in which the first affidavit of assessment work must be recorded.

Charlie Carnal, Walter Peck, and Edward Borzansky, 43 IBLA 10 (Sept. 11, 1979)

The owner of an unpatented mining claim located after Oct. 21, 1976, must file an affidavit of assessment work or a notice of intention to hold the mining claim prior to Dec. 31 of the calendar year following the year in which the claim was located or the claim will be conclusively deemed to have been abandoned.

Lester L. Rhoads, 43 IBLA 380 (Oct. 31, 1979)

The owner of an unpatented mining claim located after Oct. 21, 1976, must file with the appropriate office of the Bureau of Land Management an affidavit of assessment work or a notice of intention to hold the mining claim prior to Dec. 31 of the following calendar year or the claim will be conclusively deemed to have been abandoned.

William A. Berry, 44 IBLA 162 (Nov. 30, 1979)

Where the National Park Service bars a claimant from entering mining claims by posting no-trespassing signs, barricading access roads, and threatening criminal action, the claimant is entitled to a deferment of its obligation to perform annual assessment work on the claims during the period access was denied.

American Resources, Ltd., 44 IBLA 220 (Dec. 11, 1979)

Where the owner of an unpatented mining claim located prior to Oct. 21, 1976, fails to file an affidavit of assessment work or notice of intention to hold the claim on or before the last day of the calendar year following the year the claim was recorded with BLM, the claim is properly deemed void.

Valda Waters, 44 IBLA 272 (Dec. 26, 1979)

COMMON IMPROVEMENT

Where in a patent application for a group of claims, pro rata credit for the value of a common, offsite improvement is to be attributed to each claim, it must be shown that the improvement was subsequent to the location of each claim so credited, and that the improvement is essential to the practical development and actually facilitates the extraction of ore from each claim.

Brattain Contractors, Inc., 37 IBLA 233 (Oct. 18, 1978)

COMMON VARIETIES OF MINERALS

Generally

The Surface Resources Act of July 23, 1955, declared that common varieties of sand and gravel are not valuable mineral deposits under the mining laws. In order for a claim for such material to be sustained as validated by a discovery, the prudent man/marketability test of discovery of a valuable mineral deposit must have been met at the date of the Act, and reasonably continuously thereafter.

In determining the marketability of a common variety of sand and gravel from a mining claim, the possibility that the material could be sold for purposes for which ordinary earth may be used may not be considered, as such purposes are not validating uses cognizable under the mining laws.

A mining claim located for a common variety of gravel prior to the Surface Resources Act of July 23, 1955, cannot be sustained as being held as a reserve for the gravel deposit where the claimants had not established a discovery under the marketability test at that time. The "reserve rule" is not a substitute for discovery. A mining claimant's desire to hold a claim in hope that there will be an increase in the market demand and price does not satisfy the marketability test.

United States v. Clarion B. Taylor, Sr., and Gerald O'Connor, 19 IBLA 9 (Feb. 20, 1975) 82 I.D. 68

In order to prove that rhyolite used for building stone purposes is not a common variety of stone under sec. 3 of the Act of July 23, 1955, a mining claimant must demonstrate that: (1) the mineral deposit has a unique property; and (2) the unique property gives the deposit a distinct and special value. Possession of a unique property alone is not sufficient. The unique property must give the deposit a value for a purpose to which other materials are not suited or if the deposit is to be used for the same purposes as other minerals of common occurrence, it must possess some inherent property which gives it a special value for such use which value is generally reflected by the fact that the deposit commands a higher price in the marketplace or produces a substantially higher profit.

Common varieties of a particular mineral material do not have to be physically alike or equally desirable for a given purpose. When the evidence shows that other deposits occur commonly in the area and are similarly used, the fact that the subject deposit has qualities which are particularly well suited to that purpose does not, of itself, alter its essential character as a common variety material.

A deposit of rhyolite cannot be determined to be an uncommon variety of mineral solely on the basis of its location, even though the location gives the deposit a competitive advantage due to proximity to market, as location is not a unique property inherent in the deposit but is only an extrinsic factor.

United States v. Gerald E. Reden et al., 19 IBLA 326 (Apr. 7, 1975)

Where claims were located for common varieties of sand and gravel as well as other minerals prior to July 23, 1955, it must be shown that because of proximity to market, bona fides in development, the existence of present demand, and other relevant factors, the sand and gravel together with the other minerals could have been sold at that time for a reasonable profit. In the absence of such a showing, the value of the sand and gravel may not now be considered in determining whether a discovery of a valuable mineral deposit has been made, as the value of a nonlocatable deposit may not be added to that of a locatable deposit to establish a discovery.

A lack of sales of a mineral of widespread occurrence, such as sand and gravel, may raise a presumption that there was no demand for the mineral during that time, and, hence, the material was not marketable. The presumption may be overcome with credible evidence to the contrary or by bona fides in development.

United States v. C. V. Hallenbeck et al., 21 IBLA 296 (Aug. 11, 1975)

Where the Government has presented a prima facie case that a claimed mineral is a common variety pumice and further that the pumice was not marketable at a profit as of July 23, 1955, the burden of showing by a preponderance of the evidence either that the mineral is an uncommon variety or that it was marketable as of July 23, 1955, devolves upon the mineral claimants.

A deposit of pumice is not an uncommon variety of pumice merely because it can presently be mined, removed, and marketed at a profit. Rather, a mining claimant who asserts discovery of pumice must show that the deposit has a distinct and special value over other marketable deposits of pumice.

United States v. C. Fred Underwood et al., 22 IBLA 62 (Sept. 18, 1975)

The Act of July 23, 1955, 30 U.S.C. § 611 (1970), removed common varieties of cinder from location under the mining laws; thus, it is incumbent upon one who located a claim prior to that date for a common variety of cinder to show that all the requirements for a discovery, including a showing that the materials could have been extracted, removed, and marketed at a profit, had been met by that date.

United States v. Melton E. Baker, 23 IBLA 319 (Jan. 19, 1976)

The Act of July 23, 1955, excluded from mining location only common varieties of the materials enumerated in the Act, *i.e.*, "sand, stone, gravel, pumice, pumicite, or cinders"; therefore, a material must fall within one of those categories before the issue of whether it is a common variety becomes pertinent.

Where a stone containing feldspar is simply ground into rock form and used for landscaping and building stone purposes for which the feldspar element has no significance with respect to the stone's final use, the issue may properly arise as to whether the particular stone is a common variety which is excluded from mining location by the Act of July 23, 1955.

United States v. Robert W. Peal, 23 IBLA 378 (Feb. 6, 1976)

A deposit of rhyolite and dacite stone, used in the manufacture of asphaltic concrete and as sealcoating on asphalt pavement, which occurs in a naturally crushed state, which has been roughly stratified and naturally sorted by the forces of nature to an extent that is not found on any other material source in the area, which has little or no overburden, and which affords specification material at a cost significantly below that incurred for the production of any other aggregate from sources in the same market area, has special and distinct physical properties which give it distinct special economic value, and therefore it is locatable as an uncommon variety under the general mining law, and

its appropriation is not barred by 30 U.S.C. § 611 (1970).

United States v. Melvin McCormick, 27 IBLA 65 (Sept. 29, 1976)

In a contest of a mining claim located for common variety mineral materials prior to July 23, 1955, after which such locations were proscribed by law, where there has been no mining and no sales, the test of the validity of the claim is whether the claimant(s) could have mined and marketed the material profitably prior to that date and thereafter. The evidence tending to so show must relate to what a prudent man would have been reasonably justified in doing based upon the actual known circumstances at the time, not upon what he might have done if the proper conditions had then prevailed.

United States v. J. B. Osborne et al. (Supp. on Judicial Remand), 28 IBLA 13 (Nov. 8, 1976)

In order to establish that a type of stone material is not a common variety under the Act of July 23, 1955, a mining claimant must demonstrate that: (1) the mineral deposit has a unique property, and (2) the unique property gives the deposit a distinct and special value. Where evidence establishes that geodes in a particular deposit have unique properties distinguishable from other types of stones which give the deposit of geodes a distinct and special value, the fact that the geodes may be similar to geodes from other areas which have similar properties and values is not sufficient evidence to establish that the deposit of geodes is a common variety of stone within the meaning of the Act of July 23, 1955.

United States v. Glenn C. Bolinder and L. C. Turner, et al., 28 IBLA 187 (Dec. 6, 1976)

83 I.D. 609

With respect to materials as common as sand and gravel, a mining claimant must show that by reason of accessibility, bona fides in development, proximity to market, existence of present demand, and other factors, the deposit is of such value that it can be mined, removed and disposed of at a profit, and since common varieties were declared no longer locatable by the Act of July 23, 1955, 30 U.S.C. § 611 (1970), that a reasonably continuous market has existed from enactment of the statute.

United States v. Lloyd O'Callaghan, Sr., et al., 29 IBLA 333 (Mar. 31, 1977)

Mining claims located for deposits of common varieties of building stone, sand and gravel, if located prior to the Act of July 23, 1955, must be held to be invalid where it is not shown that these materials could have been profitably marketed prior to that date.

United States v. Frank and Wanita Melluzzo (Supp. on Judicial Remand), 32 IBLA 46 (Sept. 2, 1977)

Without evidence that obsidian similar to that found in great abundance elsewhere has a property giving it a special and distinct value, it is a common variety no longer locatable under the mining laws. The fact that obsidian may be tumbled and polished for rock

MINING CLAIMS--Continued

COMMON VARIETIES OF MINERALS--Continued

Generally--Continued

bound purposes is not sufficient to meet the test of "uncommonness."

United States v. Margaret Mansfield, 35 IBLA 95 (May 15, 1978)

Whether a deposit of clay is a common variety and no longer locatable under the mining laws since the Act of July 23, 1955, or is still locatable depends on whether it has a unique property giving it a special and distinct value.

United States v. Schneider Minerals, Inc., and Agua Pura, Inc., 36 IBLA 194 (Aug. 3, 1978)

United States v. Jon Zimmers and Claire Kelly, 44 IBLA 142 (Nov. 30, 1979)

Common varieties of a particular mineral material do not have to be physically alike or equally desirable for a given purpose. When the evidence shows that other deposits occur commonly in the area and are similarly used, the fact that the subject deposit has qualities which are particularly well suited to that purpose does not, of itself, alter its essential character as a common variety material.

Where, prior to July 23, 1955, a deposit of the common rock of the country might have been deemed locatable as building stone because it met certain engineering specifications or requirements, if this were unknown at that time, or if its only real value prior to that date was for ordinary fill, riprap, sub-base, ballast or barrow, it cannot be treated as a valuable mineral deposit which would serve to validate a mining claim.

A deposit of what otherwise would be a common variety of mineral material cannot be regarded as uncommon on the basis that the deposit enjoys the simple economic advantage of closer proximity to the market.

United States v. Verdugo & Miller, Inc., 37 IBLA 277 (Oct. 20, 1978)

Where a mining claimant attempts to establish his location of a mining claim containing common variety minerals by invoking the terms of 30 U.S.C. § 38 (1976) and fails to complete the statutory period for holding and working his claim prior to July 23, 1955, BLM may properly hold such claim to be null and void.

Charles House, Mrs. Leonard Skinner, 42 IBLA 368 (Sept. 11, 1979)

Special Value

Building stone which is not suitable for any uses other than those to which ordinary building stone is put, and which does not command a higher market price than other similar building stone, may be considered locatable after July 23, 1955, as an uncommon variety of stone, only if it has a unique property which imparts a special value to the stone reflected in higher price or a substantially greater profit to the locator due to reduced overhead and costs of extraction and processing.

United States v. Ed Brandt, 21 IBLA 166 (July 22, 1975)

MINING CLAIMS--Continued

COMMON VARIETIES OF MINERALS--Continued

Special Value--Continued

In order to prove that stone containing feldspar used for landscaping and building stone purposes is not a common variety of stone under the Act of July 23, 1955, a mining claimant must demonstrate that: (1) the mineral deposit has a unique property, and (2) the unique property gives the deposit a distinct and special value. In the event the mining claimant does not establish that these criteria are met, the administrative law judge may properly hold that the stone cannot be classified as locatable under the mining laws because it is a common variety.

United States v. Robert W. Beal, 23 IBLA 378 (Feb. 4, 1976)

Whether a deposit of building stone is an uncommon variety locatable under the mining laws after sec. 3 of the Surface Resources Act of July 23, 1955, 30 U.S.C. § 611 (1970), depends on whether the deposit has a property giving it a distinct and special value as compared with other deposits of stone used for similar purposes.

In determining whether a deposit of building stone is a common or uncommon variety under sec. 3 of the Surface Resources Act, 30 U.S.C. § 611 (1970), a special and distinct value of a building stone may be reflected by a higher market value in comparison with deposits of common varieties, or by reduced costs or overhead so that the profit would be substantially more while the market price would remain competitive.

United States v. John W. Pope, 25 IBLA 199 (June 16, 1976)

In determining whether a deposit of mineral aggregate is a common variety where it is used for the same purposes for which common, ordinary aggregates are used, the deposit must be shown to have some rare or unique physical property which gives the material a special and distinct value for such use. Special and distinct value may be reflected by a higher market price in comparison with other aggregates or, alternatively, by reduced costs of overhead so that the profit to the producer would be substantially more while the market price remained competitive with material from other sources.

United States v. Melvin McCormick, 27 IBLA 65 (Sept. 29, 1976)

In determining whether a deposit of building stone is a common or uncommon variety under the Surface Resources Act, 30 U.S.C. § 611 (1970), a special and distinct value of a building stone may be reflected by a higher market value in comparison with deposits of common varieties, or by reduced costs or overhead so that the profit would be substantially more while the market price would remain competitive.

United States v. John W. Pope (On Reconsideration), 27 IBLA 133 (Sept. 30, 1976)

A clay's unique properties--superior bonding characteristics, high brilliance and low impurity content--which make it particularly suitable for use in the paper coating and ceramics industries, impart a special and distinct value to the clay through the generation of profits in excess of those which could be realized from a deposit of a common variety of the material.

United States v. Schneider Minerals, Inc., and Agua Pura, Inc., 36 IBLA 194 (Aug. 3, 1978)

MINING CLAIMS--Continued

COMMON VARIETIES OF MINERALS--Continued

Unique Property

Building stone which is not suitable for any uses other than those to which ordinary building stone is put, and which does not command a higher market price than other similar building stone, may be considered locatable after July 23, 1955, as an uncommon variety of stone, only if it has a unique property which imparts a special value to the stone reflected in higher price or a substantially greater profit to the locator due to reduced overhead and costs of extraction and processing.

United States v. Ed Brandt, 21 IBLA 166 (July 22, 1975)

In order to prove that stone containing feldspar used for landscaping and building stone purposes is not a common variety of stone under the Act of July 23, 1955, a mining claimant must demonstrate that: (1) the mineral deposit has a unique property, and (2) the unique property gives the deposit a distinct and special value. In the event the mining claimant does not establish that these criteria are met, the administrative law judge may properly hold that the stone cannot be classified as locatable under the mining laws because it is a common variety.

United States v. Robert W. Beal, 23 IBLA 378 (Feb. 4, 1976)

Whether a deposit of building stone is an uncommon variety locatable under the mining laws after sec. 3 of the Surface Resources Act of July 23, 1955, 30 U.S.C. § 611 (1970), depends on whether the deposit has a property giving it a distinct and special value as compared with other deposits of stone used for similar purposes.

In determining whether a deposit of building stone is a common or uncommon variety under sec. 3 of the Surface Resources Act, 30 U.S.C. § 611 (1970), a special and distinct value of a building stone may be reflected by a higher market value in comparison with deposits of common varieties, or by reduced costs or overhead so that the profit would be substantially more while the market price would remain competitive.

United States v. John W. Pope, 25 IBLA 199 (June 16, 1976)

In determining whether a deposit of building stone is a common or uncommon variety under the Surface Resources Act, 30 U.S.C. § 611 (1970), a special and distinct value of a building stone may be reflected by a higher market value in comparison with deposits of common varieties, or by reduced costs of overhead so that the profit would be substantially more while the market price would remain competitive.

United States v. John W. Pope (On Reconsideration), 27 IBLA 133 (Sept. 30, 1976)

A clay's unique properties--superior bonding characteristics, high brilliance and low impurity content--which make it particularly suitable for use in the paper coating and ceramics industries, impart a special and distinct value to the clay through the generation of profits in excess of those which could be realized from a deposit of a common variety of the material.

United States v. Schneider Minerals, Inc., and Agua Pura, Inc., 36 IBLA 194 (Aug. 3, 1978)

MINING CLAIMS--Continued

CONTESTS

When the Government contests a mining claim it bears only the burden of going forward with sufficient evidence to establish a prima facie case; the burden of going forward then shifts to the claimant to show by a preponderance of the evidence that his claim is valid.

When a Government mineral examiner testifies that he has examined the exposed workings on a claim without finding sufficient mineral values to support the discovery of a valuable mineral deposit, a prima facie case of lack of discovery has been made; the Government's mineral examiner is not obliged to explore beyond the current workings of a mining claimant in attempting to verify a discovery.

United States v. Herbert Clark, 18 IBLA 368 (Jan. 30, 1975)

The ultimate burden of proof to show a discovery of a valuable mineral deposit is always upon the mining claimant. However, if the Government in a mining contest fails to present a prima facie case and the contestees move to dismiss the case and rest, the contest complaint must be dismissed because there would be no evidentiary basis for an order of invalidity.

In determining the validity of a mining claim in a Government contest, the entire evidentiary record must be considered; therefore, if evidence presented by the contestees shows that there has not been a discovery, it may be used in reaching a decision that the claim is invalid because of a lack of discovery, regardless of any defects in the Government's prima facie case.

Where the Government has made a prima facie case of lack of discovery in a mining contest, any issue in doubt as to discovery raised by the evidence must be resolved against the party having the risk of nonpersuasion, the mining claimant. If a mining claimant fails to show by a preponderance of the evidence as to such issue that there has been a discovery of a valuable mineral deposit he has not satisfied his burden of proof and an administrative law judge must declare the claim invalid, rather than leave the question of the claim's validity unresolved.

Where a contestee in a mining contest preponderates sufficiently to overcome the Government's prima facie case on an issue raised by the evidence in a mining contest and there is no evidence on other essential disputed issues, the contest should be dismissed unless a patent application is being contested, in which case a further hearing must be ordered to resolve other essential issues to determine whether the application may be allowed.

United States v. Clarion W. Taylor, Sr., and Gerald O'Connor, 19 IBLA 9 (Feb. 20, 1975) 82 I.D. 68

The fact that much of the evidence that supports a mining claimant's position in a mining claim contest is presented by the Government, rather than the claimant, does not mean that the claimant's burden of proof has not been met, because the entire evidentiary record must be considered in weighing the evidence and not simply the claimant's evidence alone.

Where the preponderance of the evidence in a mining claim contest supports an administrative law judge's dismissal of a contest complaint, that decision will not be disturbed upon appeal.

United States v. Kinsley Ranch Resort, Inc., et al., 20 IBLA 14 (Apr. 16, 1975)

In a mining contest a mining claimant is the true proponent under the Administrative Procedure Act, 5 U.S.C. § 556(d) (1970), of a rule or order that he has complied with the mining laws, and he has the ultimate burden of proof--the risk of nonpersuasion--to show by a preponderance of the evidence that there is a valuable mineral deposit on the claim, when the Government has made a prima facie case of lack of such a discovery.

An administrative law judge has a duty to conduct a hearing in such a manner that all available relevant facts in a mining contest will be adduced. He should take special care to do so where a party is without counsel and there is confusion concerning the status of purported tendered evidence.

United States v. Howard S. McKenzie, 20 IBLA 38 (Apr. 17, 1975)

The doctrine of res judicata will not bar an administrative proceeding to determine the validity of three unpatented mining claims where, in a previous condemnation action for the War Department's taking of a temporary exclusive easement covering the claims, the judgment of the Federal district court was limited solely to the compensation to be paid by the United States, and there was no litigation of the issue of the validity of the claims and no prior adjudication of that issue in the Department of the Interior.

Equitable estoppel will not operate to bar a mining claim contest or alter its result where it is not shown that some officer of the Government, who was authorized to declare the claims valid, falsely misrepresented to, or concealed material facts from the claimants concerning the validity of the claims with the intention that the claimants should act in reliance thereon, with the result that the claimants were thereby induced to do so, to their ultimate damage.

The doctrine of collateral estoppel will not bar the administrative contest of the validity of three mining claims which were the subject of a previous condemnation action for the taking by the Government of a temporary exclusive easement over the claims, where the issue of the validity of the claims was not actually litigated and it was wholly unnecessary for the court to adjudicate that issue in rendering its judgment.

The Department of the Interior has jurisdiction, in proper proceedings, to determine the validity of mining claims on Federal lands.

Where a mining claim occupies land which has subsequently been withdrawn from the operation of the mining law, the validity of the claim must be tested by the value of the mineral deposit as of the date of the withdrawal, as well as the date of determination. If the claim was not supported at the date of the withdrawal by a qualifying discovery of a valuble mineral deposit, the land within its boundaries would not be excepted from the effect of the withdrawal, and the claim could not thereafter become valid even though the value of the deposit thereafter increased due to a change in the market.

United States v. A. B. Fleming et al., 20 IBLA 83 (Apr. 24, 1975)

A mining claim is a claim to property which may not be declared invalid except in accordance with due process of law. Due process consists of proper notice and opportunity for an agency hearing in accordance with the Administrative Procedure Act, and it suffices if the claimant is properly notified and afforded the opportunity to be heard. But there is no requirement that a hearing be held where the contestee fails to avail himself of the opportunity for a hearing within the time provided.

Under the Department of Interior's rules governing contests against mining claims, where an answer to a complaint is not filed within the prescribed time the allegations of the complaint will be taken as admitted by the contestee and the case decided without a hearing by the appropriate officer of the Bureau of Land Management. The Secretary of the Interior is without authority to waive the rules to permit the late filing of the answer.

United States v. James R. and Sammy R. Ragsdale, 20 IBLA 348 (June 11, 1975)

When the Government contests a mining claim on a charge of no discovery it bears the burden of going forward with sufficient evidence to establish a prima facie case; the burden then shifts to the claimant to show by a preponderance of the evidence that a discovery has been made.

Where a Government mineral examiner testifies that he has examined a claim and found the mineral values insufficient to support a finding of discovery, a prima facie case has been established.

United States v. Charles J. MacIver et al., 20 IBLA 352 (June 11, 1975)

In a mining claim contest, the claimant is the proponent of the rule or order that he has complied with the provisions of the mining law, which have been brought into issue, and the Government bears the burden only of presenting a prima facie case of invalidity; the claimant must then preponderate on the issues litigated.

Where the hearing record in a mining claim contest is unsatisfactory, a "stipulation" on another issue may have prevented the introduction of evidence relevant to the issue on appeal, the parties will not be unduly burdened, and further proceedings will likely be productive of relevant evidence, the Board may remand the case for additional hearing.

United States v. Ed Brandt, 21 IBLA 166 (July 22, 1975)

When the Government contests a mining claim on a charge of no discovery, it bears the burden of going forward with sufficient evidence to establish a prima facie case; the burden then shifts to the claimant to show by a preponderance of the evidence that a discovery has been made.

Where a Government mineral examiner testifies that he has examined a claim and found the mineral values insufficient to support a finding of discovery, a prima facie case of invalidity has been established. Government mineral examiners are not required to perform discovery work for claimants or to explore beyond a claimant's workings.

United States v. C. V. Hallenbeck et al., 21 IBLA 296 (Aug. 11, 1975)

United States v. Richard C. Reynders and Carol J. Reynders, 26 IBLA 131 (July 30, 1976)

United States v. James Becker, 33 IBLA 301 (Jan. 10, 1978)

MINING CLAIMS--Continued

CONTESTS--Continued

When the Government contests a mining claim and establishes a prima facie case that contestee has not made a discovery of a locatable mineral deposit, the burden devolves on contestee to establish by a preponderance of the evidence that the claim has been validated by the discovery of a locatable mineral deposit.

United States v. Theresa B. Robinson, 21 IBLA 363 (Aug. 25, 1975) 82 I.D. 414

Where the answer to a mining contest complaint denying the charges is timely filed by one contestee, but is untimely filed by all other contestees, the charges as to those contestees filing untimely answers will be taken as admitted and their interests in the mining claims will be declared null and void. The contestee who filed a timely answer is entitled to a hearing as to the validity of the claims.

United States v. Albert S. Hunter et al., 22 IBLA 28 (Sept. 10, 1975)

Where the Government has presented a prima facie case that a claimed mineral is a common variety pumice and further that the pumice was not marketable at a profit as of July 23, 1955, the burden of showing by a preponderance of the evidence either that the mineral is an uncommon variety or that it was marketable as of July 23, 1955, devolves upon the mineral claimants.

United States v. C. Fred Underwood et al., 22 IBLA 62 (Sept. 18, 1975)

Where a mining claim occupies land which has subsequently been withdrawn from the operation of the mining law, the validity of the claim must be tested by the value of the mineral deposit as of the date of the withdrawal, as well as the date of the hearing. If the claim was not supported at the date of the withdrawal by a qualifying discovery of a valuable mineral deposit, the land within its boundaries would not be excepted from the effect of the withdrawal, and the claim could not thereafter become valid even though the value of the deposit thereafter increased due to a change in the market.

When the Government contests a mining claim on a charge of lack of discovery of a valuable mineral deposit, it bears the burden of going forward with sufficient evidence to establish a prima facie case; the burden then shifts to the claimant to show by a preponderance of the evidence that a discovery has been made.

Where a Government mineral examiner testifies that he has examined a claim and found the mineral values insufficient to support a finding of discovery, a prima facie case of invalidity has been established. Government mineral examiners are not required to perform discovery work for a claimant or to explore beyond a claimant's workings.

United States v. Ruth Arcand et al., 23 IBLA 226 (Jan. 9, 1976)

The Department of the Interior has the right to contest the validity of an unpatented mining claim at any time until patent issues.

A judgment is not conclusive of a fact erroneously assumed when the fact was not actually litigated and determination thereof was not essential to the decision.

The doctrine of collateral estoppel will not bar the administrative contest of the validity of five mining claims which, together with another claim, were the subject of previous condemnation actions for the taking of a temporary exclusive easement over the claims, where the issue of the validity of the individual claims was not actually litigated and it was wholly unnecessary for the Court to adjudicate that issue in rendering its judgment.

MINING CLAIMS--Continued

CONTESTS--Continued

Equitable estoppel will not operate to bar a mining claim contest or alter its result where it is not shown that some officer of the Government, who was authorized to declare the claims valid, falsely misrepresented to, or concealed material facts from the claimant concerning the validity of the claim with the intention that the claimant should act in reliance thereon, with the result that the claimant was thereby induced to do so, to his ultimate damage.

There can be no waiver of the Secretary's right to contest a mining claim believed to be invalid without a showing of an authority to make such a waiver and an intention to do so.

United States v. Bert L. Johnson, 23 IBLA 349 (Jan. 21, 1976)

When the Government contests a mining claim, it has assumed the burden of presenting a prima facie case that the claim is invalid; when it has done so, the burden then devolves on the mining claimant to prove by a preponderance of the evidence that the claim is valid.

United States v. Robert W. Beal, 23 IBLA 378 (Feb. 4, 1976)

Where a contestee makes a timely response to a Government complaint in a mining contest, which can reasonably be construed as a general denial of the allegations contained in the complaint, the response will be considered a sufficient answer within the contemplation of the regulations. The allegations then cannot be taken as admitted and the mining claim declared null and void without a hearing.

United States v. Cliff Libby, 24 IBLA 39 (Feb. 19, 1976)

The Board of Land Appeals may set aside a previous Departmental decision, which declared mining claims invalid for lack of discovery, and remand the case for a further hearing, where contestee submitted a Petition for Reconsideration with affidavits alleging that, since the hearing, the claims have been mined by lessees who have approximately 10,000 tons of minable ore blocked out with assays averaging from 6 to 8 pounds of mercury per ton of ore.

United States v. Evelyn P. Higgins et al., 24 IBLA 187 (Mar. 18, 1976)

Lands within national parks are not subject to mining location except where specifically authorized by law. 43 CFR 3811.2-2. However, lands within a national forest remain open to location and entry under the mining laws. 16 U.S.C. § 478 (1970). Where mining claims occupy land which has subsequently been withdrawn from the operation of the mining laws, the validity of the claim must be tested by the value of the mineral deposit as of the date of the withdrawal, as well as the date of determination. If the claim was not supported at the date of withdrawal for the national park by such a discovery, the land within the claims located in the park would not be excepted from the effect of the withdrawal.

United States v. Wallace W. Vaux, 24 IBLA 289 (Apr. 1, 1976)

When a Government mineral examiner testifies that he has examined the exposed workings on a claim without finding sufficient mineral values to support the discovery of a valuable mineral deposit, a prima facie case of lack of discovery has been made.

United States v. John M. Tappan, Jr., et al., 25 IBLA 1 (May 5, 1976)

When the United States contests a mining claim it has by practice assumed only the burden of going forward with sufficient evidence to establish a prima facie case on the charges in the contest complaint; the burden then shifts to the contestee to refute, by a preponderance of the evidence, the Government's case.

The United States has established a prima facie case of the invalidity of a mining claim when a qualified Government mining examiner testifies that he has examined the claim and found the mineral values insufficient to support the discovery of a valuable mineral deposit.

United States v. Robert L. Taylor, 25 IBLA 21 (May 5, 1976)

When the Government contests a mining claim on a charge of no discovery it bears the burden of going forward with sufficient evidence to establish a prima facie case; the burden then shifts to the claimant to show by a preponderance of the evidence that a discovery has been made.

Where a Government mineral examiner testifies that he has examined a claim and found the mineral values insufficient to support a finding of discovery, a prima facie case has been established.

A mining claim is a claim to property which may not be declared invalid without proper notice and an adequate opportunity for an agency hearing in accordance with due process of law. That due process consists of notice and opportunity for hearing, and it suffices if the claimant is afforded the opportunity to be present and heard. The fact that the claimant, after filing a timely answer to the contest complaint, refused to attend that hearing and produce evidence does not vitiate the due process he has received.

United States v. Carl Bellamy, 25 IBLA 50 (May 18, 1976)

Under the mining law, discovery of a valuable mineral deposit is the sine qua non for a valid mining claim. Even if location of a mining claim appears not to be supported by discovery, a cloud is cast upon the United States' title, which the Government may seek to remove by bringing a contest to determine whether the claim is valid.

In a mining contest, the mining claimant is the proponent of a rule or order that he has complied with the mining laws entitling him to validation of the claim, and the claimant has the ultimate burden of proof. The Government has assumed the burden of going forward with sufficient evidence to establish a prima facie case of invalidity. When this has been done, the burden then shifts to the claimant to show by a preponderance of the evidence that his claim is valid.

In making a prima facie case of lack of discovery of a valuable mineral deposit, the Government has no duty to do the discovery work for the mining claimant. It is incumbent upon the claimant to keep his discovery points available for inspection. A prima facie case is established when a Government mineral examiner gives his expert opinion that he examined the claim and found insufficient values to support a finding of discovery.

Where the Government fails to present a prima facie case, a contestee, upon timely motion, may move to dismiss the case and then rest. If, however, he goes forward and presents evidence, that evidence will be considered as part of the entire evidentiary record. Therefore, even if the Government has failed to make a satisfactory prima facie case, or the case is weak, contestee's evidence may be used against him to establish that case. Furthermore, where contestee chooses to rebut the case, he must do so by a preponderance of the evidence, bearing the risk of nonpersuasion if he fails.

United States v. Alex Bechthold, 25 IBLA 77 (June 1, 1976)

A civil action in a Federal district court condemning a mining claim for a period of years for the exclusive use of the United States does not bar a subsequent contest by the Department of the Interior challenging the validity of the claim.

United States v. The American Fluorspar Group, Inc., 25 IBLA 136 (June 7, 1976)

A mining claim is properly declared invalid where the Government establishes a prima facie case of lack of discovery, and the contestee does not show by a preponderance of the evidence that a discovery has been made.

Where the Government contests a mining claim, official notice of a change in the published price of gold from that given at the hearing, as set forth in the evidence, may be taken by both the administrative law judge and the Board of Land Appeals, but official notice cannot be given to asserted "modern methods of extraction of gold."

United States v. Gold Placers, Inc., 25 IBLA 368 (July 6, 1976)

The right to a hearing on disputed issues of fact involving mining claims includes the right to adequate notice of the grounds upon which a claim's invalidity is asserted.

A Government contest complaint which asserts the invalidity of a claim because of insufficient quantity and quality of the located mineral within the limits of the claim does not put into issue the existence of excess reserves within the limits of a claim.

Where the alleged ground of invalidity of a claim was not charged in the complaint, and was not a matter of contention at the hearing, invalidation of the claim on such ground is improper, despite some evidence to support it, absent an opportunity for the contestee to present evidence on such issue where it appears that there is other pertinent evidence that may be submitted on that issue.

Where on appeal from a decision sustaining the Government's challenge of a patent application it is determined that the alleged ground of invalidity was one not raised in the complaint or at the hearing, the decision rejecting the patent application will be set aside and the Government will be afforded an opportunity to amend its complaint to embrace the charge. Where the Government does amend its complaint the mineral claimant will be granted the right to an evidentiary hearing on such issue.

United States v. Robert B. McElwaine, 26 IBLA 20 (July 7, 1976)

A person who admits he has no interest in a mining claim which has been held invalid for failure of the named contestee to file an answer other than he disputes a charge that the land in the contested claim is not mineral in character or that the date of a withdrawal is incorrect is not adversely affected by the decision and has no standing to appeal.

United States v. William Robinson & William McCaskill, Phelps Dodge Corp., 26 IBLA 137 (Aug. 2, 1976)

The Department of the Interior may contest the validity of any unpatented mining claim located on public land, including claims located within powersite withdrawals; the Department's authority to contest the validity of mining claims was not diminished by the Mining Claims Rights Restoration Act of 1955.

David Loring Gamble, Darrel Houglum, 26 IBLA 249 (Aug. 18, 1976)

Although, in a mining claim contest, the Government may make a prima facie case of no discovery by the testimony of a mineral examiner that he has been on the land in issue and saw nothing of mineral value, a prima facie case is ordinarily not made where it is established that the examiner was not on the land in issue.

In a mining claim contest where a contestee is of the opinion that the Government did not make a prima facie case of no discovery, he may move to have the case dismissed at the conclusion of the Government's case, and then rest. The contest complaint could be dismissed if the administrative law judge rules that no prima facie case had been made of lack of discovery and there is no other evidence in the record to support the charges in the complaint. But if the contestee goes forward after making such a motion to dismiss and presents his evidence, that evidence must be considered as part of the entire record and its probative value will be weighed. Thus, even if the Government has failed to make a prima facie case, evidence presented by the contestee which supports the Government's contest charges may be used against the contestee, regardless of the defects in the Government's case.

In a mining claim contest where the evidence of a valuable mineral deposit, submitted by contestee at a hearing, bearing on the validity of a mining claim, has greater probative weight than that offered by the Government, it is proper to find that contestee has preponderated and to dismiss, without prejudice, the complaint alleging no discovery of a valuable mineral deposit.

United States v. Arizona Mining and Refining Co., Inc., et al., 27 IBLA 99 (Sept. 29, 1976)

Where an attorney files an answer to a contest concerning mining claims on behalf of certain individuals, who, during the pendency of the contest proceedings, transfer their interests in the mining claims to a corporation of which they are major stockholders and directors, and the attorney represents those individuals and the corporation at the contest hearing, the corporation is bound by the determination reached therein, even though the corporation may not have received actual notice of the contest.

A request for postponement made more than 10 days prior to a hearing is properly denied where there has been no showing of good cause and proper diligence. A contestee's request for postponement is properly denied when (1) a contestee only seeks postponement in order to pursue an exchange of land for the claims; and (2) the administrative law judge rules that the contestant may seek to dismiss the contest if an exchange is contemplated and the contestant does not wish to abate the contest proceedings.

A request for postponement made at a hearing or within 10 days of a hearing is properly denied where there has been no showing of an extreme emergency which could not have been anticipated and which justifies beyond question the granting of a postponement. This standard is not met by a party's assertion that it has not had adequate opportunity to prepare a defense where such difficulty could have been anticipated before the request was made.

Where a mineral examiner testifies on the basis of his examination of mining claims that the mineral values on the claims are insufficient to support a finding of discovery, a prima facie case against the validity of the claims has been established, and where the contestees walked out of the hearing and did not submit evidence to rebut the prima facie case, the claims must be declared invalid.

The Secretary of the Interior has the authority to determine the validity of mining claims upon adequate notice and opportunity for hearing.

United States v. Mine Development Corp. et al., 27 IBLA 238 (Oct. 18, 1976)

Where the testimony and conclusions of an expert witness are based on careful examination of a mining claim by appropriate scientific methods, they will be accepted into evidence and given appropriate weight regardless of the fact that the witness may not be registered within that particular State as an expert in his field.

When, as a result of direct proceedings against mining claims, the Department determines that no discovery has been made, the claims must be declared null and void notwithstanding that they are located on land patented under the Stock-raising Homestead Act and the contest was privately initiated.

Cabot Sedgwick et al. v. C. M. Parker, 27 IBLA 256 (Oct. 20, 1976)

In a Government contest of the validity of a mining claim it is the claimants who are the true proponents of a rule or order, namely, that they have complied with the mining laws and have qualified to receive fee title to the land.

In a contest of a mining claim located for common variety mineral materials prior to July 23, 1955, after which such locations were proscribed by law, where there has been no mining and no sales, the test of the validity of the claim is whether the claimant(s) could have mined and marketed the material profitably prior to that date and thereafter. The evidence tending to

MINING CLAIMS--Continued

CONTESTS--Continued

so show must relate to what a prudent man would have been reasonably justified in doing based upon the actual known circumstances at the time, not upon what he might have done if the proper conditions had then prevailed.

While the existence of other land values does not qualify a locator's rights under the mining law if he has a valid claim, evidence of such other values may be considered in assessing the weight and credibility to be accorded the locator's testimony in determining whether a discovery has been made, and may be a factor in evaluating his bona fide intention to develop a mining operation.

In determining whether a profitable market existed for material from a particular mining claim from which no material has been sold, a hypothetical market must be created in which the new material plays its part. The new material from the claim at issue must be included with that from all other known potentially competitive sources in calculating the factor of supply. If the supply so calculated amounts to a superabundance and so overwhelms the existing demand as to reduce the value or profit increment to a level below that which would prove attractive to a prudent man, the material cannot be said to be marketable at a profit.

United States v. J. R. Osborne et al. (Supp. on Judicial Remand), 28 IBLA 13 (Nov. 8, 1976)

In a mining contest, a matter not charged in the complaint may only be considered by the administrative law judge if it was raised at the hearing without objection and the contestee was fully aware that the issue was raised.

United States v. Glenn C. Bolinder and L. C. Turner, et al., 28 IBLA 187 (Dec. 6, 1976)

83 I.D. 609

Under the Department of the Interior's rules governing contests against mining claims, where an answer to a complaint is not filed within the prescribed time the allegations of the complaint will be taken as admitted by the contestee and the case decided without a hearing by the appropriate officer of the Bureau of Land Management. A mining claim may be declared null and void where there was a charge in the complaint of insufficient minerals to constitute a valid discovery.

United States v. William C. Smith, a/k/a Bill Smith, 29 IBLA 7 (Feb. 8, 1977)

Under the Department of the Interior's rules governing contests against mining claims, where an answer to a complaint is not filed within the prescribed time the allegations of the complaint will be taken as admitted by the contestee and the case decided without a hearing by the appropriate officer of the Bureau of Land Management. However, under the rules an answer may be accepted if it is received within 10 days after the due date and it is determined that the answer was probably transmitted before the end of the period in which it was required to be filed.

United States v. Jesse Smith, 29 IBLA 10 (Feb. 8, 1977)

MINING CLAIMS--Continued

CONTESTS--Continued

Where the answer to a mining contest complaint denying the charges is not timely filed, the charges will be deemed admitted and the contest will be decided without a hearing. 43 CFR 4.450-7(a).

United States v. Edison J. Schaefer, 29 IBLA 84 (Feb. 23, 1977)

When the Government has presented a prima facie case of lack of discovery of a valuable mineral deposit on a mining claim, the mining claimant then has the burden of establishing by a preponderance of the evidence that the discovery test has been met. Consequently, the ultimate burden of proving discovery is always upon the mining claimant.

United States v. George J. Bunt and A. F. Goodwin, 29 IBLA 86 (Feb. 23, 1977)

When a mining claimant has failed to answer a complaint in a mining contest, the allegations are deemed admitted and the State Office of the Bureau of Land Management will decide the case without a hearing. 43 CFR 4.450-7(a).

A defaulting contestee may not rely on an answer filed by another contestee in the same contest when such answer never purported to be on behalf of the defaulting contestee.

United States v. Frederick A. Hagg et al., 29 IBLA 128 (Feb. 23, 1977)

Under the mining law discovery of a valuable mineral deposit is the *sine qua non* for a valid mining claim. State mining laws relating to discovery may only add to the Federal mining law; such laws cannot diminish the Federal requirements for discovery of a valuable mineral deposit on a mining claim located on Federal lands.

United States v. Bradley B. Denham, 29 IBLA 185 (Mar. 18, 1977)

A mining claim is properly declared null and void where the Government establishes a prima facie case of lack of discovery, and the contestee does not show by a preponderance of the evidence that a discovery has been made.

United States v. Chester L. Ramsey, 29 IBLA 243 (Mar. 25, 1977)

United States v. Wayne E. Highley, 30 IBLA 21 (Apr. 7, 1977)

Once the Government has established in a mining claim contest a prima facie case that the claims are not valid for lack of discovery, the burden shifts to the contestee to prove the discovery of a valuable mineral deposit by a preponderance of the evidence.

United States v. Howard S. McKenzie, 29 IBLA 270 (Mar. 28, 1977)

The ultimate burden of proof to show a discovery of a valuable mineral deposit is always upon the mining claimant, but if the Government in a contest fails to present a prima facie case and the contestee moves to dismiss the case and rests, the contest complaint must be dismissed because there would be no evidentiary basis for an order of invalidity.

In determining the validity of a mining claim in a Government contest, the entire evidentiary record must be considered; therefore, if evidence presented by contestee shows there has not been a discovery, it may be used in reaching a decision that the claim is invalid regardless of any defects in the prima facie case.

Where the Government has made a prima facie case of lack of discovery in a mining contest, and a mining claimant fails to show discovery by a preponderance of the evidence, he has not satisfied his burden of proof and the claim must be declared invalid.

United States v. Lloyd O'Callaghan, Sr., et al., 29 IBLA 333 (Mar. 31, 1977)

In a Government contest challenging the validity of mining claims located for a clay-type material, an adequate prima facie case is established where there are expert witness opinions that the deposit is only a common clay or shale and it cannot meet refractory standards. The contestees then must go forward with evidence to rebut the Government's case with a preponderance of the evidence.

United States v. Thomas J. Peck et al., 29 IBLA 357 (Mar. 31, 1977) 84 I.D. 137

When the Government contests a mining claim on a charge of no discovery, it assumes the burden of going forward with sufficient evidence to establish a prima facie case; the burden then shifts to the claimant to show by a preponderance of the evidence that a discovery has been made and still exists within the limits of the claim.

United States v. Fred and Eileen Garner, 30 IBLA 42 (Apr. 18, 1977)

United States v. Richard E. Walls, 30 IBLA 333 (June 7, 1977)

United States v. Leslie Farling and William Farling, 32 IBLA 29 (Aug. 31, 1977)

United States v. Clark J. Guild et al., 34 IBLA 387 (May 3, 1978)

United States v. Don Lee Seto and Pauline Seto, 35 IBLA 4 (May 3, 1978)

United States v. Milton Wichner, 35 IBLA 240 (May 30, 1978)

United States v. John A. Cooley, 43 IBLA 276 (Oct. 15, 1979)

A mining claimant must prove a discovery under the prudent man test, including that the mineral can be extracted, removed and marketed at a profit.

In a contest of a patent application for a lode mining claim, the Board of Land Appeals may remand the case for further hearing to complete the record regarding the (1) availability and expense of necessary financing, land and water, (2) the expense of labor, and (3) the expense of compliance with environmental protection laws.

United States v. Pittsburgh Pacific Co., 30 IBLA 388 (June 15, 1977) 84 I.D. 282

The Bureau of Land Management, in exercise of its authority to regulate the acquisition of rights in the public lands, may contest any unpatented mining claim located on public land under its jurisdiction to determine, among other things, if the claimant has discovered on his mining claim a valuable mineral deposit as required by 30 U.S.C. § 22 (1970).

Although the Government has assumed the burden of proof in mining claim contests of presenting a prima facie case of lack of discovery, once it has done so, the burden shifts to the claimant to prove by a preponderance of the evidence the discovery of a valuable mineral deposit. A prima facie case is established when a Government mineral examiner testifies that she examined the claim and could find no evidence showing the discovery of a valuable mineral deposit.

United States v. Gwendolyn McClurg et al., 31 IBLA 8 (June 15, 1977)

Where the Government contests a mining claim, it has assumed only the burden of going forward with sufficient evidence to establish a prima facie case; the burden then shifts to the claimant to show by a preponderance of the evidence that his claim is valid. Where a Government mineral examiner testifies that he extensively examined the claims and workings thereon, and had assayed numerous samples taken from the claims but found no evidence of a valuable mineral deposit that would support a discovery, a prima facie case of lack of a mineral discovery has been made.

United States v. A. C. Partell, 31 IBLA 47 (June 23, 1977)

In making a prima facie case of lack of discovery of a valuable mineral deposit, the Government has no duty to do the discovery work for the mining claimant. It is incumbent upon the claimant to keep his discovery points available for inspection. A prima facie case is established when a Government mineral examiner gives his expert opinion that he examined the claim and found insufficient values to support a finding of discovery.

Since a Government contest is not insufficient and subject to dismissal for failure to name all parties in interest, a contest is properly brought against persons who are heirs of a director of a corporation whose charter has expired under State law, even though the State law provides that the property of such a corporation passes to a public trustee for distribution by him. Any interest of those not named or served in a manner provided by the pertinent regulation is not affected.

United States v. Emma Elizabeth Conner, and Walter S. Nolte, as the Heirs of R. W. Speer, a last known director of the Arlington Gold Mining Co. (Contestees), 31 IBLA 173 (July 5, 1977)

Past evidence of successful mining activity has limited probative value in determining whether there is a present discovery of a valuable mineral deposit on a mining claim, and assay reports can be given little weight when they are not supported by evidence as to who took the sample assayed, where it was taken, and what procedures were followed in taking the sample.

United States v. Lee Nicholson et al., 31 IBLA 224 (July 7, 1977)

Where, pursuant to 43 U.S.C. § 315g (1970), a State has acquired land subject to a reservation of minerals to the United States, and the State thereafter leases the surface of the land to a corporation for purposes which are plainly incompatible with mining, the surface lessee has standing to initiate a private contest to determine the validity of unpatented mining claims located on the land. It is not essential to the cause of action that there be an actual physical interference by one party with the other party's use of the land if their respective interests are clearly and potentially conflicting.

Continental Oil Co. v. Aztec Exploration and Development Co., 32 IBLA 1 (Aug. 24, 1977)

Where the Government contests mining claims on a charge of lack of discovery of a valuable mineral deposit prior to the date when such minerals were no longer subject to such location, the Government must initially present sufficient evidence to establish a prima facie case. The burden then shifts to the claimant to show by a preponderance of credible evidence that a discovery has been made on each claim.

Where the expert witnesses called by the Government testify that prior to July 23, 1955, there was no profitable market for common variety minerals from the subject claims and that it would have been economic folly to undertake the development a mine thereon, a prima facie case of invalidity has been made. Thereafter, upon the failure of the claimant to prove the contrary by a preponderance of credible evidence, a determination that the claims are invalid is obligatory.

Where, in a contest to determine the validity of certain mining claims located for common building stone, sand and gravel, the Government charges that the claims were not located prior to the Act of July 23, 1955, which prohibited the subsequent location of such minerals, the finding by the Hearing Examiner and two administrative appellate tribunals that the charge is true and the claims were not timely located requires a holding that the claims are null and void, where such finding is supported by a preponderance of credible evidence.

United States v. Frank and Wanita Melluzzo (Supp. on Judicial Remand), 32 IBLA 46 (Sept. 2, 1977)

In a mining claim contest where a contestee is of the opinion that the Government did not make a prima facie case of no discovery, he may move to have the case dismissed at the conclusion of the Government's case, and then rest. The contest complaint could be dismissed if the administrative law judge rules that no prima facie case had been made of lack of discovery and there is no other evidence in the record to support the charges in the complaint. But if the contestee goes forward after making such a motion to dismiss and presents his evidence, that evidence must be considered as part of the entire record and its probative value will be weighed. Thus, even if the Government has failed to make a prima facie case, evidence presented by the contestee which supports the Government's contest charges may be used against the contestee, regardless of the defects in the Government's case.

Where a mining claim occupies land which has subsequently been withdrawn from the operation of the mining law, the validity of the claim must be tested by the value of the mineral deposit as of the date of the withdrawal, as well as the date of the hearing. If the claim was not supported at the date of the withdrawal by a qualifying discovery of a valuable mineral deposit, the land within its boundaries would not be excepted from the effect of the withdrawal, and the claim could not thereafter become valid even though the value of the deposit thereafter increased due to a change in the market.

In a proceeding to determine the validity of an unpatented mining claim the claimants must prevail, if at all, upon the strength of their own case, rather than upon any weakness in that of the Government.

Where mining claims occupy land which has subsequently been withdrawn from the operation of the mining laws by a notice of proposed classification, 43 CFR 2461.2, the validity of the claim must be tested as of the date of the published notice, as well as of the date of determination. If the claim was not supported by such a discovery at the date of the published notice of classification, the land within the claim located in the classified area would not be excepted from the effect of the withdrawal.

The "marketability rule" requiring a demonstration of present marketability at a profit is (and always has been) applicable to all mining claims, whether for base metals or for precious minerals.

United States v. E. E. Rodgers and Barbara J. Rodgers, 32 IBLA 77 (Sept. 2, 1977)

In mining claim contests, the United States has assumed the burden of establishing a prima facie case that no discovery has been made on the mining claims by the contestee; the burden of proof then shifts to the contestee to show by a preponderance of the evidence that a discovery has been made and still exists within the limits of each mining claim. Evidence which may justify further exploration is insufficient either to establish a discovery or to overcome a prima facie case of lack of discovery.

United States v. Robert A. Bukke (Registered Agent), Valumines, Inc., et al., 32 IBLA 155 (Sept. 12, 1977)

When the Government contests a mining claim on a charge of no discovery, it has by practice assumed the burden of going forward with sufficient evidence to establish a prima facie case; when it has done so, the burden shifts to the claimant to show by a preponderance of the evidence that a discovery has been made and still exists within the limits of the claim.

When a contestee fails to answer a complaint, the allegations are deemed admitted and the case may be dismissed with prejudice as to that contestee. In addition, in a Government contest, the complaint is not deemed to be insufficient or subject to dismissal where the Government fails to name all interested parties, or for failure to serve every party who has been named.

United States (Contestant) v. Earl Frisco and Sandra S. Young (Contestees), 32 IBLA 248 (Sept. 21, 1977)

When the Government contests a mining claim, it bears only the burden of going forward with sufficient evidence to establish a prima facie case; the burden then shifts to the claimant to show by a preponderance of the evidence that a discovery has been made and is present within the limits of the claim.

MINING CLAIMS--Continued

CONTESTS--Continued

Where a Government mineral examiner testifies that he has examined a mining claim and found the mineral values insufficient to support a finding of discovery, a prima facie case has been established.

United States v. John C. Morton et al., 32 IBLA 263 (Sept. 27, 1977)

The Secretary of the Interior has the authority to determine the validity of mining claims on any public lands of the United States, including lands within the National Forest System, after adequate notice and opportunity for hearing. A mining claim contest initiated under the authority of the Secretary of the Interior may be prosecuted by counsel employed by the Department of Agriculture acting on behalf of the Forest Service where such action is in accordance with a Memorandum of Understanding between the agencies.

It is not necessary for the Government to prepare an environmental impact statement before issuing a complaint in a mining claim contest, as the determination of the validity of a mining claim is not a "major Federal action" within the ambit of sec. 102 of the National Environmental Policy Act of 1969, 42 U.S.C. § 4332 (1970).

United States v. Ernest F. D ven and Richard J. T. Anderson, 32 IBLA 361 (Oct. 25, 1977)

A Bureau of Land Management decision, dismissing an answer to contest complaints filed in behalf of individual contestees and a company, and holding mining claims null and void because it appeared the company did not own the claims and because the answer was filed in behalf of the individual contestees by someone not authorized to practice in their behalf, will be vacated where on appeal it is shown that within the time for filing the answer the claims had been transferred to the company. There is no need to dismiss the contest and initiate a new contest against the company since a timely answer has been filed in its behalf; instead, the complaints should be amended to substitute the company as the contestee and party in interest and the contest proceeding should go forward against it.

Sharon K. Milazzo et al., 33 IBLA 57 (Dec. 5, 1977)

When the Government contests a mining claim on a charge of no discovery, it has by practice assumed the burden of going forward with sufficient evidence to establish a prima facie case; when it has done so, the burden shifts to the claimant to show by a preponderance of the evidence that a discovery has been made and still exists within the limits of the claim.

United States v. Beatrice Ann Johnson, 33 IBLA 121 (Dec. 19, 1977)

When the Government contests a mining claim on a charge of no discovery, it assumes the burden of going forward with sufficient evidence to establish a prima facie case; the burden then shifts to the claimant to show by a preponderance of the evidence that a discovery has been made and still exists within the limits of the claim.

Where a mining claim occupies land which has subsequently been withdrawn from the operation of the mining law, the validity of the claim must be tested by the value of the mineral deposit as of the date of the withdrawal, as well as the date of the hearing. If the claim was not supported at the date of the withdrawal by a qualifying discovery of a valuable mineral deposit, the land within its boundaries would not be excepted from the effect of the withdrawal, and the claim could not thereafter become valid even though the value of the deposit thereafter increased due to a change in the market.

Andrew J. Van Derpoel et al., 33 IBLA 240 (Jan. 5, 1978)

Where a contest complaint charges that no minerals of a variety subject to the mining laws sufficient in quality, quantity, and value to constitute a discovery are disclosed on a claim, and that the land embraced in the claim is nonmineral in character and the contestee fails to file an answer to the complaint in accordance with departmental regulations, the allegation of the complaint will be taken as admitted by the contestee and the claim is properly held null and void.

United States v. Ronda Niece and Leslie Niece, 33 IBLA 290 (Jan. 10, 1978)

Although a millsite may be declared invalid when its only use is in connection with a mining claim which is declared invalid, a millsite can be contested separately and declared invalid when evidence establishes it is not being used for mining or milling purposes, independent of the issue of the validity of the mining claim.

A millsite is used for mining or milling purposes if the use is a function or utility intimately associated with the removal, handling or treatment of the ore from the vein or lodes. Some step in or directly connected with the process of mining or some feature of milling must be performed on the millsite.

Where the evidence presented at a hearing demonstrates a lode claim to be valid, a contest against a millsite held by the owner of the lode claim will be dismissed if the millsite is being used or occupied for mining or milling purposes.

United States v. John B. Parsons, 33 IBLA 326 (Jan. 16, 1978)

Where the Government contests a mining claim for lack of discovery, it assumes only the burden of making a prima facie showing that discovery is lacking, and the burden of showing a valuable discovery by a preponderance of the evidence then falls upon the claimants.

United States of America v. David L. King et al., 34 IBLA 15 (Feb. 10, 1978)

In a mining contest a contestee may rest at the close of the Government's case and move for a dismissal based on the Government's failure to make out a prima facie case of a claim's invalidity. If, however, the contestee goes forward and presents his own evidence, that evidence may be weighed against him notwithstanding any defects in the Government's case.

United States v. Michael Slater, 34 IBLA 31 (Feb. 14, 1978)

MINING CLAIMS--Continued

CONTESTS--Continued

Failure to file a timely answer to a mining claim contest complaint will result in the charges in the complaint being taken as admitted and the case being decided without a hearing. Unsubstantiated allegations of temporary incapacity due to a nervous breakdown cannot serve as a basis for waiving this mandatory requirement.

United States v. Brent J. Brunker, 36 IBLA 36 (June 27, 1978)

The Department of the Interior is lawfully empowered to initiate a contest pursuant to the Administrative Procedure Act to determine the validity of unpatented mining claims. This procedure makes no provision for 1) trial by jury, 2) advice to the contestant concerning his constitutional rights, 3) compensation to the contestant for the value of the claim if it is found to be invalid, or 4) appointment by the Department of qualified counsel to represent the contestant; and this procedure does not violate constitutional guarantees of due process, the General Mining Law, or the Administrative Procedure Act. Presentation of the contestant's case by counsel employed by the Forest Service in appropriate cases is permissible, and Federal employees may testify as witnesses, and may conduct examinations and secure mineral samples on unpatented mining claims without a search warrant.

United States v. John Gayanich, 36 IBLA 111 (July 14, 1978)

Where the Government contests a mining claim for lack of discovery, it assumes only the burden of making a prima facie showing that discovery is lacking, and the burden of showing a valuable discovery by a preponderance of the evidence then falls upon the claimants.

Where a Government mineral examiner testifies that he has examined a claim and found the mineral values insufficient to support a finding of discovery, a prima facie case of invalidity has been established.

Where, in a mining contest, a contestee presents his own evidence, that evidence may be weighed against him notwithstanding any defects in the Government's case.

United States v. Roger and Stephanie Cichetti, 36 IBLA 124 (July 25, 1978)

Where a Government mineral examiner testifies that he has examined a mining claim and found the mineral values insufficient to support a finding of discovery, a prima facie case of invalidity has been established. Where the claimant presents evidence of returns which are so meager that they will not attract the labor and means of a person of ordinary prudence, he has failed to prove by a preponderance of the evidence that his claim is valid, and it is properly declared null and void.

United States v. Joseph Larsen and Ferris Larsen, 36 IBLA 130 (July 25, 1978)

When the Government contests a mining claim on a charge of no discovery, it assumes the burden of going forward with sufficient evidence to establish a prima facie case; the burden then shifts to the claimant to show by a preponderance of the evidence that a discovery has been made and still exists within the limits of the claim.

This Department has authority and jurisdiction to contest mining claims on the ground that they are invalid for lack of a discovery of a valuable mineral deposit, regardless of whether any other use of the land is being made or sought. The motivation of the Forest Service in instigating a contest is irrelevant.

United States v. Catherine E. Gay, 36 IBLA 148 (July 31, 1978)

When the Government contests a mining claim on a charge of lack of discovery of a valuable mineral deposit, it has assumed the burden of going forward with sufficient evidence to establish a prima facie case; the burden then shifts to the claimant to show by a preponderance of the evidence that a discovery has been made.

United States v. Florence J. Mattox, 36 IBLA 171 (July 31, 1978)

United States v. Emmett C. Harder, 42 IBLA 206 (Aug. 22, 1979)

United States v. Edward T. McHenry et al., 43 IBLA 122 (Sept. 26, 1979)

Where a contestee in a mining claim contest declares, of his own volition, that he does not want the claim and wishes to withdraw his answer and admit the allegations in the contest complaint, and subsequently volunteers to, and does, sign a written relinquishment of his interests in the contested claims, his claims are properly declared null and void.

When the Government contests a mining claim on a charge of no discovery, it bears the burden of going forward with sufficient evidence to establish a prima facie case; the burden then shifts to the claimant to show by a preponderance of the evidence that a discovery has been made.

Where a Government mineral examiner testifies that he has examined a claim and found the mineral values insufficient to support a finding of discovery, a prima facie case of invalidity has been established. Government mineral examiners are not required to perform discovery work for claimants or to explore beyond a claimant's workings.

United States v. Wesley C. Miles, Sr., 36 IBLA 213 (Aug. 3, 1978)

In a mining claim contest, no weight will be given to claimant's allegation that the Government's mineral examiner failed to sample the discovery point or the best mineral showings, where the claimant was invited to indicate his discovery to the examiner and failed to do so, and where he also failed to introduce convincing evidence of his own that a discovery had been made.

United States v. Larry Joseph Tims, 36 IBLA 316 (Aug. 23, 1978)

In order to sustain a charge that land embraced within a mining claim is not held in good faith for mining purposes the evidence relating to mineral claimant's lack of good faith must be clear.

United States v. Clayton A. Dillman and Jean P. Dillman, 36 IBLA 358 (Aug. 31, 1978)

MINING CLAIMS--Continued

CONTESTS--Continued

The Secretary of the Interior has the authority to determine the validity of mining claims on any public lands of the United States after adequate notice and opportunity for a hearing. A mining claim contest may be initiated under the authority of the Secretary of the Interior by the Bureau of Land Management at the behest of the Forest Service and prosecuted by counsel employed by the Department of Agriculture, with Forest Service employees as witnesses, where such action is in accordance with a Memorandum of Understanding between the agencies.

When the Government contests a mining claim on a charge of no discovery, it has by practice assumed the burden of going forward with sufficient evidence to establish a prima facie case; the burden then shifts to the claimant to show by a preponderance of the evidence that a discovery has been made and still exists within the limits of the claim.

United States v. Andrew L. Freese II, 37 IBLA 7
(Sept. 6, 1978)

In mining claim contest, Government must only go forward with evidence to establish prima facie case of no discovery of valuable mineral deposits, and burden then shifts to mining claimant to prove by preponderance of evidence that his claim is valid.

Government has established prima facie case when its mineral examiner testifies that he has examined mining claims in issue and found mineral values insufficient to support finding of discovery of valuable deposits.

Where contestee has not produced substantial evidence in respect to quantity of iron oxide ore existing on claims, or in respect to whether ore can be extracted and marketed at profit, contestee has not proved that person of ordinary prudence would be justified in further expenditure of his labor and means, with reasonable prospect of success, in developing valuable mine.

United States v. Michael E. Marion, 37 IBLA 68
(Sept. 18, 1978)

A prima facie case has been made when a Government mineral examiner testifies that he has examined the claim and found evidence of mineralization insufficient to support a finding of a discovery.

United States v. Paul P. Fisher and Buel B. Fisher,
37 IBLA 80 (Sept. 22, 1978)

Intervention, by right, as a full party in a contest proceeding is only recognized where the individual seeking intervention has the necessary interest to maintain a private contest independently under 43 CFR 4.450-1.

The extent of the participation in a contest hearing to be afforded "interested individuals" who do not have a sufficient interest to maintain a private contest is committed to the sound discretion of the administrative law judge. Among the factors which are properly considered are: the desires of the original parties; the likelihood that the party seeking intervention will provide information which would not be forthcoming without its participation; and the cost which must be borne by both the contestant and the contestee by the nature and scope of the intervention granted.

United States v. United States Pumice Co., 37 IBLA 153
(Oct. 5, 1978)

MINING CLAIMS--Continued

CONTESTS--Continued

Where a mineral patent application is supported by information sufficient to permit a mineral examination of the claims, but not sufficient for the adjudicator to approve the application for patent, he may properly call on the applicant for supplemental evidence to support the application. However, if the claimant fails to submit it, the adjudicator may not penalize such failure by summary rejection of the application for reasons relating to disputed issues of fact without notice and an opportunity for hearing.

Where unpatented mining claims were located some 50 years before the claimant filed application for patent, during which time they went unchallenged by the Government, the United States is not barred from contesting the validity of the claims by invocation of the equitable defense of laches.

Brattain Contractors, Inc., 37 IBLA 233 (Oct. 16, 1978)

Where national forest land is open to mineral location, the failure of a district forest ranger to object to the location or development of mining claims for a number of years, or to request that a contest of the validity of the claims be initiated, does not estop the United States from bringing a contest, nor is the contest barred by laches.

United States v. Verdugo & Miller, Inc., 37 IBLA 277
(Oct. 20, 1978)

When the Government contests a mining claim on a charge of no discovery it has assumed the burden of going forward with sufficient evidence to establish a prima facie case. The burden then shifts to the claimants to show by a preponderance of the evidence that a discovery has been made.

Where a Government mineral examiner testifies that he has examined a claim and found the quantity of minerals insufficient to support a finding of discovery, a prima facie case of invalidity has been established and the burden shifts to the claimants.

United States v. Loren E. Burns et al., 38 IBLA 57
(Nov. 20, 1978)

Once the Government has established a prima facie case that no discovery of a valuable mineral deposit has been made within a mining claim, the burden of proof shifts to the contestee to establish by a preponderance of the evidence the existence of a discovery.

United States v. Jack C. Harris, Jill L. Harris,
38 IBLA 137 (Nov. 29, 1978)

When the Government contests a mining claim on a charge of no discovery, it bears the burden of going forward with sufficient evidence to establish a prima facie case; the burden then shifts to the claimant to show by a preponderance of the evidence that a discovery has been made.

Where a Government mineral examiner testifies that he has examined a claim and found the mineral values insufficient to support a finding of discovery, a prima facie case of invalidity has been established.

Mineral values on a claim may properly be tested by taking dry samples and washing them down to a concentrate. The absence of adequate water to run a dredging operation at the claim due to drought conditions is immaterial, as it is not necessary to run a dredge in order to sample the mineral values there.

It is incumbent upon a mining claimant to keep his discovery points available for inspection by Government mineral examiners. Where he does not, he assumes the risk that the mineral examiner will not be able to verify the discovery of the alleged mineral deposit, and his unsupported argument that the samples taken by the examiner are not representative will be rejected.

Unless and until the lands within a mining claim are patented to the claimant, they are Federal lands, and the Government retains the right to enter the lands at any time without search warrants, including the right to remove material samples from the claim in order to determine whether the land is mineral in character and whether a valuable deposit of a locatable mineral has been discovered by the claimant.

As the Government is required to adjudicate mining claims contests under its own rules and regulations, a customary review of the validity of a claim by a district examining committee is immaterial to the adjudication of the actual validity of the claim. Local customs relating to validity of a claim may only add to the Federal mining law; such customs cannot replace Federal requirements for adjudicating the validity of claims.

United States v. Russ Knecht, 39 IBLA 8 (Jan. 8, 1979)

Failure to file a timely answer to a mining claim contest complaint will result in the charges in the complaint being taken as admitted and the case being decided without a hearing. Where contestees deny the allegations in the complaint only as to 4 claims but not as to 15 other claims addressed in the complaint, the complaint will be taken as admitted as to the 15 claims not addressed in the answer to the complaint.

Where contestees in a mining claim contest file a timely answer to the contest complaint, this answer is efficacious as to any other contestees who are members of his family if it appears on the face of the answer that they wish to retain their interests, if any, in the claims, as the contestees who answered may be regarded as having done so on their family members' behalf. In these circumstances, these other contestees are properly regarded as having answered the complaint, absent any manifestation of a contrary intent.

Where a contestee makes a timely response to a Government complaint in a mining contest which is sufficient to raise a justiciable controversy, the allegations then cannot be taken as admitted and the mining claim(s) cannot be declared null and void without a hearing.

United States v. Jerry Prock et al., 39 IBLA 148 (Jan. 29, 1979)

A Government contest against a mining claim does not lose its public character and become a private contest because the land involved may ultimately be conveyed to a private entity in a land exchange, nor does that possibility warrant the application of any different standard for determining whether there has been a discovery of a valuable mineral deposit within the claim, or a different burden of proof.

United States v. George B. Edelins et al., 39 IBLA 236 (Feb. 13, 1979)

Failure to file a timely answer to a mining claim contest complaint will result in the charges in the complaint being taken as admitted and the case being decided without a hearing.

United States v. James Hawkeswood et al., 41 IBLA 245 (June 27, 1979)

United States v. Edna Horstmeier, 42 IBLA 33 (July 26, 1979)

When the Government contests a mining claim on a charge of lack of discovery of a valuable mineral deposit, it has assumed the burden of going forward with sufficient evidence to establish a prima facie case. Where a Government mineral examiner testifies that he has examined a claim and found the quantity of minerals insufficient to support a finding of discovery, a prima facie case of invalidity has been established and the burden shifts to the claimants to show by a preponderance of the evidence that a discovery has been made. Government mineral examiners are not required to perform discovery work for a claimant or to explore beyond a claimant's workings.

The entire evidentiary record in a mining contest is considered and if evidence presented by a contestee is damaging to the contestee's case it may be used against the contestee regardless of any deficiencies in the Government's presentation. Therefore, regardless of whether the Government established a prima facie case of lack of discovery, if the entire record establishes that a discovery was not made on a claim it is properly declared null and void.

It was proper to deny mining claimants' request to redrill on mining claims after the land was withdrawn from mining where the work would be an effort to make a discovery of a valuable mineral deposit within the claim rather than simply a confirmation or corroboration of a discovery prior to the withdrawal.

United States v. William Lavon Chappell et al., 42 IBLA 74 (Aug. 13, 1979)

In a mining claim contest where a contestee is of the opinion that the Government did not make a prima facie case of no discovery, he may move to have the case dismissed at the conclusion of the Government's case and then rest. The contest complaint could be dismissed if the administrative law judge rules that no prima facie case had been made of lack of discovery and there is no other evidence in the record to support the charges in the complaint. But if the contestee goes forward after making such a motion to dismiss and presents his evidence, that evidence must be considered as part of the entire record and its probative value will be weighed. Thus, even if the Government has failed to make a prima facie case, evidence presented by the contestee which supports the Government's contest charges may be used against the contestee, regardless of the defects in the Government's case.

A sufficient prima facie case by the Government does not require positive proof that there has been no discovery made or that the mining claim is nonmineral in character. Upon the Government's presentation of a prima facie case, the burden shifts to the claimant to prove by a preponderance of the evidence that he indeed has a discovery of a valuable mineral deposit within the limits of the claim.

A second hearing of a Government mining contest will not be afforded where a claimant was given notice and an opportunity to appear at a hearing, where he was actually present at the hearing, and where nothing has been submitted which suggests that another hearing would produce a different result. A petition to reopen a hearing of a Government mining contest will be denied when the contestee offers no valid justification for the neglect to offer evidence which was or could have been available at the original hearing. A further hearing will not be ordered merely to afford a claimant an additional opportunity to explore and make a discovery.

United States v. Andy Syndbad, 42 IBLA 313 (Aug. 29, 1979)

When the Government contests a mining claim on a charge of lack of discovery, the Government has the burden of proving a prima facie case; the burden then shifts to the mining claimant to prove by a preponderance of the evidence that discovery exists.

United States v. Zed G. Ax, 43 IBLA 146 (Sept. 28, 1979)

When the Government contests a mining claim on a charge of lack of discovery of a valuable mineral deposit, it has assumed the burden of going forward with sufficient evidence to establish a prima facie case. Where a Government mineral examiner testifies that he has examined a claim and found the quantity of minerals insufficient to support a finding of discovery, a prima facie case of invalidity has been established and the burden shifts to the claimants to show by a preponderance of the evidence that a discovery has been made.

It is incumbent upon a mining claimant to keep his discovery points available for inspection by Government mineral examiners. Where he does not, he assumes the risk that the mineral examiner will not be able to verify the discovery of the alleged mineral deposit, and his unsupported argument that the samples taken by the examiner are not representative will be rejected.

United States v. John B. Burt et al., 43 IBLA 363 (Oct. 29, 1979)

When the Government contests a mining claim on a charge of lack of discovery, the Government has the burden of proving a prima facie case; the burden then shifts to the mining claimant to prove by a preponderance of the evidence that discovery exists.

When land is withdrawn from mining location after a mining claim has been located thereon, the claimant must show that discovery of a valuable mineral deposit occurred *prior* to the withdrawal in order to establish rights against the Government.

United States v. Ralph Page et al., 43 IBLA 390 (Oct. 31, 1979)

The Department of the Interior has the right to contest the validity of an unpatented mining claim at any time until patent issues.

It is the responsibility of a mining claimant to present evidence supporting his allegation of bias on the part of Government mineral examiners testifying as to the validity of his claim in a contest proceeding, and a showing of Department affiliation does not discredit a witness.

The procedures of the Department of the Interior in mining contests where a mining claimant is afforded notice and an opportunity to be heard comport with the requirements of due process under the United States Constitution.

United States v. J. D. Wilson, 44 IBLA 1 (Nov. 6, 1979)

The BLM should presume the validity of mining claims or the development of mineral leases disclosed by abstracts submitted by the preference right lease applicant, and allow the applicant to pursue the remedy of private contests or, failing that, issue a notice of intent to reject the lease application where claims or development are shown, and allow the preference right lease applicant the opportunity to show, on the record, the invalidity of the claims, or lack of development, or both.

Effect and Implementation of Solicitor's Opinion M-36893 on "Unclaimed, Undeveloped," M-36893 (Supp.) (Nov. 19, 1979) 86 I.D. 627

The Secretary of the Interior has the authority to determine the validity of mining claims on any public lands of the United States after adequate notice and opportunity for a hearing. A mining claim contest may be initiated under the authority of the Secretary of the Interior by the Bureau of Land Management at the behest of the U.S. Forest Service and prosecuted by counsel employed by the U.S. Department of Agriculture, with U.S. Forest Service employees as witnesses.

An administrative law judge in rendering a decision need not make a separate ruling on each finding of fact and conclusion of law. It is sufficient if the decision summarizes the controlling principles of law and the testimony of witnesses relative thereto and explains why appellants' evidence was insufficient to meet the legal test for a discovery of valuable mineral.

When the Government contests a mining claim on a charge of no discovery, it has by practice assumed the burden of going forward with sufficient evidence to establish a prima facie case; when it has done so, the burden shifts to the claimant to show by a preponderance of the evidence that a discovery has been made and still exists within the limits of the claim.

United States v. Jon Zimmers and Claire Kelly, 44 IBLA 142 (Nov. 30, 1979)

When the Government contests a mining claim, located on land withdrawn from mineral entry, the burden of presenting a prima facie case is satisfied by the testimony of a well qualified mineral examiner that he has examined the exposed workings on a claim without finding sufficient mineral values to support a conclusion there was a discovery of a valuable mineral deposit either at the time of the withdrawal or at the time of his inspections.

United States v. Cecilia Puccinelli, 44 IBLA 266 (Dec. 19, 1979)

Where a mineral patent application is supported by a mineral examination of the claim which finds a valid discovery and recommends issuance of a patent for a portion of the claim, the BLM may not summarily reject the application on the face of the record for reasons related to disputed issues of fact without notice and an opportunity for hearing.

Big Horn Calcium Co., 44 IBLA 289 (Dec. 26, 1979)

MINING CLAIMS--Continued

CONTESTS--Continued

When the Government contests a mining claim on a charge of no discovery of a valuable mineral deposit it assumes the burden of going forward with sufficient evidence to establish a prima facie case; when it has done so, the burden shifts to the claimant to show by a preponderance of the evidence that a discovery has been made and still exists within the limits of the claim.

The decision of an administrative law judge will not be disturbed on appeal where the preponderance of the evidence supports the result he reached.

United States v. Knox-Arizona Corp., 44 IBLA 297 (Dec. 31, 1979)

DETERMINATION OF VALIDITY

When the Government contests a mining claim it bears only the burden of going forward with sufficient evidence to establish a prima facie case; the burden of going forward then shifts to the claimant to show by a preponderance of the evidence that his claim is valid.

When a Government mineral examiner testifies that he has examined the exposed workings on a claim without finding sufficient mineral values to support the discovery of a valuable mineral deposit, a prima facie case of lack of discovery has been made; the Government's mineral examiner is not obliged to explore beyond the current workings of a mining claimant is attempting to verify a discovery.

United States v. Herbert Clark, 18 IBLA 368 (Jan. 30, 1975)

The Department of the Interior has the authority and the duty to contest mining claims which it believes are invalid, notwithstanding that the claims are located in a national forest and the Forest Service has no objection to approval of a patent application.

Estate of Arthur C. W. Bowen (Deceased), 18 IBLA 379 (Jan. 30, 1975)

On petition for reconsideration, the assertion of rights to a mining claim under an Aug. 1968 location does not demonstrate error in or require reconsideration of this Board's decision, which affirmed that a mining claim located in 1969 for the same land, after the land was withdrawn from mineral location in Oct. 1968, was null and void ab initio. Neither this Board's decision initially or on petition affects petitioner's rights, if any, under such a prior location.

R. C. Jim Townsend (On Reconsideration), 18 IBLA 407 (Feb. 10, 1975)

The Surface Resources Act of July 23, 1955, declared that common varieties of sand and gravel are not valuable mineral deposits under the mining laws. In order for a claim for such material to be sustained as validated by a discovery, the prudent man/marketability test of discovery of a valuable mineral deposit must have been met at the date of the Act, and reasonably continuously thereafter.

Where a contestee in a mining contest preponderates sufficiently to overcome the Government's prima facie case on an issue raised by the evidence in a mining contest and there is no evidence on other essential disputed issues, the contest should be dismissed unless a patent application is being contested, in which case a further hearing must be ordered to resolve other

MINING CLAIMS--Continued

DETERMINATION OF VALIDITY--Continued

essential issues to determine whether the application may be allowed.

United States v. Clarion S. Taylor, Sr., and Gerald O'Connor, 19 IBLA 9 (Feb. 20, 1975) 82 I.D. 68

In connection with a mining claim located on land withdrawn for reclamation and power purposes, where (1) no notice of location was filed during a later period in which the land was open for entry subject to 30 U.S.C. §§ 621, 623-24 (1970), (2) there are no intervening rights, (3) a claimant alleges tht he held and worked the land, while open to entry, for the requisite number of years under 30 U.S.C. § 38 (1970) and the applicable State statute of limitations, and (4) he alleges that a discovery of a valuable mineral deposit has been made, it is necessary to consider the effect of sec. 621 et seq., and to hold a hearing if required to resolve questions of fact.

Ralph Page, 19 IBLA 255 (Mar. 31, 1975)

A discovery exists where minerals have been found within the limits of a claim and the evidence is of such a character that a person of ordinary prudence would be justified in the further expenditure of his labor and means, with a reasonable prospect of success, in developing a valuable mine.

In order to prove that rhyolite used for building stone purposes is not a common variety of stone under sec. 3 of the Act of July 23, 1955, a mining claimant must demonstrate that: (1) the mineral deposit has a unique property; and (2) the unique property gives the deposit a distinct and special value. Possession of a unique property alone is not sufficient. The unique property must give the deposit a value for a purpose to which other materials are not suited or if the deposit is to be used for the same purposes as other minerals of common occurrence, it must possess some inherent property which gives it a special value for such use which value is generally reflected by the fact that the deposit commands a higher price in the marketplace or produces a substantially higher profit.

A deposit of rhyolite cannot be determined to be an uncommon variety of mineral solely on the basis of its location, even though the location gives the deposit a competitive advantage due to proximity to market, as location is not a unique property inherent in the deposit but is only an extrinsic factor.

United States v. Gerald L. Heden et al., 19 IBLA 326 (Apr. 7, 1975)

The doctrine of res judicata will not bar an administrative proceeding to determine the validity of three unpatented mining claims where, in a previous condemnation action for the War Department's taking of a temporary exclusive easement covering the claims, the judgment of the Federal district court was limited solely to the compensation to be paid by the United States, and there was no litigation of the issue of the validity of the claims and no prior adjudication of that issue in the Department of the Interior.

Equitable estoppel will not operate to bar a mining claim contest or alter its result where it is not shown that some officer of the Government, who was authorized to declare the claims valid, falsely misrepresented to, or concealed material facts from the claimants concerning the validity of the claims with the intention that the claimants should act in reliance thereon, with the

MINING CLAIMS--Continued

DETERMINATION OF VALIDITY--Continued

result that the claimants were thereby induced to do so, to their ultimate damage.

The doctrine of collateral estoppel will not bar the administrative contest of the validity of three mining claims which were the subject of a previous condemnation action for the taking by the Government of a temporary exclusive easement over the claims, where the issue of the validity of the claims was not actually litigated and it was wholly unnecessary for the court to adjudicate that issue in rendering its judgment.

The Department of the Interior has jurisdiction, in proper proceedings, to determine the validity of mining claims on Federal lands.

Where a mining claim occupies land which has subsequently been withdrawn from the operation of the mining law, the validity of the claim must be tested by the value of the mineral deposit as of the date of the withdrawal, as well as the date of determination. If the claim was not supported at the date of the withdrawal by a qualifying discovery of a valuble mineral deposit, the land within its boundaries would not be excepted from the effect of the withdrawal, and the claim could not thereafter become valid even though the value of the deposit thereafter increased due to a change in the market.

United States v. A. B. Fleming et al., 20 IBLA 83 (Apr. 24, 1975)

Marketability of mineral material is not the sole test of the validity of a mining claim. Profitable sales of mineral material for nonvalidating uses cannot be used in determining the validity of a mining claim; the claimant must meet the prudent man/marketability test in a market for which the material is locatable.

Bog iron ore, used as a soil conditioner or soil amendment, is not a locatable mineral deposit in the absence of a showing that it meets the test of United States v. Bunkowski, 5 IBLA 102, 113-16, 79 I.D. 43, 48-49 (1972), i.e., it is found to be not just a physical amendment to the soil but a chemical amendment which alters and improves soil or plant chemistry.

United States v. Theresa B. Robinson, 21 IBLA 363 (Aug. 25, 1975) 82 I.D. 414

While a mining location on land totally withdrawn may be declared null and void ab initio without hearing, if a claimant alleges facts which would establish an interest in a claim located prior to the withdrawal, the claim may not be declared null and void ab initio without opportunity for hearing.

Mathern Lewis Stacy, 23 IBLA 166 (Dec. 24, 1975)

Where a mining claim occupies land which has subsequently been withdrawn from the operation of the mining law, the validity of the claim must be tested by the value of the mineral deposit as of the date of the withdrawal, as well as the date of the hearing. If the claim was not supported at the date of the withdrawal by a qualifying discovery of a valuable mineral deposit, the land within its boundaries would not be excepted from the effect of the withdrawal, and the claim could not thereafter become valid even though the value of the deposit thereafter increased due to a change in the market.

No discovery of a valuable mineral deposit is demonstrated on a placer mining claim which yields small amounts of gold from stream beds but which is suitable only for recreation mining because it could never be

MINING CLAIMS--Continued

DETERMINATION OF VALIDITY--Continued

expected to produce an economic return in any way commensurable with the labor and cost involved in such production.

United States v. Ruth Arcand et al., 23 IBLA 226 (Jan. 9, 1976)

A discovery exists where minerals have been found and the evidence is of such a character that a person of ordinary prudence would be justified in the further expenditure of his labor and means, with a reasonable prospect of success in developing a valuable mine.

The Act of July 23, 1955, 30 U.S.C. § 611 (1970), removed common varieties of cinder from location under the mining laws; thus, it is incumbent upon one who located a claim prior to that date for a common variety of cinder to show that all the requirements for a discovery, including a showing that the materials could have been extracted, removed, and marketed at a profit, had been met by that date.

Material which is suitable only for fill purposes, road bases, or comparable uses is not locatable under the mining laws, and even if the material is suitable for other purposes, its sale for the above uses cannot be considered in determining its marketability to establish the value of the deposit as mineral. By the same token, it is improper to consider the market demand for such uses for the purpose of determining what volume of mineral material a prudent locator might claim in the reasonable anticipation of market demand for legitimate mineral uses in the foreseeable future, reasonably projected.

Where it has been shown as to a number of mining claims located for cinders for which application for patent has been filed, that the amount of the deposits on the claims is excessively large in relation to the market that exists, only those claims can be found valid which by reason of location and volume and quality of deposits would make the most feasible mining operation and have a reasonable prospect of success; the remaining claims must be held invalid for lack of discovery.

United States v. Pelton E. Baker, 23 IBLA 319 (Jan. 19, 1976)

The doctrine of collateral estoppel will not bar the administrative contest of the validity of five mining claims which, together with another claim, were the subject of previous condemnation actions for the taking of a temporary exclusive easement over the claims, where the issue of the validity of the individual claims was not actually litigated and it was wholly unnecessary for the Court to adjudicate that issue in rendering its judgment.

Equitable estoppel will not operate to bar a mining claim contest or alter its result where it is not shown that some officer of the Government, who was authorized to declare the claims valid, falsely misrepresented to, or concealed material facts from the claimant concerning the validity of the claim with the intention that the claimant should act in reliance thereon, with the result that the claimant was thereby induced to do so, to his ultimate damage.

There can be no waiver of the Secretary's right to contest a mining claim believed to be invalid without a showing of an authority to make such a waiver and an intention to do so.

United States v. Bert L. Johnson, 23 IBLA 349 (Jan. 21, 1976)

MINING CLAIMS--Continued

DETERMINATION OF VALIDITY--Continued

In order to prove that stone containing feldspar used for landscaping and building stone purposes is not a common variety of stone under the Act of July 23, 1955, a mining claimant must demonstrate that: (1) the mineral deposit has a unique property, and (2) the unique property gives the deposit a distinct and special value. In the event the mining claimant does not establish that these criteria are met, the administrative law judge may properly hold that the stone cannot be classified as locatable under the mining laws because it is a common variety.

Ground feldspar, used as a soil conditioner or soil amendment, is not a locatable mineral deposit under the general mining laws in the absence of a showing that the mineral meets the test of *United States v. Bunkowski*, 5 IBLA 102, 113-16, 79 I.D. 43, 48-49 (1972), namely, that the mineral is found to be not just a physical amendment to the soil, but rather a chemical amendment which alters and improves soil or plant chemistry.

In order for a mining claim to be valid, there must be discovered within the limits of the claim a valuable mineral deposit. A discovery exists where minerals have been found and the evidence is of such a character that a person of ordinary prudence would be justified in the further expenditure of his labor and means with a reasonable prospect of success in developing a valuable mine. This test, the prudent man rule, has been refined to require a showing that the mineral in question can be extracted, removed and presently marketed at a profit.

Where a mining claimant fails to submit adequate evidence as to the expected quantity and specifications of the local demand for industrial quality feldspar, does not receive any payment for inferior quality feldspar attempted to be sold for industrial use, and does not establish that the local market demand would justify the costs of developing a mill capable of processing industrial quality feldspar from the subject claim, the mining claimant has failed to satisfy the prudent man-marketability test which requires a showing that a reasonable prospect of success in developing a valuable mine exists. Where the anticipated costs and revenues of an alleged profitable mining operation are not based on reliable probative evidence, but only on mere speculation, a mining claim cannot be found valid.

United States v. Robert W. Beal, 23 IBLA 378 (Feb. 4, 1976)

Lands within national parks are not subject to mining location except where specifically authorized by law. 43 CFR 3811.2-2. However, lands within a national forest remain open to location and entry under the mining laws. 16 U.S.C. § 478 (1970). Where mining claims occupy land which has subsequently been withdrawn from the operation of the mining laws, the validity of the claim must be tested by the value of the mineral deposit as of the date of the withdrawal, as well as the date of determination. If the claim was not supported at the date of withdrawal for the national park by such a discovery, the land within the claims located in the park would not be excepted from the effect of the withdrawal.

Under Federal law, a valid mining location cannot be made without a discovery of a valuable mineral deposit within the limits of the claim. The longstanding test to determine whether there has been a discovery of a valuable mineral deposit is the "prudent man" test. To meet this test there must be sufficient mineralization within the claims to warrant a man of ordinary prudence to expend his time and means with a reasonable expectation of developing a valuable mine. For a lode claim, there must be tangible proof of the existence of a vein or veins bearing sufficient mineralization to meet the test.

Before a finding of discovery can be warranted, it must be shown as a present fact that the claim is valuable for minerals. Evidence of past profitable mining is not proof the claims are presently profitable. The claim may have been worked out or have lost its value because of change in economic conditions.

High assay samples alone are not evidence of a discovery. The nature of the samples yielding the high values must be considered. Where neither the date of the samples nor the nature of the samples submitted for assay is known, those assays cannot be considered as representative of a valuable mineral deposit within the limits of a mining claim.

A mining claimant's belief in the existence of mineral on a claim is not sufficient to constitute discovery. The prudent man rule imposes an objective standard, and the fact that the claimant may be willing to expend his labor and means is not adequate.

United States v. Wallace W. Vaux, 24 IBLA 265 (Apr. 1, 1976)

When a Government mineral examiner testifies that he has examined the exposed workings on a claim without finding sufficient mineral values to support the discovery of a valuable mineral deposit, a prima facie case of lack of discovery has been made.

United States v. John H. Tarran, Jr., et al., 25 IBLA 1 (May 5, 1976)

When the United States contests a mining claim it has by practice assumed only the burden of going forward with sufficient evidence to establish a prima facie case on the charges in the contest complaint; the burden then shifts to the contestee to refute, by a preponderance of the evidence, the Government's case.

The United States has established a prima facie case of the invalidity of a mining claim when a qualified Government mining examiner testifies that he has examined the claim and found the mineral values insufficient to support the discovery of a valuable mineral deposit.

United States v. Robert L. Taylor, 25 IBLA 21 (May 5, 1976)

Under the mining law, discovery of a valuable mineral deposit is the *sine qua non* for a valid mining claim. Even if location of a mining claim appears not to be supported by discovery, a cloud is cast upon the United States' title, which the Government may seek to remove by bringing a contest to determine whether the claim is valid.

In a mining contest, the mining claimant is the proponent of a rule or order that he has complied with the mining laws entitling him to validation of the claim, and the claimant has the ultimate burden of proof. The Government has assumed the burden of going forward with sufficient evidence to establish a prima facie case of invalidity. When this has been done, the burden then shifts to the claimant to show by a preponderance of the evidence that his claim is valid.

In making a prima facie case of lack of discovery of a valuable mineral deposit, the Government has no duty to do the discovery work for the mining claimant. It is incumbent upon the claimant to keep his discovery points available for inspection. A prima facie case is established when a Government mineral examiner gives his expert opinion that he examined the claim and found insufficient values to support a finding of discovery.

Occasional assay samples of material from a lode mining claim containing high values of gold are not conclusive evidence of a valid discovery. Other factors must be considered, such as the extent of the mineral deposits, the number of samples assayed showing only a trace of mineral, and the nature of the samples yielding the high values. To be meaningful, the samples must be representative of the mineral deposit, not simply selective showings of the best mineralization.

Before a finding of discovery of a valuable mineral deposit within a mining claim is warranted, it must be shown as a present fact that the claim is valuable for minerals. Evidence of past profitable mining is not proof the claims are presently profitable. The claim may have been worked out or have lost its value because of change in economic conditions.

Evidence of mineralization which may justify further exploration but not development of actual mining operations is not sufficient to establish that a discovery of a valuable mineral deposit has been made. The prudent man test is objective in nature. Therefore, a claimant's hopes and beliefs are not sufficient reasons to constitute a discovery. The facts must be such as would justify a prudent man to develop the claim.

A previous determination by the Department of the Interior in a proceeding different from a mining claim contest that land was mineral in character is not evidence of a discovery of a valuable mineral deposit in a mining contest.

United States v. Alex Bechthold, 25 IBLA 77 (June 1, 1976)

A civil action in a Federal district court condemning a mining claim for a period of years for the exclusive use of the United States does not bar a subsequent contest by the Department of the Interior challenging the validity of the claim.

United States v. The American Fluorspar Group, Inc., 25 IBLA 136 (June 7, 1976)

To constitute a discovery upon a mining claim there must be physically exposed within the limits of the claim minerals in such quality and quantity to warrant a prudent man in expending his labor and means with a reasonable prospect of success in developing a valuable mine.

A mining claim is properly declared invalid where the Government establishes a prima facie case of lack of discovery, and the contestee does not show by a preponderance of the evidence that a discovery has been made.

Where the Government contests a mining claim, official notice of a change in the published price of gold from that given at the hearing, as set forth in the evidence, may be taken by both the administrative law judge and the Board of Land Appeals, but official notice cannot be given to asserted "modern methods of extraction of gold."

United States v. Gold Placers, Inc., 25 IBLA 368 (July 6, 1976)

The prudent man test cannot be satisfied by a claimant's assertion that he is willing to accept a meager income from the claim in order to add to retirement income. Determination of the validity of a mining claim can rest only on objective criteria, not subjective considerations.

United States v. Richard C. Reynders and Carol J. Reynders, 26 IBLA 131 (July 30, 1976)

The fact that assessment work has been performed on a mining claim does not estop the Government from determining the validity of a claim by proper proceedings giving adequate notice and an opportunity for a hearing where there are disputed determinative facts. However, where the claim was located after land has been withdrawn from mining, it is proper for the Bureau of Land Management to declare a claim null and void ab initio without a hearing.

Roy P. Cummins, 26 IBLA 223 (Aug. 17, 1976)

When the Government contests a mining claim, by practice it has assumed the burden of going forward with sufficient evidence to establish a prima facie case; the burden of going forward then shifts to the claimant to show by a preponderance of the evidence that his claim is valid. Likewise, a millsite claimant has the burden of establishing the validity of his claim by a preponderance of the evidence.

A prima facie case of lack of discovery within a mining claim is established when a Government mineral examiner testifies that he has examined the claim and found mineralization insufficient to support a finding of discovery.

United States v. Alois A. Dietemann and Doris E. L. Dietemann, 26 IBLA 356 (Sept. 8, 1976)

In a mining claim contest where the evidence of a valuable mineral deposit, submitted by contestee at a hearing, bearing on the validity of a mining claim, has greater probative weight than that offered by the Government, it is proper to find that contestee has preponderated and to dismiss, without prejudice, the complaint alleging no discovery of a valuable mineral deposit.

United States v. Arizona Mining and Refining Co., Inc., et al., 27 IBLA 99 (Sept. 29, 1976)

Where a mineral examiner testifies on the basis of his examination of mining claims that the mineral values on the claims are insufficient to support a finding of discovery, a prima facie case against the validity of the claims has been established, and where the contestees walked out of the hearing and did not submit evidence to rebut the prima facie case, the claims must be declared invalid.

The Secretary of the Interior has the authority to determine the validity of mining claims upon adequate notice and opportunity for hearing.

United States v. Pine Development Corp., et al., 27 IBLA 238 (Oct. 18, 1976)

MINING CLAIMS--Continued

DETERMINATION OF VALIDITY--Continued

When, as a result of direct proceedings against mining claims, the Department determines that no discovery has been made, the claims must be declared null and void notwithstanding that they are located on land patented under the Stock-raising Homestead Act and the contest was privately initiated.

Cabot Sedgwick et al. v. C. R. Parker, 27 IBLA 256 (Oct. 20, 1976)

Where, at the hearing of a mining claim contest, the transcript of a previous hearing in another related contest is received in evidence, those portions of the transcript which are relevant and material to the case at hand may form, or contribute to, the basis for the decision in the case, regardless of which party introduced the transcript in evidence.

Material which is principally valuable for use as fill, sub-base or ballast, for which ordinary earth or rock may be used, is not locatable under the mining laws, and even if the material is suitable for other purposes, its value for the above uses cannot be considered in determining its marketability as a valuable mineral deposit within the ambit of the general mining law.

In a Government contest of the validity of a mining claim it is the claimants who are the true proponents of a rule or order, namely, that they have complied with the mining laws and have qualified to receive fee title to the land.

While the existence of other land values does not qualify a locator's rights under the mining law if he has a valid claim, evidence of such other values may be considered in assessing the weight and credibility to be accorded the locator's testimony in determining whether a discovery has been made, and may be a factor in evaluating his bona fide intention to develop a mining operation.

In determining whether a profitable market existed for material from a particular mining claim from which no material has been sold, a hypothetical market must be created in which the new material plays its part. The new material from the claim at issue must be included with that from all other known potentially competitive sources in calculating the factor of supply. If the supply so calculated amounts to a superabundance and so overwhelms the existing demand as to reduce the value or profit increment to a level below that which would prove attractive to a prudent man, the material cannot be said to be marketable at a profit.

United States v. J. R. Osborne et al. (Supp. on Judicial Remand), 28 IBLA 13 (Nov. 8, 1976)

Under the mining law discovery of a valuable mineral deposit is the sine qua non for a valid mining claim. State mining laws relating to discovery may only add to the Federal mining law; such laws cannot diminish the Federal requirements for discovery of a valuable mineral deposit on a mining claim located on Federal lands.

In determining whether there has been a discovery of a valuable mineral deposit under the mining laws on a lode mining claim factors such as the extent of the mineral deposits, the number of samples assayed showing only a trace of mineral, and the nature of the samples yielding the high values must be considered.

United States v. Bradley B. Dunham, 29 IBLA 185 (Mar. 18, 1977)

MINING CLAIMS--Continued

DETERMINATION OF VALIDITY--Continued

A mining claim is properly declared null and void where the Government establishes a prima facie case of lack of discovery, and the contestee does not show by a preponderance of the evidence that a discovery has been made.

United States v. Chester L. Ramsey, 29 IBLA 243 (Mar. 25, 1977)

United States v. Wayne E. Highley, 30 IBLA 21 (Apr. 7, 1977)

A discovery of a valuable mineral deposit has been made where minerals have been found and the evidence is of such a character that a person of ordinary prudence would be justified in the further expenditure of his labor and means, with a reasonable prospect of success, in developing a valuable mine.

With respect to materials as common as sand and gravel, a mining claimant must show that by reason of accessibility, bona fides in development, proximity to market, existence of present demand, and other factors, the deposit is of such value that it can be mined, removed and disposed of at a profit, and since common varieties were declared no longer locatable by the Act of July 23, 1955, 30 U.S.C. § 611 (1970), that a reasonably continuous market has existed from enactment of the statute.

United States v. Lloyd O'Callaghan, Sr., et al., 29 IBLA 333 (Mar. 31, 1977)

A mining claim located after Oct. 21, 1976, for which a notice of recordation required to be filed by sec. 314(b) of the Federal Land Policy and Management Act of 1976, has not been filed within 90 days from the date of location is void, and the Department may not accept or give force to a notice of recordation filed after the 90-day period.

Effect of Failure to Record Timely Under Sec. 314(b), Federal Land Policy and Management Act of 1976, M-36889, 84 I.D. 188 (May 17, 1977)

A mining claimant must prove a discovery under the prudent man test, including that the mineral can be extracted, removed and marketed at a profit.

In a contest of a patent application for a lode mining claim, the Board of Land Appeals may remand the case for further hearing to complete the record regarding the (1) availability and expense of necessary financing, land and water, (2) the expense of labor, and (3) the expense of compliance with environmental protection laws.

United States v. Pittsburgh Pacific Co., 30 IBLA 388, 84 I.D. 282 (June 14, 1977)

Although the Government has assumed the burden of proof in mining claim contests of presenting a prima facie case of lack of discovery, once it has done so, the burden shifts to the claimant to prove by a preponderance of the evidence the discovery of a valuable mineral deposit. A prima facie case is established when a Government mineral examiner testifies that she examined the claim and could find no evidence showing the discovery of a valuable mineral deposit.

United States v. Gwendolyn McClure et al., 31 IBLA 8 (June 15, 1977)

MINING CLAIMS--Continued

DETERMINATION OF VALIDITY--Continued

Where the Government contests a mining claim, it has assumed only the burden of going forward with sufficient evidence to establish a prima facie case; the burden then shifts to the claimant to show by a preponderance of the evidence that his claim is valid. Where a Government mineral examiner testifies that he extensively examined the claims and workings thereon, and had assayed numerous samples taken from the claims but found no evidence of a valuable mineral deposit that would support a discovery, a prima facie case of lack of a mineral discovery has been made.

United States v. A. O. Bartell, 31 IBLA 47 (June 23, 1977)

In making a prima facie case of lack of discovery of a valuable mineral deposit, the Government has no duty to do the discovery work for the mining claimant. It is incumbent upon the claimant to keep his discovery points available for inspection. A prima facie case is established when a Government mineral examiner gives his expert opinion that he examined the claim and found insufficient values to support a finding of discovery.

United States v. Emma Elizabeth Conner, and Walter T. Nolte, as the Heirs of R. W. Speer, a Last Known Director of the Arlington Gold Mining Co. (Contestee), 31 IBLA 173 (July 5, 1977)

While a mining location on land totally withdrawn may be declared null and void ab initio without hearing, if a claimant alleges facts which would establish an interest in a claim located prior to the withdrawal, the claim may not be declared null and void ab initio without notice and an opportunity for hearing.

Cajon Minerals, Inc., 31 IBLA 188 (July 5, 1977)

There has been no discovery of a valuable mineral deposit within a mining claim where the evidence provides no basis for a reasonable expectation that minerals from the deposit can be mined, removed and marketed at a profit.

Past evidence of successful mining activity has limited probative value in determining whether there is a present discovery of a valuable mineral deposit on a mining claim, and assay reports can be given little weight when they are not supported by evidence as to who took the sample assayed, where it was taken, and what procedures were followed in taking the sample.

United States v. Lee Nicholson et al., 31 IBLA 224 (July 7, 1977)

Mining claims located for deposits of common varieties of building stone, sand and gravel, if located prior to the Act of July 23, 1955, must be held to be invalid where it is not shown that these materials could have been profitably marketed prior to that date.

Where the Government contests mining claims on a charge of lack of discovery of a valuable mineral deposit prior to the date when such minerals were no longer subject to such location, the Government must initially present sufficient evidence to establish a prima facie case. The burden then shifts to the claimant to show by a preponderance of credible evidence that a discovery has been made on each claim.

Where the expert witnesses called by the Government testify that prior to July 23, 1955, there was no profitable market for common variety minerals from the subject claims and that it would have been economic folly to undertake the development a mine thereon, a prima

MINING CLAIMS--Continued

DETERMINATION OF VALIDITY--Continued

facie case of invalidity has been made. Thereafter, upon the failure of the claimant to prove the contrary by a preponderance of credible evidence, a determination that the claims are invalid is obligatory.

Where the contestee is seeking to validate a group of claims, he must prove that a valuable mineral deposit exists on each individual claim. A showing that all the claims taken as a group satisfy the requirements of discovery is not sufficient.

Where, in a contest to determine the validity of certain mining claims located for common building stone, sand and gravel, the Government charges that the claims were not located prior to the Act of July 23, 1955, which prohibited the subsequent location of such minerals, the finding by the Hearing Examiner and two administrative appellate tribunals that the charge is true and the claims were not timely located requires a holding that the claims are null and void, where such finding is supported by a preponderance of credible evidence.

United States v. Frank and Wanita Melluzzo (Supp. on Judicial Remand), 32 IBLA 46 (Sept. 2, 1977)

Where a mining claim occupies land which has subsequently been withdrawn from the operation of the mining law, the validity of the claim must be tested by the value of the mineral deposit as of the date of the withdrawal, as well as the date of the hearing. If the claim was not supported at the date of the withdrawal by a qualifying discovery of a valuable mineral deposit, the land within its boundaries would not be excepted from the effect of the withdrawal, and the claim could not thereafter become valid even though the value of the deposit thereafter increased due to a change in the market.

Where mining claims occupy land which has subsequently been withdrawn from the operation of the mining laws by a notice of proposed classification, 43 CFR 2461.2, the validity of the claim must be tested as of the date of the published notice, as well as of the date of determination. If the claim was not supported by such a discovery at the date of the published notice of classification, the land within the claim located in the classified area would not be excepted from the effect of the withdrawal.

United States v. E. K. Rodgers and Barbara J. Rodgers, 32 IBLA 77 (Sept. 2, 1977)

In order to establish the existence of a discovery on a lode mining claim, there must be found within the limits of the claim a vein or lode of quartz, or other rock in place, bearing mineral of such quality and quantity that a person of ordinary prudence would be justified in the further expenditure of his labor and means, with a reasonable prospect of success, in developing a paying mine. If more than one claim is contested, evidence establishing the existence, or nonexistence, of a discovery must be shown for each claim.

In mining claim contests, the United States has assumed the burden of establishing a prima facie case that no discovery has been made on the mining claims by the contestee; the burden of proof then shifts to the contestee to show by a preponderance of the evidence that a discovery has been made and still exists within the limits of each mining claim. Evidence which may justify further exploration is insufficient either to establish a discovery or to overcome a prima facie case of lack of discovery.

MINING CLAIMS--Continued

DETERMINATION OF VALIDITY--Continued

A prima facie case of lack of discovery of a valuable mineral deposit is established when a mineral examiner testifies for the United States that he examined each claim and could find no evidence showing the discovery of a valuable mineral deposit.

When a mineral examiner testifies for the United States that a discovery has not been made on a mining claim, his opinion must be based on a proper factual foundation. However, he is not required to perform discovery work, to explore or sample beyond a claimant's workings, or to excavate or rehabilitate any purportedly mineralized area which is concealed by overburden or is otherwise difficult of access. Under proper circumstances, the testimony of the mineral examiner may establish a prima facie case of lack of discovery even though he was not physically on each mining claim.

United States v. Robert A. Bakke (Registered Agent), Valumines, Inc., et al., 32 IBLA 155 (Sept. 12, 1977)

The Secretary of the Interior has the authority to determine the validity of mining claims on any public lands of the United States, including lands within the National Forest System, after adequate notice and opportunity for hearing. A mining claim contest initiated under the authority of the Secretary of the Interior may be prosecuted by counsel employed by the Department of Agriculture acting on behalf of the Forest Service where such action is in accordance with a Memorandum of Understanding between the agencies.

A mining claim will be declared null and void where the Board's de novo review of the evidence submitted at a hearing, held in accordance with the provisions of the Administrative Procedure Act and presided over by an administrative law judge qualified under the Act, establishes that the claimant has not satisfied the requirements of discovery, and there was no error in the conduct of the proceeding.

United States v. Ernest F. Diven and Richard J. T. Anderson, 32 IBLA 361 (Oct. 25, 1977)

In order to establish the existence of a discovery on a lode mining claim, there must be found within the limits of the claim a vein or lode of quartz, or other rock in place, bearing mineral of such quality and quantity that a person of ordinary prudence would be justified in the further expenditure of his labor and means, with a reasonable prospect of success, in developing a paying mine.

Evidence in a mining claim contest showing only that further exploration might be warranted, is insufficient to establish the discovery of a valuable mineral deposit.

United States v. Lewis L. Wetherlin, Gabriele Wetherlin, 33 IBLA 86 (Dec. 8, 1977)

A mining claim located after Oct. 21, 1976, for which a notice of recordation required to be filed by sec. 314(b) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. § 1744) has not been filed within 90 days from the date of location is void, and no force and effect can be given to a notice of recordation filed after the 90-day period.

Southwestern Exploration Associates, 33 IBLA 240 (Dec. 28, 1977)

MINING CLAIMS--Continued

DETERMINATION OF VALIDITY--Continued

Where a mining claim occupies land which has subsequently been withdrawn from the operation of the mining law, the validity of the claim must be tested by the value of the mineral deposit as of the date of the withdrawal, as well as the date of the hearing. If the claim was not supported at the date of the withdrawal by a qualifying discovery of a valuable mineral deposit, the land within its boundaries would not be excepted from the effect of the withdrawal, and the claim could not thereafter become valid even though the value of the deposit thereafter increased due to a change in the market.

Andrew J. Van Derzool et al., 33 IBLA 288 (Jan. 5, 1978)

Where a contest complaint charges that no minerals of a variety subject to the mining laws sufficient in quality, quantity, and value to constitute a discovery are disclosed on a claim, and that the land embraced in the claim is nonmineral in character and the contestee fails to file an answer to the complaint in accordance with departmental regulations, the allegation of the complaint will be taken as admitted by the contestee and the claim is properly held null and void.

United States v. Ronda Biggs and Leslie Biggs, 33 IBLA 290 (Jan. 10, 1978)

The prudent man test cannot be satisfied by a claimant's assertion that he is willing to accept a meager income from the claim. Determination of the validity of a mining claim can rest only on objective criteria, not subjective considerations.

United States v. James Becker, 33 IBLA 301 (Jan. 10, 1978)

United States v. Catherine B. Gay, 36 IBLA 148 (July 31, 1978)

A mining claim located on land which is not subject to mineral entry at the time of location is null and void from its inception. Where a mining claimant states in his notice of location that his mining claims were located on dates subsequent to a withdrawal which included the land encompassed by the mining claim, but indicates in his application for survey that the claims were located prior to the withdrawal, it is proper for the State Office to declare the mining claims null and void on the basis of the information in the notice of location where the claimant failed to submit evidence that the claims were in fact located prior to the withdrawal.

Roy L. Virg-in, 33 IBLA 354 (Jan. 16, 1978)

Failure to record mining claims in accordance with sec. 314 of the Federal Land Policy and Management Act of 1976 is deemed conclusively to constitute abandonment of the claims. Filing the recordation documents in a Bureau of Land Management District Office, rather than in the proper State Office, the day before the expiration of the 90-day statutory deadline for recordation does not constitute timely recordation. In such circumstances, the BLM State Office properly rejected the recordations upon receipt of the documents after the 90-day deadline had passed.

Irwin M. Sweeney, 34 IBLA 205 (Mar. 23, 1978)

A mining claimant must comply both with Federal law and with such State requirements as are not inconsistent with Federal mining provisions.

H. B. Webb, 34 IBLA 362 (May 1, 1978)

What men have or have not done over a period of years is proper evidence as to the conduct of a prudent man in the same or very nearly the same circumstances. Where mining claims had been held for many years and little or no commercial production was achieved on such claims, it may be concluded that no prudent man would have been justified in the belief that the mineral deposit could be developed, extracted, and marketed at a reasonable profit.

United States v. Milton Wichner, 35 IBLA 240 (May 30, 1978)

Mining claims located on lands previously withdrawn from entry under the mining laws are null and void ab initio.

Harry H. Wilson, 35 IBLA 349 (June 19, 1978)

A mining claim located on land which is not subject to mineral entry at the time of location is null and void from its inception. Where a mining claimant states in his notice of location that his mining claims were located on dates subsequent to the filing of an application for withdrawal which included the land encompassed by the mining claim, but indicates on appeal that the claims designated in the notice were merely a "regrouping," of identical claims filed prior to the segregation of the lands, it is nevertheless proper for the State Office to declare the mining claims null and void since mining claims located on withdrawn land are not subject to recordation.

Wilbur G. Hallauer, 36 IBLA 144 (July 26, 1978)

The Secretary of the Interior has the authority to determine the validity of mining claims on any public lands of the United States after adequate notice and opportunity for a hearing. A mining claim contest may be initiated under the authority of the Secretary of the Interior by the Bureau of Land Management at the behest of the Forest Service and prosecuted by counsel employed by the Department of Agriculture, with Forest Service employees as witnesses, where such action is in accordance with a Memorandum of Understanding between the agencies.

United States v. Andrew L. Freese II, 37 IBLA 7 (Sept. 6, 1978)

Under sec. 314(b) of the Federal Land Policy and Management Act of 1976 (FLPMA), 43 U.S.C.A. § 1744 (Supp. 1978), unless the required copy of the official record of location is filed in the proper BLM office within 90 days from the date of location, a mining claim located after Oct. 21, 1976, is void, and any later filing of the notice is invalid.

G. Antolini & Son, 37 IBLA 13 (Sept. 8, 1978)

William E. Rhodes, 38 IBLA 127 (Nov. 22, 1978)

To constitute a discovery on a mining claim, there must be shown to exist minerals of such a character that a person of ordinary prudence would be justified in the further expenditure of his labor and means, with a reasonable prospect of success in developing a profitable mine.

A prima facie case has been made when a Government mineral examiner testifies that he has examined the claim and found evidence of mineralization insufficient to support a finding of a discovery.

United States v. Paul E. Fisher and Pearl E. Fisher, 37 IBLA 80 (Sept. 22, 1978)

Although in certain circumstances a rebuttable presumption of a mining claim's validity may be indulged, the presumption does not arise to support an application for patent of the fee title. The patent applicant is the movant party, and as such it is his obligation to make a satisfactory showing of his entitlement under the law and regulations.

Where a mineral patent application is supported by information sufficient to permit a mineral examination of the claims, but not sufficient for the adjudicator to approve the application for patent, he may properly call on the applicant for supplemental evidence to support the application. However, if the claimant fails to submit it, the adjudicator may not penalize such failure by summary rejection of the application for reasons relating to disputed issues of fact without notice and an opportunity for hearing.

Prattain Contractors, Inc., 37 IBLA 233 (Oct. 18, 1978)

Material which is principally valuable for use as fill, sub-base, ballast, riprap or barrow, for which ordinary earth or rock may be used, is not locatable under the mining laws and was not locatable prior to July 23, 1955.

United States v. Verdugo & Miller, Inc., 37 IBLA 277 (Oct. 20, 1978)

Testimony that a mining claim could not presently be mined economically but may have economic potential and warrants further exploration work is insufficient to satisfy the prudent man test and meet the claimants' burden.

United States v. Loren E. Burns et al., 38 IBLA 53 (Nov. 20, 1978)

The "marketability test"--i.e., to qualify as a valuable mineral deposit, the mineral deposit must be extractable, removable and marketable at a profit--is a complement to the "prudent man rule." The fact that a mineral such as gold possesses intrinsic value does not prevent the application of the marketability test to determine whether the deposit of such a mineral constitutes a discovery of a valuable mineral deposit under the mining laws.

Once the Government has established a prima facie case that no discovery of a valuable mineral deposit has been made within a mining claim, the burden of proof shifts to the contestee to establish by a preponderance of the evidence the existence of a discovery.

United States v. Jack C. Harris, Jill L. Harris, 38 IBLA 137 (Nov. 29, 1978)

MINING CLAIMS--Continued

DETERMINATION OF VALIDITY--Continued

Mining claims located on lands previously withdrawn from entry under the mining laws are null and void ab initio in the absence of a showing that the claimants had a valid existing right to the claims which predates the withdrawal. Where claimants assert that they have simply filed amended notices of location of claims which were first located prior to the withdrawal, but the record indicates that the claims are in fact not the same as those located prior to the withdrawal, there is no valid existing right to the new claims, and they are properly declared null and void ab initio.

Riter Ekker, Kerry Ekker, 38 IBLA 277 (Dec. 13, 1978)

A mining claim located on land which is not subject to mineral entry at the time of location is null and void from its inception.

W. Ted Hackett, 39 IBLA 28 (Jan. 11, 1979)

No discovery of a valuable mineral deposit is demonstrated where the amounts of mineral yielded by a claim are so small that mining could never be expected to produce an economic return in any way commensurate with the labor and cost involved in production.

United States v. Evelyn M. Higgins et al., 39 IBLA 88 (Jan. 26, 1979)

There has been no discovery of a valuable mineral deposit within a lode mining claim unless there has been physically exposed within the limits of the claim the vein or lode-bearing mineral of such quality and quantity as to justify the expenditure of money for the development of a mine and the extraction of the mineral.

In determining whether a claim has been validated by a discovery of a valuable mineral deposit, the Board of Land Appeals adheres to the longstanding distinction between evidence sufficient to warrant only further exploration to find a valuable mineral deposit and that which suffices to prove a discovery of a valuable mineral deposit.

In evaluating a mineral deposit within a mining claim geologic inference may be used where the deposit has been adequately physically exposed. However, geologic inference cannot be used as a substitute for evidence which sufficiently shows the existence of an ore body or bodies necessary to warrant a prudent man to develop a valuable mine; geologic inference may not be used to infer mineralization throughout a vein area where the evidence shows a few spots of high mineralization, but the mineralized areas are spotty and discontinuous.

United States v. George B. Edeline et al., 39 IBLA 236 (Feb. 13, 1979)

Lands which were subject to an oil and gas lease offer on Sept. 20, 1951, were not open to mineral location, and mining claims located on such lands on this date are properly declared null and void in the absence of compliance with the redemption provisions of the Act of Aug. 12, 1953, and the Multiple Mineral Development Act, requiring filing of an amended notice of location prior to Dec. 10, 1953, in the place and manner in which the original notice was of record.

Dorothy Smith, 39 IBLA 306 (Feb. 23, 1979)

MINING CLAIMS--Continued

DETERMINATION OF VALIDITY--Continued

A mining claim located on land previously withdrawn from appropriation under the mining laws is null and void ab initio.

Gerald Byron Hanson, 40 IBLA 162 (Mar. 30, 1979)

Tilden Holloway, Roland Wright, 43 IBLA 138 (Sept. 26, 1979)

Under sec. 314(b) of the Federal Land Policy and Management Act of 1976, 43 U.S.C.A. § 1744 (Supp. 1978), unless the required copy of the official record of location is filed in the proper BLM office within 90 days from the date of location, a mining claim located after Oct. 21, 1976, is void, and any later filing of the notice is invalid.

Lawrence L. Landry, 40 IBLA 212 (Apr. 10, 1979)

Under sec. 314(b) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. § 1744 (1976), and 43 CFR 3833.1-2, the owner of a mining claim located after Oct. 21, 1976, must file a notice of recordation of the claim with the proper Bureau of Land Management office within 90 days of location of the claim. A notice must be received and date stamped in the BLM office within the 90-day period to be timely filed.

R. J. Reeves, 41 IBLA 92 (June 4, 1979)

Carl Cowles, Roy Stewart, 44 IBLA 192 (Nov. 30, 1979)

For a mining claim to be valid there must be a discovery of a valuable mineral deposit within the limits of the claim. There has been a discovery where minerals have been found in sufficient quantity and of sufficient quality that a person of ordinary prudence would be justified in the further expenditure of his labor and means, with a reasonable prospect of success in developing a valuable mine.

Where the land on which the mining claim is located is subsequently withdrawn, the validity of the claim must be determined as of the date of the withdrawal and through the date of the hearing. If there was no discovery as of the date of the withdrawal, the land would not be excepted from the effect of the withdrawal and the claim could not thereafter become valid even though the requirement of discovery was satisfied at a later date.

United States v. William Lance Cherrell et al., 42 IBLA 74 (Aug. 13, 1979)

Where a mining claimant attempts to establish his location of a mining claim containing common variety minerals by invoking the terms of 30 U.S.C. § 38 (1976) and fails to complete the statutory period for holding and working his claim prior to July 23, 1955, BLM may properly hold such claim to be null and void.

Charles Howze, Mrs. Leonard Skinner, 42 IBLA 364 (Sept. 11, 1979)

For the purpose of Departmental adjudication, an amended location is one made in furtherance of an earlier valid location, while a relocation is one which is adverse to the prior location.

An amended location notice generally relates back, where no adverse rights have intervened, to the date of the original location. To the extent, however, that an amended location merely furthers rights acquired by a valid subsisting location and does not embrace additional or new land, withdrawal of land subject to existing rights will not prevent the amended location from relating back to the original location.

Since an amended notice merges with the original notice, the filing of the amended notice, for purposes of recordation under either sec. 8 of the Mining in the Parks Act, 90 Stat. 1342, 1343, 16 U.S.C. § 1907 (1976), or sec. 314 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2744, 2769, 43 U.S.C. § 1744 (1976), together with such other information required by the applicable regulations, constitutes compliance with the recording requirements of those Acts.

Except for claims held under 30 U.S.C. § 38 (1976), a failure to record a mining claim as required by State law, coupled with a withdrawal of the land prior to any curative action, invalidates the claim, and thus precludes subsequent amendment of the claim.

An oral transfer of a mining claim, though contrary to the statute of frauds, will not serve to invalidate the claim, and a person subsequently seeking to record the claim will be afforded the opportunity to prove that the transfer actually occurred.

Where there are factual questions relating to whether action taken subsequent to a withdrawal is in the nature of an amendment or whether it constitutes a relocation, the mineral claimant will be granted the opportunity to show that the subsequent action was a permissible amendment.

R. Gail Tibbetts et al., 43 IBLA 210 (Oct. 5, 1979)
86 I.D. 538

For a mining claim to be valid there must be a discovery of a valuable mineral deposit within the limits of the claim. There has been a discovery where minerals have been found in sufficient quantity and of sufficient quality that a person of ordinary prudence would be justified in the further expenditure of his labor and means, with a reasonable prospect of success in developing a valuable mine.

United States v. John D. Earl et al., 43 IBLA 363 (Oct. 29, 1979)

The collection of a yearly rental pursuant to the provisions of 43 CFR 3825.1(b) for a mining claim situated within the Papago Indian Reservation in no way presages the existence of a valid mining claim based on the discovery of a valuable mineral deposit.

United States v. J. C. Wilson, 44 IBLA 1 (Nov. 6, 1979)

The Secretary of the Interior has the authority to determine the validity of mining claims on any public lands of the United States after adequate notice and opportunity for a hearing. A mining claim contest may be initiated under the authority of the Secretary of the Interior by the Bureau of Land Management at the behest of the U.S. Forest Service and prosecuted by counsel employed by the U.S. Department of Agriculture, with U.S. Forest Service employees as witnesses.

A Government mineral examiner in evaluating a mining claim is not required to perform discovery work, to explore or sample beyond a claimant's workings and it is incumbent upon the mining claimant to keep discovery points available for inspection by a Government mineral examiner. While it is true that under proper circumstances, the testimony of the mineral examiner may establish a prima facie case of lack of discovery even though he was not physically on each mining claim, in the case at bar we need not decide whether a prima facie case was made by contestant since the totality of the evidence establishes invalidity of the claims.

The Board properly adopts a decision of an administrative law judge holding mining claims null and void for lack of discovery of certain minerals, i.e., gold, silver, iron, titanium, feldspar, mica, silica refractory clay, stonework clay, refractory sand and glass, where nondiscovery is established by the totality of the evidence.

United States v. Jon Siemers and Claire Kelly, 44 IBLA 162 (Nov. 30, 1979)

An amended location notice generally relates back to the date of the original location notice, that is, to the extent that an amended location merely furthers rights acquired by a prior subsisting location and does not embrace additional or new land, withdrawal of land subject to existing rights prior to the filing of the amended location and subsequent to the original location will not invalidate the claims.

Where there are factual questions relating to whether refilings subsequent to a withdrawal were in the nature of an "amended locations" or whether they constituted "relocations," the matter must be referred for a hearing to allow the claimant the opportunity to show that subsequent filings have been amended locations, and that it is thus the successor in an unbroken chain of title dating back to the original location.

American Resources, Ltd., 44 IBLA 220 (Dec. 11, 1979)

"Relocation." A relocation of a mining claim is best defined as a location adverse to the prior locations.

"Amended Location." An amended location of a mining claim is best defined as one in furtherance of an earlier, valid location, and a subsequent location referring to the same parcel of land, filed by the same party, changing only the name of the claim, will be deemed an amended location.

An "amended location" generally relates back, where no adverse rights have intervened, to the date of the original location, but where there has been a withdrawal, a subsequent location relates back only to the extent that such a location merely furthers rights acquired by a valid subsisting location and does not embrace additional or new land.

When on appeal from a Bureau of Land Management decision, information is submitted upon which it is alleged that a location relates back to a prewithdrawal location, which information has not been evaluated by BLM, the decision may be set aside and the case remanded.

James C. Knight, 44 IBLA 240 (Dec. 11, 1979)

Under sec. 314 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. § 1744 (1976), and 43 CFR 3833.1-2, the owner of a mining claim located after Oct. 21, 1976, must file a notice of recordation of the claim with the proper Bureau of Land Management office within 90 days of location of the claim. Failure to file such notice shall be deemed conclusively to constitute an abandonment of the mining claim by the owner.

Raymond E. Quigley, 44 IBLA 250 (Dec. 19, 1979)

MINING CLAIMS--Continued

DETERMINATION OF VALIDITY--Continued

When the Government contests a mining claim, located on land withdrawn from mineral entry, the burden of presenting a prima facie case is satisfied by the testimony of a well qualified mineral examiner that he has examined the exposed workings on a claim without finding sufficient mineral values to support a conclusion there was a discovery of a valuable mineral deposit either at the time of the withdrawal or at the time of his inspections.

United States v. Cecilia Faccinelli, 44 IBLA 266 (Dec. 19, 1979)

Where a mineral patent application is supported by a mineral examination of the claim which finds a valid discovery and recommends issuance of a patent for a portion of the claim, the BLM may not summarily reject the application on the face of the record for reasons related to disputed issues of fact without notice and an opportunity for hearing.

Big Horn Calcium Co., 44 IBLA 289 (Dec. 26, 1979)

DISCOVERY

Generally

To constitute a discovery upon a mining claim there must be physically exposed within the limits of the claim minerals in such quality and quantity to warrant a prudent man in expending his labor and means, with a reasonable prospect of success, in developing a valuable mine.

Evidence of mineralization which may justify further exploration, but not development of actual mining operations, is not sufficient to establish that a discovery of a valuable mineral deposit has been made.

United States v. Herbert Clark, 18 IBLA 368 (Jan. 30, 1975)

A discovery exists where minerals have been found within the limits of a claim and the evidence is of such a character that a person of ordinary prudence would be justified in the further expenditure of his labor and means, with a reasonable prospect of success, in developing a valuable mine.

United States v. Gerald E. Heden et al., 19 IBLA 326 (Apr. 7, 1975)

To determine whether there has been a discovery of a valuable mineral deposit within a lode claim there must be exposed within the limits of the claim a vein or lode bearing mineral of such quality and quantity as would induce a prudent man to expend his time and means with the expectation of developing a valuable mine.

United States v. Kinsley Ranch Resort, Inc., et al., 20 IBLA 14 (Apr. 16, 1975)

Where a mining claim occupies land which has subsequently been withdrawn from the operation of the mining law, the validity of the claim must be tested by the value of the mineral deposit as of the date of the withdrawal, as well as the date of determination. If the claim was not supported at the date of the withdrawal by a qualifying discovery of a valuble mineral deposit, the land within its boundaries would not be excepted from the effect of the withdrawal, and the claim could not thereafter become valid even though

MINING CLAIMS--Continued

DISCOVERY--Continued

Generally--Continued

the value of the deposit thereafter increased due to a change in the market.

United States v. E. E. Fleming et al., 20 IBLA 83 (Apr. 28, 1975)

A discovery of a valuable mineral deposit has been made where minerals have been found and the evidence is of such a character that a person of ordinary prudence would be justified in the further expenditure of his labor and means, with a reasonable prospect of success, in developing a profitable mine.

Evidence of mineralization which may justify further exploration, but not development of actual mining operations, is not sufficient to establish that a discovery of a valuable mineral deposit has been made.

United States v. Charles J. McIver et al., 20 IBLA 352 (June 11, 1975)

A discovery of a valuable mineral deposit has been made where minerals have been found and the evidence is of such a character that a person of ordinary prudence would be justified in the further expenditure of his labor and means, with a reasonable prospect of success, in developing a valuable mine.

United States v. C. E. Dallenbach et al., 21 IBLA 256 (Aug. 11, 1975)

United States v. Lloyd O'Callaghan, Sr., et al., 29 IBLA 333 (Mar. 31, 1977)

When the Government contests a mining claim and establishes a prima facie case that contestee has not made a discovery of a locatable mineral deposit, the burden devolves on contestee to establish by a preponderance of the evidence that the claim has been validated by the discovery of a locatable mineral deposit.

Marketability of mineral material is not the sole test of the validity of a mining claim. Profitable sales of mineral material for nonvalidating uses cannot be used in determining the validity of a mining claim; the claimant must meet the prudent man/marketability test in a market for which the material is locatable.

United States v. Thomas D. Robinson, 21 IBLA 363 (Aug. 25, 1975) 82 I.D. 414

Under proper circumstances the Government may establish a prima facie case of lack of discovery of a valuable mineral deposit on a mining claim, even though the Government mineral examiner was not physically present on such claim. Where there is no evidence to rebut the prima facie case, a mining claim may properly be declared null and void.

United States v. Long Beach Salt Co., 23 IBLA 41 (Dec. 3, 1975)

A discovery of a valuable mineral deposit has been made where minerals have been found and the evidence is of such a character that a person of ordinary prudence would be justified in the further expenditure of his labor and means, with a reasonable prospect of success in developing a valuable mine.

Where a mining claim occupies land which has subsequently been withdrawn from the operation of the

MINING CLAIMS--Continued

DISCOVERY--Continued

Generally--Continued

mining law, the validity of the claim must be tested by the value of the mineral deposit as of the date of the withdrawal, as well as the date of the hearing. If the claim was not supported at the date of the withdrawal by a qualifying discovery of a valuable mineral deposit, the land within its boundaries would not be excepted from the effect of the withdrawal, and the claim could not thereafter become valid even though the value of the deposit thereafter increased due to a change in the market.

No discovery of a valuable mineral deposit is demonstrated on a placer mining claim which yields small amounts of gold from stream beds but which is suitable only for recreation mining because it could never be expected to produce an economic return in any way commensurable with the labor and cost involved in such production.

United States v. Ruth Arcand et al., 23 IBLA 226 (Jan. 9, 1976)

A discovery exists where minerals have been found and the evidence is of such a character that a person of ordinary prudence would be justified in the further expenditure of his labor and means, with a reasonable prospect of success in developing a valuable mine.

Where it has been shown as to a number of mining claims located for cinders for which application for patent has been filed, that the amount of the deposits on the claims is excessively large in relation to the market that exists, only those claims can be found valid which by reason of location and volume and quality of deposits would make the most feasible mining operation and have a reasonable prospect of success; the remaining claims must be held invalid for lack of discovery.

United States v. Melvin J. Baker, 23 IBLA 319 (Jan. 19, 1976)

A lode mining claim is properly declared null and void in the absence of a showing of a discovery, on the particular claim, of a lode or vein bearing mineral which would warrant a prudent man in further expenditure of labor and means, with a reasonable prospect of success in developing a valuable mine.

United States v. Bert L. Johnson, 23 IBLA 349 (Jan. 21, 1976)

When the Government contests a mining claim, it has assumed the burden of presenting a prima facie case that the claim is invalid; when it has done so, the burden then devolves on the mining claimant to prove by a preponderance of the evidence that the claim is valid.

In order for a mining claim to be valid, there must be discovered within the limits of the claim a valuable mineral deposit. A discovery exists where minerals have been found and the evidence is of such a character that a person of ordinary prudence would be justified in the further expenditure of his labor and means with a reasonable prospect of success in developing a valuable mine. This test, the prudent man rule, has been refined to require a showing that the mineral in question can be extracted, removed and presently marketed at a profit.

United States v. Robert W. Beal, 23 IBLA 378 (Feb. 4, 1976)

MINING CLAIMS--Continued

DISCOVERY--Continued

Generally--Continued

To constitute a discovery of a valuable mineral deposit under the mining laws, there must be sufficient mineralization shown to warrant a prudent man to invest his time and money with the reasonable expectation of developing a valuable mine.

United States v. George F. Edelins et al., 24 IBLA 34 (Feb. 17, 1976)

Evidence of mineralization which may justify further exploration, but not development of actual mining operations, is not sufficient to establish that a discovery of a valuable mineral deposit has been made.

United States v. Gary C. Fichtner et al., 24 IBLA 128 (Mar. 3, 1976)

Lands within national parks are not subject to mining location except where specifically authorized by law. 43 CFR 3811.2-2. However, lands within a national forest remain open to location and entry under the mining laws. 16 U.S.C. § 478 (1970). Where mining claims occupy land which has subsequently been withdrawn from the operation of the mining laws, the validity of the claim must be tested by the value of the mineral deposit as of the date of the withdrawal, as well as the date of determination. If the claim was not supported at the date of withdrawal for the national park by such a discovery, the land within the claims located in the park would not be excepted from the effect of the withdrawal.

Under Federal law, a valid mining location cannot be made without a discovery of a valuable mineral deposit within the limits of the claim. The longstanding test to determine whether there has been a discovery of a valuable mineral deposit is the "prudent man" test. To meet this test there must be sufficient mineralization within the claims to warrant a man of ordinary prudence to expend his time and means with a reasonable expectation of developing a valuable mine. For a lode claim, there must be tangible proof of the existence of a vein or veins bearing sufficient mineralization to meet the test.

Before a finding of discovery can be warranted, it must be shown as a present fact that the claim is valuable for minerals. Evidence of past profitable mining is not proof the claims are presently profitable. The claim may have been worked out or have lost its value because of change in economic conditions.

High assay samples alone are not evidence of a discovery. The nature of the samples yielding the high values must be considered. Where neither the date of the samples nor the nature of the samples submitted for assay is known, those assays cannot be considered as representative of a valuable mineral deposit within the limits of a mining claim.

A mining claimant's belief in the existence of mineral on a claim is not sufficient to constitute discovery. The prudent man rule imposes an objective standard, and the fact that the claimant may be willing to expend his labor and means is not adequate.

United States v. Wallace W. Yaus, 24 IBLA 289 (Apr. 1, 1976)

MINING CLAIMS--Continued

DISCOVERY--Continued

Generally--Continued

A mining claim contested under sec. 5 of the Surface Resources Act, as amended, 30 U.S.C. § 613 (1970), and a discrete claim contested under the general mining law, will be held subject to the provisions of the Surface Resources Act, and null and void respectively, where the contestees fail to submit evidence which preponderates over the Government's case that a discovery of a valuable mineral deposit has not been made on either claim.

United States v. Sigma Lasch et al., 24 IBLA 354 (Apr. 26, 1976)

Evidence of mineralization which may justify further exploration, but not development of a mine, does not establish the discovery of a valuable mineral deposit.

State mining laws relating to discovery may only add to the Federal mining law; such laws cannot diminish the Federal requirements for the discovery of a valuable mineral deposit on a mining claim located on Federal lands.

United States v. John R. Tappan, Jr., et al., 25 IBLA 1 (May 5, 1976)

The discovery of a "valuable mineral deposit" has been made where minerals have been found and the evidence is of such a character that a person of ordinary prudence would be justified in the further expenditure of his labor and means, with a reasonable prospect of success, in developing a valuable mine.

Evidence which will not justify development of a claim but may justify further exploration is not sufficient to establish that a discovery of a valuable mineral deposit has been made.

United States v. Robert L. Taylor, 25 IBLA 21 (May 5, 1976)

Under the mining law, discovery of a valuable mineral deposit is the sine qua non for a valid mining claim. Even if location of a mining claim appears not to be supported by discovery, a cloud is cast upon the United States' title, which the Government may seek to remove by bringing a contest to determine whether the claim is valid.

The "prudent man" test is the longstanding test to determine whether there has been a discovery of a valuable mineral deposit. To meet this test there must be sufficient mineralization within a claim to warrant a man of ordinary prudence to expend his time and means with a reasonable expectation of developing a valuable mine.

In making a prima facie case of lack of discovery of a valuable mineral deposit, the Government has no duty to do the discovery work for the mining claimant. It is incumbent upon the claimant to keep his discovery points available for inspection. A prima facie case is established when a Government mineral examiner gives his expert opinion that he examined the claim and found insufficient values to support a finding of discovery.

Occasional assay samples of material from a lode mining claim containing high values of gold are not conclusive evidence of a valid discovery. Other factors must be considered, such as the extent of the mineral deposits, the number of samples assayed showing only a trace of mineral, and the nature of the samples yielding the high values. To be meaningful, the samples must be representative of the mineral deposit, not simply selective showings of the best mineralization.

In determining whether there has been a discovery of a valuable mineral deposit under the mining laws, the mere showing of a vein (or veins) carrying some erratic mineral values is not sufficient to establish a valuable mineral deposit where the existence of such a deposit can only be inferred. Geological inferences may only be relied upon in evaluating the extent and potential value of a particular exposed mineral deposit under the prudent man test of discovery and may not be employed as a substitute for the actual finding of a mineral deposit.

Before a finding of discovery of a valuable mineral deposit within a mining claim is warranted, it must be shown as a present fact that the claim is valuable for minerals. Evidence of past profitable mining is not proof the claims are presently profitable. The claim may have been worked out or have lost its value because of change in economic conditions.

Evidence of mineralization which may justify further exploration but not development of actual mining operations is not sufficient to establish that a discovery of a valuable mineral deposit has been made. The prudent man test is objective in nature. Therefore, a claimant's hopes and beliefs are not sufficient reasons to constitute a discovery. The facts must be such as would justify a prudent man to develop the claim.

A previous determination by the Department of the Interior in a proceeding different from a mining claim contest that land was mineral in character is not evidence of a discovery of a valuable mineral deposit in a mining contest.

United States v. Alex Bechtold, 25 IBLA 77 (June 1, 1976)

As a prerequisite for the validity of a lode mining claim, there must be found within the limits of the claim a vein or lode of the quartz, or other rock in place, bearing mineral of such quantity and quality that a prudent person would expend his time and means with a reasonable prospect of success in developing a valuable mine. Evidence which merely shows that further exploration is needed to "discover" the valuable mineral deposit does not meet the prudent man test.

United States v. The American Fluorspar Group, Inc., 25 IBLA 136 (June 7, 1976)

To constitute a discovery upon a mining claim there must be physically exposed within the limits of the claim minerals in such quality and quantity to warrant a prudent man in expending his labor and means with a reasonable prospect of success in developing a valuable mine.

United States v. Gold Placers, Inc., 25 IBLA 368 (July 6, 1976)

A discovery of a valuable mineral deposit has been made where minerals have been found and the evidence is of such a character that a person of ordinary prudence would be justified in the further expenditure of his labor and means with a reasonable prospect of success in developing a valuable mine.

A discovery of a valuable mineral deposit may be lost in many ways including, but not limited to, forgetting

MINING CLAIMS--Continued

DISCOVERY--Continued

Generally--Continued

the situs of the deposit, exhaustion of the deposit, or loss of a market for the mineral.

The prudent man test cannot be satisfied by a claimant's assertion that he is willing to accept a meager income from the claim in order to add to retirement income. Determination of the validity of a mining claim can rest only on objective criteria, not subjective considerations.

United States v. Richard C. Reynders and Carol J. Reynders, 26 IBLA 131 (July 30, 1976)

A lode mining claim is properly declared null and void in the absence of a showing of a discovery on the claim of a lode or vein bearing mineral which would warrant a prudent man to further expend his labor and means in the reasonable expectation of developing a valuable mine.

Evidence of mineralization which may justify further exploration, but not development of actual mining operations, is not sufficient to establish that a discovery of a valuable mineral deposit has been made.

United States v. Ben Hanson, 26 IBLA 300 (Aug. 27, 1976)

United States v. Estate of M. E. Wood, 34 IBLA 44 (Feb. 16, 1978)

In order to constitute a discovery upon a mining claim there must be physically exposed within the limits of the claim minerals in such quality and quantity as to justify a prudent man in the further expenditure of his labor and means, with a reasonable prospect of success, in developing a valuable mine.

A Government mineral examiner in evaluating a mining claim is under no duty to undertake discovery work or to explore beyond the current workings of a claim and it is incumbent upon the mining claimant to keep discovery points available for inspection by a Government mineral examiner.

United States v. Aloys A. Dietemann and Doris A. L. Dietemann, 26 IBLA 356 (Sept. 8, 1976)

A discovery exists where minerals have been found and the evidence is of such a character that a person of ordinary prudence would be justified in the further expenditure of his labor and means with a reasonable prospect of success in developing a valuable mine. Minerals which no prudent person will extract because there is no demand for them at a higher price than the cost of extraction and transportation generally cannot be classed as valuable.

United States v. Arizona Mining and Refining Co., Inc., et al., 27 IBLA 99 (Sept. 29, 1976)

A discovery of a valuable mineral deposit has been made where minerals have been found and the evidence is of such a character that a person of ordinary prudence would be justified in the further expenditure of his labor and means, with a reasonable prospect of success in developing a profitable mine.

MINING CLAIMS--Continued

DISCOVERY--Continued

Generally--Continued

Evidence of mineralization which may justify further exploration, but not development of actual mining operations, is not sufficient to establish that a discovery of a valuable mineral deposit has been made.

When, as a result of direct proceedings against mining claims, the Department determines that no discovery has been made, the claims must be declared null and void notwithstanding that they are located on land patented under the Stock-raising Homestead Act and the contest was privately initiated.

Cabot Sedgwick et al. v. C. E. Parker, 27 IBLA 256 (Oct. 20, 1976)

When the Government has presented a prima facie case of lack of discovery of a valuable mineral deposit on a mining claim, the mining claimant then has the burden of establishing by a preponderance of the evidence that the discovery test has been met. Consequently, the ultimate burden of proving discovery is always upon the mining claimant.

United States v. George J. Hunt and A. P. Goodwin, 29 IBLA 86 (Feb. 23, 1977)

Under the mining law discovery of a valuable mineral deposit is the sine qua non for a valid mining claim. State mining laws relating to discovery may only add to the Federal mining law; such laws cannot diminish the Federal requirements for discovery of a valuable mineral deposit on a mining claim located on Federal lands.

In determining whether there has been a discovery of a valuable mineral deposit under the mining laws on a lode mining claim factors such as the extent of the mineral deposits, the number of samples assayed showing only a trace of mineral, and the nature of the samples yielding the high values must be considered.

United States v. Bradley P. Lemke, 29 IBLA 165 (Mar. 18, 1977)

High assay reports alone are not evidence of a discovery. The nature of the samples yielding the high values must be considered. Where neither the date of the samples nor the nature of the samples submitted for assay is known, those assays cannot be considered as representative of a valuable mineral deposit within the limits of the mining claim.

Reports of substantial mineral discoveries in the general area of contestee's placer claim some 120 years in the past are of little, if any, significance in establishing the existence of a present discovery on the contested claim.

United States v. John L. Maley and James B. Lanel, 29 IBLA 201 (Mar. 22, 1977)

A lode mining claim for barite is properly declared null and void in the absence of a showing of a discovery on the claim of a deposit of barite which would warrant a prudent man in further expending his labor and means in the reasonable expectation of developing a valuable mine. Evidence of mineralization which may justify further exploration is not sufficient to establish that a discovery of a valuable mineral deposit has been made.

United States v. Howard S. McKenzie, 29 IBLA 270 (Mar. 28, 1977)

MINING CLAIMS--Continued

DISCOVERY--Continued

Generally--Continued

A valuable mineral deposit is an accumulation of a valuable mineral in such quantity and such quality that a person would be justified in expending his time and means in a reasonable hope of developing a valuable mine.

Where land occupied by a mining claim has been withdrawn from operation of the mining laws, the validity of the claim must be tested by the value of the mineral deposit as of the date of the withdrawal, as well as of the date of the hearing.

When the Government contests a mining claim on a charge of no discovery, it assumes the burden of going forward with sufficient evidence to establish a prima facie case; then the burden shifts to the claimant to show by a preponderance of the evidence that a discovery has been made and still exists within the limits of the claim.

In applying the prudent man test of discovery, the cost of extraction, processing and transportation to market of the recovered mineral must be considered because these costs bear on whether a person of ordinary prudence would be justified in the further expenditure of his time and means to develop a valuable mine.

United States v. Fred and Eileen Garner, 30 IBLA 42 (Apr. 18, 1977)

A valuable mineral deposit is an accumulation of a mineral in such quantity and such quality that a person would be justified in expending his time and means in a reasonable hope of developing a valuable mine.

Where land occupied by a mining claim has been withdrawn from operation of the mining laws, the validity of the claim must be tested by the value of the mineral deposit as of the date of the withdrawal, as well as of the date of the hearing.

When the Government contests a mining claim on a charge of no discovery, it assumes the burden of going forward with sufficient evidence to establish a prima facie case; then the burden shifts to the claimant to show by a preponderance of the evidence that a discovery has been made and still exists within the limits of the claim.

In applying the prudent man test of discovery, the cost of extraction, processing and transportation to market of the recovered mineral must be considered because these costs bear on whether a person of ordinary prudence would be justified in the further expenditure of his time and means to develop a valuable mine.

Evidence of mineralization which may justify further exploration, but not the development of actual mining operations, is not sufficient to establish that a discovery of a valuable mineral deposit has been made.

United States v. Richard E. Wells, 30 IBLA 333 (June 7, 1977)

A mining claimant must prove a discovery under the prudent man test, including that the mineral can be extracted, removed and marketed at a profit.

In a contest of a patent application for a lode mining claim, the Board of Land Appeals may remand the case for further hearing to complete the record regarding the (1) availability and expense of necessary financing, land and water, (2) the expense of labor, and (3) the expense of compliance with environmental protection laws.

United States v. Pittsburgh Pacific Co., 30 IBLA 388, 84 I.D. 282 (June 15, 1977)

In order to support the validity of a mining claim, the claimant must show that he has discovered a mineral deposit and that the evidence is of such a character that a person of ordinary prudence would be justified in the further expenditure of his labor and means, with a reasonable prospect of success, in developing a paying mine. The fact that some minerals may exist which might justify further exploration on the claim is insufficient to show a discovery of a valuable mineral deposit.

United States v. Gwendolyn McClure et al., 31 IBLA 1 (June 15, 1977)

The "prudent man" test is the longstanding test to determine whether there has been a discovery of a valuable mineral deposit. To meet this test there must be sufficient mineralization within a claim to warrant a man of ordinary prudence to expend his time and means with a reasonable expectation of developing a valuable mine.

In making a prima facie case of lack of discovery of a valuable mineral deposit, the Government has no duty to do the discovery work for the mining claimant. It is incumbent upon the claimant to keep his discovery points available for inspection. A prima facie case is established when a Government mineral examiner gives his expert opinion that he examined the claim and found insufficient values to support a finding of discovery.

United States v. Vera Elizabeth Cooper, and Walter I. Welty, as the Heirs of H. W. Street, a last known director of the Arlington Gold Mining Co. (Contestees), 31 IBLA 173 (July 5, 1977)

There has been no discovery of a valuable mineral deposit within a mining claim where the evidence provides no basis for a reasonable expectation that minerals from the deposit can be mined, removed and marketed at a profit.

Past evidence of successful mining activity has limited probative value in determining whether there is a present discovery of a valuable mineral deposit on a mining claim, and assay reports can be given little weight when they are not supported by evidence as to who took the sample assayed, where it was taken, and what procedures were followed in taking the sample.

United States v. Lee Nicholson et al., 31 IBLA 174 (July 7, 1977)

A discovery of a valuable mineral deposit has been made where minerals have been found and the evidence is of such a character that a person of ordinary prudence would be justified in the further expenditure of his labor and means with a reasonable prospect of success in developing a valuable mine.

When the Government contests a mining claim on a charge of no discovery, it assumes the burden of going forward with sufficient evidence to establish a prima facie case; the burden then shifts to the claimant to show by a preponderance of the evidence that a discovery has

MINING CLAIMS--Continued

DISCOVERY--Continued

Generally--Continued

been made and still exists within the limits of the claim.

United States v. Leslie Harling and William Harling, 32 IBLA 29 (Aug. 31, 1977)

United States v. Clark J. Guild et al., 34 IBLA 387 (May 3, 1978)

United States v. Don Lee Seto and Pauline Seto, 35 IBLA 4 (May 3, 1978)

United States v. John A. Cooley, 43 IBLA 276 (Oct. 15, 1979)

Where the contestee is seeking to validate a group of claims, he must prove that a valuable mineral deposit exists on each individual claim. A showing that all the claims taken as a group satisfy the requirements of discovery is not sufficient.

United States v. Frank and Wanita Melluzzo (Supp. on Judicial Remand), 32 IBLA 46 (Sept. 2, 1977)

Where a mining claim occupies land which has subsequently been withdrawn from the operation of the mining law, the validity of the claim must be tested by the value of the mineral deposit as of the date of the withdrawal, as well as the date of the hearing. If the claim was not supported at the date of the withdrawal by a qualifying discovery of a valuable mineral deposit, the land within its boundaries would not be excepted from the effect of the withdrawal, and the claim could not thereafter become valid even though the value of the deposit thereafter increased due to a change in the market.

Where mining claims occupy land which has subsequently been withdrawn from the operation of the mining laws by a notice of proposed classification, 43 CFR 2461.2, the validity of the claim must be tested as of the date of the published notice, as well as of the date of determination. If the claim was not supported by such a discovery at the date of the published notice of classification, the land within the claim located in the classified area would not be excepted from the effect of the withdrawal.

The "marketability rule" requiring a demonstration of present marketability at a profit is (and always has been) applicable to all mining claims, whether for base metals or for precious minerals.

A locator of a mining claim on public land has taken only the initial step in seeking to secure a gratuity from the Government and obtains no rights against the United States until there has been a discovery of a valuable mineral deposit within the limits of the claim.

United States v. R. E. Rodgers and Barbara J. Rodgers, 32 IBLA 77 (Sept. 2, 1977)

In order to establish the existence of a discovery on a lode mining claim, there must be found within the limits of the claim a vein or lode of quartz, or other rock in place, bearing mineral of such quality and quantity that a person of ordinary prudence would be justified in the further expenditure of his labor and means, with a reasonable prospect of success, in developing a paying mine. If more than one claim is contested, evidence

establishing the existence, or nonexistence, of a discovery must be shown for each claim.

When land is withdrawn from the operation of the mining laws subject to valid existing rights, such as by the creation of the North Cascades National Park on Oct. 2, 1968, the validity of a mining claim located prior to the withdrawal must be established as of the date of the withdrawal as well as of the date of the hearing.

United States v. Robert A. Bykke (Registered Agent), Valumines, Inc., et al., 32 IBLA 155 (Sept. 12, 1977)

A discovery of a valuable mineral deposit has been made where minerals have been found within the limits of a claim and the evidence is such that a person of ordinary prudence would be justified in the further expenditure of his labor and means in a reasonable prospect of success in developing a valuable mine.

When the Government contests a mining claim on a charge of no discovery, it has by practice assumed the burden of going forward with sufficient evidence to establish a prima facie case; when it has done so, the burden shifts to the claimant to show by a preponderance of the evidence that a discovery has been made and still exists within the limits of the claim.

A Government mineral examiner in evaluating a mining claim is under no duty to undertake discovery work or to explore beyond the current workings of a claim and it is incumbent upon the mining claimant to keep discovery points available for inspection by a Government mineral examiner.

Proposed testimony of a witness as to the procedures that would be followed by a person in private industry in making a complete evaluation of a mining claim is properly excluded as irrelevant because it does not have a logical relation to the type of an examination made by a Government mineral examiner to establish the facts on which the validity or invalidity of a mining claim may be determined.

United States (Contestant) v. Earl Frisco and Sandra S. Young (Contestees), 32 IBLA 248 (Sept. 21, 1977)

A discovery of a valuable mineral deposit has been made where minerals have been found and the evidence is of such a character that a prudent person would be justified in the further expenditure of his labor and means, with a reasonable prospect of success in developing a valuable mine.

United States v. John C. Morton et al., 32 IBLA 263 (Sept. 27, 1977)

The fact that some minerals exist which might justify further exploration on the claim is insufficient to show a valuable mineral deposit.

In applying the prudent man test of discovery, the cost of extraction, processing and transportation to market of the recovered mineral must be considered because these costs bear on whether a person of ordinary prudence would be justified in the further expenditure of his time and means to develop a valuable mine.

United States v. Ernest F. Liven and Richard J. S. Anderson, 32 IBLA 361 (Oct. 25, 1977)

MINING CLAIMS--Continued

DISCOVERY--Continued

Generally--Continued

In order to establish the existence of a discovery on a lode mining claim, there must be found within the limits of the claim a vein or lode of quartz, or other rock in place, bearing mineral of such quality and quantity that a person of ordinary prudence would be justified in the further expenditure of his labor and means, with a reasonable prospect of success, in developing a paying mine.

Evidence in a mining claim contest showing only that further exploration might be warranted, is insufficient to establish the discovery of a valuable mineral deposit.

When land is withdrawn from the operation of the mining laws subject to valid existing rights, such as the Organ Pipe Cactus National Monument on Sept. 28, 1976, the validity of a mining claim located prior to the withdrawal must be established as of the date of the withdrawal as well as of the date of the hearing.

United States v. Lewis L. Wetherlin, Gabriele Wetherlin, 33 IBLA 86 (Dec. 8, 1977)

A discovery of a valuable mineral deposit has been made where minerals have been found within the limits of a claim and the evidence is such that a person of ordinary prudence would be justified in the further expenditure of his labor and means in a reasonable prospect of success in developing a valuable mine.

Mineralization that only warrants further prospecting or exploration in an effort to ascertain whether sufficient mineralization might be found to justify mining or development does not constitute a valuable mineral deposit, *i.e.*, a valuable mineral deposit has not been found simply because the facts might warrant a search for such a deposit.

When the Government contests a mining claim on a charge of no discovery, it has by practice assumed the burden of going forward with sufficient evidence to establish a prima facie case; when it has done so, the burden shifts to the claimant to show by a preponderance of the evidence that a discovery has been made and still exists within the limits of the claim.

A Government mineral examiner in evaluating a mining claim is under no duty to undertake discovery work or to explore beyond the current workings of a claim and it is incumbent upon the mining claimant to keep discovery points available for inspection by a Government mineral examiner.

United States v. Beatrice Ann Johnson, 33 IBLA 121 (Dec. 19, 1977)

A Government mineral examiner, versed in mining engineering and/or geology is qualified to evaluate a mining claim for a particular mineral even though he does not possess specific experience as to that mineral.

United States v. Doris Conger Caldwell, 33 IBLA 153 (Dec. 19, 1977)

A discovery of a valuable mineral deposit has been made where minerals have been found and the evidence is of such a character that a person of ordinary prudence would be justified in the further expenditure of his labor and means with a reasonable prospect of success in developing a valuable mine.

When the Government contests a mining claim on a charge of no discovery, it assumes the burden of going forward with sufficient evidence to establish a prima facie case; the burden then shifts to the claimant to show by a preponderance of the evidence that a discovery has been made and still exists within the limits of the claim.

Where a mining claim occupies land which has subsequently been withdrawn from the operation of the mining law, the validity of the claim must be tested by the value of the mineral deposit as of the date of the withdrawal, as well as the date of the hearing. If the claim was not supported at the date of the withdrawal by a qualifying discovery of a valuable mineral deposit, the land within its boundaries would not be excepted from the effect of the withdrawal, and the claim could not thereafter become valid even though the value of the deposit thereafter increased due to a change in the market.

Andrew J. Van Derpoel et al., 33 IBLA 288 (Jan. 5, 1978)

A discovery of a valuable mineral deposit is not made unless minerals have been found on a claim, the evidence of them is of such a character that a person of ordinary prudence would be justified in the further expenditure of his labor and means with a reasonable prospect of success in developing a valuable mine, and the deposit may be perceived by a prudent man as susceptible to extraction, removal and marketing at a reasonable profit.

The prudent man test cannot be satisfied by a claimant's assertion that he is willing to accept a meager income from the claim. Determination of the validity of a mining claim can rest only on objective criteria, not subjective considerations.

United States v. James Becker, 33 IBLA 301 (Jan. 10, 1978)

Where the Government contests a mining claim for lack of discovery, it assumes only the burden of making a prima facie showing that discovery is lacking, and the burden of showing a valuable discovery by a preponderance of the evidence then falls upon the claimants.

A valuable discovery of a mineral deposit is established where a claimant, by a preponderance of the evidence, establishes the presence of mineralization which would justify a prudent man in expending his labor, time, and money on the claim with an expectation of developing a valuable mine.

United States of America v. David L. King et al., 34 IBLA 15 (Feb. 10, 1978)

United States v. Roger and Stephanie Cichetti, 36 IBLA 124 (July 25, 1978)

A Government mineral examiner has no duty to explore beyond the claimant's current workings to verify a mineral discovery.

To establish a discovery, a claimant must show more than that a prudent man would explore the claim further. The claimant must show that a valuable mineral deposit has been physically exposed, and may not rely on the mere speculation that a valuable deposit will be exposed somewhere on the claim.

To satisfy the prudent man test, it must be shown that the expected returns from working a mining claim are commensurate with the compensation an ordinary person would expect from his labor. The subjective willingness of a claimant to subsist on a substandard income in order to work the claim does not satisfy the test where the claimant received welfare payments and grew his own food in order to survive.

United States v. Michael Slater, 34 IBLA 31 (Feb. 14, 1978)

A discovery of a valuable mineral deposit has been made where minerals have been found and the evidence is of such a character that a person of ordinary prudence would be justified in the further expenditure of his labor and means with a reasonable prospect of success in developing a valuable mine.

When the Government contests a mining claim on a charge of no discovery, it assumes the burden of going forward with sufficient evidence to establish a prima facie case; the burden then shifts to the claimant to show by a preponderance of the evidence that a discovery has been made and still exists within the limits of the claim.

Where land is withdrawn from the operation of the mining laws subsequent to the location of a mining claim, the validity of the claim cannot be recognized unless the claim was supported by a valid discovery at the time of the withdrawal. In addition, even though there may have been a proper discovery at the time of a withdrawal or at some other time in the past, a mining claim cannot be considered valid unless the claim is at present supported by a sufficient discovery. The loss of the discovery, either through exhaustion of the minerals, changes in economic conditions, or other circumstances, results in the loss of the location.

United States v. Milton Wichner, 35 IBLA 240 (May 30, 1978)

A discovery exists only where minerals have been found in quantities such that a person of ordinary prudence would be justified in the further expenditure of his labor and means with the reasonable expectation of developing a valuable mine.

When the Government through the testimony of an expert mineral examiner has alleged a lack of valuable mineralization, the burden of showing the contrary by a preponderance of the evidence shifts to the contestees.

Isolated showings of high sample values and assays will not, without more, support a claim of discovery.

United States v. Richard B. Kingdon and Edith F. Kingdon, 36 IBLA 11 (June 27, 1978)

Where a Government mineral examiner testifies that he has examined a mining claim and found the mineral values insufficient to support a finding of discovery, a prima facie case of invalidity has been established. Where the claimant presents evidence of returns which are so meager that they will not attract the labor and means of a person of ordinary prudence, he has failed to prove by a preponderance of the evidence that his claim is valid, and it is properly declared null and void.

United States v. Joseph Larsen and Ferris Larsen. 36 IBLA 130 (July 25, 1978)

A discovery of a valuable mineral deposit has been made where minerals have been found and the evidence is of such a character that a person of ordinary prudence would be justified in the further expenditure of his labor and means with a reasonable prospect of success in developing a valuable mine.

When the Government contests a mining claim on a charge of no discovery, it assumes the burden of going forward with sufficient evidence to establish a prima facie case; the burden then shifts to the claimant to show by a preponderance of the evidence that a discovery has been made and still exists within the limits of the claim.

The prudent man test cannot be satisfied by a claimant's assertion that he is willing to accept a meager income from the claim. Determination of the validity of a mining claim can rest only on objective criteria, not subjective considerations.

This Department has authority and jurisdiction to contest mining claims on the ground that they are invalid for lack of a discovery of a valuable mineral deposit, regardless of whether any other use of the land is being made or sought. The motivation of the Forest Service in instigating a contest is irrelevant.

United States v. Catherine E. Gay. 36 IBLA 148 (July 31, 1978)

Discovery of a valuable mineral deposit has been made where minerals have been found and the evidence is of such a character that a person of ordinary prudence would be justified in the further expenditure of his labor and means, with a reasonable prospect of success, in developing a valuable mine.

When the Government contests a mining claim on a charge of lack of discovery of a valuable mineral deposit, it has assumed the burden of going forward with sufficient evidence to establish a prima facie case; the burden then shifts to the claimant to show by a preponderance of the evidence that a discovery has been made.

Where a Government mineral examiner testifies that he has examined a claim and found the mineral values insufficient to support a finding of discovery, a prima facie case of validity has been established. Government mineral examiners are not required to perform discovery work for claimants or to explore beyond a claimant's workings.

United States v. Florence J. Mattox, 36 IBLA 171 (July 31, 1978)

United States v. Emmett C. Harder, 42 IBLA 206 (Aug. 22, 1979)

A discovery of a valuable mineral deposit is not made unless minerals have been found on a claim, the evidence is of such a character that a person of ordinary prudence would be justified in the further expenditure of his labor and means with a reasonable prospect of success in developing a valuable mine, and the deposit may be perceived by a prudent man as susceptible to extraction, removal and marketing at a reasonable profit.

United States v. Wesley C. Miles, Sr., 36 IBLA 213 (Aug. 3, 1978)

MINING CLAIMS--Continued

DISCOVERY--Continued

Generally--Continued

In a mining claim contest, no weight will be given to claimant's allegation that the Government's mineral examiner failed to sample the discovery point or the best mineral showings, where the claimant was invited to indicate his discovery to the examiner and failed to do so, and where he also failed to introduce convincing evidence of his own that a discovery had been made.

A Government mineral examiner in evaluating a mining claim is under no duty to undertake discovery work or to explore beyond the current workings of a claim and it is incumbent upon the mining claimant to keep discovery points available for inspection by a Government mineral examiner.

United States v. Larry Joseph Tipp, 36 IBLA 316 (Aug. 23, 1978)

Mineralization that only warrants further prospecting or exploration in an effort to ascertain whether sufficient mineralization might be found to justify mining or development does not constitute a valuable mineral deposit, *i.e.*, a valuable mineral deposit has not been found simply because the facts might warrant a search for such a deposit.

United States v. Clayton A. Dillman and Jean E. Dillman, 36 IBLA 358 (Aug. 31, 1978)

When the Government contests a mining claim on a charge of no discovery, it has by practice assumed the burden of going forward with sufficient evidence to establish a prima facie case; the burden then shifts to the claimant to show by a preponderance of the evidence that a discovery has been made and still exists within the limits of the claim.

United States v. Andrew L. Freese II, 37 IBLA 7 (Sept. 6, 1978)

In mining claim contest, Government must only go forward with evidence to establish prima facie case of no discovery of valuable mineral deposits, and burden then shifts to mining claimant to prove by preponderance of evidence that his claim is valid.

Where contestee has not produced substantial evidence in respect to quantity of iron oxide ore existing on claims, or in respect to whether ore can be extracted and marketed at profit, contestee has not proved that person of ordinary prudence would be justified in further expenditure of his labor and means, with reasonable prospect of success, in developing valuable mine.

United States v. Michael D. Marion, 37 IBLA 68 (Sept. 18, 1978)

To constitute a discovery on a mining claim, there must be shown to exist minerals of such a character that a person of ordinary prudence would be justified in the further expenditure of his labor and means, with a reasonable prospect of success in developing a profitable mine.

A Government mineral examiner in determining the validity of a mining claim need only examine the claim to verify whether the claimants have made a discovery and is not required to perform discovery work, to explore or sample beyond the claimants' workings, or to rehabilitate alleged discovery cuts to establish the Government's prima facie case.

United States v. Paul P. Fisher and Ruel E. Fisher, 37 IBLA 80 (Sept. 22, 1978)

A discovery exists only where minerals have been found in such quantities that a person of ordinary prudence would be justified in the further expenditure of his labor and means with the reasonable expectation of developing a valuable mine.

When the Government through the testimony of an expert mineral examiner has alleged a lack of valuable mineralization, the burden of showing the contrary by a preponderance of the evidence shifts to the contestees.

The value of common varieties of sand and gravel not locatable under the mining laws cannot be considered in the evaluation of the value of placer gold to determine whether there has been a discovery of a valuable deposit of gold on a contested mining claim, where it is clear that the mineral claimants made no discovery of a valuable mineral deposit prior to July 23, 1955.

United States v. Gaylord Lambeth et al., 37 IBLA 107 (Sept. 29, 1978)

The Government has established a prima facie case of a lack of discovery, thus shifting the burden of proving a discovery onto the mining claimant, when an expert witness testifies that he has examined the claim and has found the mineral values insufficient to support a finding of discovery.

It is incumbent upon the mining claimant, not the Government's mineral examiner, to do that amount of work which is necessary to discovery a valuable mineral deposit.

Assay reports have limited probative value as to the existence of a valuable mineral deposit on a mining claim when they are not supported by evidence as to how and where the samples were taken.

United States v. John S. Porter, 37 IBLA 313 (Oct. 25, 1978)

A discovery of a valuable mineral deposit has been made where minerals have been found in sufficient quantity and quality that a person of ordinary prudence would be justified in the further expenditure of his labor and means, with a reasonable prospect of success in developing a valuable mine.

Testimony that a mining claim could not presently be mined economically but may have economic potential and warrants further exploration work is insufficient to satisfy the prudent man test and meet the claimants' burden.

United States v. Loren E. Burns et al., 38 IBLA 57 (Nov. 20, 1978)

The Government is entitled to determine whether a valuable mineral deposit exists on a mining claim, in order to decide whether to initiate a contest complaint challenging the validity of the claim, prior

MINING CLAIMS--Continued

DISCOVERY--Continued

Generally--Continued

to the completion of mineral exploration by the mining claimant.

United States v. Lost Polack Mining Ass'n, 38 IBLA 101 (Nov. 20, 1978)

The "marketability test"--i.e., to qualify as a valuable mineral deposit, the mineral deposit must be extractable, removable and marketable at a profit--is a complement to the "prudent man rule." The fact that a mineral such as gold possesses intrinsic value does not prevent the application of the marketability test to determine whether the deposit of such a mineral constitutes a discovery of a valuable mineral deposit under the mining laws.

United States v. Jack C. Harris, Jill L. Harris, 38 IBLA 137 (Nov. 29, 1978)

A discovery exists only where minerals have been found in quantities such that a person of ordinary prudence would be justified in the further expenditure of his labor and means with the reasonable expectation of developing a valuable mine.

A prudent man would be justified in expending his labor and means in developing an unpatented mining claim only where it appears that the mineralization on the claim in question is valuable enough to yield a fair market value in excess of the costs of its extraction, removal, and sale.

When the Government through the testimony of an expert mineral examiner has alleged a lack of valuable mineralization, the burden of showing the contrary by a preponderance of the evidence shifts to the contestees.

Isolated showings of high assay values will not suffice to establish a discovery, especially where the claimants have attempted little or no development of the alleged mineral discovery.

The sale of decorative building stone from the surface of a lode mining claim cannot support a claimant's contention that a valuable mineral discovery has been made on such lode claim, decorative stone being locatable only under the provisions of the placer mining laws, 30 U.S.C. § 161 (1976), and only where such stone is shown to be an "uncommon variety" within the meaning of 30 U.S.C. § 611 (1976).

United States v. Frank and Wanita Melluzzo, 38 IBLA 214 (Dec. 7, 1978) 85 I.D. 441

To determine whether there has been a discovery of a valuable mineral deposit within a lode claim there must be exposed within the limits of the claim a vein or lode bearing mineral of such quality and quantity as would induce a prudent man to expend his time and means with the expectation of developing a valuable mine.

Evidence of mineralization which may justify further exploration, but not development of a mine, does not establish the discovery of a valuable mineral deposit.

No discovery of a valuable mineral deposit is demonstrated where the amounts of mineral yielded by a claim are so small that mining could never be expected to produce an economic return in any way commensurate with the labor and cost involved in production.

United States v. Evelyn M. Kiggins et al., 39 IBLA 88 (Jan. 26, 1979)

MINING CLAIMS--Continued

DISCOVERY--Continued

Generally--Continued

There has been no discovery of a valuable mineral deposit within a lode mining claim unless there has been physically exposed within the limits of the claim the vein or lode-bearing mineral of such quality and quantity as to justify the expenditure of money for the development of a mine and the extraction of the mineral.

In determining whether a claim has been validated by a discovery of a valuable mineral deposit, the Board of Land Appeals adheres to the longstanding distinction between evidence sufficient to warrant only further exploration to find a valuable mineral deposit and that which suffices to prove a discovery of a valuable mineral deposit.

In evaluating a mineral deposit within a mining claim geologic inference may be used where the deposit has been adequately physically exposed. However, geologic inference cannot be used as a substitute for evidence which sufficiently shows the existence of an ore body or bodies necessary to warrant a prudent man to develop a valuable mine; geologic inference may not be used to infer mineralization throughout a vein area where the evidence shows a few spots of high mineralization, but the mineralized areas are spotty and discontinuous.

United States v. George B. Edeling et al., 39 IBLA 236 (Feb. 13, 1979)

The purpose of 30 U.S.C. § 38 (1976) whereby a person or association may establish a right to patent lands which said person or association has held and worked for a period equal to the statute of limitations is to obviate the necessity of proving formal compliance with requirements for locating a claim, but not to dispense with proof of discovery.

United States v. Leroy S. Johnson et al., 39 IBLA 337 (Feb. 28, 1979)

A placer mining claim is valid only where there has been discovered within the limits of the claim a valuable mineral deposit.

After the Government, through expert testimony of its mineral examiner, has made a prima facie showing that no discovery exists, the burden of going forward with a preponderance of evidence to the contrary falls upon contestees.

United States v. Cecil F. Ross, Jr., 40 IBLA 169 (Apr. 3, 1979)

The Government has established a prima facie case of a lack of discovery, thus shifting the burden of going forward, when an expert witness testified that he has examined the claim and has found the mineral value insufficient to support a finding of discovery.

Mineralization that only warrants further prospecting or exploration in an effort to ascertain whether sufficient mineralization might be found to justify mining or development does not constitute a valuable mineral deposit, i.e., a valuable mineral deposit has not been found simply because the facts might warrant a search for such a deposit.

To establish a discovery of a valuable mineral deposit, a claimant must show more than that a prudent man would explore the claim further. The claimant must show that

MINING CLAIMS--Continued

DISCOVERY--Continued

Generally--Continued

a valuable mineral deposit has been physically exposed within the limits of the claim.

United States v. Tempest Mining Co., 40 IBLA 297 (Apr. 27, 1979)

A Government mineral examiner in evaluating a mining claim is under no duty to undertake discovery work or to explore beyond the current workings of a claim and it is incumbent upon the mining claimant to keep discovery points available for inspection by a Government mineral examiner.

Mineralization that only warrants further prospecting or exploration in an effort to ascertain whether sufficient mineralization might be found to justify mining or development does not constitute a valuable mineral deposit.

United States v. Dan S. Russell, 40 IBLA 309 (Apr. 30, 1979)

For a mining claim to be valid there must be a discovery of a valuable mineral deposit within the limits of the claim. There has been a discovery where minerals have been found in sufficient quantity and of sufficient quality that a person of ordinary prudence would be justified in the further expenditure of his labor and means, with a reasonable prospect of success in developing a valuable mine.

The "prudent man test" is met only where it appears that the mineralization on the claim has been physically exposed and is valuable enough to yield a fair market value in excess of the costs of extraction, removal, and sale. Evidence of mineralization which would justify further exploration, but not development, does not suffice to meet the discovery requirement.

Where the land on which the mining claim is located is subsequently withdrawn, the validity of the claim must be determined as of the date of the withdrawal and through the date of the hearing. If there was no discovery as of the date of the withdrawal, the land would not be excepted from the effect of the withdrawal and the claim could not thereafter become valid even though the requirement of discovery was satisfied at a later date.

United States v. William Lavon Chappell et al., 42 IBLA 74 (Aug. 13, 1979)

Discovery of a valuable mineral deposit has been made where minerals have been found and the evidence is of such a character that a person of ordinary prudence would be justified in the further expenditure of his labor and means, with a reasonable prospect of success, in developing a valuable mine.

Where a Government mineral examiner testifies that he has examined a claim and found the mineral value insufficient to support a finding of discovery, a prima facie case of invalidity has been established. Government mineral examiners are not required to perform discovery work for claimants nor to explore beyond a claimant's workings.

When the Government contests a mining claim on a charge of lack of discovery of a valuable mineral deposit, it has assumed the burden of going forward with sufficient evidence to establish a prima facie case; the burden then shifts to the claimant to show by a preponderance of the evidence that a discovery has been made.

Discovery of gold sufficient to support a mining claim must be made on the claim itself, notwithstanding discovery of gold on nearby land which might persuade a reasonable prospector to continue his search for a valuable mineral deposit on the claim.

United States v. Edward T. McHenry et al., 43 IBLA 122 (Sept. 26, 1979)

A discovery of valuable mineral exists where the claim contains mineralization of sufficient quality and quantity to justify further expenditure of labor and means, with a reasonable prospect of success in developing a valuable mine.

When the Government contests a mining claim on a charge of lack of discovery, the Government has the burden of proving a prima facie case; the burden then shifts to the mining claimant to prove by a preponderance of the evidence that discovery exists.

Minute amounts of mineralization may justify further exploration without establishing discovery.

United States v. Ted G. Ax, 43 IBLA 146 (Sept. 26, 1979)

For a mining claim to be valid there must be a discovery of a valuable mineral deposit within the limits of the claim. There has been a discovery where minerals have been found in sufficient quantity and of sufficient quality that a person of ordinary prudence would be justified in the further expenditure of his labor and means, with a reasonable prospect of success in developing a valuable mine.

The "prudent man test" is met only where it appears that the mineralization on the claim has been physically exposed and is valuable enough that with actual mining operations under proper management a profitable venture may reasonably be expected to result.

Assay reports have limited probative value as to the existence of a valuable mineral deposit on a mining claim when they are not supported by evidence as to how and where the samples were taken.

United States v. John R. Port et al., 43 IBLA 363 (Oct. 29, 1979)

A discovery of valuable mineral exists where the claim contains mineralization of sufficient quality and quantity to justify further expenditure of labor and means, with a reasonable prospect of success in developing a valuable mine.

When the Government contests a mining claim on a charge of lack of discovery, the Government has the burden of proving a prima facie case; the burden then shifts to the mining claimant to prove by a preponderance of the evidence that discovery exists.

When land is withdrawn from mining location after a mining claim has been located thereon, the claimant must show that discovery of a valuable mineral deposit occurred *prior* to the withdrawal in order to establish rights against the Government.

United States v. Ralph Page et al., 43 IBLA 390 (Oct. 31, 1979)

MINING CLAIMS--Continued

DISCOVERY--Continued

Generally--Continued

A discovery of a valuable mineral deposit has been made where locatable minerals have been found within the limits of a claim and the evidence is such that a person of ordinary prudence would be justified in the further expenditure of his labor and means in a reasonable prospect of success in developing a valuable mine.

When the Government contests a mining claim on a charge of no discovery, it has by practice assumed the burden of going forward with sufficient evidence to establish a prima facie case; when it has done so, the burden shifts to the claimant to show by a preponderance of the evidence that a discovery has been made and still exists within the limits of the claim.

United States v. Jon Ziemers and Claire Kelly, 44 IBLA 142 (Nov. 30, 1979)

When the Government contests a mining claim on a charge of no discovery of a valuable mineral deposit it assumes the burden of going forward with sufficient evidence to establish a prima facie case; when it has done so, the burden shifts to the claimant to show by a preponderance of the evidence that a discovery has been made and still exists within the limits of the claim.

Mineralization that only warrants further prospecting or exploration in an effort to ascertain whether sufficient mineralization might be found to justify mining or development does not constitute a valuable mineral deposit, i.e., a valuable mineral deposit has not been found simply because the facts might warrant a search for such a deposit.

It is incumbent upon the mining claimant, not the Government's mineral examiner, to do that amount of work which is necessary to discover a valuable mineral deposit.

United States v. Knox-Arizona Corp., 44 IBLA 297 (Dec. 31, 1979)

Geologic Inference

Nonrepresentative mineral samples alone cannot prove the existence of valuable mineralization exposed within a vein. If, however, other evidence establishes such mineralization, the samples may be given some weight to support geological inferences of the value of a lode mining claim.

United States v. Kinsley Ranch Resort, Inc., et al., 20 IBLA 14 (Apr. 16, 1975)

Geologic inference alone cannot support a determination under the mining laws that a discovery of a valuable mineral deposit has been made. The claimant must actually expose a valuable mineral deposit physically within the limits of the claim.

United States v. Wallace W. Vaux, 24 IBLA 289 (Apr. 1, 1976)

United States v. Richard R. Wells, 30 IBLA 333 (June 7, 1977)

MINING CLAIMS--Continued

DISCOVERY--Continued

Geologic Inference--Continued

In determining whether there has been a discovery of a valuable mineral deposit under the mining laws, the mere showing of a vein (or veins) carrying some erratic mineral values is not sufficient to establish a valuable mineral deposit where the existence of such a deposit can only be inferred. Geological inferences may only be relied upon in evaluating the extent and potential value of a particular exposed mineral deposit under the prudent man test of discovery and may not be employed as a substitute for the actual finding of a mineral deposit.

United States v. Alex Bechthold, 25 IBLA 77 (June 1, 1976)

Geological inferences may not alone be used to establish a discovery of a valuable mineral deposit, but if there is a showing of sufficient mineralization and there is satisfactory evidence to support such inferences, they may be used as a basis for estimating the probable extent and value of the mineral deposit.

United States v. The American Fluorspar Group, Inc., 25 IBLA 136 (June 7, 1976)

In evaluating a mineral deposit within a mining claim geologic inference may be used where the deposit has been adequately physically exposed. However, geologic inference cannot be used as a substitute for evidence which sufficiently shows the existence of an ore body or bodies necessary to warrant a prudent man to develop a valuable mine; geologic inference may not be used to infer mineralization throughout a vein area where the evidence shows a few spots of high mineralization, but the mineralized areas are spotty and discontinuous.

United States v. George B. Edeline et al., 39 IBLA 236 (Feb. 13, 1979)

Marketability

The Surface Resources Act of July 23, 1955, declared that common varieties of sand and gravel are not valuable mineral deposits under the mining laws. In order for a claim for such material to be sustained as validated by a discovery, the prudent man/marketability test of discovery of a valuable mineral deposit must have been met at the date of the Act, and reasonably continuously thereafter.

The marketability refinement of the prudent man test of discovery requires that the mineral locator must show that by reason of accessibility, bona fides in development, proximity to market, existence of present demand, and other factors, the mineral deposit is of such value that it can be mined, removed and disposed of at a profit.

In making a prima facie case in a mining contest involving a common variety of material, it is only essential for the Government to establish that the contestees had not prior to July 23, 1955, met the criteria used in determining marketability at a profit. It is not essential that the Government's evidence prove conclusively that the material could not, in fact, be marketed at a profit, but only that it was not sold or marketed. The Government is not required to do the discovery work upon a mining claim; it is only necessary that the exposed areas of a claim and the workings on a claim be examined to verify if a discovery has been made by the mining claimant.

In determining the marketability of a common variety of sand and gravel from a mining claim, the possibility that the material could be sold for purposes for which ordinary earth may be used may not be considered, as such purposes are not validating uses cognizable under the mining laws.

A mining claim located for a common variety of gravel prior to the Surface Resources Act of July 23, 1955, cannot be sustained as being held as a reserve for the gravel deposit where the claimants had not established a discovery under the marketability test at that time. The "reserve rule" is not a substitute for discovery. A mining claimant's desire to hold a claim in hope that there will be an increase in the market demand and price does not satisfy the marketability test.

A conjectural opinion on the possibility of a mining claimant's ability to market a common variety of gravel at a profit prior to July 23, 1955, is not credible evidence of marketability where specific evidence tends to show that development of a mining operation at that time was not then warranted by the marketplace conditions.

United States v. Clarion W. Taylor, Sr., and Gerald O'Connor, 19 IBLA 9 (Feb. 20, 1975) 82 I.D. 68

A lack of sales of a mineral of widespread occurrence, such as sand and gravel, may raise a presumption that there was no demand for the mineral during that time, and, hence, the material was not marketable. The presumption may be overcome with credible evidence to the contrary or by bona fides in development.

United States v. C. V. Hallenbeck et al., 21 IBLA 296 (Aug. 11, 1975)

A bog iron ore deposit does not meet the prudent man/ marketability test where the evidence shows that contestee could only develop the iron deposit for sale for metallurgical uses after further exploration to establish a higher grade or greater tonnage of ore, or upon future favorable developments in the iron ore market.

United States v. Theresa E. Robinson, 21 IBLA 363 (Aug. 25, 1975) 82 I.D. 414

Where the Government has presented a prima facie case that a claimed mineral is a common variety pumice and further that the pumice was not marketable at a profit as of July 23, 1955, the burden of showing by a preponderance of the evidence either that the mineral is an uncommon variety or that it was marketable as of July 23, 1955, devolves upon the mineral claimants.

A deposit of pumice is not an uncommon variety of pumice merely because it can presently be mined, removed and marketed at a profit. Rather, a mining claimant who asserts discovery of pumice must show that the deposit has a distinct and special value over other marketable deposits of pumice.

United States v. C. Fred Underwood et al., 22 IBLA 62 (Sept. 18, 1975)

Material which is suitable only for fill purposes, road based, or comparable uses is not locatable under the mining laws, and even if the material is suitable for other purposes, its sale for the above uses cannot be considered in determining its marketability to establish the value of the deposit as mineral. By the same token, it is improper to consider the market demand for such uses for the purpose of determining what volume of mineral material a prudent locator might claim in the reasonable anticipation of market demand for legitimate mineral uses in the foreseeable future, reasonably projected.

United States v. Melton E. Baker, 23 IBLA 319 (Jan. 19, 1976)

Where a mining claimant fails to submit adequate evidence as to the expected quantity and specifications of the local demand for industrial quality feldspar, does not receive any payment for inferior quality feldspar attempted to be sold for industrial use, and does not establish that the local market demand would justify the costs of developing a mill capable of processing industrial quality feldspar from the subject claim, the mining claimant has failed to satisfy the prudent man-marketability test which requires a showing that a reasonable prospect of success in developing a valuable mine exists. Where the anticipated costs and revenues of an alleged profitable mining operation are not based on reliable probative evidence, but only on mere speculation, a mining claim cannot be found valid.

United States v. Robert W. Beal, 23 IBLA 378 (Feb. 4, 1976)

The testimony of a qualified geologist and professional mining evaluation engineer concerning the marketability of a deposit of sand and gravel at a particular time may be accorded substantial evidentiary weight under the standard in *Verrue* v. *United States*, 457 F.2d 1202 (9th Cir. 1972), if it is established that he was in the area at the time, had studied the local sand and gravel market and the factors which affected it, as well as the nature of the material and the methods and costs of removing, processing and marketing it.

Material which is principally valuable for use as fill, sub-base or ballast, for which ordinary earth or rock may be used, is not locatable under the mining laws, and even if the material is suitable for other purposes, its value for the above uses cannot be considered in determining its marketability as a valuable mineral deposit within the ambit of the general mining law.

In a contest of a mining claim located for common variety mineral materials prior to July 23, 1955, after which such locations were proscribed by law, where there has been no mining and no sales, the test of the validity of the claim is whether the claimant(s) could have mined and marketed the material profitably prior to that date and thereafter. The evidence tending to so show must relate to what a prudent man would have been reasonably justified in doing based upon the actual known circumstances at the time, not upon what he might have done if the proper conditions had then prevailed.

In determining whether a profitable market existed for material from a particular mining claim from which no material has been sold, a hypothetical market must be created in which the new material plays its part. The new material from the claim at issue must be included with that from all other known potentially competitive sources in calculating the factor of supply. If the supply so calculated amounts to a superabundance and so overwhelms the existing demand as to reduce the value or profit increment to a level below that which would prove attractive to a prudent man, the material cannot be said to be marketable at a profit.

United States v. J. R. Osborne et al. (Supp., On Judicial Remand), 28 IBLA 13 (Nov. 8, 1976)

MINING CLAIMS--Continued

DISCOVERY--Continued

Marketability--Continued

With respect to materials as common as sand and gravel, a mining claimant must show that by reason of accessibility, bona fides in development, proximity to market, existence of present demand, and other factors, the deposit is of such value that it can be mined, removed and disposed of at a profit, and since common varieties were declared no longer locatable by the Act of July 23, 1955, 30 U.S.C. § 611(1970), that a reasonably continuous market has existed from enactment of the statute.

United States v. Lloyd O'Callaghan, Sr., et al., 29 IBLA 333 (Mar. 31, 1977)

A prima facie case has been established when a Government mineral examiner testifies that he has examined the mining claim and found the evidence of mineralization insufficient to support a finding of discovery of a valuable mineral deposit. The fact that there may be a market for limestone from the mining claim at some future date under altered economic conditions is not sufficient to meet the marketability test of discovery.

United States v. Doris Conger Caldwell, 33 IBLA 153 (Dec. 19, 1977)

Establishing the marketability of a mineral deposit requires more than a showing that the mineral is theoretically marketable or intrinsically valuable. The claimant must demonstrate present continuing demand for the output of his mine.

It is not sufficient to show that attempts are being made to explore possible markets or to promote the utilization of the mineral. Past sporadic sales do not establish a market.

United States v. Michael Slater, 34 IBLA 31 (Feb. 14, 1978)

In order to demonstrate a discovery of a valuable mineral, one must prove by a preponderance of the evidence the presence of minerals that would justify a prudent man in the expenditure of his labor and means with the reasonable prospect of success in developing a paying mine.

A mineral claimant whose claim embraces deposits of both common and uncommon varieties of minerals cannot aggregate the profits returned from mining the common variety and those netted from mining the uncommon variety to show marketability.

United States v. Margaret Mansfield, 35 IBLA 95 (May 15, 1978)

What men have or have not done over a period of years is proper evidence as to the conduct of a prudent man in the same or very nearly the same circumstances. Where mining claims had been held for many years and little or no commercial production was achieved on such claims, it may be concluded that no prudent man would have been justified in the belief that the mineral deposit could be developed, extracted, and marketed at a reasonable profit.

United States v. Milton Wichner, 35 IBLA 240 (May 30, 1978)

MINING CLAIMS--Continued

DISCOVERY--Continued

Marketability--Continued

Where contestee has not produced substantial evidence in respect to quantity of iron oxide ore existing on claims, or in respect to whether ore can be extracted and marketed at profit, contestee has not proved that person of ordinary prudence would be justified in further expenditure of his labor and means, with reasonable prospect of success, in developing valuable mine.

United States v. Michael P. Marion, 37 IBLA 68 (Sept. 18, 1978)

Material which is principally valuable for use as fill, sub-base, ballast, riprap or barrow, for which ordinary earth or rock may be used, is not locatable under the mining laws and was not locatable prior to July 23, 1955.

United States v. Verdugo & Miller, Inc., 37 IBLA 277 (Oct. 20, 1978)

ENVIRONMENT

In a contest of a patent application for a lode mining claim, the Board of Land Appeals may remand the case for further hearing to complete the record regarding the (1) availability and expense of necessary financing, land and water, (2) the expense of labor, and (3) the expense of compliance with environmental protection laws.

When parties are to offer evidence as to costs, to a mining claimant, of measures required by statute or regulation to mitigate environmental impact from development of a mine, it would be helpful for a Government contestant to assist an intervening State government and the claimant in computation of such costs; however, under 42 U.S.C. § 4332 (1970), an environmental impact statement is not required prior to the nondiscretionary Federal action of issuance of a mineral patent.

United States v. Pittsburgh Pacific Co., 30 IBLA 388 (June 15, 1977) 84 I.D. 282

EXCESS RESERVES

Material which is suitable only for fill purposes, road based, or comparable uses is not locatable under the mining laws, and even if the material is suitable for other purposes, its sale for the above uses cannot be considered in determining its marketability to establish the value of the deposit as mineral. By the same token, it is improper to consider the market demand for such uses for the purpose of determining what volume of mineral material a prudent locator might claim in the reasonable anticipation of market demand for legitimate mineral uses in the foreseeable future, reasonably projected.

Where it has been shown as to a number of mining claims located for cinders for which application for patent has been filed, that the amount of the deposits on the claim is excessively large in relation to the market that exists, only those claims can be found valid which by reason of location and volume and quality of deposits would make the most feasible mining operation and have a reasonable prospect of success; the remaining claims must be held invalid for lack of discovery.

United States v. Melton E. Baker, 23 IBLA 319 (Jan. 15, 1976)

MINING CLAIMS--Continued

HEARINGS

When one whose application for patent for a mining claim has been rejected requests a hearing to present evidence on the controlling issues of fact involved in the rejection of the application, such request must be granted.

Estate of Arthur C. W. Bowen (Deceased), 18 IBLA 379 (Jan. 30, 1975)

While a mining contest is within the jurisdiction of an administrative law judge, he may reopen the hearing for the production of further evidence before he makes his decision.

In determining the validity of a mining claim in a Government contest, the entire evidentiary record must be considered; therefore, if evidence presented by the contestees shows that there has not been a discovery, it may be used in reaching a decision that the claim is invalid because of a lack of discovery, regardless of any defects in the Government's prima facie case.

Where a contestee in a mining contest preponderates sufficiently to overcome the Government's prima facie case on an issue raised by the evidence in a mining contest and there is no evidence on other essential disputed issues, the contest should be dismissed unless a patent application is being contested, in which case a further hearing must be ordered to resolve other essential issues to determine whether the application may be allowed.

United States v. Clarion W. Taylor, Sr., and Gerald O'Connor, 19 IBLA 9 (Feb. 20, 1975) 82 I.D. 68

In connection with a mining claim located on land withdrawn for reclamation and power purposes, where (1) no notice of location was filed during a later period in which the land was open for entry subject to 30 U.S.C. §§ 621, 623-24 (1970), (2) there are no intervening rights, (3) a claimant alleges that he held and worked the land, while open to entry, for the requisite number of years under 30 U.S.C. § 38 (1970) and the applicable State statute of limitations, and (4) he alleges that a discovery of a valuable mineral deposit has been made, it is necessary to consider the effect of § 621 *et seq.*, and to hold a hearing if required to resolve questions of fact.

Ralph Page, 19 IBLA 255 (Mar. 31, 1975)

Evidence submitted on appeal after an initial decision in a mining contest may not be considered or relied upon in making a final decision but may only be considered to determine if there should be a further hearing.

A further hearing in a mining contest may be ordered where the particular circumstances so warrant it.

United States v. Howard S. McKenzie, 20 IBLA 38 (Apr. 17, 1975)

Where at a hearing held pursuant to sec. 2 of the Mining Claims Rights Restoration Act, 30 U.S.C. § 621(b) (1970), the mining claimant, prior to the taking of any evidence, enters into a stipulation while laboring under confusion as to the effect of the stipulation, and the stipulation legally precludes all forms of placer mining on his claim, the decision below relying on the stipulation will be reversed and the case remanded for a full hearing on the merits.

Dwight Brooks, 20 IBLA 100 (Apr. 25, 1975)

MINING CLAIMS--Continued

HEARINGS--Continued

Evidence tendered on appeal from an adverse decision in a mining claim contest cannot be considered except for the limited purpose of deciding whether a further hearing is warranted. However, such evidence will only be considered if accompanied by a cogent explanation of why it was not tendered at the hearing.

United States v. Charles J. MacIver et al., 20 IBLA 352 (June 11, 1975)

United States v. C. F. Hallenbeck et al., 21 IBLA 296 (Aug. 11, 1975)

In a mining claim contest, the claimant is the proponent of the rule or order that he has complied with the provisions of the mining law, which have been brought into issue, and the Government bears the burden only of presenting a prima facie case of invalidity; the claimant must then preponderate on the issues litigated.

Where the hearing record in a mining claim contest is unsatisfactory, a "stipulation" on another issue may have prevented the introduction of evidence relevant to the issue on appeal, the parties will not be unduly burdened, and further proceedings will likely be productive of relevant evidence, the Board may remand the case for additional hearing.

United States v. Ed Brandt, 21 IBLA 166 (July 22, 1975)

A determination that land was known to be valuable for minerals leasable under the Mineral Leasing Act of Feb. 25, 1920, 30 U.S.C. § 181 *et seq.* (1970), at the time mining claims for such land were located, will be upheld where there has been a hearing on the question and the mining claimant has failed to produce evidence to overcome such a classification.

United States v. Long Beach Salt Co., 23 IBLA 41 (Dec. 2, 1975)

Evidence offered on appeal from an initial decision by an administrative law judge after a hearing in a mining contest may not be considered or relied upon in making a final decision but may only be considered to determine if there should be a further hearing.

A further hearing may be ordered in a mining contest where the record is unsatisfactorily confusing and conflicting on the issue of quantity of minerals to satisfy the discovery test, a request for the rehearing has been made with an offer of proof which tends to show a new hearing might result in a different finding, and there has been no objection to the request.

United States v. George B. Edeling et al., 24 IBLA 34 (Feb. 17, 1976)

Evidence tendered on appeal from an adverse decision in a mining claim contest cannot be considered except for the limited purpose of deciding whether a further hearing is warranted.

United States v. Carl C. Fichtner et al., 24 IBLA 128 (Mar. 3, 1976)

MINING CLAIMS--Continued

HEARINGS--Continued

The Board of Land Appeals may set aside a previous Departmental decision, which declared mining claims invalid for lack of discovery, and remand the case for a further hearing, where contestee submitted a Petition for Reconsideration with affidavits alleging that, since the hearing, the claims have been mined by lessees who have approximately 10,000 tons of minable ore blocked out with assays averaging from 6 to 8 pounds of mercury per ton of ore.

United States v. Evelyn M. Higgins et al., 24 IBLA 187 (Mar. 18, 1976)

A mining claim contested under sec. 5 of the Surface Resources Act, *as amended*, 30 U.S.C. § 613 (1970), and a discrete claim contested under the general mining law, will be held subject to the provisions of the Surface Resources Act, and null and void respectively, where the contestees fail to submit evidence which preponderates over the Government's case that a discovery of a valuable mineral deposit has not been made on either claim.

United States v. Signa Lauch et al., 24 IBLA 354 (Apr. 26, 1976)

Evidence tendered on appeal from adverse decision in a mining claim contest can only be considered for the limited purpose of deciding whether a further hearing is warranted.

United States v. Robert L. Taylor, 25 IBLA 21 (May 5, 1976)

A request for a hearing pursuant to 43 CFR 4.415 for the purpose of taking testimony on the Bureau of Land Management's "continued refusal" to restore land in a reclamation withdrawal to entry will be denied. An appeal from a decision declaring mining claims and millsites null and void ab initio because the lands are in the withdrawal may not serve as the vehicle for petitioning the Secretary of the Interior to revoke the withdrawal. Furthermore, even if the withdrawal were revoked and the lands opened to entry, this action could not revive mining claims which were void when located while the withdrawal was in effect and the land closed to entry under the mining laws.

J. P. Hinds et al., 25 IBLA 67 (June 1, 1976)
83 I.D. 275

Where the Government fails to present a prima facie case, a contestee, upon timely motion, may move to dismiss the case and then rest. If, however, he goes forward and presents evidence, that evidence will be considered as part of the entire evidentiary record. Therefore, even if the Government has failed to make a satisfactory prima facie case, or the case is weak, contestee's evidence may be used against him to establish that case. Furthermore, where contestee chooses to rebut the case, he must do so by a preponderance of the evidence, bearing the risk of nonpersuasion if he fails.

United States v. Alex Bechthold, 25 IBLA 77 (June 1, 1976)

MINING CLAIMS--Continued

HEARINGS--Continued

In proceedings before the Department to determine the validity of a mining claim, notice and an opportunity for a hearing pursuant to the Administrative Procedure Act are required only where there is a disputed question of fact; where the validity of a claim turns on the legal effect to be given facts of record concerning the status of the land when the claim was located, no hearing is required.

Beverly Troll, 25 IBLA 157 (June 10, 1976)

David Loring Gamble, Darrel Douglas, 26 IBLA 249 (Aug. 18, 1976)

The right to a hearing on disputed issues of fact involving mining claims includes the right to adequate notice of the grounds upon which a claim's invalidity is asserted.

A Government contest complaint which asserts the invalidity of a claim because of insufficient quantity and quality of the located mineral within the limits of the claim does not put into issue the existence of excess reserves within the limits of a claim.

Where the alleged ground of invalidity of a claim was not charged in the complaint, and was not a matter of contention at the hearing, invalidation of the claim on such ground is improper, despite some evidence to support it, absent an opportunity for the contestee to present evidence on such issue where it appears that there is other pertinent evidence that may be submitted on that issue.

Where on appeal from a decision sustaining the Government's challenge of a patent application it is determined that the alleged ground of invalidity was one not raised in the complaint or at the hearing, the decision rejecting the patent application will be set aside and the Government will be afforded an opportunity to amend its complaint to embrace the charge. Where the Government does amend its complaint the mineral claimant will be granted the right to an evidentiary hearing on such issue.

United States v. Robert E. McElwaine, 26 IBLA 20 (July 7, 1976)

Evidence tendered on appeal from an adverse decision in a mining claim contest cannot be considered in the absence of a compelling showing that it could not be tendered at the hearing, and even then such evidence may only be considered for the purpose of determining whether a rehearing is warranted.

United States v. Richard C. Reynders and Carol J. Reynders, 26 IBLA 131 (July 30, 1976)

The fact that assessment work has been performed on a mining claim does not estop the Government from determining the validity of a claim by proper proceedings giving adequate notice and an opportunity for a hearing where there are disputed determinative facts. However, where the claim was located after land has been withdrawn from mining, it is proper for the Bureau of Land Management to declare a claim null and void ab initio without a hearing.

Roy B. Cummins, 26 IBLA 223 (Aug. 17, 1976)

MINING CLAIMS--Continued

HEARINGS--Continued

A petition to reopen a hearing for submission of further evidence will be denied when the contestee offers no valid justification for the neglect to offer the evidence, which was or could have been available at the original hearing.

United States v. Don Hanson, 26 IBLA 300 (Aug. 27, 1976)

In a mining claim contest where the evidence of a valuable mineral deposit, submitted by contestee at a hearing, bearing on the validity of a mining claim, has greater probative weight than that offered by the Government, it is proper to find that contestee has preponderated and to dismiss, without prejudice, the complaint alleging no discovery of a valuable mineral deposit.

United States v. Arizona Mining and Refining Co., Inc., et al., 27 IBLA 99 (Sept. 29, 1976)

In a proceeding before the Department to determine the validity of a mining claim, notice and an opportunity for an evidentiary hearing is required only where there is a disputed question of fact; where the validity of a claim turns on the legal effect to be given facts of record concerning the status of the land when the claim was located, no hearing is required.

W. A. Todd, A. E. Johnson, 28 IBLA 180 (Dec. 1, 1976)

David Budinski et al., 31 IBLA 139 (June 30, 1977)

Evidence tendered on appeal from a mining contest may only be considered for the limited purpose of determining whether a further hearing is warranted.

United States v. George J. Hunt and A. M. Goodwin, 29 IBLA 86 (Feb. 23, 1977)

Evidence tendered on appeal from an adverse decision in a mining claim contest can only be considered to determine whether a further hearing on the contest should be granted. Where the appellant shows no substantial equitable basis for holding such a hearing and where no substantial expectation appears to exist that such a hearing would produce more conclusive evidence on the issue, a further hearing will not be ordered.

United States v. Bradley F. Denham, 29 IBLA 185 (Mar. 18, 1977)

Where the Government mineral examiner in a mining claim contest concludes that the claim at issue contains no valuable mineral deposit, and his opinion is based on a sampling taken from a point on the claim indicated by one of the contestees, this opinion will suffice to establish a prima facie case of no discovery and thus will shift the burden of proof onto the contestees.

Evidence tendered for the first time on appeal will be considered only for the limited purpose of determining whether a further hearing is indicated and will be received for that limited purpose only where there is a cogent and convincing reason why such evidence was not submitted at the original hearing.

United States v. John L. Maley and James I. Fagel, 29 IBLA 201 (Mar. 22, 1977)

MINING CLAIMS--Continued

HEARINGS--Continued

In a Government contest challenging the validity of mining claims located for a clay-type material, an adequate prima facie case is established where there are expert witness opinions that the deposit is only a common clay or shale and it cannot meet refractory standards. The contestees then must go forward with evidence to rebut the Government's case with a preponderance of the evidence.

United States v. Thomas J. Peck et al., 29 IBLA 357 (Mar. 31, 1977) 84 I.D. 137

Where land occupied by a mining claim has been withdrawn from operation of the mining laws, the validity of the claim must be tested by the value of the mineral deposit as of the date of the withdrawal, as well as of the date of the hearing.

The Government has established a prima facie case when a mineral examiner testifies that he has examined a mining claim and has found the mineral values insufficient to support a finding of discovery.

United States v. Fred and Eileen Garner, 30 IBLA 42 (Apr. 18, 1977)

A mining claim located on land withdrawn from location under the mining laws is null and void ab initio--without legal effect from the beginning. Such a mining claim may properly be declared null and void without a hearing where the records of the Department of the Interior show that the land was withdrawn from the operation of the United States mining laws at the time the claim was located.

Charles B. Nielsen, Pauline Nielsen, 30 IBLA 235 (May 26, 1977)

James Messano, 35 IBLA 383 (June 23, 1978)

Where land occupied by a mining claim has been withdrawn from operation of the mining laws, the validity of the claim must be tested by the value of the mineral deposit as of the date of the withdrawal, as well as of the date of the hearing.

The Government has established a prima facie case when a mineral examiner testifies that he has examined a mining claim and has found the mineral values insufficient to support a finding of discovery.

Evidence tendered for the first time on appeal will be considered only for the limited purpose of determining whether a further hearing should be held.

United States v. Richard P. Walls, 30 IBLA 333 (June 7, 1977)

The Government has established a prima facie case when a mineral examiner testifies that he has examined a mining claim and has found the mineral values insufficient to support a finding of discovery.

United States v. Leslie Harling and William Harling, 32 IBLA 29 (Aug. 31, 1977)

United States (Contestant) v. Earl Frisco and Sandra L. Young (Contestees), 32 IBLA 248 (Sept. 21, 1977)

Andrew J. Van Derpoel et al., 33 IBLA 248 (Jan. 5, 1978)

United States v. Clark J. Guild et al., 34 IBLA 387 (May 3, 1978)

Continued--

MINING CLAIMS--Continued

HEARINGS--Continued

United States v. Don Lee Seto and Pauline Seto, 35 IBLA 4 (May 3, 1978)

United States v. Michael P. Marion, 37 IBLA 68 (Sept. 18, 1978)

United States v. John A. Cooley, 43 IBLA 276 (Oct. 15, 1979)

The rule of evidence excluding hearsay is not strictly adhered to in administrative proceedings, particularly where the evidence, such as assay reports with a proper foundation concerning the sampling, submission of the samples for assaying, and the reputation of the assayer, is competent and relevant. After such reports are admitted, the factfinder may give them appropriate weight according to the circumstances surrounding the specific report.

United States v. Robert A. Bukke (Registered Agent), Valumines, Inc., et al., 32 IBLA 155 (Sept. 12, 1977)

A mining claim will be declared null and void where the Board's de novo review of the evidence submitted at a hearing, held in accordance with the provisions of the Administrative Procedure Act and presided over by an administrative law judge qualified under the Act, establishes that the claimant has not satisfied the requirements of discovery, and there was no error in the conduct of the proceeding.

The Government has established a prima facie case when a mineral examiner testifies that he has examined a mining claim and has found the mineral values insufficient to support a finding of discovery.

United States v. Ernest F. Diven and Richard J. T. Anderson, 32 IBLA 361 (Oct. 25, 1977)

When a mining claim located in the Papago Indian Reservation is declared invalid for failure to pay annual rental timely, and that fact is not disputed, a hearing is not required as there are no issues of fact involved but only of law.

Louis D. Ellsworth, Jr., 33 IBLA 26 (Nov. 22, 1977)

The Government has established a prima facie case when a mineral examiner testifies that he has examined a mining claim and has found the mineral values insufficient to support a finding of discovery.

A second hearing will not be afforded where a claimant was given notice and an opportunity to appear at a hearing, where she actually was represented at the hearing, and where nothing has been submitted which suggests that another hearing would produce a different result.

United States v. Beatrice Ann Johnson, 33 IBLA 121 (Dec. 19, 1977)

Where the Government contests a mining claim for lack of discovery, it assumes only the burden of making a prima facie showing that discovery is lacking, and the burden of showing a valuable discovery by a preponderance of the evidence then falls upon the claimants.

United States of America v. David L. King et al., 34 IBLA 15 (Feb. 10, 1978)

United States v. Roger and Stephanie Cichetti, 36 IBLA 124 (July 25, 1978)

MINING CLAIMS--Continued

HEARINGS--Continued

In some cases due process requires not that a person have notice and a prior hearing before a deprivation of property, but that an individual be given notice and an opportunity for a hearing before the deprivation of property becomes final.

In proceedings before the Department to determine the validity of a mining claim, notice and an opportunity for a hearing is required only where there is a disputed question of fact; where the validity of a claim turns on the legal effect to be given facts of record concerning the status of the land when the claim was located, no hearing is required.

H. P. Webb, 34 IBLA 362 (May 1, 1978)

When the United States contests a mining claim for lack of discovery of a valuable mineral deposit, a crucial date for the existence or nonexistence of the discovery is the date of the hearing. Where a mining claimant has shown no justification for her failure to offer evidence of a discovery at the hearing nor shown any likelihood that further evidence could be presented to change the result, a request on appeal for additional time to explore the claim for additional evidence of minerals will be denied, and an administrative law judge's decision declaring the claim null and void will be affirmed.

United States v. Thelma C. Crismon, 34 IBLA 381 (May 2, 1978)

Appellant may not use appeal to Board or request for hearing under 43 CFR 4.415 as vehicle for petitioning Secretary of the Interior to have withdrawal revoked and land restored to entry.

Harry D. Wilson, 35 IBLA 349 (June 19, 1978)

The Government has established a prima facie case of nondiscovery when a mineral examiner testifies that he has examined a mining claim and has found the mineral values insufficient to support a finding of discovery.

United States v. Catherine E. Gay, 36 IBLA 148 (July 31, 1978)

Evidentiary submissions on appeal can be considered only for the limited purpose of determining whether a further hearing should be granted. The record established at the hearing in a mining claim contest is the sole basis for determining the validity of a claim.

There is not a sufficient equitable basis for reopening a hearing in a mining contest because of an alleged fire to the contestee's home 3 days before the scheduled hearing where neither she nor her attorney who had entered an appearance in the case requested a postponement of the hearing or a continuation of the hearing after it had been held. Also, a further hearing will not be ordered merely to afford a claimant an additional opportunity to explore and make a discovery of a valuable mineral deposit.

United States v. Florence J. Mattox, 36 IBLA 171 (July 31, 1978)

MINING CLAIMS--Continued

HEARINGS--Continued

A second hearing will not be afforded generally where a claimant was given notice and an opportunity to appear at a hearing, where he did appear and was represented at the hearing, and where nothing has been submitted which suggests that another hearing would produce a different result.

United States v. Andrew L. Freese II, 37 IBLA 7 (Sept. 6, 1978)

The Government has established a prima facie case of a lack of discovery, thus shifting the burden of proving a discovery onto the mining claimant, when an expert witness testifies that he has examined the claim and has found the mineral values insufficient to support a finding of discovery.

United States v. John S. Porter, 37 IBLA 313 (Oct. 25, 1978)

A second hearing will not be afforded where a mining claimant has submitted nothing which suggests that another hearing would produce a different result, *i.e.*, a finding that a valuable mineral deposit has been discovered on a mining claim. Assertions that further mineral examination would prove the existence of such a deposit and that such a deposit exists on adjacent land, without more, do not entitle the claimant to another hearing.

United States v. Lost Polack Mining Ass'n, 38 IBLA 101 (Nov. 2[illegible], 1978)

As the Government is required to adjudicate mining claims contests under its own rules and regulations, a customary review of the validity of a claim by a district examining committee is immaterial to the adjudication of the actual validity of the claim. Local customs relating to validity of a claim may only add to the Federal mining law; such customs cannot replace Federal requirements for adjudicating the validity of claims.

United States v. Russ Knecht, 39 IBLA 8 (Jan. 8, 1979)

The Government has established a prima facie case of a lack of discovery, thus shifting the burden of going forward, when an expert witness testified that he has examined the claim and has found the mineral value insufficient to support a finding of discovery.

United States v. Tempest Mining Co., 40 IBLA 297 (Apr. 27, 1979)

Two mining claims, located at a time when the land is withdrawn from mineral entry, may be properly declared null and void ab initio without a hearing. Such a result obtains despite reference to a location notice prior to the withdrawal where appellants do not make a showing of sufficient specific facts upon which to predicate a hearing, including which of the claims the previous location relates to, the boundaries thereof, whether the previous location was for a locatable mineral under a withdrawal order then in force, and the name of the previous locator.

The Heirs of M. K. Harris, 42 IBLA 44 (July 31, 1979)

MINING CLAIMS--Continued

HEARINGS--Continued

It was proper to deny mining claimants' request to redrill on mining claims after the land was withdrawn from mining where the work would be an effort to make a discovery of a valuable mineral deposit within the claim rather than simply a confirmation or corroboration of a discovery prior to the withdrawal.

United States v. William Lavon Chappell et al., 42 IBLA 74 (Aug. 13, 1979)

A second hearing will not be afforded where a mining claimant had notice of and appeared at the first hearing and no evidence has been submitted suggesting another hearing would produce a different result.

Failure to obtain counsel at a hearing into the validity of a mining claim will afford the mining claimant no greater rights on appeal than if he had obtained counsel.

United States v. Howard C. Long, Dolores F. Fillice, 43 IBLA 150 (Sept. 28, 1979)

The rule of evidence excluding hearsay is not strictly adhered to in administrative proceedings, particularly where the evidence, such as assay reports with a proper foundation concerning the sampling, submission of the samples for assaying, and the reputation of the assayer, is competent and relevant. After such reports are admitted, the factfinder may give the appropriate weight according to the circumstances surrounding the specific report. However, it is not improper to exclude an assay report where neither the assayer nor the sample-taker testifies concerning its origins, and no other foundation is laid for its introduction.

United States v. John E. Burt et al., 43 IBLA 363 (Oct. 29, 1979)

A continuance of a hearing into the validity of a mining claim will only be granted where the mining claimant presents sufficient reason to justify the grant of an additional opportunity to present his case, *i.e.*, where circumstances have placed a substantial constraint upon his ability to obtain or offer samples or other evidence of a discovery. Furthermore, it must appear that the claimant is not using the additional time to make the requisite discovery.

United States v. Elbert Gassaway, 43 IBLA 382 (Oct. 31, 1979)

It is the responsibility of a mining claimant to present evidence supporting his allegation of bias on the part of Government mineral examiners testifying as to the validity of his claim in a contest proceeding, and a showing of Department affiliation does not discredit a witness.

United States v. J. C. Wilson, 44 IBLA 1 (Nov. 6, 1979)

Due process does not require notice and a prior hearing in every case that an individual is deprived of property so long as the individual is given notice and an opportunity to be heard before the deprivation becomes final.

In proceedings before the Department to determine the validity of a mining claim, notice and an opportunity for a hearing is required only where there is a disputed question of fact. Where the validity of a claim turns on the legal effect to be given facts of record

MINING CLAIMS--Continued

HEARINGS--Continued

concerning the status of the land when the claim was located, no hearing is required.

Dorothy Smith, Keith C. Hayes, 44 IBLA 25 (Nov. 6, 1979)

An administrative law judge in rendering a decision need not make a separate ruling on each finding of fact and conclusion of law. It is sufficient if the decision summarizes the controlling principles of law and the testimony of witnesses relative thereto and explains why appellants' evidence was insufficient to meet the legal test for a discovery of valuable mineral.

The Government has established a prima facie case when a mineral examiner testifies that he has examined a mining claim and has found the mineral values insufficient to support a finding of discovery.

United States v. Jon Zimmers and Claire Kelly, 44 IBLA 142 (Nov. 30, 1979)

LANDS SUBJECT TO

On petition for reconsideration, the assertion of rights to a mining claim under an Aug. 1968 location does not demonstrate error in or require reconsideration of this Board's decision, which affirmed that a mining claim located in 1969 for the same land, after the land was withdrawn from mineral location in Oct. 1968, was null and void ab initio. Neither this Board's decision initially or on petition affects petitioner's rights, if any, under such a prior location.

R. C. Jim Townsend (On Reconsideration), 18 IBLA 407 (Feb. 10, 1975)

Where land was subject to a mining claim at the time a small tract classification order withdrew the land from mineral entry and the mining claim was thereafter declared null and void, a subsequent transferee of the mining claim has no standing to object to the order classifying the land under the Small Tract Act.

Richard E. and Shirley A. Jarrett, 19 IBLA 78 (Feb. 27, 1975)

In connection with a mining claim located on land withdrawn for reclamation and power purposes, where (1) no notice of location was filed during a later period in which the land was open for entry subject to 30 U.S.C. §§ 621, 623-24 (1970), (2) there are no intervening rights, (3) a claimant alleges that he held and worked the land, while open to entry, for the requisite number of years under 30 U.S.C. § 38 (1970) and the applicable State statute of limitations, and (4) he alleges that a discovery of a valuable mineral deposit has been made, it is necessary to consider the effect of § 621 *et seq.*, and to hold a hearing if required to resolve questions of fact.

Ralph Page, 19 IBLA 255 (Mar. 31, 1975)

Sec. 8 of the Act of Apr. 23, 1904, 33 Stat. 302, providing for survey and allotment of lands within the Flathead Indian Reservation, excepts from mineral entry those lands classified as "timber land" by a Presidential Commission, and the Department of the Interior has no authority to overturn such classification and declare the "timber lands" more valuable as "mineral lands."

MINING CLAIMS--Continued

LANDS SUBJECT TO--Continued

Lands set apart as an Indian reservation cease to be a part of the public domain. A mining claim located on Indian lands not opened to entry is void ab initio.

Montana Copper King Mining Co. et al., 20 IBLA 30 (Apr. 16, 1975)

Mining claims are properly declared null and void ab initio where they are located on land which, on the date of location, was included in an application for withdrawal which previously had been noted on land office records.

John Boyd Parsons, 22 IBLA 328 (Nov. 10, 1975)

Merrill F. Moore, J. J. Adams, 43 IBLA 357 (Oct. 29, 1979)

A determination that land was known to be valuable for minerals leasable under the Mineral Leasing Act of Feb. 25, 1920, 30 U.S.C. § 181 *et seq.* (1970), at the time mining claims for such land were located, will be upheld where there has been a hearing on the question and the mining claimant has failed to produce evidence to overcome such a classification.

Mining claims located in 1933 under the general mining laws, 30 U.S.C. § 21 *et seq.* (1970), on lands known to be valuable for minerals subject to leasing under the Mineral Leasing Act of Feb. 25, 1920, 30 U.S.C. § 181 *et seq.* (1970), are null and void ab initio because in 1933 such lands were not open to location and disposition under the mining laws; however, since the passage of the Act of Aug. 12, 1953, 30 U.S.C. § 501 (1970), and the Multiple Mineral Development Act of Aug. 13, 1954, 30 U.S.C. § 521 *et seq.* (1970), it is possible to locate a mining claim on lands covered by a mineral permit or lease, or application therefor, or which are known to be valuable for leasable minerals, but the leasable minerals are reserved to the United States.

United States v. Long Beach Salt Co., 23 IBLA 41 (Dec. 2, 1975)

Lands within national parks are not subject to mining location except where specifically authorized by law. 43 CFR 3811.2-2. However, lands within a national forest remain open to location and entry under the mining laws. 16 U.S.C. § 478 (1970). Where mining claims occupy land which has subsequently been withdrawn from the operation of the mining laws, the validity of the claim must be tested by the value of the mineral deposit as of the date of the withdrawal, as well as the date of determination. If the claim was not supported at the date of withdrawal for the national park by such a discovery, the land within the claims located in the park would not be excepted from the effect of the withdrawal.

United States v. Wallace W. Vaux, 24 IBLA 289 (Apr. 1, 1976)

When title to an entire in-place school section has passed to the State, the United States no longer has a property interest therein and the land is no longer subject to location under the mining laws.

A request for a hearing pursuant to 43 CFR 4.415 for the purpose of taking testimony on the Bureau of Land Management's "continued refusal" to restore land in a reclamation withdrawal to entry will be denied. An appeal from a decision declaring mining claims and millsites null and void ab initio because the lands are in the withdrawal may not serve as the vehicle for petitioning the Secretary of the Interior to revoke the

MINING CLAIMS--Continued

LANDS SUBJECT TO--Continued

withdrawal. Furthermore, even if the withdrawal were revoked and the lands opened to entry, this action could not revive mining claims which were void when located while the withdrawal was in effect and the land closed to entry under the mining laws.

J. P. Hinds et al., 25 IBLA 67 (June 1, 1976)
83 I.D. 275

A mining claim located before Aug. 11, 1955, on land within an existing powersite withdrawal is properly declared null and void as the land was then closed to mineral entry. Claims located prior to that date were not resuscitated by the Mining Claims Rights Restoration Act of 1955.

Beverly Trull, 25 IBLA 157 (June 10, 1976)

Patented lands which are subsequently acquired by the United States are not, by mere force of reacquisition, open to disposal under the public land laws. In the absence of specific statutory direction to the contrary, the acquired land is not subject to location under the mining laws.

J. C. Babcock, J. G. Shipp, 25 IBLA 316 (June 30, 1976)

Placer mining on claims located pursuant to the Mining Claims Rights Restoration Act of 1955 will be prohibited where unrestricted mining activity would substantially interfere with other uses of the land.

United States v. Richard and Beverly Weigel, 26 IBLA 183 (Aug. 10, 1976)

The fact that assessment work has been performed on a mining claim does not estop the Government from determining the validity of a claim by proper proceedings giving adequate notice and an opportunity for a hearing where there are disputed determinative facts. However, where the claim was located after land has been withdrawn from mining, it is proper for the Bureau of Land Management to declare a claim null and void ab initio without a hearing.

A verified statement required under sec. 5 of the Surface Resources Act of July 23, 1955, 30 U.S.C. § 613 (1970), is properly rejected when the mining claim in connection with which it is filed, is declared to be null and void ab initio because it was located on land withdrawn from mineral location for power purposes prior to the Mining Claims Rights Restoration Act of Aug. 11, 1955, 30 U.S.C. § 621 *et seq.* (1970), and the land was segregated for purposes other than power development at that time and continuously thereafter.

Roy B. Cummins, 26 IBLA 223 (Aug. 17, 1976)

A mining claim located before Aug. 11, 1955, on land within an existing powersite withdrawal is properly declared null and void as the land was then closed to mineral entry. Void claims located prior to that date were not given life by the Mining Claims Rights Restoration Act of 1955.

David Loring Gamble, Darrel Douglas, 26 IBLA 249 (Aug. 18, 1976)

MINING CLAIMS--Continued

LANDS SUBJECT TO--Continued

The rejection of an application under the Act of Apr. 23, 1932, 43 U.S.C. § 154 (1970), to open lands in a reclamation withdrawal to mineral location will be affirmed when the applicant fails to submit facts to show the basis for his knowledge or belief that the lands contain valuable mineral deposits. Merely to state the lands contain such deposits is not sufficient.

Joe Ashburn, 27 IBLA 227 (Oct. 12, 1976)

A mining claim located on land at a time when such land was withdrawn from mineral entry is properly declared null and void ab initio.

W. A. Todd, A. D. Johnson, 28 IBLA 180 (Dec. 1, 1976)

Sally Lester et al., 31 IBLA 43 (June 21, 1977)

J. R. Nesmith, 38 IBLA 357 (Dec. 22, 1978)

A mining claim is properly declared null and void ab initio to the extent it has been located, prior to the enactment of the Mining Claims Rights Restoration Act of Aug. 11, 1955, 30 U.S.C. §§ 621-5 (1970), on lands withdrawn from mineral location by a power project classification.

Earl D. Roberts, 28 IBLA 286 (Dec. 27, 1976)

Lands described in a State selection application under sec. 6(b) of the Alaska Statehood Act are segregated from all forms of appropriation including location under the mining laws from the time the application is filed in the proper office of the BLM. An amendment to a pre-existing application is effective to segregate the land described in the amendment from the time it is filed.

Mining locations made on land segregated from operation of the mining laws are null and void ab initio.

Dennis G. Quinn, 29 IBLA 307 (Mar. 30, 1977)

A mining claim located on land withdrawn from location under the mining laws is null and void ab initio--without legal effect from the beginning. Such a mining claim may properly be declared null and void without a hearing where the records of the Department of the Interior show that the land was withdrawn from the operation of the United States mining laws at the time the claim was located.

Charles R. Nielsen, Pauline Nielsen, 30 IBLA 235 (May 26, 1977)

James Rossano, 35 IBLA 383 (June 23, 1978)

A mining claim located for a nonmetalliferous mineral on land at a time when such land was withdrawn from mineral entry for nonmetalliferous minerals is properly declared null and void ab initio.

David Budinski et al., 31 IBLA 139 (June 30, 1977)

MINING CLAIMS--Continued

LANDS SUBJECT TO--Continued

Under 30 U.S.C. §§ 162 and 262 (1970), valuable deposits of sodium compounds are not open to location and disposition under the mining laws, but may be disposed of only under the Mineral Leasing Act, except for certain claims under 43 CFR 3501.1-1(b), existent at passage of Mineral Leasing Act of 1920 which have since been maintained in accordance with statute and regulation.

Permian Mud Service, Inc., 31 IBLA 150 (June 30, 1977)
84 I.D. 342

A mining claim located on withdrawn land confers no right on the locator and is null and void ab initio. However, when BLM has so held claims to be null and void and it appears that the claims may not be invalid due to status factors, the case will be remanded for further consideration.

Douglas L. Russell et al., 31 IBLA 237 (July 12, 1977)

A mining claim located before Aug. 11, 1955, on land within an existing highway material site withdrawal is properly declared null and void as the land was then closed to mineral entry. Void claims located prior to that date were not given life by the Mining Claims Rights Restoration Act of 1955.

Treva L. Berger, 31 IBLA 389 (Aug. 19, 1977)

Publication in the *Federal Register* of a notice of proposed classification pursuant to 43 CFR 2461.2 will segregate the affected land to the extent indicated in the notice.

Where mining claims occupy land which has subsequently been withdrawn from the operation of the mining laws by a notice of proposed classification, 43 CFR 2461.2, the validity of the claim must be tested as of the date of the published notice, as well as of the date of determination. If the claim was not supported by such a discovery at the date of the published notice of classification, the land within the claim located in the classified area would not be excepted from the effect of the withdrawal.

United States v. R. E. Rodgers and Barbara J. Rodgers, 32 IBLA 77 (Sept. 2, 1977)

The fact that a mining claimant has held a claim for many years and performed work on the claim does not, by itself, create any rights against the Government which will estop the Government from determining the validity of the claim. It is incumbent upon the locator of a mining claim to exercise considerable care in ascertaining the status of the land embraced in the claim and the limitations of his rights as the holder of an unpatented mining claim. Failure of a Government employee to advise appellant that the land embraced in the mining claim was closed to mining location cannot give life to an invalid claim.

Arthur W. Boone, 32 IBLA 305 (Sept. 30, 1977)

A mining claim located on land at a time when the land is segregated from mining location by a proposed withdrawal is properly declared null and void ab initio. Where the official records of the Department reflect such proposed withdrawal, a hearing is not required to establish the invalidity of the claim.

Mark W. Boone and John L. Dutra, 33 IBLA 32 (Nov. 25, 1977)

Where land has been reconveyed to the United States and the reconveyance reserves the minerals to the grantor, the United States has no authority to recognize a claim for the minerals under the mining laws, 30 U.S.C. § 22 (1970), because the minerals are not owned by the United States. Such a claim is properly declared null and void, regardless of whether or not a claimant performed assessment work or paid taxes on the land.

All Glory to God Church, 33 IBLA 61 (Dec. 5, 1977)

Land which has been patented without a reservation of minerals to the United States or which otherwise has been removed from the operation of the United States mining laws is not available for the location of mining claims. Mining claims located on such land after it is so removed are null and void ab initio. Attempts to record such claims under 43 U.S.C.A. § 1744 (West Supp. 1978) are properly rejected.

Paul S. Coupey, 33 IBLA 178 (Dec. 20, 1977)

Baron Mining Corp., 39 IBLA 234 (Feb. 12, 1979)

A mining claim located on land which is not subject to mineral entry at the time of location is null and void from its inception. Where a mining claimant states in his notice of location that his mining claims were located on dates subsequent to a withdrawal which included the land encompassed by the mining claim, but indicates in his application for survey that the claims were located prior to the withdrawal, it is proper for the State Office to declare the mining claims null and void on the basis of the information in the notice of location where the claimant failed to submit evidence that the claims were in fact located prior to the withdrawal.

Ray L. Virgin, 33 IBLA 354 (Jan. 18, 1978)

Under 43 CFR 2091.6-4 and 2627.4(b), the filing of a State's application to select lands segregates these lands from all subsequent appropriation, including locations under the mining laws.

A mining claim located on land which was then segregated and closed to mineral entry is properly declared null and void ab initio.

Janelle R. Deeter, Gary R. Deeter, Verna E. Lyons, Harry E. Lyons, 34 IBLA 81 (Feb. 22, 1978)

Joe E. Denson, 43 IBLA 136 (Sept. 28, 1979)

Ordinarily an application to restore lands within a reclamation withdrawal to mineral entry pursuant to the Act of Apr. 23, 1932, 43 U.S.C. § 154 (1970), will be rejected by the Bureau of Land Management where the Bureau of Reclamation recommends against restoration; however, on appeal a case may be remanded for further consideration by the appropriate agencies, including preparation of a mineral report, where it appears warranted by the appellant's showings and willingness to

MINING CLAIMS--Continued

LANDS SUBJECT TO--Continued

propose terms and conditions to protect the Government's interest.

G. W. Daily, 34 IBLA 176 (Mar. 14, 1978)

Where a reclamation withdrawal is revoked as to certain land but that land is not restored to entry, the land remains closed to mineral entry and a mining claim located on it is null and void.

Lands which are covered by a license for a power project issued by the Federal Power Commission are not open to mineral location.

Raymond C. Gardner et al., 34 IBLA 179 (Mar. 14, 1978)

An application under the Act of Apr. 23, 1932, 43 U.S.C. § 154 (1970), for restoration to mineral entry and location of lands within a reclamation withdrawal will ordinarily be rejected when the Bureau of Reclamation has recommended against it, the recommendation is premised upon the requirements of the public interest, and the reasons offered in support of the recommendation are cogent.

Edward J. Connolly, Jr., 34 IBLA 233 (Mar. 27, 1978)

"Leasing Act minerals." The Multiple Mineral Development Act, 30 U.S.C. § 524 (1970), reserved all Leasing Act minerals to the United States, and no rights to deposits of Leasing Act minerals are open to location under the mining laws under 30 U.S.C. § 525 (1970). "Leasing Act minerals" is defined as "all minerals which, upon Aug. 13, 1954, are provided in the mineral leasing laws to be disposed of thereunder." 30 U.S.C. § 530 (1970). Because leases for sodium, potassium, and "other related products" are authorized pursuant to 30 U.S.C. §§ 262, 282 (1970), "other related products" along with sodium and potassium fall within the category of Leasing Act minerals which include lithium which is dissolved in a sodium or potassium brine.

Foote Mineral Co., 34 IBLA 285 (Apr. 17, 1978)
85 I.D. 171

A mining claim or millsite located on land at a time when the land is withdrawn from mineral location is properly declared null and void.

Floyd G. Brown, 35 IBLA 110 (May 15, 1978)

A mining claim, located at a time when the land is withdrawn from mineral entry, may be properly declared null and void ab initio without a hearing.

Edward L. Macauley, Martha D. Macauley, 35 IBLA 202 (May 24, 1978)

The President had nonstatutory authority to withdraw public land in addition to authority conferred upon him by Pickett Act, *as amended*, 43 U.S.C. §§ 141, 142 (1970). Such nonstatutory authority was not limited by terms of 43 U.S.C. § 142 (1970) providing that withdrawn lands shall remain open to location for metalliferous minerals.

MINING CLAIMS--Continued

LANDS SUBJECT TO--Continued

Mining claims located on lands previously withdrawn from entry under the mining laws are null and void ab initio.

Harry D. Wilson, 35 IBLA 349 (June 19, 1978)

Mining claims located on lands within a withdrawal which were not open to mineral entry are properly declared null and void ab initio.

Robert Cornett, 36 IBLA 84 (July 12, 1978)

A mining claim located on land at a time when the land is segregated from mining location by a proposed withdrawal is properly declared null and void ab initio.

A mining claim located on land which is not subject to mineral entry at the time of location is null and void from its inception. Where a mining claimant states in his notice of location that his mining claims were located on dates subsequent to the filing of an application for withdrawal which included the land encompassed by the mining claim, but indicates on appeal that the claims designated in the notice were merely a "regrouping," of identical claims filed prior to the segregation of the lands, it is nevertheless proper for the State Office to declare the mining claims null and void since mining claims located on withdrawn land are not subject to recordation.

Wilbur G. Hallauer, 36 IBLA 144 (July 26, 1978)

A mining claim located on land which was then segregated and closed to mineral entry is properly declared null and void ab initio.

Victor A. G. Schmidt, 36 IBLA 394 (Sept. 5, 1978)

Land which has been patented without a reservation of minerals to the United States or which otherwise has been removed from the operation of the United States' mining laws is not available for the location of mining claims. Mining claims located on such land after it is so removed are null and void ab initio.

A mining claim, located at a time when the land is withdrawn from mineral entry, may be properly declared null and void ab initio without a hearing.

Federal-American Partners, 37 IBLA 330 (Oct. 26, 1978)

Unless the statute creating the area specifically provides otherwise, areas within the National Park system are not open for location of mining claims.

Patented lands which are subsequently acquired by the United States for the National Park Service are not, by mere force of acquisition, open to disposal under the public land laws. In the absence of specific statutory direction to the contrary, the acquired land is not subject to location under the mining laws. 30 U.S.C. § 22 (1970).

Tom Brown, 37 IBLA 381 (Nov. 6, 1978)

Lands withdrawn for a powersite reservation, with certain exceptions, are open to entry for location and patent of mining claims with a reservation of power rights in the lands to the United States and subject to the conditions in the Mining Claims Rights Restoration Act. Where the BLM decision declaring mining claims null and void did not consider the effect of this Act on the withdrawal, the decision will be set aside and remanded for appropriate action.

Robert D. Upton and William C. Wells, 38 IBLA 90 (Nov. 15, 1978)

Mining claims on land subsequently withdrawn from mineral entry are not subject to relocation, despite failure of the original locators to do assessment work, because relocation by another party is of necessity adverse to the prior location.

Edward T. Dwyer, 38 IBLA 144 (Nov. 30, 1978)

Mining claims located on lands previously withdrawn from entry under the mining laws are null and void ab initio in the absence of a showing that the claimants had a valid existing right to the claims which predates the withdrawal. Where claimants assert that they have simply filed amended notices of location of claims which were first located prior to the withdrawal, but the record indicates that the claims are in fact not the same as those located prior to the withdrawal, there is no valid existing right to the new claims, and they are properly declared null and void ab initio.

Riter Ekker, Kerry Ekker, 38 IBLA 277 (Dec. 13, 1978)

Pursuant to 43 CFR 2091.2-5, an application for withdrawal temporarily precludes entry on the land in derogation thereof, from the time the application is noted on the records until revocation thereof is also noted on the records, and such withdrawal is not deemed to have expired despite the fact that the withdrawal application was noted on the records 7 years prior to location of the mining claim.

A mining claim located in part on land withdrawn for a utility corridor and segregated from mineral entry is null and void ab initio as to such land.

Earl D. Moody, Hinton E. White, 38 IBLA 385 (Dec. 29, 1978)

A mining claim located on land at a time when the land is segregated from mining location by a State selection application is properly declared null and void ab initio.

A mining claim located on land which is not subject to mineral entry at the time of location is null and void from its inception.

W. Ted Hackett, 39 IBLA 28 (Jan. 11, 1979)

Lands which were subject to an oil and gas lease offer on Sept. 20, 1951, were not open to mineral location, and mining claims located on such lands on this date are properly declared null and void in the absence of compliance with the redemption provisions of the Act of Aug. 12, 1953, and the Multiple Mineral Development Act, requiring filing of an amended notice of location prior to Dec. 10, 1953, in the place and manner in which the original notice was of record.

Dorothy Smith, 39 IBLA 306 (Feb. 23, 1979)

Portions of mining claims located on lands within a withdrawal and not open to mineral entry are properly declared null and void ab initio.

Barry C. Binning, 39 IBLA 390 (Feb. 28, 1979)

A mining claim located on lands not then in Federal ownership is null and void ab initio.

Junior L. Dennis, 40 IBLA 12 (Mar. 9, 1979)

Lands segregated on the public records by a proposed withdrawal posted Apr. 6, 1973, or a Recreational and Public Purposes Classification filed Nov. 13, 1956, were not available for the location of mining claims, and claims thereafter located are null and void ab initio.

Mining claims purportedly located on land not available for such location confer no property right upon the locator, and may be declared null and void ab initio without a hearing under 5 U.S.C. § 554 *et seq.* (1976).

The notation on public records on Apr. 6, 1973, of an application for withdrawal, even though the application did not contain a reference to authority for the withdrawal, as required in 43 CFR 2351.2(b) (1972), was sufficient to temporarily segregate the land under secs. 2091.2-5 (1972) and 2351.3 (1972) from subsequent inclusion in a mining location.

Delmer McLean et al., 40 IBLA 34 (Mar. 15, 1979)

A mining claim located on land previously withdrawn from appropriation under the mining laws is null and void ab initio.

Gerald Byron Bannon, 40 IBLA 162 (Mar. 30, 1979)

Tilden Holloway, Roland Wright, 43 IBLA 134 (Sept. 28, 1979)

Land which has been patented without a reservation of minerals to the United States is not available for the location of mining claims, and mining claims located on such land after it is so patented are null and void ab initio.

John F. Drobnick, Dorcas M. Drobnick, 41 IBLA 164 (June 18, 1979)

Cole V. Pullen, 43 IBLA 102 (Sept. 24, 1979)

Two mining claims, located at a time when the land is withdrawn from mineral entry, may be properly declared null and void ab initio without a hearing. Such a result obtains despite reference to a location notice prior to the withdrawal where appellants do not make a showing of sufficient specific facts upon which to predicate a hearing, including which of the claims the previous location relates to, the boundaries thereof,

MINING CLAIMS--Continued

LANDS SUBJECT TO--Continued

whether the previous location was for a locatable mineral under a withdrawal order then in force, and the name of the previous locator.

The Heirs of H. K. Harris, 42 IBLA 44 (July 31, 1979)

Prior to passage of the Multiple Mineral Development Act, 30 U.S.C. §§ 521-31 (1976), a prima facie valid mineral lease, or application therefor, though void and ineffectual to vest any rights to minerals subject to the mining laws in the lessee segregated the land from the operation of the mining laws and prevented the initiation of rights under the mining laws by another person until it had been set aside and removed from the records of the land office.

Charles House, Mrs. Leonard Skinner, 42 IBLA 364 (Sept. 11, 1979)

Where mining claims were originally located on land which was withdrawn from mineral location, the claims will be declared null and void ab initio.

American Resources, Ltd., 44 IBLA 220 (Dec. 11, 1979)

LOCATABILITY OF MINERAL

Generally

When the Government contests a mining claim and establishes a prima facie case that contestee has not made a discovery of a locatable mineral deposit, the burden devolves on contestee to establish by a preponderance of the evidence that the claim has been validated by the discovery of a locatable mineral deposit.

Marketability of mineral material is not the sole test of the validity of a mining claim. Profitable sales of mineral material for non-validating uses cannot be used in determining the validity of a mining claim; the claimant must meet the prudent man/marketability test in a market for which the material is locatable.

Bog iron ore, used as a soil conditioner or soil amendment, is not a locatable mineral deposit in the absence of a showing that it meets the test of United States v. Bunkowski, 5 IBLA 102, 113-16, 79 I.D. 43, 48-49 (1972), i.e., it is found to be not just a physical amendment to the soil but a chemical amendment which alters and improves soil or plant chemistry.

United States v. Theresa E. Robinson, 21 IBLA 363 (Aug. 25, 1975) 82 I.D. 414

Ground feldspar, used as a soil conditioner or soil amendment, is not a locatable mineral deposit under the general mining laws in the absence of a showing that the mineral meets the test of United States v. Bunkowski, 5 IBLA 102, 113-16, 79 I.D. 43, 48-49 (1972), namely, that the mineral is found to be not just a physical amendment to the soil, but rather a chemical amendment which alters and improves soil or plant chemistry.

United States v. Robert W. Beal, 23 IBLA 378 (Feb. 4, 1976)

MINING CLAIMS--Continued

LOCATABILITY OF MINERAL--Continued

Generally--Continued

Water is not a mineral which is locatable under the general mining law.

Robert L. Perry et al., 25 IBLA 287 (June 28, 1976) 83 I.D. 249

A deposit of rhyolite and dacite stone, used in the manufacture of asphaltic concrete and as sealcoating on asphaltic pavement, which occurs in a naturally crushed state, which has been roughly stratified and naturally sorted by the forces of nature to an extent that is not found on any other material source in the area, which has little or no overburden, and which affords specification material at a cost significantly below that incurred for the production of any other aggregate from sources in the same market area, has special and distinct physical properties which give it distinct special economic value, and therefore it is locatable as an uncommon variety under the general mining law, and its appropriation is not barred by 30 U.S.C. § 611 (1970).

United States v. Melvin McCormick, 27 IBLA 65 (Sept. 29, 1976)

A valuable deposit of geodes, round stones with crystalline centers and composed of recognized mineral substances, which possess an economic value in trade and the ornamental arts, and which are being removed by actual mining operations, is subject to location under the mining laws.

United States v. Glenn C. Bolinder and L. C. Turney, et al., 28 IBLA 187 (Dec. 6, 1976) 83 I.D. 609

In determining whether a deposit of clay is locatable as a valuable mineral deposit under the mining laws, there is a distinction between a deposit considered to be a common or ordinary clay, which is not locatable, and a locatable deposit having exceptional qualities useful and marketable for purposes for which common clays cannot be used.

"Common Clay." A "common clay" not locatable under the mining laws does not include clay having exceptional qualities which meets refractory and other quality standards for highgrade ceramic products or other products requiring a high refractoriness, or which is useful for certain industrial uses, such as in the oil and oil well drilling industries, outside the manufacture of general clay products. It does include, however, clay usable or used only for structural and other heavy clay products, for pressed or face brick, as well as ordinary brick, and for pottery and ordinary earthenware and stoneware. The fact industrial and technological changes may make a certain clay deposit valuable for a given major manufacturer of brick, tile and other clay products, because it meets its peculiar specifications for blends with other raw materials, does not warrant a change from Departmental precedents and a strong Congressional policy establishing that clay usable only for such purposes is a common clay not locatable under the mining laws.

United States v. Thomas J. Peck et al., 29 IBLA 357 (Mar. 31, 1977) 84 I.D. 137

MINING CLAIMS--Continued

LOCATABILITY OF MINERAL--Continued

Generally--Continued

Water is not a locatable mineral and sales thereof cannot be considered in determining whether there has been a valuable discovery.

United States v. Ted G. Ax, 43 IBLA 146 (Sept. 28, 1979)

Leasable Compounds

Under 30 U.S.C. §§ 162 and 262 (1970), valuable deposits of sodium compounds are not open to location and disposition under the mining laws, but may be disposed of only under the Mineral Leasing Act, except for certain claims under 43 CFR 3501.1-1(b), existent at passage of Mineral Leasing Act of 1920 which have since been maintained in accordance with statute and regulation.

Permian Mud Service, Inc., 31 IBLA 150 (June 30, 1977)
84 I.D. 342

"Leasing Act minerals." The Multiple Mineral Development Act, 30 U.S.C. § 524 (1970), reserved all Leasing Act minerals to the United States, and no rights to deposits of Leasing Act minerals are open to location under the mining laws under 30 U.S.C. § 525 (1970). "Leasing Act minerals" is defined as "all minerals which, upon Aug. 13, 1954, are provided in the mineral leasing laws to be disposed of thereunder." 30 U.S.C. § 530 (1970). Because leases for sodium, potassium, and "other related products" are authorized pursuant to 30 U.S.C. §§ 262, 282 (1970), "other related products" along with sodium and potassium fall within the category of Leasing Act minerals which include lithium which is dissolved in a sodium or potassium brine.

Foote Mineral Co., 34 IBLA 285 (Apr. 17, 1978)
85 I.D. 171

LOCATION

If mining claimants possess the essential qualifications as to citizenship, and if they peacefully entered and occupied the land and discovered a valuable mineral deposit thereon at a time when both the land and the mineral were subject to appropriation under the mining laws, and if they thereafter remained in peaceful, exclusive possession and openly worked the claim for the period prescribed by the State statute of limitations for mining claims, and expended at least the minimum amount of money prescribed by law in the improvement of the claim, they have thereby established their right to receive a patent pursuant to 30 U.S.C. § 38 (1970) notwithstanding their error in locating and recording their claim under the statute pertaining to placer locations rather than properly under the lode mining law, assuming that there has been no intervening loss of discovery.

Estate of Arthur C. W. Bowen (Deceased), 18 IBLA 379 (Jan. 30, 1975)

The Wild and Scenic Rivers Act withdrew from appropriation under the mining laws the minerals in Federal lands which constitute the bed or bank or are situated within one-quarter mile of the bank of any river listed as a potential addition to the Wild and Scenic River System. This withdrawal does not extend to minerals in lands near tributaries of designated rivers unless the tributaries were expressly included.

Walter B. Freeman et al., 25 IBLA 150 (June 10, 1976)

MINING CLAIMS--Continued

LOCATION--Continued

Mining claims are properly declared null and void ab initio when the locations were not perfected by performance of the condition precedent to the opening of withdrawn land to location, entry and patent under the mining laws.

Lloyd W. McCarty, 28 IBLA 286 (Dec. 20, 1976)

Where, in a contest to determine the validity of certain mining claims located for common building stone, sand and gravel, the Government charges that the claims were not located prior to the Act of July 23, 1955, which prohibited the subsequent location of such minerals, the finding by the Hearing Examiner and two administrative appellate tribunals that the charge is true and the claims were not timely located requires a holding that the claims are null and void, where such finding is supported by a preponderance of credible evidence.

United States v. Frank and Wanita Melluzzo (Supp., On Judicial Remand), 32 IBLA 46 (Sept. 2, 1977)

The fact that a mining claimant has held a claim for many years and performed work on the claim does not, by itself, create any rights against the Government which will estop the Government from determining the validity of the claim. It is incumbent upon the locator of a mining claim to exercise considerable care in ascertaining the status of the land embraced in the claim and the limitations of his rights as the holder of an unpatented mining claim. Failure of a Government employee to advise appellant that the land embraced in the mining claim was closed to mining location cannot give life to an invalid claim.

A mining claim located in a powersite at a time when the land was withdrawn from mineral entry is null and void ab initio. However, such a claim embracing a discovery may still be valid under a new location made by holding and working the claim pursuant to 30 U.S.C. § 38 (1970) while the land was open to mining location under the Mining Claims Rights Restoration Act of Aug. 11, 1955, 30 U.S.C. § 621 *et seq.* (1970).

Under 30 U.S.C. § 38 (1970), holding and working a mining claim in open, notorious, adverse possession for the period of time required to establish adverse possession of mining claims, during which time the land is open to mining location, is tantamount to a new location or relocation, dispensing with proof of valid notices. However, sec. 38 does not obviate the necessity of a discovery of a valuable mineral in order to establish a valid claim.

Arthur W. Eggers, 32 IBLA 305 (Sept. 30, 1977)

A mining claim located on land which is not subject to mineral entry at the time of location is null and void from its inception. Where a mining claimant states in his notice of location that his mining claims were located on dates subsequent to a withdrawal which included the land encompassed by the mining claim, but indicates in his application for survey that the claims were located prior to the withdrawal, it is proper for the State Office to declare the mining claims null and void on the basis of the information in the notice of location where the claimant failed to submit evidence that the claims were in fact located prior to the withdrawal.

The purpose of an amended location is to cure imperfections and correct errors, which in the absence

MINING CLAIMS--Continued

LOCATION--Continued

of intervening rights relates back to the date of original location. An amended location made while land is withdrawn from mineral entry is ineffectual.

Ray L. Virg-in, 33 IBLA 354 (Jan. 18, 1978)

No location of a placer mining claim on Federal lands may include more than 20 acres for each individual claimant.

United States of America v. David L. King et al., 34 IBLA 15 (Feb. 10, 1978)

For the purposes of filing affidavits of assessment work or notices of intention to hold a mining claim, the date of location is the date as defined in the pertinent regulation, 43 CFR 3833.0-5(h), not the date on which the owner completes the last step in locating and recording a mining claim as required by State law.

Paul S. Cooper, 35 IBLA 112 (May 15, 1978)

The Wild and Scenic Rivers Act withdrew from appropriation under the mining laws the minerals in Federal lands which constitute the bed or bank or are situated within one-quarter mile of the bank of any river listed as a potential addition to the Wild and Scenic River System. Land within one-quarter mile of the bank of the Illinois River, Oregon, a river designated in sec. 5(a) of the Act as a potential addition to the system, is withdrawn from mineral entry and therefore, not available for mining claims.

The location of a mining claim simply to maintain a road and insure access to other claims beyond is not a legitimate purpose within the scope or intention of the general mining law.

Robert Cornett, 36 IBLA 84 (July 12, 1978)

A mining claim located on land which is not subject to mineral entry at the time of location is null and void from its inception. Where a mining claimant states in his notice of location that his mining claims were located on dates subsequent to the filing of an application for withdrawal which included the land encompassed by the mining claim, but indicates on appeal that the claims designated in the notice were merely a "regrouping," of identical claims filed prior to the segregation of the lands, it is nevertheless proper for the State Office to declare the mining claims null and void since mining claims located on withdrawn land are not subject to recordation.

Wilbur G. Hallauer, 36 IBLA 144 (July 26, 1978)

For the purposes of filing affidavits of assessment work or notices of intention to hold a mining claim, the date of location of the claim is the date as defined in 43 CFR 3833.0-5(h).

Ronald L. Nordwick, 36 IBLA 230 (Aug. 14, 1978)

Charlie Carnal, Walter Peck, and Edward Dczkanski, 43 IBLA 10 (Sept. 11, 1979)

MINING CLAIMS--Continued

LOCATION--Continued

No location of a placer mining claim may include more than 20 acres for each individual claimant. Where claims in excess of 20 acres are located by an association of locators and there is no evidence of a qualifying discovery of minerals prior to the claim's conveyance to a single individual, the claim is void, and any subsequent discovery will serve only to validate a claim of 20 acres.

Where a mining claimant alters the legal description in the location notice for his "Claim A," so that it now describes land previously embraced by a portion of his "Claim B," which was void ab initio as a matter of law, the alteration of "Claim A" must be considered a relocation rather than an amendment.

Brattain Contractors, Inc., 37 IBLA 233 (Oct. 16, 1978)

Where it is determined that a person or association, they and their grantors, have met the fundamental requirements of the possessory rights section of the mining laws, 30 U.S.C. § 38 (1976), *i.e.*, where they have held and worked their claims in this instance for the qualifying period of 5 years under the Arizona statute of limitations covering actions to recover real property, they are entitled to a patent to those areas where there are no conflicting mining claims, regardless of the fact that the claims were improperly located as placer claims for perlite lode deposits.

United States v. Estate of Arthur C. W. Bowen ______ (Deceased), and Superior Perlite Mines, Inc. (Contestees), Harborlite Corp. (Intervenor), 38 IBLA 350 (Jan. 8, 1979)

A mining claim located on land which is not subject to mineral entry at the time of location is null and void from its inception.

W. Ted Hackett, 39 IBLA 28 (Jan. 11, 1979)

A mining claim located on land which is not subject to mineral entry at the time of location is null and void from its inception and confers no rights on the locator.

W. B. and Margaret W. Collier, 39 IBLA 81 (Jan. 24, 1979)

The purpose of 30 U.S.C. § 38 (1976) whereby a person or association may establish a right to patent lands which said person or association has held and worked for a period equal to the statute of limitations is to obviate the necessity of proving formal compliance with requirements for locating a claim, but not to dispense with proof of discovery.

The primary rule which the courts apply in construing and interpreting a conveyance where the location of the boundary lines is uncertain by reason of inconsistent or conflicting descriptive calls in the conveyance is that the intention of the parties controls and is to be followed. Where the calls for the location of boundaries to land are inconsistent, calls to monuments, natural or artificial, are of paramount importance and will prevail over all other calls inconsistent therewith. Calls to boundaries are of secondary importance, and courses and distances must be altered if, as given, they will not reach the designated boundary. Calls of course take precedence over distances, so that where it is necessary to either change direction to reach a boundary or else reduce or extend the prescribed distance, the distance must yield to the course. The recital of quantity or area of land conveyed or retained will be least influential.

United States v. Leroy S. Johnson et al., 39 IBLA 337 (Feb. 28, 1979)

Designation of a river for potential addition to the national wild and scenic rivers system, pursuant to the Wild and Scenic Rivers Act of 1968, *as amended*, 16 U.S.C. § 1271 *et seq.* (1976), withdraws Federal lands constituting the bed or bank or within one-quarter mile of the bank of such river from all forms of appropriation under the mining laws, and on appeal the mining claimant bears the burden of showing by survey or other evidence that his claim is outside the withdrawn area.

Barry C. Binning, 39 IBLA 390 (Feb. 28, 1979)

Prior to passage of the Multiple Mineral Development Act, 30 U.S.C. §§ 521-31 (1976), a prima facie valid mineral lease, or application therefor, though void and ineffectual to vest any rights to minerals subject to the mining laws in the lessee segregated the land from the operation of the mining laws and prevented the initiation of rights under the mining laws by another person until it had been set aside and removed from the records of the land office.

Where a mining claimant attempts to establish his location of a mining claim containing common variety minerals by invoking the terms of 30 U.S.C. § 38 (1976) and fails to complete the statutory period for holding and working his claim prior to July 23, 1955, BLM may properly hold such claim to be null and void.

Charles House, Mrs. Leonard Skinner, 42 IBLA 364 (Sept. 11, 1979)

For the purpose of Departmental adjudication, an amended location is one made in furtherance of an earlier valid location, while a relocation is one which is adverse to the prior location.

An amended location notice generally relates back, where no adverse rights have intervened, to the date of the original location. To the extent, however, that an amended location merely furthers rights acquired by a valid subsisting location and does not embrace additional or new land, withdrawal of land subject to existing rights will not prevent the amended location from relating back to the original location.

Since an amended notice merges with the original notice, the filing of the amended notice, for purposes of recordation under either sec. 8 of the Mining in the Parks Act, 90 Stat. 1342, 1343, 16 U.S.C. § 1907 (1976), or sec. 314 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2744, 2769, 43 U.S.C. § 1744 (1976), together with such other information required by the applicable regulations, constitutes compliance with the recording requirements of those Acts.

Except for claims held under 30 U.S.C. § 38 (1976), a failure to record a mining claim as required by State law, coupled with a withdrawal of the land prior to any curative action, invalidates the claim, and thus precludes subsequent amendment of the claim.

An oral transfer of a mining claim, though contrary to the statute of frauds, will not serve to invalidate the

claim, and a person subsequently seeking to record the claim will be afforded the opportunity to prove that the transfer actually occurred.

Where there are factual questions relating to whether action taken subsequent to a withdrawal is in the nature of an amendment or whether it constitutes a relocation, the mineral claimant will be granted the opportunity to show that the subsequent action was a permissible amendment.

R. Gail Tibbetts et al., 43 IBLA 210 (Oct. 5, 1979)
86 I.D. 538

An amended location notice generally relates back to the date of the original location notice, that is, to the extent that an amended location merely furthers rights acquired by a prior subsisting location and does not embrace additional or new land, withdrawal of land subject to existing rights prior to the filing of the amended location and subsequent to the original location will not invalidate the claims.

Where there are factual questions relating to whether refilings subsequent to a withdrawal were in the nature of an "amended locations" or whether they constituted "relocations," the matter must be referred for a hearing to allow the claimant the opportunity to show that subsequent filings have been amended locations, and that it is thus the successor in an unbroken chain of title dating back to the original location.

American Resources, Ltd., 44 IBLA 220 (Dec. 11, 1979)

"Relocation." A relocation of a mining claim is best defined as a location adverse to the prior locations.

"Amended Location." An amended location of a mining claim is best defined as one in furtherance of an earlier, valid location, and a subsequent location referring to the same parcel of land, filed by the same party, changing only the name of the claim, will be deemed an amended location.

An "amended location" generally relates back, where no adverse rights have intervened, to the date of the original location, but where there has been a withdrawal, a subsequent location relates back only to the extent that such a location merely furthers rights acquired by a valid subsisting location and does not embrace additional or new land.

When on appeal from a Bureau of Land Management decision, information is submitted upon which it is alleged that a location relates back to a prewithdrawal location, which information has not been evaluated by BLM, the decision may be set aside and the case remanded.

James C. Height, 44 IBLA 240 (Dec. 11, 1979)

No placer location shall include more than 20 acres for each individual claimant and may not exceed 160 acres for an association of up to eight individual claimants. 30 U.S.C. §§ 35, 36 (1976); 43 CFR 3842.1-2. Placer locations may be made by associations of claimants, limited in size to 20 acres for each individual claimant, up to a maximum of 160 acres.

Big Horn Calcium Co., 44 IBLA 289 (Dec. 26, 1979)

MINING CLAIMS--Continued

LODE CLAIMS

To determine whether there has been a discovery of a valuable mineral deposit within a lode claim there must be exposed within the limits of the claim a vein or lode bearing mineral of such quality and quantity as would induce a prudent man to expend his time and means with the expectation of developing a valuable mine.

United States v. Kingsley Ranch Resort, Inc., et al., 20 IBLA 14 (Apr. 16, 1975)

United States v. Evelyn M. Higgins et al., 39 IBLA 88 (Jan. 26, 1979)

High assay samples alone are not evidence of a discovery. The nature of the samples yielding the high values must be considered. Where neither the date of the samples nor the nature of the samples submitted for assay is known, those assays cannot be considered as representative of a valuable mineral deposit within the limits of a mining claim.

United States v. Wallace W. Vass, 24 IBLA 209 (Apr. 1, 1976)

Occasional assay samples of material from a lode mining claim containing high values of gold are not conclusive evidence of a valid discovery. Other factors must be considered, such as the extent of the mineral deposits, the number of samples assayed showing only a trace of mineral, and the nature of the samples yielding the high values. To be meaningful, the samples must be representative of the mineral deposit, not simply selective showings of the best mineralization.

United States v. Alex Bechthold, 25 IBLA 77 (June 1, 1976)

As a prerequisite for the validity of a lode mining claim, there must be found within the limits of the claim a vein or lode of the quartz, or other rock in place, bearing mineral of such quantity and quality that a prudent person would expend his time and means with a reasonable prospect of success in developing a valuable mine. Evidence which merely shows that further exploration is needed to "discover" the valuable mineral deposit does not meet the prudent man test.

United States v. The American Fluorspar Group, Inc., 25 IBLA 136 (June 7, 1976)

In determining whether there has been a discovery of a valuable mineral deposit under the mining laws on a lode mining claim factors such as the extent of the mineral deposits, the number of samples assayed showing only a trace of mineral, and the nature of the samples yielding the high values must be considered.

United States v. Bradley F. Dunham, 29 IBLA 105 (Mar. 18, 1977)

"Lode" and "placer." A placer mining claim has been defined as ground within defined boundaries which contain mineral in its earth, sand, or gravel; ground that includes valuable deposits not in place, that is, not fixed in rock, but which are in a loose state, and may in most cases be collected by washing or amalgamation without milling. Whereas, a lode or vein has been defined as any zone or belt of mineralized rock lying within boundaries clearly separating it from the neighboring rock; a body of mineral or mineral bearing rock within defined boundaries.

When mining claims have been located as placer claims for perlite which lies in a "blanket" or "pancake" in an almost horizontal plane and in its original state is encased between two different types of rock, where in places, the upper rock or layer has been eroded away leaving the perlite exposed at the surface and in other places on the claims the upper layer is still present, and the mining of the perlite is characterized as essentially a hard rock operation, and when it is first extracted from the ground and then processed or, in effect, milled to produce a marketable product, the perlite is properly classified as a lode deposit which will not sustain a placer location.

United States v. Estate of Arthur C. W. Bowen (Deceased), and Superior Perlite Mines, Inc. (Contestees), Harborlite Corp. (Intervenor), 38 IBLA 350 (Jan. 8, 1979)

MARKETABILITY

The "marketability rule" requiring a demonstration of present marketability at a profit is (and always has been) applicable to all mining claims, whether for base metals or for precious minerals.

United States v. R. E. Rodgers and Barbara J. Rodgers, 32 IBLA 77 (Sept. 2, 1977)

The "marketability test"--i.e., to qualify as a valuable mineral deposit, the mineral deposit must be extractable, removable and marketable at a profit--is a complement to the "prudent man rule." The fact that a mineral such as gold possesses intrinsic value does not prevent the application of the marketability test to determine whether the deposit of such a mineral constitutes a discovery of a valuable mineral deposit under the mining laws.

United States v. Jack C. Harris, Jill L. Harris, 38 IBLA 137 (Nov. 29, 1978)

MILLSITES

Where a millsite is not being used for mining or milling purposes in connection with a mining claim owned by the owner of the millsite, and at the time of contest there is no quartz mill or reduction works on the site, the millsite must be declared null and void.

United States v. Aloys A. Dietemann and Doris E. I. Dietemann, 26 IBLA 356 (Sept. 8, 1976)

United States v. Wayne E. Highley, 30 IBLA 21 (Apr. 7, 1977)

Where millsites are not used for mining or milling purposes in conjunction with a mining claim, and where no quartz or reduction works exist on the millsites, the millsites are properly declared null and void.

United States v. Robert A. Bubke (Registered Agent), Valuminco, Inc., et al., 32 IBLA 155 (Sept. 12, 1977)

MINING CLAIMS--Continued

MILLSITES--Continued

Although a millsite may be declared invalid when its only use is in connection with a mining claim which is declared invalid, a millsite can be contested separately and declared invalid when evidence establishes it is not being used for mining or milling purposes, independent of the issue of the validity of the mining claim.

A millsite is used for mining or milling purposes if the use is a function or utility intimately associated with the removal, handling or treatment of the ore from the vein or lodes. Some step in or directly connected with the process of mining or some feature of milling must be performed on the millsite.

Where the evidence presented at a hearing demonstrates a lode claim to be valid, a contest against a millsite held by the owner of the lode claim will be dismissed if the millsite is being used or occupied for mining or milling purposes.

United States v. John R. Parsons, 33 IBLA 326 (Jan. 16, 1978)

A mineral claimant who has not made a discovery of a valuable mineral deposit within the limits of his lode or placer mining claims is not the proprietor of a "vein, lode or placer" within the context of 30 U.S.C. § 42 (1970), and cannot establish any right to a millsite claim based on such unperfected mining locations.

United States v. Ray Paden, 33 IBLA 380 (Jan. 25, 1978)

A mining claim or millsite located on land at a time when the land is withdrawn from mineral location is properly declared null and void.

Floyd G. Brown, 35 IBLA 110 (May 15, 1978)

Where the proprietor of a lode mining claim seeks to obtain patent for a millsite in connection with his lode claim, the millsite claim is properly declared invalid if it is unsupported by any use or occupation of the claimed land for mining or milling purposes and does not contain a quartz mill or reduction works.

A millsite claim located under the "quartz mill or reduction works" provision of 30 U.S.C. § 42 (1976) is properly rejected where no quartz mill or reduction works has been located on the claimed lands and no construction appears to be in progress.

A millsite claim must be declared invalid where the land upon which it is located is mineral in character.

United States v. Silver Chief Mining Co., Inc., 40 IBLA 244 (Apr. 16, 1979)

Three classes of millsites are authorized by 30 U.S.C. § 42 (1976): (1) those occupied by the proprietor of a vein or lode for mining and milling purposes; (2) those that have thereon quartz mills or reduction works; and (3) those that are used by the proprietor of a placer claim for mining, milling, processing, beneficiation, or other operations in connection with such claim.

The validity of an independent millsite claim, i.e., one not located ancillary to a valid mining claim, depends upon three factors: (1) the claim must be used in good faith for a mining or milling purpose; (2) it must contain a quartz mill or reduction works on the premises for processing mineral material from a vein or lode; and (3) it must be operated in an ongoing and more or less continuous manner for custom work. Where a quartz mill or reduction works is operated sporadically only as a "spare time" enterprise, the millsite is properly declared invalid.

United States v. Ray Paden, 44 IBLA 253 (Dec. 19, 1979)

MINERAL SURVEYS

Where an offer for an oil and gas lease describes lands by reference only to the rectangular survey system, without reference to the fact that part of these unpatented lands are also within a mineral survey, the offer will be regarded as including the lands within the mineral survey if it is clear from the offer that the offeror so intended.

Bill J. Maddox, 34 IBLA 278 (Apr. 17, 1978)

PATENT

The Department of the Interior has the authority and the duty to contest mining claims which it believes are invalid, notwithstanding that the claims are located in a National Forest and the Forest Service has no objection to approval of a patent application.

When one whose application for patent for a mining claim has been rejected requests a hearing to present evidence on the controlling issues of fact involved in the rejection of the application, such request must be granted.

If mining claimants possess the essential qualifications as to citizenship, and if they peacefully entered and occupied the land and discovered a valuable mineral deposit thereon at a time when both the land and the mineral were subject to appropriation under the mining laws, and if they thereafter remained in peaceful, exclusive possession and openly worked the claim for the period prescribed by the State statute of limitations for mining claims, and expended at least the minimum amount of money prescribed by law in the improvement of the claim, they have thereby established their right to receive a patent pursuant to 30 U.S.C. § 38 (1970) notwithstanding their error in locating and recording their claim under the statute pertaining to placer locations rather than properly under the lode mining law, assuming that there has been no intervening loss of discovery.

Estate of Arthur C. W. Bowen (Deceased), 18 IBLA 279 (Jan. 30, 1975)

Where a regulation requires that a mineral patent application be accompanied by a plat and field notes of a mineral survey executed subsequent to the date of location of the mining claim and a surveyor's report of expenditures and improvements, an application for mineral patent not accompanied by these documents is properly rejected without prejudice to applicant's right to file a proper application.

Walter Bartol, 19 IBLA 82 (Mar. 3, 1975)

Where on appeal from a decision sustaining the Government's challenge of a patent application it is determined that the alleged ground of invalidity was one not raised in the complaint or at the hearing, the decision rejecting the patent application will be set aside and the Government will be afforded an opportunity to amend its complaint to embrace the charge. Where the Government does amend its complaint the

MINING CLAIMS--Continued

PATENT--Continued

mineral claimant will be granted the right to an evidentiary hearing on such issue.

United States v. Robert E. McElwaine, 26 IBLA 20
(July 7, 1976)

The execution of an application for patent to a mining claim by an attorney in fact for the claimant, at a time when the claimant himself is both resident of and physically within the land district in which the mining claim is located, is unauthorized, and such an application is invalid. The defect cannot be cured by an amendment signed by the claimant.

Floyd E. Bleak, 26 IBLA 378 (Sept. 9, 1976)

The Secretary of the Interior is not authorized to issue a patent to a mining claim until the requirements of the law have been met.

United States v. Fred and Eileen Garner, 30 IBLA 42
(Apr. 18, 1977)

United States v. Evelyn M. Higgins et al., 39 IBLA 88
(Jan. 26, 1979)

A mining claimant must prove a discovery under the prudent man test, including that the mineral can be extracted, removed and marketed at a profit.

United States v. Pittsburgh Pacific Co., 30 IBLA 388
84 I.D. 282
(June 15, 1977)

A single application for patent under the mining laws may not include noncontiguous placer mining claims.

Charles House, Mrs. Leonard Skinner, 33 IBLA 308
(Jan. 10, 1978)

Although in certain circumstances a rebuttable presumption of a mining claim's validity may be indulged, the presumption does not arise to support an application for patent of the fee title. The patent applicant is the movant party, and as such it is his obligation to make a satisfactory showing of his entitlement under the law and regulations.

Brattain Contractors, Inc., 37 IBLA 233 (Oct. 18, 1978)

The regulations of this Department have the force and effect of law, and are binding upon the Secretary and those who exercise his delegated authority. Where a patent application regulation requires "full, true, and complete abstracts," and the surface of the mining claim has not been patented, the processing of patent applications accompanied only by limited abstracts is properly suspended, pending compliance with the regulation. Where, however, the surface of the mining claim has been patented, e.g., under the Stock-Raising Homestead Act, 43 U.S.C. §§ 291-300 (1970), the abstract generally need only reflect transactions affecting the mineral estate. A certificate of title is acceptable in lieu of an abstract in either situation.

Kerr-McGee Nuclear Corp. et al., 41 IBLA 197 (June 22, 1979)

MINING CLAIMS--Continued

PATENT--Continued

Where a mining claimant attempts to establish his location of a mining claim containing common variety minerals by invoking the terms of 30 U.S.C. § 38 (1976) and fails to complete the statutory period for holding and working his claim prior to July 23, 1955, BLM may properly hold such claim to be null and void.

Charles House, Mrs. Leonard Skinner, 42 IBLA 368
(Sept. 11, 1979)

A party filing notice of alleged adverse mining claims with BLM is properly advised that he is required within 30 days of such filing to commence proceedings in a court of competent jurisdiction to determine the question of right of possession to the claims as between him and his rival claimant. During the pendency of this action, patent proceedings will be stayed.

BLM's dismissal of a protest against the issuance of a mineral patent will be affirmed where the defects in the application alleged by the protestant do not exist or are curable. An application is not defective because it refers to a previously filed application containing necessary information in lieu of including the information itself, or because the notice of application did not mention adjoining claim holders, or because the abstract of title submitted with it does not recognize the existence of adverse claims. Where the patent applicant has contracted with another party to give it a 25-percent interest in the claims, but has not transferred this interest to it by deed or other instrument of record, it is not improper for the applicant to apply as the sole applicant. If the interest is subsequently legally transferred, and the transfer is recorded, the application may be amended to reflect this fact.

John E. Meadows, 43 IBLA 35 (Sept. 12, 1979)

The evidence of title, required by 43 CFR 3862.1-3 to be submitted in support of a mineral patent application need reflect only documents such as deeds, instruments, or actions appearing of record purporting to convey or to affect the title to each location. It is not necessary that the title data reflect in addition those deeds, instruments, or actions otherwise relating to the land in the mining claim.

Kerr-McGee Nuclear Corp. et al. (On Reconsideration), 43 IBLA 348 (Oct. 29, 1979)

PATENT IMPROVEMENTS

Where in a patent application for a group of claims, pro rata credit for the value of a common, offsite improvement is to be attributed to each claim, it must be shown that the improvement was subsequent to the location of each claim so credited, and that the improvement is essential to the practical development and actually facilitates the extraction of ore from each claim.

Brattain Contractors, Inc., 37 IBLA 233 (Oct. 18, 1978)

PLACER CLAIMS

A single application for patent under the mining laws may not include noncontiguous placer mining claims.

Charles House, Mrs. Leonard Skinner, 33 IBLA 308
(Jan. 10, 1978)

MINING CLAIMS--Continued

PLACER CLAIMS--Continued

No location of a placer mining claim on Federal lands may include more than 20 acres for each individual claimant.

United States of America v. David L. King et al., 34 IBLA 15 (Feb. 10, 1978)

No location of a placer mining claim may include more than 20 acres for each individual claimant. Where claims in excess of 20 acres are located by an association of locators and there is no evidence of a qualifying discovery of minerals prior to the claim's conveyance to a single individual, the claim is void, and any subsequent discovery will serve only to validate a claim of 20 acres.

Brattain Contractors, Inc., 37 IBLA 233 (Oct. 18, 1978)

"Lode" and "placer." A placer mining claim has been defined as ground within defined boundaries which contain mineral in its earth, sand, or gravel; ground that includes valuable deposits not in place, that is, not fixed in rock, but which are in a loose state, and may in most cases be collected by washing or amalgamation without milling. Whereas, a lode or vein has been defined as any zone or belt of mineralized rock lying within boundaries clearly separating it from the neighboring rock; a body of mineral or mineral bearing rock within defined boundaries.

When mining claims have been located as placer claims for perlite which lies in a "blanket" or "pancake" in an almost horizontal plane and in its original state is encased between two different types of rock, where in places, the upper rock or layer has been eroded away leaving the perlite exposed at the surface and in other places on the claims the upper layer is still present, and the mining of the perlite is characterized as essentially a hard rock operation, and when it is first extracted from the ground and then processed or, in effect, milled to produce a marketable product, the perlite is properly classified as a lode deposit which will not sustain a placer location.

United States v. Estate of Arthur C. W. Bowen (Deceased), and Superior Perlite Mines, Inc. (Contestees), Harborlite Corp. (Intervenor), 38 IBLA 390 (Jan. 8, 1979)

No placer location shall include more than 20 acres for each individual claimant and may not exceed 160 acres for an association of up to eight individual claimants. 30 U.S.C. §§ 35, 36 (1976); 43 CFR 3842.1-2. Placer locations may be made by associations of claimants, limited in size to 20 acres for each individual claimant, up to a maximum of 160 acres.

Big Horn Calcium Co., 44 IBLA 289 (Dec. 26, 1979)

POSSESSORY RIGHT

A mining claim located in a powersite at a time when the land was withdrawn from mineral entry is null and void ab initio. However, such a claim embracing a discovery may still be valid under a new location made by holding and working the claim pursuant to 30 U.S.C. § 38 (1970) while the land was open to mining location under the Mining Claims Rights Restoration Act of Aug. 11, 1955, 30 U.S.C. § 621 *et seq.* (1970).

Under 30 U.S.C. § 38 (1970), holding and working a mining claim in open, notorious, adverse possession for the period of time required to establish adverse possession of mining claims, during which time the land is open to mining location, is tantamount to a new location or relocation, dispensing with proof of valid notices. However, sec. 38 does not obviate the necessity of a discovery of a valuable mineral in order to establish a valid claim.

MINING CLAIMS--Continued

POSSESSORY RIGHT--Continued

Arthur E. Boone, 32 IBLA 305 (Sept. 30, 1977)

Where a corporation allegedly acquired a group of unpatented mining claims, but the instruments of conveyance and the abstract of title are subject to various objections by the Government's title examiner, which the corporation finds are difficult or impossible to cure, the corporation nonetheless may receive a patent to the claims pursuant to the Act of July 9, 1870 (R.S. § 2332; 30 U.S.C. § 38 (1970)), by demonstrating its qualifications under that Act.

Where it becomes necessary for a corporate applicant for mineral patent under R.S. § 2332, 30 U.S.C. § 38 (1970) to demonstrate that it and its predecessors have held and worked the subject mining claims for a specific term of years, the applicant may tack the predecessor's period of possession to its own if there was a privity of interest between them which was demonstrated by any agreement, conveyance or understanding, the purpose of which was to transfer the right and possession of the previous adverse claimant to the successor, and this is accompanied by actual delivery of possession.

An applicant for a mineral patent under 30 U.S.C. § 38 (1970) may be credited with actual possession and working of the claims for the period when the claims were occupied and worked by the claimant's lessee who recognized the title asserted by the claimant.

An applicant for a mineral patent under 30 U.S.C. § 38 (1970) may be credited with actual possession and working of the claims for the period when the claims were occupied and worked by others under a conditional contract of sale with the claimant, as well as the period after the claimant lawfully declared the contract forfeited but the putative purchasers continued to hold and work the claims, contending the continued validity of the sales contract, during the course of the claimant's litigation to eject them, which ultimately was successful.

Alaska Placer Co., 33 IBLA 187 (Dec. 21, 1977)
84 I.D. 990

In order for a mining claimant to maintain a possessory right in a claim under Arizona law, the locator must file within 90 days a copy of the location notice in the county in which the claim is located.

E. E. Wall, 34 IBLA 362 (May 1, 1978)

The holding of a mining claim and the diligent pursuance of mining activities on it does not relieve its owner of the obligation imposed by statute to file an affidavit of assessment work or a notice of intention to hold a mining claim.

Paul S. Coupey, 35 IBLA 112 (May 15, 1978)

Where a corporate patent applicant can trace its ownership of the claim back through a series of conveyances to a mesne owner who had title to the claim quieted in her by the decree of a court of competent jurisdiction, there is no need to look behind the quiet title decree

MINING CLAIMS--Continued

POSSESSORY RIGHT--Continued

to an earlier break in the chain of title unless there is reason to believe that the interest which is unaccounted for was not disposed of by the litigation. However, a court decree which merely distributes the assets of a decedent's estate is not a "quiet title decree" in this context, and does not ordinarily foreclose the interests of third parties who hold the record title to mining claims.

Before a claimant may successfully invoke 30 U.S.C. § 38 (1976) to cure deficiencies in the method of location of, or title to mining claims, it must first be established that each of the claims is supported by a discovery of a valuable deposit of mineral, and that claimant and/or predecessors have "held and worked" each of the claims for the requisite period. Where these showings are disputed, notice and opportunity for a hearing must be afforded.

Brattain Contractors, Inc., 37 IBLA 233 (Oct. 18, 1978)

In the absence of a specific regulation or policy directive specifying the type of proof necessary for recordation, the Bureau of Land Management should liberally consider attempts by a mining claimant under sec. 314 of the Federal Land and Policy Management Act to record notice of a mining claim where proof of recording cannot be made and 30 U.S.C. § 38 (1976) is relied upon for holding the claim, and before rejecting a filing for such a claim, BLM should request further evidence from the claimant which it would consider satisfactory. Such evidence should include at a minimum the name the claim is and has been known by, the name and address of the claimant, an adequate description of the claim, the type of claim, the time of holding and working the claim to meet a State's statute of limitations and, if possible, the date of the origin of claimant's title and facts as to continuation of possession of the claim, and any other information available showing a chain of title to the claimant and bearing upon the possession and occupancy of the claim for mining purposes, and other information which the Bureau of Land Management deems essential to meet the purposes of the recordation provision.

Philip Sayre, 42 IBLA 296 (Aug. 27, 1979)

A party filing notice of alleged adverse mining claims with BLM is properly advised that he is required within 30 days of such filing to commence proceedings in a court of competent jurisdiction to determine the question of right of possession to the claims as between him and his rival claimant. During the pendency of this action, patent proceedings will be stayed.

John B. Meadows, 43 IBLA 35 (Sept. 12, 1979)

POWERSITE LANDS

A mining claim located before Aug. 11, 1955, on land within an existing powersite withdrawal is properly declared null and void as the land was then closed to mineral entry. Claims located prior to that date were not resuscitated by the Mining Claims Rights Restoration Act of 1955.

Beverly Krull, 25 IBLA 157 (June 10, 1976)

MINING CLAIMS--Continued

POWERSITE LANDS--Continued

Under the Mining Claims Rights Restoration Act of 1955 it is proper to prohibit all placer mining operations on a group of mining claims on land within a powersite classification, where unrestricted placer mining on such land would most probably result in substantial interference with the use of the land for recreational purposes.

The Mining Claims Rights Restoration Act of 1955 gives the Secretary of the Interior no discretion to permit limited or restricted placer mining on land withdrawn or reserved for power development or powersites. The Secretary may permit either unrestricted placer mining or none at all. The only condition which he may impose on permission to mine is that the locator must restore the surface of the claim to its condition immediately prior to mining operations.

Boyd McGinn et al., 25 IBLA 188 (June 18, 1976)

Placer mining on claims located pursuant to the Mining Claims Rights Restoration Act will be prohibited where unrestricted mining activity would substantially interfere with other uses of the land.

United States v. Richard and Beverly Heisel, 26 IBLA 183 (Aug. 10, 1976)

A mining claim located before Aug. 11, 1955, on land within an existing powersite withdrawal is properly declared null and void as the land was then closed to mineral entry. Void claims located prior to that date were not given life by the Mining Claims Rights Restoration Act of 1955.

David Loring Gackle, Darrel Douglas, 26 IBLA 209 (Aug. 18, 1976)

Where prior to 1920 a powersite withdrawal was created by executive order under authority of the Act of June 25, 1910, the withdrawn land remained open to the location of mining claims for metalliferous minerals until passage of the Federal Power Act on June 10, 1920, which closed powersites to all entry, location or disposal. Any mining claim located thereafter on powersite lands is void ab initio unless the land has been restored to such entry in accordance with sec. 24 of the Federal Power Act or the location of the claim has been made in accordance with the Act of Aug. 11, 1955, 30 U.S.C. § 621 (1970). The latter Act did not operate retroactively to validate void claims.

Henry Stagnaro, 31 IBLA 357 (July 25, 1977)

Lands which are covered by a license for a power project issued by the Federal Power Commission are not open to mineral location.

Raymond C. Gardner et al., 34 IBLA 179 (Mar. 10, 1978)

The preservation of important and critical habitats for wildlife is a use warranting the prohibition of mining from an area in accordance with the Mining Claims Rights Restoration Act of 1955, 30 U.S.C. § 621 (1970); however, where the only use shown on eight mining claims is likely destruction of a dove nesting and breeding habitat which has produced only approximately .11 of 1 percent of the 1976 total hunters' kill of over 2-1/2 million doves in the State of Arizona and there is insufficient evidence to establish that the habitat is a critical and important habitat for the

MINING CLAIMS--Continued

POWERSITE LANDS--Continued

doves, an administrative law judge's decision to allow placer mining operations will be affirmed.

United States v. Mineral Economics Corp., 38 IBLA 258 (Mar. 30, 1978)

Lands withdrawn for a powersite reservation, with certain exceptions, are open to entry for location and patent of mining claims with a reservation of power rights in the lands to the United States and subject to the conditions in the Mining Claims Rights Restoration Act. Where the BLM decision declaring mining claims null and void did not consider the effect of this Act on the withdrawal, the decision will be set aside and remanded for appropriate action.

Robert D. Upton and William C. Wells, 38 IBLA 90 (Nov. 15, 1978)

Where a mining claim has been located pursuant to the Mining Claims Rights Restoration Act, 30 U.S.C. §§ 621-625 (1970), on land withdrawn for powersite, it is proper to prohibit placer mining if there is a likelihood of substantial interference with the use of the land for fishing, hunting, recreation, and the recovery of archaeological values.

The Mining and Minerals Policy Act of 1970, 30 U.S.C. § 21a (1970), does not require the granting of permission for placer mining operations on land within a powersite withdrawal where such operations would probably interfere with other uses of the land.

United States v. Edward J. Connolly, Jr., Idaho Fish and Game Department (Intervenor), 40 IBLA 30 (Mar. 15, 1979)

A mining claim located prior to Aug. 11, 1955, on lands withdrawn for a powersite is null and void ab initio. The passage of the Mining Claims Rights Restoration Act of Aug. 11, 1955, 30 U.S.C. § 621 (1976), did not give life to void claims which had been located on withdrawn lands prior to the date of the Act.

United States v. Elbert Gassaway, 43 IBLA 382 (Oct. 31, 1979)

RECORDATION

A mining claim located after Oct. 21, 1976, for which a notice of recordation required to be filed by sec. 314(b) of the Federal Land Policy and Management Act of 1976, has not been filed within 90 days from the date of location is void, and the Department may not accept or give force to a notice of recordation filed after the 90-day period.

Effect of Failure to Record Timely Under Sec. 314(b), Federal Land Policy and Management Act of 1976, M-36889 (May 17, 1977) 84 I.D. 188

A mining claim located after Oct. 21, 1976, for which a notice of recordation required to be filed by sec. 314(b) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. § 1744) has not been filed within 90 days from the date of location is void, and no force and effect can be given to a notice of recordation filed after the 90-day period.

Southwestern Exploration Associates, 33 IBLA 240 (Dec. 28, 1977)

MINING CLAIMS--Continued

RECORDATION--Continued

Under sec. 314(b) of the Federal Land Policy and Management Act of Oct. 21, 1976, 43 U.S.C. § 1744(b) (West Supp. 1977), and 43 CFR 3833.1-2, the owner of a mining claim located after Oct. 21, 1976, must file a notice of recordation of the claim with the proper Bureau of Land Management office within 90 days of location of the claim. Failure to make a timely filing of the notice requires that the Bureau refuse to accept the notice and declare the claim to be null and void.

The failure of a mining claimant to file the notice of recordation required by sec. 314(b) of the Federal Land Policy and Management Act of Oct. 21, 1976, 43 U.S.C. § 1744(b) (West Supp. 1977), cannot be excused on the basis of equitable estoppel where no discussion covering the 90-day requirement was had between the Department and appellant's representatives.

Northwest Citizens for Wilderness Mining Co., Inc., 33 IBLA 317 (Jan. 16, 1978)

Under sec. 314(b) of the Federal Land Policy and Management Act of 1976, mining claims located after Oct. 21, 1976, must be recorded at the office of the Bureau of Land Management designated by the Secretary of the Interior, within 90 days after the date of location. By regulation the BLM State Offices are designated the proper offices for mining claim recordations.

Failure to record mining claims in accordance with sec. 314 of the Federal Land Policy and Management Act of 1976 is deemed conclusively to constitute abandonment of the claims. Filing the recordation documents in a Bureau of Land Management District Office, rather than in the proper State Office, the day before the expiration of the 90-day statutory deadline for recordation does not constitute timely recordation. In such circumstances, the BLM State Office properly rejected the recordations upon receipt of the documents after the 90-day deadline had passed.

Irwin W. Sweeney, 34 IBLA 205 (Mar. 23, 1978)

Pursuant to sec. 314(b) of the Federal Land Policy and Management Act of 1976, a copy of the official record of the notice of location of a mining claim must be filed within 90 days after location of the claim. In computing this period the date of location is not counted but the last day of the period is. Thus, when a claim is located on Sept. 1, 1977, a notice filed on Dec. 1, 1977, is 1 day late, Nov. 30, 1977, being the 90th day.

Robert Thompson, 34 IBLA 319 (Apr. 24, 1978)

In order for a mining claimant to maintain a possessory right in a claim under Arizona law, the locator must file within 90 days a copy of the location notice in the county in which the claim is located.

R. E. Webb, 34 IBLA 362 (May 1, 1978)

"Date of location." Date of location of a mining claim is no later than the date on which the claimant certified he had complied with all requirements of law, as indicated by his signature on the notice and certificate of location. The date of recording the location notice of a mining claim in the county records has no bearing on the "date of location" of the claim, from which the 90-day period for recordation in BLM under FLPMA begins.

Under sec. 314(b) of the Federal Land Policy and Management Act of 1976, mining claims located after Oct. 21, 1976, must be recorded at the office of the

MINING CLAIMS--Continued

RECORDATION--Continued

Bureau of Land Management designated by the Secretary of the Interior, within 90 days after the date of location. By regulation the BLM State Offices are designated the proper offices for mining claim recordations each within its area of jurisdiction. BLM State Offices properly refuse to record notices of location of mining claims not received by the proper BLM State Office before the end of the 90-day period set by statute.

Ronald Coulam, 35 IBLA 35 (May 8, 1978)

Under sec. 314(b) of the Federal Land Policy and Management Act of 1976, mining claims located after Oct. 21, 1976, must be recorded in the proper office of the Bureau of Land Management within 90 days from the date of location, not within 90 days from the date the claims were recorded under State law. BLM properly refuses to accept for recordation notices of location filed after the 90-day period.

Foyle Mason, 35 IBLA 40 (May 8, 1978)

For the purposes of filing affidavits of assessment work or notices of intention to hold a mining claim, the date of location is the date as defined in the pertinent regulation, 43 CFR 3833.0-5(h), not the date on which the owner completes the last step in locating and recording a mining claim as required by State law.

A notice of location or certificate of location of a mining claim is a separate and distinct document from an affidavit of assessment work or a notice of intention to hold a mining claim and the filing of the one does not satisfy the requirement that the other be filed.

The holding of a mining claim and the diligent pursuance of mining activities on it does not relieve its owner of the obligation imposed by statute to file an affidavit of assessment work or a notice of intention to hold a mining claim.

Paul S. Couper, 35 IBLA 112 (May 15, 1978)

Under sec. 314(b) of the Federal Land Policy and Management Act of Oct. 21, 1976, 43 U.S.C. § 1744(b) (West Supp. 1977), and 43 CFR 3833.1-2, the owner of a mining claim located after Oct. 21, 1976, must file a notice of recordation of the claim with the proper Bureau of Land Management office within 90 days of location of the claim. Failure to make a timely filing of the notice requires that the Bureau refuse to accept the notice and declare the claim to be null and void.

R. Wade Holder et al., 35 IBLA 169 (May 22, 1978)

For the purposes of filing affidavits of assessment work or notices of intention to hold a mining claim, the date of location is the date as defined in the pertinent regulation, 43 CFR 3833.0-5(b).

A notice of location or certificate of location of a mining claim is a separate and distinct document from an affidavit of assessment work or a notice of intention to hold a mining claim and the filing of the one does not satisfy the requirement that the other be filed.

Ronald L. Nordwick, 36 IBLA 238 (Aug. 14, 1978)

MINING CLAIMS--Continued

RECORDATION--Continued

Where certificates of location as to mining claims have not been filed (received and date stamped) at the proper Bureau of Land Management office within 90 days of the date of location, as required by the regulation, 43 CFR 3833.1-2(b), for claims located after Oct. 21, 1976, the Bureau must refuse to accept the certificates and declare the claims to be null and void.

Neither the Federal Land Policy and Management Act of 1976 nor the applicable regulations make provision for relief where the death of an employee instructed to file certificates of location for the mining claims of his employer, as required by 43 CFR 3833.1-2(b), causes the filing to be more than 90 days after the date of location of the claims.

E. R. Fosser, 36 IBLA 379 (Aug. 31, 1978)

Under sec. 314(a) of the Federal Land Policy and Management Act of 1976, the owner of an unpatented mining claim must file a notice of intention to hold his claim prior to Dec. 31 of the calendar year following the date of location of such claim, or the claim shall be deemed conclusively to have been abandoned.

Donald H. Little, 37 IBLA 1 (Sept. 6, 1978)

Juan Munoz, 39 IBLA 72 (Jan. 24, 1979)

Under sec. 314(b) of the Federal Land Policy and Management Act of 1976, 43 U.S.C.A. § 1744 (Supp. 1978), unless the required copy of the official record of location is filed in the proper BLM office within 90 days from the date of location, a mining claim located after Oct. 21, 1976, is void, and any later filing of the notice is invalid.

G. Antolini & Son, 37 IBLA 13 (Sept. 8, 1978)

William E. Rhodes, 38 IBLA 127 (Nov. 22, 1978)

Lawrence A. Landry, 40 IBLA 212 (Apr. 10, 1979)

Under sec. 314(b) of the Federal Land Policy and Management Act of Oct. 21, 1976, 43 U.S.C. § 1744(b) (1976), and 43 CFR 3833.1-2, the owner of an unpatented lode or placer mining claim located after Oct. 21, 1976, shall, within 90 days after the date of location of such claim, file in the proper BLM office a copy of the official record of the notice of location or certificate of location. Failure to file such instruments shall be deemed conclusively to constitute an abandonment of the mining claim by the owner.

James F. Giancarlo, 37 IBLA 88 (Sept. 22, 1978)

Leland H. Bray, 37 IBLA 120 (Oct. 3, 1978)

Roy M. Byram, 39 IBLA 32 (Jan. 15, 1979)

Phillip M. Gardiner et al., 41 IBLA 391 (July 28, 1979)

Department of the Interior, as agency of executive branch of Government, is not proper forum to decide whether or not statute enacted by Congress is constitutional.

Appellant's prior filings of mining claim documents with BLM do not relieve him of filing obligations imposed by sec. 314 of Federal Land Policy and Management Act and implementing regulations at 43 CFR Subpart 3833, which are binding.

Al Sherman, 38 IBLA 300 (Dec. 14, 1978)

MINING CLAIMS--Continued

RECORDATION--Continued

Under sec. 314(b) of the Federal Land Policy and Management Act of Oct. 21, 1976, 43 U.S.C. § 1744(b) (1976), and 43 CFR 3822.1-2, the owner of a mining claim located after Oct. 21, 1976, must file a notice of recordation of the claim with the proper Bureau of Land Management office within 90 days of location of the claim, or the claim is deemed abandoned and void.

Dale C. DeLor, 40 IBLA 88 (Mar. 22, 1979)

Under sec. 314(b) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. § 1744 (1976), and 43 CFR 3833.1-2, the owner of a mining claim located after Oct. 21, 1976, must file a notice of recordation of the claim with the proper Bureau of Land Management office within 90 days of location of the claim. A notice must be received and date stamped in the BLM office within the 90-day period to be timely filed.

M. J. Reeves, 41 IBLA 92 (June 4, 1979)

Carl Dowler, Roy Stewart, 44 IBLA 192 (Nov. 30, 1979)

Under the Federal Land Policy and Management Act of 1976, 43 U.S.C. § 1744(a)(2) (1976), if an unpatented mining claim located after Oct. 21, 1976, is not supported annually by either an affidavit of assessment work or notice of intention to hold, the claim will be conclusively deemed abandoned and void, despite appellant's statement there was no intent to abandon and that failure to file was an oversight.

Nuclear Power and Energy Co. and B-2, Inc., 41 IBLA 142 (June 14, 1979)

Under 43 CFR 2091.6-4 and 2627.4(b), the filing of an application by State of Alaska to select lands segregates those lands from all subsequent appropriations, including locations under the mining law. A mining claim located on land which has been segregated and closed to mineral entry is properly declared null and void ab initio.

John C. Schandelmeier, 42 IBLA 240 (Aug. 22, 1979)

Under sec. 314(b) of the Federal Land Policy and Management Act of Oct. 21, 1976, 43 U.S.C. § 1744(b) (1976), and 43 CFR 3822.1-2, the owner of a mining claim located after Oct. 21, 1976, must file a notice of recordation of the claim with the proper Bureau of Land Management office within 90 days of location of the claim, or the claim is deemed abandoned and void.

"Date of Location." Under 43 CFR 3833.0-5(h), for claims located in Nevada, "date of location" is the date indicated in the notice of location or discovery posted on an unpatented mining claim.

Jim Spicer, 42 IBLA 288 (Aug. 27, 1979)

Sec. 314 of the Federal Land Policy and Management Act of 1976 was enacted to establish a Federal recording system for mining claims to facilitate Federal land use planning and management. Failure to comply with the mandatory filing requirements constitutes abandonment of the claim and the land reverts to the status of public domain.

In the absence of a specific regulation or policy directive specifying the type of proof necessary for recordation, the Bureau of Land Management should liberally consider attempts by a mining claimant under sec. 314 of the Federal Land and Policy Management Act to record notice of a mining claim where proof of recording cannot be made and 30 U.S.C. § 38 (1976) is relied upon for holding the claim, and before rejecting a filing for such a claim, BLM should request further evidence from the claimant which it would consider satisfactory. Such evidence should include at a minimum the name the claim is and has been known by, the name and address of the claimant, an adequate description of the claim, the type of claim, the time of holding and working the claim to meet a State's statute of limitations and, if possible, the date of the origin of claimant's title and facts as to continuation of possession of the claim, and any other information available showing a chain of title to the claimant and bearing upon the possession and occupancy of the claim for mining purposes, and other information which the Bureau of Land Management deems essential to meet the purposes of the recordation provision.

MINING CLAIMS--Continued

RECORDATION--Continued

Phillip Sayer, 42 IBLA 296 (Aug. 27, 1979)

The regulation, 43 CFR 3833.2-1(b)(1), requiring evidence of assessment work to be filed prior to Dec. 31 of the year following location of the claim, is mandatory. Failure to comply therewith must result in a finding that the claim has been abandoned.

Donald L. Fulghum, 42 IBLA 338 (Aug. 30, 1979)

Department of the Interior, as agency of executive branch of Government, is not proper forum to decide whether or not as to mining claims the recordation provisions of the Federal Land Policy and Management Act of 1976 are constitutional.

For the purposes of filing affidavits of assessment work or notices of intention to hold a mining claim, the date of location of the claim is the date as defined in 43 CFR 3833.0-5(h).

Charlie Carpal, Walter Peck, and Edward Porzansky, 43 IBLA 10 (Sept. 11, 1979)

The regulations governing recordation of mining claims are mandatory, and failure to comply therewith must result in a finding that the claim has been abandoned. Where appellants timely file for record an "amended" location notice, accompanied by the original location notice which is untimely on its face, the mining claim is properly deemed abandoned as to the original location, but not as to the "amended" claim if it is a relocation of the claim under the law.

Walter T. Paul, James H. Meyer, 43 IBLA 119 (Sept. 24, 1979)

Since an amended notice merges with the original notice, the filing of the amended notice, for purposes of recordation under either sec. 8 of the Mining in the Parks Act, 90 Stat. 1342, 1343, 16 U.S.C. § 1907 (1976), or sec. 314 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2744, 2769, 43 U.S.C. § 1744 (1976), together with such other information required by the applicable regulations, constitutes compliance with the recording requirements of those Acts.

R. Gail Tibbetts et al., 43 IBLA 210 (Oct. 5, 1979)
86 I.D. 538

MINING CLAIMS--Continued

RECORDATION--Continued

Regulation 43 CFR 3833.1-2(d) states that a location notice for each mining claim, millsite, or tunnel site filed for recordation shall be accompanied by a service fee. As this is a mandatory requirement, there is no recordation unless the documents are accompanied by the stated fee, or until it is paid. Therefore, where a notice of location of a claim or site is submitted to BLM for recordation on Dec. 14, 1977, and the filing fee therefor is not paid to BLM until Feb. 10, 1978, the recordation date of the notice is Feb. 10, 1978.

Joe B. Cashman, 43 IBLA 239 (Oct. 10, 1979)

43 CFR 3833.1-2(d) states that a location notice for each mining claim, millsite, or tunnel site filed for recordation shall be accompanied by a service fee. As this is a mandatory requirement, there is no recordation unless the documents are accompanied by the stated fee, or until it is paid. Therefore, where a notice of location of a mining claim is submitted to BLM for recordation on Sept. 30, 1977, and the filing fee therefore is not paid to BLM until July 18, 1978, the recordation date of the notice of location is July 18, 1978. In the circumstances, the evidence of annual assessment work performed during the preceding assessment year or a notice of intention to hold the mining claim must be filed in the proper BLM office on or before Oct. 22, 1979, pursuant to 43 CFR 3833.2-1(a). Duly promulgated regulations have the force and effect of law and are binding on the Department.

NRG Mining, Inc., 44 IBLA 126 (Nov. 27, 1979)

Under sec. 314 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. § 1744 (1976), and 43 CFR 3833.1-2, the owner of a mining claim located after Oct. 21, 1976, must file a notice of recordation of the claim with the proper Bureau of Land Management office within 90 days of location of the claim. Failure to file such notice shall be deemed conclusively to constitute an abandonment of the mining claim by the owner.

Raymond W. Quigley, 44 IBLA 250 (Dec. 19, 1979)

Where the owner of an unpatented mining claim located prior to Oct. 21, 1976, fails to file an affidavit of assessment work or notice of intention to hold the claim on or before the last day of the calendar year following the year the claim was recorded with BLM, the claim is properly deemed void.

Velda Waters, 44 IBLA 272 (Dec. 26, 1979)

Under sec. 314 of the Federal Land Policy and Management Act of Oct. 21, 1976, 43 U.S.C § 1744 (1976), and 43 CFR 3833.1-2, the owner of a lode mining claim must file a notice of recordation of the claim with the proper Bureau of Land Management Office within 90 days of location of the claim. Failure to so file is deemed conclusively to constitute an abandonment of the claim by the owner.

Faith C. Hartman, 44 IBLA 310 (Dec. 31, 1979)

MINING CLAIMS--Continued

RELOCATION

On petition for reconsideration, the assertion of rights to a mining claim under an Aug. 1966 location does not demonstrate error in or require reconsideration of this Board's decision, which affirmed that a mining claim located in 1969 for the same land, after the land was withdrawn from mineral location in Oct. 1968, was null and void ab initio. Neither this Board's decision initially or on petition affects petitioner's rights, if any, under such a prior location.

R. C. Jim Townsend (On Reconsideration), 18 IBLA 407 (Feb. 10, 1975)

In connection with a mining claim located on land withdrawn for reclamation and power purposes, where (1) no notice of location was filed during a later period in which the land was open for entry subject to 30 U.S.C. §§ 621, 623-24 (1970), (2) there are no intervening rights, (3) a claimant alleges that he held and worked the land, while open to entry, for the requisite number of years under 30 U.S.C. § 38 (1970) and the applicable State statute of limitations, and (4) he alleges that a discovery of a valuable mineral deposit has been made, it is necessary to consider the effect of § 621 *et seq.*, and to hold a hearing if required to resolve questions of fact.

Ralph Page, 19 IBLA 255 (Mar. 31, 1975)

A mining claim located on land at a time when such land was withdrawn from mineral entry is properly declared null and void ab initio. The finding that appellants have no rights under Sept. 1974 locations does not affect any rights which may have been deeded to them by the holder of a 1952 claim located prior to the time the land was withdrawn from mineral locations.

W. B. and G. H. Strickler, 27 IBLA 267 (Oct. 26, 1976)

Where a mining claimant alters the legal description in the location notice for his "Claim A," so that it now describes land previously embraced by a portion of his "Claim B," which was void ab initio as a matter of law, the alteration of "Claim A" must be considered a relocation rather than an amendment.

Brattain Contractors, Inc., 37 IBLA 233 (Oct. 16, 1978)

Mining claims on land subsequently withdrawn from mineral entry are not subject to relocation, despite failure of the original locators to do assessment work, because relocation by another party is of necessity adverse to the prior location.

Edward T. Dwyer, 38 IBLA 144 (Nov. 30, 1978)

For the purpose of Departmental adjudication, an amended location is one made in furtherance of an earlier valid location, while a relocation is one which is adverse to the prior location.

An amended location notice generally relates back, where no adverse rights have intervened, to the date of the original location. To the extent, however, that an amended location merely furthers rights acquired by a valid subsisting location and does not embrace additional or new land, withdrawal of land subject to existing rights will not prevent the amended location from relating back to the original location.

Since an amended notice merges with the original notice, the filing of the amended notice, for purposes of recordation under either sec. 8 of the Mining in the Parks

MINING CLAIMS--Continued

RELOCATION--Continued

Act, 90 Stat. 1342, 1343, 16 U.S.C. § 1907 (1976), or sec. 314 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2744, 2769, 43 U.S.C. § 1744 (1976), together with such other information required by the applicable regulations, constitutes compliance with the recording requirements of those Acts.

Except for claims held under 30 U.S.C. § 38 (1976), a failure to record a mining claim as required by State law, coupled with a withdrawal of the land prior to any curative action, invalidates the claim, and thus precludes subsequent amendment of the claim.

An oral transfer of a mining claim, though contrary to the statute of frauds, will not serve to invalidate the claim, and a person subsequently seeking to record the claim will be afforded the opportunity to prove that the transfer actually occurred.

Where there are factual questions relating to whether action taken subsequent to a withdrawal is in the nature of an amendment or whether it constitutes a relocation, the mineral claimant will be granted the opportunity to show that the subsequent action was a permissible amendment.

R. Gail Tibbetts et al., 43 IBLA 210 (Oct. 5, 1979)
86 I.D. 538

An amended location notice generally relates back to the date of the original location notice, that is, to the extent that an amended location merely furthers rights acquired by a prior subsisting location and does not embrace additional or new land, withdrawal of land subject to existing rights prior to the filing of the amended location and subsequent to the original location will not invalidate the claims.

Where there are factual questions relating to whether refilings subsequent to a withdrawal were in the nature of an "amended locations" or whether they constituted "relocations," the matter must be referred for a hearing to allow the claimant the opportunity to show that subsequent filings have been amended locations, and that it is thus the successor in an unbroken chain of title dating back to the original location.

American Resources, Ltd., 44 IBLA 220 (Dec. 11, 1979)

"Relocation." A relocation of a mining claim is best defined as a location adverse to the prior locations.

"Amended Location." An amended location of a mining claim is best defined as one in furtherance of an earlier, valid location, and a subsequent location referring to the same parcel of land, filed by the same party, changing only the name of the claim, will be deemed an amended location.

An "amended location" generally relates back, where no adverse rights have intervened, to the date of the original location, but where there has been a withdrawal, a subsequent location relates back only to the extent that such a location merely furthers rights acquired by a valid subsisting location and does not embrace additional or new land.

When on appeal from a Bureau of Land Management decision, information is submitted upon which it is alleged that a location relates back to a prewithdrawal location, which information has not been evaluated by BLM, the decision may be set aside and the case remanded.

James C. Haight, 44 IBLA 240 (Dec. 11, 1979)

MINING CLAIMS--Continued

SPECIAL ACTS

If mining claimants possess the essential qualifications as to citizenship, and if they peacefully entered and occupied the land and discovered a valuable mineral deposit thereon at a time when both the land and the mineral were subject to appropriation under the mining laws, and if they thereafter remained in peaceful, exclusive possession and openly worked the claim for the period prescribed by the State statute of limitations for mining claims, and expended at least the minimum amount of money prescribed by law in the improvement of the claim, they have thereby established their right to receive a patent pursuant to 30 U.S.C. § 38 (1970) notwithstanding their error in locating and recording their claim under the statute pertaining to placer locations rather than properly under the lode mining law, assuming that there has been no intervening loss of discovery.

Estate of Arthur C. W. Bowen (Deceased), 18 IBLA 375 (Jan. 30, 1975)

Where at a hearing held pursuant to sec. 7 of the Mining Claims Rights Restoration Act, 30 U.S.C. § 621(b) (1970), the mining claimant, prior to the taking of any evidence, enters into a stipulation while laboring under confusion as to the effect of the stipulation, and the stipulation legally precludes all forms of placer mining on his claim, the decision below relying on the stipulation will be reversed and the case remanded for a full hearing on the merits.

Dwight Brooks, 20 IBLA 100 (Apr. 25, 1975)

The provision in 43 CFR 3825.1(b) that failure to pay annual rental on or before the anniversary date of a mining claim located in the Papago Indian Reservation "shall be deemed sufficient grounds for invalidating the claim" is directory, not mandatory. Where the mining claimant does not pay rental for 2 years on two claims and is 1-1/2 years late on other claims, and where he has not paid the rental prior to receiving decisions from the Bureau of Land Management holding the claims invalid, the mining claims must be held invalid.

Louis P. Ellsworth, Jr., 33 IBLA 26 (Nov. 22, 1977)

Where a corporation allegedly acquired a group of unpatented mining claims, but the instruments of conveyance and the abstract of title are subject to various objections by the Government's title examiner, which the corporation finds are difficult or impossible to cure, the corporation nonetheless may receive a patent to the claims pursuant to the Act of July 9, 1870 (R.S. § 2332; 30 U.S.C. § 38 (1970)), by demonstrating its qualifications under that Act.

Where it becomes necessary for a corporate applicant for mineral patent under R.S. § 2332, 30 U.S.C. § 38 (1970) to demonstrate that it and its predecessors have held and worked the subject mining claims for a specific term of years, the applicant may tack the predecessor's period of possession to its own if there was a privity of interest between them which was demonstrated by any agreement, conveyance or understanding, the purpose of which was to transfer the right and possession of the previous adverse claimant to the successor, and this is accompanied by actual delivery of possession.

An applicant for a mineral patent under 30 U.S.C. § 38 (1970) may be credited with actual possession and working of the claims for the period when the claims were occupied and worked by the claimant's lessee who recognized the title asserted by the claimant.

An applicant for a mineral patent under 30 U.S.C. § 38 (1970) may be credited with actual possession and working of the claims for the period when the claims were occupied and worked by others under a conditional contract of sale with the claimant, as well as the period after the claimant lawfully declared the contract forfeited but the putative purchasers continued to hold and work the claims, contending the continued validity of the sales contract, during the course of the claimant's litigation to eject them, which ultimately was successful.

Alaska Placer Co., 33 IBLA 187 (Dec. 21, 1977) 84 I.D. 990

An application under the Act of Apr. 23, 1932, 43 U.S.C. § 154 (1970), for restoration to mineral entry and location of lands within a reclamation withdrawal will ordinarily be rejected when the Bureau of Reclamation has recommended against it, the recommendation is premised upon the requirements of the public interest, and the reasons offered in support of the recommendation are cogent.

Edward J. Connolly, Jr., 34 IBLA 233 (Mar. 27, 1978)

The holder of a mining claim located within the Papago Indian Reservation under sec. 3 of the Act of June 18, 1934, 48 Stat. 984 (repealed, Act of May 27, 1955, 69 Stat. 67), is required to make the annual rental payment for the claim in advance (on or before the anniversary date of location of the claim). A decision invalidating a claim will be upheld where proceedings to void the claim are not initiated until several months after the rental due date, there is no evidence the rent was paid for the year, and appellant admits the failure to pay was an oversight.

John A. Cooley, 36 IBLA 245 (Aug. 14, 1978)

Before a claimant may successfully invoke 30 U.S.C. § 38 (1976) to cure deficiencies in the method of location of, or title to mining claims, it must first be established that each of the claims is supported by a discovery of a valuable deposit of mineral, and that claimant and/or predecessors have "held and worked" each of the claims for the requisite period. Where these showings are disputed, notice and opportunity for a hearing must be afforded.

Brattain Contractors, Inc., 37 IBLA 233 (Oct. 18, 1978)

Where it is determined that a person or association, they and their grantors, have met the fundamental requirements of the possessory rights section of the mining laws, 30 U.S.C. § 38 (1976), *i.e.*, where they have held and worked their claims in this instance for the qualifying period of 5 years under the Arizona statute of limitations covering actions to recover real property, they are entitled to a patent to those areas where there are no conflicting mining claims, regardless of the fact that the claims were improperly located as placer claims for perlite lode deposits.

United States v. Estate of Arthur C. W. Bowen (Deceased), and Superior Perlite Mines, Inc. (Contestees), Harborlite Corp. (Intervenor), 38 IBLA 390 (Jan. 8, 1979)

The collection of a yearly rental pursuant to the provisions of 43 CFR 3825.1(b) for a mining claim situated within the Papago Indian Reservation in no way presages the existence of a valid mining claim based on the discovery of a valuable mineral deposit.

United States v. J. E. Wilson, 44 IBLA 1 (Nov. 6, 1979)

SPECIFIC MINERAL(S) INVOLVED

Generally

A valuable deposit of geodes, round stones with crystalline centers and composed of recognized mineral substances, which possess an economic value in trade and the ornamental arts, and which are being removed by actual mining operations, is subject to location under the mining laws.

United States v. Glenn C. Bolinder and L. C. Turner, et al., 28 IBLA 187 (Dec. 6, 1976) 83 I.D. 609

"Leasing Act minerals." The Multiple Mineral Development Act, 30 U.S.C. § 524 (1970), reserved all Leasing Act minerals to the United States, and no rights to deposits of Leasing Act minerals are open to location under the mining laws under 30 U.S.C. § 525 (1970). "Leasing Act minerals" is defined as "all minerals which, upon Aug. 13, 1954, are provided in the mineral leasing laws to be disposed of thereunder." 30 U.S.C. § 530 (1970). Because leases for sodium, potassium, and "other related products" are authorized pursuant to 30 U.S.C. §§ 262, 282 (1970), "other related products" along with sodium and potassium fall within the category of Leasing Act minerals which include lithium which is dissolved in a sodium or potassium brine.

Foote Mineral Co., 34 IBLA 285 (Apr. 17, 1978) 85 I.D. 171

Bog Iron Ore

Bog iron ore, used as a soil conditioner or soil amendment, is not a locatable mineral deposit in the absence of a showing that it meets the test of *United States v. Bunkowski*, 5 IBLA 102, 113-16, 79 I.D. 43, 48-49 (1972), *i.e.*, it is found to be not just a physical amendment to the soil but a chemical amendment which alters and improves soil or plant chemistry.

United States v. Theresa B. Robinson, 21 IBLA 363 (Aug. 25, 1975) 82 I.D. 414

Clay

In determining whether a deposit of clay is locatable as a valuable mineral deposit under the mining laws, there is a distinction between a deposit considered to be a common or ordinary clay, which is not locatable, and a locatable deposit having exceptional qualities useful and marketable for purposes for which common clays cannot be used.

In a Government contest challenging the validity of mining claims located for a clay-type material, an adequate prima facie case is established where there are expert witness opinions that the deposit is only a common clay or shale and it cannot meet refractory standards. The contestees then must go forward with evidence to rebut the Government's case with a preponderance of the evidence.

"Common Clay." A "common clay" not locatable under the mining laws does not include clay having exceptional qualities which meets refractory and other quality

MINING CLAIMS--Continued

SPECIFIC MINERAL(S) INVOLVED--Continued

Clay--Continued

standards for highgrade ceramic products or other products requiring a high refractoriness, or which is useful for certain industrial uses, such as in the oil and oil well drilling industries, outside the manufacture of general clay products. It does include, however, clay usable or used only for structural and other heavy clay products, for pressed or face brick, as well as ordinary brick, and for pottery and ordinary earthenware and stoneware. The fact industrial and technological changes may make a certain clay deposit valuable for a given major manufacturer of brick, tile and other clay products, because it meets its peculiar specifications for blends with other raw materials, does not warrant a change from Departmental precedents and a strong Congressional policy establishing that clay usable only for such purposes is a common clay not locatable under the mining laws.

United States v. Thomas J. Peck et al., 29 IBLA 357 (Mar. 31, 1977) 84 I.D. 137

Feldspar

Ground feldspar, used as a soil conditioner or soil amendment, is not a locatable mineral deposit under the general mining laws in the absence of a showing that the mineral meets the test of *United States v. Bunkowski*, 5 IBLA 102, 113-16, 79 I.D. 43, 48-49 (1972), namely, that the mineral is found to be not just a physical amendment to the soil, but rather a chemical amendment which alters and improves soil or plant chemistry.

United States v. Robert W. Deal, 23 IBLA 378 (Feb. 4, 1976)

Gold

The "marketability test"--*i.e.*, to qualify as a valuable mineral deposit, the mineral deposit must be extractable, removable and marketable at a profit--is a complement to the "prudent man rule." The fact that a mineral such as gold possesses intrinsic value does not prevent the application of the marketability test to determine whether the deposit of such a mineral constitutes a discovery of a valuable mineral deposit under the mining laws.

United States v. Jack C. Harris, Jill L. Harris, 38 IBLA 137 (Nov. 29, 1978)

Water

Water is not a mineral which is locatable under the general mining law.

Robert L. Beery et al., 25 IBLA 287 (June 28, 1976) 83 I.D. 249

SURFACE USES

If a mining claim is located on or after July 23, 1955, it is subject, prior to the issuance of patent, to the right of the United States to manage surface resources or the surface to the extent necessary for access to adjacent land. 30 U.S.C. § 612 (1970).

J. Bernard Roberts, 21 IBLA 204 (July 30, 1975)

MINING CLAIMS--Continued

SURFACE USES--Continued

Under the Mining Claims Rights Restoration Act of 1955 it is proper to prohibit all placer mining operations on a group of mining claims on land within a powersite classification, where unrestricted placer mining on such land would most probably result in substantial interference with the use of the land for recreational purposes.

The Mining Claims Rights Restoration Act of 1955 gives the Secretary of the Interior no discretion to permit limited or restricted placer mining on land withdrawn or reserved for power development or powersites. The Secretary may permit either unrestricted placer mining or none at all. The only condition which he may impose on permission to mine is that the locator must restore the surface of the claim to its condition immediately prior to mining operations.

Boyd McGinn et al., 25 IBLA 188 (June 18, 1976)

A verified statement required under sec. 5 of the Surface Resources Act of July 23, 1955, 30 U.S.C. § 613 (1970), is properly rejected when the mining claim in connection with which it is filed, is declared to be null and void ab initio because it was located on land withdrawn from mineral location for power purposes prior to the Mining Claims Rights Restoration Act of Aug. 11, 1955, 30 U.S.C. § 621 *et seq.* (1970), and the land was segregated for purposes other than power development at that time and continuously thereafter.

Roy B. Cummins, 26 IBLA 223 (Aug. 17, 1976)

In a proceeding under sec. 5 of the Surface Resources Act of July 23, 1955, to determine the rights of the Government and a mining claimant as to the use and management of the surface and its resources on certain mining claims, it is incumbent upon the holder of a claim to demonstrate a discovery of a valuable mineral deposit within the claim as of the time of the Act, and also at the time of the hearing.

Under sec. 5 of the Surface Resources Act of July 23, 1955, the effect of a decision that no mineral discovery has been shown is to permit the Government to manage and dispose of the vegetative and other surface resources without disturbing claimant's right to develop his mining claims by using the subsurface and surface to the extent necessary to conduct his mining operations.

United States v. A. G. Bartell, 31 IBLA 47 (June 23, 1977)

The location of a mining claim simply to maintain a road and insure access to other claims beyond is not a legitimate purpose within the scope or intention of the general mining law.

Robert Cornett, 36 IBLA 84 (July 12, 1978)

Where a mining claim has been located pursuant to the Mining Claims Rights Restoration Act, 30 U.S.C. §§ 621-625 (1970), on land withdrawn for powersite, it is proper to prohibit placer mining if there is a likelihood of substantial interference with the use of the land for fishing, hunting, recreation, and the recovery of archaeological values.

The Mining and Minerals Policy Act of 1970, 30 U.S.C. § 21a (1970), does not require the granting of permission for placer mining operations on land within a

MINING CLAIMS--Continued

SURFACE USES--Continued

powersite withdrawal where such operations would probably interfere with other uses of the land.

United States v. Edward J. Connolly, Jr., Idaho Fish and Game Department (Intervenor), 40 IBLA 30 (Mar. 15, 1979)

A bond filed by a mining claim owner, covering lands patented under the Stock-Raising Homestead Act of Dec. 29, 1916, *as amended*, 43 U.S.C. §§ 291-301 (1970), need only be set in an amount to cover damages to crops, improvements, and the value of the land for grazing purposes within the limits of the mining claim. The *ad damnum* of the bond does not have to be sufficient to cover damages caused by a disruption of the surface owner's entire grazing operation.

Where surface owners object to the amount of a bond, submitted to the Bureau of Land Management under sec. 9 of the Stock-Raising Homestead Act of Dec. 29, 1916, *as amended*, 43 U.S.C. § 299 (1970), as being inadequate in amount, request a hearing thereon, but fail to tender any evidence which would impel the conclusion that a hearing is likely to be productive and meaningful, the request for a hearing is properly denied.

The owner of a patented stock-raising homestead, in which the minerals have been reserved to the United States under the Act of Dec. 29, 1916, *as amended*, has a sufficient adverse interest under 43 CFR 4.450-1, to initiate a contest against a mining claimant, alleging lack of discovery of valuable minerals.

The issue of whether a mining claim has been perfected by discovery of available mineral has no place in a proceeding to determine whether the amount of a stock-raising homestead bond is sufficient.

Elmer Silvera et al., 42 IBLA 11 (July 25, 1979)

TITLE

Under California law, when a mining claim is purchased by a husband using community property funds, even though title is taken in the husband's name alone, a gift to the husband will not be presumed in lieu of other evidence and the wife may be considered a qualified applicant for purposes of the Mining Claims Occupancy Act, 30 U.S.C. § 701 *et seq.* (1970).

Dwight H. and Verna K. Huston, 21 IBLA 24 (June 16, 1975)

The regulations of this Department have the force and effect of law, and are binding upon the Secretary and those who exercise his delegated authority. Where a patent application regulation requires "full, true, and complete abstracts," and the surface of the mining claim has not been patented, the processing of patent applications accompanied only by limited abstracts is properly suspended, pending compliance with the regulation. Where, however, the surface of the mining claim has been patented, *e.g.*, under the Stock-Raising Homestead Act, 43 U.S.C. §§ 291-300 (1970), the abstract generally need only reflect transactions affecting the mineral estate. A certificate of title is acceptable in lieu of an abstract in either situation

Kerr-McGee Nuclear Corp. et al., 41 IBLA 197 (June 22, 1979)

MINING CLAIMS--Continued

TITLE--Continued

The evidence of title, required by 43 CFR 3862.1-3 to be submitted in support of a mineral patent application need reflect only documents such as deeds, instruments, or actions appearing of record purporting to convey or to affect the title to each location. It is not necessary that the title data reflect in addition those deeds, instruments, or actions otherwise relating to the land in the mining claim.

Kerr-McGee Nuclear Corp. et al. (On Reconsideration), 43 IBLA 348 (Oct. 29, 1979)

TUNNEL SITES

Under 30 U.S.C. § 27 (1976), the Tunnel Site Act, a mining contest complaint charging that a tunnel site was not being worked with reasonable diligence is properly dismissed with respect to such charge where it sought to have such tunnel site declared null and void, but the statute provides only that the consequence of failure to work a tunnel site is the forfeiture of right to all undiscovered veins therein.

United States v. Livingston Silver, Inc., 43 IBLA 64 (Sept. 19, 1979)

WITHDRAWN LAND

A mining claim located on lands segregated or withdrawn from mineral location at the time of location is null and void ab initio.

Richard B. and Shirley A. Jarrett, 19 IBLA 78 (Feb. 27, 1975)

Mining claims are properly declared null and void ab initio where they are located on land which, on the date of location, was included in an application for withdrawal which previously had been noted on land office records.

John Boyd Parsons, 22 IBLA 328 (Nov. 10, 1975)

Merrill R. Moore, J. J. Adams, 43 IBLA 357 (Oct. 29, 1979)

While a mining location on land totally withdrawn may be declared null and void ab initio without hearing, if a claimant alleges facts which would establish an interest in a claim located prior to the withdrawal, the claim may not be declared null and void ab initio without opportunity for hearing.

Kathryn Lewis Stacy, 23 IBLA 166 (Dec. 24, 1975)

Mining claims and millsites located upon land which has been previously withdrawn from entry under the mining laws by a first-form reclamation withdrawal are void ab initio. Because Departmental Order No. 2515 delegated authority to revoke such a withdrawal to the Bureau of Reclamation with the concurrence of the Bureau of Land Management, the land remains withdrawn from mining locations when the Bureau of Land Management does not concur with the recommendation of the Bureau of Reclamation to revoke the withdrawal and restore the land to entry.

A request for a hearing pursuant to 43 CFR 4.415 for the purpose of taking testimony on the Bureau of Land Management's "continued refusal" to restore land in a reclamation withdrawal to entry will be denied. An appeal from a decision declaring mining claims and millsites null and void ab initio because the lands are in

MINING CLAIMS--Continued

WITHDRAWN LAND--Continued

the withdrawal may not serve as the vehicle for petitioning the Secretary of the Interior to revoke the withdrawal. Furthermore, even if the withdrawal were revoked and the lands opened to entry, this action could not revive mining claims which were void when located while the withdrawal was in effect and the land closed to entry under the mining laws.

J. F. Hinds et al., 25 IBLA 67 (June 1, 1976)
83 I.D. 275

The Wild and Scenic Rivers Act withdrew from appropriation under the mining laws the minerals in Federal lands which constitute the bed or bank or are situated within one quarter mile of the bank of any river listed as a potential addition to the Wild and Scenic River System. This withdrawal does not extend to minerals in lands near tributaries of designated rivers unless the tributaries were expressly included.

Walter B. Freeman et al., 25 IBLA 150 (June 10, 1976)

A mining claim located before Aug. 11, 1955, on land within an existing powersite withdrawal is properly declared null and void as the land was then closed to mineral entry. Claims located prior to that date were not resuscitated by the Mining Claims Rights Restoration Act of 1955.

Beverly Trull, 25 IBLA 157 (June 10, 1976)

Mining claims located on land withdrawn from all forms of entry are null and void from the beginning.

Robert L. Beery et al., 25 IBLA 287 (June 28, 1976)
83 I.D. 249

A mining claim located before Aug. 11, 1955, on land within an existing powersite withdrawal is properly declared null and void as the land was then closed to mineral entry. Void claims located prior to that date were not given life by the Mining Claims Rights Restoration Act of 1955.

David Loring Gamble, Darrel Houglum, 26 IBLA 249 (Aug. 18, 1976)

The rejection of an application under the Act of Apr. 23, 1932, 43 U.S.C. § 154 (1970), to open lands in a reclamation withdrawal to mineral location will be affirmed when the applicant fails to submit facts to show the basis for his knowledge or belief that the lands contain valuable mineral deposits. Merely to state the lands contain such deposits is not sufficient.

Joe Ashburn, 27 IBLA 227 (Oct. 12, 1976)

A mining claim located on land at a time when such land was withdrawn from mineral entry is properly declared null and void ab initio. The finding that appellants have no rights under Sept. 1974 locations does not affect any rights which may have been deeded to them by the holder of a 1952 claim located prior to the time the land was withdrawn from mineral locations.

W. R. and G. R. Strickler, 27 IBLA 267 (Oct. 26, 1976)

MINING CLAIMS--Continued

WITHDRAWN LAND--Continued

A mining claim located on land at a time when such land was withdrawn from mineral entry is properly declared null and void ab initio.

W. A. Todd, A. E. Johnson, 28 IBLA 180 (Dec. 1, 1976)

Sally Lester et al., 31 IBLA 43 (June 21, 1977)

J. E. Nesmith, 38 IBLA 357 (Dec. 22, 1978)

Mining claims located when the land has been withdrawn from all public entry by a first-form reclamation withdrawal are properly declared null and void ab initio. Subsequent restoration of the land to mineral entry does not revive the invalid locations.

Mining claims are properly declared null and void ab initio when the locations were not perfected by performance of the condition precedent to the opening of withdrawn land to location, entry and patent under the mining laws.

Floyd W. McCarty, 28 IBLA 246 (Dec. 20, 1976)

Where land occupied by a mining claim has been withdrawn from operation of the mining laws, the validity of the claim must be tested by the value of the mineral deposit as of the date of the withdrawal, as well as of the date of the hearing.

United States v. Fred and Eileen Garner, 30 IBLA 42 (Apr. 18, 1977)

United States v. Richard B. Walls, 30 IBLA 333 (June 7, 1977)

A mining claim which at the time of its location is situated on withdrawn land confers no rights on the locator and is void ab initio.

Rod Knight, 30 IBLA 224 (May 26, 1977)

A mining claim located on land withdrawn from location under the mining laws is null and void ab initio--without legal effect from the beginning. Such a mining claim may properly be declared null and void without a hearing where the records of the Department of the Interior show that the land was withdrawn from the operation of the United States mining laws at the time the claim was located.

Charles E. Nielsen, Pauline Nielsen, 30 IBLA 235 (May 26, 1977)

A mining claim located for a nonmetalliferous mineral on land at a time when such land was withdrawn from mineral entry for nonmetalliferous minerals is properly declared null and void ab initio.

David Budinski et al., 31 IBLA 139 (June 30, 1977)

Mining claims located upon land which has been previously withdrawn from all forms of entry are null and void ab initio, creating no rights in the locator.

While a mining location on land totally withdrawn may be declared null and void ab initio without hearing, if a claimant alleges facts which would establish an interest in a claim located prior to the withdrawal,

MINING CLAIMS--Continued

WITHDRAWN LAND--Continued

the claim may not be declared null and void ab initio without notice and an opportunity for hearing.

Cajon Minerals, Inc., 31 IBLA 188 (July 5, 1977)

A mining claim located on withdrawn land confers no right on the locator and is null and void ab initio. However, when BLM has so held claims to be null and void and it appears that the claims may not be invalid due to status factors, the case will be remanded for further consideration.

Douglas L. Russell et al., 31 IBLA 237 (July 12, 1977)

Where prior to 1920 a powersite withdrawal was created by executive order under authority of the Act of June 25, 1910, the withdrawn land remained open to the location of mining claims for metalliferous minerals until passage of the Federal Power Act on June 10, 1920, which closed powersites to all entry, location or disposal. Any mining claim located thereafter on powersite lands is void ab initio unless the land has been restored to such entry in accordance with sec. 24 of the Federal Power Act or the location of the claim has been made in accordance with the Act of Aug. 11, 1955, 30 U.S.C. § 621 (1970). The latter Act did not operate retroactively to validate void claims.

Land reserved for a reservoir site by executive order under authority of the Pickett Act of June 25, 1910, to conserve water for irrigation purposes, remained open to the location of mining claims for metalliferous minerals, and the provisions of the Federal Power Act of June 10, 1920, would not operate to bar the location of such claims unless and until a powersite classification was subsequently imposed.

Henry Stagnaro, 31 IBLA 357 (July 25, 1977)

A mining claim located before Aug. 11, 1955, on land within an existing highway material site withdrawal is properly declared null and void as the land was then closed to mineral entry. Void claims located prior to that date were not given life by the Mining Claims Rights Restoration Act of 1955.

Treva L. Berger, 31 IBLA 389 (Aug. 19, 1977)

Mining claims located on land previously withdrawn from entry under the mining laws are properly declared null and void ab initio.

W. B. C. Croley, 32 IBLA 5 (Aug. 24, 1977)

Mining claims and millsites located upon land which has been previously withdrawn from entry under the mining laws by a first-form withdrawal are null and void ab initio.

Everett E. Willmarth et al., 32 IBLA 145 (Sept. 12, 1977)

When land is withdrawn from the operation of the mining laws subject to valid existing rights, such as by the creation of the North Cascades National Park on Oct. 2, 1968, the validity of a mining claim located prior to the withdrawal must be established as of the date of the withdrawal as well as of the date of the hearing.

United States v. Robert A. Bukke (Registered Agent), Valumines, Inc., et al., 32 IBLA 155 (Sept. 12, 1977)

A mining claim located on land at a time when the land is segregated from mining location by a proposed withdrawal is properly declared null and void ab initio. Where the official records of the Department reflect such proposed withdrawal, a hearing is not required to establish the invalidity of the claim.

Mark W. Evans and John L. Cutro, 33 IBLA 32 (Nov. 25, 1977)

When land is withdrawn from the operation of the mining laws subject to valid existing rights, such as the Organ Pipe Cactus National Monument on Sept. 28, 1976, the validity of a mining claim located prior to the withdrawal must be established as of the date of the withdrawal as well as of the date of the hearing.

United States v. Lewis L. Wetherlin, Gabriele Wetherlin, 33 IBLA 86 (Dec. 8, 1977)

A mining claim located on land which is not subject to mineral entry at the time of location is null and void from its inception. Where a mining claimant states in his notice of location that his mining claims were located on dates subsequent to a withdrawal which included the land encompassed by the mining claim, but indicates in his application for survey that the claims were located prior to the withdrawal, it is proper for the State Office to declare the mining claims null and void on the basis of the information in the notice of location where the claimant failed to submit evidence that the claims were in fact located prior to the withdrawal.

The purpose of an amended location is to cure imperfections and correct errors, which in the absence of intervening rights relates back to the date of original location. An amended location made while land is withdrawn from mineral entry is ineffectual.

Ray L. Virgin, 33 IBLA 354 (Jan. 18, 1978)

Under 43 CFR 2091.6-4 and 2627.4(b), the filing of a State's application to select lands segregates these lands from all subsequent appropriation, including locations under the mining laws.

A mining claim located on land which was then segregated and closed to mineral entry is properly declared null and void ab initio.

Janelle R. Lester, Gary B. Deeter, Verna E. Lyons, Harry D. Lyons, 34 IBLA 81 (Feb. 22, 1978)

Ordinarily an application to restore lands within a reclamation withdrawal to mineral entry pursuant to the Act of Apr. 23, 1932, 43 U.S.C. § 154 (1970), will be rejected by the Bureau of Land Management where the Bureau of Reclamation recommends against restoration; however, on appeal a case may be remanded for further consideration by the appropriate agencies, including preparation of a mineral report, where it appears warranted by the appellant's showings and willingness to propose terms and conditions to protect the Government's interest.

G. W. Daily, 34 IBLA 176 (Mar. 14, 1978)

An application under the Act of Apr. 23, 1932, 43 U.S.C. § 154 (1970), for restoration to mineral entry and location of lands within a reclamation withdrawal will ordinarily be rejected when the Bureau of Reclamation has recommended against it, the recommendation is premised upon the requirements of the public interest, and the reasons offered in support of the recommendation are cogent.

Edward J. Connolly, Jr., 34 IBLA 233 (Mar. 27, 1978)

A mining claim located on land in Alaska at a time when such land was withdrawn from mineral entry is properly declared null and void ab initio.

Sally Lester et al. (On Reconsideration), 35 IBLA 61 (May 10, 1978)

A mining claim or millsite located on land at a time when the land is withdrawn from mineral location is properly declared null and void.

Floyd G. Brown, 35 IBLA 110 (May 15, 1978)

A mining claim, located at a time when the land is withdrawn from mineral entry, may be properly declared null and void ab initio without a hearing.

Edward L. Macauley, Martha D. Macauley, 35 IBLA 202 (May 24, 1978)

Federal-American Partners, 37 IBLA 330 (Oct. 26, 1978)

Where land is withdrawn from the operation of the mining laws subsequent to the location of a mining claim, the validity of the claim cannot be recognized unless the claim was supported by a valid discovery at the time of the withdrawal. In addition, even though there may have been a proper discovery at the time of a withdrawal or at some other time in the past, a mining claim cannot be considered valid unless the claim is at present supported by a sufficient discovery. The loss of the discovery, either through exhaustion of the minerals, changes in economic conditions, or other circumstances, results in the loss of the location.

United States v. Milton Wichner, 35 IBLA 240 (May 30, 1978)

The President had nonstatutory authority to withdraw public land in addition to authority conferred upon him by Pickett Act, *as amended*, 43 U.S.C. §§ 141, 142 (1970). Such nonstatutory authority was not limited by terms of 43 U.S.C. § 142 (1970) providing that withdrawn lands shall remain open to location for metalliferous minerals.

Appellant may not use appeal to Board or request for hearing under 43 CFR 4.415 as vehicle for petitioning Secretary of the Interior to have withdrawal revoked and land restored to entry.

Mining claims located on lands previously withdrawn from entry under the mining laws are null and void ab initio.

Harry H. Wilson, 35 IBLA 349 (June 19, 1978)

A mining claim located on land withdrawn from location under the mining laws is null and void ab initio--without legal effect from the beginning. Such a mining claim may properly be declared null and void without a hearing where the records of the Department of the Interior show that the land was withdrawn from the operation of the United States mining laws at the time the claim was located.

Mining claims located on land withdrawn from such entry are null and void ab initio and will not be validated by the modification or revocation of the order of withdrawal to open the land thereafter to mineral entry.

James Messano, 35 IBLA 383 (June 23, 1978)

The Wild and Scenic Rivers Act withdrew from appropriation under the mining laws the minerals in Federal lands which constitute the bed or bank or are situated within one-quarter mile of the bank of any river listed as a potential addition to the Wild and Scenic River System. Land within one-quarter mile of the bank of the Illinois River, Oregon, a river designated in sec. 5(a) of the Act as a potential addition to the system, is withdrawn from mineral entry and therefore, not available for mining claims.

Mining claims located on lands within a withdrawal which were not open to mineral entry are properly declared null and void ab initio.

Robert Cornett, 36 IBLA 84 (July 12, 1978)

A mining claim located on land at a time when the land is segregated from mining location by a proposed withdrawal is properly declared null and void ab initio.

A mining claim located on land which is not subject to mineral entry at the time of location is null and void from its inception. Where a mining claimant states in his notice of location that his mining claims were located on dates subsequent to the filing of an application for withdrawal which included the land encompassed by the mining claim, but indicates on appeal that the claims designated in the notice were merely a "regrouping," of identical claims filed prior to the segregation of the lands, it is nevertheless proper for the State Office to declare the mining claims null and void since mining claims located on withdrawn land are not subject to recordation.

Wilbur G. Hallauer, 36 IBLA 144 (July 26, 1978)

A mining claim is properly declared null and void ab initio where the land on which it is located was segregated by a formal forest exchange application, which withdrew the selected public lands from location under the mining laws prior to the time that the mineral location was made.

Charles A. Morriss, 36 IBLA 372 (Aug. 31, 1978)

A mining claim located on land which was then segregated and closed to mineral entry is properly declared null and void ab initio.

Victor A. G. Schmidt, 36 IBLA 394 (Sept. 5, 1978)

Lands withdrawn for a powersite reservation, with certain exceptions, are open to entry for location and patent of mining claims with a reservation of power rights in the lands to the United States and subject to the conditions in the Mining Claims Rights Restoration Act. Where the BLM decision declaring mining claims null and void did not consider the effect of this Act on the withdrawal, the decision will be set aside and remanded for appropriate action.

Robert D. Upton and William C. Wells, 38 IBLA 90 (Nov. 15, 1978)

Mining claims on land subsequently withdrawn from mineral entry are not subject to relocation, despite failure of the original locators to do assessment work, because relocation by another party is of necessity adverse to the prior location.

Edward T. Dwyer, 38 IBLA 144 (Nov. 30, 1978)

Mining claims located on lands previously withdrawn from entry under the mining laws are null and void ab initio in the absence of a showing that the claimants had a valid existing right to the claims which predates the withdrawal. Where claimants assert that they have simply filed amended notices of location of claims which were first located prior to the withdrawal, but the record indicates that the claims are in fact not the same as those located prior to the withdrawal, there is no valid existing right to the new claims, and they are properly declared null and void ab initio.

Piter Ekker, Kerry Ekker, 38 IBLA 277 (Dec. 13, 1978)

A mining claim located on land which is not subject to mineral entry at the time of location is null and void from its inception and confers no rights on the locator.

W. R. and Margaret W. Collier, 39 IBLA 81 (Jan. 24, 1979)

A mining claim located on land which has been previously withdrawn from location under the mining laws may be properly declared null and void ab initio without a hearing. Such a claim confers no rights on the locator or a subsequent grantee and will not be validated by the modification or revocation of the order of withdrawal to open the land thereafter to mineral entry. It is immaterial whether the lands are presently being, or have ever been, used for the purpose for which they were withdrawn.

Wendell L. Garrett d.b.a. Garrett Industries, 39 IBLA 85 (Jan. 24, 1979)

Designation of a river for potential addition to the national wild and scenic rivers system, pursuant to the Wild and Scenic Rivers Act of 1968, *as amended*, 16 U.S.C. § 1271 *et seq.* (1976), withdraws Federal lands constituting the bed or bank or within one-quarter mile of the bank of such river from all forms of appropriation under the mining laws, and on appeal the mining claimant bears the burden of showing by survey or other evidence that his claim is outside the withdrawn area.

Portions of mining claims located on lands within a withdrawal and not open to mineral entry are properly declared null and void ab initio.

Barry C. Binning, 39 IBLA 390 (Feb. 28, 1979)

Lands segregated on the public records by a proposed withdrawal posted Apr. 6, 1973, or a Recreational and Public Purposes Classification filed Nov. 13, 1956, were not available for the location of mining claims, and claims thereafter located are null and void ab initio.

Delmer McLean et al., 40 IBLA 34 (Mar. 15, 1979)

A mining claim located on land previously withdrawn from appropriation under the mining laws is null and void ab initio.

Gerald Byron Bannon, 40 IBLA 162 (Mar. 30, 1979)

Tilden Holloway, Roland Wright, 43 IBLA 134 (Sept. 28, 1979)

Two mining claims, located at a time when the land is withdrawn from mineral entry, may be properly declared null and void ab initio without a hearing. Such a result obtains despite reference to a location notice prior to the withdrawal where appellants do not make a showing of sufficient specific facts upon which to predicate a hearing, including which of the claims the previous location relates to, the boundaries thereof, whether the previous location was for a locatable mineral under a withdrawal order then in force, and the name of the previous locator.

The Heirs of F. E. Harris, 42 IBLA 44 (July 31, 1979)

Where the land on which the mining claim is located is subsequently withdrawn, the validity of the claim must be determined as of the date of the withdrawal and through the date of the hearing. If there was no discovery as of the date of the withdrawal, the land would not be excepted from the effect of the withdrawal and the claim could not thereafter become valid even though the requirement of discovery was satisfied at a later date.

It was proper to deny mining claimants' request to re-drill on mining claims after the land was withdrawn from mining where the work would be an effort to make a discovery of a valuable mineral deposit within the claim rather than simply a confirmation or corroboration of a discovery prior to the withdrawal.

United States v. William Lavon Chappell et al., 42 IBLA 74 (Aug. 13, 1979)

Under 43 CFR 2091.6-4 and 2627.4(b), the filing of a State's application to select lands segregates these lands from all subsequent appropriation, including locations under the mining laws.

A mining claim located on land which was then segregated and closed to mineral entry is properly declared null and void ab initio.

Joe C. Cereseo, 43 IBLA 136 (Sept. 28, 1979)

MINING CLAIMS--Continued

WITHDRAWN LAND--Continued

For the purpose of Departmental adjudication, an amended location is one made in furtherance of an earlier valid location, while a relocation is one which is adverse to the prior location.

An amended location notice generally relates back, where no adverse rights have intervened, to the date of the original location. To the extent, however, that an amended location merely furthers rights acquired by a valid subsisting location and does not embrace additional or new land, withdrawal of land subject to existing rights will not prevent the amended location from relating back to the original location.

Since an amended notice merges with the original notice, the filing of the amended notice, for purposes of recordation under either sec. 8 of the Mining in the Parks Act, 90 Stat. 1342, 1343, 16 U.S.C. § 1907 (1976), or sec. 314 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2744, 2769, 43 U.S.C. § 1744 (1976), together with such other information required by the applicable regulations, constitutes compliance with the recording requirements of those Acts.

Except for claims held under 30 U.S.C. § 38 (1976), a failure to record a mining claim as required by State law, coupled with a withdrawal of the land prior to any curative action, invalidates the claim, and thus precludes subsequent amendment of the claim.

An oral transfer of a mining claim, though contrary to the statute of frauds, will not serve to invalidate the claim, and a person subsequently seeking to record the claim will be afforded the opportunity to prove that the transfer actually occurred.

Where there are factual questions relating to whether action taken subsequent to a withdrawal is in the nature of an amendment or whether it constitutes a relocation, the mineral claimant will be granted the opportunity to show that the subsequent action was a permissible amendment.

R. Gail Tibbetts et al., 43 IBLA 210 (Oct. 5, 1979)
86 I.D. 538

A mining claim located prior to Aug. 11, 1955, on lands withdrawn for a powersite is null and void ab initio. The passage of the Mining Claims Rights Restoration Act of Aug. 11, 1955, 30 U.S.C. § 621 (1976), did not give life to void claims which had been located on withdrawn lands prior to the date of the Act.

United States v. Elbert Gassaway, 43 IBLA 382 (Oct. 31, 1979)

Where mining claims were originally located on land which was withdrawn from mineral location, the claims will be declared null and void ab initio.

An amended location notice generally relates back to the date of the original location notice, that is, to the extent that an amended location merely furthers rights acquired by a prior subsisting location and does not embrace additional or new land, withdrawal of land subject to existing rights prior to the filing of the amended location and subsequent to the original location will not invalidate the claims.

Where there are factual questions relating to whether refilings subsequent to a withdrawal were in the nature of an "amended locations" or whether they constituted "relocations," the matter must be referred for a hearing to allow the claimant the opportunity to show that subsequent filings have been amended locations, and

MINING CLAIMS--Continued

WITHDRAWN LAND--Continued

that it is thus the successor in an unbroken chain of title dating back to the original location.

American Resources, Ltd., 44 IBLA 220 (Dec. 11, 1979)

"Relocation." A relocation of a mining claim is best defined as a location adverse to the prior locations.

"Amended Location." An amended location of a mining claim is best defined as one in furtherance of an earlier, valid location, and a subsequent location referring to the same parcel of land, filed by the same party, changing only the name of the claim, will be deemed an amended location.

An "amended location" generally relates back, where no adverse rights have intervened, to the date of the original location, but where there has been a withdrawal, a subsequent location relates back only to the extent that such a location merely furthers rights acquired by a valid subsisting location and does not embrace additional or new land.

When on appeal from a Bureau of Land Management decision, information is submitted upon which it is alleged that a location relates back to a prewithdrawal location, which information has not been evaluated by BLM, the decision may be set aside and the case remanded.

James C. Haight, 44 IBLA 240 (Dec. 11, 1979)

MINING CLAIMS RIGHTS RESTORATION ACT

Where at a hearing held pursuant to sec. 2 of the Mining Claims Rights Restoration Act, 30 U.S.C. § 621(b) (1970), the mining claimant, prior to the taking of any evidence, enters into a stipulation while laboring under confusion as to the effect of the stipulation, and the stipulation legally precludes all forms of placer mining on his claim, the decision below relying on the stipulation will be reversed and the case remanded for a full hearing on the merits.

Dwight Brooks, 20 IBLA 100 (Apr. 25, 1975)

Under the Mining Claims Rights Restoration Act of 1955 it is proper to prohibit all placer mining operations on a group of mining claims on land within a powersite classification, where unrestricted placer mining on such land would most probably result in substantial interference with the use of the land for recreational purposes.

The Mining Claims Rights Restoration Act of 1955 gives the Secretary of the Interior no discretion to permit limited or restricted placer mining on land withdrawn or reserved for power development or powersites. The Secretary may permit either unrestricted placer mining or none at all. The only condition which he may impose on permission to mine is that the locator must restore the surface of the claim to its condition immediately prior to mining operations.

Boyd McGinn et al., 25 IBLA 188 (June 14, 1976)

Placer mining on claims located pursuant to the Mining Claims Rights Restoration Act will be prohibited where unrestricted mining activity would substantially interfere with other uses of the land.

United States v. Richard and Beverly Weigel, 26 IBLA 183 (Aug. 10, 1976)

A verified statement required under sec. 5 of the Surface Resources Act of July 23, 1955, 30 U.S.C. § 613 (1970), is properly rejected when the mining claim in connection with which it is filed, is declared to be null and void ab initio because it was located on land withdrawn from mineral location for power purposes prior to the Mining Claims Rights Restoration Act of Aug. 11, 1955, 30 U.S.C. § 621 *et seq.* (1970), and the land was segregated for purposes other than power development at that time and continuously thereafter.

Roy B. Cummins, 26 IBLA 223 (Aug. 17, 1976)

The Department of the Interior may contest the validity of any unpatented mining claims located on public land, including claims located within powersite withdrawals; the Department's authority to contest the validity of mining claims was not diminished by the Mining Claims Rights Restoration Act of 1955.

David Loring Gamble, Darrel Douglas, 26 IBLA 249 (Aug. 18, 1976)

Where prior to 1920 a powersite withdrawal was created by executive order under authority of the Act of June 25, 1910, the withdrawn land remained open to the location of mining claims for metalliferous minerals until passage of the Federal Power Act on June 10, 1920, which closed powersites to all entry, location or disposal. Any mining claim located thereafter on powersite lands is void at initio unless the land has been restored to such entry in accordance with sec. 24 of the Federal Power Act or the location of the claim has been made in accordance with the Act of Aug. 11, 1955, 30 U.S.C. § 621 (1970). The latter Act did not operate retroactively to validate void claims.

Henry Stagnaro, 31 IBLA 357 (July 25, 1977)

Lands which are covered by a license for a power project issued by the Federal Power Commission are not open to mineral location.

Raymond C. Gardner et al., 34 IBLA 179 (Mar. 14, 1978)

The preservation of important and critical habitats for wildlife is a use warranting the prohibition of mining from an area in accordance with the Mining Claims Rights Restoration Act of 1955, 30 U.S.C. § 621 (1970); however, where the only use shown on eight mining claims is likely destruction of a dove nesting and breeding habitat which has produced only approximately .11 of 1 percent of the 1976 total hunters' kill of over 2-1/2 million doves in the State of Arizona and there is insufficient evidence to establish that the habitat is a critical and important habitat for the doves, an administrative law judge's decision to allow placer mining operations will be affirmed.

United States v. Mineral Economics Corp., 34 IBLA 258 (Mar. 30, 1978)

Lands withdrawn for a powersite reservation, with certain exceptions, are open to entry for location and patent of mining claims with a reservation of power rights in the lands to the United States and subject to the conditions in the Mining Claims Rights Restoration Act. Where the BLM decision declaring mining claims null and void did not consider the effect of this Act on the withdrawal, the decision will be set aside and remanded for appropriate action.

Robert D. Upton and William C. Wells, 38 IBLA 90 (Nov. 15, 1978)

Where a mining claim has been located pursuant to the Mining Claims Rights Restoration Act, 30 U.S.C. §§ 621-625 (1970), on land withdrawn for powersite, it is proper to prohibit placer mining if there is a likelihood of substantial interference with the use of the land for fishing, hunting, recreation, and the recovery of archaeological values.

The Mining and Minerals Policy Act of 1970, 30 U.S.C. § 21a (1970), does not require the granting of permission for placer mining operations on land within a powersite withdrawal where such operations would probably interfere with other uses of the land.

United States v. Edward J. Connolly, Jr., Idaho Fish and Game Department (Intervenor), 40 IBLA 30 (Mar. 15, 1979)

A mining claim located prior to Aug. 11, 1955, on lands withdrawn for a powersite is null and void ab initio. The passage of the Mining Claims Rights Restoration Act of Aug. 11, 1955, 30 U.S.C. § 621 (1976), did not give life to void claims which had been located on withdrawn lands prior to the date of the Act.

United States v. Elbert Gassaway, 43 IBLA 382 (Oct. 31, 1979)

MINING OCCUPANCY ACT

GENERALLY

An application for relief under the Mining Claims Occupancy Act, 30 U.S.C. § 701 *et seq.* (1970), which is filed more than 3 years after the filing deadline of June 30, 1971, is fatally defective and cannot be considered under the Act.

John Paul Hinds, Ruth M. Hinds, 18 IBLA 385 (Jan. 31, 1975)

The determination of the extent of the relief that will be granted to a qualified applicant under the Mining Claims Occupancy Act of Oct. 23, 1962, is committed to the discretion of the Secretary of the Interior, and where the determination to award an applicant a lifetime lease instead of a fee interest rests upon a rational basis, it will not be disturbed.

Edward W. Kirk, Beatrice Anne Kirk, Ralph Hevener, Ramona P. Hevener, 20 IBLA 156 (May 5, 1975)

The Mining Claims Occupancy Act was intended to provide relief for persons who used their mining claims as "a principal place of residence" and for whom a hardship would be visited if they were required to move from their long-established homes on invalid mining claims.

An applicant under the Mining Claims Occupancy Act of Oct. 23, 1962, has the burden of satisfactorily showing that she and any predecessors in interest occupied valuable improvements on a mining claim as a principal place of residence for the 7-year period immediately preceding July 23, 1962. A mere conclusive statement that she has so used the tract is not sufficient. Where specific factual assertions demonstrate only intermittent use, an application is properly rejected.

Catherine B. Blythe, 21 IBLA 217 (July 31, 1975)

MINING OCCUPANCY ACT--Continued

GENERALLY--Continued

A mining claim void ab initio may be a proper basis for a conveyance under the Mining Claims Occupancy Act, but pursuant to 30 U.S.C. § 706 (1970) trespass damages should ordinarily be assessed.

Feliciano Y. Jimenez, Margarita R. Jimenez, 30 IBLA 82 (Apr. 27, 1977)

Occupancy of a cabin which is not physically located within the boundaries of a relinquished mining claim cannot serve as a basis for the conveyance of land under the Act of Oct. 23, 1962.

Vera Rossman, 36 IBLA 93 (July 12, 1978)

ACREAGE TO BE CONVEYED

Where an offer of land under the Mining Claims Occupancy Act may include land within a right-of-way being condemned for a State highway, and where such evidence was not before the Board when it considered the appeal, a petition for reconsideration may be granted.

Robert P. Starritt (On Reconsideration), 26 IBLA 205 (Aug. 16, 1976)

CONVEYANCES

Under 30 U.S.C. § 703 (1970), where land applied for under the Mining Claims Occupancy Act is withdrawn in aid of a Governmental unit other than the Department of the Interior, the Secretary may convey an interest in the land only with the consent of the head of the Governmental unit concerned.

Dwight H. and Verna K. Huston, 21 IBLA 24 (June 16, 1975)

PRINCIPAL PLACE OF RESIDENCE

The Mining Claims Occupancy Act, 30 U.S.C. § 701 et seq. (1970), only requires that valuable improvements on an unpatented mining claim constitute a principal place of residence for a qualified applicant, not that such be the principal place of residence of the applicant.

Under the Mining Claims Occupancy Act, 30 U.S.C. § 701 et seq. (1970), where the record includes a statement as to a principal place of residence which conflicts with a more detailed statement made under oath by the same person, the matter may be remanded for hearing in order to resolve the conflict and protect the rights of a third party.

For purposes of the Mining Claims Occupancy Act, 30 U.S.C. § 701 et seq. (1970), under certain circumstances a principal place of residence of minor children and wife may be considered a principal place of residence of the father-husband.

Under the Mining Claims Occupancy Act, 30 U.S.C. § 701 et seq. (1970), where a couple owns no other residence, a principal place of residence held by a disabled husband, for reasons of health, may be considered a principal place of residence of his wife, even though she is customarily away from the mining claim during the week in order to work elsewhere.

Dwight H. and Verna K. Huston, 21 IBLA 24 (June 16, 1975)

MINING OCCUPANCY ACT--Continued

PRINCIPAL PLACE OF RESIDENCE--Continued

An applicant under the Mining Claims Occupancy Act of Oct. 23, 1962, has the burden of satisfactorily showing that she and any predecessors in interest occupied valuable improvements on a mining claim as a principal place of residence for the 7-year period immediately preceding July 23, 1962. A mere conclusive statement that she has so used the tract is not sufficient. Where specific factual assertions demonstrate only intermittent use, an application is properly rejected.

Catherine B. Blythe, 21 IBLA 217 (July 31, 1975)

A cabin which is used for only a short period of time each year, primarily during the summer months, does not constitute "a principal place of residence" within the meaning of sec. 2 of the Act of Oct. 23, 1962, and an application for the conveyance of land based upon such use is properly rejected.

Vera Rossman, 36 IBLA 93 (July 12, 1978)

QUALIFIED APPLICANT

In order for an applicant to qualify for a conveyance under the Mining Claims Occupancy Act, 30 U.S.C. § 701 et seq. (1970), he must show that as of Oct. 23, 1962, he was a residential occupant-owner of valuable improvements in an unpatented mining claim which constituted a principal place of residence for him and his predecessors in interest for not less than 7 years prior to July 23, 1962.

Under California law, when a mining claim is purchased by a husband using community property funds, even though title is taken in the husband's name alone, a gift to the husband will not be presumed in lieu of other evidence and the wife may be considered a qualified applicant for purposes of the Mining Claims Occupancy Act, 30 U.S.C. § 701 et seq. (1970).

Dwight H. and Verna K. Huston, 21 IBLA 24 (June 16, 1975)

One alleging that he is a "qualified applicant" under the Mining Claims Occupancy Act, as amended, 30 U.S.C. § 701 et seq. (1970), must file a timely application in his own name to be eligible for the relief provided by the Act. Where a son who may have been qualified under the Act does not file timely, but an application is filed by his mother who is record title owner in her own name, that application cannot be considered to have been made on behalf of the son, even though he may be the equitable owner of the claim on the basis of being the beneficiary of an oral trust in the claim created by his mother and (now deceased) father at the time they purchased the claim.

An application filed under the Mining Claims Occupancy Act, as amended, 30 U.S.C. § 701 et seq. (1970), is properly rejected on the basis that the applicant is not qualified for relief under the Act where the record shows that the applicant did not live on the claim or use it as a principal place of residence during the qualifying period of time set forth in the Act.

Jessie A. Brown, 23 IBLA 23 (Dec. 1, 1975)

MINING OCCUPANCY ACT--Continued

QUALIFIED APPLICANT--Continued

The fact that an applicant for relief under the Mining Claims Occupancy Act, *as amended*, 30 U.S.C. § 701 *et seq.* (1970), subsequent to filing the application, claims to be the trustee of an oral trust in a mining claim held for the benefit of her son, who occupied the claim, does not affect the statutory requirement that in order for an applicant to qualify under the Act he or she must be a residential occupant-owner. The applicant did not occupy the claim and her son did not file an application. Therefore, her application was properly rejected.

Jessie A. Brown (On Reconsideration), 28 IBLA 339 (Jan. 17, 1977)

MISTAKES

GENERALLY

Even if it be established that a controlling regulation had been violated in previous cases, such violation does not afford a valid predicate for further violations of the regulation.

Mary Nan Spear, 25 IBLA 34 (May 5, 1976)

Even if it be established that the Department had not applied in other cases regulation 43 CFR 4115.2-1(e)(8), which requires termination of grazing privileges upon loss of ownership or control of base property, such failure to apply the regulation is not authority to further disregard the regulation.

Prior recognition of grazing privileges based on licensee's erroneous statement of ownership of base property does not estop the Department from canceling the privileges when it becomes aware of the facts.

Charles Stewart, 26 IBLA 160 (Aug. 4, 1976)

A past incorrect application of the law in adjudication of oil and gas lease offers is no authorization for failure to follow regulations in the case of an offer currently under adjudication.

David A. Provinse, 35 IBLA 217 (May 26, 1978)

BLM personnel may not attempt to "correct," complete, or interpret entries on oil and gas lease offer application forms in such a way as to perfect an otherwise unacceptable application, nor may an applicant "cure" a defect on his drawing entry card by the submission of supplemental information after the drawing.

Resources Exploration & Mining, Inc. (On Reconsideration), 43 IBLA 89 (Sept. 19, 1979)

MULTIPLE MINERAL DEVELOPMENT ACT

GENERALLY

Mining claims located in 1933 under the general mining laws, 30 U.S.C. § 21 *et seq.* (1970), on lands known to be valuable for minerals subject to leasing under the Mineral Leasing Act of Feb. 25, 1920, 30 U.S.C. § 181 *et seq.* (1970), are null and void ab initio because in 1933 such lands were not open to location and disposition under the mining laws; however, since the passage of the Act of Aug. 12, 1953, 30 U.S.C. § 501 (1970), and the Multiple Mineral Development Act of Aug. 13, 1954, 30 U.S.C. § 521 *et seq.* (1970), it is possible to locate a mining claim on lands covered by a mineral permit or lease, or application therefor, or which are known to be valuable for leasable minerals, but the leasable minerals are reserved to the United States.

United States v. Long Beach Salt Co., 23 IBLA 41 (Dec. 2, 1975)

The Multiple Mineral Development Act did not amend the Mineral Leasing Act to authorize the issuance of prospecting permits for coal which cover lands subject to mining claims.

The Effect of Mining Claims on Secretarial Authority to Issue Prospecting Permits for Coal and Phosphate, M-36893 (Aug. 2, 1977) 84 I.D. 442

"Leasing Act minerals." The Multiple Mineral Development Act, 30 U.S.C. § 524 (1970), reserved all Leasing Act minerals to the United States, and no rights to deposits of Leasing Act minerals are open to location under the mining laws under 30 U.S.C. § 525 (1970). "Leasing Act minerals" is defined as "all minerals which, upon Aug. 13, 1954, are provided in the mineral leasing laws to be disposed of thereunder." 30 U.S.C. § 530 (1970). Because leases for sodium, potassium, and "other related products" are authorized pursuant to 30 U.S.C. §§ 262, 282 (1970), "other related products" along with sodium and potassium fall within the category of Leasing Act minerals which include lithium which is dissolved in a sodium or potassium brine.

Foote Mineral Co., 34 IBLA 285 (Apr. 17, 1978) 85 I.D. 171

Lands which were subject to an oil and gas lease offer on Sept. 20, 1951, were not open to mineral location, and mining claims located on such lands on this date are properly declared null and void in the absence of compliance with the redemption provisions of the Act of Aug. 12, 1953, and the Multiple Mineral Development Act, requiring filing of an amended notice of location prior to Dec. 10, 1953, in the place and manner in which the original notice was of record.

A mining claimant's failure to comply with the redemption provision of the Act of Aug. 12, 1953, and the Multiple Mineral Development Act is not excused because BLM failed to notify her of the availability of this provision.

Dorothy Smith, 39 IBLA 306 (Feb. 23, 1979)

An application for permit to drill for oil and gas in a designated Potash Area is properly denied where the applicant fails to show that his application comes within either of the two exceptions to the policy in favor of potash development enunciated in an Order of the Secretary, dated Oct. 7, 1975, 40 FR 51486.

Belco Petroleum Corp., 42 IBLA 150 (Aug. 16, 1979)

Prior to passage of the Multiple Mineral Development Act, 30 U.S.C. §§ 521-31 (1976), a prima facie valid mineral lease, or application therefor, though void and ineffectual to vest any rights to minerals subject to the mining laws in the lessee segregated the land from the operation of the mining laws and prevented the initiation of rights under the mining laws

MULTIPLE MINERAL DEVELOPMENT ACT--Continued

GENERALLY--Continued

by another person until it had been set aside and removed from the records of the land office.

Charles House, Mrs. Leonard Skinner, 42 IBLA 364 (Sept. 11, 1979)

A prospecting permit which embraces land which is not "unclaimed" and "undeveloped" is a nullity and void as a conveyance of any interest in that land. Land in a mining claim remains "unclaimed" land for the purposes of M-36893 so long as the claim is not validated by discovery of a valuable locatable mineral deposit at the date of permit issuance. Surface disturbing mineral activities, associated with delineation of a mineral ore body which could reasonably be expected to disclose knowledge of an area's coal potential constitute development. The bona fide purchaser provisions of sec. 27(h)(2) of the Mineral Leasing Act do not apply to permits which embrace land that is claimed or developed.

Effect and Implementation of Solicitor's Opinion M-36893 on "Unclaimed, Undeveloped," M-36893 (Supp.) (Nov. 19, 1979) 86 I.D. 627

MULTIPLE USE

Prior to passage of the Multiple Mineral Development Act, 30 U.S.C. §§ 521-31 (1976), a prima facie valid mineral lease, or application therefor, though void and ineffectual to vest any rights to minerals subject to the mining laws in the lessee segregated the land from the operation of the mining laws and prevented the initiation of rights under the mining laws by another person until it had been set aside and removed from the records of the land office.

Charles House, Mrs. Leonard Skinner, 42 IBLA 364 (Sept. 11, 1979)

NATIONAL ENVIRONMENTAL POLICY ACT OF 1969

GENERALLY

On appeals from decisions to proceed with proposed timber sales, when the district manager tentatively proposes to withdraw the tracts from sale plans in order more fully to examine appellants' allegations, and material submitted in a related appeal, the decisions will be set aside and the cases remanded for further consideration.

Alan Winter, Elizabeth Freeman, et al., 23 IBLA 343 (Jan. 21, 1976)

A decision suspending oil and gas lease applications for public land in a national forest because the Forest Service has not prepared an environmental impact statement on a roadless area will be set aside and the cases remanded for the Bureau of Land Management in the exercise of its delegated discretion to lease public lands for oil and gas, first to determine whether the Bureau should prepare an environmental impact statement as the lead agency responsible for mineral leasing, and then to act on the offers accordingly.

Chevron Oil Co., 24 IBLA 159 (Mar. 15, 1976)

NATIONAL ENVIRONMENTAL POLICY ACT OF 1969--Continued

GENERALLY--Continued

The Board of Land Appeals may entertain and, where appropriate, grant a motion by the Bureau of Land Management to remand a case to it for further consideration on the question of whether an environmental impact statement must be filed, even though an appellant, who has protested against a negative declaration that no impact statement is required, objects to the remand.

Harold Gillis, 24 IBLA 248 (Mar. 25, 1976)

An application for a communication site under 43 U.S.C. § 961 (1970) should be denied where utilization of an existing right-of-way is practical under 43 U.S.C. § 1763 (19__) and where the proposed site would have an adverse impact on the environment.

"Practical." Under 43 U.S.C. § 1763 (19__), utilization of a nearby existing communication site is practical where the site is suitable and the expense of utilization would not be unreasonable as compared with environmental damage from a proliferation of sites.

Jicarilla Apache Indian Tribe, 29 IBLA 57 (Feb. 16, 1977)

It is not necessary for the Government to prepare an environmental impact statement before issuing a complaint in a mining claim contest, as the determination of the validity of a mining claim is not a "major Federal action" within the ambit of sec. 102 of the National Environmental Policy Act of 1969, 42 U.S.C. § 4332 (1970).

United States v. Ernest E. Siven and Richard J. I. Anderson, 32 IBLA 361 (Oct. 25, 1977)

The Bureau of Land Management may require the execution of special stipulations, including a no-surface-occupancy stipulation, to protect environmental and other land use values, as a condition for issuing an oil and gas lease. Where the Bureau of Land Management, in a decision requiring a no-surface-occupancy stipulation along a proposed wild and scenic river corridor, has considered all information available to it, has adequately weighed the factors involved, and the appellant has not shown sufficient reason to change the result, the decision will be upheld.

Cuesta Petroleum Co., 33 IBLA 116 (Dec. 16, 1977)

Dean W. Rowell, 37 IBLA 387 (Nov. 6, 1978)

The Bureau of Land Management may require the execution of special stipulations, including a no-surface occupancy stipulation, to protect environmental and other land use values, as a condition for issuing an oil and gas lease. Where the Bureau of Land Management, in a decision requiring a no-surface-occupancy stipulation in a scenic area, has considered all information available to it, has adequately weighed the factors involved, and the appellant has not shown sufficient reason to change the result, the decision will be upheld.

Robert L. Healy, 35 IBLA 66 (May 12, 1978)

NATIONAL ENVIRONMENTAL POLICY ACT OF 1969--Continued

GENERALLY--Continued

A stipulation prohibiting drilling and storage of oil on a portion of an oil and gas lease of 160 acres in order to protect an area of a river which is in a study section of the Wild and Scenic Rivers Act is reasonable, without consideration of other factors, where it leaves three-quarters of the lease open to regular activity.

Duncan Miller, 35 IBLA 108 (May 15, 1978)

The Secretary of the Interior is obligated to support and implement the national policy expressed by Congress in the National Environmental Policy Act of 1969.

Southern California Motorcycle Club, Inc., Sierra Club, 42 IBLA 164 (Aug. 17, 1979)

BLM is obligated in preparing Environmental Analysis Records (EAR's) preliminary to a determination as to whether a full environmental impact statement for a proposed Federal action will be prepared pursuant to the National Environmental Policy Act of 1969, 42 U.S.C. § 4332 (1976), to develop a reviewable record reflecting a consideration of all relevant factors. In the case of a proposed Federal timber sale the purely speculative threat of erosion or threat to the watershed caused by the absence of forest regeneration or a proposed trails system where the sale area is deemed to be of negligible recreational value are properly considered in a decision denying a protest of the sale.

Elaine Mikels et al., 44 IBLA 51 (Nov. 19, 1979)

ENVIRONMENTAL STATEMENTS

Where by final judgment a court has determined that an environmental impact statement must be filed under 42 U.S.C. § 4332 (1970) according to a particular schedule for the grazing lease program in a particular area, such an approved schedule will be followed by the Department.

Sidney Brooks et al., 22 IBLA 177 (Sept. 30, 1975)

The drawing of an offer for a noncompetitive lease in a simultaneous oil and gas lease drawing creates no vested rights in the offeror, and the offeror cannot compel the issuance of a lease before an environmental analysis has been made where the Bureau of Land Management has determined that the environmental analysis is necessary for the protection of the resources of the particular area.

Paula J. Jones, 24 IBLA 76 (Feb. 24, 1976)

In exercising the Secretary of the Interior's discretionary authority to lease known sodium deposits under the Mineral Leasing Act, an application to have the lands leased is properly rejected where it appears that the land applied for and surrounding environment near a national recreation area may be more severely damaged than most other sites within the known sodium leasing area, there is local governmental and other opposition to the leasing, and Bureau of Land Management and Forest Service officials recommend preparation of an Environmental Impact Statement for the entire known sodium area before leasing further lands in the area.

Eugene V. Simons, 26 IBLA 208 (Aug. 16, 1976)

NATIONAL ENVIRONMENTAL POLICY ACT OF 1969--Continued

ENVIRONMENTAL STATEMENTS--Continued

Where by final judgment a court has ordered that until an appropriate environmental impact statement is issued the BLM will issue authorization for livestock grazing only on an annual basis, a grazing permit can be renewed for only 1 year, even though the grazing unit has been pledged as security for a bona fide loan.

Hat Ranch, Inc., 27 IBLA 340 (Nov. 4, 1976) 83 I.D. 542

Where an administrative decision is made that a proposed action is not a major Federal action which will significantly affect the quality of the human environment, so that no environmental impact statement need be filed, that decision will be affirmed on review if it appears to have been made by an authorized officer, in good faith, based upon a proper and sufficient environmental analysis record compiled in accordance with established procedures, and is the reasonable result of his study of such record.

Citizens' Committee to Save Our Public Lands, 29 IBLA 48 (Feb. 16, 1977)

Where the Bureau of Land Management denies a request for the filing of an Environmental Impact Statement for a single planned timber sale but is in the process of preparing a detailed Environmental Impact Statement for the sustained yield unit which includes the parcel in question, the probability that the district-wide statement will adequately meet the requirements of NEPA with respect to the sale tract in issue justifies a denial of a request for a statement directed specifically to the smaller included sale.

Harold P. Cassidy et al., 29 IBLA 69 (Feb. 23, 1977)

When parties are to offer evidence as to costs, to a mining claimant, of measures required by statute or regulation to mitigate environmental impact from development of a mine, it would be helpful for a Government contestant to assist an intervening State government and the claimant in computation of such costs; however, under 42 U.S.C. § 4332 (1970), an environmental impact statement is not required prior to the nondiscretionary Federal action of issuance of a mineral patent.

United States v. Pittsburgh Pacific Co., 30 IBLA 388 (June 15, 1977) 84 I.D. 282

Where by final judgment a court has ordered that until an appropriate environmental impact statement is issued, the Bureau of Land Management will issue authorization for livestock grazing only on an annual basis, a grazing lease can be renewed only on an annual basis, even though the grazing unit has been pledged as security for a bona fide loan.

Ralph H. and Jacqueline L. Rainwater, 31 IBLA 377 (Aug. 8, 1977)

Where one objects to the Bureau of Land Management's decision to offer a certain tract of timber for sale on the grounds that an environmental impact statement for the single planned timber sale has not been prepared and that such a sale would violate the sustained yield provisions of the O&C Act of Aug. 28, 1937, 43 U.S.C. § 1181a (1970), the Bureau decision will be upheld when the objecting party fails to provide any evidence to support its contentions and a program environmental impact statement for the sustained yield unit

NATIONAL ENVIRONMENTAL POLICY ACT OF 1969--Continued

ENVIRONMENTAL STATEMENTS--Continued

which includes the parcel in question is in the process of being prepared.

Headwaters, 33 IBLA 91 (Dec. 16, 1977)

Where a proposed Federal timber sale would allow the cutting of trees on a 162-acre tract pursuant to a properly promulgated decision of the Director of the Bureau of Land Management concerning the allowable cut in that district, such sale does not, by itself, constitute a major Federal action significantly affecting the quality of the human environment such as will require the preparation of an environmental impact statement prior to the sale.

George Jalbert et al., 39 IBLA 205 (Feb. 2, 1979)

To secure the exemption under sec. 404(r) of the Federal Water Pollution Control Act for projects described in an environmental statement, compliance with seven specific conditions is required. The exemption does not apply to the maintenance of existing Federal projects, but only to new construction. While the exemption provides an alternative procedure to achieve compliance with sec. 404 of the Act for a limited category of Federal projects under very specific conditions, it does not lessen the substantive requirements that apply to the discharge of dredged or fill material.

Permit Requirements for Discharge of Dredged or Fill Material Under Section 404 of the Federal Water Pollution Control Act, 33 U.S.C. § 1344, M-36915 (Aug. 27, 1979) 86 I.D. 400

NATIONAL HISTORIC PRESERVATION ACT

GENERALLY

Sec. 106 of the National Historic Preservation Act requires an agency granting a right-of-way over Federal lands for a pipeline or other linear project to (1) identify potentially affected cultural resources; (2) consult regarding such effect with the Advisory Council on Historic Preservation; and (3) to consider these cultural resources in making or denying the grant. A rule of reason applies as to the scope of the lands to be inventoried, and the degree of effort required.

The Extent to Which the National Historic Preservation Act Requires Cultural Resources to be Identified and Considered in the Grant of a Federal Right-of-Way, M-36917 (Dec. 6, 1979) 87 I.D. 27 (1980)

APPLICABILITY

The grant of a right-of-way over Federal land for a pipeline or other linear project is a Federal undertaking which requires the authorizing agency to comply with sec. 106 of the National Historic Preservation Act, as implemented by 36 CFR Part 800.

Sec. 106 of the National Historic Preservation Act requires an agency granting a right-of-way over Federal lands for a pipeline or other linear project to identify and consider cultural resources on non-Federal lands affected by construction activities on Federal lands.

Sec. 106 of the National Historic Preservation Act requires an agency granting a right-of-way over Federal lands for a pipeline or other linear project to identify and consider cultural resources on non-Federal lands which may foreseeably be affected by the grant of the right-of-way. A rule of reason applies in determining the extent of non-Federal lands on which cultural resources are to be identified, and the degree of effort required. 36 CFR 800.4(a).

In the grant of a right-of-way over Federal lands for a pipeline or other linear project, the scope of lands to which the requirements of sec. 106 of the National Historic Preservation Act apply may be analogous to the scope of lands to be considered pursuant to sec. 102 of the National Environmental Policy Act.

The Extent to Which the National Historic Preservation Act Requires Cultural Resources to be Identified and Considered in the Grant of a Federal Right-of-Way, M-36917 (Dec. 6, 1979) 87 I.D. 27 (1980)

NATIONAL PARK SERVICE

GENERALLY

Under the Mineral Leasing Act for Acquired Lands of 1947, as amended, 30 U.S.C. §§ 351-359 (1970), if the lands embraced within an oil and gas lease application are under surface jurisdiction of a service or bureau within the Department of the Interior, as are the National Park Service and the Bureau of Reclamation, the consent of the Secretary of the Interior is necessary under the Act to the leasing of the land. Where the National Park Service recommends that oil and gas leases for lands within the boundaries of the Chickasaw National Recreation Area be rejected in order to maintain the area for the purposes for which it was established, it is proper to accept this recommendation and reject the offers.

Daphine Shear, David L. Shear, 29 IBLA 33 (Feb. 10, 1977)

Since an amended notice merges with the original notice, the filing of the amended notice, for purposes of recordation under either sec. 8 of the Mining in the Parks Act, 90 Stat. 1342, 1343, 16 U.S.C. § 1907 (1976), or sec. 314 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2744, 2769, 43 U.S.C. § 1744 (1976), together with such other information required by the applicable regulations, constitutes compliance with the recording requirements of those Acts.

R. Gail Tibbetts et al., 43 IBLA 210 (Oct. 5, 1979) 86 I.D. 538

NATIONAL PARK SERVICE AREAS

GENERALLY

Unless the statute creating the area specifically provides otherwise, areas within the National Park system are not open for location of mining claims.

Tom Brown, 37 IBLA 381 (Nov. 6, 1978)

The Act of Mar. 27, 1978, 92 Stat. 166, 16 U.S.C.A. § 1a-1 (West Supp. 1979), provides that actions taken in derogation of park values and purposes shall not be authorized unless specifically provided by Congress, in order to ensure that the resources and values of areas

NATIONAL PARK SERVICE AREAS--Continued

GENERALLY--Continued

in the National Park System are afforded the highest protection and care in governmental decisions.

Federal Water Rights of the National Park Service, Fish and Wildlife Service, Bureau of Reclamation and the Bureau of Land Management, M-36914 (June 25, 1979)
86 I.D. 553

LAND

Mining

The National Park Service is not an "executive department, independent establishment or instrumentality" within the meaning of 43 CFR 3501.2-6. The Department is therefore not bound by the granting or withholding of consent by the Service for a mineral lease on National Park Service lands.

Minerals which are subject to location under the general mining law on public land outside the Lake Mead Recreation Area are subject to the leasing provisions of the Act of Oct. 8, 1964, within the Recreation Area. But, minerals which are disposable by sale under the 1947 Materials Act when situated outside the Recreation Area are also subject to such disposals within it.

Silite Aggregate Co., 26 IBLA 197 (Aug. 11, 1976)

WATER RIGHTS

The particular reserved water rights for national park and national monument areas include water required for scenic, natural, and historic conservation uses; wild-life conservation uses; sustained public enjoyment uses; and National Park Service personnel uses; all of which are intimately related to the fundamental purpose for park and monument reservation, as articulated in 16 U.S.C. § 1 (1976).

Among other reserved water rights for national parks and national monuments, 16 U.S.C. § 1 (1976) encompasses reserved water rights for concession uses to provide sustained public enjoyment and reserved water rights for water-borne public enjoyment and recreation.

Congress has taken no action subsequent to the National Park Service Organic Act of Aug. 25, 1916, 39 Stat. 535, 16 U.S.C. § 1 (1976), to negate the implied intent contained in the Organic Act that all unappropriated waters necessary to fulfill the purposes of park areas are reserved as of the date of the enabling legislation.

The discretionary authority contained in the Act of Aug. 7, 1946, 60 Stat. 885, 16 U.S.C. § 17j-2(g) (1976), authorizing the National Park Service to acquire water rights in accordance with local laws, is not inconsistent with the assertion of the reserved water rights principle and is readily distinguishable from Acts requiring deference to State water law.

As a general rule, the above-developed reserved water rights apply to components of the National Park System other than national parks and national monuments, though the extent of particular reserved water rights must be determined on a case-by-case basis, involving an interpretation of 16 U.S.C. § 1 (1976) and the establishing legislation.

NATIONAL PARK SERVICE AREAS--Continued

WATER RIGHTS--Continued

The National Park Service and Fish and Wildlife Service may appropriate water to fulfill any congressionally authorized function for areas under their administration.

Federal Water Rights of the National Park Service, Fish and Wildlife Service, Bureau of Reclamation and the Bureau of Land Management, M-36914 (June 25, 1979)
86 I.D. 553

NAVAL PETROLEUM RESERVES

Where an oil and gas lease offer for public lands within 1 mile of the exterior boundaries of a naval petroleum reserve is rejected because the Department of the Navy recommends against the leasing of the land despite the Geological Survey's determination that operations on the subject land would not adversely affect the naval reserve through drainage from known productive horizons, the decision rejecting the lease offer will be reversed. The recommendations of the Federal agency exercising jurisdiction over a naval petroleum reserve, while important, are not conclusive. The final determination rests with the Department, and where the Geological Survey after full consideration of pertinent technical considerations recommends leasing, a lease will issue.

R. Garvin Berry, Jr., 18 IBLA 331 (Jan. 9, 1975)

NAVIGABLE WATERS

An application for a lease of geothermal resources within a riverbed not under jurisdiction of the United States is properly rejected.

Milan S. Parolak, 19 IBLA 139 (Mar. 7, 1975)

The States possess dominion over the beds of all navigable streams within their borders.

An oil and gas offer embracing land in the bed of a navigable river, which is State land, is properly rejected.

Leonard B. McSweyn, 28 IBLA 100 (Nov. 15, 1976)
83 I.D. 556

The Mineral Leasing Act for Acquired Lands does not exclude from oil and gas leasing those lands underlying the Missouri River within the boundaries of the Fort Berthold Indian Reservation as established by the Treaty of Fort Laramie (1851) and the Executive Order of Apr. 12, 1870, which were reacquired by the United States from the Indian tribes. The exclusion in the Act for submerged lands refers to submerged *coastal* lands, as set forth in 43 CFR 3101.2-1(g).

Prior to the admission of North Dakota to the Union on Nov. 2, 1889, the United States could grant lands underlying the Missouri River, a navigable river, to establish the Fort Berthold Indian Reservation. After said date, it could condemn or otherwise acquire these lands for construction of the Garrison Dam and Reservoir.

The language of the Treaty of Fort Laramie and the Executive Order of Apr. 12, 1870, when considered with the case law and various utterances made contemporaneously with the Treaty, discloses an intention to include the lands underlying the Missouri River, insofar as it runs

NAVIGABLE WATERS--Continued

through the Fort Berthold reservation, among the lands of the reservation itself.

Impel Energy Corp., 42 IBLA 105 (Aug. 16, 1979)

The requirement for a permit under sec. 404 of the Federal Water Pollution Control Act applies to the Bureau of Reclamation to the same extent as any other person, and with certain exceptions the Bureau must obtain a permit from the Corps of Engineers prior to any discharge of dredged or fill material into the navigable waters.

Activities "affirmatively authorized by Congress," which are excepted from sec. 10 of the Rivers and Harbors Act of 1899, are *not* excepted from sec. 404 of the Federal Water Pollution Control Act. Notwithstanding the exception of a discharge of dredged or fill material under sec. 10 of the Rivers and Harbors Act, compliance with sec. 404 is required.

A permit under sec. 404 of the Federal Water Pollution Control Act is required for the discharge of dredged or fill material whenever: (a) the "discharge" constitutes any addition of any pollutant to navigable waters from any discernible, confined and discrete conveyance, including the placement of fill and the building of any structure or impoundment; and (b) the "dredged material" is dredged spoil that is excavated or dredged from the waters of the United States; or (c) the "fill material" includes any material used for the primary purpose of replacing an aquatic area with dry land or of changing the bottom elevation of a water body, including any structure which requires rock, sand, dirt or other material for its construction; and (d) the discharge is made into "waters of the United States," which extend beyond those waters meeting the traditional tests of navigability to those encompassed by the broadest possible constitutional interpretation.

Permit Requirements for Discharge of Dredged or Fill Material Under Section 404 of the Federal Water Pollution Control Act, 33 U.S.C. § 1344, M-36915 (Aug. 27, 1979) 86 I.D. 400

NOTICE

GENERALLY

Sec. 6(b) of the Alaska Statehood Act does not require that patents issued to the State include a proviso that the conveyed lands are vacant, unappropriated, and unreserved, and do not affect any valid existing claim, location or entry under the laws of the United States. The Department assures compliance with this provision by excluding from selection all lands noted on its records as being appropriated and reserved, or subject to valid existing interests, and by requiring that adequate notice be given to all other persons claiming an interest in the selected land. The Department can then receive objections to the issuance of a patent and can render a determination as to the availability of the selected lands.

Richard W. Rowe, Daniel Gaudiane, 20 IBLA 59 (Apr. 24, 1975) 82 I.D. 174

When the holder of a grazing lease is found to have violated regulations and the terms of his lease because his cattle have trespassed on Federal land, his lease may be canceled when lesser sanctions have proved to be of no effect or when the nature of the violation demands such severity. However, a decision canceling a lease will be set aside where the district manager relied upon alleged trespasses of which the lessees had no notice and which occurred after a show cause notice had issued, and the case will be remanded for further proceedings.

Rodney Rolfe and Ronald J. Rolfe, 25 IBLA 331 (June 30, 1976) 83 I.D. 269

Where it does not appear that the notice required by sec. 7(b) of the Privacy Act of 1974 regarding the disclosure of a social security number was given, an oil and gas lease offer on a drawing card filed in a simultaneous drawing procedure should not be considered defective solely because the applicant omitted designating the social security number on the card as provided thereon.

Harry Reich, 27 IBLA 123 (Sept. 30, 1976) 83 I.D. 507

Richard Lovatt, 28 IBLA 244 (Dec. 10, 1976)

Where an attorney files an answer to a contest concerning mining claims on behalf of certain individuals, who, during the pendency of the contest proceedings, transfer their interests in the mining claims to a corporation of which they are major stockholders and directors, and the attorney represents these individuals and the corporation at the contest hearing, the corporation is bound by the determination reached therein, even though the corporation may not have received actual notice of the contest.

Service of a document upon a person's attorney of record constitutes effective service upon such person.

United States v. Mine Development Corp. et al., 27 IBLA 238 (Oct. 18, 1976)

Where the Bureau of Land Management sends notice to an offeror at his record address, pursuant to 43 CFR 3103.3-1, that the first year's rental accompanying his noncompetitive oil and gas lease offer is deficient and such notice is returned to the Bureau marked "Unclaimed" by the post office, the cancellation of the lease will be set aside and the notice will not be considered to have been served on the offeror, pursuant to 43 CFR 1810.2(b), when the post office has failed to forward the notice in accordance with a request by the offeror to forward all mail and other mail has, in fact, been forwarded.

Jack B. Coombs, 28 IBLA 53 (Nov. 9, 1976)

An offeror is properly disqualified from receiving a noncompetitive oil and gas lease on an offer which is drawn first from a group of simultaneously filed offers when he fails to pay the first year's advance rental within 15 days of his receipt of notice that such rental is due, and the delay is attributable to his posting of the rental check with insufficient postage.

Edgar C. Pennington, Jr., 28 IBLA 65 (Nov. 10, 1976)

A document which is sent by the Bureau of Land Management to an oil and gas lessee by certified mail is considered to be served upon the lessee when a receptionist in lessee's office signs the return receipt card, and the lessee will be charged with notice as of that date as to the contents of such document.

Lone Star Producing Co., 28 IBLA 132 (Nov. 19, 1976)

NOTICE--Continued

GENERALLY--Continued

Upon a determination that production has ceased on an oil and gas lease in its extended term by reason of such production because the well on the lease is no longer capable of production in paying quantities, the lessees of record are entitled to notice and an opportunity to request a hearing on the issue of the productive capacity of the well where they have presented evidence raising an issue of fact regarding the status of the well.

Universal Resources Corp., et al., 31 IBLA 61 (June 23, 1977)

All persons dealing with the Government are presumed to have knowledge of duly promulgated regulations.

Verner F. Sorenson, 32 IBLA 341 (Oct. 21, 1977)

Donald H. Little, 37 IBLA 1 (Sept. 6, 1978)

Dermot S. McGlinchey, 38 IBLA 211 (Dec. 6, 1978)

Juan Munoz, 39 IBLA 72 (Jan. 24, 1979)

Charles and Pete Caress, 41 IBLA 302 (June 29, 1979)

Gary Bilske, 44 IBLA 21 (Nov. 6, 1979)

30 U.S.C. § 188(b) (1970), and its implementing regulation 43 CFR 3108.2-1, requiring a notice of deficiency on a form approved by the director apply only to rental payments due on the anniversary dates of noncompetitive oil and gas leases, and are inapplicable to deficient initial rental payments for noncompetitive oil and gas lease offers.

Where the Bureau of Land Management notifies an oil and gas lessee of a deficiency in initial rental and the deficiency is not paid to the Bureau within the time prescribed, but is paid some 5 months later, the delay being ascribed to "oversight" the lateness of the payment will not be excused and the cancellation of the lease for failure to pay the rental timely is properly sustained.

Evelyn Chambers, 33 IBLA 271 (Jan. 5, 1978)

A mining claimant required by the Federal Land Policy and Management Act of 1976 and its implementing regulations to file a notice of location with the Bureau of Land Management, may not justify a late filing by the Bureau of Land Management's failure timely to notify the claimant of the requirement.

Belton E. Hall, 33 IBLA 349 (Jan. 18, 1978)

In some cases due process requires not that a person have notice and a prior hearing before a deprivation of property, but that an individual be given notice and an opportunity for a hearing before the deprivation of property becomes final.

H. B. Webb, 34 IBLA 362 (May 1, 1978)

Where the official records of the Bureau of Land Management show a reservoir right-of-way affecting certain land, the oil and gas therein may not be leased under the Mineral Leasing Act of 1920, 30 U.S.C. § 181 *et seq.* (1970). This result follows even though the reservoir right-of-way may have been issued improperly or should have been terminated.

Republic Oil & Mining Co. and Margaret V. Coombs, 35 IBLA 212 (May 26, 1978)

Service by registered or certified mail may be proved by a post office return receipt showing that the document was delivered to the person's record address. The receipt need not be signed necessarily by the person to whom the mail was addressed.

Lillian Sweet, 37 IBLA 25 (Sept. 14, 1978)

Where BLM sends by certified mail a notice to an offeror at his record address, pursuant to 43 CFR 3103.3-1, that the first year's rental is due within 15 days of receipt of the notice, and the letter is returned to BLM marked "moved left no address" by the post office, and it is established that the nondelivery by the post office was erroneous, the rejection of the lease offer will be set aside and the notice will not be considered to have been served on the offeror pursuant to 43 CFR 1810.2(b).

Joan L. Harris and Jonathan T. Amos, 37 IBLA 96 (Sept. 28, 1978)

A mining claimant's failure to comply with the redemption provision of the Act of Aug. 12, 1953, and the Multiple Mineral Development Act is not excused because BLM failed to notify her of the availability of this provision.

Dorothy Smith, 39 IBLA 306 (Feb. 23, 1979)

All persons dealing with the Government are presumed to have knowledge of duly promulgated statutes and regulations.

Dale C. Dolor, 40 IBLA 88 (Mar. 22, 1979)

All persons dealing with the Government are presumed to have knowledge of duly promulgated regulations. Such regulations have the force and effect of law and are binding on the Department.

Fred S. Ghelarducci, 41 IBLA 277 (June 28, 1979)

Bernard P. Cencorelli, 43 IBLA 7 (Sept. 11, 1979)

Where BLM sends by certified mail a request for payment of advance rental to the address of record of a successful offeror in a simultaneously filed oil and gas lease drawing and such request is returned by the Post Office, marked "Moved, left no address," the offeror is properly deemed to have "receipt of notice" under 43 CFR 1810.2. Where the address of record of the offeror is that of a leasing service and the leasing service moves, filing a change of address form with the Post Office in the name of the leasing service, but not in the name of appellant, the Post Office properly returned the notice addressed to the offeror to BLM.

Roy Lindgren, 43 IBLA 139 (Sept. 28, 1979)

NOTICE--Continued

GENERALLY--Continued

Where BLM sends by certified mail a request for payment of advance rental to the address of record of a successful offeror in a simultaneously filed oil and gas lease drawing and such notice is returned by the Post Office, marked "Moved, left no address," the offeror is properly deemed to have "receipt of notice" under 43 CFR 1810.2, where the offeror's address of record is that of a leasing service and the leasing service moves, filing a change of address form with the Post Office in the name of the leasing service, but not in the name of appellant.

Clyde K. Kobbeman, 43 IBLA 370 (Oct. 29, 1979)

Service of a BLM decision may be made by sending the document by registered or certified mail, return receipt requested, to an applicant's address of record in the Bureau, and it is irrelevant who there actually receives and signs for it.

Martha P. Merrill, 44 IBLA 136 (Nov. 30, 1979)

CONSTRUCTIVE NOTICE

Published notice of a proposed State selection in accordance with regulatory requirements is adequate notice to all persons claiming the lands adversely to the State.

Duncan Miller, 20 IBLA 1 (Apr. 14, 1975)

Richard W. Rowe, Daniel Gandiano, 20 IBLA 59 (Apr. 24, 1975) 82 I.D. 174

Where an attorney files an answer to a contest concerning mining claims on behalf of certain individuals, who, during the pendency of the contest proceedings, transfer their interests in the mining claims to a corporation of which they are major stockholders and Directors, and the attorney represents those individuals and the corporation at the contest hearing, the corporation is bound by the determination reached therein, even though the corporation may not have received actual notice of the contest.

Service of a document upon a person's attorney of record constitutes effective service upon such person.

United States v. Mine Development Corp. et al., 27 IBLA 238 (Oct. 18, 1976)

COURTESY NOTICE

A mining claimant required by the Federal Land Policy and Management Act of 1976 and its implementing regulations to file a notice of location with the Bureau of Land Management, may not justify a late filing by the Bureau of Land Management's failure timely to notify the claimant of the requirement.

Belton E. Hall, 33 IBLA 349 (Jan. 18, 1978)

OATHS

Under the Mining Claims Occupancy Act, 30 U.S.C. § 701 et seq. (1970), where the record includes a statement as to a principal place of residence which conflicts with a more detailed statement made under oath by the same person, the matter may be remanded for hearing in

OATHS--Continued

order to resolve the conflict and protect the rights of a third party.

Dwight D. and Verna E. Huston, 21 IBLA 24 (June 16, 1975)

Under 43 CFR 1821.3-1, information submitted by an oil and gas offeror pursuant to a request by BLM need not be made by affidavit under oath.

Duncan Miller, 38 IBLA 154 (Dec. 5, 1978)

"Certified." Under 43 CFR 1821.3-1(a), additional information submitted by an oil and gas offeror pursuant to a request by BLM need not be in affidavit form. A request for a "certified" copy of an unrecorded document in the possession of its owner connotes the intention that the owner attach an affidavit attesting to its authenticity.

Martha P. Merrill, 44 IBLA 136 (Nov. 30, 1979)

OFFICE OF HEARINGS AND APPEALS

(See also Director--if included in this Index.)

The Board of Land Appeals, in its adjudication of appeals to determine rights of parties to receive or preserve interests in Federal lands, has a concomitant obligation to preserve the integrity of the process, and where it appears to the Board that the administrative record of a case contains strong evidence of multiple violations of 18 U.S.C. § 1001 (1976), the Board will refer the matter with its recommendation that an investigation be initiated to determine whether criminal charges should be brought.

Lee S. Bielski, 39 IBLA 211 (Feb. 8, 1979) 86 I.D. 80

A decision by the Bureau of Land Management canceling fee simple patents issued to Indians and simultaneously issuing new Indian trust patents is not subject to review by the Board of Land Appeals, which has no jurisdiction in the matter, where the decision was made at the direction of the Assistant Secretary for Indian Affairs.

Blue Star, Inc., Atomic Western, Inc., Fremont Energy Corp., Ivor Adair, 41 IBLA 333 (July 11, 1979)

OIL AND GAS LEASES

GENERALLY

The Department has discretionary authority to issue or not to issue leases under the Mineral Leasing Act for Acquired Lands, 30 U.S.C. §§ 351-59 (1970).

General Crude Oil Co., 18 IBLA 326 (Jan. 7, 1975)

No law or regulation requires the mandatory rejection of an oil and gas lease offer merely because it is held in suspense for 1 year. The setting of a specific time limit on the suspension of an oil and gas offer is not a determination in the exercise of the Secretary's discretionary authority of whether or not to lease the lands for oil and gas.

Justheim Petroleum Co., 18 IBLA 423 (Feb. 13, 1975)

OIL AND GAS LEASES--Continued

GENERALLY--Continued

Where the Forest Service suggests a stipulation barring any occupancy and use of the surface as a condition precedent to the issuance of an oil and gas lease for public lands in a national forest, based only on the fact that the land is in an "inventoried roadless area," and where later the Forest Service agrees to a revised stipulation, the Bureau of Land Management decision to the extent it required the execution and filing of the "Roadless Area" stipulation will be set aside and the case remanded to the Bureau for submission of the substitute stipulation to the offeror for execution and filing.

James A. Krumhansl, 19 IBLA 56 (Feb. 21, 1975)

A determination by the Geological Survey that lands are within an undefined known geologic structure will not be disturbed in the absence of a clear showing that the determination was improperly made.

Duncan Miller, 19 IBLA 86 (Mar. 3, 1975)

When noncompetitive oil and gas lease offers are rejected by the Secretary of the Interior in the exercise of his discretion, the offers will not be held in suspense pending a future determination that the lands described in the offers should be leased.

John Oakason, Beard Oil Co., 19 IBLA 191 (Mar. 18, 1975)

Where an oil and gas lease is subject to cancellation but an assignment of the lease has been filed by one claiming protection as a bona fide purchaser in accordance with the statute and regulations, action to cancel the lease will be stayed until it is determined whether the assignee is, in fact, entitled to protection of the statute and regulations afforded to bona fide purchasers.

Dale A. Spiegel, 19 IBLA 235 (Mar. 26, 1975)

Tiffany Trust, 21 IBLA 160 (July 21, 1975)

Gus Panos, 21 IBLA 163 (July 21, 1975)

A bond for not less than $1,000 is properly required to be filed when all or any part of the land in a noncompetitive lease is included within the limits of a known geologic structure of a producing oil and gas field. That the land is included in a communitized producing unit does not vitiate that requirement.

Duncan Miller, 20 IBLA 9 (Apr. 14, 1975)

The Department of the Interior has full and final authority to determine whether or not to issue oil and gas leases. Where the lands embraced within an oil and gas lease offer contain established archaeological sites and in the opinion of the responsible Departmental officials oil and gas exploration activities would destroy or impair the sites, a lease offer is properly rejected, absent an affirmative showing on behalf of the offeror that exploration activities would not infringe upon the archaeological resources of the area.

Rosita Trujillo, 20 IBLA 54 (Apr. 28, 1975)

OIL AND GAS LEASES--Continued

GENERALLY--Continued

Where the Bureau of Land Management changes an administrative practice to thereafter refuse to accept unofficial copies of the simultaneous oil and gas lease entry card, by an order dated Mar. 26, 1975, the new practice will be given prospective application only and will not be applied retroactively to simultaneous entry cards filed during the Feb. 1975 simultaneous filing period.

V. J. Malloy, 20 IBLA 327 (June 6, 1975)

A demand by the Geological Survey for prejudgment interest for delayed payment of additional royalties owed to the Government is not necessarily unenforceable in the courts because it was not asserted as a counterclaim under Rule 13(a) of the Federal Rules of Civil Procedure.

Atlantic Richfield Co., 21 IBLA 98 (June 30, 1975)
82 I.D. 316

Under the provisions of 43 CFR 3107.2-1(b)(2) (1973) an oil and gas lease which had been committed to a unit and extended as a result of production occurring within that unit, is not within its primary term but rather is held by production. Therefore, the diligent drilling extension provision of 43 CFR 3107.2-3 is not available as a method of further extension since that provision is limited to leases in their primary term.

Tenneco Oil Co., Sun Oil Co., 21 IBLA 130 (July 14, 1975)

Title to a numbered school section which is surveyed on or after July 11, 1956, and on which there is outstanding at the time of such survey a mineral lease entered into by the United States, is granted to the State, and the State shall succeed to the position of the United States as lessor under such lease.

State of Utah, 22 IBLA 44 (Sept. 15, 1975)

The execution of special stipulations as a condition precedent to the issuance of oil and gas leases for land located in national forests may be required at the discretion of the Secretary of the Interior in order to protect environmental, recreational and other land use values. In each case the need for the stipulation should be clear and the means to accomplish the intended purpose should be reasonable.

Bill J. Maddox, 22 IBLA 97 (Sept. 22, 1975)

Where an oil and gas lease offeror files a simultaneous oil and gas lease drawing card and indicates that its corporate qualifications are filed under a specific serial number, the offer will not be rejected where the corporation can show that the State Office informed it earlier that its corporate qualifications had been placed in that file.

Allied Chemical Corp., 23 IBLA 214 (Jan. 6, 1976)

The recommendations of the Forest Service are important in determining whether or not an oil and gas lease should issue for public lands but are not conclusive. Ultimately, the Secretary of the Interior is entrusted

OIL AND GAS LEASES--Continued

GENERALLY--Continued

with the responsibility of determining whether or not to issue a lease.

Stanley M. Edwards, 24 IBLA 12 (Feb. 4, 1976)
83 I.D. 33

It is well established that the execution of appropriate special stipulations as a condition precedent to the issuance of oil and gas leases may be required at the discretion of the Secretary of the Interior in order to protect environmental, recreational, and other land use values.

While "no surface occupancy" stipulations should be of sufficient efficacy to protect the environment, no lease should issue with stipulations so restrictive that the use of the land for any purpose associated with the production of oil and gas is totally precluded.

The financial burden of complying with protective stipulations in oil and gas leases is the sole responsibility of the lessee.

Bill J. Maddox, 24 IBLA 147 (Mar. 10, 1976)

The Mineral Leasing Act of 1920 vests the Department of the Interior with the discretion to lease public lands for oil and gas, including public lands in the national forests. Although this Department gives most careful consideration to the recommendations of the Forest Service, the latter does not have a veto power over public land leasing.

Chevron Oil Co., 24 IBLA 159 (Mar. 15, 1976)

The financial burden of complying with stipulations included in an oil and gas lease is the sole responsibility of the lessee.

Duncan Miller, 24 IBLA 203 (Mar. 19, 1976)

The amount of acreage contained in an oil and gas lease may be reduced where, upon resurvey of the land, it is determined that the area under lease is actually smaller than the area shown by the original survey.

Grace M. Brown et al., 24 IBLA 301 (Apr. 1, 1976)

The U.S. Geological Survey is the Secretary's technical expert in matters concerning geologic evaluation of tracts of land offered at a sale of competitive oil and gas leases and the Secretary is entitled to rely on its reasoned analysis.

Arkla Exploration Co., 25 IBLA 220 (June 21, 1976)

Frances J. Richmond, 29 IBLA 137 (Mar. 3, 1977)

Coquina Oil Corp., 29 IBLA 310 (Mar. 30, 1977)

Gerald S. Ostrowski, 34 IBLA 254 (Mar. 28, 1978)

Southern Union Exploration Co., 41 IBLA 81 (May 31, 1979)

Gerald S. Ostrowski (On Reconsideration after Remand), 44 IBLA 17 (Nov. 6, 1979)

Basil W. Reagel, 44 IBLA 62 (Nov. 20, 1979)

OIL AND GAS LEASES--Continued

GENERALLY--Continued

Where the Bureau of Land Management ordered on Mar. 26, 1975, that unofficial copies of the simultaneous oil and gas lease entry card were invalid and to be rejected, that order will be given prospective application only and will not be applied retroactively to simultaneous entry cards filed during the Jan. 1975 simultaneous filing period.

Eve Reese, 25 IBLA 244 (June 22, 1976)

The dismissal of a protest, which consists of a mere allegation that the successful drawee was engaged in practices militating against the fairness of the drawing, will be sustained on appeal absent any substantiating evidence supporting the allegation.

Duncan Miller, 26 IBLA 37 (July 8, 1976)

The fact that the courtesy rental notice was delayed in reaching appellant because it was sent to appellant's former address is not a justifiable excuse for late payment.

Serio Exploration Co., 26 IBLA 106 (July 26, 1976)

The Secretary of the Interior may require execution of special stipulations reasonably designed to protect environmental and other land use values as a condition precedent to the issuance of an oil and gas lease. But where a State Office of the Bureau of Land Management seeks to impose a "no surface occupancy" stipulation, the most stringent of stipulations, without a showing that it has considered less stringent stipulations, the decisions will be set aside. Where the stated basis for the imposition of the stipulation is the threat of oil and gas activities to automobile racing, the decision will be set aside particularly where the lease offers include land primarily outside the boundaries of the racing grounds withdrawal.

Vern K. Jones et al., 26 IBLA 165 (Aug. 4, 1976)

Where an oil and gas lease offer is rejected because the land was received by the United States as part of a sec. 8, Taylor Grazing Act exchange, and the record does not indicate such an exchange took place the case will be remanded for consideration in light of the actual record.

Husky Oil Co. of Delaware, 26 IBLA 194 (Aug. 11, 1976)

An oil and gas lease will expire by operation of law at the end of its primary term unless oil or gas is being produced in paying quantities at that time or actual drilling operations were commenced prior to the end of the primary term and are being diligently prosecuted, thereby entitling the lessee to an extension of the lease. A once productive well which ceases its productive capability during the initial term will not prevent expiration of the lease.

Rajac Industries, Inc., 26 IBLA 202 (Aug. 11, 1976)

Bureau of Land Management personnel have no affirmative duty to take extraordinary measures to preserve an oil and gas lease or to save the lessee from the possible consequences of his own conduct of his affairs concerning such lease.

Stanley J. Pirtle, 26 IBLA 348 (Sept. 7, 1976)

OIL AND GAS LEASES--Continued

GENERALLY--Continued

An assessment greater than the normal royalty charge may be required for oil and gas that are wasted.

Response to Feb. 17, 1976, Request from the General Accounting Office: Interpretation of Mineral Leasing Act of 1920, and Outer Continental Shelf Lands Act Royalty Clause, M-36888 (Oct. 4, 1976) 84 I.D. 54 (1977)

Failure to execute fully an oil and gas drawing card (by omitting the zip code) properly results in the rejection of the offer.

Even assuming that a BLM order has the force and effect of a regulation, it cannot be applied retroactively where there are intervening rights or the interests of the United States would be adversely affected. Where there is a No. 2 oil and gas drawing card, it constitutes an intervening right.

Beverly J. Steinbeck, 27 IBLA 249 (Oct. 18, 1976)

Sec. 4 of the Geothermal Steam Act of 1970 directs competitive bidding for geothermal leases on lands within a known geothermal resource area under regulations formulated by the Secretary of the Interior. Where the Department has promulgated regulations pursuant to this section which provides the Secretary's authorized officer with the reserved right to reject any and all bids submitted for a competitive geothermal lease sale, and that reserved right is publicized in the sale notice, the Government is not obligated to accept any bid which might be considered inadequate.

Getty Oil Co., 27 IBLA 269 (Oct. 26, 1976)

Failure to execute fully an oil and gas drawing entry card (by omitting the zip code) properly results in the rejection of the offer.

Amy H. Hanthorn, 27 IBLA 369 (Nov. 4, 1976)

An oil and gas lease issued effective Oct. 1, 1966, for a term of 10 years expired at midnight on Sept. 30, 1976, unless extended by some provision of statute or regulation.

Duncan Miller, 28 IBLA 62 (Nov. 10, 1976)

A document which is sent by the Bureau of Land Management to an oil and gas lessee by certified mail is considered to be served upon the lessee when a receptionist in lessee's office signs the return receipt card, and the lessee will be charged with notice as of that date as to the contents of such document.

Lone Star Producing Co., 28 IBLA 132 (Nov. 19, 1976)

Where the State Office, following a recommendation of the National Park Service rejects an application for an oil and gas lease in the Lake Mead National Recreation Area on the basis of a general environmental review of the consequences of oil and gas leasing in the Recreation Area, but which does not specifically show that the lands involved are of a particular value in the Recreation Area as a whole and that leasing subject to stipulations will not suffice to protect the recreation and other values of the land, the case will be remanded for

OIL AND GAS LEASES--Continued

GENERALLY--Continued

a particular application of the environmental review to that land.

Robert B. Wahl, Howard Lee, 28 IBLA 305 (Jan. 13, 1977)

Whereas 30 CFR 221.48 and 221.50 clearly indicate the lessee must pay royalty on all production, the lessee is obligated to pay full value on all gas wasted (221.35), and the supervisor has no discretion to collect less than the full value of gas wasted.

Computation of Moneys Due the United States on Oil and Gas Lost as a Result of Pennzoil's Blowout, M-36888 (Supp.) (Jan. 19, 1977) 84 I.D. 64

Where a regulation is amended in a way that benefits an oil and gas lessee, the Department may, in the absence of intervening rights of third parties or prejudice to the interests of the United States, apply the amendment to pending cases.

Howard S. Bugbee, 29 IBLA 30 (Feb. 8, 1977)

An appeal to the Board of an automatic termination of an oil and gas lease will be dismissed as not ripe where appellant sends the appeal to the Board before a Notice of Termination of Lease has been issued and a Petition for Reinstatement rejected by the State Office, Bureau of Land Management.

Read & Stevens, Inc.; Franklin, Aston & Fair, Ltd.; and Colorado Interstate Gas Co., 29 IBLA 154 (Mar. 4, 1977)

The interpretation of the Mineral Leasing Act of 1920 set forth in the Oct. 4, 1976, Solicitor's Opinion (M-36888) is compelled by the statute.

Terms of an oil and gas lease inconsistent with the statute are equally as invalid as a regulation which operates to create a rule out of harmony with the statute.

A lessee gains no rights through a lease which could not be bestowed lawfully, since regulations or lease terms inconsistent with the statute are invalid.

The involuntary invalidation of a lease term does not amount to pro tanto cancellation of the lease.

The Oct. 4, 1976, Solicitor's Opinion (M-36888), in effect, found that the Secretary, by permitting exemptions from royalty requirements for oil and gas used for production purposes or unavoidably lost, was alienating the royalty interest of the United States on certain leases without authority to do so.

Court cases indicate that it is in the Secretary's discretion to apply the corrected interpretation of the statutes in the collection of additional royalty retroactively or prospectively based on equitable considerations.

The Secretary is limited in the exercise of this authority only by the rule of estoppel where the application of the corrected interpretation of law threatens to work a serious injustice and if the public's interest would not be unduly damaged by the imposition of estoppel.

Effect of Oct. 4, 1976, Solicitor's Opinion M-36888, M-36888 (Supp. II) (Mar. 9, 1977) 84 I.D. 171

OIL AND GAS LEASES--Continued

GENERALLY--Continued

Although the Bureau of Land Management may require such special stipulations as are necessary for the protection of the lands embraced in any lease, proposed special stipulations must be supported by valid reasons which will be weighed by this Department with due regard for the public interest. It is the Bureau's responsibility to impose stipulations which are necessary, appropriate and reasonably related to oil and gas activities, and a stipulation which would forbid the lessee to occupy the surface must be set aside on appeal where BLM fails to provide adequate justification for its imposition and fails to show that it has considered less stringent stipulations.

Neva H. Henderson, 31 IBLA 217 (July 6, 1977)

The authorized officer may not deem an oil and gas rental payment to have been timely filed, pursuant to 43 CFR 1821.2-2(g) if it is received at the State Office when it is not open to the public, even though the payment is presented on the last day in which payment can be made. Such payment is deemed to have been made on the day and hour the office is next open to business, as provided in 43 CFR 1821.2-2(d).

It is proper to deny a petition for reinstatement of an oil and gas lease terminated for failure to pay rental on time as required by sec. 31 of the Mineral Leasing Act of 1920, *as amended*, 30 U.S.C. § 188(b) (1970), where 20 minutes before the State Office closes to the public on the last day on which rental can be paid, petitioner instructs by telephone an agent who lives in the vicinity of the State Office to make the payment and the agent who alleges she was delayed by traffic and security measures makes payment after the office is closed to the public. In such circumstances the petitioner has not shown that his failure to pay the rental on or before the anniversary date of the lease was justifiable or not due to a lack of reasonable diligence.

Bob Burch, 32 IBLA 93 (Sept. 12, 1977)

In determining whether an oil and gas lessee exercised reasonable diligence to warrant reinstatement of a terminated lease the postmark date on the rental payment envelope is generally deemed the date of mailing unless there is satisfactory evidence to support an assertion that mailing occurred at an earlier date.

David R. Smith and Darla L. Smith, 33 IBLA 63 (Dec. 5, 1977)

Noncompetitive oil and gas leases are issued for a primary term of 10 years. Such leases expire automatically by operation of law at the end of their 10-year terms unless the presence of one of the statutory grounds for extension of the term is established.

Duncan Miller, 33 IBLA 83 (Dec. 8, 1977)

Where, rather than delay action on an oil and gas lease offer pending a wilderness review and management decision pursuant to sec. 603 of the Federal Land Policy and Management Act, the Bureau of Land Management proposes to issue the lease immediately subject to a "no surface occupancy" stipulation under the apparently mistaken impression that the applicant had so requested, the decision will be set aside and action on the lease offer will be deferred until a final decision can be made.

Dell K. Hatch and Amoco Production Co., 33 IBLA 1[illegible] (Dec. 19, 1977)

OIL AND GAS LEASES--Continued

GENERALLY--Continued

30 U.S.C. § 188(b)(1970), and its implementing regulation 43 CFR 3108.2-1, requiring a notice of deficiency on a form approved by the director apply only to rental payments due on the anniversary dates of noncompetitive oil and gas leases, and are inapplicable to deficient initial rental payments for noncompetitive oil and gas lease offers.

Evelyn Chambers, 33 IBLA 271 (Jan. 5, 1978)

Oil and gas lease offers may be rejected where legal title to the lands in issue is uncertain. It is not improper for BLM to refuse to suspend the offers pending determination of the title issue.

W L Industries, Inc., 34 IBLA 99 (Feb. 23, 1978)

Appellant's charges in respect of filing of registration statements for compliance with securities laws go to question of relationships between filing service companies and their investors, and as such, are properly for consideration by Securities and Exchange Commission. Where they do not indicate noncompliance with oil and gas leasing statutes and regulations, such charges are not proper for consideration by the Department of the Interior, which has not been delegated responsibility for enforcement of securities laws.

Elias C. Bacil, 34 IBLA 322 (Apr. 24, 1978)

An offer to lease for oil and gas is properly rejected where payment for the first year's advance rental is not received in the appropriate office of the Bureau of Land Management within 15 days after a Notice of Rental Due is received by the offeror pursuant to 43 CFR 3112.4-1.

Susan Dawson, 35 IBLA 123 (May 15, 1978)

Appellant's charges in respect of filing of registration statements for compliance with securities laws go to question of relationships between filing service companies and their investors, and as such, are properly for consideration by Securities and Exchange Commission. Where they do not indicate noncompliance with oil and gas leasing statutes, regulations, and decisions of this Department, such charges are not proper for consideration by the Department of the Interior, which has not been delegated responsibility for enforcement of securities laws.

Elias C. Bacil, 35 IBLA 198 (May 24, 1978)

An oil and gas offer describing land which cannot be encompassed within a 6-mile square is defective and must be rejected, and where a lease is issued for part of the land embraced in the offer it must be canceled as to that land which is embraced in a proper offer filed prior to the issuance of the lease in order that the statutory preference right of the party first making a proper offer may be honored.

Robert W. David, 35 IBLA 205 (May 26, 1978)

OIL AND GAS LEASES--Continued

GENERALLY--Continued

The boundary of an oil and gas lease covering lands riparian to a navigable river is the meander line indicated on the official plat of survey and not the waterline. Thus, lands accreted to the leased lands may be separately leased.

David A. Provinse, 35 IBLA 221 (May 26, 1978)
85 I.D. 154

An oil and gas lease is "issued" on the day it is signed by the authorized officer of the Department of the Interior, although it is not effective, per 43 CFR 3110.1-2, until the first day of the month following its date of issuance.

Mobil Oil Corp., 35 IBLA 375 (June 23, 1978)
85 I.D. 225

The Department of the Interior has the authority to issue orders to oil and gas lessees to protect all of the natural resources of the Continental Shelf. An order which requires lessees to shut in wells during welding or burning operations will be sustained on appeal as not being arbitrary or unjustified where the record shows that a number of companies had followed the practice even when it was not required, where the order is not so prohibitive as to effect a pro tanto cancellation of the lease, and where departures from the order may be granted in certain situations.

Exxon Corp., 36 IBLA 185 (Aug. 1, 1978)   85 I.D. 387

Noncompetitive oil and gas leases ar eissued for primary terms of 10 years. Unless one of the statutory grounds for extension is established, such leases expire by operation of law at the end of their primary term.

Duncan Miller, 37 IBLA 129 (Oct. 4, 1978)

Where the State Office, following recommendations of the National Park Service, rejects applications for oil and gas leases under the "excepted areas" provisions of 43 CFR 3111.1-3(e)(4), and where it appears that large portions of the applied-for lands do not fall within such areas, the case will be remanded with instructions to reconsider whether the leasing of lands not in excepted areas would be appropriate.

D. L. Purcell, 37 IBLA 272 (Oct. 20, 1978)

D. L. Purcell, 40 IBLA 126 (Mar. 28, 1979)

An application for an oil and gas lease filed in the name of a person deceased at the time of filing is properly rejected as there then was no offeror qualified to hold a lease.

Estate of Charles D. Ashley, 37 IBLA 367 (Nov. 2, 1978)
85 I.D. 403

The use of a post office box number as an address is not barred by the oil and gas leasing regulations governing applications or by the Rules of Practice of the Department.

Duncan Miller, 38 IBLA 259 (Dec. 8, 1978)

OIL AND GAS LEASES--Continued

GENERALLY--Continued

Where an offer is drawn No. 1 for a tract consisting of 39.97 acres, BLM requests payment specifically of $40 advance rental, and the offeror remits $39.97 within the 15-day period spelled out in 43 CFR 3112.4-1, the submittal of $39.97 does not constitute satisfactory payment within the ambit of that regulation.

Milton Knoll, 38 IBLA 319 (Dec. 19, 1978)

Where an offeror for a noncompetitive, over-the-counter oil and gas lease certifies that he is a United States citizen, his failure to disclose whether he is a native-born or naturalized citizen will not support rejection of his offer where an offeror for a noncompetitive, simultaneous oil and gas lease is not required to disclose similar information.

Jas. O. Breene, Jr., 39 IBLA 43 (Jan. 16, 1979)

Land included within an outstanding oil and gas lease is not available for leasing and an oil and gas lease offer filed for such land must be rejected.

Alyce C. Duncan, 39 IBLA 144 (Jan. 29, 1979)

The maxim, expressio unius est exclusio alterius, will not be utilized to contradict or vary a clear expression of legislative intent.

When a State Office rejects the offer of a first-drawn applicant in a drawing under the simultaneous oil and gas leasing program, an appeal by the applicant raises the issue of his qualifications to hold the lease. The qualifications of the second-drawn applicant are irrelevant until such time as the offer of the first-drawn applicant is rejected and all his avenues of appeal are exhausted. However, it is not improper for BLM to name the second-drawn applicant as an adverse party in a decision rejecting the first-drawn applicant.

Thomas R. Flickinger, William S. Flickinger, et al., 40 IBLA 53 (Mar. 16, 1979)

An oil and gas lease which is in its extended term because of production terminates when production ceases unless pursuant to 30 U.S.C. § 226(f) (1976): (1) reworking or drilling operations are begun within 60 days after cessation and are continued with reasonable diligence until production resumes; (2) the Secretary has ordered or consented to suspension of operations or production; or (3) for lands on which there is a well capable of production, the lessee places the well in producing status at least within 60 days of receipt of notice to do so.

Vern R. Bolinder and Julienne J. Bolinder, 40 IBLA 164 (Apr. 3, 1979)

It is proper to set aside a decision which raises questions concerning the facts asserted by BLM in rejecting an oil and gas lease offer, and to remand the case to BLM for further review and consideration of appellant's allegations.

Robert W. David, 40 IBLA 236 (Apr. 16, 1979)

OIL AND GAS LEASES--Continued

GENERALLY--Continued

Generally, the signing of an oil and gas lease by the authorized officer of the Bureau of Land Management is the act that constitutes issuance of the lease. When land is determined to be within a known geologic structure prior to authorized issuance of a lease, noncompetitive lease offers must be rejected and the land may be leased only by competitive bidding.

United States v. William T. Alexander (On Court Remand), 41 IBLA 1 (May 21, 1979)

Oil and gas offers, filed for lands withdrawn by PLO No. 5418, must be rejected. The order was issued under the authority of the Pickett Act, 43 U.S.C. §§ 141-142 (1970), repealed by FLPMA, and the order was not arbitrary, capricious, or an abuse of discretion.

Bristol Bay Native Corp., 41 IBLA 85 (June 4, 1979)

The requirement of forfeiture of the bid deposit if the qualified high bidder fails to enter a lease must be enforced to prevent those bidders with greater capital resources from gaining an unfair advantage.

Fred S. Ghelarducci, 41 IBLA 277 (June 26, 1979)

Not all persons may be qualified to be lessees. Signing and dating the entry card constitute certification by the offeror of his qualifications as of a date certain.

As used in 43 CFR 3112.2-1, the term "fully executed" means that the applicant must, in order to render the entry card a valid and complete offer to lease, supply the information requested thereon, including the date.

Harry A. Zuckerman et al., 41 IBLA 372 (July 23, 1979)

An oil and gas lease may be awarded to the first-qualified applicant only. The regulations governing qualifications are mandatory, and strict compliance therewith is required.

A defective drawing card offer for an oil and gas lease is not curable by submission of required evidence of qualifications after the drawing, for the reason that the rights of the second- and third-drawn qualified offerors have intervened. Where appellant's offer was third drawn and eventually accorded priority and then ultimately disqualified, the parcel described therein must be included in a subsequent list of lands available for simultaneous filing.

An offeror for oil and gas lease may withdraw his offer at any time prior to the drawing. However, the filing fee is retained as a service charge irrespective of the outcome of the drawing.

Don C. Bell II (Trustee), 42 IBLA 21 (July 25, 1979)

Where an offer is drawn No. 1 in a simultaneous oil and gas lease drawing and the offeror is notified by BLM that the rental due is $1,955, the offer will be disqualified under 43 CFR 3112.4-1 when the offeror submits a check for $1,954 within the time required, but fails to submit the $1 deficiency within the allowed time.

C. Panus, 42 IBLA 326 (Aug. 30, 1979)

OIL AND GAS LEASES--Continued

GENERALLY--Continued

The State laws applicable to Federal oil and gas leases are limited to those classes of laws authorized or recognized by sec. 32 of the Mineral Leasing Act, *as amended*, 30 U.S.C. § 189 (1976).

Where an applicant with first priority dies after filing an oil and gas lease application but prior to issuance of the lease, his personal representative, heirs, or devisees are entitled to the lease provided there is filed in all cases an offer to lease in compliance with 43 CFR 3102.8. Such offer will be effective as of the date of the original lease offer filed by the deceased.

James P. Richardson, Jr., 42 IBLA 333 (Aug. 30, 1979)

Prior to passage of the Multiple Mineral Development Act, 30 U.S.C. §§ 521-31 (1976), a prima facie valid mineral lease, or application therefor, though void and ineffectual to vest any rights to minerals subject to the mining laws in the lessee segregated the land from the operation of the mining laws and prevented the initiation of rights under the mining laws by another person until it had been set aside and removed from the records of the land office.

Charles House, Mrs. Leonard Skipper, 42 IBLA 364 (Sept. 11, 1979)

Failure to execute a lease results in forfeiture of the bid deposit by the high bidder in a competitive oil and gas lease sale.

Bernard F. Gencorelli, 43 IBLA 7 (Sept. 11, 1979)

Noncompetitive oil and gas leases are issued for a primary term of 10 years. Unless one of the statutory grounds for extension is established, such leases expire by operation of law at the end of their primary term.

James E. and Mary E. Groboski, 43 IBLA 94 (Sept. 19, 1979)

Land within the National Desert Wildlife Range is not subject to noncompetitive oil and gas leasing.

Kenneth F. Cummings, 43 IBLA 110 (Sept. 28, 1979)

Where an applicant with first priority dies after filing an oil and gas lease application but prior to issuance of the lease, his personal representative, heirs, or devisees are entitled to the lease provided there is filed an offer to lease in compliance with 43 CFR 3102.8.

Estate of F. J. Bradshaw, 44 IBLA 107 (Nov. 20, 1979)

The Bureau of Land Management has authority to require the execution of special stipulations to protect environmental and other land use values for lands where those values are present. Oil and gas offers should not be rejected because of the asserted presence of environmental or other values, without prior consideration being given to the feasibility of stipulations to protect such values.

David H. Yates, 44 IBLA 121 (Nov. 27, 1979)

OIL AND GAS LEASES--Continued

ACQUIRED LANDS LEASES

The Department has discretionary authority to issue or not to issue leases under the Mineral Leasing Act for Acquired Lands, 30 U.S.C. §§ 351-59 (1970).

In exercising its discretion to lease or not to lease oil and gas under the Mineral Leasing Act for Acquired Lands, 30 U.S.C. §§ 351-59 (1970), the Department may reject an oil and gas lease offer filed thereunder, where the minerals are held in trust for the Shoshone and Arapaho Indians and are leasable under the Act of Aug. 21, 1916, 39 Stat. 519.

General Crude Oil Co., 18 IBLA 326 (Jan. 7, 1975)

An oil and gas lease offer which is not accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States is properly rejected.

Judith Walker, Ginger Lawhon, 18 IBLA 410 (Feb. 10, 1975)

In a noncompetitive oil and gas lease offer for acquired lands in which the United States owns a fractional present interest, 43 CFR 3130.4-4 requires offeror to submit a statement detailing the extent of his ownership in operating rights not owned by United States, regardless of whether the United States owns 50 percent or more of operating rights.

Where an unamended senior offer for a noncompetitive fractional oil and gas lease on acquired lands is not in compliance with 43 CFR 3130.4-4, a junior offer obtains priority to extent of conflicts between competing filings, and the junior offeror's protest must be sustained.

Frederick L. Smith et al., 19 IBLA 162 (Mar. 14, 1975)

An offer for an oil and gas lease under the Mineral Leasing Act for Acquired Lands may properly be rejected where there is uncertainty regarding the title to the oil and gas deposits.

Shell Oil Co., 20 IBLA 292 (May 27, 1975)

An acquired lands oil and gas lease offer, for lands in which the United States owns only a fractional mineral interest, successfully drawn at a noncompetitive lease simultaneous drawing is defective and is properly rejected when the applicant fails to accompany his offer with the statement required by the regulation showing the extent of his ownership of operating rights to the fractional mineral interest not owned by the United States.

George H. Isbell, Jr., 20 IBLA 312 (May 30, 1975)

An oil and gas lease offer for acquired lands will be rejected unless all the copies of the application required by the regulation, 43 CFR 3111.1-2, are signed.

Duncan Miller, 21 IBLA 50 (June 17, 1975)

OIL AND GAS LEASES--Continued

ACQUIRED LANDS LEASES--Continued

An acquired lands lease offer for land in which the United States owns only a fractional mineral interest is defective and subject to rejection when the applicant fails to accompany his offer with the statement required by the regulations showing the extent of his ownership of operating rights to the fractional mineral interest not owned by the United States. Under the regular or "over-the-counter" filing procedure, however, if the offeror subsequently submits his statement regarding ownership of operating rights prior to a final decision rejecting the offer, the defect may be considered cured with priority of filing as of the time the statement was filed.

John Oakason, Jean Oakason, 21 IBLA 105 (July 25, 1975)

The Mineral Leasing Act for Acquired Lands of 1947, *as amended*, 30 U.S.C. §§ 351-59 (1970), requires that the consent of the administrative agency having jurisdiction of the acquired land described in a lease offer be obtained prior to the issuance of an oil and gas lease for such land. The Department of the Interior has no discretionary authority to lease such land where the consent is withheld.

Frederick L. Smith, 21 IBLA 239 (Aug. 11, 1975)

Sallie B. Sanford, 24 IBLA 31 (Feb. 17, 1976)

Charles F. Hajek and Frederick L. Smith, 29 IBLA 330 (Mar. 31, 1977)

Geo, Inc., 34 IBLA 27 (Feb. 14, 1978)

An applicant for an acquired lands oil and gas lease may properly be required to furnish the Bureau of Land Management with certain title information in the county recorder's offices as a precondition to lease issuance if the Bureau has insufficient title information.

Jean Oakason, 22 IBLA 33 (Sept. 10, 1975)

An acquired lands oil and gas lease offer for lands in which the United States owns only a fractional mineral interest is defective and is properly rejected when the applicant fails to accompany the offer with the statement required by the regulation showing the extent of ownership of operating rights to the fractional mineral interest not owned by the United States.

Margaret Hughes Burns, 22 IBLA 146 (Sept. 30, 1975)

Michael Shearn, 24 IBLA 259 (Mar. 29, 1976)

Robert L. Williams, 24 IBLA 331 (Apr. 20, 1976)

Mary Nan Spear, 25 IBLA 34 (May 5, 1976)

Beatrice L. Marchand, 26 IBLA 180 (Aug. 9, 1976)

Where oil and gas deposits in lands acquired by the United States and devoted to use for military purposes become "surplus property" under the Federal Property and Administrative Services Act, such deposits may be leased only under the provisions of that Act, and are not subject to leasing under the Mineral Leasing Act for Acquired Lands.

Paradox Oil and Gas Co., 22 IBLA 242 (Oct. 22, 1975)

OIL AND GAS LEASES--Continued

ACQUIRED LANDS LEASES--Continued

An applicant for an acquired lands oil and gas lease must execute any special stipulations required by the agency administering the land as a condition precedent to the issuance of the lease, or suffer rejection of the offer.

Sallie B. Sanford, 22 IBLA 289 (Oct. 30, 1975)

An applicant for an acquired lands oil and gas lease may properly be required to furnish the Bureau of Land Management with reasonable title information in the county recorder's offices as a precondition to lease issuance.

Jean Oakason, 22 IBLA 311 (Nov. 10, 1975)

When an agency with jurisdiction over acquired lands has requested a short-term suspension of oil and gas lease offers, a decision rejecting the offers may be remanded to consider processing the offers in a manner consistent with that of a similar offer for which the agency has also accepted a suspension.

Chevron Oil Co., 23 IBLA 163 (Dec. 23, 1975)

A noncompetitive oil and gas lease offer for acquired land in an incorporated city, is properly rejected since the Mineral Leasing Act for Acquired Lands specifically excludes such lands from its provisions.

Sallie B. Sanford, 23 IBLA 312 (Jan. 16, 1976)

Uncertainty of title to oil and gas in an acquired land tract is sufficient ground for the rejection of a lease offer in the exercise of the Secretary's discretionary authority over leasing. The burden is on the lease applicant to demonstrate that the minerals he seeks to lease are owned by the United States as an acquired interest. A decision rejecting an offer will be affirmed where appellant has failed to meet this burden and a significant question of title remains.

Don Jumper, 24 IBLA 218 (Mar. 24, 1976)

An acquired lands oil and gas lease offer for lands in which the United States owns only a fractional mineral interest is defective and is properly rejected when the applicant fails to accompany his offer with the statement required by 43 CFR 3130.4-4 showing the extent of his ownership of operating rights for the fractional mineral interest not owned by the United States.

June Brooks, 25 IBLA 326 (June 30, 1976)

Because the Mineral Leasing Act for Acquired Lands specifically excludes the leasing of land located within an incorporated city, town, or village, a noncompetitive oil and gas lease offer for acquired land within the boundaries of such a city, town, or village is properly rejected.

James L. Santy, 25 IBLA 390 (July 6, 1976)

OIL AND GAS LEASES--Continued

ACQUIRED LANDS LEASES--Continued

A simultaneous acquired lands oil and gas lease offer for lands in which the United States owns only a fractional mineral interest is defective and is properly rejected when the applicant fails to accompany his offer with the statement required by the regulation showing the extent of his ownership of operating rights to the fractional mineral interests not owned by the United States, nor can such defect be cured by submitting the information on appeal.

Jelenko Stefanovic, 26 IBLA 229 (Aug. 17, 1976)

Where title to the minerals in a tract of acquired land which is the subject of an oil and gas lease offer cannot be determined from records in the possession of the BLM, the burden is on the applicant to search the land records to ascertain the chain of title and establish the eligibility of the tract for leasing. Applicant may be required to furnish evidence from the county recorder's office in the nature of a title abstract sufficient to allow the Solicitor to render a legal opinion regarding title to the oil and gas in the tract sought for leasing. Rejection of the offer in the exercise of the Secretary's discretion over leasing is proper where applicant declines to provide such information.

Where there is uncertainty regarding title to the oil and gas in an acquired land tract embraced in an oil and gas lease offer, and the evidence provided by the applicant is not sufficient basis for a legal opinion as to the status of title, the offer is properly rejected by the BLM. However, if the applicant provides new evidence on appeal tending to show the existence of a United States interest in the oil and gas in the tract, the case may be remanded for consideration of the new evidence.

Jean Oakason, 27 IBLA 41 (Sept. 22, 1976)

An acquired lands oil and gas lease offer, for lands in which the United States owns only a fractional mineral interest, is defective and is properly rejected when the applicant fails to accompany its offer with the statement required by the regulation showing the extent of its ownership of operating rights to the fractional mineral interest not owned by the United States. Under the regular or "over-the-counter" filing procedure, however, if the offeror submits its statement of operating rights with its appeal, the defect may be considered cured with priority of filing as of that time.

Arkansas Western Gas Co., 27 IBLA 207 (Oct. 6, 1976)

An oil and gas lease offer for acquired lands in which the United States owns a fractional mineral interest must be accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States. An offer which is defective for failure to comply with this mandatory regulation must be rejected.

Frank G. Wells, 28 IBLA 113 (Nov. 15, 1976)

Susan B. Smith, 28 IBLA 173 (Nov. 24, 1976)

An oil and gas lease offer made pursuant to the Mineral Leasing Act for Acquired Lands is properly rejected where the subject lands are not acquired lands but, rather, are patented with a reservation of mineral rights in the United States.

John C. Clay, 28 IBLA 353 (Jan. 24, 1977)

OIL AND GAS LEASES--Continued

ACQUIRED LANDS LEASES--Continued

An oil and gas lease offer for acquired lands in which the United States owns a fractional mineral interest, filed before Sept. 30, 1976, must have been accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States. An offer which was defective for failure to comply with this mandatory regulation must be rejected where it was filed in the simultaneous drawing procedure.

Duncan Miller, 29 IBLA 1 (Feb. 7, 1977)

Mary Nan Spear, 31 IBLA 386 (Aug. 16, 1977)

Under the Mineral Leasing Act for Acquired Lands of 1947, *as amended*, 30 U.S.C. §§ 351-359 (1970), if the lands embraced within an oil and gas lease application are under surface jurisdiction of a service or bureau within the Department of the Interior, as are the National Park Service and the Bureau of Reclamation, the consent of the Secretary of the Interior is necessary under the Act to the leasing of the land. Where the National Park Service recommends that oil and gas leases for lands within the boundaries of the Chickasaw National Recreation Area be rejected in order to maintain the area for the purposes for which it was established, it is proper to accept this recommendation and reject the offers.

Daphine Shear, David L. Shear, 29 IBLA 33 (Feb. 10, 1977)

An oil and gas lease offer for acquired lands in which the United States owns a fractional mineral interest must be accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States. When an offeror submits, on appeal, a copy of such statement but the date on the statement differs from the date on the card, and the offeror does not allege he filed the statement simultaneously with the offer, such offer must be rejected for failure to comply with a mandatory regulation.

Duncan Miller, 29 IBLA 43 (Feb. 16, 1977)

Where acquired lands are under the jurisdiction of a bureau of the Department of the Interior, the Secretary is the one whose consent is necessary to the leasing of the land. The Bureau's views, of course, will be considered carefully. Where its views are merely conclusionary, it is proper to remand the case to ascertain the factual basis of such conclusions and whether leasing would be permissible if coupled with appropriate stipulations. The Bureau of Reclamation is not an "agency" within the ambit of that term in the Acquired Lands Mineral Leasing Act. 30 U.S.C. §§ 351-59 (1970).

The Mineral Leasing Act for Acquired Lands, *as amended*, 30 U.S.C. §§ 351-59 (1970), requires that the consent of the administrative agency having jurisdiction of the acquired land described in a lease offer be obtained prior to the issuance of an oil and gas lease for such land. The Department of the Interior has no authority to lease such land where the consent is withheld.

Walter W. Sapp, 29 IBLA 319 (Mar. 30, 1977)

OIL AND GAS LEASES--Continued

ACQUIRED LANDS LEASES--Continued

Where material involving a prior mineral reservation on acquired lands is first submitted on appeal, and the effect of a State statute and State court decree is in issue, it is appropriate to remand the case to the BLM State Office for further consideration.

A. M. Henderson, 30 IBLA 8 (Apr. 4, 1977)

An oil and gas lease offer for acquired lands in which the United States owns a fractional mineral interest, filed before Oct. 28, 1976, must have been accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States. An offer which was defective for failure to comply with this mandatory regulation must be rejected where it was filed in the simultaneous drawing procedure.

Vernon C. Howell, 30 IBLA 70 (Apr. 18, 1977)

The Bureau of Reclamation is not an "agency" within the ambit of that term in the Acquired Lands Mineral Leasing Act, 30 U.S.C. §§ 351-59 (1970). Where acquired lands are under the jurisdiction of a Bureau of the Department of the Interior, it is the Secretary's consent which is necessary to the leasing of land. The Bureau's views will be given careful consideration. However, where such views are merely conclusional, it is proper to remand the case to ascertain the factual basis for such conclusions and to determine whether leasing may be permissible if coupled with appropriate stipulations.

Shell Oil Co., 30 IBLA 127 (May 19, 1977)

Kent E. Peterson, 30 IBLA 199 (May 20, 1977)

The lessee of an acquired lands oil and gas lease issued after Sept. 2, 1960, which has reached the end of its primary term, must submit the rental for the first year of an anticipated extended term under 30 U.S.C. § 226(e) (1970), on or before the regular anniversary date of the lease. Failure to submit the rental timely will result in the automatic termination of the lease by operation of law under 30 U.S.C. § 188(b) (1970). Unless the lessee can show that he is entitled to reinstatement of his lease under 30 U.S.C. § 188(c) (1970), the lease must be deemed to have terminated at the end of its stated term.

A petition for reinstatement of an acquired lands oil and gas lease terminated for lack of timely payment of the rental is properly denied where the lessee fails to show reasonable diligence in mailing the payment or a justifiable excuse for the delay in payment. The error of an employee in failing to recognize that rental payment was required for the leases in question does not justify the failure to make a timely payment.

Shell Oil Co., 30 IBLA 290 (June 1, 1977)

Where the United States owns only fractional mineral interest in the land, an offer filed before Sept. 30, 1976, for a simultaneous oil and gas lease drawing, must be rejected where it is not accompanied by a statement showing extent of offeror's ownership of operating rights in fractional mineral interest not owned by the United States.

Bruce T. Cameron, Carol Heller, 31 IBLA 234 (July 12, 1977)

OIL AND GAS LEASES--Continued

ACQUIRED LANDS LEASES--Continued

Where the regulation, 43 CFR 3130.4-4 (1975), in effect at the time of filing, required that an oil and gas lease offer for acquired land in which the United States owns a fractional mineral interest must be accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States, a simultaneously filed oil and gas lease offer which is not accompanied by the required statement must be rejected.

Where a regulation requires that an acquired lands oil and gas lease offer be accompanied by a separate statement as to the offeror's ownership of operating rights to the fractional mineral interest not owned by the United States, and the offer is rejected for noncompliance therewith, the offeror's bald assertion that he filed such statement is insufficient to prove such a fact without corroboration. A presumption of regularity supports the official acts of public officers and, absent clear evidence to the contrary, it will be presumed that they have properly discharged their official duties.

W. J. Langley, 32 IBLA 118 (Sept. 12, 1977)

Where minerals not owned by the United States have been leased for oil and gas purposes under the terms of the Mineral Leasing Act for Acquired Lands, the lease must be canceled because only acquired minerals owned by the United States are subject to leasing under that Act.

Duncan Miller, 32 IBLA 137 (Sept. 12, 1977)

A recommendation by the Bureau of Reclamation that issuing oil and gas leases on acquired land under its administration would jeopardize further acquisitions, should be given careful consideration, but the Bureau of Land Management must independently evaluate whether issuing the leases would be in the public interest.

An independent evaluation of whether the issuance of oil and gas leases on acquired lands would be in the public interest need, in some cases, consist only of an examination of the general character of the land. Where, however, the offeror raises material factual questions, these must be considered.

Harris R. Fender, 33 IBLA 216 (Dec. 22, 1977)

The Bureau of Land Management must reject a noncompetitive oil and gas lease offer for acquired lands under the jurisdiction of the Department of the Air Force where the latter agency withholds its consent from the issuance of a lease.

Capitol Oil Corp., 33 IBLA 392 (Jan. 26, 1978)

Regulations in force prior to Oct. 28, 1976, prohibited, in the absence of extraordinary circumstances, the issuance of oil and gas leases for fractional interests to one who would own less than 50 percent of operating rights in the leased property. The later determination that such a policy may not in general serve the public interest and the expression of the new policy in a revised regulation does not constitute an extraordinary circumstance.

Wilfred Plomis, 34 IBLA 222 (Mar. 27, 1978)

OIL AND GAS LEASES--Continued

ACQUIRED LANDS LEASES--Continued

Where acquired lands are under the jurisdiction of the Bureau of Reclamation, its opinion as to the desirability of issuing an oil and gas lease under the Mineral Leasing Act for Acquired Lands is not controlling, although its views will be considered carefully. Rather, it is up to the Bureau of Land Management to assemble information and to determine on the Department's behalf whether such a lease may be issued.

Where the Bureau of Land Management adopts the views of the Bureau of Reclamation, recommending rejection of an oil and gas lease offer for acquired lands within a wildlife area, without making an independent evaluation of the compatibility of oil and gas leasing with the intended function of the lands and without considering the feasibility of issuing the lease with appropriate protective stipulations, the matter is properly remanded to BLM for such independent evaluation and consideration, during which time the offeror may submit proposals for protective stipulations.

Esdras K. Hartley, 35 IBLA 137 (May 22, 1978)

An oil and gas lease offer for acquired lands will be rejected unless all the copies of the application required by the regulation, 43 CFR 3111.1-2, are filed.

Where an oil and gas lease offer for acquired lands is filed for less than the entire tract acquired by the United States, the regulations in 43 CFR 3102.2-3(b)(1) require that the application must describe the land by courses and distances between successive angle points on its boundary tying by course and distance into the description in the deed or other document by which the United States acquired title to the land.

Robert N. Enfield, 36 IBLA 383 (Aug. 31, 1978)

The Mineral Leasing Act for Acquired Lands does not exclude from oil and gas leasing those lands underlying the Missouri River within the boundaries of the Fort Berthold Indian Reservation as established by the Treaty of Fort Laramie (1851) and the Executive Order of Apr. 12, 1870, which were reacquired by the United States from the Indian tribes. The exclusion in the Act for submerged lands refers to submerged coastal lands, as set forth in 43 CFR 3101.2-1(g).

Jarel Energy Corp., 42 IBLA 105 (Aug. 16, 1979)

Lands which were acquired for development of their uranium deposits are not subject to oil and gas leasing under the Mineral Leasing Act for Acquired Lands.

Esdras K. Hartley, 44 IBLA 66 (Nov. 20, 1979)

ACREAGE LIMITATIONS

An oil and gas lease issued for 2,960 acres in violation of administrative regulations need not be canceled in its entirety, in the absence of an intervening qualified applicant.

John T. Stewart III, Harlan C. Altman, Jr., Trustee, 25 IBLA 306 (June 28, 1976) 83 I.D. 247

OIL AND GAS LEASES--Continued

ACREAGE LIMITATIONS--Continued

The record-title holder of an oil and gas lease or offer is chargeable with the full acreage included in the lease or offer, even though another person, association, or corporation has a 50-percent interest in the lease or offer.

Arjay Oil Co., 30 IBLA 212 (May 20, 1977)

An oil and gas lease issued for land available for leasing, but in violation of an administrative regulatory requirement, need not be canceled in the absence of an intervening qualified applicant or some overriding policy consideration.

Merle C. Chambers, 40 IBLA 144 (Mar. 29, 1979)

APPLICATIONS

Generally

The Department has discretionary authority to issue or not to issue leases under the Mineral Leasing Act for Acquired Land , 30 U.S.C. §§ 351-59 (1970).

General Crude Oil Co., 18 IBLA 326 (Jan. 7, 1975)

An oil and gas lease offer which is not accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States is properly rejected.

Judith Walker, Ginger Lawson, 18 IBLA 410 (Feb. 10, 1975)

As a condition precedent to the issuance of an oil and gas lease, the Department of the Interior may require an applicant to accept a reasonable surface management stipulation for the protection of wildlife and watershed values.

Richard P. Cullen, 18 IBLA 414 (Feb. 10, 1975)

No law or regulation requires the mandatory rejection of an oil and gas lease offer merely because it is held in suspense for 1 year. The setting of a specific time limit on the suspension of an oil and gas offer is not a determination in the exercise of the Secretary's discretionary authority of whether or not to lease the lands for oil and gas.

Justheim Petroleum Co., 18 IBLA 423 (Feb. 13, 1975)

Where the Forest Service suggests a stipulation barring any occupancy and use of the surface as a condition precedent to the issuance of an oil and gas lease for public lands in a national forest, based only on the fact that the land is in an "inventoried roadless area," and where later the Forest Service agrees to a revised stipulation, the Bureau of Land Management decision to the extent it required the execution and filing of the "Roadless Area" stipulation will be set aside and the case remanded to the Bureau for submission of the substitute stipulation to the offeror for execution and filing.

James A. Krumhansl, 19 IBLA 56 (Feb. 21, 1975)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

Where the Forest Service requests a stipulation effectively barring any occupancy or use of the surface as a condition precedent to the issuance of an oil and gas lease for lands in a national forest, based on the fact that the land is in an "inventoried roadless area," and where the Forest Service later substitutes a less restrictive stipulation, a Bureau of Land Management decision requiring the execution and filing of the roadless area stipulation will be vacated and the case will be remanded to the Bureau for submission of the substitute stipulation to the offeror for execution and filing.

Benjamin T. Franklin, 19 IBLA 94 (Mar. 4, 1975)

Land formerly included in a canceled or relinquished lease or in a lease terminated or expired by operation of law shall be subject to filing of new lease offers only as provided in 43 CFR 3112.

Duncan Miller, 19 IBLA 188 (Mar. 18, 1975)

An oil and gas lease offer must be rejected when, before the lease offer has been accepted, the land applied for has been patented with no reservation of oil and gas to the United States.

It is proper to reject an oil and gas lease offer for Alaskan land to the extent of conflict with an Alaskan selection application after the application has been tentatively approved even though the offer was filed before the selection application.

Lloyd W. Levi, 19 IBLA 201 (Mar. 19, 1975)

Yolanda Hockel et al., 19 IBLA 204 (Mar. 19, 1975)

Under the policy of the Secretary of the Interior of maintaining on file oil and gas lease offers for lands in Alaska filed prior to the issuance of Public Land Order 4582 on Jan. 17, 1969, an offer which would ultimately require rejection because of the unavailability of the land at the time the offer was filed, will not be retained on file, but may be properly rejected at any time when the case is reached for adjudication.

Vance W. Phillips and Melissa A. Burnham, 19 IBLA 211 (Mar. 21, 1975)

Oil and gas lease applications, action on which was suspended under Public Land Order 4582, 34 FR 1025 (1969), are properly rejected when the lands are subsequently patented to the State of Alaska under selection applications even though the latter postdate the oil and gas lease applications; the first-qualified oil and gas lease applicant has no right or interest in the land applied for which is protected by the savings clauses of the Alaska Statehood Act and the Alaska Native Claims Settlement Act.

Haruyuki Yamane et al., 19 IBLA 320 (Apr. 7, 1975)

Under the Mineral Leasing Act of 1920, *as amended*, 30 U.S.C. § 181 *et seq.* (1970), the first-qualified applicant has a preference right to receive an oil and gas lease where the Department of the Interior has in the exercise of its discretion, determined to issue such a lease. But a lease offer does not create a vested interest where there has been no determination to lease the lands embraced in the lease offer. In the latter instance, the application for a lease is a hope or expectation rather than a valid claim against the

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

Government, and the lease offeror has acquired no rights which are violated by issuance of a patent to the State of Alaska for the lands embraced in the lease offer.

An oil and gas lease offer must be rejected when approval is given to a subsequently filed State selection embracing the same lands, including the mineral rights. Following issuance of patent to the State, the Department loses jurisdiction over the patented land.

Duncan Miller, 20 IBLA 1 (Apr. 14, 1975)

A noncompetitive oil and gas lease offer is properly rejected where the land which is the subject of such offer was formerly included in a terminated oil and gas lease, and which may be leased only in compliance with the simultaneous filing procedures set out in 43 CFR 3112.

Duncan Miller, 20 IBLA 1[illegible] (Apr. 16, 1975)

The Department of the Interior has full and final authority to determine whether or not to issue oil and gas leases. Where the lands embraced within an oil and gas lease offer contain established archaeological sites and in the opinion of the responsible Departmental officials oil and gas exploration activities would destroy or impair the sites, a lease offer is properly rejected, absent an affirmative showing on behalf of the offeror that exploration activities would not infringe upon the archaeological resources of the area.

R[illegible]ita Trujillo, 20 IBLA 54 (Apr. 24, 1975)

Sec. 6(b) of the Alaska Statehood Act providing for recognition of valid existing claims does not apply to an oil and gas lease offer filed pursuant to the Mineral Leasing Act of 1920. While an oil and gas lease offeror may have a right to a lease where the Department has exercised its discretion to issue a lease, and the offeror is entitled to a statutory priority right over other offerors, his application does not rise to the level of a "claim" or "right" within the savings clause of the Alaska Statehood Act where there has been no such determination to lease.

Regulation 43 CFR 2627.3(b)(2) requires that conflicting oil and gas lease offers filed pursuant to the Mineral Leasing Act of 1920, except for preference right applications, whether filed prior to, simultaneously with, or after the filing of an Alaska State selection, must be rejected when and if the selection is tentatively approved. The preference right referred to in the regulation does not apply to an oil and gas lease offeror who receives a priority right as the first-qualified applicant in the event the Department decides to issue a lease.

Richard W. Bowe, Daniel Gaudiane, 20 IBLA 59 (Apr. 24, 1975) 82 I.D. 174

The unilateral mistake of an oil and gas lease offeror in withdrawing his offer does not relieve him of the consequences of the withdrawal, which is, that the offer is terminated when the Bureau of Land Management receives the withdrawal.

John J. Sexton (On Reconsideration), 20 IBLA 187 (May 7, 1975)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

Where an application to lease land under the jurisdiction of another agency is rejected because of objections by that agency, and where on appeal that agency subsequently agrees to lease the land subject to certain special stipulations, such stipulations will be submitted to the offeror for execution.

Shell Oil Co., 20 IBLA 282 (May 27, 1975)

Oil and gas lease offers embracing lands withdrawn or reserved for any agency of the Department of Defense may not be granted without the consent of that Department. 43 U.S.C. § 158 (1970). Such lease offers must be rejected where such consent is withheld as inconsistent with the military use, and the offers may not be suspended to await the possible availability of the lands for leasing.

Mobil Oil Corp., 20 IBLA 296 (May 27, 1975)

Drawing entry cards for simultaneous oil and gas lease offers which are incomplete will be rejected and the filing fees will be retained.

Albert F. Mitchell III, 20 IBLA 302 (May 30, 1975)

An acquired lands oil and gas lease offer, for lands in which the United States owns only a fractional mineral interest, successfully drawn at a noncompetitive lease simultaneous drawing is defective and is properly rejected when the applicant fails to accompany his offer with the statement required by the regulation showing the extent of his ownership of operating rights to the fractional mineral interest not owned by the United States.

George B. Isbell, Jr., 20 IBLA 312 (May 30, 1975)

Where the Bureau of Land Management changes an administrative practice to thereafter refuse to accept unofficial copies of the simultaneous oil and gas lease entry card, by an order dated Mar. 26, 1975, the new practice will be given prospective application only and will not be applied retroactively to simultaneous entry cards filed during the Feb. 1975 simultaneous filing period.

F. J. Malloy, 20 IBLA 327 (June 6, 1975)

An oil and gas lease application covering lands in an outstanding lease, whether that lease is valid, void or voidable, must be rejected. A noncompetitive oil and gas lease offer covering lands in a known geologic structure must be rejected, such lands being subject to lease only by competitive bidding.

Duncan Miller, 21 IBLA 21 (June 16, 1975)

An oil and gas lease offer for acquired lands will be rejected unless all the copies of the application required by the regulation, 43 CFR 3111.1-2, are signed.

Duncan Miller, 21 IBLA 50 (June 17, 1975)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

It is the date of the ascertainment by the Geological Survey of the producing character of a structure underlying a tract of land and not the date of the pronouncement of said fact which is determinative of rights depending on whether or not the land is situated within a known geological structure (KGS). A noncompetitive oil and gas lease offer must be rejected if, at any time before a lease actually issues, the land described therein becomes within a KGS, even if the offer was filed prior to the ascertainment of the KGS.

William T. Alexander, 21 IBLA 56 (June 18, 1975)

The failure of the offeror for a noncompetitive oil and gas lease to complete that part of item 2 of the lease offer form calling for the extent of the interest of the United States in oil and gas if less than 100 percent does not by itself necessitate rejection of the offer as the offer is held to include "any and all" lands described therein and whatever mineral interest the United States owns in said lands and thus becomes an offer for whatever interest is available.

John Oakason, Jean Oakason, 21 IBLA 185 (July 25, 1975)

The mere filing of a noncompetitive oil and gas lease offer does not invest the offeror with any right to receive a lease. The only right created thereby is the right to an appropriate priority of consideration if, at the discretion of the Department, an oil and gas lease is to be issued for the land which is the subject of the offer.

It is proper to reject an oil and gas lease offer to the extent of conflict with an Alaska State selection application after the application has been tentatively approved even though the offer was filed before the selection application.

C. Burglin et al., 21 IBLA 234 (Aug. 11, 1975)

Where an oil and gas lease offer filed on a drawing entry card in a simultaneous filing procedure contains the name of an additional party in interest, and the required statement of interest, copy or explanation of the agreement between the parties, and evidence of the qualifications of the additional party are not filed within 15 days after the filing of the lease offer, the offer must be rejected.

Emily Sonnek, 21 IBLA 245 (Aug. 11, 1975)

Charmay B. Allred, Edward C. Allred, 26 IBLA 276 (Aug. 24, 1976)

Drawing entry cards for simultaneous oil and gas lease offers will be rejected and the filing fees retained where the applications are not made on the correct form.

John F. Brown, 21 IBLA 260 (Aug. 11, 1975)

Where the Forest Service requests imposition of a stipulation effectively barring any occupancy or use of the surface as a condition precedent to the issuance of an oil and gas lease for lands in a national forest, the case will be set aside and remanded for consideration of a less stringent stipulation which the Forest Service has agreed to in other cases arising in the same and other national forests in Utah.

G. W. Anderson, 21 IBLA 328 (Aug. 14, 1975)

An oil and gas lease offer filed in the name of a corporation is properly rejected where the offer is signed by an officer who was not shown, by the corporate qualification papers contained in the company's referenced serial number, to be one of the officers authorized to sign for the company, and the offer was not accompanied by a statement showing that he was authorized to act for the company.

Manhattan Resources, Inc., 22 IBLA 24 (Sept. 9, 1975)

A Bureau of Land Management office has no jurisdiction to take further action on an oil and gas lease application where there has been an appeal to the Board of Land Appeals on that application.

Jean Oakason, 22 IBLA 33 (Sept. 10, 1975)

Land included in an oil and gas lease which terminates by operation of law for failure to pay rental timely, is subject to filing of new oil and gas lease offers only in accordance with the provisions of the regulations relating to simultaneous filing of oil and gas lease offers, and the filing of an over-the-counter lease offer will not interdict the simultaneous filing procedure as to that land.

Vern H. Bolinder, 22 IBLA 130 (Sept. 26, 1975)

Land included within an outstanding oil and gas lease is not available for leasing and an application filed for such land must be rejected.

Land, formerly in a canceled, relinquished, terminated, or expired lease, is not subject to over-the-counter filing, and may be leased only in compliance with the drawing procedure established by 43 CFR 3112.

John F. Brown, 22 IBLA 133 (Sept. 26, 1975)

Filing fees may be retained when drawing entry cards made on reproduced forms are rejected.

Charles J. Babington et al., 22 IBLA 143 (Sept. 30, 1975)

An acquired lands oil and gas lease offer for lands in which the United States owns only a fractional mineral interest is defective and is properly rejected when the applicant fails to accompany the offer with the statement required by the regulation showing the extent of ownership of operating rights to the fractional mineral interest not owned by the United States.

Margaret Hughes Boggs, 22 IBLA 146 (Sept. 30, 1975)

Michael Shearn, 24 IBLA 259 (Mar. 29, 1976)

Robert L. Williams, 24 IBLA 311 (Apr. 20, 1976)

Beatrice E. Marchand, 26 IBLA 100 (Aug. 9, 1976)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

On appeal from decision(s) rejecting oil and gas lease offer(s) insofar as they include land(s) within a lava flow under consideration for primitive or natural area status, when the Bureau of Land Management indicates that it is willing to lease some of the land(s) under a no-surface-occupancy stipulation, and the offeror(s) indicate they would accept such a stipulation for all the land(s) at issue, the decision(s) will be set aside and the case(s) remanded for consideration of issuance of lease(s) containing no-surface-occupancy stipulation(s) on the land(s) in the lava flow.

Houston Oil and Minerals Corp., Leland A. Hodges (Trustee), 22 IBLA 172 (Sept. 30, 1975)

Leland A. Hodges (Trustee), 23 IBLA 142 (Dec. 23, 1975)

The mere filing of a noncompetitive oil and gas lease offer does not invest the offeror with any right to receive a lease. The only right created thereby is the right to an appropriate priority of consideration if, at the discretion of the Department, an oil and gas lease is to be issued for the land which is the subject of the offer, but it will not preclude the filing of a subsequent State selection application, nor bar approval of the State's application and the issuance of a patent to the State.

The notation on land office records of a noncompetitive oil and gas lease application does not prevent the State of Alaska from selecting the land pursuant to the Alaska Statehood Act.

Yukon Service, Inc., 22 IBLA 220 (Oct. 15, 1975)

Where an over-the-counter oil and gas lease offer is rejected because the applicant did not specify which of the described tracts he wanted the offer to include, he is presumed to have applied for all the tracts. Where on appeal he asserts that he desired to lease all the described lands, the decision will be reversed.

R. D. Hearn, 22 IBLA 226 (Oct. 15, 1975)

An applicant for an acquired lands oil and gas lease must execute any special stipulations required by the agency administering the land as a condition precedent to the issuance of the lease, or suffer rejection of the offer.

Sallie B. Sanford, 22 IBLA 289 (Oct. 30, 1975)

An oil and gas offer must be rejected when the land applied for has been leased to a senior offeror under a proper offer.

Connie Hull, 22 IBLA 307 (Nov. 10, 1975)

A simultaneous oil and gas lease offer is properly rejected where the drawing entry card is not signed or dated by the offeror.

Thomas Buckmann, 23 IBLA 21 (Nov. 26, 1975)

John Willard Dixon, 28 IBLA 275 (Dec. 20, 1976)

Thomas C. Moran, 32 IBLA 168 (Sept. 13, 1977)

Harley W. Adams, Timothy J. Claiborne, Sr., 42 IBLA 22 (Aug. 22, 1979)

Harley W. Adams, 43 IBLA 144 (Sept. 28, 1979)

When an agency with jurisdiction over acquired lands has requested a short-term suspension of oil and gas lease offers, a decision rejecting the offers may be remanded to consider processing the offers in a manner consistent with that of a similar offer for which the agency has also accepted a suspension.

Chevron Oil Co., 23 IBLA 163 (Dec. 23, 1975)

Where an oil and gas lease offeror files a simultaneous oil and gas lease drawing card and indicates that its corporate qualifications are filed under a specific serial number, the offer will not be rejected where the corporation can show that the State Office informed it earlier that its corporate qualifications had been placed in that file.

Allied Chemical Corp., 23 IBLA 214 (Jan. 6, 1976)

A simultaneous oil and gas lease offer is properly rejected where the drawing entry card is postdated beyond the date of the drawing.

Ray Flamm, 24 IBLA 10 (Feb. 4, 1976)

The drawing of an offer for a noncompetitive lease in a simultaneous oil and gas lease drawing creates no vested rights in the offeror, and the offeror cannot compel the issuance of a lease before an environmental analysis has been made where the Bureau of Land Management has determined that the environmental analysis is necessary for the protection of the resources of the particular area.

Paula J. Jones, 24 IBLA 76 (Feb. 24, 1976)

It is well established that the execution of appropriate special stipulations as a condition precedent to the issuance of oil and gas leases may be required at the discretion of the Secretary of the Interior in order to protect environmental, recreational, and other land use values.

While "no surface occupancy" stipulations should be of sufficient efficacy to protect the environment, no lease should issue with stipulations so restrictive that the use of the land for any purpose associated with the production of oil and gas is totally precluded.

The financial burden of complying with protective stipulations in oil and gas leases is the sole responsibility of the lessee.

Bill J. Maddox, 24 IBLA 147 (Mar. 10, 1976)

A decision suspending oil and gas lease applications for public land in a national forest because the Forest Service has not prepared an environmental impact statement on a roadless area will be set aside and the case remanded for the Bureau of Land Management, in the exercise of its delegated discretion to lease public lands for oil and gas, first to determine whether the Bureau should prepare an environmental impact statement

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

as the lead agency responsible for mineral leasing, and then to act on the offers accordingly.

Chevron Oil Co., 24 IBLA 159 (Mar. 15, 1976)

The financial burden of complying with stipulations included in an oil and gas lease is the sole responsibility of the lessee.

Duncan Miller, 24 IBLA 203 (Mar. 19, 1976)

A decision rejecting an oil and gas lease offer because the State Office wishes to reconsider whether a lease should issue subject to a no surface occupancy stipulation will be set aside and the case remanded for the Bureau of Land Management, in the exercise of its delegated discretion to lease public lands for oil and gas, to determine whether in the light of *Chevron Oil Co.*, 24 IBLA 159 (1976), it wishes to issue a lease subject to a no surface occupancy stipulation, or whether it still wishes to make the subject land not available for leasing at this time, which is within its authority.

Milan S. Papulak, 24 IBLA 278 (Mar. 30, 1976)

Simultaneous oil and gas lease drawing entry cards which are not executed correctly will be rejected. Where an ambiguity is created by an applicant on a drawing entry card, it is not the responsibility of BLM to speculate about applicant's intention and necessarily to resolve the ambiguity in his favor.

Joseph A. Winkler, 24 IBLA 380 (Apr. 29, 1976)

An acquired lands oil and gas lease offer for lands in which the United States owns only a fractional mineral interest is defective and is properly rejected when the applicant fails to accompany his offer with the statement required by the regulation showing the extent of his ownership of operating rights to the fractional mineral interest not owned by the United States.

Even if it be established that a controlling regulation had been violated in previous cases, such violation does not afford a valid predicate for further violations of the regulation.

Mary Nan Spear, 25 IBLA 34 (May 5, 1976)

The Secretary of the Interior may, in his discretion, reject any offer to lease public lands for oil and gas deposits upon a proper determination that the leasing would not be in the public interest, even though the land applied for is not withdrawn from leasing under the Mineral Leasing Act.

The execution of special stipulations as a condition precedent to the issuance of an oil and gas lease may be required at the discretion of the Secretary of the Interior in order to protect environmental, recreational, and other land use values. In each case the need for the stipulation should be clear and the means to accomplish the intended purpose should be reasonable.

While the Bureau of Land Management may reject oil and gas lease offers or require stringent protective stipulations in order to protect the environment, such action must be supported by facts of record. Where such action is taken and is supported only by statements that leasing would not be in the public interest, the case will be remanded to the Bureau for a more complete exposition of the basis for the action.

Cartridge Syndicate, 25 IBLA 57 (May 20, 1976)

Simultaneous oil and gas drawing entry cards must be fully executed by the applicant and when the applicant omits the date of execution on the card, the lease offer is properly rejected.

Where an applicant fails to date a simultaneous oil and gas drawing entry card, he has not complied with 43 CFR 3112.2-1(a) which requires that the card be "fully executed" and his offer is properly rejected whether the defect is discovered before or after the drawing. The fact that BLM entered the card in the drawing does not waive the defect.

John R. Pisick et al., 25 IBLA 107 (June 7, 1976)

A simultaneous oil and gas lease offer is properly rejected and the filing fee retained where the offeror, in completing the drawing card, does not provide the name of the State in which the parcel of land is located.

Ray Granat et al., 25 IBLA 115 (June 7, 1976)

Jerry Van Woerdhuizen, 26 IBLA 152 (Aug. 2, 1976)

Eleanor R. Neuberger, 29 IBLA 168 (Mar. 14, 1977)

Martin M. Sheets, 32 IBLA 7 (Aug. 29, 1977)

Where the Bureau of Land Management ordered on Mar. 26, 1975, that unofficial copies of the simultaneous oil and gas lease entry card were invalid and to be rejected, that order will be given prospective application only and will not be applied retroactively to simultaneous entry cards filed during the Jan. 1975 simultaneous filing period.

Eve Reese, 25 IBLA 244 (June 22, 1976)

An oil and gas lease offer filed on a drawing entry card in a simultaneous filing procedure must be rejected when the entry card contains the name of an additional party in interest and the required statement of the additional party's interest and qualifications is not filed within the time required by 43 CFR 3102.7. The filing of the required statement after that time has elapsed does not cure the defect.

John J. Gergurich, Farrell G. Seal, Thomas J. Sweeney, 25 IBLA 266 (June 24, 1976)

The bona fide purchaser provision of the Act of Sept. 21, 1959, 73 Stat. 571, *as amended*, 30 U.S.C § 184(h)(2) (1970), does not protect the assignee of a noncompetitive oil and gas lease offeror from the rejection of its assignor's offer after it is drawn first at a simultaneous drawing.

Leon M. Flanagan et al., 25 IBLA 269 (June 24, 1976)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

An oil and gas lease offer filed on a drawing entry card in a simultaneous filing procedure must be rejected when the entry card contains the name of an additional party in interest and the required statement of the additional party's interest and qualifications is not filed within the time required by 43 CFR 3102.7. The offeror is not retroactively excused from submitting the required statement by an assertion in his appeal that he is the sole party in interest because the anticipated association between him and the additional party listed on the entry card had failed to materialize.

James D. Caddell, 25 IBLA 274 (June 24, 1976)

An acquired lands oil and gas lease offer for lands in which the United States owns only a fractional mineral interest is defective and is properly rejected when the applicant fails to accompany his offer with the statement required by 43 CFR 3130.4-4 showing the extent of his ownership of operating rights for the fractional mineral interest not owned by the United States.

June Brooks, 25 IBLA 326 (June 30, 1976)

Simultaneous oil and gas entry cards which are sent to the wrong State Office are not considered filed in the "proper office" within the meaning of 43 CFR 1821.2-2(f), and such State Office has no jurisdiction over entry cards pursuant to 43 CFR 1821.2-1(c); therefore, the filing fees for such offers should not be retained.

Where a simultaneous oil and gas entry card is filed in the wrong State Office, the entry card and the filing fee should be returned to the offeror.

James H. Scott, 25 IBLA 384 (July 6, 1976)

Because the Mineral Leasing Act for Acquired Lands specifically excludes the leasing of land located within an incorporated city, town, or village, a noncompetitive oil and gas lease offer for acquired land within the boundaries of such a city, town, or village is properly rejected.

James L. Sauty, 25 IBLA 390 (July 6, 1976)

A simultaneous oil and gas lease offer is properly rejected where the drawing card is not signed.

A simultaneous oil and gas lease offer is properly rejected when the date is omitted from the drawing card.

Herbert W. Schollmeyer, 25 IBLA 393 (July 6, 1976)

A simultaneous oil and gas lease offer is properly rejected and the filing fee retained where the offeror, in completing the drawing card, does not provide the name of the State in which the parcel of land is located where called for on the card.

When the Secretary of the Interior determines that an oil and gas lease is to be issued for a particular tract, it must be issued to the first-qualified applicant. An applicant is not qualified because of his failure to comply with 43 CFR 3112.2-1(a) when he fails to provide the name of the State in which the parcel of land is located.

Ishmael Guerra, 26 IBLA 116 (July 26, 1976)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

The Secretary of the Interior may require execution of special stipulations reasonably designed to protect environmental and other land use values as a condition precedent to the issuance of an oil and gas lease. But where a State Office of the Bureau of Land Management seeks to impose a "no surface occupancy" stipulation, the most stringent of stipulations, without a showing that it has considered less stringent stipulations, the decisions will be set aside. Where the stated basis for the imposition of the stipulation is the threat of oil and gas activities to automobile racing, the decision will be set aside particularly where the lease offers include land primarily outside the boundaries of the racing grounds withdrawal.

Vern K. Jones et al., 26 IBLA 165 (Aug. 4, 1976)

A simultaneous acquired lands oil and gas lease offer for lands in which the United States owns only a fractional mineral interest is defective and is properly rejected when the applicant fails to accompany his offer with the statement required by the regulation showing the extent of his ownership of operating rights to the fractional mineral interests not owned by the United States, nor can such defect be cured by submitting the information on appeal.

Jelenko Stefanovic, 26 IBLA 229 (Aug. 17, 1976)

A simultaneous oil and gas drawing entry card must be fully executed by an applicant, and when the applicant omits her address, the lease offer is properly rejected and the filing fee properly retained.

Grace M. Williams, 26 IBLA 232 (Aug. 17, 1976)

Lands within a known geologic structure of a producing oil or gas field may only be leased by competitive bidding pursuant to 43 CFR 3120, and a noncompetitive oil and gas lease offer filed for such lands is properly rejected.

James A. Wallender, 26 IBLA 317 (Aug. 30, 1976)

Land included within an outstanding oil and gas lease is not available for leasing and an oil and gas lease offer filed for such land must be rejected.

The Secretary has discretionary authority to reject an oil and gas lease offer where Federal title to the oil and gas deposits is uncertain.

Leonard E. McSweyn, David A. Provinse, 26 IBLA 376 (Sept. 9, 1976)

An oil and gas lease offer for land in which the United States owns a fractional mineral interest must be accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States. An offer which is defective for failure to comply with this mandatory regulation must be rejected.

Grady Argenbright, 27 IBLA 24 (Sept. 17, 1976)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

An oil and gas lease offer on a drawing card filed in a simultaneous drawing procedure is properly rejected as defective where there are other parties in interest in addition to the applicant but the card does not list them or refer to an attachment, and an attachment dated nearly 6 months prior to the filing, signed by the applicant and four others stating their qualifications and setting forth a percentage of interest for each as "Partners in interest," fails adequately to set forth the nature of their agreement, and no other statement or information is filed within the time required by 43 CFR 3102.7.

Harry Reich, 27 IBLA 123 (Sept. 30, 1976) 83 I.D. 507

An acquired lands oil and gas lease offer, for lands in which the United States owns only a fractional mineral interest, is defective and is properly rejected when the applicant fails to accompany its offer with the statement required by the regulation showing the extent of its ownership of operating rights to the fractional mineral interest not owned by the United States. Under the regular or "over-the-counter" filing procedure, however, if the offeror submits its statement of operating rights with its appeal, the defect may be considered cured with priority of filing as of that time.

Arkansas Western Gas Co., 27 IBLA 207 (Oct. 6, 1976)

An oil and gas lease offer filed on behalf of a corporation may incorporate evidence of qualifications by reference to the serial number of a case record in which such evidence has already been filed with the Bureau of Land Management (BLM). However, reference to a file which contains no evidence of the authority of the officer signing the lease offer to execute such instruments on behalf of the corporation is not sufficient and requires rejection of the offer. The fact that the required evidence is on file in another State Office of the BLM under another serial number will not avail applicant where the lease offer contains no reference to that file.

Churchill Corp., 27 IBLA 234 (Oct. 12, 1976)

The term "signed and fully executed" as used in 43 CFR 3112.2-1(a) does not interdict the use of a rubber stamp to affix a signature to a drawing entry card, provided that it is the applicant's intention that the stamp be his signature.

Under 30 U.S.C. § 226 (1970), the Department has no authority to issue an oil and gas lease to anyone other than the first-qualified applicant. If an agent signs an offer for an applicant, the applicant cannot be considered qualified unless the statements required by 43 CFR 3102.6-1 have been filed. Where a rubber stamp constitutes an applicant's signature, a State Office of the Bureau of Land Management need not presume that an applicant rather than an agent stamped the card, and where no agent's statement has been submitted, the State Office may take appropriate action to establish that the applicant's signature was imprinted at his request and that he formulated the offer.

Robert C. Leary et al., 27 IBLA 296 (Oct. 26, 1976)

Arthur S. Watkins, Robert M. Eckerman, 28 IBLA 79 (Nov. 12, 1976)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

An unsigned and undated drawing entry card filed in the simultaneous oil and gas leasing procedures must be rejected.

Frank De Jong, 27 IBLA 313 (Oct. 29, 1976)

Milo M. Snider, 33 IBLA 42 (Nov. 25, 1977)

A simultaneous oil and gas drawing entry card must be fully executed by the applicants and when they omit their address or the State in which the parcel of land to be leased is located, the lease offer is properly rejected.

Hartley L. Gordon and James A. Lint, 27 IBLA 315 (Oct. 29, 1976)

Hartley L. Gordon and James A. Lint, 32 IBLA 139 (Sept. 12, 1977)

The signature of the offeror on a simultaneous oil and gas lease entry card may be affixed by means of a rubber stamp, if it is the intention of the offeror that it be his or her signature.

Evelyn Chambers, 27 IBLA 317 (Nov. 4, 1976) 83 I.D. 533

The term "signed and fully executed" as used in 43 CFR 3112.2-1(a) does not interdict the use of a rubber stamp or other mechanical device to affix a signature to a drawing entry card, provided that it is the applicant's intention that the facsimile be his signature.

Where a facsimile affixed by means of a rubber stamp or other mechanical device constitutes an applicant's signature on a drawing entry card lease offer, a State Office of the Bureau of Land Management need not presume that the applicant, rather than an agent, stamped the card. It is proper for the BLM office to make inquiry into the filing to establish that the applicant's signature was affixed at his request and that he formulated the offer. If it is disclosed that the signature was affixed pursuant to a power of attorney, and the offer was not accompanied by the statements required by 43 CFR 3102.6-1, the offer must be rejected.

Under 30 U.S.C. § 226 (1970), the Department has no authority to issue a noncompetitive oil and gas lease to anyone other than the first-qualified applicant. If a drawing entry card lease offer is signed by an agent or attorney-in-fact in behalf of the applicant, or if a facsimile signature of the applicant is affixed upon the offer by an agent or attorney-in-fact, the offer cannot be considered to have been submitted by a qualified applicant unless it is accompanied by the statements required by 43 CFR 3102.6-1.

William J. Sparks, 27 IBLA 330 (Nov. 4, 1976) 83 I.D. 538

A drawing entry card oil and gas lease offer given first priority in a drawing in the simultaneous filing procedure creates no vested right to a lease in the offeror, but merely the right of having her offer considered first for the parcel described. If the drawing entry card is defective, it must be rejected.

Amy B. Henthorn, 27 IBLA 369 (Nov. 4, 1976)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

A simultaneous oil and gas drawing entry card must be fully executed by the applicant. When the applicant omits the zip code from his address on the card, the lease offer is properly rejected.

An applicant whose simultaneous oil and gas entry card is rejected because of a defect in his completion of the entry card cannot thereafter cure the defect by submitting a corrected entry card.

Raymond F. Kaiser, 27 IBLA 373 (Nov. 4, 1976)

An oil and gas lease offer for acquired lands in which the United States owns a fractional mineral interest must be accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States. An offer which is defective for failure to comply with this mandatory regulation must be rejected.

An oil and gas lease offer for lands in which the United States owns a fractional mineral interest must be accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States. If an agent signs such statement, rather than the offeror, the regulations require that evidence be filed of the authority of the agent to sign the statement. The agent's signature will be acceptable only if the authorization meets the specifications of the regulations.

Frank G. Wells, 28 IBLA 113 (Nov. 1', 1976)

An oil and gas lease offer for acquired lands in which the United States owns a fractional mineral interest must be accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States. An offer which is defective for failure to comply with this mandatory regulation must be rejected.

Susan B. Smith, 28 IBLA 173 (Nov. 24, 1976)

The mere filing of a noncompetitive oil and gas lease offer does not invest the offeror with any right to receive a lease, except that if the Secretary determines to lease the land applied for the applicant has a preference right to a lease if he is the first fully qualified applicant.

Pinnacle Mining and Exploration Co., Inc., 28 IBLA 249 (Dec. 20, 1976)

Ordinarily, the signing of an oil and gas lease offer by the authorized officer of the Bureau of Land Management is equivalent to issuance of the lease and creates a binding contract. However, where a Secretarial Order provides that all oil and gas noncompetitive offers must, prior to issuance of a lease, be referred to Geological Survey for a determination of whether the lands are within a known geological structure, and the authorized officer fails to follow such procedure prior to the signing, such signing is not authorized and, therefore, not binding on the Secretary.

Nola Grace Ptasynski (Supp.) (On Court Remand), 28 IBLA 256 (Dec. 20, 1976)

Where the record does not disclose sufficient facts upon which to make determinations whether a Bureau of Land Management officer who signed an oil and gas lease possessed the authority to do so, when the date of ascertainment of a known geologic structure actually occurred, and whether the United States Geological Survey had sufficient information to make a known geologic structure determination, a hearing may be ordered so that a complete record may be developed.

William T. Alexander (On Remand), 28 IBLA 277 (Dec. 22, 1976)

When a rubber stamp is used to affix a signature to a drawing entry card an no agent's statement has been submitted, a State Office of the Bureau of Land Management may take appropriate action to establish whether the applicant's signature was imprinted by him or at his request by an amanuensis and that he formulated the offer.

Mary E. Wiland, Elizabeth E. O'Donnell, 28 IBLA 300 (Jan. 10, 1977)

An oil and gas lease offer made pursuant to the Mineral Leasing Act for Acquired Lands is properly rejected where the subject lands are not acquired lands but, rather, are patented with a reservation of mineral rights in the United States.

John C. Clay, 28 IBLA 353 (Jan. 24, 1977)

An unsigned drawing entry card filed in the simultaneous oil and gas leasing procedures must be rejected.

Melvin C. Hudson, 28 IBLA 359 (Feb. 1, 1977)

An oil and gas lease entry card may be validly signed by the offeror's son where the offeror is an elderly woman who at times is incapable of making her own signature and it is her intention that the son's signing of her name be treated as if it were her own signature.

Rebecca J. Waters, 28 IBLA 381 (Feb. 4, 1977)

A successful simultaneously filed oil and gas lease entry card is not to be rejected because the card is signed prior to the date of the beginning of the simultaneous filing period unless it is dated more than 10 days prior to the date it is filed.

Kathryn J. Eckles, Harley L. Williamson, 28 IBLA 390 (Feb. 4, 1977)

An oil and gas lease offer for acquired lands in which the United States owns a fractional mineral interest, filed before Sept. 30, 1976, must have been accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States. An offer which was defective for failure to comply with this mandatory regulation must be rejected where it was filed in the simultaneous drawing procedure.

Duncan Miller, 29 IBLA 1 (Feb. 7, 1977)

Mary Nan Spear, 31 IBLA 386 (Aug. 16, 1977)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

An oil and gas lease offer for acquired lands in which the United States owns a fractional mineral interest must be accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States. When an offeror submits, on appeal, a copy of such statement but the date on the statement differs from the date on the card, and the offeror does not allege he filed the statement simultaneously with the offer, such offer must be rejected for failure to comply with a mandatory regulation.

Duncan Miller, 29 IBLA 43 (Feb. 16, 1977)

Where the Bureau of Land Management has determined that lands listed under the simultaneous oil and gas leasing system should not have been listed solely because the lands lie within "a critical watershed which is to be the subject of an Environmental Impact Statement," the first-drawn offer will not be rejected but may remain in suspended state until completion of the EIS and determination at that time whether the lands may be leased subject to stipulations for protection of the watershed.

Adrian Overton, 29 IBLA 66 (Feb. 18, 1977)

Where an applicant fails to date a simultaneous oil and gas drawing entry card, he has not complied with 43 CFR 3112.2-1(a) which requires that the card be "fully executed," and his lease offer is properly rejected.

Thomas V. Gullo & Joseph L. Bandazzo, 29 IBLA 126 (Feb. 23, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, including leases issued pursuant to the simultaneous filing procedures, even though the lease offers were drawn with first priority prior to the specified date.

Raymond N. Joeckel, 29 IBLA 170 (Mar. 14, 1977)

Milton J. Lebsack, 29 IBLA 316 (Mar. 30, 1977)

Doris N. Sterkel, Richard L. Sterkel, 30 IBLA 39 (Apr. 12, 1977)

X O Exploration, Inc., 30 IBLA 209 (May 20, 1977)

Francis L. Hill, 32 IBLA 202 (Sept. 16, 1977)

Thomas G. Fails et al., 32 IBLA 302 (Sept. 30, 1977)

An oil and gas lease offer filed in the name of a corporation is properly rejected where it is not accompanied by corporate qualification papers nor by any reference to a serial number where such information might be found, as required by 43 CFR 3102.4-1.

Dal Metro Investment Co., 29 IBLA 198 (Mar. 22, 1977)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

Simultaneous oil and gas drawing entry cards must be fully executed by the applicant and when the applicant omits a State prefix in the parcel number, the lease offer is properly rejected.

Where an applicant fails to include the State prefix of the parcel number on an oil and gas drawing entry card, he/she has not complied with 43 CFR 3112.2-1(a) which requires that the card be "fully executed" and such offer is properly rejected whether the defect is discovered before or after the drawing.

Etta C. Harris, 29 IBLA 259 (Mar. 25, 1977)

An oil and gas lease offer is properly rejected where the applicant fails to date the simultaneous oil and gas drawing entry card.

●

The drawing of an offer for a noncompetitive lease creates no vested rights in the offeror, the offeror's tender of advance rental payment notwithstanding.

Cissie A. Reinauer, 29 IBLA 295 (Mar. 30, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, including leases issued pursuant to the simultaneous filing procedures, even though the lease offers were drawn with first priority prior to the effective date of the increase.

Raymond N. Joeckel et al., 30 IBLA 32 (Apr. 11, 1977)

Karen Cotter et al., 30 IBLA 88 (Apr. 27, 1977)

Duncan Miller, 30 IBLA 90 (Apr. 27, 1977)

Fred Goodstein, 32 IBLA 25 (Aug. 31, 1977)

Jerry Chambers, 33 IBLA 323 (Jan. 16, 1978)

An oil and gas lease offer for acquired lands in which the United States owns a fractional mineral interest, filed before Oct. 28, 1976, must have been accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States. An offer which was defective for failure to comply with this mandatory regulation must be rejected where it was filed in the simultaneous drawing procedure.

Vernon C. Howell, 30 IBLA 70 (Apr. 18, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date.

Jary J. Hunnicutt et al., 30 IBLA 86 (Apr. 27, 1977)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

A delay in the adjudication of an application by officers or employees of the Department cannot create rights in Federal property contrary to law.

Guy W. Franson, 30 IBLA 123 (May 12, 1977)

Simultaneous oil and gas drawing entry cards must be fully executed by the applicant and when the applicant omits a State prefix in the parcel number, the lease offer is properly rejected.

John P. Levycky, 30 IBLA 127 (May 12, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, including leases to be issued pursuant to the simultaneous filing procedures where the drawing was held prior to the effective date of the rent increase, and leases to be issued for a regular over-the-counter offer where the offer was filed prior to the effective date.

Casey C. Jansen et al., 30 IBLA 134 (May 12, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, including leases to be issued to successful offerors at simultaneous drawings held prior to the effective date of the rate increase.

Melvin R. Hobgood, 30 IBLA 163 (May 18, 1977)

The signature of the offeror on a simultaneous oil and gas lease offer entry card may be affixed by means of a rubber stamp if it is the intention of the offeror that it be his or her signature.

Use of a rubber-stamped facsimile of an offeror's signature on a simultaneous oil and gas lease entry card invites inquiry into whether the card was stamped by the offeror or, instead, by his agent.

Where a person files an oil and gas lease offer through a leasing service under an arrangement whereby the leasing service advances the first year's rental, selects the land, and controls the address at which the offeror may be reached, but no enforceable agreement is entered into whereby the offeror is obligated to transfer any interest in any lease to be issued to the leasing service, the service is not a party in interest in the offer merely because it may have a hope or expectancy of acquiring an interest, and the offeror is not precluded from stating that he is the sole party in interest in the offer.

D. E. Pack, 30 IBLA 166 (May 19, 1977)   84 I.D. 192

When the Secretary of the Interior has exercised his discretionary authority over the issuance of oil and gas leases to promulgate a Public Land Order closing an area of public lands to oil and gas leasing for the purpose of preserving and developing the potash deposits therein belonging to the United States, it is proper to reject oil and gas lease offers for such withdrawn lands.

AA Minerals Corp., 30 IBLA 259 (May 31, 1977)

Simultaneous oil and gas drawing entry cards must be fully executed by the applicant and when the applicant omits a State prefix in the parcel number, the lease offer is properly rejected.

Where an applicant fails to include the State prefix of the parcel number on an oil and gas drawing entry card, he/she has not complied with 43 CFR 3112.2-1(a) which requires that the card be "fully executed" and such offer is properly rejected whether the defect is discovered before or after the drawing.

Improper issuance of a noncompetitive oil and gas lease in response to a defective drawing entry card in the simultaneous filing procedure does not foreclose the right of the second drawn applicant whose drawing entry card was complete when filed to a lease for the parcel named; the erroneously issued lease must be canceled, and upon cancellation, the second drawee must be awarded a lease to the parcel, all else being regular.

Gerald I. Christensen, Edward C. Green, 30 IBLA 283 (June 6, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, including leases issued pursuant to the simultaneous filing procedures, even though the lease offers were drawn prior to the effective date of the increase.

Marie A. Piel et al., 30 IBLA 308 (June 6, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, even though the lease offers were filed prior to the specified date.

Guy R. Willis, 30 IBLA 344 (June 8, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, the increased rate applies to all leases issued after that date, regardless of the date on which the offer to lease was originally submitted.

Wanda C. and William E. Scheidt, et al., 30 IBLA 346 (June 8, 1977)

William S. Schicktanz, 32 IBLA 20 (Aug. 31, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate applies to all leases issued after that date, regardless of the date the offer to lease or drawing entry card was filed.

Duncan Miller, 30 IBLA 350 (June 8, 1977)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, even though the lease offer was filed prior to the date of the regulation. The imposition of the increased rate is not discriminatory as it applies to all leases issued after a certain date.

Guy M. Willis, 30 IBLA 373 (June 10, 1977)

The filing of a noncompetitive oil and gas lease offer, prior to acceptance, does not create any right to a lease or legal interest which restricts the discretionary authority of the Secretary of the Interior over lease issuance. Thus, an amended regulation raising the lease rental charge may be applied to lease offers which have been previously filed but not accepted and such action is not violative of the Fifth Amendment.

Barbara A. Joeckel, 30 IBLA 376 (June 10, 1977)

Where an oil and gas lease offer is signed by an agent on behalf of the offeror, the regulations with respect to qualifications of lessees require evidence of the authority of the agent and separate statements by the offeror and the agent regarding the nature and extent of any interest the agent has in the lease. The same requirement applies where the offeror's facsimile signature is affixed on the offer by an agent. An offer must be rejected where this information is not filed.

The Bureau of Land Management (BLM) has a responsibility to issue noncompetitive oil and gas leases only to the first-qualified offeror. A rubber-stamped or other form of facsimile signature, unlike a handwritten signature, does not give rise to a presumption that it was personally executed by the offeror. The BLM may inquire of the circumstances under which the signature was stamped on the offer to determine whether compliance with 43 CFR 3102.6-1 was required.

Charlotte L. Thornton, William M. Weaver, Jr., Robert L. Smith, 31 IBLA 3 (June 15, 1977)

An oil and gas lease offer must be rejected as to lands applied for which are held in trust for Indians and are not available under the Mineral Leasing Act. Even though the minerals in these lands have been reserved to the United States, mineral development is not possible at this time because the language of the exchange act under which the lands were acquired requires further promulgation of special regulations by the Secretary as a condition precedent to such development.

Thomas D. Chace, 31 IBLA 13 (June 17, 1977)

Where the regulation, 43 CFR 3130.4-4 (1975), in effect at the time of filing, required that an oil and gas lease offer for land in which the United States owns a fractional mineral interest must be accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States, a simultaneously filed lease offer which is not accompanied by the required statement must be rejected, and the defect may not be "cured" by submission of the statement at a later time.

David F. Owen, 31 IBLA 24 (June 20, 1977)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

The showings required by 43 CFR 3102.4-1 to qualify a corporation to receive an oil and gas lease are mandatory. An oil and gas lease offer by a corporation is properly rejected when it is signed by an officer who is neither authorized to act on behalf of the corporation by the corporate qualification statement on file with the Bureau of Land Management nor authorized to act by a statement accompanying the offer.

As a general rule, an applicant is not entitled to rely upon misinformation or erroneous advice given by departmental employees to acquire any rights in public lands not authorized by law. A corporation filing an oil and gas lease offer, signed by an officer not designated in accordance with 43 CFR 3102.4-1 as authorized to act on its behalf, cannot rely on the fact that the officer's signature was accepted by the Department on documents filed in unrelated matters to excuse its failure to provide the mandatory authorization.

An over-the-counter oil and gas lease offer, properly rejected because it failed to meet the requirements of the regulations, may be considered as having priority as of the date the defect is cured where the curative action was taken during an appeal from the rejection of the offer.

Emerald Oil Co., 31 IBLA 119 (June 24, 1977)

Reproduction of the franked postal drawing entry card is not authorized and offers filed on copies of such form must be rejected. An offer will not be rejected for this reason when an examination of several cards submitted by the same offerors fails to establish that the cards were reproductions.

The signature of the offeror on a simultaneous oil and gas lease offer entry card may be affixed by means of a rubber stamp if it is the intention of the offeror that it be his or her signature.

A BLM office need not presume that an applicant rather than an agent stamped a facsimile signature on a drawing entry card, and where no agent's statement has been submitted as required by 43 CFR 3102.6-1, a Bureau office may inquire as to whether the applicant's signature was imprinted at his request and whether he formulated the offer.

Ray H. Thames, 31 IBLA 167 (July 5, 1977)

A first-drawn simultaneous drawing entry card which is filed by a partnership but which is not accompanied by statements required by the pertinent regulation or which does not refer to the file serial number of the record where the statements have previously been filed is defective and must be rejected.

Norcross Partners, 31 IBLA 181 (July 5, 1977)

Persons filing a joint oil and gas lease offer may properly use the address of a leasing service on their entry card.

Since the question of whether offerors for oil and gas leases have addresses other than that indicated on their entry card is irrelevant to the validity of their offer where the address of a leasing service is used on the entry card, the BLM need not attempt to discover whether offerors in fact have addresses other than that shown on their entry card.

Where the use of a facsimile signature on an oil and gas lease offer, considered in conjunction with other circumstances, raises questions concerning offeror's

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

compliance with 43 CFR 3102.6-1(a)(2), it is appropriate to remand the case to the proper BLM office for resolution.

Nadine M. Sanford, 31 IBLA 184 (July 5, 1977)

Lands within a known geologic structure of a producing oil or gas field may be leased only by competitive bidding pursuant to 43 CFR 3120, and a noncompetitive oil and gas lease offer filed for such lands is properly rejected where either before or after the filing of the offer, but prior to the issuance of the lease, the land is determined to be within the known geologic structure of a producing oil or gas field.

Curtis Wheeler, 31 IBLA 221 (July 7, 1977)

Where the United States owns only fractional mineral interest in the land, an offer filed before Sept. 30, 1976, for a simultaneous oil and gas lease drawing, must be rejected where it is not accompanied by a statement showing extent of offeror's ownership of operating rights in fractional mineral interest not owned by the United States.

Bruce T. Cameron, Carol Heller, 31 IBLA 234 (July 12, 1977)

Where a protest has been made against the validity of a drawing entry card (DEC) in the simultaneous oil and gas lease filing procedure, it is improper to issue a lease in response to the protested DEC before the protest is finally dismissed. The Board of Land Appeals, rather than a BLM State Office, has the authority to make final administrative determinations for the Department in matters relating to protests against oil and gas lease offers.

D. E. Pack, 31 IBLA 283 (July 22, 1977)

Land included within an outstanding oil and gas lease is not available for leasing and an oil and gas offer filed for such land must be rejected.

Lands within a known geological structure of a producing oil or gas field may only be leased by competitive bidding pursuant to 43 CFR 3120, and a noncompetitive oil and gas lease offer filed for such lands is properly rejected.

Curtis D. Wheeler, 31 IBLA 354 (July 25, 1977)

An oil and gas lease offer is properly rejected where the offer is deficient in the first year's rental by more than 10 percent.

Duncan Miller, 31 IBLA 371 (Aug. 4, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, including leases issued pursuant to over-the-counter filing procedures, even though the lease offers were submitted prior to the effective date of the increase.

Brad J. Hays, 31 IBLA 374 (Aug. 5, 1977)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

Cecil C. Wall, 32 IBLA 27 (Aug. 31, 1977)

Where an inquiry by the BLM discloses that oil and gas lease applicants imprinted their own facsimile signatures on their drawing entry cards, there can be no question of the application of 43 CFR 3102.6-1(a)(2) since this regulation operates where an agent or attorney in fact affixes the applicant's signature on the applicant's behalf.

A simultaneously filed oil and gas lease entry card is not to be rejected for the reason that the applicant signed the card and the parcel number was entered thereon subsequently by the applicant's employee, since the applicant, in signing the card, certifies as to all the requirements stated as of the date entered thereon, and agrees to be bound to a lease if the offer is successful.

Evelyn Chambers and Jerry Chambers, 31 IBLA 381 (Aug. 10, 1977)

When an individual files an oil and gas lease offer through a leasing service under an agreement where the leasing service is authorized to act as the sole and exclusive agent to negotiate for sublease, assignment or sale of any rights obtained by the offeror; where the offeror is required to pay the leasing service according to a set schedule, even if the offeror negotiates the sale; and where such agency to negotiate is to be valid for 5 years, the leasing service has an enforceable right to share in the proceeds of any sale of the lease or any interest therein. Such an agreement creates for the leasing service an interest in the lease as that term is defined in 43 CFR 3100.0-5(b).

When a leasing service holds an interest in a lease at the time it files an offer on behalf of an offeror, the offeror is not the sole party in interest and he is required by regulation, 43 CFR 3102.7, to provide the names of other interested parties, the nature and extent of their interest and the nature of the agreement between them not later than 15 days after the filing of the offer. Failure to file the required statements results in rejection of the offer.

Lola I. Doe, 31 IBLA 394 (Aug. 19, 1977)

Sidney H. Schreter, William E. Wood, Jr., 32 IBLA 148 (Sept. 12, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, including leases to be issued for a regular over-the-counter offer where the offer was filed prior to the effective date.

Altex Oil Corp., 32 IBLA 18 (Aug. 31, 1977)

Altex Oil Co., 32 IBLA 44 (Sept. 2, 1977)

Altex Oil Corp., 32 IBLA 390 (Nov. 7, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

issued subsequent to that date pursuant to over-the-counter offers or pursuant to the simultaneous filing procedures, even though the offers or entry cards were filed with BLM prior to the specified date.

An oil and gas lease offer under the Mineral Leasing Act, *as amended*, 30 U.S.C. § 181 *et seq.* (1970), does not create a property right in the offeror but is merely a hope or expectation. It is not a "vested right," a present legal or equitable "title," "interest" or "ownership" or "perfected right," to come within the protection of the Fifth or Fourteenth Amendment.

Bureau of Land Management Instruction Memorandum No. 77-37 outlined a general policy for the assessment of additional rental on oil and gas lease offers pending when the rental rate was increased by regulation, but left to the discretion of the State Offices the particular implementing procedures. Procedures used by a State Office which may be different from other State Offices, but which do not prejudice the offerors' right to receive oil and gas leases if leases are issued on the lands applied for, are not arbitrary and capricious as to require reversal of the decisions assessing additional rental.

D. R. Gaither et al., 32 IBLA 106 (Sept. 12, 1977)

Where the regulation, 43 CFR 3130.4-4 (1975), in effect at the time of filing, required that an oil and gas lease offer for acquired land in which the United States owns a fractional mineral interest must be accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States, a simultaneously filed oil and gas lease offer which is not accompanied by the required statement must be rejected.

Where a regulation requires that an acquired lands oil and gas lease offer be accompanied by a separate statement as to the offeror's ownership of operating rights to the fractional mineral interest not owned by the United States, and the offer is rejected for noncompliance therewith, the offeror's bald assertion that he filed such statement is insufficient to prove such a fact without corroboration. A presumption of regularity supports the official acts of public officers and, absent clear evidence to the contrary, it will be presumed that they have properly discharged their official duties.

W. J. Langley, 32 IBLA 118 (Sept. 12, 1977)

Where an applicant fails to file five copies of a noncompetitive lease offer as required by the regulations in 43 CFR 3111.1-1(a) the lease offer is properly rejected. Failure to submit the required number of copies is not included in the list of curable defects in 43 CFR 3111.1-1(e) and, therefore, is fatal to the oil and gas offer.

John P. Errebo, Jr., 32 IBLA 191 (Sept. 15, 1977)

Where a drawing entry card sets out the names of two applicants but one applicant fails to sign the card, the card is not in compliance with 43 CFR 3112.2-1(a) which requires that the card be "fully executed," and the lease offer is properly rejected.

Fernando C. Santos, 32 IBLA 194 (Sept. 15, 1977)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

The filing of an application for a noncompetitive oil and gas lease, prior to acceptance, does not create a right to a lease immune from application of a subsequently amended administrative regulation. An increased rental rate is properly applied to an oil and gas lease offer pending before the effective date of the rate change but which has not been accepted prior to that time.

Viola J. Kirkwood, 32 IBLA 199 (Sept. 16, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, even though the lease offers were filed prior to the specified date. The filing of an application for a lease prior to its acceptance does not create a right to a lease which is immune from application of a subsequently amended administrative regulation, nor does administrative delay in the processing of the lease offer preclude proper application of such regulation.

Paul C. Kohlman, 32 IBLA 240 (Sept. 21, 1977)

A simultaneous oil and gas lease offer is properly rejected if it is unsigned or undated.

When a first-drawn oil and gas lease offer is disqualified because it is unsigned or undated, the Department's equitable adjudication authority may not be invoked to divest the first-*qualified* drawee of his preference right to a lease.

David L. Hansen, John B. Hurdle, John F. and Inez B. Cramer, 32 IBLA 272 (Sept. 27, 1977)

Increased per acre rental, as directed under Jan. 5, 1977, revision of 43 CFR 3103.3-2(a), is applicable to all noncompetitive oil and gas leases issued after Feb. 1, 1977, including leases for which offers, both simultaneous and over-the-counter, were filed prior to revision of the regulation.

Duncan Miller et al., 32 IBLA 269 (Sept. 27, 1977)

Where a check has been submitted with a drawing entry card in payment of the $10 filing fee for a simultaneous oil and gas lease offer, and the check is dishonored by the bank, the offeror loses his priority unless the refusal to honor the check was the result of a bank error, corroborated by the bank.

John Eldon Dean, 32 IBLA 336 (Oct. 16, 1977)

Jonathan T. Ames, 33 IBLA 1 (Nov. 14, 1977)

Where an oil and gas lease offer filed on a drawing entry card in a simultaneous filing procedure contains the name of an additional party and the statements of interest, copy or explanation of the agreement between the parties, and evidence of the qualifications of the additional party are not filed within the time required by 43 CFR 3102.7, the offer must be rejected.

Verner E. Sorenson, 32 IBLA 341 (Oct. 21, 1977)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, including leases issued pursuant to the simultaneous filing procedures, even though the lease offers were drawn with first priority prior to the effective date of the increase.

Where the Bureau of Land Management issued a decision notifying a successful lease offeror of the increased advanced rental rate from $.50 to $1 per acre as per the regulation change in 43 CFR 3103.3-2, effective Feb. 1, 1977, and no right of appeal was granted from that decision, the offeror was not bound to appeal from that decision in order to preserve his priority status. When the offeror took an appeal from a subsequent decision rejecting the offer, that appeal suspended the effect of both BLM decisions pending the result of the appeal before this Board and upon our affirmation, appellant now will be given 15 days to comply with the original requirements before his offer is rejected.

Paul Landis, 32 IBLA 374 (Oct. 31, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to an over-the-counter offer filed prior to the specified date.

Dean W. Rowell, 33 IBLA 30 (Nov. 22, 1977)

Where the Bureau of Land Management issued a decision notifying a successful drawee in the simultaneous oil and gas filing program of the increased advance rental rate from 50 cents to $1 per acre pursuant to a regulation change effective Feb. 1, 1977, 43 CFR 3103.3-2, and no right of appeal was granted from that decision, the offeror was not bound to appeal from that decision in order to preserve his priority status. When the offeror took an appeal from a subsequent decision rejecting the offer, that appeal suspended the effect of both BLM decisions pending the result of the appeal before this Board. Payment of the required increased rental during the appeal period is deemed timely and a lease may issue.

George Gabriel, 33 IBLA 44 (Nov. 25, 1977)

Where an applicant incorrectly uses the wrong abbreviation for the State prefix of the parcel number on an oil and gas drawing entry card, she has not complied with 43 CFR 3112.2-1(a) which requires that the card be "fully executed" and her offer is properly rejected.

Marcia P. Lane, 33 IBLA 68 (Dec. 5, 1977)

The Secretary of the Interior may in his discretion reject any offer to lease public lands for oil and gas upon a proper determination that leasing would not be in the public interest, even though the land applied for is not withdrawn from leasing under the Mineral Leasing Act. Where part of the lands applied for are in the Bonneville Salt Flats, and the Bureau of Land Management determines that oil and gas leasing activities are not compatible with the primary management

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

objective to prevent irreparable damage to a significant resource, rejection of the lease offers or the requirement of execution of surface occupancy stipulations will be affirmed.

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, the increased rate applies to all leases issued after that date, regardless of the date on which the offer to lease was originally submitted.

Vern R. Jones et al., Andrew E. Bartley, 33 IBLA 74 (Dec. 6, 1977)

An unsigned and undated drawing entry card filed in the simultaneous oil and gas leasing procedures must be rejected, despite assertions of excusable neglect or inadvertence.

Edna M. McCree and Harry R. McCree, 33 IBLA 235 (Dec. 28, 1977)

An oil and gas lease offer is properly rejected where the offeror's check to cover the filing fee is dishonored by the bank because of insufficient funds in the account on which the check is drawn.

Charles E. Ricci, 33 IBLA 288 (Jan. 5, 1978)

Land included within a known geologic structure of a producing oil or gas field may be leased only by competitive bidding.

Amerada Hess Corp., 33 IBLA 293 (Jan. 10, 1978)

A noncompetitive oil and gas lease offer is properly rejected where the land which is the subject of such offer has not been posted as available as prescribed by 43 CFR subpart 3112.

A junior oil and gas lease offer is properly rejected when the senior offer subsequently is accepted and the lease is properly issued.

A timely appeal from rejection of an oil and gas lease offer because of a determination of known geologic structure suspends the rejection pending decision by this Board, and where the Geological Survey rescinds the KGS determination as having been erroneously made during the pendency of the appeal, the status quo ante of land involved is restored.

Where land was omitted from an oil and gas lease only because of an erroneous KGS determination, and the applicant has preserved his priority by timely appealing the rejection, it is proper to amend such lease to include such omitted land when the Geological Survey rescinds its erroneous KGS determination.

David A. Provinse, 33 IBLA 312 (Jan. 13, 1978)

A simultaneously filed oil and gas lease offer is properly rejected where the offer is neither accompanied by a statement of corporate qualifications nor makes reference to a serial number of a record in which such statement had previously been filed, as required by 43 CFR 3102.4-1.

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

A simultaneous oil and gas lease offer is properly rejected when the date is omitted from the drawing card.

A simultaneous oil and gas lease offer is properly rejected where the drawing card is not signed. Where a corporation submits a drawing card which is not signed by a corporate officer whose authority to sign is established by the procedure set out in 43 CFR 3102.4-1, the card is not "signed" within the meaning of 43 CFR 3112.2-1(a), and its offer must accordingly be rejected. Placing the corporation's name in script on the signature line does not constitute "signing" the card.

Anchors and Holes, Inc., 33 IBLA 339 (Jan. 16, 1978)

Where a drawing entry card submitted in a simultaneous oil and gas lease filing has been signed by the applicant, its completion by a duly authorized agent, all else being regular, does not call into play other requirements of pertinent regulations.

Virginia A. Raposo, 33 IBLA 344 (Jan. 18, 1978)

Patricia P. Marks, 34 IBLA 384 (May 2, 1978)

Where an inquiry by BLM discloses that an oil and gas lease applicant personally signed his name on his drawing entry card, there can be no question of the application of 43 CFR 3102.6-1(a), since this regulation operates only where an agent or attorney in fact signs the card on his principal's behalf.

An oil and gas drawing entry card may not be rejected merely because it is signed by the applicant before the parcel number is entered on it by another.

Adam F. Zbilski, 34 IBLA 4 (Feb. 8, 1978)

Regulation 43 CFR 3108.2-1(c)(3), which provides that a new lease for lands covered by a lease terminated automatically for nonpayment of rental shall not be issued until 90 days from the date of termination does not preclude posting such lands to Notice of Lands Available to Oil and Gas Leasing, 43 CFR 3112.1-2, during the 90-day period.

Jack L. McClellan, Marton Majoros, 34 IBLA 53 (Feb. 16, 1978)

Where a drawing entry card submitted in a simultaneous oil and gas lease filing has been signed by the applicant, its completion by a duly authorized agent, including insertion of a current date, all else being regular, does not call into play other requirements of pertinent regulations.

Kenneth Ross, 34 IBLA 61 (Feb. 16, 1978)

Oil and gas lease offers may be rejected where legal title to the lands in issue is uncertain. It is not improper for BLM to refuse to suspend the offers pending determination of the title issue.

N L Industries, Inc., 34 IBLA 99 (Feb. 23, 1978)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

A simultaneous oil and gas lease drawing entry card containing an incorrect parcel number is properly rejected and the filing fee is properly retained by the Bureau of Land Management.

Henry A. Alker, 34 IBLA 136 (Mar. 8, 1978)

A requirement to submit a "certified copy" of a private agreement is satisfied by the submission of a copy of the agreement with a statement that it is a copy of that agreement.

Where a successful drawee in a simultaneous oil and gas lease drawing, who is directed by a State Office to submit a copy of any agreement he may have with another person, submits a copy of an agreement which incorporates, by reference, a brochure issued by the leasing service with which he had an agreement, but not a copy of the brochure, he has not complied with the directive and his offer is properly rejected.

Ricky L. Gifford, 34 IBLA 160 (Mar. 10, 1978)

Where it is shown that a bank erroneously dishonored a check drawn thereon, and an official of the bank admits that the payment was refused by mistake, the error of the bank will not vitiate the otherwise proper payment of the filing fee.

Charles F. Ricci (On Reconsideration), 34 IBLA 166 (Mar. 21, 1978)

An offeror's use of a leasing service's address on a simultaneous noncompetitive oil and gas lease offer drawing entry card does not disqualify the offer.

An offeror who submits a drawing entry card signed on his behalf by his agent leasing service meets the requirements of 43 CFR 3102.6-1 if satisfactory agency statements by him and his agent are submitted along with his offer card.

Where an offeror and his agent filing service submit statements along with a drawing entry card, which statements indicate unequivocally that there is no agreement between them creating an interest in the agent, thus apparently obviating the need to submit details of the offeror/agent agreement per 43 CFR 3102.6-1, BLM, in its discretion, may either decline to inquire further into the details of the agreement or may request and examine a copy of the agreement to determine whether such an "interest" in the agent existed at the time the offer was filed.

Where there is no evidence in the administrative record that the offeror with first priority in a drawing of simultaneous noncompetitive oil and gas lease offers is not the sole party in interest, as stated by both the offeror and his agent, the burden is on a protestant attacking the validity of the offer to prove an accusation that the offeror/agent agreement gives the agent an enforceable interest in the lease to be issued.

"Interest." Where there is an agreement giving an offeror the option of selling part of an oil and gas lease to his agent leasing service, exercisable solely at the offeror's discretion, the agent has a mere hope or expectancy and *not* an "interest" in the offer, as defined in 43 CFR 3100.0-5(b).

Virginia L. Jones, 34 IBLA 168 (Mar. 21, 1978)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

When an individual files an oil and gas lease offer through a leasing service under an agreement where the leasing service is authorized to act as the sole and exclusive agent to negotiate for sublease, assignment or sale of any rights obtained by the offeror; where the offeror is required to pay the leasing service according to a set schedule, even if the offeror negotiates the sale; and where such agency to negotiate is to be valid for 5 years, the leasing service has an enforceable right to share in the proceeds of any sale of the lease or any interest therein. Such an agreement creates for the leasing service an interest in the lease as that term is defined in 43 CFR 3100.0-5(b).

Where an individual files an oil and gas lease offer through a leasing service under an agreement with the service which has been determined by this Department to create an interest in the lease for the service, and the service files a waiver of that interest with the BLM prior to a simultaneous drawing, without communicating such waiver to the client, and without any contractual consideration running from the client to the leasing service, the waiver is without effect as a matter of law and the successful drawee is required to make a showing as to sole party in interest under 43 CFR 3102.7.

Alfred L. Easterday, 34 IBLA 195 (Mar. 22, 1978)

Strict compliance with 43 CFR 3112.2-1, which provides that simultaneous oil and gas drawing entry cards be signed and fully executed by an applicant or his agent, is required. Where no date of signing appears on an entry card, the offer is properly rejected.

Jack L. Macdowell, 34 IBLA 202 (Mar. 22, 1978)

John G. Keane, 37 IBLA 364 (Nov. 2, 1978)

Where an officer of a business enterprise files oil and gas lease drawing entry cards for a parcel on behalf of both his company and himself, the business gains a greater probability of success than other entrants, owing to the officer's fiduciary duty to hold the lease for the company's exclusive use and benefit, thereby warranting rejection of the lease offers of both the company and the officer per 43 CFR 3112.5-2.

William H. Boehm, 34 IBLA 216 (Mar. 27, 1978)

A regulation, amended in a manner that benefits a pending application for an oil and gas lease, may be applied to the pending application in the absence of intervening rights or public interest.

Repeal of regulations which prohibit leasing fractional interests to one who would own only a minority of operating rights in the leased property gives priority to an otherwise regular offer which would have had to be rejected under the former regulations, as of the effective date of the repeal, provided that no offers qualified under the former regulation have been received prior to repeal, and that the offer has not been rejected prior to repeal.

Wilfred Plomis, 34 IBLA 222 (Mar. 27, 1978)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

An entry card in a simultaneous oil and gas lease drawing need not be rejected where the card sets out in the parcel designation the complete name of the State in which the parcel is located instead of the abbreviation of the State name used as the State code prefix. All else being regular, such an entry card is fully executed.

Clayton Chessman, 34 IBLA 263 (Mar. 31, 1978)

Douglas Steele, 34 IBLA 344 (Apr. 26, 1978)

J. C. Davis, 35 IBLA 92 (May 12, 1978)

Regulations should be so clear that there is no basis for an oil and gas applicant's noncompliance with them, or they should not be interpreted to deprive him of a preference right to a lease.

Bill J. Maddox, 34 IBLA 278 (Apr. 17, 1978)

A simultaneous oil and gas drawing entry card must be fully executed by the applicant, and when the State prefix to the parcel number is omitted, the lease offer is properly rejected.

Richard Wheeler, Jr., 34 IBLA 359 (May 1, 1978)

A successful drawee in a simultaneous oil and gas lease drawing will not be disqualified to receive a lease by reason of allegations to the effect that the winning drawing entry card was filed for such drawee by an agent and that the agent has failed to observe the registration requirements of the Securities Act of 1933.

John H. McGann, 35 IBLA 32 (May 8, 1978)

Offeror's failure to enter postal zip code of his address on entry card for simultaneous oil and gas lease drawing properly results in BLM's rejecting his offer. Such omission contradicts requirement in 43 CFR 3112.2-1(a) that entry card be "fully executed."

William E. DuKate, 35 IBLA 51 (May 9, 1978)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, the increased rate is applicable to leases to be issued subsequent to that date for over-the-counter offers filed prior to the effective date of the regulation.

Tipperary Oil and Gas Corp., 35 IBLA 120 (May 15, 1978)

Where a successful drawee in a simultaneous oil and gas lease drawing, who is directed by a State Office to submit a copy of any agreement he may have with another person in regard to such drawing, submits a copy of an agreement which incorporates by reference a brochure issued by the leasing service with which he had an agreement, but not a copy of the brochure, he has not complied with the directive.

Neil Hirsch, Robertus C. Roos, 35 IBLA 125 (May 22, 1978)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

It is arbitrary and capricious for a BLM State Office to reject a drawing entry card, drawn with first priority, for the reason of trivial corrections on the card by means of a "white out" liquid which does not affect the appearance or feel of the card in any significant way and which corrections obviously were not intended to adversely affect the integrity of the drawing.

James L. Harden, 35 IBLA 128 (May 22, 1978)

An oil and gas offer describing land which cannot be encompassed within a 6-mile square is defective and must be rejected, and where a lease is issued for part of the land embraced in the offer it must be canceled as to that land which is embraced in a proper offer filed prior to the issuance of the lease in order that the statutory preference right of the party first making a proper offer may be honored.

Robert W. David, 35 IBLA 205 (May 26, 1978)

It is proper for the Bureau of Land Management to reject an over-the-counter offer for an oil and gas lease of land formerly included in a lease erroneously canceled, because under 43 CFR 3112.1-1 land in canceled leases is subject to the filing of new noncompetitive lease offers only in accordance with simultaneous filing procedures.

A past incorrect application of the law in adjudication of oil and gas lease offers is no authorization for failure to follow regulations in the case of an offer currently under adjudication.

David A. Provinse, 35 IBLA 217 (May 26, 1978)

When, in a drawing of simultaneously filed oil and gas lease offers, the first-drawn offeror is notified to submit the advance rental, that rental must be received by the proper office within the prescribed 15 days. Automatic disqualification may not be avoided by allegations that delivery was delayed by the postal service, as the rule is that the postal authorities are the agents of the sender in such cases.

Where BLM records show that the first-drawn applicant for an oil and gas lease paid his rental 1 day late, and is therefore disqualified, there is a legal presumption of regularity which supports the official acts of public officers and the proper discharge of their official duties.

Where a first-drawn oil and gas applicant offers evidence to show that his first year's advance rental was mailed sufficiently in advance so that, even if delayed, it would have arrived within the prescribed time, a legal presumption is raised that the payment was timely delivered.

The filing or drawing of an oil and gas lease offer, even though it has first priority, creates no vested rights in the offeror which are constitutionally protected, and where such offer is rejected for any legally cognizable reason, it does not work a forefeiture of the offeror's interest, which amounts only to a hope or an expectation rather than a claim.

Donald E. Jordan, 35 IBLA 290 (June 2, 1978)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

Where BLM issues a decision requiring that an oil and gas offeror submit additional advance rental within 30 days, and the offeror files a timely appeal to this Board, the running of the 30 days is suspended. Following affirmation by this Board of BLM's decision, the offeror is properly given the entire 30 days within which to submit the additional rental.

An oil and gas offer which is accompanied by advance rental of $0.50 per acre may not be rejected as not including sufficient advance rental, per 43 CFR 3103.3-2, 3111.1-1(d) and (e)(1), if the regulation raising the rental to $1 is not in effect when the offer was filed.

Mobil Oil Corp., 35 IBLA 375 (June 23, 1978)
85 I.D. 225

An offeror's use of a leasing service's address on a simultaneous noncompetitive oil and gas lease offer drawing entry card does not disqualify the offer.

Where there is no evidence in the administrative record that the offeror with first priority in a drawing of simultaneous noncompetitive oil and gas lease offers is not the sole party in interest, the burden is on a protestant attacking the validity of the offer to prove an accusation that there is an agreement giving the filing service an enforceable interest in the lease to be issued.

Clyde E. Frazier, 36 IBLA 141 (July 25, 1978)

An offeror's use of a leasing service's address on a simultaneous noncompetitive oil and gas lease offer drawing entry card does not disqualify the offer.

A successful drawee in a simultaneous oil and gas lease drawing will not be disqualified to receive a lease by reason of unsubstantiated allegations to the effect that the winning drawing entry card was filed for such drawee by an agent and that the agent has failed to observe the registration requirements of the Securities Act of 1933.

Bruce E. Watkins, 36 IBLA 168 (July 31, 1978)

Where the official record of an oil and gas lease offer contains no indication either of when BLM received payment of first-year rental on the lease or of when BLM believes it received this payment, and where the only indication of when the payment was made is a photocopy, submitted on appeal, of a portion of an unidentified, undated receipt which does not bear either the offeror's name or the serial number of his offer or the control number of the document, and which is not included in the official record, BLM's decision rejecting the offer under 43 CFR 3112.4-1 for failure to make this payment within 15 days of the offeror's receipt of notice that the rental was due will be reversed.

Willis L. Lawton, 36 IBLA 178 (July 31, 1978)

Unsigned and undated drawing entry cards filed in the simultaneous oil and gas leasing drawings must be rejected. An oil and gas lease offer is not accepted by the United States until a lease is executed and signed by the appropriate officer.

S. Duff Kerr, 36 IBLA 199 (Aug. 3, 1978)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

It is proper to reject a drawing entry card lease offer, given first priority at a drawing, where the name of the offeror is affixed to the card by means of an address label, instead of being inserted in the appropriate spaces of the card in this order: last name, first name, middle initial.

Irving B. Brick, 36 IBLA 235 (Aug. 8, 1978)

A simultaneous oil and gas drawing entry card must be fully executed by an applicant, and where the applicant omits from her address, the State and zip code, the lease offer is properly rejected.

Rita D. Vick, 36 IBLA 275 (Aug. 21, 1978)

A simultaneous oil and gas drawing entry card must be fully executed by the applicants and when they omit their address, the lease offer is properly rejected notwithstanding assertions of excusable neglect or inadvertence.

Burton A. Rykken et al., 36 IBLA 277 (Aug. 21, 1978)

A noncompetitive oil and gas lease offer is properly rejected where the land which is the subject of such offer is in an expired or terminated lease and has not been posted as available as prescribed by 43 CFR Subpart 3112.

Robert P. Marshall, 36 IBLA 279 (Aug. 21, 1978)

Unsigned and undated drawing entry cards filed in the simultaneous oil and gas leasing drawings must be rejected. The calling out of the No. 1 drawee's name does not constitute acceptance of the offer. Acceptance of the offer cannot accrue until the lease itself has been executed by the appropriate official of the Government.

S. Duff Kerr, 36 IBLA 302 (Aug. 21, 1978)

Darrell J. Sekin, 40 IBLA 156 (Mar. 30, 1979)

Where a high bid was timely filed prior to the deadline for bids, but was subsequently midlaid by BLM and was not relocated until after another lower bid was declared high, BLM properly accepted the true high bid and retracted its declaration regarding the lower bid.

Jack M. Chodar, 36 IBLA 324 (Aug. 23, 1978)

A simultaneously filed oil and gas lease offer is properly rejected where the offer is neither accompanied by a statement of qualifications nor makes reference to a serial number of a record in which such statement has previously been filed, as required by 43 CFR 3102.4-1.

WZL Investment Corp., 36 IBLA 355 (Aug. 31, 1978)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

A noncompetitive oil and gas lease offer is properly rejected where the land which is the subject of such offer is in an expired or terminated lease and has not been posted as available, as prescribed by 43 CFR Subpart 3112.

An oil and gas lease offer for acquired lands will be rejected unless all the copies of the application required by the regulation, 43 CFR 3111.1-2, are filed.

Where an oil and gas lease offer for acquired lands is filed for less than the entire tract acquired by the United States, the regulations in 43 CFR 3102.2-3(b)(1) require that the application must describe the land by courses and distances between successive angle points on its boundary tying by course and distance into the description in the deed or other document by which the United States acquired title to the land.

Robert M. Enfield, 36 IBLA 383 (Aug. 31, 1978)

Where land was previously included in an oil and gas lease and thereafter listed for the simultaneous filing of offers pursuant to 43 CFR 3112, and two offers were filed, both of which were rejected, the land is not thereafter open to the filing of over-the-counter offers to lease, but must again be posted for simultaneous filing.

L. A. Walstrom, Jr., 36 IBLA 397 (Sept. 5, 1978)

Appellant's charges in respect of filing of registration statements for compliance with securities laws go to question of relationships between filing service companies and their investors, and as such, are properly for consideration by Securities and Exchange Commission. Where they do not indicate noncompliance with oil and gas leasing statutes, regulations, and decisions of this Department, such charges are not proper for consideration by the Department of the Interior, which has not been delegated responsibility for enforcement of securities laws.

Dexter E. Spalding, 37 IBLA 4 (Sept. 6, 1978)

It is incorrect for BLM to reject an oil and gas lease offer in the simultaneous filing program for failure of the applicant to submit a copy of her agreement with a filing service where there is no evidence that such a written agreement exists. Where a DEC submitted in the simultaneous oil and gas leasing program has been signed by the applicant, and all else is regular, no other requirement of the regulations are called into play.

Bebe Lee Durden, 37 IBLA 15 (Sept. 8, 1978)

The simultaneous drawing system presupposes that each properly filed offer be afforded the same opportunity for priority consideration. This requires that when drawing entry cards are improperly omitted from a drawing, the first drawing be considered as void, and priorities established at a second drawing, in which all entry cards are included, shall control consideration for the oil and gas lease.

Milton D. Feinberg, Benson J. Lamp, 37 IBLA 39 (Sept. 18, 1978)
85 I.D. 380

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

An oil and gas lease offer filed in the name of a corporation is properly rejected where it is not accompanied by corporate qualification papers nor by any reference to a serial number where such information is to be found, as required by 43 CFR 3102.4-1.

Where a simultaneous drawing entry card culminates in lease issuance and it is subsequently ascertained that the serial number represented by the offeror to contain the corporate qualification papers, relates to "Christiansen Oil and Gas, Inc.," rather than to the offeror-lessee, Christiansen Oil, Inc., the lease is properly canceled, since the offeror was not the first-qualified offeror.

Christiansen Oil, Inc., 37 IBLA 52 (Sept. 18, 1978)

A first-drawn simultaneous oil and gas lease offer filed by an association which is not accompanied by evidence of the qualifications of the association to hold an oil and gas lease or which does not refer to the case record in which the evidence had previously been filed, as required by 43 CFR 3102.3-1(a), must be rejected.

A first-drawn simultaneous oil and gas lease offer filed by a partnership which is signed by one agent where the partnership agreement authorizes two or more agents, jointly, to file simultaneous oil and gas lease offers, is not signed by an "authorized" agent, as required by 43 CFR 3112.2-1(a), and must be rejected. A grant of authority to "A and B," without more, will be deemed to create a joint agency.

SID Partnership, 37 IBLA 165 (Oct. 10, 1978)

An offeror's use of a leasing service's address on the drawing entry card for a simultaneous oil and gas lease drawing does not disqualify the offer, all else being regular, nor does it call into play other requirements of pertinent regulations.

Lisa Heymann, 37 IBLA 170 (Oct. 10, 1978)

When a married woman signs her name, "Mrs. Hal McCarthy," as offeror on a drawing entry card oil and gas lease offer, and prints her full name "Geraldine M. McCarthy" on the face of the card, the card may not be rejected because she violated no regulation by signing the offer in that manner, and she followed the instructions on the face of the card by giving her first name and initial.

Geraldine M. McCarthy, 37 IBLA 323 (Oct. 25, 1978)

While the Department of the Interior does not require oil and gas lease drawing entry cards to be signed and dated at the same time, the signor does attest to the truth of the statements on the card as of the date of the card and is bound by and to its terms.

Estate of Charles D. Ashley, 37 IBLA 367 (Nov. 2, 1978) 85 I.D. 403

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

A final Departmental appellate decision construing a regulation will be given immediate effect, and will not be applied with prospective effect only, unless the decision alters materially the interpretation given the regulation by earlier Departmental decisions or official published opinions, and unless the equitable benefit of the decision is not outweighed by ill effects of allowing a benefit in derogation of the regulation.

E. E. Pack (On Reconsideration), 38 IBLA 23 (Nov. 9, 1978) 85 I.D. 408

Gertrude B. D'Amico, 39 IBLA 68 (Jan. 17, 1979)

Where an oil and gas lease drawing entry card contains the names of other parties in interest and the separate statement of interest required to be filed is not signed by the offeror as required by 43 CFR 3102.7, the offer is properly rejected.

Elizabeth Fagedas, 38 IBLA 130 (Nov. 22, 1978)

A drawing entry card which is not dated in the space provided on the card is not "fully executed," as required by 43 CFR 3112.2-1, and must be rejected, notwithstanding an allegation that the date of signing might have been deduced from a check accompanying the offer or from the postmark of the envelope in which the offer was submitted.

Theodore H. Fohn, 38 IBLA 135 (Nov. 29, 1978)

Donald Miller, 40 IBLA 193 (Apr. 5, 1979)

Donald Miller, 43 IBLA 4 (Sept. 11, 1979)

There is no prohibition against an oil and gas lease offeror's using an address which is commonly used by other offerors.

A general allegation that an oil and gas lease offeror has not complied with securities laws is not proper for consideration by the Department of the Interior, which has not been delegated the responsibility for enforcement of securities laws, absent a showing that his activities, including the filing of lease offers, have been judicially enjoined.

Johnnie E. Gryder, 38 IBLA 146 (Dec. 5, 1978)

Where a drawing entry card submitted in a simultaneous oil and gas lease filing has been signed by the applicant, its completion by a duly authorized agent, all else being regular, does not call into play other requirements of pertinent regulations.

A protest filed by the No. 2 drawee against the issuance of a lease to the No. 1 drawee is properly dismissed where the only grounds asserted for rejecting the offer are that offeror used an address other than his own and that an agent or attorney-in-fact completed the drawing entry card and failed to submit the statements required in 43 CFR 3102.6-1, and it has been shown that the signature on the card was made by the offeror.

Cecil E. Woodlock, Anthony J. Visco, 38 IBLA 186 (Dec. 6, 1978)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

The use of a post office box number as an address is not barred by the oil and gas leasing regulations governing applications or by the Rules of Practice of the Department.

Duncan Miller, 38 IBLA 259 (Dec. 8, 1978)

Where the official record of an oil and gas lease contains nothing either showing that an oil and gas lease applicant's $10 filing fee was included in a check which was dishonored by the drawee bank, or rebutting the applicant's assertion that his filing fee was instead included in another check processed by BLM without incident, BLM's decision to cancel a lease issued pursuant to this offer because no filing fee was paid as required by 43 CFR 3103.2-1(a) will not be sustained for that reason.

Robert A. Chenoweth, 38 IBLA 285 (Dec. 13, 1978)

Where an offer is drawn No. 1 for a tract consisting of 39.97 acres, BLM requests payment specifically of $40 advance rental, and the offeror remits $39.97 within the 15-day period spelled out in 43 CFR 3112.4-1, the submittal of $39.97 does not constitute satisfactory payment within the ambit of that regulation.

Milton Knoll, 38 IBLA 319 (Dec. 19, 1978)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after Feb. 1977, the increased rate is applicable to leases issued subsequent to that date where the over-the-counter offer was filed prior to effective date of the regulation.

An over-the-counter oil and gas lease offer, properly rejected because of a failure to meet the requirements of the regulations, but which rejection did not become final because an appeal was timely filed, may be considered as having priority as of the date the defect was cured.

Phillips Petroleum Co., 38 IBLA 344 (Dec. 22, 1978)

Lands or minerals in lands were not "withdrawn" and "restored from a withdrawal" as those terms are used in the public land laws merely because an erroneous title opinion that the minerals are not owned by the United States is corrected to reflect that they are owned by the United States, and the oil and gas simultaneous filing procedures are applicable where those minerals were in a lease which expired before the correction of the status of the minerals was made.

Regardless of whether lands have been withdrawn from leasing and later restored, or were not withdrawn, an over-the-counter oil and gas lease offer must be rejected where the land involved was formerly embraced in an oil and gas lease which has expired by operation of law and has not been placed on the list of lands available for the filing of simultaneous oil and gas lease offers under 43 CFR Subpart 3112.

David A. Provinse, 38 IBLA 347 (Dec. 22, 1978)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

Where an offeror for a noncompetitive, over-the-counter oil and gas lease certifies that he is a United States citizen, his failure to disclose whether he is a native-born or naturalized citizen will not support rejection of his offer where an offeror for a noncompetitive, simultaneous oil and gas lease is not required to disclose similar information.

Jas. O. Greene, Jr., 39 IBLA 43 (Jan. 16, 1979)

A noncompetitive oil and gas lease offer for acquired lands, filed "over-the-counter," is properly rejected when the accompanying rental payment is deficient by more than 10 percent. However, where the balance of the rental is tendered with the notice of appeal, the offer may be reinstated with priority from the date the deficiency was corrected.

George S. Swan, 39 IBLA 47 (Jan. 16, 1979)

It is proper for the Bureau of Land Management to refuse to accept a filing fee check accompanying drawing entry cards for simultaneous oil and gas lease offers where the check bears the figure amount of $110, the correct amount due, and the typewritten amount of "One hundred eleven and no/100."

Bertram F. Rudolph, Jr., 39 IBLA 167 (Jan. 30, 1979)

Where an oil and gas lease offeror fails to respond within a prescribed period of time to an order to submit specific information necessary to determine whether his offer is valid, it is appropriate to reject the offer.

Where a protestant against the issuance of an oil and gas lease supports his allegations that the lease offer is not qualified with sufficient evidence to warrant further inquiry or investigation by BLM, the protest should not be summarily dismissed for failure of the protestant to make positive proof of his allegations. Instead, the protest should be adjudicated on its merits after all available information has been developed.

Lee S. Bielski, 39 IBLA 211 (Feb. 8, 1979) 86 I.D. 80

Under 30 U.S.C. § 226 (1976), the Department has no authority to issue an oil and gas lease to other than the first-qualified applicant, and if an agent signs an offer for an applicant, the applicant cannot be considered qualified unless the statements required by 43 CFR 3102.6-1 have been timely filed.

Where a rubber stamp is used to imprint an applicant's signature, and where no agent's statement has been submitted under 43 CFR 3102.6-1, a State Office may take appropriate action to establish whether the applicant's signature was imprinted at his request and whether he formulated the offer.

William I. Egger, Jr., 39 IBLA 332 (Feb. 27, 1979)

Under 30 U.S.C. § 226(b) (1976) land within the known geologic structure of a producing oil or gas field may only be leased by competitive bidding, and where land is determined to be within such a structure while a noncompetitive lease offer is pending, the offer must be rejected.

An applicant for a noncompetitive oil and gas lease who challenges a determination by the Geological Survey

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

that land is within the known geologic structure of a producing oil or gas field has the burden of showing that the determination is in error.

Jack J. Bender, 40 IBLA 26 (Mar. 9, 1979)

An offeror's use of a leasing service's address on a simultaneous noncompetitive oil and gas lease offer drawing entry card does not disqualify the offer. A leasing service bound by a "put option" does not have a hidden interest in the offer and does not violate 43 CFR 3102.7 by failing to disclose this put option or 43 CFR 3112.5-2 by filing offers for more than one client on a parcel.

A successful drawee in a simultaneous oil and gas lease drawing will not be disqualified to receive a lease because of an allegation that his leasing service has failed to observe the registration requirements of the Securities Act of 1933.

D. E. Pack, 40 IBLA 45 (Mar. 15, 1979)

Where a drawing entry card is submitted in a simultaneous oil and gas lease drawing and signed by multiple offerors, the offer is properly rejected if even a single offeror fails to enter the date of his signature on the drawing entry card.

The requirement set forth in 43 CFR 3112.2-1(a) (1977) that a drawing entry card be fully executed is not vague or unclear. Hence, a DEC signed by multiple offerors is properly rejected if even a single offeror fails to enter the date on the drawing entry card.

The date of each signature on a drawing entry card is important, because it shows that on that particular date, the offerors, by their respective signatures, certify, as to each, all the statements made on the card.

Thomas R. Flickinger, William S. Flickinger, et al., 40 IBLA 53 (Mar. 16, 1979)

An entry card in a simultaneous oil and gas lease drawing need not be rejected under 43 CFR 3112.2-1(a) where the State prefix of the parcel number is placed on the card immediately below the boxes provided for designation of the parcel number.

L. Alice Collister, 40 IBLA 71 (Mar. 16, 1979)

When an applicant for a noncompetitive oil and gas lease is requested to provide additional information for the adjudication of his drawing entry card offer, the offer is properly rejected where the evidence provided is illegible, and applicant was notified of the illegibility but responded by sending more illegible evidence.

Richard P. Lewis, 40 IBLA 100 (Mar. 27, 1979)

A drawing entry card in a simultaneous oil and gas lease filing need not be rejected where the card sets out as part of the parcel designation the complete name of the State in which the parcel is located instead of the abbreviated State code prefix.

Ed Pendleton, 40 IBLA 103 (Mar. 27, 1979)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

A noncompetitive oil and gas lease issued for lands which, at the time of the lease application, had been posted erroneously as available for leasing but were then included in a prior lease, will be allowed to continue in effect where the first lease expired before the second lease issued and no questions of public policy or third party rights are contravened by the lease issuance.

Reed Gilmore, 40 IBLA 139 (Mar. 29, 1979)

In cases raising the question whether regulations should be interpreted to the detriment of persons seeking oil and gas leases, the standard to be applied is whether the regulations are so clear that there can be no basis for the applicant's noncompliance. If there is doubt as to their meaning and intent, such doubt should be resolved in applicant's favor.

Robert B. Brantley, 40 IBLA 215 (Apr. 10, 1979)

The essential requirement of the simultaneous oil and gas leasing system is that all properly filed offers be afforded equal opportunity to obtain a lease. Where a system effectively excludes a lease offer from consideration, such a system is arbitrary and capricious.

Milton C. Feinberg, Benson J. Lamp (On Reconsideration), 40 IBLA 222 (Apr. 11, 1979) 86 I.D. 234

Where a drawing entry card is submitted in a simultaneous oil and gas lease drawing and signed by multiple offerors, the offer is properly rejected if even a single offeror fails to enter the date of his signature on the drawing entry card.

The requirement set forth in 43 CFR 3112.2-1(a) that a drawing entry card be fully executed is not vague or unclear. Hence, a DEC signed by multiple offerors is properly rejected if even a single offeror fails to enter the date on the drawing entry card.

Pamela M. Kay, Henry H. Greer, Gregory Montgomery, Franklin J. Sands, 40 IBLA 240 (Apr. 16, 1979)

A simultaneously filed oil and gas lease offer by a guardian is properly rejected where the offer is neither accompanied by the statements required by 43 CFR 3102.5-1, nor makes reference to the serial number of a record in which such statements have previously been filed.

Charles J. King, 40 IBLA 276 (Apr. 18, 1979)

The fact that the addresses of an oil and gas lease offeror and a filing service are identical does not disqualify the offer or afford the offeror or filing service a greater probability of successfully obtaining a lease or interest therein in violation of 43 CFR 3112.5-2.

Where there is no evidence in the record that the offeror with first priority in a simultaneous oil and gas lease drawing is not the sole party in interest, a protest alleging an interest in a filing service may properly be dismissed.

Charges that an oil and gas lease filing service has not complied with the Securities Act of 1933 are properly raised before the Securities and Exchange Commission rather than the Department of the Interior.

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

which has not been delegated responsibility for enforcement of securities laws.

Joseph J. O'Keefe, 40 IBLA 378 (May 14, 1979)

When an individual files an oil and gas lease offer through a leasing service under a contractual agreement whereby the leasing service is authorized to act as the sole and exclusive agent to negotiate for sublease, assignment, or sale of any rights obtained by the offeror; where the offeror is required to pay the leasing service a commission according to a set schedule on any sale plus a percentage of any royalties, even if the offeror negotiates the sale; and where such agency to negotiate is to be valid for 5 years, the leasing service has an enforceable right to share in the proceeds of any sale of the lease or any interest therein. Such an agreement creates for the leasing service an "interest" in the lease as that term is defined in 43 CFR 3100.0-5(b).

A purported disclaimer by a leasing service of its interests in its clients' offers which is filed with BLM prior to the filing of these offers, but which, by its own terms, does not apply to the interests held by the service in these offers, is ineffectual and does not erase these interests. This disclaimer is also ineffectual as a matter of law even as to a client's offer to which it does apply, where it is unsupported by consideration and where it is not communicated to the client, as it may be retracted by the service. The service's interests in these offers therefore remain extant as of the filing of its clients' offers, notwithstanding the purported disclaimer, and where the existence of its interests is not disclosed on the offer cards as required by 43 CFR 3102.7, BLM properly rejects the offers.

The Government is not estopped from rejecting oil and gas lease offers because the offerors' leasing agent alleges that he relied on a representation by officers of BLM that his disclaimer of his interest in the offer was valid and therefore failed to amend his service agreement with his clients to remove the interest-creating provision, where it appears that BLM did not in fact so represent.

Frederick W. Lowey et al., 40 IBLA 381 (May 14, 1979)

The failure of the BLM officer to follow the procedure set out in a Secretarial Order requiring all offers, prior to issuance of a lease, to be sent to Geological Survey for a determination of whether the lands are within a known geologic structure, renders the signing of the lease unauthorized, and thus not binding on the Secretary.

United States v. William T. Alexander (On Court Remand), 41 IBLA 1 (May 21, 1979)

Where separate statements of interest are required pursuant to 43 CFR 3102.6-1(a)(2) (1977), this Board must affirm the dismissal of a protest against the issuance of an oil and gas lease which is premised on the protestant's contention that the statement of the offeror must bear his original, holographic signature.

Although a lease offer may not be rejected solely because an agent affixed the offeror's facsimile signature to the offeror's separate statement, this does not prevent BLM from requiring that the offeror personally verify the information contained therein and provide whatever supplemental information may reasonably be required. A private agent may not interpose himself between a lease applicant and the Government so as to mask the identity of the applicant and prevent direct contact by Federal officials who are properly concerned.

W. E. Gilmore, 41 IBLA 25 (May 29, 1979)

An oil and gas lease offer is properly rejected where the offer is neither accompanied by a statement of corporate qualifications nor makes reference to a proper serial number of a record in which such statement had previously been filed.

Where an over-the-counter noncompetitive oil and gas lease offer is filed by a corporation unaccompanied by a statement of its qualifications or a reference by serial number to the record in which it has been filed, and such defect is remedied prior to the filing of any junior offer, the first offer may be considered with priority as of the date the curative data is filed.

BL Industries, Inc., 41 IBLA 30 (May 29, 1979)

It is not proper to reject a drawing entry card oil and gas lease offer solely because an agent affixed the offeror's facsimile signature to both the DEC and to the offeror's separate statement required by 43 CFR 3102.6-1, as BLM may require that the offeror personally verify the information contained in the offer and in the statement, and provide whatever supplemental information that BLM may reasonably require.

Where a drawing entry card is submitted in a simultaneous oil and gas lease drawing and is signed by multiple offerors, the offer is properly rejected if even a single offeror fails to enter the date of his signature on the drawing entry card.

Robert E. Coen et al., 41 IBLA 55 (May 31, 1979)

Strict compliance with 43 CFR 3112.2-1 which provides that simultaneous oil and gas drawing entry cards be signed and fully executed by an applicant or his agent is required.

A simultaneous oil and gas lease offer is properly rejected where the State prefix to the parcel number on an oil and gas drawing entry card is omitted.

A simultaneous oil and gas lease offer is properly rejected where the drawing entry card is not dated.

C. B. Coster Gerard, 41 IBLA 74 (May 31, 1979)

Oil and gas offers, filed for lands withdrawn by PLO No. 5418, must be rejected. The order was issued under the authority of the Pickett Act, 43 U.S.C. §§ 141-142 (1970), repealed by FLPMA, and the order was not arbitrary, capricious, or an abuse of discretion.

Bristol Bay Native Corp., 41 IBLA 85 (June 4, 1979)

Strict compliance with 43 CFR 3112.2-1, which provides that simultaneous oil and gas drawing entry cards be signed and fully executed by an applicant or his agent, is required. Where no date of signing appears on an entry card, the offer is properly rejected.

The burden of signing and fully executing a drawing entry card rests on the applicant. Reliance on instructions provided by a non-governmental filing

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

service does not excuse the failure to fully execute a card.

Walter B. Moore, Jr., 41 IBLA 95 (June 4, 1979)

When, in a drawing of simultaneously filed oil and gas lease offers, the first-drawn offeror is notified to submit the first year's advance rental, that rental must be received by the proper office within the prescribed 15 days. Automatic disqualification, stemming from failure to pay timely, will not be avoided by allegations that payment was mailed far enough in advance to arrive at BLM timely.

American Petrofina Co. of Texas, 41 IBLA 126 (June 13, 1979)

An offeror who submits a drawing entry card signed on his behalf by his agent leasing service meets the requirements of 43 CFR 3102.6-1 if satisfactory agency statements by him and his agent, such statements bearing a facsimile signature, are submitted along with his offer card.

"Interest." Where there is an agreement giving an offeror the option of selling part of an oil and gas lease to his agent leasing service, exercisable solely at the offeror's discretion, the agent has a mere hope or expectancy and not an "interest" in the offer, as defined in 43 CFR 3100.0-5(b). A leasing service, which files a simultaneous noncompetitive oil and gas lease offer drawing entry card on behalf of its client, bound by a "put option" does not have a hidden interest in the offer and does not violate 43 CFR 3102.7 by failing to disclose this put option or 43 CFR 3112.5-2 by filing offers for more than one client on a parcel.

Where there is no evidence in the administrative record that the offeror with first priority in a drawing of simultaneous noncompetitive oil and gas lease offers is not the sole party in interest, as stated by both the offeror and his agent, the burden is on a protestant attacking the validity of the offer to present evidence of an accusation that the offeror/agent agreement gives the agent an enforceable interest in the lease to be issued.

Jack Mask, 41 IBLA 147 (June 18, 1979)

There is no prohibition against an oil and gas lease offeror's using an address which is commonly used by other offerors.

An offeror who submits a drawing entry card signed on his behalf by his agent leasing service meets the requirements of 43 CFR 3102.6-1 if satisfactory agency statements by him and his agent, such statements bearing a facsimile signature, are submitted along with his offer card.

"Interest." Where there is an agreement giving an offeror the option of selling part of an oil and gas lease to his agent leasing service, exercisable solely at the offeror's discretion, the agent has a mere hope or expectancy and not an "interest" in the offer, as defined in 43 CFR 3100.0-5(b). A leasing service, which files a simultaneous noncompetitive oil and gas lease offer drawing entry card on behalf of its client, bound by a "put option" does not have a hidden interest in the offer and does not violate 43 CFR 3102.7 by failing to disclose this put option or 43 CFR 3112.5-2 by filing offers for more than one client on a parcel.

Where there is no evidence in the administrative record that the offeror with first priority in a drawing of simultaneous noncompetitive oil and gas lease offers is not the sole party in interest, as stated by both the offeror and his agent, the burden is on a protestant attacking the validity of the offer to present evidence of an accusation that the offeror/agent agreement gives the agent an enforceable interest in the lease to be issued.

Kelley Everette, 41 IBLA 155 (June 18, 1979)

A decision by BLM rejecting a noncompetitive oil and gas lease drawing entry card offer because someone other than the offeror affixed a facsimile of the offeror's signature on the card and agency statements were not filed as required by 43 CFR 3102.6-1 will be vacated where BLM bases its finding to this effect on a statement made by the offeror 6 months previously concerning the preparation of other, earlier offers, and where the offeror alleges on appeal that she actually affixed the facsimile herself on the offer in question.

Miriam Keizman (Harper), 41 IBLA 166 (June 18, 1979)

The fact that the addresses of the lease offeror and a filing service are identical merely indicates the use of a filing service and does not in itself give the offeror or agent a greater probability of successfully obtaining a lease or interest therein in violation of 43 CFR 3112.5-2.

Where there is no evidence of any violation of the regulations in the record, the burden is on the protestant to submit competent evidence of an accusation that there is an agreement giving a filing service an enforceable interest in the lease, absent which the protest is properly rejected. Allegations that there was a contract between the offeror and a filing service in which the filing service withholds an overriding royalty interest from the offeror and participates in the proceeds, without evidence, is not sufficient to show that the offeror was not a sole party in interest.

Where the purchaser of an oil and gas lease asserts that he purchased the lease from the offeror whose drawing entry card was drawn with first priority, for cash consideration without knowledge of any irregularities or violation of the regulations, he is considered to be a bona fide purchaser, and his lease is not subject to cancellation unless prima facie evidence is presented to the contrary.

J. Theodore Ellis, E. B. Pack, 41 IBLA 231 (June 27, 1979)

Where oil and gas lease offerors enclose agency statements with their drawing entry cards, which statements are clearly intended to, and appear to, apply to their offers, their cards are fully executed notwithstanding their failure to note on the face of the cards that the agency statements are enclosed, as nothing in the regulations or on the card directs an offeror to do so.

Nothing in the regulations requires an agency statement submitted under 43 CFR 3102.6-1(a) to be dated. Rather, the statement is an adjunct to the drawing entry card and is considered dated as of the signing and dating of the card.

An agency statement required by 43 CFR 3102.6-1(a) need not be holographically signed. Rather, such statements may be submitted over facsimile signatures.

Frederick T. Peters et al., 41 IBLA 262 (June 28, 1979)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

It is proper to reject a drawing entry card lease offer, given first priority at a drawing, where the name of the offeror is affixed to the card first name, middle initial, last name, not in the appropriate spaces, by means of a rubber stamp, instead of being inserted in the appropriate spaces of the card in this order: last name, first name, middle initial.

Gordon N. Blair, 41 IBLA 288 (June 28, 1979)

Not all persons may be qualified to be lessees. Signing and dating the entry card constitute certification by the offeror of his qualifications as of a date certain.

As used in 43 CFR 3112.2-1, the term "fully executed" means that the applicant must, in order to render the entry card a valid and complete offer to lease, supply the information requested thereon, including the date.

An interpretative rule is a clarification or explanation of an *existing* regulation, rather than a substantive modification thereof or the adoption of a new regulation.

Harry A. Zuckerman et al., 41 IBLA 372 (July 23, 1979)

An offeror for oil and gas lease may withdraw his offer at any time prior to the drawing. However, the filing fee is retained as a service charge irrespective of the outcome of the drawing.

Don C. Bell II (Trustee), 42 IBLA 21 (July 25, 1979)

Where the rental payment accompanying a noncompetitive oil and gas lease offer for acquired lands, filed over-the-counter, is deficient by more than 10 percent due to an increase in the rental rate subsequent to the filing of the offer, and Bureau of Land Management requests submission of the deficient rental within 30 days, BLM may properly reject the lease offer when the additional rental is not submitted within the 30 days.

Where Bureau of Land Management requests within 30 days the execution of special stipulations prepared by the Forest Service for acquired lands embraced in a noncompetitive oil and gas lease offer, filed over-the-counter, it may properly reject the lease offer when the special stipulations are not executed and submitted within the 30 days.

Where Bureau of Land Management requests within 30 days either (1) submission of a statement that an over-the-counter offeror for a noncompetitive oil and gas lease of acquired lands is not a partnership or (2) compliance with 43 CFR 3102.3-1 if it is a partnership, BLM may properly reject the lease offer when the offeror fails to act in either manner within the 30 days.

Hansen Brothers, 42 IBLA 40 (July 31, 1979)

An oil and gas lease offer is properly rejected where the offer is neither accompanied by a statement of corporate qualifications nor makes reference to a proper serial number of a record in which such statement had previously been filed.

Resource Exploration & Mining, Inc., 42 IBLA 63 (Aug. 2, 1979)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

Where a protestant against the issuance of leases, for oil and gas presents evidence demonstrating the existence of a written partnership between joint offers, and the offerors have not complied with the regulations requiring certain showings of partnerships, the offers cannot be honored.

American Quasar Petroleum Co., 42 IBLA 243 (Aug. 22, 1979)

43 CFR 3112.2-1 requires that simultaneous oil and gas drawing entry cards (DEC's) be "signed and fully executed" by the applicant or his agent which includes identifying the leasing units on the DEC's by correct parcel number. Strict compliance with the regulation is necessary and offers will be rejected where the applicant omits leading zeros from the parcel numbers on his DEC's.

Bertram E. Rudolph, Jr., 42 IBLA 310 (Aug. 29, 1979)

Where an offer is drawn No. 1 in a simultaneous oil and gas lease drawing and the offeror is notified by BLM that the rental due is $1,955, the offer will be disqualified under 43 CFR 3112.4-1 when the offeror submits a check for $1,954 within the time required, but fails to submit the $1 deficiency within the allowed time.

C. Panos, 42 IBLA 326 (Aug. 30, 1979)

A drawing entry card which is not dated in the space provided on the card is not "fully executed," as required by 43 CFR 3112.2-1, and must be rejected.

Donald E. Monington, 42 IBLA 380 (Sept. 11, 1979)

Where BLM's decision to reject a noncompetitive lease offer is based upon a report that the findings and conclusions contained in the Management Framework Plan (MFP) for the area show that acceptance of the offer would not be in the public interest because the lease would threaten valuable wildlife, archaeological, paleontological, scenic, and recreation values, and it is subsequently revealed that the report relied upon misstated the contents of the MFP, which actually made provision for mineral leasing subject to certain protective stipulations, the decision will be reversed and remanded with instructions to issue the lease with appropriate and reasonable stipulations.

James O. Breene, Jr. (On Reconsideration), 42 IBLA 355 (Sept. 11, 1979)

A decision rejecting an oil and gas lease offer because it would result in undue degradation of the environment will be set aside where the record does not clearly support the conclusion reached by BLM.

John M. Ickfrom, 43 IBLA 67 (Sept. 19, 1979)

Where the record does not show and it does not appear that a signature on a drawing entry card is a facsimile, but rather that it is the genuine handwritten signature of the offeror, BLM's decision stating that it is a facsimile and requesting more information about the circumstances surrounding its being affixed will be

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

vacated, as the requirements of 43 CFR 3102.6-1(a)(2) do not apply.

Hurley Gregory, 43 IBLA 82 (Sept. 19, 1979)

A simultaneously filed drawing entry card which is first drawn is properly rejected where the corporate offeror has improperly referred to the serial number where its statement of corporate qualifications was on file by omitting the letter prefix which showed which State Office had custody of the prior-filed statement of qualifications.

BLM personnel may not attempt to "correct," complete, or interpret entries on oil and gas lease offer application forms in such a way as to perfect an otherwise unacceptable application, nor may an applicant "cure" a defect on his drawing entry card by the submission of supplemental information after the drawing.

Resources Exploration & Mining, Inc. (On Reconsideration), 43 IBLA 89 (Sept. 19, 1979)

It is not proper to reject a drawing entry card oil and gas lease offer solely because an agent affixed the offeror's facsimile signature to both the DEC and to the offeror's separate statement required by 43 CFR 3102.6-1, as BLM may require that the offeror personally verify the information contained in the offer and in the statement, and provide whatever supplemental information that BLM may reasonably request. An agency statement required by 43 CFR 3102.6-1(a) need not be holographically signed.

Frances B. Bunn et al., 43 IBLA 242 (Oct. 10, 1979)

Oil and gas lease offerors are advised to refer to accompanying attachments on their drawing entry cards. However, where neither the regulations nor the instructions on the drawing entry card require that the card refer to the statements required by 43 CFR 3102.6-1, a noncompetitive oil and gas lease offer cannot be rejected for failure to do so, where such statements were actually submitted with the card.

Rharic Associates, 43 IBLA 317 (Oct. 22, 1979)

Brooks Griggs, 44 IBLA 185 (Nov. 30, 1979)

An offeror's use of a leasing service address on a drawing entry card, of itself, does not disqualify the offer.

Where there is no evidence in the administrative record that the offeror with first priority in a drawing of simultaneous noncompetitive oil and gas lease offers is not the sole party in interest, as stated by both the offeror and his agent, the burden is on a protestant attacking the validity of the offer to present competent evidence supporting the accusation that there is an agreement giving the agent an enforceable interest in the lease to be issued. In absence of such evidence, the protest is properly rejected.

Alice M. Hardy, 44 IBLA 5 (Nov. 6, 1979)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

When, following a drawing of simultaneously filed oil and gas lease offers, BLM notifies the first-drawn offeror to submit the first year's rental, that payment must be received by the proper office within the prescribed 15 days. An unsigned check, though received timely, does not constitute acceptable payment and is properly returned by BLM to the offeror. Where the offeror does not thereafter submit acceptable payment within the 15 days, BLM properly disqualifies the lease offer.

Delay caused by or attributable to the U.S. Postal Service is not sufficient to excuse late payment of rental except where reinstatement of a lease is at issue under 30 U.S.C. § 188(c) (1976). When BLM returns unacceptable payment to the offeror, a charge that delay in the return of the payment by the Postal Service caused his or her subsequent late rental payment is also an insufficient excuse absent evidence that the Postal Service acted improperly. There is a legal presumption of regularity which supports the official acts of public officers, and in the absence of clear evidence to the contrary, it will be presumed that they have properly discharged their official duties.

Gary Milske, 44 IBLA 21 (Nov. 6, 1979)

In the absence of a regulatory requirement, it is not proper to reject a drawing entry card oil and gas lease offer solely because an agent afixed the offeror's facsimile signature to the DEC and the separate statements of the offeror and the agent submitted in satisfaction of 43 CFR 3102.6-1 are machine copies, as BLM may require that the offeror personally verify the information contained in the offer and the statement, and provide whatever supplemental information that BLM may reasonably request. An agency statement required by 43 CFR 3102.6-1(a) need not be holographically signed.

Nothing in the regulations requires an agency statement submitted under 43 CFR 3102.6-1(a) to be dated. The statement is an adjunct to the drawing entry card and is considered dated as of the signing and dating of the card.

Lewis M. Peters, 44 IBLA 35 (Nov. 6, 1979)

The regulations pertaining to the qualifications of an association as an oil and gas lease offeror (43 CFR 3102.3-1) requires, *inter alia*, separate statements setting forth citizenship and holdings only if there are members who own or control more than 10 percent of such association. If there are no members owning more than 10 percent, such statements need not be furnished.

Patrick Petroleum Co., 44 IBLA 36 (Nov. 6, 1979)

Lands which were acquired for development of their uranium deposits are not subject to oil and gas leasing under the Mineral Leasing Act for Acquired Lands.

Esdras K. Hartley, 44 IBLA 66 (Nov. 20, 1979)

Under the Departmental regulations an offeror in a simultaneous oil and gas lease drawing must sign a statement that he is the sole party in interest, or, if not, submit the statement required by 43 CFR 3102.7. Failure to comply with the regulation requires rejection of the lease offer.

H. J. Enevoldsen, 44 IBLA 70 (Nov. 20, 1979)
86 I.D. 643

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

The Bureau of Land Management has authority to require the execution of special stipulations to protect environmental and other land use values for lands where those values are present. Oil and gas offers should not be rejected because of the asserted presence of environmental or other values, without prior consideration being given to the feasibility of stipulations to protect such values.

David H. Yates, 44 IBLA 121 (Nov. 27, 1979)

Where a successful drawee in a simultaneous oil and gas lease drawing, who is directed by BLM to submit a copy of any agreement she may have with another person concerning the lease offer, submits a copy of an agreement which incorporates by reference a brochure issued by the leasing service with which she had an agreement, but not a copy of the brochure, she has not fully complied with the directive, but may be granted an opportunity to submit the brochure where no specific request for it had previously been made by BLM and the need to include it may not have been apparent.

Martha E. Merrill, 44 IBLA 136 (Nov. 30, 1979)

When an offeror prints his name on the front of a drawing entry card oil and gas lease offer as "Maddox, Robert J.," and signs his name on the back of the card as "J. Robert Maddox," his usual manner of signing, the card may not be rejected because he violated no regulation by signing the offer in that manner, and he properly followed instructions on the face of the card by giving his last name first, then his first name and initial.

Robert J. Maddox, 44 IBLA 178 (Nov. 30, 1979)

Where a noncompetitive oil and gas lease is rejected on the ground that the land lies within an undefined known geologic structure, but the Geological Survey indicates its willingness to amend such classification based on verification of information to be supplied by the offeror, the case will be remanded for further consideration.

Jean Szczepanski, 44 IBLA 206 (Dec. 11, 1979)

A simultaneous oil and gas drawing entry card must be fully executed by an applicant, and where the applicant omits from his address, the State and zip code, the lease offer is properly rejected.

A simultaneous oil and gas lease drawing entry card omitting the State and zip code from the offeror's address is properly rejected and the filing fee is properly retained by the Bureau of Land Management.

Robert C. Meredith, 44 IBLA 213 (Dec. 11, 1979)

A drawing entry card in a simultaneous oil and gas lease filing may not be rejected on the basis that the card sets out as part of the parcel designation the complete name of the State where the governing office of BLM is located instead of the abbreviated State code prefix.

Joe L. Frazier, 44 IBLA 233 (Dec. 11, 1979)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Generally--Continued

Where two of three offerors sign a drawing entry card (DEC) in one of two signature boxes, and the third offeror signs in the other signature box provided on Form 3112-1, and the same date of signing is entered in each of the two appropriate boxes on the DEC for the date, adjacent to the two signature boxes, so that it is evident that the date applies equally to all three signatures on the card, the failure to enter a third date on the offer is not grounds for rejection of the DEC.

Eugene S. Pitkin et al., 44 IBLA 318 (Dec. 31, 1979)

Amendments

An acquired lands lease offer for land in which the United States owns only a fractional mineral interest is defective and subject to rejection when the applicant fails to accompany his offer with the statement required by the regulations showing the extent of his ownership of operating rights to the fractional mineral interest not owned by the United States. Under the regular or "over-the-counter" filing procedure, however, if the offeror subsequently submits his statement regarding ownership of operating rights prior to a final decision rejecting the offer, the defect may be considered cured with priority of filing as of the time the statement was filed.

John Cakason, Jean Cakason, 21 IBLA 185 (July 25, 1975)

An oil and gas lease offer filed under the simultaneous filing procedures, 43 CFR Subpart 3112, which is defective for failure to comply with a mandatory regulation may not be cured by subsequent filing of supplemental information after the drawing is held.

Grady Argenbright, 27 IBLA 24 (Sept. 17, 1976)

An oil and gas lease offer filed by a corporation under the simultaneous filing procedures, 43 CFR Subpart 3112, which is defective for failure to provide evidence of corporate qualifications may not be cured by subsequent filing of supplemental evidence after the drawing is held and must be rejected.

Churchill Corp., 27 IBLA 238 (Oct. 12, 1976)

A deficient over-the-counter oil and gas lease offer may be cured by the offeror's submission of corrective information prior to a final departmental decision, but only with priority of filing as of the date the corrective information was filed.

C. C. Hughes, 33 IBLA 237 (Dec. 28, 1977)

Where an over-the-counter noncompetitive oil and gas lease offer is filed by a corporation unaccompanied by a statement of its qualifications or a reference by serial number to the record in which it has been filed, and such defect is remedied prior to the filing of any junior offer, the first offer may be considered with priority as of the date the curative data is filed.

RL Industries, Inc., 41 IBLA 38 (May 29, 1979)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Amendments--Continued

A person filing a simultaneous offer for an oil and gas lease is presumed to understand the difference between a filing in the name of a trust and a filing in an individual capacity, and despite an allegation that the trust filing was instructed by unspecified Bureau of Land Management personnel, the principles of estoppel may not be invoked to change a defective trust filing into a filing by an individual.

Tony C. Nielsen, 44 IBLA 269 (Dec. 19, 1979)

Attorneys-in-Fact or Agents

An oil and gas lease offer signed by an attorney-in-fact for the offeror is properly rejected where it is not accompanied by a separate statement of the attorney's interest or lack of interest in the offer and the lease, if issued, as required by departmental regulation.

Southern Union Production Co., 22 IBLA 379 (Nov. 17, 1975)

Mitchell Energy Corp., 32 IBLA 248 (Sept. 21, 1977)

Under 30 U.S.C. § 226 (1970), the Department has no authority to issue an oil and gas lease to anyone other than the first-qualified applicant. If an agent signs an offer for an applicant, the applicant cannot be considered qualified unless the statements required by 43 CFR 3102.6-1 have been filed. Where a rubber stamp constitutes an applicant's signature, a State Office of the Bureau of Land Management need not presume that an applicant rather than an agent stamped the card, and where no agent's statement has been submitted, the State Office may take appropriate action to establish that the applicant's signature was imprinted at his request and that he formulated the offer.

Robert C. Leary et al., 27 IBLA 296 (Oct. 26, 1976)

Arthur S. Watkins, Robert N. Eckerman, 28 IBLA 79 (Nov. 12, 1976)

Where a rubber stamp constitutes an offeror's signature on a simultaneous oil and gas lease entry card, the Bureau of Land Management need not presume that the offeror rather than an agent stamped the card, and where no agent's statement has been submitted, BLM may take appropriate action to establish the circumstances under which the signature was stamped on the card.

"Agent." The word "agent," as used in 43 CFR 3102.6-1 requiring statements of authority and disclosure of interests in oil and gas lease offers by agents, does not include an employee who has no discretionary authority and merely acts as the employer's amanuensis in affixing the employer's stamp on a simultaneous oil and gas lease offer entry card, even if it is done outside the actual physical presence of the employer. Any statement required by the Bureau of Land Management to establish the identity of the person who stamped the offeror's name on the card must allow the offeror to provide information to establish whether or not the person was an agent within the meaning of 43 CFR 3102.6-1; merely requiring the offeror to show the stamp was affixed by him or in his presence is not sufficient.

Evelyn Chambers, 27 IBLA 317 (Nov. 8, 1976) 83 I.D. 533

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Attorneys-in-Fact or Agents--Continued

Where a facsimile affixed by means of a rubber stamp or other mechanical device constitutes an applicant's signature on a drawing entry card lease offer, a State Office of the Bureau of Land Management need not presume that the applicant, rather than an agent, stamped the card. It is proper for the BLM office to make inquiry into the filing to establish that the applicant's signature was affixed at his request and that he formulated the offer. If it is disclosed that the signature was affixed pursuant to a power of attorney, and the offer was not accompanied by the statements required by 43 CFR 3102.6-1, the offer must be rejected.

Under 30 U.S.C. § 226 (1970), the Department has no authority to issue a noncompetitive oil and gas lease to anyone other than the first-qualified applicant. If a drawing entry card lease offer is signed by an agent or attorney-in-fact in behalf of the applicant, or if a facsimile signature of the applicant is affixed upon the offer by an agent or attorney-in-fact, the offer cannot be considered to have been submitted by a qualified applicant unless it is accompanied by the statements required by 43 CFR 3102.6-1.

William J. Sparks, 27 IBLA 330 (Nov. 4, 1976) 83 I.D. 538

An oil and gas lease offer for lands in which the United States owns a fractional mineral interest must be accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States. If an agent signs such statement, rather than the offeror, the regulations require that evidence be filed of the authority of the agent to sign the statement. The agent's signature will be acceptable only if the authorization meets the specifications of the regulations.

Frank C. Wells, 28 IBLA 113 (Nov. 15, 1976)

When a rubber stamp is used to affix a signature to a drawing entry card an no agent's statement has been submitted, a State Office of the Bureau of Land Management may take appropriate action to establish whether the applicant's signature was imprinted by him or at his request by an amanuensis and that he formulated the offer.

Mary I. Wiland, Elizabeth B. O'Donnell, 28 IBLA 300 (Jan. 10, 1977)

"Agent." The word "agent," as used in 43 CFR 3102.6-1 requiring statements of authority and disclosure of interests in oil and gas lease offers by agents, does not include a son who has no discretionary authority and merely acts as his mother's amanuensis in affixing her signature on a simultaneous oil and gas lease offer entry card. Therefore, no further statement is required by the Bureau of Land Management to establish whether or not the son was an agent within the meaning of 43 CFR 3102.6-1.

Rebecca J. Waters, 28 IBLA 381 (Feb. 4, 1977)

Use of a rubber-stamped facsimile of an offeror's signature on a simultaneous oil and gas lease entry card invites inquiry into whether the card was stamped by the offeror or, instead, by his agent.

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Attorneys-in-Fact or Agents--Continued

Where an agent of an offeror for a simultaneous oil and gas lease signs the entry card by affixing a rubber-stamped facsimile of the offeror's signature, the requirements of 43 CFR 3102.6-1 apply and separate statements of interest by both offeror and the agent must be filed, or the offer will be rejected.

"Agent." The word "agent," as used in 43 CFR 3102.6-1, requiring statements of authority and disclosure of interests in oil and gas leases by agents, includes all persons or companies having discretionary authority to act on the offeror's behalf concerning the offer or lease.

D. E. Pack, 30 IBLA 166 (May 19, 1977) 84 I.D. 192

Where an oil and gas lease offer is signed by an agent on behalf of the offeror, the regulations with respect to qualifications of lessees require evidence of the authority of the agent and separate statements by the offeror and the agent regarding the nature and extent of any interest the agent has in the lease. The same requirement applies where the offeror's facsimile signature is affixed on the offer by an agent. An offer must be rejected where this information is not filed.

The Bureau of Land Management (BLM) has a responsibility to issue noncompetitive oil and gas leases only to the first-qualified offeror. A rubber-stamped or other form of facsimile signature, unlike a handwritten signature, does not give rise to a presumption that it was personally executed by the offeror. The BLM may inquire of the circumstances under which the signature was stamped on the offer to determine whether compliance with 43 CFR 3102.6-1 was required.

Where the facsimile signature on an oil and gas lease offer is not affixed to the offer by the offeror himself, the circumstances under which the signature is imprinted by a third party are determinative of whether he was acting as an agent. It becomes important to know who actually formulated the offer--whether the offeror knew that he was applying for a lease of the specific lands described in the offer.

Charlotte L. Thornton, William B. Weaver, Jr., Robert L. Smith, 31 IBLA 3 (June 15, 1977)

A BLM office need not presume that an applicant rather than an agent stamped a facsimile signature on a drawing entry card, and where no agent's statement has been submitted as required by 43 CFR 3102.6-1, a Bureau office may inquire as to whether the applicant's signature was imprinted at his request and whether he formulated the offer.

Where an agent of an offeror for a simultaneous oil and gas lease signs the entry card by affixing a rubber-stamped or other facsimile of the offeror's signature, the requirements of 43 CFR 3102.6-1 apply, and separate statements of interest by both offeror and the agent must be filed, or the offer will be rejected.

Ray B. Thames, 31 IBLA 167 (July 5, 1977)

Where an inquiry by the BLM discloses that oil and gas lease applicants imprinted their own facsimile signatures on their drawing entry cards, there can be no question of the application of 43 CFR 3102.6-1(a)(2) since this regulation operates where an agent or attorney in fact affixes the applicant's signature on the applicant's behalf.

Evelyn Chambers and Jerry Chambers, 31 IBLA 381 (Aug. 10, 1977)

Where an entry card in a public drawing is signed by the offeror but completed by an agent or attorney-in-fact, the separate signed statements by the attorney-in-fact or agent required by the pertinent regulation, 43 CFR 3102.6-1(a)(2), need not be filed.

Virginia A. Parozo, 33 IBLA 384 (Jan. 18, 1978)

Patricia E. Parks, 34 IBLA 384 (May 2, 1978)

Cecil K. Woodlock, Anthony J. Visco, 38 IBLA 186 (Dec. 6, 1978)

Where an inquiry by BLM discloses that an oil and gas lease applicant personally signed his name on his drawing entry card, there can be no question of the application of 43 CFR 3102.6-1(a), since this regulation operates only where an agent or attorney in fact signs the card on his principal's behalf.

Adam F. Zbilski, 34 IBLA 4 (Feb. 8, 1978)

Where a drawing entry card submitted in a simultaneous oil and gas lease filing has been signed by the applicant, its completion by a duly authorized agent, including insertion of a current date, all else being regular, does not call into play other requirements of pertinent regulations.

Kenneth Ross, 34 IBLA 61 (Feb. 16, 1978)

An offeror who submits a drawing entry card signed on his behalf by his agent leasing service meets the requirements of 43 CFR 3102.6-1 if satisfactory agency statements by him and his agent are submitted along with his offer card.

Where an offeror and his agent filing service submit statements along with a drawing entry card, which statements indicate unequivocally that there is no agreement between them creating an interest in the agent, thus apparently obviating the need to submit details of the offeror/agent agreement per 43 CFR 3102.6-1, BLM, in its discretion, may either decline to inquire further into the details of the agreement or may request and examine a copy of the agreement to determine whether such an "interest" in the agent existed at the time the offer was filed.

Where there is no evidence in the administrative record that the offeror with first priority in a drawing of simultaneous noncompetitive oil and gas lease offers is not the sole party in interest, as stated by both the offeror and his agent, the burden is on a protestant attacking the validity of the offer to prove an accusation that the offeror/agent agreement gives the agent an enforceable interest in the lease to be issued.

"Interest." Where there is an agreement giving an offeror the option of selling part of an oil and gas lease to his agent leasing service, exercisable solely at the offeror's discretion, the agent has a mere hope or expectancy and *not* an "interest" in the offer, as defined in 43 CFR 3100.0-5(b).

Virginia L. Jones, 34 IBLA 188 (Mar. 21, 1978)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Attorneys-in-Fact or Agents--Continued

Appellant's charges in respect of filing of registration statements for compliance with securities laws go to question of relationships between filing service companies and their investors, and as such, are properly for consideration by Securities and Exchange Commission. Where they do not indicate noncompliance with oil and gas leasing statutes and regulations, such charges are not proper for consideration by the Department of the Interior, which has not been delegated responsibility for enforcement of securities laws.

Elias C. Bacil, 34 IBLA 322 (Apr. 24, 1978)

It is improper for the Bureau of Land Management to reject an oil and gas lease simultaneous drawing entry card solely because a filing service completed the card, including parcel number and date, after the offeror had signed it. This is not an action by an agent or attorney-in-fact requiring compliance with 43 CFR 3102.6-1.

Emily S. Corda, 35 IBLA 12 (May 4, 1978)

A successful drawee in a simultaneous oil and gas lease drawing will not be disqualified to receive a lease by reason of allegations to the effect that the winning drawing entry card was filed for such drawee by an agent and that the agent has failed to observe the registration requirements of the Securities Act of 1933.

John B. McCann, 35 IBLA 32 (May 8, 1978)

Appellant's charges in respect of filing of registration statements for compliance with securities laws go to question of relationships between filing service companies and their investors, and as such, are properly for consideration by Securities and Exchange Commission. Where they do not indicate noncompliance with oil and gas leasing statutes, regulations, and decisions of this Department, such charges are not proper for consideration by the Department of the Interior, which has not been delegated responsibility for enforcement of securities laws.

Elias C. Bacil, 35 IBLA 198 (May 24, 1978)

Dexter D. Spalding, 37 IBLA 4 (Sept. 6, 1978)

A consent decree obtained by the Securities and Exchange Commission establishes no precedent for cases involving different parties. Allegations of Federal securities law violations in connection with Federal oil and gas leasing should be directed to the Securities and Exchange Commission, the agency with jurisdiction over such matters. The jurisdiction of the Board of Land Appeals does not extend to matters exclusively under the jurisdiction of the SEC, but goes to matters involving compliance with oil and gas leasing statutes and regulations.

Marion Bacil, 35 IBLA 366 (June 23, 1978)

Where a drawing entry card is signed by an attorney-in-fact or agent on behalf of the applicant, the offer cannot be considered to have been submitted by a qualified applicant unless accompanied by a statement evidencing that the attorney-in-fact's authority is still in effect, as required by 43 CFR 3102.6-1.

Energy Resources Group, Inc., 36 IBLA 57 (June 30, 1978)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Attorneys-in-Fact or Agents--Continued

Where there is no evidence in the administrative record that the offeror with first priority in a drawing of simultaneous noncompetitive oil and gas lease offers is not the sole party in interest, the burden is on a protestant attacking the validity of the offer to prove an accusation that there is an agreement giving the filing service an enforceable interest in the lease to be issued.

Clyde E. Frazier, 36 IBLA 141 (July 25, 1978)

A successful drawee in a simultaneous oil and gas lease drawing will not be disqualified to receive a lease by reason of unsubstantiated allegations to the effect that the winning drawing entry card was filed for such drawee by an agent and that the agent has failed to observe the registration requirements of the Securities Act of 1933.

Percy E. Watkins, 36 IBLA 168 (July 31, 1978)

A handwritten signature is presumed to be written by the person named. Where an attorney-in-fact or an agent does not sign a drawing entry card, the provisions of 43 CFR 3102.6-1 are not invoked.

A consent decree obtained by the Securities and Exchange Commission (SEC) establishes no precedent for cases involving other parties. The Board of Land Appeals lacks jurisdiction over matters delegated to the SEC. Allegations of Federal Securities Law violations should be directed to the SEC rather than to the Board of Land Appeals.

William Miller, 36 IBLA 309 (Aug. 28, 1978)

An offeror's use of a leasing service's address on the drawing entry card for a simultaneous oil and gas lease drawing does not disqualify the offer, all else being regular, nor does it call into play other requirements of pertinent regulations.

Lisa Heymann, 37 IBLA 170 (Oct. 10, 1978)

Where a contract between an oil and gas lease offeror and a leasing service created an agency relationship, in the absence of circumstances giving the agent an authority coupled with an interest, the agent's authority ordinarily terminated upon the death of the principal. If the leasing service had an interest, a lease could not issue to the estate of the deceased if no statement was filed delineating the nature and extent of that interest as required by 43 CFR 3102.7.

Estate of Charles L. Ashley, 37 IBLA 367 (Nov. 2, 1978)
85 I.D. 403

Where a drawing entry card form of offer to lease a parcel of land for oil and gas is prepared by a person or corporation having discretionary authority to act on behalf of the named offeror, and the offer is signed by such agent or attorney-in-fact on behalf of the offeror, the requirements of 43 CFR 3102.6-1 apply, so that separate statements of interest by both the offeror and the agent must be filed, regardless of whether he signed his principal's name or his own name as his principal's

agent or attorney-in-fact, and regardless of whether the signature was applied manually or mechanically.

D. E. Pack (On Reconsideration), 38 IBLA 23 (Nov. 9, 1978) 85 I.D. 408

Gertrude M. D'Amico, 39 IBLA 68 (Jan. 17, 1979)

H. B. Delasco, Inc., et al., 39 IBLA 194 (Feb. 2, 1979)

J. A. Masek, 40 IBLA 123 (Mar. 27, 1979)

Blanche V. White, 40 IBLA 152 (Mar. 30, 1979)

Bernard Pease, 43 IBLA 292 (Oct. 17, 1979)

A decision by BLM which states that an oil and gas lease offer must be rejected because the offeror did not submit evidence with his drawing entry card as to who affixed a facsimile signature thereon and how his offer was formulated is erroneous. However, where BLM allows the offeror a last chance to submit this information prior to rejecting the offer, that decision will not be vacated, but will be modified and regarded as a simple request for additional information from which to determine whether the offeror's failure to file an agency statement requires rejection of his offer per 43 CFR 3102.6-1(a)(2).

A request to an oil and gas lease offeror for additional information from which to determine whether his failure to file an agency statement requires rejection of his offer per 43 CFR 3102.6-1(a)(2) need not demand information regarding whether the agent who signed the offer card, if any, has an interest in the offer, as the offer will be rejected in these circumstances because no agency statement was filed, regardless of whether or not the agent has an undisclosed interest in the offer.

Under 43 CFR 1821.3-1, information submitted by an oil and gas offeror pursuant to a request by BLM need not be made by affidavit under oath.

Duncan Miller, 38 IBLA 154 (Dec. 5, 1978)

Even though a power of attorney has been filed with the State Office of the Bureau of Land Management and reference to this was included on a simultaneously filed oil and gas lease drawing entry card, the regulations require that the attorney-in-fact or agent file two additional statements along with the card: first, a statement that his authority is still in effect as required by 43 CFR 3102.6-1(a)(1), and second, a statement by the attorney-in-fact or agent about his agreement with the offeror and any interest in the lease pursuant to 43 CFR 3102.6-1(a)(2).

Cotton Petroleum Corp., 38 IBLA 271 (Dec. 13, 1978)

Under 30 U.S.C. § 226 (1976), the Department has no authority to issue an oil and gas lease to other than the first-qualified applicant, and if an agent signs an offer for an applicant, the applicant cannot be considered qualified unless the statements required by 43 CFR 3102.6-1 have been timely filed.

Where a rubber stamp is used to imprint an applicant's signature, and where no agent's statement has been submitted under 43 CFR 3102.6-1, a State Office may take appropriate action to establish whether the applicant's signature was imprinted at his request and whether he formulated the offer.

William I. Bugge, Jr., 39 IBLA 332 (Feb. 27, 1979)

A successful drawee in a simultaneous oil and gas lease drawing will not be disqualified to receive a lease because of an allegation that his leasing service has failed to observe the registration requirements of the Securities Act of 1933.

D. E. Pack, 40 IBLA 45 (Mar. 15, 1979)

The applicability of 43 CFR 3102.6-1 governing agents is far less certain where the agent is the offeror and is also the agent of the other interested parties who will ultimately hold the entire lease interest, as no provision of the regulation unambiguously requires the agent in these circumstances to show that he has authority to sign his own name as offeror.

Robert B. Bressley, 40 IBLA 215 (Apr. 10, 1979)

Where a drawing entry card offer to lease is prepared by an agent, that is, a person or corporation having discretionary authority to act on behalf of the named offeror, and the offer is signed by such agent on behalf of the offeror, the requirements of 43 CFR 3102.6-1 apply, so that separate statements of interest by both the offeror and the agent must be filed, regardless of whether the latter signed his principal's name or his own name as his principal's agent, and regardless of whether the signature was applied manually or mechanically.

L. B. Dunn, 40 IBLA 335 (May 8, 1979)

Where there is no evidence in the record that the offeror with first priority in a simultaneous oil and gas lease drawing is not the sole party in interest, a protest alleging an interest in a filing service may properly be dismissed.

Charges that an oil and gas lease filing service has not complied with the Securities Act of 1933 are properly raised before the Securities and Exchange Commission rather than the Department of the Interior, which has not been delegated responsibility for enforcement of securities laws.

Joseph J. O'Keefe, 40 IBLA 376 (May 16, 1979)

Where separate statements of interest are required pursuant to 43 CFR 3102.6-1(a)(2) (1977), this Board must affirm the dismissal of a protest against the issuance of an oil and gas lease which is premised on the protestant's contention that the statement of the offeror must bear his original, holographic signature.

Although a lease offer may not be rejected solely because an agent affixed the offeror's facsimile signature to the offeror's separate statement, this does not prevent BLM from requiring that the offeror personally verify the information contained therein and provide whatever supplemental information may reasonably be required. A private agent may not interpose himself between a lease applicant and the Government

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Attorneys-in-Fact or Agents--Continued

so as to mask the identity of the applicant and prevent direct contact by Federal officials who are properly concerned.

W. H. Gilmore, 41 IBLA 25 (May 29, 1979)

It is not proper to reject a drawing entry card oil and gas lease offer solely because an agent affixed the offeror's facsimile signature to both the DEC and to the offeror's separate statement required by 43 CFR 3102.6-1, as BLM may require that the offeror personally verify the information contained in the offer and in the statement, and provide whatever supplemental information that BLM may reasonably require.

Robert D. Conn et al., 41 IBLA 55 (May 31, 1979)

An offeror who submits a drawing entry card signed on his behalf by his agent leasing service meets the requirements of 43 CFR 3102.6-1 if satisfactory agency statements by him and his agent, such statements bearing a facsimile signature, are submitted along with his offer card.

"Interest." Where there is an agreement giving an offeror the option of selling part of an oil and gas lease to his agent leasing service, exercisable solely at the offeror's discretion, the agent has a mere hope or expectancy and not an "interest" in the offer, as defined in 43 CFR 3100.0-5(b). A leasing service, which files a simultaneous noncompetitive oil and gas lease offer drawing entry card on behalf of its client, bound by a "put option" does not have a hidden interest in the offer and does not violate 43 CFR 3102.7 by failing to disclose this put option or 43 CFR 3112.5-2 by filing offers for more than one client on a parcel.

Where there is no evidence in the administrative record that the offeror with first priority in a drawing of simultaneous noncompetitive oil and gas lease offers is not the sole party in interest, as stated by both the offeror and his agent, the burden is on a protestant attacking the validity of the offer to present evidence of an accusation that the offeror/agent agreement gives the agent an enforceable interest in the lease to be issued.

Jack Mask, 41 IBLA 147 (June 18, 1979)

Kelley Everette, 41 IBLA 155 (June 18, 1979)

A decision by BLM rejecting a noncompetitive oil and gas lease drawing entry card offer because someone other than the offeror affixed a facsimile of the offeror's signature on the card and agency statements were not filed as required by 43 CFR 3102.6-1 will be vacated where BLM bases its finding to this effect on a statement made by the offeror 6 months previously concerning the preparation of other, earlier offers, and where the offeror alleges on appeal that she actually affixed the facsimile herself on the offer in question.

Miriam Weisman (Barnes), 41 IBLA 166 (June 18, 1979)

A handwritten signature may be presumed to be written by the person named. Where an attorney-in-fact or an agent does not sign a drawing entry card, the provisions of 43 CFR 3102.6-1 are not invoked.

The fact that the addresses of the lease offeror and a filing service are identical merely indicates the use of a filing service and does not in itself give the offeror or agent a greater probability of successfully obtaining a lease or interest therein in violation of 43 CFR 3112.5-2.

Where there is no evidence of any violation of the regulations in the record, the burden is on the protestant to submit competent evidence of an accusation that there is an agreement giving a filing service an enforceable interest in the lease, absent which the protest is properly rejected. Allegations that there was a contract between the offeror and a filing service in which the filing service withholds an overriding royalty interest from the offeror and participates in the proceeds, without evidence, is not sufficient to show that the offeror was not a sole party in interest.

J. Theodore Ellis, L. L. Beck, 41 IBLA 231 (June 27, 1979)

Where oil and gas lease offerors enclose agency statements with their drawing entry cards, which statements are clearly intended to, and appear to, apply to their offers, their cards are fully executed notwithstanding their failure to note on the face of the cards that the agency statements are enclosed, as nothing in the regulations or on the card directs an offeror to do so.

Nothing in the regulations requires an agency statement submitted under 43 CFR 3102.6-1(a) to be dated. Rather, the statement is an adjunct to the drawing entry card and is considered dated as of the signing and dating of the card.

An agency statement required by 43 CFR 3102.6-1(a) need not be holographically signed. Rather, such statements may be submitted over facsimile signatures.

Frederick T. Peters et al., 41 IBLA 262 (June 26, 1979)

Where the record does not show and it does not appear that a signature on a drawing entry card is a facsimile, but rather that it is the genuine handwritten signature of the offeror, BLM's decision stating that it is a facsimile and requesting more information about the circumstances surrounding its being affixed will be vacated, as the requirements of 43 CFR 3102.6-1(a)(2) do not apply.

Burley Gregory, 43 IBLA 82 (Sept. 19, 1979)

It is not proper to reject a drawing entry card oil and gas lease offer solely because an agent affixed the offeror's facsimile signature to both the DEC and to the offeror's separate statement required by 43 CFR 3102.6-1, as BLM may require that the offeror personally verify the information contained in the offer and in the statement, and provide whatever supplemental information that BLM may reasonably request. An agency statement required by 43 CFR 3102.6-1(a) need not be holographically signed.

Frances L. Dunn et al., 43 IBLA 282 (Oct. 10, 1979)

Oil and gas lease offerors are advised to refer to accompanying attachments on their drawing entry cards. However, where neither the regulations nor the instructions on the drawing entry card require that the card refer to the statements required by 43 CFR 3102.6-1.

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Attorneys-in-Fact or Agents--Continued

a noncompetitive oil and gas lease offer cannot be rejected for failure to do so, where such statements were actually submitted with the card.

Eharrc Associates, 43 IBLA 317 (Oct. 22, 1979)

Brooks Griggs, 44 IBLA 185 (Nov. 30, 1979)

Where there is no evidence in the administrative record that the offeror with first priority in a drawing of simultaneous noncompetitive oil and gas lease offers is not the sole party in interest, as stated by both the offeror and his agent, the burden is on a protestant attacking the validity of the offer to present competent evidence supporting the accusation that there is an agreement giving the agent an enforceable interest in the lease to be issued. In absence of such evidence, the protest is properly rejected.

Alice M. Hardy, 44 IBLA 5 (Nov. 6, 1979)

In the absence of a regulatory requirement, it is not proper to reject a drawing entry card oil and gas lease offer solely because an agent affixed the offeror's facsimile signature to the DEC and the separate statements of the offeror and the agent submitted in satisfaction of 43 CFR 3102.6-1 are machine copies, as BLM may require that the offeror personally verify the information contained in the offer and the statement, and provide whatever supplemental information that BLM may reasonably request. An agency statement required by 43 CFR 3102.6-1(a) need not be holographically signed.

Nothing in the regulations requires an agency statement submitted under 43 CFR 3102.6-1(a) to be dated. The statement is an adjunct to the drawing entry card and is considered dated as of the signing and dating of the card.

Lewis W. Peters, 44 IBLA 35 (Nov. 6, 1979)

"Certified." Under 43 CFR 1821.3-1(a), additional information submitted by an oil and gas offeror pursuant to a request by BLM need not be in affidavit form. A request for a "certified" copy of an unrecorded document in the possession of its owner connotes the intention that the owner attach an affidavit attesting to its authenticity.

Martha P. Merrill, 44 IBLA 136 (Nov. 30, 1979)

Description

An oil and gas lease offer for less than 640 acres of land is properly rejected when the application fails to include adjoining, unsurveyed, nonnavigable riverbed lands which were available for leasing at the time the offer was filed.

John B. Williams, 18 IBLA 354 (Jan. 16, 1975)

No offer may be made for less than 640 acres except where the offer is accompanied by a showing that the lands are in an approved unit or cooperative plan of operation, or where the land is surrounded by lands not available for leasing, and where these circumstances do not exist, an offer for less than 640 acres must be rejected.

John F. Brown, 22 IBLA 50 (Sept. 16, 1975)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Description--Continued

Where an over-the-counter oil and gas lease offer is rejected because the applicant did not specify which of the described tracts he wanted the offer to include, he is presumed to have applied for all the tracts. Where on appeal he asserts that he desired to lease all the described lands, the decision will be reversed.

E. C. Nesin, 22 IBLA 226 (Oct. 15, 1975)

An oil and gas lease offer embracing a tract of land which appears on the official survey plat as a meandered lake which is unsurveyed must give a metes and bounds description of the meandered tract tied to an official corner of the public land surveys. In the absence of such a description, the offer must be rejected.

Marilyn E. Crandall, 25 IBLA 180 (June 14, 1976)

An oil and gas lease offer will not be rejected on the basis of a defective land description merely because some of the land applied for is not available for leasing where the offeror has submitted advance rental for all of the land described. Generally, where an offer describes an entire section and only part of that land is available for leasing, a lease will be issued for the land available and the offer rejected for the balance of the land in the section.

The description of an entire section of land modified by the word "available" in an oil and gas lease application is an offer to lease all of that section, subject to availability for leasing. An offer containing such a description need not be rejected for lack of a legally sufficient description where the offer is accompanied by the required rent for all of the land described therein.

Milan S. Pavlak, 30 IBLA 77 (Apr. 18, 1977)

Where there is no ambiguity or confusion in the description of lands in an oil and gas lease offer because it includes a complete description of land in a section in a particular township by legal subdivisions embracing unnumbered survey lots or fractional subdivisions, as well as a description of unnumbered lots in accord with current survey numbering practice, the lot designation may be disregarded, and the regulatory requirement that lands in an oil and gas lease offer which have been surveyed under the public land rectangular system must be described by legal subdivision, section, township, and range, is satisfied, even though the official plat of survey does not designate or number the fractional subdivisions as lots.

David H. Yates, 33 IBLA 175 (Dec. 20, 1977)

BLM is not required to alter, modify, or correct an over-the-counter oil and gas lease offer in order to resolve a disparity in the land description contained therein.

C. C. Hughes, 33 IBLA 237 (Dec. 28, 1977)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Description--Continued

BLM is without authority to alter an ambiguous competitive oil and gas lease bid in order to make it valid.

Where an oil and gas competitive lease bid is ambiguous, due to the inclusion in it of irreconcilable conflicting descriptions of the desired land, BLM should reject it.

D. E. Price, 34 IBLA 61 (Feb. 14, 1978)

An oil and gas lease drawing entry card is properly rejected where it contains incorrect information, in that the parcel number of the land applied for is misstated, notwithstanding the fact that the misstatement was the result of an inadvertent typographical error.

Amerada Hess Corp., 34 IBLA 68 (Feb. 17, 1978)

Where an offer for an oil and gas lease describes lands by reference only to the rectangular survey system, without reference to the fact that part of these unpatented lands are also within a mineral survey, the offer will be regarded as including the lands within the mineral survey if it is clear from the offer that the offeror so intended.

Bill J. Maddox, 34 IBLA 278 (Apr. 17, 1978)

Where an offer for an oil and gas lease describes lands in a section number followed by several aliquot parts and concludes with the words "(all available)," those words refer only to lands available within the aliquot parts and not to other aliquot parts of the section not specifically listed.

Joan Oakason, 34 IBLA 355 (Apr. 26, 1978)

A drawing entry card which does not contain the full designation of the parcel applied for, including the alphabetical State Office code as prefix, is not fully executed and must be rejected.

Lee R. Messinger, 44 IBLA 236 (Dec. 11, 1979)

A metes and bounds description, with courses and distances between successive angle points and appropriate ties to the nearest official survey corner, is properly required pursuant to 43 CFR 3101.2-3(a) where the description of lands in an oil and gas lease offer cannot be conformed to the public land surveys.

Wilfred Plomis, 44 IBLA 266 (Dec. 19, 1979)

Drawings

An oil and gas lease offer drawn first in a simultaneous filing is properly rejected under 43 CFR 3103.3-1 and 43 CFR 3111.1-1(e)(1) where the offer is deficient in the first year's rental by more than 10 percent. The amendment of the regulations to eliminate the requirement that the advance rental must be submitted with simultaneous filings, effective Sept. 17, 1973, was of prospective effect only, and may not be invoked to cure a defect in rental payment in a simultaneously filed lease offer pending on Sept. 17, 1973.

Duncan Miller, 19 IBLA 133 (Mar. 5, 1975)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Drawings--Continued

Drawing entry cards for simultaneous oil and gas lease offers which are incomplete will be rejected and the filing fees will be retained.

Albert E. Mitchell, III, 20 IBLA 302 (May 30, 1975)

An offeror is properly disqualified under 43 CFR 3112.4-1 from receiving a noncompetitive oil and gas lease on an offer drawn with the first priority at a simultaneous drawing when he fails to pay the first year's rental within 15 days (or the first business day thereafter) of receipt of the notice that such payment is due.

Where an offer is drawn with first priority in a simultaneous drawing, and the offeror fails to pay the first year's rental timely, his failure to do so cannot be excused because of the asserted "apparent inefficiency of the United States Mails."

Mar-Win Development Co., 20 IBLA 383 (June 12, 1975)

Where a drawing was held to determine the priority of simultaneous oil and gas lease applicants and afterwards it was discovered that cards for another parcel had inadvertently been included in the drawing, the results of the drawing will stand, as all applicants in the drawing had an equal chance to win.

Verna C. [illegible], 21 IBLA 155 (July 21, 1975)

When several offers for a noncompetitive oil and gas lease are filed for the same parcel during a simultaneous filing period and all are withdrawn after the drawing but before a lease is issued, the land is not thereby made available for an over-the-counter offer but must be included in a subsequent list of lands available for filing under the simultaneous drawing procedure.

Edward [illegible], 22 IBLA 6 (Sept. 8, 1975)

When a person files an offer for a noncompetitive oil and gas lease and when his agent files another offer for the same parcel on behalf of the principal, both offers must be rejected because the principal's improved chance of success made the drawing inherently unfair whether or not there has been any collusion or intent to deceive the Department.

[illegible], 22 IBLA 13 (Sept. 8, 1975)

A first-drawn simultaneous drawing entry card which is defective because of noncompliance with a mandatory regulation must be rejected and may not be "cured" by submission of further information.

Manhattan Resources, Inc., 22 IBLA 24 (Sept. 9, 1975)

Southern Union Production Co., 22 IBLA 379 (Nov. 17, 1975)

James E. Caddell, 25 IBLA 276 (June 28, 1976)

Resource Exploration & Mining, Inc., 42 IBLA 63 (Aug. 2, 1979)

Herbert Adler, 42 IBLA 228 (Aug. 22, 1979)

Filing fees may be retained when drawing entry cards made on reproduced forms are rejected.

Charles J. Babington et al., 22 IBLA 143 (Sept. 30, 1975)

The successful drawee in a drawing under the special simultaneous filing procedure for noncompetitive oil and gas lease offers is automatically disqualified if he fails to pay rental within 15 days from receipt of notice that such payment is due. A statement by such a drawee that he did not receive a notice and that his office records where his oil and gas records are contained lack any copy of the rental notice is insufficient to overcome the presumptive effect of evidence that Bureau of Land Management officials mail copies of the notice of rental, a notice of stipulations to be signed, and the stipulations in the same envelope, and it is clear the envelope containing the stipulations was received at the drawee's office.

A. S. Golden, 22 IBLA 261 (Oct. 24, 1975)

When a person files two offers for a parcel of land in a drawing of oil and gas lease offers filed in a simultaneous lease offering, the regulation requires that the offers be rejected.

Arthur E. Davison, 23 IBLA 15 (Nov. 26, 1975)

A simultaneous oil and gas lease offer is properly rejected where the drawing entry card is not signed or dated by the offeror.

Thomas Buckman, 23 IBLA 21 (Nov. 26, 1975)

Harley W. Adams, 43 IBLA 144 (Sept. 28, 1979)

A simultaneous oil and gas lease offer is properly rejected where the drawing entry card is postdated beyond the date of the drawing.

Ray Sloan, 24 IBLA 10 (Feb. 4, 1976)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Drawings--Continued

The drawing of an offer for a noncompetitive lease in a simultaneous oil and gas lease drawing creates no vested rights in the offeror, and the offeror cannot compel the issuance of a lease before an environmental analysis has been made where the Bureau of Land Management has determined that the environmental analysis is necessary for the protection of the resources of the particular area.

Paula J. Jones, 24 IBLA 76 (Feb. 24, 1976)

An offeror is properly disqualified under 43 CFR 3112.4-1 from receiving a noncompetitive oil and gas lease on an offer drawn with the first priority at a simultaneous drawing when he/she fails to pay the first year's rental within 15 days (or the first business day thereafter) of receipt of the notice that such payment is due.

Where an offer is drawn with first priority in a simultaneous drawing, and the offeror fails to pay the first year's rental timely, his/her failure to do so cannot be excused because of the asserted delay of the postal service.

John Paul Pratt, 24 IBLA 110 (Mar. 1, 1976)

Carma M. Pooley, 29 IBLA 304 (Mar. 30, 1977)

Jack Koegel, 30 IBLA 143 (May 12, 1977)

An offeror is properly disqualified under 43 CFR 3112.4-1 from receiving a noncompetitive oil and gas lease on an offer drawn with the first priority at a simultaneous drawing when he fails to pay the first year's rental within 15 days (or the first business day thereafter) of receipt of the notice that such payment is due. An attempt to make payment after the close of office hours on the day the payment is due will not prevent the disqualification.

B. Evans Kennedy, 24 IBLA 152 (Mar. 10, 1976)

Simultaneous oil and gas lease drawing entry cards which are not executed correctly will be rejected. Where an ambiguity is created by an applicant on a drawing entry card, it is not the responsibility of BLM to speculate about applicant's intention and necessarily to resolve the ambiguity in his favor.

Joseph A. Winkler, 24 IBLA 300 (Apr. 29, 1976)

Simultaneous oil and gas drawing entry cards must be fully executed by the applicant and when the applicant omits the date of execution on the card, the lease offer is properly rejected.

Where an applicant fails to date a simultaneous oil and gas drawing entry card, he has not complied with 43 CFR 3112.2-1(a) which requires that the card be "fully executed" and his offer is properly rejected whether the defect is discovered before or after the drawing. The fact that BLM entered the card in the drawing does not waive the defect.

John R. Minich et al., 25 IBLA 107 (June 7, 1976)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Drawings--Continued

A simultaneous oil and gas lease offer is properly rejected and the filing fee retained where the offeror, in completing the drawing card, does not provide the name of the State in which the parcel of land is located.

Ray Granat et al., 25 IBLA 115 (June 7, 1976)

Jerry Van Waardhuizen, 26 IBLA 152 (Aug. 2, 1976)

Martin H. Sheets, 32 IBLA 7 (Aug. 29, 1977)

When the Bureau of Land Management discovers that an entry card was erroneously omitted from a simultaneous drawing for an oil and gas lease, the drawing is void and a new drawing, with all cards included, must be held.

Marshall & Winston, Inc., 25 IBLA 169 (June 14, 1976)

A simultaneous oil and gas lease offer is properly rejected when the offeror fails to execute fully the drawing entry card by not identifying on the card the State in which the parcel of land is located.

Roswell E. Marreto and Doris O. Marreto, 25 IBLA 218 (June 16, 1976)

Richard Lovett, 27 IBLA 306 (Oct. 27, 1976)

Gerald G. Calhoun, 27 IBLA 362 (Nov. 8, 1976)

Donna E. Van De Walker, 28 IBLA 60 (Nov. 9, 1976)

A simultaneous oil and gas lease offer is properly rejected where the drawing card is not signed.

A simultaneous oil and gas lease offer is properly rejected when the date is omitted from the drawing card.

Herbert W. Schollmeyer, 25 IBLA 393 (July 6, 1976)

The dismissal of a protest, which consists of a mere allegation that the successful drawee was engaged in practices militating against the fairness of the drawing, will be sustained on appeal absent any substantiating evidence supporting the allegation.

Duncan Miller, 26 IBLA 37 (July 8, 1976)

A simultaneous oil and gas lease offer is properly rejected and the filing fee retained where the offeror, in completing the drawing card, does not provide the name of the State in which the parcel of land is located where called for on the card.

When the Secretary of the Interior determines that an oil and gas lease is to be issued for a particular tract, it must be issued to the first-qualified applicant. An applicant is not qualified because of his failure to comply with 43 CFR 3112.2-1(a) when he fails to provide the name of the State in which the parcel of land is located.

Ishmael Guerra, 26 IBLA 116 (July 26, 1976)

A simultaneous oil and gas drawing entry card must be fully executed by an applicant, and when the applicant omits her address, the lease offer is properly rejected and the filing fee properly retained.

Grace M. Williams, 26 IBLA 232 (Aug. 17, 1976)

Where an oil and gas lease offer filed on a drawing entry card in a simultaneous filing procedure contains the name of an additional party in interest, and the required statement of interest, copy or explanation of the agreement between the parties, and evidence of the qualifications of the additional party are not filed within 15 days after the filing of the lease offer, the offer must be rejected.

A first-drawn simultaneous drawing entry card which is defective because of noncompliance with a mandatory regulation must be rejected and may not be cured by the submission of further information.

Chesney B. Allred, Edward C. Allred, 26 IBLA 276 (Aug. 24, 1976)

When an oil and gas lease offeror whose entry card was drawn first in a simultaneous drawing fails to pay the rental within 15 days after receiving notice that payment is due, he is automatically disqualified under 43 CFR 3112.4-1 from receiving the lease.

Frank De Jong, 26 IBLA 327 (Aug. 30, 1976)

A simultaneous oil and gas entry card must be signed and fully executed by the applicant. A decision rejecting such an offer will be upheld where failure to complete the date on the card renders the applicant's certification as to qualifications ineffective and causes the entry card to be incomplete.

Helen E. Farris, 26 IBLA 382 (Sept. 9, 1976)

Tina A. Brown, 33 IBLA 213 (Dec. 21, 1977)

An oil and gas lease offer filed under the simultaneous filing procedures, 43 CFR Subpart 3112, which is defective for failure to comply with a mandatory regulation may not be cured by subsequent filing of supplemental information after the drawing is held.

Grady Argenbright, 27 IBLA 26 (Sept. 17, 1976)

Where it does not appear that the notice required by sec. 7(b) of the Privacy Act of 1974 regarding the disclosure of a social security number was given, an oil and gas lease offer on a drawing card filed in a simultaneous drawing procedure should not be considered defective solely because the applicant omitted designating the social security number on the card as provided thereon.

An oil and gas lease offer on a drawing card filed in a simultaneous drawing procedure is properly rejected as defective where there are other parties in interest in addition to the applicant but the card does not list them or refer to an attachment, and an attachment dated nearly 6 months prior to the filing, signed by the applicant and four others stating their qualifications and setting forth a percentage of interest for each as "Partners in interest," fails adequately to set forth the nature of their agreement, and no other statement

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Drawings--Continued

or information is filed within the time required by 43 CFR 3102.7.

Harry Reich, 27 IBLA 123 (Sept. 30, 1976) 83 I.D. 507

Where a corporation files an application for a lease for a certain parcel of land and is the successful offeror in the drawing of simultaneous oil and gas lease offers and the vice president and secretary of the corporation also filed applications for the same parcel of land in the same drawing, as individuals, the offer of the corporation must be rejected because the officers of the corporation stand in a fiduciary relationship to the corporation and thereby increase its chances to be the successful applicant.

Eadra Corp., 27 IBLA 220 (Oct. 7, 1976)

An oil and gas lease offer filed by a corporation under the simultaneous filing procedures, 43 CFR Subpart 3112, which is defective for failure to provide evidence of corporate qualifications may not be cured by subsequent filing of supplemental evidence after the drawing is held and must be rejected.

Churchill Corp., 27 IBLA 236 (Oct. 12, 1976)

A simultaneous oil and gas lease offer is properly rejected when the applicant has not fully executed the drawing entry card by failing to identify on the card the State in which the parcel of land is located.

James W. O'Connor, 27 IBLA 247 (Oct. 18, 1976)

Failure to execute fully an oil and gas drawing card (by omitting the zip code) properly results in the rejection of the offer.

Even assuming that a BLM order has the force and effect of a regulation, it cannot be applied retroactively where there are intervening rights or the interests of the United States would be adversely affected. Where there is a no. 2 oil and gas drawing card, it constitutes an intervening right.

Beverly J. Steinbeck, 27 IBLA 249 (Oct. 18, 1976)

The term "signed and fully executed" as used in 43 CFR 3112.2-1(a) does not interdict the use of a rubber stamp to affix a signature to a drawing entry card, provided that it is the applicant's intention that the stamp be his signature.

Under 30 U.S.C. § 226 (1970), the Department has no authority to issue an oil and gas lease to anyone other than the first-qualified applicant. If an agent signs an offer for an applicant, the applicant cannot be considered qualified unless the statements required by 43 CFR 3102.6-1 have been filed. Where a rubber stamp constitutes an applicant's signature, a State Office of the Bureau of Land Management need not presume that an applicant rather than an agent stamped the card, and where no agent's statement has been submitted, the State Office may take appropriate action to establish that the applicant's signature was imprinted at his request and that he formulated the offer.

Robert C. Leary et al., 27 IBLA 296 (Oct. 26, 1976)

Arthur E. Watkins, Robert B. Scheiman, 28 IBLA 79 (Nov. 12, 1976)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Drawings--Continued

An unsigned and undated drawing entry card filed in the simultaneous oil and gas leasing procedures must be rejected.

Frank De Jong, 27 IBLA 313 (Oct. 29, 1976)

Milo W. Snider, 33 IBLA 42 (Nov. 25, 1977)

A simultaneous oil and gas drawing entry card must be fully executed by the applicants and when they omit their address or the State in which the parcel of land to be leased is located, the lease offer is properly rejected.

Hartley L. Gordon and James A. List, 27 IBLA 317 (Oct. 29, 1976)

Hartley L. Gordon and James A. List, 32 IBLA 139 (Sept. 12, 1977)

Where a rubber stamp constitutes an offeror's signature on a simultaneous oil and gas lease entry card, the Bureau of Land Management need not presume that the offeror rather than an agent stamped the card, and where no agent's statement has been submitted, BLM may take appropriate action to establish the circumstances under which the signature was stamped on the card.

"Agent." The word "agent," as used in 43 CFR 3102.6-1 requiring statements of authority and disclosure of interests in oil and gas lease offers by agents, does not include an employee who has no discretionary authority and merely acts as the employer's amanuensis in affixing the employer's stamp on a simultaneous oil and gas lease offer entry card, even if it is done outside the actual physical presence of the employer. Any statement required by the Bureau of Land Management to establish the identity of the person who stamped the offeror's name on the card must allow the offeror to provide information to establish whether or not the person was an agent within the meaning of 43 CFR 3102.6-1; merely requiring the offeror to show the stamp was affixed by him or in his presence is not sufficient.

Evelyn Chambers, 27 IBLA 317 (Nov. 4, 1976) 83 I.D. 533

The term "signed and fully executed" as used in 43 CFR 3112.2-1(a) does not interdict the use of a rubber stamp or other mechanical device to affix a signature to a drawing entry card, provided that it is the applicant's intention that the facsimile be his signature.

Under 30 U.S.C. § 226 (1970), the Department has no authority to issue a noncompetitive oil and gas lease to anyone other than the first-qualified applicant. If a drawing entry card lease offer is signed by an agent or attorney-in-fact in behalf of the applicant, or if a facsimile signature of the applicant is affixed upon the offer by an agent or attorney-in-fact, the offer cannot be considered to have been submitted by a qualified applicant unless it is accompanied by the statements required by 43 CFR 3102.6-1.

William J. [illegible], 27 IBLA 330 (Nov. 4, 1976) 83 I.D. 538

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Drawings--Continued

Failure to execute fully an oil and gas drawing entry card (by omitting the zip code) properly results in the rejection of the offer.

A drawing entry card oil and gas lease offer given first priority in a drawing in the simultaneous filing procedure creates no vested right to a lease in the offeror, but merely the right of having her offer considered first for the parcel described. If the drawing entry card is defective, it must be rejected.

Amy H. Hanthorn. 27 IBLA 369 (Nov. 4, 1976)

A simultaneous oil and gas drawing entry card must be fully executed by the applicant. When the applicant omits the zip code from his address on the card, the lease offer is properly rejected.

An applicant whose simultaneous oil and gas entry card is rejected because of a defect in his completion of the entry card cannot thereafter cure the defect by submitting a corrected entry card.

Raymond E. Baimer. 27 IBLA 373 (Nov. 4, 1976)

An offeror is properly disqualified from receiving a noncompetitive oil and gas lease on an offer which is drawn first from a group of simultaneously filed offers when he fails to pay the first year's advance rental within 15 days of his receipt of notice that such rental is due, and the delay is attributable to his posting of the rental check with insufficient postage.

Edgar C. Donnington, Jr. 28 IBLA 65 (Nov. 10, 1976)

A simultaneous oil and gas lease offer is properly rejected where the offeror, in preparing the drawing entry card, did not complete the date in the space provided for it on the card.

Robert J. Burkhall. 28 IBLA 76 (Nov. 12, 1976)

An oil and gas lease offer for lands in which the United States owns a fractional mineral interest which is not accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States is defective and such defect cannot be cured by the submission of further information.

Frank D. Wells. 28 IBLA 113 (Nov. 15, 1976)

Where it does not appear that the notice required by sec. 7(b) of the Privacy Act of 1974 regarding the disclosure of a social security number was given, an oil and gas lease offer on a drawing card filed in a simultaneous drawing procedure should not be considered defective solely because the applicant omitted designating the social security number on the card as provided thereon.

Richard Lovett. 28 IBLA 244 (Dec. 10, 1976)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Drawings--Continued

The prohibition in 43 CFR 3112.2-1(a)(2) against the filing by a simultaneous drawing oil and gas lease applicant of more than one entry card for the same parcel is only concerned with entry cards filed by the same applicant which indicate the same parcel number as shown on the posted notice. Such entry cards must be rejected regardless whether the card is fully executed or correct in all respects.

Kathleen Griffith. 28 IBLA 295 (Dec. 29, 1976)

When a rubber stamp is used to affix a signature to a drawing entry card and no agent's statement has been submitted, a State Office of the Bureau of Land Management may take appropriate action to establish whether the applicant's signature was imprinted by him or at his request by an amanuensis and that he formulated the offer.

Mary E. Wiland, Elizabeth R. O'Connell. 28 IBLA 300 (Jan. 10, 1977)

Regardless of whether offeror is described as "*un*qualified" or "*dis*qualified," 43 CFR 3112.5-1 requires that upon successful drawees' failure to pay first year's rental, the lands shall be listed subsequently under the simultaneous drawing procedure rather than leased under the regular over-the-counter procedure in 43 CFR Subpart 3111.

Robert C. Leary. 28 IBLA 310 (Jan. 10, 1977)

Where, after a drawing of simultaneously filed oil and gas lease offers, the authorized officer mails a notice to the successful drawee informing him of his priority and the requirement that the advance rental must be paid within the allotted time, which letter is received at his address of record, his subsequent failure to remit the rental timely will disqualify his offer even though he asserts that the person who received and signed for the notice, and then failed to give it to him promptly, was not his designated agent for receipt of mail.

After a drawing of simultaneously filed oil and gas lease offers the requirement that the first year's rental be received in the proper office within the allotted time after notice to the applicant is mandatory, and consideration of excuses for failure to comply is not permitted. Specifically, no relief will be afforded where the delay is attributed to the Postal Service.

Edgar C. Donnington (On Reconsideration). 28 IBLA 355 (Jan. 31, 1977)

An unsigned drawing entry card filed in the simultaneous oil and gas leasing procedures must be rejected.

Melvin C. Purser. 28 IBLA 359 (Feb. 1, 1977)

"Agent." The word "agent," as used in 43 CFR 3102.6-1 requiring statements of authority and disclosure of interests in oil and gas lease offers by agents, does not include a son who has no discretionary authority and merely acts as his mother's amanuensis in affixing her signature on a simultaneous oil and gas lease offer entry card. Therefore, no further statement is required by the Bureau of Land Management to establish whether

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Drawings--Continued

or not the son was an agent within the meaning of 43 CFR 3102.6-1.

Rebecca J. Waters, 28 IBLA 381 (Feb. 4, 1977)

A successful simultaneously filed oil and gas lease entry card is not to be rejected because the card is signed prior to the date of the beginning of the simultaneous filing period unless it is dated more than 10 days prior to the date it is filed.

Kathryn J. Eckles, Harley L. Williamson, 28 IBLA 390 (Feb. 4, 1977)

Where an applicant fails to date a simultaneous oil and gas drawing entry card, he has not complied with 43 CFR 3112.2-1(a) which requires that the card be "fully executed," and his lease offer is properly rejected.

Thomas V. Gullo & Joseph L. Sandazzo, 29 IBLA 126 (Feb. 23, 1977)

A simultaneous oil and gas lease offer is properly rejected when the offeror fails to execute fully the drawing entry card by not indentifying on the card the full designation of the parcel by both number and letter prefix.

E. Fenton Carey, 29 IBLA 196 (Mar. 21, 1977)

An offer for an oil and gas lease filed on a simultaneous drawing entry card must be rejected when the offeror has failed to indicate the date he signed the card.

Earl Thompson, 29 IBLA 218 (Mar. 22, 1977)

The fact that the addresses of the lease offeree and a filing service are identical merely indicates the use of a filing service and does not in itself give the offeror or agent a greater probability of successfully obtaining a lease or interest therein in violation of 43 CFR 3112.5-2.

The burden is on the protestant to prove by competent evidence an accusation that a filing service is filing offers on behalf of more than one offeror and that there is an enforceable agreement the filing service will participate in the proceeds of the lease. A mere offer to buy leases from a successful drawee does not violate the regulation prohibiting anyone from having a greater probability of success in a drawing or constitute an agreement giving an agent or broker an interest in the proceeds of a lease.

Harry L. Matthews, 29 IBLA 240 (Mar. 25, 1977)

Simultaneous oil and gas drawing entry cards must be fully executed by the applicant and when the applicant omits a State prefix in the parcel number, the lease offer is properly rejected.

Where an applicant fails to include the State prefix of the parcel number on an oil and gas drawing entry card, he/she has not complied with 43 CFR 3112.2-1(a) which requires that the card be "fully executed" and such offer is properly rejected whether the defect is discovered before or after the drawing.

Ella C. Harris, 29 IBLA 259 (Mar. 25, 1977)

Gerald L. Christensen, Edward C. Green, 30 IBLA 303 (June 6, 1977)

Neither the filing of an over-the-counter oil and gas lease offer, nor the holding of a drawing of simultaneously filed offers to determine the first-qualified offeror, creates any right to a lease or any property rights in the offeror that diminish the Secretary's discretion whether or not to issue a noncompetitive oil and gas lease on a given tract.

James W. Canon et al., 1 SEC. 1 (Apr. 15, 1977) 84 I.D. 176

Except for establishing priority of filing, the drawing of an offer for a noncompetitive oil and gas lease creates no vested rights in the offeror. If subsequent to the filing of a noncompetitive oil and gas lease offer and prior to issuance of a lease the land described therein is determined to be in a known geological structure of a producing oil or gas field, the noncompetitive lease offer must be rejected.

Guy W. Franson, 30 IBLA 123 (May 12, 1977)

Simultaneous oil and gas drawing entry cards must be fully executed by the applicant and when the applicant omits a State prefix in the parcel number, the lease offer is properly rejected.

John P. Lewycky, 30 IBLA 127 (May 12, 1977)

Where an agent of an offeror for a simultaneous oil and gas lease signs the entry card by affixing a rubber-stamped facsimile of the offeror's signature, the requirements of 43 CFR 3102.6-1 apply and separate statements of interest by both offeror and the agent must be filed, or the offer will be rejected.

"Agent." The word "agent," as used in 43 CFR 3102.6-1, requiring statements of authority and disclosure of interests in oil and gas leases by agents, includes all persons or companies having discretionary authority to act on the offeror's behalf concerning the offer or lease.

D. E. Pack, 30 IBLA 166 (May 19, 1977) 84 I.D. 192

The presence in a drawing of simultaneously filed noncompetitive oil and gas lease offers of several entry cards signed by different offerors bearing the common mailing address of a leasing service which has an agreement to pay the first year rental for the account of any successful offeror utilizing its services does not, in the absence of an enforceable agreement under which the offeror is obligated to transfer any interest in any lease to be issued to the leasing service, establish an interest of the leasing service in the various lease offers constituting an improper multiple filing.

D. E. Pack, 30 IBLA 230 (May 26, 1977)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Drawings--Continued

In the absence of any irregularity connected with an offer, an oil and gas lease may be issued to an applicant who has stated that he personally stamped the drawing entry card with his facsimile signature.

Louis J. Boland, 30 IBLA 237 (May 27, 1977)

Louis J. Boland, 33 IBLA 269 (Jan. 5, 1978)

A simultaneous oil and gas lease offer is not fully executed and is properly rejected when the offeror fails to provide the full designation of the parcel by both number and letter prefix.

Ernest T. Squires, Teresita C. Squires, 30 IBLA 288 (June 1, 1977)

Where an oil and gas lease offer is signed by an agent on behalf of the offeror, the regulations with respect to qualifications of lessees require evidence of the authority of the agent and separate statements by the offeror and the agent regarding the nature and extent of any interest the agent has in the lease. The same requirement applies where the offeror's facsimile signature is affixed on the offer by an agent. An offer must be rejected where this information is not filed.

The Bureau of Land Management (BLM) has a responsibility to issue noncompetitive oil and gas leases only to the first-qualified offeror. A rubber-stamped or other form of facsimile signature, unlike a handwritten signature, does not give rise to a presumption that it was personally executed by the offeror. The BLM may inquire of the circumstances under which the signature was stamped on the offer to determine whether compliance with 43 CFR 3102.6-1 was required.

Charlotte L. Thornton, William M. Weaver, Jr., Robert L. Smith, 31 IBLA 3 (June 15, 1977)

Where an oil and gas lease offer filed on a drawing entry card in a simultaneous filing procedure contains the name of an additional party and the statements of interest, copy or explanation of the agreement between the parties, and evidence of the qualifications of the additional party are not filed within the time required by 43 CFR 3102.7, the offer must be rejected.

Michael J. Madigan, Robert K. Raines, 31 IBLA 58 (June 23, 1977)

Reproduction of the franked postal drawing entry card is not authorized and offers filed on copies of such form must be rejected. An offer will not be rejected for this reason when an examination of several cards submitted by the same offerors fails to establish that the cards were reproductions.

Where an agent of an offeror for a simultaneous oil and gas lease signs the entry card by affixing a rubber-stamped or other facsimile of the offeror's signature, the requirements of 43 CFR 3102.6-1 apply, and separate statements of interest by both offeror and the agent must be filed, or the offer will be rejected.

Ray H. Thames, 31 IBLA 167 (July 5, 1977)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Drawings--Continued

A first-drawn simultaneous drawing entry card which is filed by a partnership but which is not accompanied by statements required by the pertinent regulation or which does not refer to the file serial number of the record where the statements have previously been filed is defective and must be rejected.

Porcross Partners, 31 IBLA 181 (July 5, 1977)

A simultaneous drawing entry card which is filed with one name in the proper box for the name of the first offeror and a second name (that of offeror's husband) appears in the area below the space provided for the name of the second offeror as part of the first offeror's address and which is signed on the reverse by only the offeror is not prima facie defective and is not to be rejected as not "signed and fully executed," where the second name is not in proper order, is not supported by a social security number and the offeror and her husband state that he had no interest in the offer and that his name appeared on the address stamp which offeror used to place her address on the drawing entry card.

Bessie E. Landis, 31 IBLA 195 (July 6, 1977)

43 CFR Subpart 3112 renders invalid an over-the-counter oil and gas lease offer filed for lands in canceled or relinquished leases or leases which have terminated by operation of law, for such lands are subject to simultaneous offers only.

Robert S. Bickel, 31 IBLA 201 (July 6, 1977)

A simultaneous oil and gas offeror is properly disqualified under 43 CFR 3112.4-1 from receiving lease when she fails to pay the first year's rental within 15 days of receipt of the notice that such payment is due.

Where the check submitted in payment of the first year's rental for an oil and gas lease offer is dishonored by the drawee bank due to error on the part of the drawer, the offer is properly rejected in accordance with 43 CFR 3112.4-1.

Karen L. Brown, 31 IBLA 239 (July 12, 1977)

The fact that the addresses of the lease offeror and a filing service are identical merely indicates the use of a filing service and does not in itself give the offeror or agent a greater probability of successfully obtaining a lease or interest therein in violation of 43 CFR 3112.5-2.

E. R. Pack, 31 IBLA 283 (July 22, 1977)

A simultaneously filed oil and gas lease entry card is not to be rejected for the reason that the applicant signed the card and the parcel number was entered thereon subsequently by the applicant's employee, since the applicant, in signing the card, certifies as to all the requirements stated as of the date entered thereon, and agrees to be bound to a lease if the offer is successful.

Evelyn Chambers and Jerry Chambers, 31 IBLA 381 (Aug. 10, 1977)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Drawings--Continued

Where a drawing entry card sets out the names of two applicants but one applicant fails to sign the card, the card is not in compliance with 43 CFR 3112.2-1(a) which requires that the card be "fully executed," and the lease offer is properly rejected.

Fernando C. Santos, 32 IBLA 194 (Sept. 15, 1977)

A simultaneous oil and gas lease offer is properly rejected if it is unsigned or undated.

A signature on a drawing entry card cannot be imputed from a signature on another document.

When a first-drawn oil and gas lease offer is disqualified because it is unsigned or undated, the Department's equitable adjudication authority may not be invoked to divest the first-qualified drawee of his preference right to a lease.

One whose first-drawn oil and gas lease offer is disqualified because it is unsigned or undated cannot establish a right to a lease by showing that his failure to sign or date the card resulted from inadvertence, lack of knowledge, illness or other physical incapacity.

David L. Hansen, John L. Hurdle, John F. and Inez B. Cramer, 32 IBLA 272 (Sept. 27, 1977)

Where a check has been submitted with a drawing entry card in payment of the $10 filing fee for a simultaneous oil and gas lease offer, and the check is dishonored by the bank, the offeror loses his priority unless the refusal to honor the check was the result of a bank error, corroborated by the bank.

John Eldon Dean, 32 IBLA 336 (Oct. 18, 1977)

Jonathan T. Ames, 33 IBLA 1 (Nov. 14, 1977)

If a noncompetitive oil and gas lease is issued for a particular parcel of land, it must be issued to the first-qualified applicant. Under the simultaneous drawing procedures, a defective entry card must be rejected.

Failure to complete properly any information required on a simultaneous oil and gas lease drawing entry card renders the card defective and requires rejection of the offer based upon the mandatory requirements in 43 CFR 3112.2-1(a) that the card be "signed and fully executed." This requirement is strictly applied, and the omission of the day of the month from the date on the card renders the card defective.

Walter H. Sorensen, 32 IBLA 345 (Oct. 21, 1977)

Where an applicant incorrectly uses the wrong abbreviation for the State prefix of the parcel number on an oil and gas drawing entry card, she has not complied with 43 CFR 3112.2-1(a) which requires that the card be "fully executed" and her offer is properly rejected.

Marcia P. Lane, 33 IBLA 68 (Dec. 5, 1977)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Drawings--Continued

A simultaneous oil and gas lease offer is properly rejected where the applicant fails to provide the exact date the offer was signed by omitting the year.

Violet Kern, 33 IBLA 150 (Dec. 19, 1977)

An unsigned and undated drawing entry card filed in the simultaneous oil and gas leasing procedures must be rejected, despite assertions of excusable neglect or inadvertence.

Edna R. McCree and Harry R. McCree, 33 IBLA 235 (Dec. 28, 1977)

Where a corporation files an application for a lease for a certain parcel of land and is the successful offeror in the drawing and the president and/or the vice president of the corporation also filed applications for the same parcel of land in the same drawing as individuals, the offer of the corporation must be rejected because the officers of the corporation stand in a fiduciary relationship to the corporation and thereby increase its chances to be the successful applicant.

Graybill Terminals Co., 33 IBLA 243 (Jan. 5, 1978)

An oil and gas lease offer is properly rejected where the offeror's check to cover the filing fee is dishonored by the bank because of insufficient funds in the account on which the check is drawn.

Charles P. Ricci, 33 IBLA 288 (Jan. 5, 1978)

A simultaneously filed oil and gas lease offer is properly rejected where the offer is neither accompanied by a statement of corporate qualifications nor makes reference to a serial number of a record in which such statement had previously been filed, as required by 43 CFR 3102.4-1.

A first-drawn simultaneous drawing entry card which is defective because of noncompliance with a mandatory regulation must be rejected and may not be cured by submission of further information.

A simultaneous oil and gas lease offer is properly rejected when the date is omitted from the drawing card.

A simultaneous oil and gas lease offer is properly rejected where the drawing card is not signed. Where a corporation submits a drawing card which is not signed by a corporate officer whose authority to sign is established by the procedure set out in 43 CFR 3102.4-1, the card is not "signed" within the meaning of 43 CFR 3112.2-1(a), and its offer must accordingly be rejected. Placing the corporation's name in script on the signature line does not constitute "signing" the card.

Anchors and Holes, Inc., 33 IBLA 339 (Jan. 16, 1978)

Where an oil and gas lease offer on a drawing entry card is signed by the offeror and lists the names of 10 other parties in interest, and is accompanied by a separate statement signed by each of the 11 parties in interest declaring (1) their respective addresses, (2) that they are American citizens, (3) that they had an oral agreement to participate in the lease, (4) that they would own equally, and (5) that they do not have

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Drawings--Continued

direct or indirect interests in leases which exceed 246,000 in any one State, the requirements of 43 CFR 3102.7 have been satisfied and the lease may issue, all else being regular.

Morris M. Cohen et al., 33 IBLA 365 (Jan. 23, 1978)

An oil and gas drawing entry card may not be rejected merely because it is signed by the applicant before the parcel number is entered on it by another.

Adam F. Zbilski, 34 IBLA 4 (Feb. 8, 1978)

An offeror whose drawing entry card is drawn with first priority for a parcel of land properly available at the time of posting is entitled to receive an oil and gas lease, all else being regular.

Jack L. McClellan, Marton Majoros, 34 IBLA 53 (Feb. 16, 1978)

An oil and gas lease drawing entry card is properly rejected where it contains incorrect information, in that the parcel number of the land applied for is misstated, notwithstanding the fact that the misstatement was the result of an inadvertent typographical error.

Amerada Hess Corp., 34 IBLA 64 (Feb. 17, 1978)

A simultaneous oil and gas lease drawing entry card containing an incorrect parcel number is properly rejected and the filing fee is properly retained by the Bureau of Land Management.

Henry A. Alker, 34 IBLA 136 (Mar. 8, 1978)

Where the Director, BLM, in a general instruction to all Bureau offices, has specified which kinds of discrepancies will result in the exclusion of drawing entry cards from a drawing of simultaneously filed oil and gas lease offers, and directs that all other cards are to be included in the drawings, the action of one field office to exclude certain other types of cards will be reversed as being in contravention of such directive.

The exclusion from the drawing of oil and gas drawing entry cards for trivial and inconsequential alterations which do not affect the appearance or feel of the cards in any significant way and which obviously were not intended to adversely affect the integrity of the drawing is arbitrary and capricious.

Margaret A. Ruggiero et al., 34 IBLA 171 (Mar. 14, 1978)

W. C. Yahnel, 34 IBLA 377 (May 1, 1978)

Where it is shown that a bank erroneously dishonored a check drawn thereon, and an official of the bank admits that the payment was refused by mistake, the error of the bank will not vitiate the otherwise proper payment of the filing fee.

Charles P. Ricci (On Reconsideration), 34 IBLA 186 (Mar. 21, 1978)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Drawings--Continued

An offeror's use of a leasing service's address on a simultaneous noncompetitive oil and gas lease offer drawing entry card does not disqualify the offer.

An offeror who submits a drawing entry card signed on his behalf by his agent leasing service meets the requirements of 43 CFR 3102.6-1 if satisfactory agency statements by him and his agent are submitted along with his offer card.

Where an offeror and his agent filing service submit statements along with a drawing entry card, which statements indicate unequivocally that there is no agreement between them creating an interest in the agent, thus apparently obviating the need to submit details of the offeror/agent agreement per 43 CFR 3102.6-1, BLM, in its discretion, may either decline to inquire further into the details of the agreement or may request and examine a copy of the agreement to determine whether such an "interest" in the agent existed at the time the offer was filed.

Where there is no evidence in the administrative record that the offeror with first priority in a drawing of simultaneous noncompetitive oil and gas lease offers is not the sole party in interest, as stated by both the offeror and his agent, the burden is on a protestant attacking the validity of the offer to prove an accusation that the offeror/agent agreement gives the agent an enforceable interest in the lease to be issued.

"Interest." Where there is an agreement giving an offeror the option of selling part of an oil and gas lease to his agent leasing service, exercisable solely at the offeror's discretion, the agent has a mere hope or expectancy and not an "interest" in the offer, as defined in 43 CFR 3100.0-5(b).

Virginia L. Jones, 34 IBLA 188 (Mar. 21, 1978)

Strict compliance with 43 CFR 3112.2-1, which provides that simultaneous oil and gas drawing entry cards be signed and fully executed by an applicant or his agent, is required. Where no date of signing appears on an entry card, the offer is properly rejected.

Jack L. Macdowell, 34 IBLA 202 (Mar. 22, 1978)

John G. Keese, 37 IBLA 364 (Nov. 2, 1978)

Where it is first alleged on appeal that a first-drawn simultaneous oil and gas entry card has been rejected in order for the lease to be awarded to the offeree first drawn in a prior drawing, which prior drawing was void because of an omitted entry card, but the record as to the second drawing is incomplete and an affected party has not been given opportunity to participate, the case may be remanded for augmentation of the record and initial consideration by Bureau of Land Management.

W. J. Langley, 34 IBLA 213 (Mar. 27, 1978)

Where an officer of a business enterprise files oil and gas lease drawing entry cards for a parcel on behalf of both his company and himself, the business gains a greater probability of success than other entrants, owing to the officer's fiduciary duty to hold the lease for the company's exclusive use and benefit, thereby warranting rejection of the lease offers of both the company and the officer per 43 CFR 3112.5-2.

William B. Kosha, 34 IBLA 216 (Mar. 27, 1978)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Drawings--Continued

A lease erroneously issued in violation of regulations which prohibit leasing fractional interests to one who would own only a minority of operating rights in the leased property must be canceled if a lease is awarded to another applicant in a drawing held among the first and other offers simultaneously filed following repeal of the regulations.

Wilfred Plomis, 34 IBLA 222 (Mar. 27, 1978)

The Department of the Interior may only issue an oil and gas lease to the first-qualified applicant, and a drawing entry card offer is properly rejected where it lists a second party in interest who fails to file timely the statement required by 43 CFR 3102.7.

Roy M. Waer, Robert A. Griggs, 34 IBLA 237 (Mar. 28, 1978)

An entry card in a simultaneous oil and gas lease drawing need not be rejected where the card sets out in the parcel designation the complete name of the State in which the parcel is located instead of the abbreviation of the State name used as the State code prefix. All else being regular, such an entry card is fully executed.

Clayton Chessman, 34 IBLA 263 (Mar. 31, 1978)

Douglas Steele, 34 IBLA 344 (Apr. 26, 1978)

J. C. Davis, 35 IBLA 92 (May 12, 1978)

Where an attorney-in-fact or an agent does not sign the drawing card which is signed by the offeror, the showings as to the agent embodied in 43 CFR 3102.6-1 need not be submitted.

Elias C. Bacil, 34 IBLA 322 (Apr. 24, 1978)

A simultaneous oil and gas drawing entry card must be fully executed by the applicant, and when the State prefix to the parcel number is omitted, the lease offer is properly rejected.

Richard Wheeler, Jr., 34 IBLA 359 (May 1, 1978)

Offeror's failure to enter postal zip code of his address on entry card for simultaneous oil and gas lease drawing properly results in BLM's rejecting his offer. Such omission contradicts requirement in 43 CFR 3112.2-1(a) that entry card be "fully executed."

William K. DuKate, 35 IBLA 51 (May 9, 1978)

Where an attorney-in-fact or an agent does not sign the drawing card, the showings as to the agent embodied in 43 CFR 3102.6-1 need not be submitted.

Elias C. Bacil, 35 IBLA 198 (May 24, 1978)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Drawings--Continued

An over-the-counter oil and gas lease offer filed for land formerly embraced in an oil and gas lease which has expired by operation of law, which land has not been placed on the list of lands available for the filing of simultaneous oil and gas lease offers under 43 CFR Subpart 3112, must be rejected.

David A. Provinse, 35 IBLA 217 (May 26, 1978)

When, in a drawing of simultaneously filed oil and gas lease offers, the first-drawn offeror is notified to submit the advance rental, that rental must be received by the proper office within the prescribed 15 days. Automatic disqualification may not be avoided by allegations that delivery was delayed by the postal service, as the rule is that the postal authorities are the agents of the sender in such cases.

Where BLM records show that the first-drawn applicant for an oil and gas lease paid his rental 1 day late, and is therefore disqualified, there is a legal presumption of regularity which supports the official acts of public officers and the proper discharge of their official duties.

Where a first-drawn oil and gas applicant offers evidence to show that his first year's advance rental was mailed sufficiently in advance so that, even if delayed, it would have arrived within the prescribed time, a legal presumption is raised that the payment was timely delivered.

Where, in a drawing of simultaneously filed oil and gas lease offers, the first-drawn applicant fails to submit his advance rental within 15 days after notice, as prescribed by 43 CFR 3112.4-1, disqualification is automatic, and no excuse may be considered, no discretion exercised, no grace period invoked, and the right of the next drawee to receive first consideration attaches *eo instante*.

Donald E. Jordan, 35 IBLA 290 (June 2, 1978)

The mere use of a filing service's address on a simultaneous oil and gas lease drawing entry card does not constitute a violation of the applicable statutes or of any Departmental regulations, is not otherwise impermissible and is not a ground for rejecting the card.

Marion Bacil, 35 IBLA 366 (June 23, 1978)

Where the Director of the Bureau of Land Management issues a general instruction to all BLM offices specifying which kinds of discrepancies will result in the exclusion of drawing entry cards from a drawing of simultaneously filed oil and gas lease offers and directing that all other cards are to be included in the drawings, the action of one field office to exclude certain other types of cards will be reversed as being in contravention of such directive.

The exclusion of drawing entry cards from a simultaneous oil and gas lease drawing for trivial and inconsequential alterations which do not affect the appearance or feel of the cards in any significant way and which obviously were not intended to adversely affect the integrity of the drawing is arbitrary and capricious.

It is arbitrary and capricious for a BLM State Office to reject a drawing entry card, drawn with first priority, because of trivial corrections on the card by means of an opaque "white-out" liquid which does not affect the appearance or feel of the card in any significant way and which corrections obviously were not

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Drawings--Continued

intended to adversely affect the integrity of the drawing.

Raymond A. Perry et al., 35 IBLA 386 (June 27, 1978)

Where a drawing entry card is signed by an attorney-in-fact or agent on behalf of the applicant, the offer cannot be considered to have been submitted by a qualified applicant unless accompanied by a statement evidencing that the attorney-in-fact's authority is still in effect, as required by 43 CFR 3102.6-1.

Energy Reserves Group, Inc., 36 IBLA 57 (June 30, 1978)

An offeror's use of a leasing service's address on a simultaneous noncompetitive oil and gas lease offer drawing entry card does not disqualify the offer.

Where there is no evidence in the administrative record that the offeror with first priority in a drawing of simultaneous noncompetitive oil and gas lease offers is not the sole party in interest, the burden is on a protestant attacking the validity of the offer to prove an accusation that there is an agreement giving the filing service an enforceable interest in the lease to be issued.

Clyde E. Frazier, 36 IBLA 141 (July 25, 1978)

An offeror's use of a leasing service's address on a simultaneous noncompetitive oil and gas lease offer drawing entry card does not disqualify the offer.

Bruce E. Watkins, 36 IBLA 168 (July 31, 1978)

Unsigned and undated drawing entry cards filed in the simultaneous oil and gas leasing drawings must be rejected. An oil and gas lease offer is not accepted by the United States until a lease is executed and signed by the appropriate officer.

S. Duff Kerr, 36 IBLA 199 (Aug. 3, 1978)

It is proper to reject a drawing entry card lease offer, given first priority at a drawing, where the name of the offeror is affixed to the card by means of an address label, instead of being inserted in the appropriate spaces of the card in this order: last name, first name, middle initial.

Irving D. Brick, 36 IBLA 235 (Aug. 8, 1978)

A simultaneously filed offer to lease for oil and gas is properly rejected where the offeror fails to complete the drawing entry card by filling in the name of the State in which he resides.

Sam Powell, 36 IBLA 273 (Aug. 21, 1978)

A simultaneous oil and gas drawing entry card must be fully executed by an applicant, and where the applicant omits from her address, the State and zip code, the lease offer is properly rejected.

Rita D. Vick, 36 IBLA 275 (Aug. 21, 1978)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Drawings--Continued

A simultaneous oil and gas drawing entry card must be fully executed by the applicants and when they omit their address, the lease offer is properly rejected notwithstanding assertions of excusable neglect or inadvertence.

Burton A. Rykken et al., 36 IBLA 277 (Aug. 21, 1978)

Unsigned and undated drawing entry cards filed in the simultaneous oil and gas leasing drawings must be rejected. The calling out of the No. 1 drawee's name does not constitute acceptance of the offer. Acceptance of the offer cannot accrue until the lease itself has been executed by the appropriate official of the Government.

S. Duff Kerr, 36 IBLA 302 (Aug. 21, 1978)

Darrell J. Sekin, 40 IBLA 156 (Mar. 30, 1979)

When the president of a corporation is the successful offeror in a drawing of simultaneous oil and gas lease offers and the vice president and the corporation also file applications for the same parcel of land in the same drawing, the president's offer must be rejected because the officers of the corporation stand in a fiduciary relationship to the corporation, thereby increasing its chances to be the successful applicant under 43 CFR 3112.5-2.

William R. Bobbe, 36 IBLA 346 (Aug. 28, 1978)

The mere use by an offeror of a filing service's address on a drawing entry card does not violate any applicable statute or regulation and, therefore, is not a ground for rejecting the card.

A handwritten signature is presumed to be written by the person named. Where an attorney-in-fact or an agent does not sign a drawing entry card, the provisions of 43 CFR 3102.6-1 are not invoked.

The burden is on the protestant to prove by competent evidence justification for the disqualification of the successful drawee in an oil and gas lease offer simultaneous filing. Mere allegations are insufficient.

William Miller, 36 IBLA 349 (Aug. 28, 1978)

When a person files two oil and gas lease offers for a single parcel in the simultaneous oil and gas leasing procedure, one as a joint applicant with the spouse and another as the sole applicant, the applicable regulation, 43 CFR 3112.2-1(a)(2), requires rejection of both offers regardless of whether there was any intent to file more than one offer or to profit from any multiple filing.

Robert Hickman, et ux., 36 IBLA 353 (Aug. 28, 1978)

A simultaneously filed oil and gas lease offer is properly rejected where the offer is neither accompanied by a statement of qualifications nor makes reference to a serial number of a record in which such statement has previously been filed, as required by 43 CFR 3102.4-1.

NTL Investment Corp., 36 IBLA 355 (Aug. 31, 1978)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Drawings--Continued

The fact that the addresses of the lease offeror and a filing service are identical merely indicates the use of a filing service and does not thereby disqualify the offer.

Dexter B. Spalding, 37 IBLA 4 (Sept. 6, 1978)

The burden is on a protestant to show, as justification for the disqualification of the successful drawee in a simultaneous filing drawing procedure, that the offer is in fact defective. A suggestion of the possibility of violation of a regulation is not sufficient; a protestant must present competent proof of such violation. Absent an adequate showing of disqualification, a protest alleging disqualification is properly rejected.

Lillian Sweet, 37 IBLA 25 (Sept. 14, 1978)

Established and longstanding Departmental policy relating to the administration of the simultaneous oil and gas leasing system is binding on all employees of the Bureau of Land Management, until such time as it is properly changed.

The simultaneous drawing system presupposes that each properly filed offer be afforded the same opportunity for priority consideration. This requires that when drawing entry cards are improperly omitted from a drawing, the first drawing be considered as void, and priorities established at a second drawing, in which all entry cards are included, shall control consideration for the oil and gas lease.

Milton D. Feinberg, Benson J. Lamp, 37 IBLA 39 (Sept. 18, 1978) 85 I.D. 380

A first-drawn simultaneous oil and gas lease offer filed by a partnership which is signed by one agent where the partnership agreement authorizes two or more agents, jointly, to file simultaneous oil and gas lease offers, is not signed by an "authorized" agent, as required by 43 CFR 3112.2-1(a), and must be rejected. A grant of authority to "A and B," without more, will be deemed to create a joint agency.

SID Partnership, 37 IBLA 165 (Oct. 10, 1978)

A simultaneously filed oil and gas lease offer listing the name of an individual and a corporation as applicants, on the front of the card and also on reverse signature side, is properly rejected where no statement of qualifications or corporate reference number accompanies the card as required by 43 CFR 3102.4-1. This defect cannot be cured after the drawing by the individual's subsequently filing a statement that the corporation has no interest in the offer, and was merely designated for address purposes only.

George E. Mattison, 37 IBLA 193 (Oct. 11, 1978)

When a married woman signs her name, "Mrs. Hal McCarthy," as offeror on a drawing entry card oil and gas lease offer, and prints her full name "Geraldine M. McCarthy" on the face of the card, the card may not be rejected because she violated no regulation by signing the offer in that manner, and she followed the instructions on the face of the card by giving her first name and initial.

Geraldine M. McCarthy, 37 IBLA 323 (Oct. 25, 1978)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Drawings--Continued

Where a drawing entry card form of offer to lease a parcel of land for oil and gas is prepared by a person or corporation having discretionary authority to act on behalf of the named offeror, and the offer is signed by such agent or attorney-in-fact on behalf of the offeror, the requirements of 43 CFR 3102.6-1 apply, so that separate statements of interest by both the offeror and the agent must be filed, regardless of whether he signed his principal's name or his own name as his principal's agent or attorney-in-fact, and regardless of whether the signature was applied manually or mechanically.

I. E. Pack (On Reconsideration), 38 IBLA 23 (Nov. 5, 1978) 85 I.D. 408

Gertrude H. D'Amico, 39 IBLA 68 (Jan. 17, 1979)

E. D. Delasco, Inc., et al., 39 IBLA 194 (Feb. 2, 1979)

J. A. Masek, 40 IBLA 123 (Mar. 27, 1979)

Blanche V. White, 40 IBLA 152 (Mar. 30, 1979)

Bernard Evans, 43 IBLA 292 (Oct. 17, 1979)

A drawing entry card which is not dated in the space provided on the card is not "fully executed," as required by 43 CFR 3112.2-1, and must be rejected, notwithstanding an allegation that the date of signing might have been deduced from a check accompanying the offer or from the postmark of the envelope in which the offer was submitted.

Theodore R. Kuhn, 38 IBLA 135 (Nov. 29, 1978)

Ronald Miller, 40 IBLA 193 (Apr. 5, 1979)

Ronald Miller, 43 IBLA 4 (Sept. 11, 1979)

"Interest." Where a partner in a firm, or business associate, or an officer of a corporation which is engaged in the oil and gas business, files an oil and gas lease offer individually in his own name, the partnership/ corporation/association may have a claim to any benefits accruing to the individual from the lease, owing to the partnership agreement, corporate by-laws, or personal contract, due to the partner's/officer's/ associate's fiduciary duty to hold any opportunity obtained individually for the exclusive use and benefit of the firm. This claim is an "interest" under 43 CFR 3100.0-5(b), and failure to disclose it within 15 days of the filing of the offer, as required by 43 CFR 3102.7, subjects the offer to rejection.

Where an oil and gas lease offeror has indicated that he is the sole party in interest in the offer, but a protestant shows that he is a member of a firm which bears his name and the name of another, that the firm is engaged in the oil business, and that the address of record on the lease offer is the address of the business firm, the case will be remanded for an investigation to ascertain if there has been a violation of 43 CFR 3102.7 and/or 43 CFR 3112.5-2.

Johnnie B. Gryder, 38 IBLA 146 (Dec. 5, 1978)

Even though a power of attorney has been filed with the State Office of the Bureau of Land Management and reference to this was included on a simultaneously filed oil and gas lease drawing entry card, the regulations require that the attorney-in-fact or agent file two additional statements along with the card: first, a statement that his authority is still in effect as

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Drawings--Continued

required by 43 CFR 3102.6-1(a)(1), and second, a statement by the attorney-in-fact or agent about his agreement with the offeror and any interest in the lease pursuant to 43 CFR 3102.6-1(a)(2).

A noncompetitive oil and gas lease may only be issued to the first-qualified applicant. A first-drawn drawing entry card oil and gas lease offer signed by an agent but which is not accompanied by the statements required by regulation must be rejected because the offeror is not the first-qualified applicant.

Cotton Petroleum Corp., 38 IBLA 271 (Dec. 13, 1978)

Where eight individuals enter into a single agreement with a leasing service whereby the service supplies parcel numbers, and the eight individuals file offers on two of these parcels and pay all their filing fees by a single check, there is a strong implication that each of the individuals has an interest in all of the offers filed on these parcels. Where one of these individuals, whose offer has resulted in the issuance of a lease, fails to respond to an order by this Board directing him to submit details of the agreement between himself and the other individuals by which to determine whether the requirements of 43 CFR 3102.6-1 and 3112.5-2 have been violated, it will be presumed that the indicated violations have occurred, and the cancellation of the lease will be affirmed on that basis.

Robert A. Chenoweth, 38 IBLA 285 (Dec. 13, 1978)

A protest against the issuance of an oil and gas lease is properly dismissed where it is based on vague allegations of impropriety in a relationship between a leasing service and its client and is unsupported by facts showing that the successful drawee should have been disqualified, as the protestant has failed to meet his burden of showing with competent evidence that there has been a violation of applicable regulations which would disqualify the offer.

Geosearch, Inc., 39 IBLA 49 (Jan. 16, 1979)

Geosearch, Inc., 40 IBLA 267 (Apr. 18, 1979)

Under 43 CFR 3112.1-2, if an offeror wishes to participate in a simultaneous drawing procedure, the drawing entry card must be received in the local Bureau of Land Management office within the time allotted therefor.

Bertram F. Rudolph, Jr., 39 IBLA 78 (Jan. 24, 1979)

Where the Director, Bureau of Land Management, has specified which kinds of discrepancies will result in the exclusion of drawing entry cards from a drawing of simultaneously filed oil and gas lease offers, and directs that all other cards are to be included in the drawings, the action of one field office to exclude certain other types of cards will be reversed as being in contravention of such directive.

Oil and gas drawing entry cards may not be excluded from a drawing for trivial and inconsequential alterations which do not affect the appearance or feel of the cards in any significant way and which were not intended to adversely affect the integrity of the drawing.

Helen E. Serencha, 39 IBLA 318 (Feb. 23, 1979)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Drawings--Continued

Under 30 U.S.C. § 226 (1976), the Department has no authority to issue an oil and gas lease to other than the first-qualified applicant, and if an agent signs an offer for an applicant, the applicant cannot be considered qualified unless the statements required by 43 CFR 3102.6-1 have been timely filed.

Where a rubber stamp is used to imprint an applicant's signature, and where no agent's statement has been submitted under 43 CFR 3102.6-1, a State Office may take appropriate action to establish whether the applicant's signature was imprinted at his request and whether he formulated the offer.

William L. Hogge, Jr., 39 IBLA 332 (Feb. 27, 1979)

A first-drawn simultaneous drawing entry card which is defective because of noncompliance with a mandatory regulation must be rejected and may not be cured after the drawing is held.

Elizabeth Fagedas (On Reconsideration), 40 IBLA 23 (Mar. 9, 1979)

An offeror's use of a leasing service's address on a simultaneous noncompetitive oil and gas lease offer drawing entry card does not disqualify the offer. A leasing service bound by a "put option" does not have a hidden interest in the offer and does not violate 43 CFR 3102.7 by failing to disclose this put option or 43 CFR 3112.5-2 by filing offers for more than one client on a parcel.

C. E. Pack, 40 IBLA 45 (Mar. 15, 1979)

Where a drawing entry card is submitted in a simultaneous oil and gas lease drawing and signed by multiple offerors, the offer is properly rejected if even a single offeror fails to enter the date of his signature on the drawing entry card.

The requirement set forth in 43 CFR 3112.2-1(a) (1977) that a drawing entry card be fully executed is not vague or unclear. Hence, a DEC signed by multiple offerors is properly rejected if even a single offeror fails to enter the date on the drawing entry card.

The date of each signature on a drawing entry card is important, because it shows that on that particular date, the offerors, by their respective signatures, certify, as to each, all the statements made on the card.

Thomas B. Flickinger, William S. Flickinger, et al., 40 IBLA 53 (Mar. 16, 1979)

An entry card in a simultaneous oil and gas lease drawing need not be rejected under 43 CFR 3112.2-1(a) where the State prefix of the parcel number is placed on the card immediately below the boxes provided for designation of the parcel number.

L. Alice Collister, 40 IBLA 71 (Mar. 16, 1979)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Drawings--Continued

The first-drawn entry card of a corporation which has failed to comply with the regulations governing qualifications must be rejected.

University of the Trees, 40 IBLA 78 (Mar. 16, 1979)

Where, in a drawing of simultaneously filed noncompetitive oil and gas lease offers, an offer is filed by a trustee on behalf of a minor child, and another offer for the same land is filed by the parent of that child, and the parent has an interest in the child's offer, this interest effectively gives the parent greater chances of success in the drawing and is inherently unfair, regardless of whether there has been collusion or intent to deceive the Department.

Where separate trusts are created for siblings, and the trust agreements provide for a contingent distribution of the assets from the estate of one or more trusts of decedents into the trust estates of the survivors, each of the beneficiaries of the separate trusts has an "interest" in any oil and gas lease or offer as that term is defined in 43 CFR 3100.0-5(b), and the simultaneous filing of lease offers by more than one such trust for the same parcel is therefore violative of the regulation which prohibits the filing of multiple offers. 43 CFR 3112.5-2.

Farrell L. Lines (Trustee) and Winston Trust, 40 IBLA 91 (Mar. 27, 1979)

A drawing entry card in a simultaneous oil and gas lease filing need not be rejected where the card sets out as part of the parcel designation the complete name of the State in which the parcel is located instead of the abbreviated State code prefix.

Ed Pendleton, 40 IBLA 103 (Mar. 27, 1979)

Established and longstanding Departmental policy relating to the administration of the simultaneous oil and gas leasing system, premised upon regulatory interpretation, is binding on all employees of the Bureau of Land Management, until such time as it is properly changed.

The essential requirement of the simultaneous oil and gas leasing system is that all properly filed offers be afforded equal opportunity to obtain a lease. Where a system effectively excludes a lease offer from consideration, such a system is arbitrary and capricious.

Milton D. Feinberg, Benson L. Lamp (On Reconsideration), 40 IBLA 222 (Apr. 11, 1979) 86 I.D. 234

Where a drawing entry card is submitted in a simultaneous oil and gas lease drawing and signed by multiple offerors, the offer is properly rejected if even a single offeror fails to enter the date of his signature on the drawing entry card.

The requirement set forth in 43 CFR 3112.2-1(a) that a drawing entry card be fully executed is not vague or unclear. Hence, a DEC signed by multiple offerors is properly rejected if even a single offeror fails to enter the date on the drawing entry card.

Pamela W. Kay, Henry H. Greer, Gregory Montgomery, Franklin J. Sands, 40 IBLA 240 (Apr. 16, 1979)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Drawings--Continued

Where a drawing entry card offer to lease is prepared by an agent, that is, a person or corporation having discretionary authority to act on behalf of the named offeror, and the offer is signed by such agent on behalf of the offeror, the requirements of 43 CFR 3102.6-1 apply, so that separate statements of interest by both the offeror and the agent must be filed, regardless of whether the latter signed his principal's name or his own name as his principal's agent, and regardless of whether the signature was applied manually or mechanically.

L. R. Dunn, 40 IBLA 335 (May 8, 1979)

The fact that the addresses of an oil and gas lease offeror and a filing service are identical does not disqualify the offer or afford the offeror or filing service a greater probability of successfully obtaining a lease or interest therein in violation of 43 CFR 3112.5-2.

Where there is no evidence in the record that the offeror with first priority in a simultaneous oil and gas lease drawing is not the sole party in interest, a protest alleging an interest in a filing service may properly be dismissed.

Joseph J. O'Keefe, 40 IBLA 378 (May 14, 1979)

Where BLM does not reject simultaneous noncompetitive oil and gas lease offers drawn with second priority after the issuance of the leases to the first drawees, the second drawees retain an interest which must be considered if the leases are canceled because the first drawees' offers are defective, provided that the leases have not been assigned to bona fide purchasers. In those circumstances, BLM's decision dismissing the second drawees' protests against the continued validity of these leases for lack of interest must be vacated.

Geosearch, Inc., 40 IBLA 397 (May 14, 1979)

Geosearch, Inc., 41 IBLA 291 (June 28, 1979)

When a person files two oil and gas lease offers for a single parcel in the simultaneous oil and gas leasing procedure, as a joint applicant with the spouse, the applicable regulation, 43 CFR 3112.2-1(a)(2), requires rejection of both offers, regardless of the order in which the names of the two spouses are listed on the two cards.

Maurine L. and Howard R. Pettibon, 41 IBLA 23 (May 22, 1979)

Where separate statements of interest are required pursuant to 43 CFR 3102.6-1(a)(2) (1977), this Board must affirm the dismissal of a protest against the issuance of an oil and gas lease which is premised on the protestant's contention that the statement of the offeror must bear his original, holographic signature.

Although a lease offer may not be rejected solely because an agent affixed the offeror's facsimile signature to the offeror's separate statement, this does not prevent BLM from requiring that the offeror personally verify the information contained therein and provide whatever supplemental information may reasonably be required. A private agent may not interpose himself between a lease applicant and the Government

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Drawings--Continued

so as to mask the identity of the applicant and prevent direct contact by Federal officials who are properly concerned.

W. H. Gilmore, 41 IBLA 25 (May 29, 1979)

It is not proper to reject a drawing entry card oil and gas lease offer solely because an agent affixed the offeror's facsimile signature to both the DEC and to the offeror's separate statement required by 43 CFR 3102.6-1, as BLM may require that the offeror personally verify the information contained in the offer and in the statement, and provide whatever supplemental information that BLM may reasonably require.

Where a drawing entry card is submitted in a simultaneous oil and gas lease drawing and is signed by multiple offerors, the offer is properly rejected if even a single offeror fails to enter the date of his signature on the drawing entry card.

Robert E. Coen et al., 41 IBLA 55 (May 31, 1979)

Strict compliance with 43 CFR 3112.2-1 which provides that simultaneous oil and gas drawing entry cards be signed and fully executed by an applicant or his agent is required.

A simultaneous oil and gas lease offer is properly rejected where the State prefix to the parcel number on an oil and gas drawing entry card is omitted.

A simultaneous oil and gas lease offer is properly rejected where the drawing entry card is not dated.

C. E. Coster Gerard, 41 IBLA 74 (May 31, 1979)

Strict compliance with 43 CFR 3112.2-1, which provides that simultaneous oil and gas drawing entry cards be signed and fully executed by an applicant or his agent, is required. Where no date of signing appears on an entry card, the offer is properly rejected.

The burden of signing and fully executing a drawing entry card rests on the applicant. Reliance on instructions provided by a non-governmental filing service does not excuse the failure to fully execute a card.

Walter D. Moore, Jr., 41 IBLA 95 (June 4, 1979)

When, in a drawing of simultaneously filed oil and gas lease offers, the first-drawn offeror is notified to submit the first year's advance rental, that rental must be received by the proper office within the prescribed 15 days. Automatic disqualification, stemming from failure to pay timely, will not be avoided by allegations that payment was mailed far enough in advance to arrive at BLM timely.

American Petrofina Co. of Texas, 41 IBLA 126 (June 13, 1979)

An offeror who submits a drawing entry card signed on his behalf by his agent leasing service meets the requirements of 43 CFR 3102.6-1 if satisfactory agency statements by him and his agent, such statements bearing a facsimile signature, are submitted along with his offer card.

"Interest." Where there is an agreement giving an offeror the option of selling part of an oil and gas lease to his agent leasing service, exercisable solely at the offeror's discretion, the agent has a mere hope or expectancy and not an "interest" in the offer, as defined in 43 CFR 3100.0-5(b). A leasing service, which files a simultaneous noncompetitive oil and gas lease offer drawing entry card on behalf of its client, bound by a "put option" does not have a hidden interest in the offer and does not violate 43 CFR 3102.7 by failing to disclose this put option or 43 CFR 3112.5-2 by filing offers for more than one client on a parcel.

Where there is no evidence in the administrative record that the offeror with first priority in a drawing of simultaneous noncompetitive oil and gas lease offers is not the sole party in interest, as stated by both the offeror and his agent, the burden is on a protestant attacking the validity of the offer to present evidence of an accusation that the offeror/agent agreement gives the agent an enforceable interest in the lease to be issued.

Jack Mask, 41 IBLA 147 (June 18, 1979)

Kelley Everetts, 41 IBLA 155 (June 18, 1979)

A decision by BLM rejecting a noncompetitive oil and gas lease drawing entry card offer because someone other than the offeror affixed a facsimile of the offeror's signature on the card and agency statements were not filed as required by 43 CFR 3102.6-1 will be vacated where BLM bases its finding to this effect on a statement made by the offeror 6 months previously concerning the preparation of other, earlier offers, and where the offeror alleges on appeal that she actually affixed the facsimile herself on the offer in question.

Miriam Feizman (Barrett), 41 IBLA 166 (June 18, 1979)

A handwritten signature may be presumed to be written by the person named. Where an attorney-in-fact or an agent does not sign a drawing entry card, the provisions of 43 CFR 3102.6-1 are not invoked.

The fact that the addresses of the lease offeror and a filing service are identical merely indicates the use of a filing service and does not in itself give the offeror or agent a greater probability of successfully obtaining a lease or interest therein in violation of 43 CFR 3112.5-2.

Where there is no evidence of any violation of the regulations in the record, the burden is on the protestant to submit competent evidence of an accusation that there is an agreement giving a filing service an enforceable interest in the lease, absent which the protest is properly rejected. Allegations that there was a contract between the offeror and a filing service in which the filing service withholds an overriding royalty interest from the offeror and participates in the proceeds, without evidence, is not sufficient to show that the offeror was not a sole party in interest.

Where the purchaser of an oil and gas lease asserts that he purchased the lease from the offeror whose drawing entry card was drawn with first priority, for cash consideration without knowledge of any irregularities or violation of the regulations, he is considered

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Drawings--Continued

to be a bona fide purchaser, and his lease is not subject to cancellation unless prima facie evidence is presented to the contrary.

J. Theodore Ellis, D. E. Pack, 41 IBLA 231 (June 27, 1979)

Where oil and gas lease offerors enclose agency statements with their drawing entry cards, which statements are clearly intended to, and appear to, apply to their offers, their cards are fully executed notwithstanding their failure to note on the face of the cards that the agency statements are enclosed, as nothing in the regulations or on the card directs an offeror to do so.

Nothing in the regulations requires an agency statement submitted under 43 CFR 3102.6-1(a) to be dated. Rather, the statement is an adjunct to the drawing entry card and is considered dated as of the signing and dating of the card.

An agency statement required by 43 CFR 3102.6-1(a) need not be holographically signed. Rather, such statements may be submitted over facsimile signatures.

Frederick T. Peters et al., 41 IBLA 262 (June 28, 1979)

It is proper to reject a drawing entry card lease offer, given first priority at a drawing, where the name of the offeror is affixed to the card first name, middle initial, last name, not in the appropriate spaces, by means of a rubber stamp, instead of being inserted in the appropriate spaces of the card in this order: last name, first name, middle initial.

Gordon M. Blair, 41 IBLA 288 (June 28, 1979)

When an offer for a noncompetitive oil and gas lease is submitted by the trustee of a discretionary trust and an offer for the same parcel is submitted by the beneficiary of that trust, a multiple filing has occurred contrary to 43 CFR 3112.5-2 (1978). The "agreement, scheme, or plan" specified by this regulation need not exist between the trustee and the beneficiary of the trust. A plan or agreement, such as the provisions of a trust, whose purpose is to benefit a third party is sufficient to come within the meaning of the regulation.

James H. Turner (Trustee), Sara Ann Lawrence Trust, 41 IBLA 360 (July 20, 1979)

A first-drawn entry card creates no vested right therein; the offeror gains merely a right of priority in consideration. The Department is authorized to accept only the offer of the first-qualified applicant, one who has fully complied with all mandatory regulations.

Harry A. Zuckerman et al., 41 IBLA 372 (July 23, 1979)

Where offers for the same parcel of land are filed by two corporations in a simultaneous oil and gas lease drawing, and where the directors of the first corporation having authority to file offers and execute leases are directors of the second with the same authority and the surrounding circumstances suggest that the corporations are interrelated, the drawing is inherently unfair and the offers are properly rejected as a prohibited multiple filing. Collusion or intent to deceive the Department need not be shown.

June Oil and Gas, Inc., Cook Oil and Gas, Inc., 41 IBLA 394 (July 24, 1979) 86 I.D. 374

An oil and gas lease may be awarded to the first-qualified applicant only. The regulations governing qualifications are mandatory, and strict compliance therewith is required.

A defective drawing card offer for an oil and gas lease is not curable by submission of required evidence of qualifications after the drawing, for the reason that the rights of the second- and third-drawn qualified offerors have intervened. Where appellant's offer was third drawn and eventually accorded priority and then ultimately disqualified, the parcel described therein must be included in a subsequent list of lands available for simultaneous filing.

Don C. Bell II (Trustee), 42 IBLA 21 (July 25, 1979)

Where an offeror submits two drawing entry cards on a parcel, both cards are properly disqualified. It is irrelevant that there was actually only one card in the drawing due to BLM's rejection of the other, before the drawing, as defective for another reason, as it is the submission of more than one card per parcel which is prohibited under 43 CFR 3112.2-1(a)(2).

Mae B. Colvin, 42 IBLA 266 (Aug. 27, 1979)

43 CFR 3112.2-1 requires that simultaneous oil and gas drawing entry cards (DEC's) be "signed and fully executed" by the applicant or his agent which includes identifying the leasing units on the DEC's by correct parcel number. Strict compliance with the regulation is necessary and offers will be rejected where the applicant omits leading zeros from the parcel numbers on his DEC's.

Bertram F. Rudolph, Jr., 42 IBLA 310 (Aug. 29, 1979)

A drawing entry card which is not dated in the space provided on the card is not "fully executed," as required by 43 CFR 3112.2-1, and must be rejected.

Donald E. Bonington, 42 IBLA 380 (Sept. 11, 1979)

A simultaneously filed drawing entry card which is first drawn is properly rejected where the corporate offeror has improperly referred to the serial number where its statement of corporate qualifications was on file by omitting the letter prefix which showed which State Office had custody of the prior-filed statement of qualifications.

BLM personnel may not attempt to "correct," complete, or interpret entries on oil and gas lease offer application forms in such a way as to perfect an otherwise unacceptable application, nor may an applicant "cure" a defect on his drawing entry card by the submission of supplemental information after the drawing.

Resources Exploration & Mining, Inc. (On Reconsideration), 43 IBLA 89 (Sept. 19, 1979)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Drawings--Continued

It is not proper to reject a drawing entry card oil and gas lease offer solely because an agent affixed the offeror's facsimile signature to both the DEC and to the offeror's separate statement required by 43 CFR 3102.6-1, as BLM may require that the offeror personally verify the information contained in the offer and in the statement, and provide whatever supplemental information that BLM may reasonably request. An agency statement required by 43 CFR 3102.6-1(a) need not be holographically signed.

Frances B. Dunn et al., 43 IBLA 242 (Oct. 10, 1979)

An offeror's use of a leasing service address on a drawing entry card, of itself, does not disqualify the offer.

Where there is no evidence in the administrative record that the offeror with first priority in a drawing of simultaneous noncompetitive oil and gas lease offers is not the sole party in interest, as stated by both the offeror and his agent, the burden is on a protestant attacking the validity of the offer to present competent evidence supporting the accusation that there is an agreement giving the agent an enforceable interest in the lease to be issued. In absence of such evidence, the protest is properly rejected.

Alice M. Hardy, 44 IBLA 5 (Nov. 6, 1979)

In the absence of a regulatory requirement, it is not proper to reject a drawing entry card oil and gas lease offer solely because an agent afixed the offeror's facsimile signature to the DEC and the separate statements of the offeror and the agent submitted in satisfaction of 43 CFR 3102.6-1 are machine copies, as BLM may require that the offeror personally verify the information contained in the offer and the statement, and provide whatever supplemental information that BLM may reasonably request. An agency statement required by 43 CFR 3102.6-1(a) need not be holographically signed.

Nothing in the regulations requires an agency statement submitted under 43 CFR 3102.6-1(a) to be dated. The statement is an adjunct to the drawing entry card and is considered dated as of the signing and dating of the card.

Lewis W. Peters, 44 IBLA 35 (Nov. 6, 1979)

"Interest in an oil and gas lease or offer." If an oil and gas lease offeror in an oral agreement gives another person "a claim or any prospective or future claim to an advantage or benefit from a lease," there would be an interest in the lease or lease offer which must be disclosed under 43 CFR 3102.7. That an offeror might raise a technical legal defense against enforcement of such an agreement in a court does not militate against there being a claim or avoid the consequence of the disclosure regulation or 43 CFR 3112.5-2 prohibiting multiple filing in drawing procedures.

"Interest in an oil and gas lease or offer." Where affidavits submitted on appeal by an oil and gas lease offeror disclose that prior to the filing of an oil and gas lease offer the offeror orally agreed to give the person filing the offer for him either the opportunity to refuse to purchase the lease under terms and conditions that a third party would make (right of first refusal), or the opportunity to make the first offer before any other offer would be accepted (first right to buy), the offeror has given the person an interest in the offer as defined in the regulations to include

a prospective claim to an advantage or benefit from a lease.

R. J. Engvoldsen, 44 IBLA 70 (Nov. 20, 1979)
86 I.D. 683

When an offeror prints his name on the front of a drawing entry card oil and gas lease offer as "Maddox, Robert J.," and signs his name on the back of the card as "J. Robert Maddox," his usual manner of signing, the card may not be rejected because he violated no regulation by signing the offer in that manner, and he properly followed instructions on the face of the card by giving his last name first, then his first name and initial.

Robert J. Maddox, 44 IBLA 178 (Nov. 30, 1979)

When, in a drawing of simultaneously filed noncompetitive oil and gas lease offers, an offer is filed by a parent as cotrustee on behalf of a minor child, and another offer for the same land is filed by the parent individually, under 43 CFR 3100.0-5(b) the parent has an interest in the child's offer where trust proceeds may be used for support of the child, and the offers must be rejected. 43 CFR 3112.5-2.

Where a cotrustee files individually in a simultaneous filing of oil and gas lease offers for the same parcel on which she files as cotrustee for the trust, both offers must be rejected under the regulation which prohibits the filing of multiple offers. 43 CFR 3112.5-2.

Celeste C. Grynberg, Jean G. Smirnoff, 44 IBLA 197 (Nov. 30, 1979)

A simultaneous oil and gas drawing entry card must be fully executed by an applicant, and where the applicant omits from his address, the State and zip code, the lease offer is properly rejected.

A simultaneous oil and gas lease drawing entry card omitting the State and zip code from the offeror's address is properly rejected and the filing fee is properly retained by the Bureau of Land Management.

Robert C. Meredith, 44 IBLA 213 (Dec. 11, 1979)

A drawing entry card in a simultaneous oil and gas lease filing may not be rejected on the basis that the card sets out as part of the parcel designation the complete name of the State where the governing office of BLM is located instead of the abbreviated State code prefix.

Joe L. Frazier, 44 IBLA 233 (Dec. 11, 1979)

A drawing entry card which does not contain the full designation of the parcel applied for, including the alphabetical State Office code as prefix, is not fully executed and must be rejected.

Lee M. Messinger, 44 IBLA 236 (Dec. 11, 1979)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Drawings--Continued

A first-drawn simultaneous drawing entry card which is defective because of noncompliance with a mandatory regulation must be rejected.

Lawrence T. Loftus et al., 44 IBLA 243 (Dec. 13, 1979)

A simultaneous oil and gas lease offer signed in the name of a trust must strictly comply with 43 CFR 3102.5, governing the submission of qualifying statements as a trustee.

A person filing a simultaneous offer for an oil and gas lease is presumed to understand the difference between a filing in the name of a trust and a filing in an individual capacity, and despite an allegation that the trust filing was instructed by unspecified Bureau of Land Management personnel, the principles of estoppel may not be invoked to change a defective trust filing into a filing by an individual.

Tony C. Nielsen, 44 IBLA 259 (Dec. 19, 1979)

Where two of three offerors sign a drawing entry card (DEC) in one of two signature boxes, and the third offeror signs in the other signature box provided on Form 3112-1, and the same date of signing is entered in each of the two appropriate boxes on the DEC for the date, adjacent to the two signature boxes, so that it is evident that the date applies equally to all three signatures on the card, the failure to enter a third date on the offer is not grounds for rejection of the DEC.

Eugene S. Bibbik et al., 44 IBLA 318 (Dec. 31, 1979)

Filing

No law or regulation requires the mandatory rejection of an oil and gas lease offer merely because it is held in suspense for 1 year. The setting of a specific time limit on the suspension of an oil and gas offer is not a determination in the exercise of the Secretary's discretionary authority of whether or not to lease the lands for oil and gas.

Justheim Petroleum Co., 18 IBLA 423 (Feb. 13, 1975)

In a noncompetitive oil and gas lease offer for acquired lands in which the United States owns a fractional present interest, 43 CFR 3130.4-4 requires offeror to submit a statement detailing the extent of his ownership in operating rights not owned by United States, regardless of whether the United States owns 50 percent or more of operating rights.

Where an unamended senior offer for a noncompetitive fractional oil and gas lease on acquired lands is not in compliance with 43 CFR 3130.4-4, a junior offer obtains priority to extent of conflicts between competing filings, and the junior offeror's protest must be sustained.

Frederick L. Smith et al., 19 IBLA 162 (Mar. 14, 1975)

An oil and gas simultaneous drawing entry card is properly returned to the applicant where the record shows that it was received in the Bureau office subsequent to the terminal hour and date set forth in the notice of lands available for simultaneous filing.

Robert B. Ferguson, 20 IBLA 299 (May 27, 1975)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Filing--Continued

Drawing entry cards for simultaneous oil and gas lease offers will be rejected and the filing fees retained where the applications are not made on the correct form.

John E. Brown, 21 IBLA 260 (Aug. 11, 1975)

It is improper for the Bureau of Land Management to require an applicant having partially conflicting noncompetitive acquired lands oil and gas lease offers filed in the regular over-the-counter procedure at different times to withdraw either his senior or junior offer simply because of the conflict.

Jean Oakason, 22 IBLA 33 (Sept. 10, 1975)

Where an oil and gas lease offeror files a simultaneous oil and gas lease drawing card and indicates that its corporate qualifications are filed under a specific serial number, the offer will not be rejected where the corporation can show that the State Office informed it earlier that its corporate qualifications had been placed in that file.

Allied Chemical Corp., 23 IBLA 214 (Jan. 6, 1976)

The listing of lands for the simultaneous filing of oil and gas lease offers does not constitute a determination by the Department of the Interior that conditions prevail in every instance which assure the availability of those lands for further leasing. The publication of the list merely serves as notice that offers to lease the lands listed will be received. The filing of an offer for a listed tract creates no contractual relationship between the offeror and the United States.

Milan S. Papulak, 24 IBLA 278 (Mar. 30, 1976)

Simultaneous oil and gas entry cards which are sent to the wrong State Office are not considered filed in the "proper office" within the meaning of 43 CFR 1821.2-2(f), and such State Office has no jurisdiction over entry cards pursuant to 43 CFR 1821.2-1(c); therefore, the filing fees for such offers should not be retained.

Where a simultaneous oil and gas entry card is filed in the wrong State Office, the entry card and the filing fee should be returned to the offeror.

James H. Scott, 25 IBLA 364 (July 6, 1976)

Where a person acting as trustee for two discrete trusts for two different minors files an oil and gas simultaneous filing entry card for the same parcel for each of the trusts, in the absence of any agreement, scheme, or plan which would confer on the trustee or settler a benefit from the lease, such filing is not violative of the regulation, 43 CFR 3112.5-2, prohibiting multiple filings.

It is proper to require a trustee of a trust, who is filing oil and gas offers therefor, to file any information relevant to determining whether the offeror is a qualified offeror, including without limitation, data bearing upon multiple filings in a simultaneous procedure. However, it is impermissible for the Bureau of Land Management to require the trustee to furnish other information not germane to those inquiries. The cancellation of a lease for failure to furnish data, some of which was not properly required, will be set

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Filing--Continued

aside on appeal and the trustee afforded another opportunity to furnish such data as was properly required.

Margo Panos (Trust), Gus G. Panos (Trustee), 28 IBLA 1 (Nov. 5, 1976)

Appellant's submission with simultaneous oil and gas lease offer of a personal check to cover filing fees satisfied 43 CFR 3112.2-1(a)(1) despite drawee bank's subsequent refusal to honor that check, since the refusal is shown by evidence to be error on part of bank alone.

Hugh Burnett, 28 IBLA 303 (Jan. 10, 1977)

Regardless of whether offeror is described as "unqualified" or "disqualified," 43 CFR 3112.5-1 requires that upon successful drawees' failure to pay first year's rental, the lands shall be listed subsequently under the simultaneous drawing procedure rather than leased under the regular over-the-counter procedure in 43 CFR Subpart 3111.

Robert G. Lynn, 28 IBLA 310 (Jan. 14, 1977)

A pending noncompetitive oil and gas lease offer is not a valid existing right protected by the savings clause in the Alaska Native Claims Settlement Act.

James W. Canon et al., 1 SEC. 1 (Apr. 15, 1977)
84 I.D. 176

Where an applicant fails to file five copies of a noncompetitive lease offer as required by the regulations in 43 CFR 3111.1-1(a) the lease offer is properly rejected. Failure to submit the required number of copies is not included in the list of curable defects in 43 CFR 3111.1-1(e) and, therefore, is fatal to the oil and gas offer.

John P. Errebo, Jr., 32 IBLA 191 (Sept. 15, 1977)

Where a check has been submitted with a drawing entry card in payment of the $10 filing fee for a simultaneous oil and gas lease offer, and the check is dishonored by the bank, the offeror loses his priority unless the refusal to honor the check was the result of a bank error, corroborated by the bank.

John Eldon Dean, 32 IBLA 336 (Oct. 18, 1977)

Jonathan T. Ames, 33 IBLA 1 (Nov. 14, 1977)

An oil and gas lease offer is properly rejected where the offeror's check to cover the filing fee is dishonored by the bank because of insufficient funds in the account on which the check is drawn.

Charles P. Ricci, 33 IBLA 288 (Jan. 5, 1978)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Filing--Continued

Where it is shown that a bank erroneously dishonored a check drawn thereon, and an official of the bank admits that the payment was refused by mistake, the error of the bank will not vitiate the otherwise proper payment of the filing fee.

Charles P. Ricci (On Reconsideration), 34 IBLA 166 (Mar. 21, 1978)

Where BLM rejected appellant's offer for oil and gas lease because it failed to receive from him fractional interest statement required by 43 CFR 3130.4-4 (1975), and evidence affidavits by appellant and his wife were filed on appeal reciting that he mailed such statement with his entry card for simultaneous drawing, the presumption of administrative regularity obtains and appellant must be deemed to have not borne his risk of nonpersuasion.

Charles J. Babington, 36 IBLA 107 (July 14, 1978)

When the president of a corporation is the successful offeror in a drawing of simultaneous oil and gas lease offers and the vice president and the corporation also file applications for the same parcel of land in the same drawing, the president's offer must be rejected because the officers of the corporation stand in a fiduciary relationship to the corporation, thereby increasing its chances to be the successful applicant under 43 CFR 3112.5-2.

William R. Boehm, 36 IBLA 346 (Aug. 28, 1978)

The instructions printed on the simultaneous drawing entry card plainly advise that "[c]ompliance must also be made with the provisions of 43 CFR 3102." It is solely the responsibility of the offeror to ascertain what is contained in the regulations in order to comply therewith.

Not all persons may be qualified to be lessees, and for that reason all offerors must furnish evidence of their qualifications to hold oil and gas leases. In the case of corporations, such evidence must accompany the offer unless previously submitted, in which case reference to the serial number of the record suffices.

Appellant's request that it be permitted to furnish the evidence of qualifications on appeal is denied. In simultaneous oil and gas leasing, the only difference between the drawing entry cards is the order in which they are drawn. The applications are considered to have been simultaneously made. Giving an unqualified first-drawn entrant additional time to file infringes on the rights of the second-drawn qualified offeror.

University of the Trees, 40 IBLA 74 (Mar. 16, 1979)

Where separate statements of interest are required pursuant to 43 CFR 3102.6-1(a)(2) (1977), this Board must affirm the dismissal of a protest against the issuance of an oil and gas lease which is premised on the protestant's contention that the statement of the offeror must bear his original, holographic signature.

Although a lease offer may not be rejected solely because an agent affixed the offeror's facsimile signature to the offeror's separate statement, this does not prevent BLM from requiring that the offeror personally verify the information contained therein and provide whatever supplemental information may reasonably be required. A private agent may not interpose himself between a lease applicant and the Government

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Filing--Continued

so as to mask the identity of the applicant and prevent direct contact by Federal officials who are properly concerned.

W. B. Gilmore, 41 IBLA 25 (May 29, 1979)

It is not proper to reject a drawing entry card oil and gas lease offer solely because an agent affixed the offeror's facsimile signature to both the DEC and to the offeror's separate statement required by 43 CFR 3102.6-1, as BLM may require that the offeror personally verify the information contained in the offer and in the statement, and provide whatever supplemental information that BLM may reasonably require.

Robert B. Coen et al., 41 IBLA 55 (May 31, 1979)

Where oil and gas lease offerors enclose agency statements with their drawing entry cards, which statements are clearly intended to, and appear to, apply to their offers, their cards are fully executed notwithstanding their failure to note on the face of the cards that the agency statements are enclosed, as nothing in the regulations or on the card directs an offeror to do so.

Nothing in the regulations requires an agency statement submitted under 43 CFR 3102.6-1(a) to be dated. Rather, the statement is an adjunct to the drawing entry card and is considered dated as of the signing and dating of the card.

An agency statement required by 43 CFR 3102.6-1(a) need not be holographically signed. Rather, such statements may be submitted over facsimile signatures.

Frederick T. Peters et al., 41 IBLA 262 (June 28, 1979)

Not all persons may be qualified to be lessees. Signing and dating the entry card constitute certification by the offeror of his qualifications as of a date certain.

As used in 43 CFR 3112.2-1, the term "fully executed" means that the applicant must, in order to render the entry card a valid and complete offer to lease, supply the information requested thereon, including the date.

Harry A. Zuckerman et al., 41 IBLA 372 (July 23, 1979)

Where offers for the same parcel of land are filed by two corporations in a simultaneous oil and gas lease drawing, and where the directors of the first corporation having authority to file offers and execute leases are directors of the second with the same authority and the surrounding circumstances suggest that the corporations are interrelated, the drawing is inherently unfair and the offers are properly rejected as a prohibited multiple filing. Collusion or intent to deceive the Department need not be shown.

June Oil and Gas, Inc., Cook Oil and Gas, Inc., 41 IBLA 394 (July 24, 1979) 86 I.D. 374

An offeror for oil and gas lease may withdraw his offer at any time prior to the drawing. However, the filing fee is retained as a service charge irrespective of the outcome of the drawing.

Don C. Bell II (Trustee), 42 IBLA 21 (July 25, 1979)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Filing--Continued

Where an offeror submits two drawing entry cards on a parcel, both cards are properly disqualified. It is irrelevant that there was actually only one card in the drawing due to BLM's rejection of the other, before the drawing, as defective for another reason, as it is the submission of more than one card per parcel which is prohibited under 43 CFR 3112.2-1(a)(2).

Rae E. Colvin, 42 IBLA 266 (Aug. 27, 1979)

It is not proper to reject a drawing entry card oil and gas lease offer solely because an agent affixed the offeror's facsimile signature to both the DEC and to the offeror's separate statement required by 43 CFR 3102.6-1, as BLM may require that the offeror personally verify the information contained in the offer and in the statement, and provide whatever supplemental information that BLM may reasonably request. An agency statement required by 43 CFR 3102.6-1(a) need not be holographically signed.

Frances B. Bunn et al., 43 IBLA 242 (Oct. 10, 1979)

Oil and gas lease offerors are advised to refer to accompanying attachments on their drawing entry cards. However, where neither the regulations nor the instructions on the drawing entry card require that the card refer to the statements required by 43 CFR 3102.6-1, a noncompetitive oil and gas lease offer cannot be rejected for failure to do so, where such statements were actually submitted with the card.

Bharec Associates, 43 IBLA 317 (Oct. 22, 1979)

Brooks Griggs, 44 IBLA 185 (Nov. 30, 1979)

In the absence of a regulatory requirement, it is not proper to reject a drawing entry card oil and gas lease offer solely because an agent affixed the offeror's facsimile signature to the DEC and the separate statements of the offeror and the agent submitted in satisfaction of 43 CFR 3102.6-1 are machine copies, as BLM may require that the offeror personally verify the information contained in the offer and the statement, and provide whatever supplemental information that BLM may reasonably request. An agency statement required by 43 CFR 3102.6-1(a) need not be holographically signed.

Nothing in the regulations requires an agency statement submitted under 43 CFR 3102.6-1(a) to be dated. The statement is an adjunct to the drawing entry card and is considered dated as of the signing and dating of the card.

Lewis W. Peters, 44 IBLA 35 (Nov. 6, 1979)

Legibility

When an applicant for a noncompetitive oil and gas lease is requested to provide additional information for the adjudication of his drawing entry card offer, the offer is properly rejected where the evidence provided is illegible, and applicant was notified of the illegibility but responded by sending more illegible evidence.

Richard P. Lewis, 40 IBLA 100 (Mar. 27, 1979)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Reinstatement

Where an over-the-counter oil and gas lease offer is rejected because the applicant did not specify which of the described tracts he wanted the offer to include, he is presumed to have applied for all the tracts. Where on appeal he asserts that he desired to lease all the described lands, the decision will be reversed.

R. O. Heard, 22 IBLA 226 (Oct. 15, 1975)

A noncompetitive oil and gas lease offer for acquired lands, filed "over-the-counter," is properly rejected when the accompanying rental payment is deficient by more than 10 percent. However, where the balance of the rental is tendered with the notice of appeal, the offer may be reinstated with priority from the date the deficiency was corrected.

George S. Swan, 39 IBLA 47 (Jan. 16, 1979)

640-acre Limitation

The Department of the Interior will issue an oil and gas lease for less than 640 acres if the amount by which the lease offer is under 640 acres is less than the amount that the inclusion of the smallest adjoining subdivision available for leasing would put it in excess of 640 acres.

Kenneth D. Kirkland, 18 IBLA 349 (Jan. 14, 1975)

An oil and gas lease offer for less than 640 acres of land is properly rejected when the application fails to include adjoining, unsurveyed, nonnavigable riverbed lands which were available for leasing at the time the offer was filed.

John H. Williams, 18 IBLA 354 (Jan. 16, 1975)

No offer may be made for less than 640 acres except where the offer is accompanied by a showing that the lands are in an approved unit or cooperative plan of operation, or where the land is surrounded by lands not available for leasing, and where these circumstances do not exist, an offer for less than 640 acres must be rejected.

John F. Brown, 22 IBLA 50 (Sept. 16, 1975)

The Department of the Interior will not reject an oil and gas lease offer for public domain lands solely for the reason of the offer being for less than 640 acres where the amount by which the offer is under 640 acres is less than the amount by which the offer would exceed 640 acres by including the smallest adjoining subdivision available for leasing.

J. W. Bloom, 24 IBLA 276 (Mar. 30, 1976)

An oil and gas lease offer to lease less than 640 acres which adjoins land available for leasing is properly rejected.

Alice Hays, 36 IBLA 313 (Aug. 23, 1978)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

640-acre Limitation--Continued

No offer may be made for less than 640 acres except where the offer is accompanied by a showing that the lands are in an approved unit or cooperative plan of operation, or where the land is surrounded by lands not available for leasing, and where these circumstances do not exist an offer for less than 640 acres is properly rejected.

"Lands not available for leasing." Under 43 CFR 3110.1-3(a), lands are deemed to be not available for leasing when they are surrounded by lands contained within patents with no oil and gas rights reserved to the United States, when they are segregated from oil and gas leasing by withdrawal, or are embraced within an outstanding lease with an effective issuance date prior to the filing date of the subject offer.

Helen E. Reid, 39 IBLA 378 (Feb. 28, 1979)

Under 43 CFR 3110.1-3, it is improper to reject an oil and gas lease offer filed for more than 640 acres of available land where leases subsequently issued in response to prior applications have reduced the land available to the subject application to less than 640 acres.

Melvin Wolf, 43 IBLA 128 (Sept. 26, 1979)

Six-mile Square Rule

An oil and gas offer describing land which cannot be encompassed within a 6-mile square is defective and must be rejected, and where a lease is issued for part of the land embraced in the offer it must be canceled as to that land which is embraced in a proper offer filed prior to the issuance of the lease in order that the statutory preference right of the party first making a proper offer may be honored.

Robert W. David, 35 IBLA 205 (May 26, 1978)

Sole Party in Interest

Where an oil and gas lease offer filed on a drawing entry card in a simultaneous filing procedure contains the name of an additional party in interest, and the required statement of interest, copy or explanation of the agreement between the parties, and evidence of the qualifications of the additional party are not filed within 15 days after the filing of the lease offer, the offer must be rejected.

Emily Schenk, 21 IBLA 245 (Aug. 11, 1975)

Charmay E. Allred, Edward C. Allred, 26 IBLA 276 (Aug. 24, 1976)

An oil and gas lease offer signed by an attorney-in-fact for the offeror is properly rejected where it is not accompanied by a separate statement of the attorney's interest or lack of interest in the offer and the lease, if issued, as required by departmental regulation.

Southern Union Production Co., 22 IBLA 379 (Nov. 17, 1975)

Mitchell Energy Corp., 32 IBLA 244 (Sept. 21, 1977)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Sole Party in Interest--Continued

An oil and gas lease offer filed on a drawing entry card in a simultaneous filing procedure must be rejected when the entry card contains the name of an additional party in interest and the required statement of the additional party's interest and qualifications is not filed within the time required by 43 CFR 3102.7. The filing of the required statement after that time has elapsed does not cure the defect.

John J. Gergurich, Darrell G. Seal, Thomas J. Sweeney, 25 IBLA 266 (June 24, 1976)

An oil and gas lease offer filed on a simultaneous filing drawing entry card must be rejected if it contains the names of additional parties in interest, and there is a failure to file, within the time required by 43 CFR 3102.7, the statement of their interests, the agreement between the parties, and the evidence of their qualifications.

Leon M. Flanagan et al., 25 IBLA 269 (June 24, 1976)

An oil and gas lease offer filed on a drawing entry card in a simultaneous filing procedure must be rejected when the entry card contains the name of an additional party in interest and the required statement of the additional party's interest and qualifications is not filed within the time required by 43 CFR 3102.7. The offeror is not retroactively excused from submitting the required statement by an assertion in his appeal that he is the sole party in interest because the anticipated association between him and the additional party listed on the entry card had failed to materialize.

James D. Caddell, 25 IBLA 274 (June 24, 1976)

An oil and gas lease offer filed on a simultaneous filing drawing entry card must be rejected if it contains the names of additional parties in interest, and there is a failure to file the statement of their interests, the agreement between the parties, and the evidence of their qualifications within the time required by 43 CFR 3102.7.

Lyle W. Todd and Eileen S. Todd, 26 IBLA 246 (Aug. 18, 1976)

Bill L. Lewis and Stanley E. Elliott, 37 IBLA 230 (Oct. 16, 1978)

Herbert Adler, 42 IBLA 226 (Aug. 22, 1979)

An oil and gas lease offer on a drawing card filed in a simultaneous drawing procedure is properly rejected as defective where there are other parties in interest in addition to the applicant but the card does not list them or refer to an attachment, and an attachment dated nearly 6 months prior to the filing, signed by the applicant and four others stating their qualifications and setting forth a percentage of interest for each as "Partners in interest," fails adequately to set forth the nature of their agreement, and no other statement or information is filed within the time required by 43 CFR 3102.7.

Harry Reich, 27 IBLA 123 (Sept. 30, 1976) 83 I.D. 507

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Sole Party in Interest--Continued

An oil and gas lease offer filed on a simultaneous filing drawing entry card must be rejected if it contains the names of additional parties in interest and, within 15 days of the filing, the parties fail to submit a statement of their separate interests, any agreements between them and evidence of the qualifications of each offeror to hold the oil and gas lease.

Walter E. Anderson, Vern T. Jocelyn, 27 IBLA 253 (Oct. 20, 1976)

An oil and gas lease offer filed on a simultaneous filing drawing entry card must be rejected if it contains the names of additional parties in interest and, within 15 days of the filing, the offeror fails to submit an accurate statement of his interest and a copy of agreements between him and the other offerors.

Mildred A. Ross et al., 28 IBLA 364 (Feb. 3, 1977)

Lawrence T. Loftus et al., 44 IBLA 243 (Dec. 13, 1979)

Where a person files an oil and gas lease offer through a leasing service under an arrangement whereby the leasing service advances the first year's rental, selects the land, and controls the address at which the offeror may be reached, but no enforceable agreement is entered into whereby the offeror is obligated to transfer any interest in any lease to be issued to the leasing service, the service is not a party in interest in the offer merely because it may have a hope or expectancy of acquiring an interest, and the offeror is not precluded from stating that he is the sole party in interest in the offer.

C. E. Pack, 30 IBLA 166 (May 19, 1977) 84 I.D. 192

The presence in a drawing of simultaneously filed noncompetitive oil and gas lease offers of several entry cards signed by different offerors bearing the common mailing address of a leasing service which has an agreement to pay the first year rental for the account of any successful offeror utilizing its services does not, in the absence of an enforceable agreement under which the offeror is obligated to transfer any interest in any lease to be issued to the leasing service, establish an interest of the leasing service in the various lease offers constituting an improper multiple filing.

C. E. Pack, 30 IBLA 230 (May 26, 1977)

Where an oil and gas lease offer filed on a drawing entry card in a simultaneous filing procedure contains the name of an additional party and the statements of interest, copy or explanation of the agreement between the parties, and evidence of the qualifications of the additional party are not filed within the time required by 43 CFR 3102.7, the offer must be rejected.

Michael J. Madigan, Robert E. Baines, 31 IBLA 58 (June 23, 1977)

Verner F. Sorenson, 32 IBLA 341 (Oct. 21, 1977)

William R. Curtis, 37 IBLA 124 (Oct. 3, 1978)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Sole Party in Interest--Continued

A protest by a junior offeror against oil and gas lease offers which charges that fraudulent statements were made on the offers and implies other wrongdoing that violates the regulations requiring disclosure of all parties in interest is properly dismissed where the protestant fails to establish these charges or that the successful offers were in fact defective. A suggestion of the possibility of a violation of a regulation is not sufficient; a protestant must present competent proof of such violation, absent which a protest is properly rejected.

Arjay Oil Co., 31 IBLA 300 (July 22, 1977)

Arjay Oil Co., 33 IBLA 102 (Dec. 16, 1977)

Arjay Oil Co., 43 IBLA 98 (Sept. 20, 1979)

When an individual files an oil and gas lease offer through a leasing service under an agreement where the leasing service is authorized to act as the sole and exclusive agent to negotiate for sublease, assignment or sale of any rights obtained by the offeror; where the offeror is required to pay the leasing service according to a set schedule, even if the offeror negotiates the sale; and where such agency to negotiate is to be valid for 5 years, the leasing service has an enforceable right to share in the proceeds of any sale of the lease or any interest therein. Such an agreement creates for the leasing service an interest in the lease as that term is defined in 43 CFR 3100.0-5(b).

When a leasing service holds an interest in a lease at the time it files an offer on behalf of an offeror, the offeror is not the sole party in interest and he is required by regulation, 43 CFR 3102.7, to provide the names of other interested parties, the nature and extent of their interest and the nature of the agreement between them not later than 15 days after the filing of the offer. Failure to file the required statements results in rejection of the offer.

Lola I. Doe, 31 IBLA 394 (Aug. 19, 1977)

Sidney H. Schreter, William P. Ford, Jr., 32 IBLA 148 (Sept. 12, 1977)

An oil and gas lease offer filed on a simultaneous filing drawing entry card must be rejected if it contains the name of an additional party in interest and the parties fail to submit a statement of their separate interests, any agreements between them, and evidence of the qualifications of each offeror to hold the oil and gas lease within 15 days of the filing.

Essie M. Cohen, Moses Daniel Cohen, 33 IBLA 266 (Jan. 5, 1978)

Where an oil and gas lease offer on a drawing entry card is signed by the offeror and lists the names of 10 other parties in interest, and is accompanied by a separate statement signed by each of the 11 parties in interest declaring (1) their respective addresses, (2) that they are American citizens, (3) that they had an oral agreement to participate in the lease, (4) that they would own equally, and (5) that they do not have direct or indirect interests in leases which exceed 246,000 in any one State, the requirements of 43 CFR 3102.7 have been satisfied and the lease may issue, all else being regular.

Morris P. Cohen et al., 33 IBLA 365 (Jan. 23, 1978)

Where an offeror and his agent filing service submit statements along with a drawing entry card, which statements indicate unequivocally that there is no agreement between them creating an interest in the agent, thus apparently obviating the need to submit details of the offeror/agent agreement per 43 CFR 3102.6-1, BLM, in its discretion, may either decline to inquire further into the details of the agreement or may request and examine a copy of the agreement to determine whether such an "interest" in the agent existed at the time the offer was filed.

Where there is no evidence in the administrative record that the offeror with first priority in a drawing of simultaneous noncompetitive oil and gas lease offers is not the sole party in interest, as stated by both the offeror and his agent, the burden is on a protestant attacking the validity of the offer to prove an accusation that the offeror/agent agreement gives the agent an enforceable interest in the lease to be issued.

"Interest." Where there is an agreement giving an offeror the option of selling part of an oil and gas lease to his agent leasing service, exercisable solely at the offeror's discretion, the agent has a mere hope or expectancy and NOT an "interest" in the offer, as defined in 43 CFR 3100.0-5(b).

Virginia L. Jones, 34 IBLA 188 (Mar. 21, 1978)

When an individual files an oil and gas lease offer through a leasing service under an agreement where the leasing service is authorized to act as the sole and exclusive agent to negotiate for sublease, assignment or sale of any rights obtained by the offeror; where the offeror is required to pay the leasing service according to a set schedule, even if the offeror negotiates the sale; and where such agency to negotiate is to be valid for 5 years, the leasing service has an enforceable right to share in the proceeds of any sale of the lease or any interest therein. Such an agreement creates for the leasing service an interest in the lease as that term is defined in 43 CFR 3100.0-5(b).

Where an individual files an oil and gas lease offer through a leasing service under an agreement with the service which has been determined by this Department to create an interest in the lease for the service, and the service files a waiver of that interest with the BLM prior to a simultaneous drawing, without communicating such waiver to the client and without any contractual consideration running from the client to the leasing service, the waiver is without effect as a matter of law and the successful drawee is required to make a showing as to sole party in interest under 43 CFR 3102.7.

Alfred L. Easterday, 34 IBLA 195 (Mar. 22, 1978)

The Department of the Interior may only issue an oil and gas lease to the first-qualified applicant, and a drawing entry card offer is properly rejected where it lists a second party in interest who fails to file timely the statement required by 43 CFR 3102.7.

Roy E. Wood, Robert A. Griggs, 34 IBLA 237 (Mar. 28, 1978)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Sole Party in Interest--Continued

Where there is no evidence in the administrative record that the offeror with first priority in a drawing of simultaneous noncompetitive oil and gas lease offers is not the sole party in interest, the burden is on a protestant attacking the validity of the offer to prove an accusation that there is an agreement giving the filing service an enforceable interest in the lease to be issued.

Clyde E. Frazier, 36 IBLA 141 (July 25, 1978)

"Interest." Where an individual files an oil and gas lease offer drawing entry card through a leasing service under an agreement by which the service is authorized to act as his exclusive representative in the sale of any lease rights obtained by him, and he is required to pay the service a set commission plus a percentage of revenues derived from any retained royalty interests, on any such sale, the leasing service has an enforceable right to share in any profits which may derive or accrue from the lease and, therefore, has an "interest" in the offer, as defined in 43 CFR 3100.0-5(b).

When a leasing service holds an interest in a lease at the time it files an offer on behalf of an offeror, the offeror is not the sole party in interest, and he is required by regulation, 43 CFR 3102.7, both to reveal this fact at the time his offer is filed, and to provide the names of other interested parties, the nature and extent of their interest, and the nature of the agreement between them, not later than 15 days after the filing of the offer. Failure to file the required statements results in rejection of the offer.

Where a leasing service is held to have an interest in the offer of one of its clients on a particular parcel of land, and the president of the service also files an offer in his own name on that parcel, the prohibition in 43 CFR 3112.5-2 against multiple filings has been violated, as, in addition to its interest in its client's offer, the service also has an interest in its president's offer, owing to his fiduciary duty to the service.

Harry E. Sixt, 36 IBLA 374 (Aug. 31, 1978)

"Interest." Where an individual files an oil and gas lease offer drawing entry card through a leasing service under an agreement by which the first $8,000 of the proceeds from any sale of a lease goes to the individual, the next $3,500 goes to the leasing service, and the balance of the proceeds goes to the individual, the leasing service has an enforceable right to a defined share in profits which may derive or accrue from the lease, and, therefore, has an "interest" in the offer as defined in 43 CFR 3100.0-5(b).

When a leasing service holds an interest in the anticipated lease at the time it files an offer on behalf of an offeror, the offeror is not the sole party in interest, and he is required by regulation, 43 CFR 3102.7, both to reveal this fact at the time his offer is filed, and to provide the names of other interested parties, the nature and extent of their interest, and the nature of the agreement between them, not later than 15 days after the filing of the offer. Failure to file the required statements must result in rejection of the offer.

Gertrude Galauner, 37 IBLA 266 (Oct. 19, 1978)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Sole Party in Interest--Continued

Where a contract between an oil and gas lease offeror and a leasing service created an agency relationship, in the absence of circumstances giving the agent an authority coupled with an interest, the agent's authority ordinarily terminated upon the death of the principal. If the leasing service had an interest, a lease could not issue to the estate of the deceased if no statement was filed delineating the nature and extent of that interest as required by 43 CFR 3102.7.

Estate of Charles D. Ashley, 37 IBLA 367 (Nov. 2, 1978)
85 I.D. 403

Where an oil and gas lease drawing entry card contains the names of other parties in interest and the separate statement of interest required to be filed is not signed by the offeror as required by 43 CFR 3102.7, the offer is properly rejected.

Elizabeth Fagedas, 38 IBLA 130 (Nov. 22, 1978)

"Interest." Where a partner in a firm, or business associate, or an officer of a corporation which is engaged in the oil and gas business, files an oil and gas lease offer individually in his own name, the partnership/ corporation/association may have a claim to any benefits accruing to the individual from the lease, owing to the partnership agreement, corporate by-laws, or personal contract, due to the partner's/officer's/ associate's fiduciary duty to hold any opportunity obtained individually for the exclusive use and benefit of the firm. This claim is an "interest" under 43 CFR 3100.0-5(b), and failure to disclose it within 15 days of the filing of the offer, as required by 43 CFR 3102.7, subjects the offer to rejection.

Where an oil and gas lease offeror has indicated that he is the sole party in interest in the offer, but a protestant shows that he is a member of a firm which bears his name and the name of another, that the firm is engaged in the oil business, and that the address of record on the lease offer is the address of the business firm, the case will be remanded for an investigation to ascertain if there has been a violation of 43 CFR 3102.7 and/or 43 CFR 3112.5-2.

Johnnie B. Gryder, 38 IBLA 146 (Dec. 5, 1978)

Where eight individuals enter into a single agreement with a leasing service whereby the service supplies parcel numbers, and the eight individuals file offers on two of these parcels and pay all their filing fees by a single check, there is a strong implication that each of the individuals has an interest in all of the offers filed on these parcels. Where one of these individuals, whose offer has resulted in the issuance of a lease, fails to respond to an order by this Board directing him to submit details of the agreement between himself and the other individuals by which to determine whether the requirements of 43 CFR 3102.6-1 and 3112.5-2 have been violated, it will be presumed that the indicated violations have occurred, and the cancellation of the lease will be affirmed on that basis.

Robert A. Chenoweth, 38 IBLA 285 (Dec. 13, 1978)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Sole Party in Interest--Continued

"Interest." Where an oil and gas leasing service selects lands, files offers, and advances funds on behalf of its clients for leases which the service is willing to sell on behalf of any successful client, strictly at the client's option, in return for a percentage commission on the sale, the service has no enforceable right to any portion of the lease, if issued. In such circumstances, the service does not have an "interest" in the lease, so that the client/offeror is not precluded from stating that he is the sole party in interest to the offer, and the filing of offers for the same parcel by other clients of the service is not disqualifying.

Geosearch, Inc., 39 IBLA 49 (Jan. 16, 1979)

Geosearch, Inc., 40 IBLA 267 (Apr. 18, 1979)

Geosearch, Inc., 40 IBLA 401 (May 14, 1979)

The fact that the addresses of an oil and gas lease offeror and a filing service are identical does not disqualify the offer or afford the offeror or filing service a greater probability of successfully obtaining a lease or interest therein in violation of 43 CFR 3112.5-2.

Where there is no evidence in the record that the offeror with first priority in a simultaneous oil and gas lease drawing is not the sole party in interest, a protest alleging an interest in a filing service may properly be dismissed.

Joseph J. O'Keefe, 40 IBLA 378 (May 14, 1979)

When an individual files an oil and gas lease offer through a leasing service under a contractual agreement whereby the leasing service is authorized to act as the sole and exclusive agent to negotiate for sublease, assignment, or sale of any rights obtained by the offeror; where the offeror is required to pay the leasing service a commission according to a set schedule on any sale plus a percentage of any royalties, even if the offeror negotiates the sale; and where such agency to negotiate is to be valid for 5 years, the leasing service has an enforceable right to share in the proceeds of any sale of the lease or any interest therein. Such an agreement creates for the leasing service an "interest" in the lease as that term is defined in 43 CFR 3100.0-5(b).

A purported disclaimer by a leasing service of its interests in its clients' offers which is filed with BLM prior to the filing of these offers, but which, by its own terms, does not apply to the interests held by the service in these offers, is ineffectual and does not erase these interests. This disclaimer is also ineffectual as a matter of law even as to a client's offer to which it does apply, where it is unsupported by consideration and where it is not communicated to the client, as it may be retracted by the service. The service's interests in these offers therefore remain extant as of the filing of its clients' offers, notwithstanding the purported disclaimer, and where the existence of its interests is not disclosed on the offer cards as required by 43 CFR 3102.7, BLM properly rejects the offers.

Frederick W. Lowey et al., 40 IBLA 381 (May 14, 1979)

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Sole Party in Interest--Continued

"Interest." Where there is an agreement giving an offeror the option of selling part of an oil and gas lease to his agent leasing service, exercisable solely at the offeror's discretion, the agent has a mere hope or expectancy and not an "interest" in the offer, as defined in 43 CFR 3100.0-5(b). A leasing service, which files a simultaneous noncompetitive oil and gas lease offer drawing entry card on behalf of its client, bound by a "put option" does not have a hidden interest in the offer and does not violate 43 CFR 3102.7 by failing to disclose this put option or 43 CFR 3112.5-2 by filing offers for more than one client on a parcel.

Where there is no evidence in the administrative record that the offeror with first priority in a drawing of simultaneous noncompetitive oil and gas lease offers is not the sole party in interest, as stated by both the offeror and his agent, the burden is on a protestant attacking the validity of the offer to present evidence of an accusation that the offeror/agent agreement gives the agent an enforceable interest in the lease to be issued.

Jack Mask, 41 IBLA 147 (June 18, 1979)

Kelley Everette, 41 IBLA 155 (June 18, 1979)

The fact that the addresses of the lease offeror and a filing service are identical merely indicates the use of a filing service and does not in itself give the offeror or agent a greater probability of successfully obtaining a lease or interest therein in violation of 43 CFR 3112.5-2.

Where there is no evidence of any violation of the regulations in the record, the burden is on the protestant to submit competent evidence of an accusation that there is an agreement giving a filing service an enforceable interest in the lease, absent which the protest is properly rejected. Allegations that there was a contract between the offeror and a filing service in which the filing service withholds an overriding royalty interest from the offeror and participates in the proceeds, without evidence, is not sufficient to show that the offeror was not a sole party in interest.

J. Theodore Ellis, C. E. Pack, 41 IBLA 231 (June 27, 1979)

Where there is no evidence in the administrative record that the offeror with first priority in a drawing of simultaneous noncompetitive oil and gas lease offers is not the sole party in interest, as stated by both the offeror and his agent, the burden is on a protestant attacking the validity of the offer to present competent evidence supporting the accusation that there is an agreement giving the agent an enforceable interest in the lease to be issued. In absence of such evidence, the protest is properly rejected.

Alice E. Hardy, 44 IBLA 5 (Nov. 6, 1979)

Under the Departmental regulations an offeror in a simultaneous oil and gas lease drawing must sign a statement that he is the sole party in interest, or, if not, submit the statement required by 43 CFR 3102.7. Failure to comply with the regulations requires rejection of the lease offer.

Where a protest, with accompanying supporting evidence, alleges that the oil and gas lease offer drawn first in a simultaneous filing-drawing procedure violated the regulations because a party in interest was not disclosed and there was a multiple filing, the Bureau of

OIL AND GAS LEASES--Continued

APPLICATIONS--Continued

Sole Party in Interest--Continued

Land Management should first afford the drawee an opportunity to respond to the protest before rejecting the offer based on facts alleged in the protest. The error, however, is rendered harmless where on appeal the offeror has full opportunity to make factual submissions and respond to the allegations.

"Interest in an oil and gas lease or offer." If an oil and gas lease offeror in an oral agreement gives another person "a claim or any prospective or future claim to an advantage or benefit from a lease," there would be an interest in the lease or lease offer which must be disclosed under 43 CFR 3102.7. That an offeror might raise a technical legal defense against enforcement of such an agreement in a court does not militate against there being a claim or avoid the consequence of the disclosure regulation or 43 CFR 3112.5-2 prohibiting multiple filing in drawing procedures.

"Interest in an oil and gas lease or offer." Where affidavits submitted on appeal by an oil and gas lease offeror disclose that prior to the filing of an oil and gas lease offer the offeror orally agreed to give the person filing the offer for him either the opportunity to refuse to purchase the lease under terms and conditions that a third party would make (right of first refusal), or the opportunity to make the first offer before any other offer would be accepted (first right to buy), the offeror has given the person an interest in the offer as defined in the regulations to include a prospective claim to an advantage or benefit from a lease.

H. J. Enevoldsen, 44 IBLA 70 (Nov. 20, 1979)
86 I.D. 643

ASSIGNMENTS OR TRANSFERS

The assignor of an oil and gas lease is not barred from protesting against a decision approving the assignment because of his failure to appeal from an earlier decision denying the assignee's request for assignment approval but stating that approval would be permitted upon performance of certain conditions.

The failure by an oil and gas lease assignee to timely file the requisite bond as required by an initial State Office decision cannot be relied upon by the assignor as a basis for protesting a subsequent decision which reconsiders and grants a request for assignment approval, for it is the Department alone which may assert such default as a basis for denying a subsequent assignment approval request.

When an assignment of an oil and gas lease, made prior to lease renewal, has been approved after renewal and thereafter it appears that there is a controversy whether the parties contemplated that the assignment of the base lease would extend to the renewal lease, the Department will not take action on a protest requesting rescission of the assignment approval, but will maintain the *status quo* for a period sufficient to permit the parties to institute litigation or take other action to resolve their dispute.

Joseph Alstad, 19 IBLA 104 (Mar. 4, 1975)

The Bureau of Land Management may assert, in its discretion, failure to timely file assignment instruments as a basis for denying approval to an assignment where intervening assignees or other adverse interests are involved.

Where there is a private dispute as to the validity or effect of an oil and gas lease assignment, the Bureau of Land Management will not take action on a request for assignment approval, but will maintain the *status quo* for a period sufficient to permit the parties to institute litigation or take other action to resolve their dispute.

James V. O'Hare, F. Kenneth Fillhollen, 19 IBLA 171 (Mar. 10, 1975)

Where an oil and gas lease is subject to cancellation but an assignment of the lease has been filed by one claiming protection as a bona fide purchaser in accordance with the statute and regulations, action to cancel the lease will be stayed until it is determined whether the assignee is, in fact, entitled to protection of the statute and regulations afforded to bona fide purchasers.

Dale A. Spiegel, 19 IBLA 235 (Mar. 26, 1975)

Tiffany Trust, 21 IBLA 160 (July 21, 1975)

Gus Banos, 21 IBLA 163 (July 21, 1975)

Sec. 27 of the Mineral Leasing Act of Feb. 25, 1920, 30 U.S.C. § 187 (1970), requires that any assignment of all or any part of a lease be approved by the Department before an assignee becomes recordholder of any interest therein.

The Department does not give formal approval of assignments of royalty interests, but such an assignment is deemed valid if the requirements of 43 CFR 3106.4 are met.

William G. Pearland, 21 IBLA 66 (June 25, 1975)

The requirement of 43 CFR 3106.3-1 that assignments be filed in the State Office within 90 days of their execution is directory, not mandatory, its purpose being one of Departmental convenience. Where the failure to timely file an assignment has not adversely affected rights of any third parties, such assignment may be approved.

Hughes & New Oil Co., Inc., et al., 22 IBLA 305 (Nov. 4, 1975)

Denial of a request for approval of an assignment of an interest in an oil and gas lease is proper where (1) the lease had terminated by operation of law pursuant to 30 U.S.C. § 188(b) (1970) for failure to make timely payment of rental, and where (2) the assignor is a stranger to the lease, and the record is devoid of any assignment from the lessees of record to the assignor.

Albert Cicialic, Jr., Gennino J. Grande and Jeremy Y. Cohen, 26 IBLA 169 (Aug. 4, 1976)

Where approval of an assignment of interest in an oil and gas lease has been refused by the Bureau of Land Management until such time as the assignor supplies proof from the United States Geological Survey of proper plugging and surface rehabilitation, or the assignee submits a bond relating thereto, and subsequent to the appeal, the Geological Survey provides the Bureau of Land Management with notification of approval of surface restoration, the decision refusing approval will be vacated and the case file will be remanded for further consideration of the assignments.

Clinton St. Clair, 28 IBLA 98 (Nov. 15, 1976)

OIL AND GAS LEASES--Continued

ASSIGNMENTS OR TRANSFERS--Continued

When an oil and gas lease is in royalty status and acreage containing the well is segregated into a new lease by approval of an assignment, the nonproductive base lease does not terminate for failure to pay rental timely if the Bureau of Land Management does not inform the lessee of the segregation until after the anniversary date of the lease.

Odessa Natural Corp., 30 IBLA 28 (Apr. 11, 1977)

The oil and gas lessee of record is responsible for paying rental timely and for meeting the reinstatement requirements. The fact that a lessee attempts to assign his lease does not absolve him of the rental and reinstatement requirements until the assignment is approved by the Bureau of Land Management.

Leonard A. J. Tancredi, 32 IBLA 325 (Oct. 11, 1977)

An oil and gas lessee of record is responsible for paying rental timely. The fact that a lessee attempts to assign his lease does not absolve him of the rental payment requirements until the assignment is approved by the Bureau of Land Management.

Auburn C. Hunsucker, 34 IBLA 316 (Apr. 24, 1978)

An application for assignment of an undivided partial interest in an oil and gas lease is properly approved by BLM effective the first day of the lease month following the date of filing of the application. In the interim between the filing of the application and the effective date of the assignment, the prospective assignor remains the sole lessee, and, as such, is the only person who may relinquish rights under the lease.

Sol Singer, Gretchen Capital, Ltd., 35 IBLA 361 (June 23, 1978)

Where a decision canceling an oil and gas lease has been issued by BLM and received at the lessee's address of record, any subsequent assignment of the lease will not be protected under the provisions of 30 U.S.C. § 184(i) (1976), and whether or not the purported assignee is a bona fide purchaser is a moot question.

Robert A. Chenoweth, 38 IBLA 285 (Dec. 13, 1978)

A corporate applicant for assignment of an oil and gas lease must file statements required by 43 CFR 3102.4-1 with its application or, if already filed, so indicate by reference to the serial number of the Bureau of Land Management record in which such information is available.

Although deficiencies in an application for assignment of an oil and gas lease may be timely cured, 30 U.S.C. § 187a (1976) specifies the time when an assignment is effective, and no assignment can be approved for a terminated oil and gas lease.

An oil and gas lease may be relinquished only by the record title holder, and a partial relinquishment is not effective if it is filed by an applicant for an assignment which has not been approved.

Even if it were true that termination of an oil and gas lease was in part the result of Bureau of Land Management's failure to act timely on an assignment application, there is no authority either to withhold the effect of termination under 30 U.S.C. § 188(b) (1976) or to reinstate the lease under sec. 188(c), where there has been no payment of the full rental within 20 days after termination.

Reichhold Energy Corp., 40 IBLA 138 (Mar. 29, 1979)

Where the purchaser of an oil and gas lease asserts that he purchased the lease from the offeror whose drawing entry card was drawn with first priority, for cash consideration without knowledge of any irregularities or violation of the regulations, he is considered to be a bona fide purchaser, and his lease is not subject to cancellation unless prima facie evidence is presented to the contrary.

J. Theodore Ellis, E. E. Peck, 41 IBLA 231 (June 27, 1979)

BONA FIDE PURCHASER

The bona fide purchaser provision of the Act of Sept. 21, 1959, 73 Stat. 571, *as amended*, 30 U.S.C. § 184(h)(2) (1970), does not protect the assignee of a noncompetitive oil and gas lease offeror from the rejection of its assignor's offer after it is drawn first at a simultaneous drawing.

Leon M. Flanagan et al., 25 IBLA 269 (June 24, 1976)

Under 30 U.S.C. § 184(h)(2) (1976) and 43 CFR 3102.1-2(a), BLM properly dismissed a protest and refused to cancel an oil and gas lease which had been assigned to a bona fide purchaser, even though the lease might have been subject to cancellation prior to the assignment if the offeror/assignor's original offer was defective under 43 CFR 3102.7 and 3112.5-2.

Robert C. Bace, Clyde E. Beggs, 37 IBLA 162 (Oct. 10, 1978)

Where a decision canceling an oil and gas lease has been issued by BLM and received at the lessee's address of record, any subsequent assignment of the lease will not be protected under the provisions of 30 U.S.C. § 184(i) (1976), and whether or not the purported assignee is a bona fide purchaser is a moot question.

Robert A. Chenoweth, 38 IBLA 285 (Dec. 13, 1978)

Under 43 CFR 3102.1-2(a), BLM properly dismisses a protest and refuses to cancel an oil and gas lease which has been assigned to a bona fide purchaser prior to the initiation of the protest, regardless of the truth of allegations that the lease was subject to cancellation because the offeror/assignor's original offer was defective under 43 CFR 3102.7 and 3112.5-2.

Geosearch, Inc., 39 IBLA 49 (Jan. 16, 1979)

Where BLM does not reject simultaneous noncompetitive oil and gas lease offers drawn with second priority after the issuance of the leases to the first drawees, the second drawees retain an interest which must be considered if the leases are canceled because the first drawees' offers are defective, provided that the leases have not been assigned to bona fide purchasers. In those circumstances, BLM's decision dismissing the second drawees' protests against the continued validity of these leases for lack of interest must be vacated.

A decision by BLM dismissing protests against the continued validity of the leases because the assignees are

OIL AND GAS LEASES--Continued

BONA FIDE PURCHASER--Continued

bona fide purchasers will be vacated where the record contains no statement by the assignees of oil and gas leases that they are bona fide purchasers, and the matter will be remanded so that BLM may join the assignees to the protest proceedings in order to give them the opportunity to show that they hold and acquired the interest as bona fide purchasers, and to give the protestants the opportunity to present prima facie evidence to the contrary, per 43 CFR 3102.1-2(c).

Geosearch, Inc., 40 IBLA 397 (May 14, 1979)

Where BLM does not reject simultaneous noncompetitive oil and gas lease offers drawn with second priority after the issuance of the leases to the first drawees, the second drawees retain an interest which must be considered if the leases are canceled because the first drawees' offers are defective, provided that the leases have not been assigned to bona fide purchasers. In those circumstances, BLM's decision dismissing the second drawees' protests against the continued validity of these leases for lack of interest must be vacated.

A decision by BLM dismissing protests against the continued validity of the leases because the assignees are bona fide purchasers will be vacated where the record contains no statement by the assignees of oil and gas leases that they are bona fide purchasers, and the matter will be remanded so that BLM may join the assignees to the protest proceedings in order to give them the opportunity to show that they acquired the interest as bona fide purchasers, and to give the protestant the opportunity to present prima facie evidence to the contrary, per 43 CFR 3102.1-2(c). Where the assignees have alleged that they are bona fide purchasers, it is up to the protestant to show prima facie to the contrary.

Geosearch, Inc., 41 IBLA 291 (June 28, 1979)

BONDS

A bond for not less than $1,000 is properly required to be filed when all or any part of the land in a noncompetitive lease is included within the limits of a known geologic structure of a producing oil and gas field. That the land is included in a communitized producing unit does not vitiate that requirement.

Duncan Miller, 20 IBLA 9 (Apr. 14, 1975)

Oil and gas lease offers for lands within the Lake Mead National Recreation area are subject to the general oil and gas regulations. Bond requirements in situations, as this one, beyond the ambit of 43 CFR 3104.1-2 may not be imposed.

Robert R. Wahl, Howard Yes, 21 IBLA 262 (Aug. 11, 1975)

It is improper to cancel an oil and gas lease for failure of the lessee to file a bond required by regulation, 43 CFR 3104.1(b), where there are extenuating circumstances and where there is no impairment of third party rights and no adverse impact on the interest of the United States.

Estate of John P. Wagner and The Superior Oil Co., 26 IBLA 119 (July 26, 1976)

OIL AND GAS LEASES--Continued

BONDS--Continued

Where part of the lands in an oil and gas lease are included within the known geologic structure of a producing oil or gas field, the annual rental rate will be increased for all of the land in the lease and a bond required.

W. E. Cahoon Investment Co., John Cahoon, 27 IBLA 210 (Oct. 6, 1976)

Cancellation of an oil and gas lease pursuant to statute, 30 U.S.C. § 188(b) (1970), and the regulation promulgated thereunder is discretionary and not mandatory. An oil and gas lease need not be canceled because of the failure of the lessee to file a structure bond required by regulation, 43 CFR 3104.1(b), where there are extenuating circumstances and where there is no impairment of the rights of third parties and no adverse impact on the interest of the United States.

Howard S. Rucker, 29 IBLA 30 (Feb. 8, 1977)

When a Statewide bond is reduced below the required amount because the U.S. Geological Survey recovered from the surety on the bond assessments against oil and gas leases, the Bureau of Land Management must require the principal on the bond to file a new bond or bonds in the appropriate amount.

James S. Guleke, 34 IBLA 1 (Feb. 8, 1978)

A regulation which provides that coverage of nationwide oil and gas bond in force at the effective date of the regulation may be expanded by a rider to include geothermal resources leases does not permit a replacement nationwide oil and gas bond executed after the effective date of the regulation to be so modified to include geothermal resources operations.

Mono Power Co., 37 IBLA 100 (Sept. 28, 1978)

When an oil and gas lessee's bond is reduced below the required amount because of Geological Survey's recovery from the surety of unpaid assessments due under the lease, the Bureau of Land Management must require the principal on the bond to file a new bond in the appropriate amount.

William J. Colman, 37 IBLA 310 (Oct. 23, 1978)

An oil and gas lessee is required to post bond before he may initiate drilling operations on his lease. Where it is noted in a decision appealed from that neither the lessee nor his operator have posted bond, and the lessee does not controvert this fact on appeal, it is properly found that there was no bond coverage.

Where a lessee is required by law to post bond before commencing drilling and fails to do so, any drilling operations actually undertaken by him do not constitute "diligent prosecution" of "actual drilling operations" in good faith under 43 CFR 3107.2-3, and he is therefore not entitled to an extension of his lease.

Richard P. Smoot, 39 IBLA 1 (Jan. 8, 1979)

OIL AND GAS LEASES--Continued

BONDS--Continued

A bond filed by an oil and gas lessee pursuant to 43 CFR 3814.1 may extend only to lands in which such lessee has record lease title interest and which lands were patented under the Stock-Raising Homestead Act, 43 U.S.C. §§ 291-301 (1970). Where a lessee has on file with a Bureau of Land Management State Office an approved Nationwide bond, a separate bond for the protection of surface owners is no longer required. 43 CFR 3104.2 and 3104.3.

Coquina Oil Corp., 41 IBLA 248 (June 27, 1979)

CANCELLATION

Where a noncompetitive oil and gas lease is issued to the successful applicant in a drawing of simultaneously filed offers and the lessee's personal check in payment of the first year's rental is returned by the drawee bank because of uncollected funds, a decision canceling the lease will be affirmed; and the fact that the bank, after consultation with its depositor indicated that it would honor the check upon resubmission will not serve to avoid the lease cancellation where no bank error is shown.

Dale A. Spiegel, 19 IBLA 235 (Mar. 26, 1975)

A noncompetitive oil and gas lease must be canceled where the land described therein was determined by the United States Geological Survey to be within a known geologic structure of a producing oil or gas field prior to the date of signing the lease on behalf of the United States by the authorized officer.

William T. Alexander, 21 IBLA 56 (June 18, 1975)

Amerada Hess Corp., 33 IBLA 293 (Jan. 10, 1978)

Where a Federal oil and gas lease has issued covering land which has been patented with no mineral reservation to the United States in the patent, the oil and gas lease is properly canceled as to such land.

O. D. Presley, 21 IBLA 190 (July 28, 1975)

It is improper to dismiss a protest against issuance of an oil and gas lease applied for pursuant to the Act of May 21, 1930, 30 U.S.C. § 301 *et seq.* (1970), for lands underlying a railroad right-of-way granted under the Act of Mar. 3, 1875, when the lands traversed by the right-of-way were later patented without a reservation for minerals. In such case title to the mineral estate underlying the right-of-way is no longer held by the United States and, therefore, a lease issued pursuant to the 1930 Act is void and must be canceled.

Amerada Hess Corp., 24 IBLA 360 (Apr. 27, 1976)
83 I.D. 194

An oil and gas lease issued for 2,960 acres in violation of administrative regulations need not be canceled in its entirety, in the absence of an intervening qualified applicant.

John T. Stewart III, Harlan C. Altman, Jr. (Trustees), 83 I.D. 247
25 IBLA 306 (June 28, 1976)

OIL AND GAS LEASES--Continued

CANCELLATION--Continued

The Bureau of Land Management has no authority to reinstate an oil and gas lease terminated by operation of law for failure to pay rental on or before the anniversary date when a valid lease for the same land has been issued prior to the filing of the petition for reinstatement. Therefore, unless the first lease is deemed not to have terminated, it is erroneous to cancel the subsequent valid lease.

C. Norman Stark, 26 IBLA 87 (July 19, 1976)

The statute, 30 U.S.C. § 188(b) (1970), and regulation, 43 CFR 3108.2-3, concerning the cancellation of oil and gas leases are discretionary not mandatory.

It is improper to cancel an oil and gas lease for failure of the lessee to file a bond required by regulation, 43 CFR 3104.1(b), where there are extenuating circumstances and where there is no impairment of third party rights and no adverse impact on the interests of the United States.

Estate of John F. Wagner and The Superior Oil Co., 26 IBLA 119 (July 26, 1976)

The signing of an oil and gas lease offer by the authorized officer of the Bureau of Land Management is the act that constitutes issuance of the lease and creates a binding contract; such a lease contract is not subject to cancellation by reason of inclusion of leased land in a known geologic structure as of a date subsequent to lease issuance.

Barbara C. Lisco, 26 IBLA 340 (Sept. 7, 1976)

Where an oil and gas lease offer when first filed is not accompanied by full payment of the first year's rental, but is deficient only $20, not more than 10 percent of the required amount, and the lease is subsequently issued with a notice that the deficiency must be paid within 30 days under penalty of cancellation, the lease must be canceled pursuant to 43 CFR 3103.3-1 where the required deficiency payment is not submitted within the prescribed period.

Albert J. Pieri, 27 IBLA 61 (Sept. 27, 1976)

Where the Bureau of Land Management sends notice to an offeror, pursuant to 43 CFR 3103.3-1, that the first year's rental accompanying an oil and gas lease offer is deficient in the amount of 41 cents, and that the deficiency must be paid within 30 days from notice under penalty of cancellation of the lease, the lease will be canceled where the lessee receives the notice, yet fails to pay.

Dona L. Jackson, 27 IBLA 217 (Oct. 6, 1976)

Where a corporation files an application for a lease for a certain parcel of land and is the successful offeror in the drawing of simultaneous oil and gas lease offers and the vice president and secretary of the corporation also filed applications for the same parcel of land in the same drawing, as individuals, the offer of the corporation must be rejected because the officers of the corporation stand in a fiduciary relationship to the corporation and thereby increase its chances to be the successful applicant.

Panka Corp., 27 IBLA 220 (Oct. 7, 1976)

OIL AND GAS LEASES--Continued

CANCELLATION--Continued

When a noncompetitive oil and gas lease has been issued and includes land within a known geologic structure which was ascertained prior to the issuance of the lease, the lease was erroneously issued and must be canceled to the extent that it included land within the KGS.

David A. Provinse, 27 IBLA 376 (Nov. 5, 1976)

It is proper to require a trustee of a trust, who is filing oil and gas offers therefor, to file any information relevant to determining whether the offeror is a qualified offeror, including without limitation, data bearing upon multiple filings in a simultaneous procedure. However, it is impermissible for the Bureau of Land Management to require the trustee to furnish other information not germane to those inquiries. The cancellation of a lease for failure to furnish data, some of which was not properly required, will be set aside on appeal and the trustee afforded another opportunity to furnish such data as was properly required.

Margo Panos (Trust), Gus G. Panos (Trustee), 28 IBLA 1 (Nov. 5, 1976)

Where the Bureau of Land Management sends notice to an offeror at his record address, pursuant to 43 CFR 3103.3-1, that the first year's rental accompanying his noncompetitive oil and gas lease offer is deficient and such notice is returned to the Bureau marked "Unclaimed" by the post office, the cancellation of the lease will be set aside and the notice will not be considered to have been served on the offeror, pursuant to 43 CFR 1810.2(b), when the post office has failed to forward the notice in accordance with a request by the offeror to forward all mail and other mail has, in fact, been forwarded.

Jack R. Coombs, 28 IBLA 53 (Nov. 9, 1976)

"Cancellation" and "termination." The "cancellation" and the "termination" of oil and gas leases are separate, distinct concepts. Cancellation requires a specific act by the Department authorized by various statutes. Termination under 30 U.S.C. § 188(b) (1970) is automatic, occurring by operation of law when the lessee fails to pay his rental timely.

Oil Resources, Inc., 28 IBLA 394 (Feb. 7, 1977)
84 I.D. 91

Cancellation of an oil and gas lease pursuant to statute, 30 U.S.C. § 188(b) (1970), and the regulation promulgated thereunder is discretionary and not mandatory. An oil and gas lease need not be canceled because of the failure of the lessee to file a structure bond required by regulation, 43 CFR 3104.1(b), where there are extenuating circumstances and where there is no impairment of the rights of third parties and no adverse impact on the interest of the United States.

Howard S. Bugbee, 29 IBLA 30 (Feb. 8, 1977)

Improper issuance of a noncompetitive oil and gas lease in response to a defective drawing entry card in the simultaneous filing procedure does not foreclose the right of the second drawn applicant whose drawing entry card was complete when filed to a lease for the parcel named; the erroneously issued lease must be canceled, and upon cancellation, the second drawee must be awarded a lease to the parcel, all else being regular.

OIL AND GAS LEASES--Continued

CANCELLATION--Continued

Gerald L. Christensen, Edward C. Green, 30 IBLA 303 (June 6, 1977)

Where minerals not owned by the United States have been leased for oil and gas purposes under the terms of the Mineral Leasing Act for Acquired Lands, the lease must be canceled because only acquired minerals owned by the United States are subject to leasing under that Act.

Duncan Miller, 32 IBLA 137 (Sept. 12, 1977)

Where a noncompetitive oil and gas lease is issued to the successful applicant in a drawing of simultaneously filed offers and the lessee's personal check in payment of the first year's rental is returned by the drawee bank as uncollectible, a decision canceling the lease will be affirmed in the absence of a showing of error on the part of the bank.

Norman McGrath, 32 IBLA 392 (Nov. 8, 1977)

The Secretary of the Interior generally has the authority to cancel any oil and gas lease issued contrary to law because of the inadvertence of his subordinates.

Where an oil and gas lease is canceled in part because it was erroneously issued as to that part, there is no authority for the Department to pay to the lessee unrealized anticipated profits or to refund the rental for the portion of the lands retained in the lease. By signing the simultaneous oil and gas drawing card, the offeror agreed to accept a lease for those portions of the tract found by BLM to be available for leasing.

Paul W. Temple, 33 IBLA 98 (Dec. 16, 1977)

Where a corporation files an application for a lease for a certain parcel of land and is the successful offeror in the drawing and the president and/or the vice-president of the corporation also filed applications for the same parcel of land in the same drawing as individuals, the offer of the corporation must be rejected because the officers of the corporation stand in a fiduciary relationship to the corporation and thereby increase its chances to be the successful applicant.

Graybill Terminals Co., 33 IBLA 243 (Jan. 5, 1978)

30 U.S.C. § 188(b) (1970), and its implementing regulation 43 CFR 3108.2-1, requiring a notice of deficiency on a form approved by the director apply only to rental payments due on the anniversary dates of noncompetitive oil and gas leases, and are inapplicable to deficient initial rental payments for noncompetitive oil and gas lease offers.

Where the Bureau of Land Management notifies an oil and gas lessee of a deficiency in initial rental and the deficiency is not paid to the Bureau within the time prescribed, but is paid some 5 months later, the delay being ascribed to "oversight" the lateness of the payment will not be excused and the cancellation of the lease for failure to pay the rental timely is properly sustained.

Evelyn Chambers, 33 IBLA 271 (Jan. 5, 1978)

OIL AND GAS LEASES--Continued

CANCELLATION--Continued

A lease erroneously issued in violation of regulations which prohibit leasing fractional interests to one who would own only a minority of operating rights in the leased property must be canceled if a lease is awarded to another applicant in a drawing held among the first and other offers simultaneously filed following repeal of the regulations.

Wilfred Plomis, 34 IBLA 222 (Mar. 27, 1978)

An oil and gas offer describing land which cannot be encompassed within a 6-mile square is defective and must be rejected, and where a lease is issued for part of the land embraced in the offer it must be canceled as to that land which is embraced in a proper offer filed prior to the issuance of the lease in order that the statutory preference right of the party first making a proper offer may be honored.

Robert W. David, 35 IBLA 205 (May 26, 1978)

An oil and gas lease offer filed in the name of a corporation is properly rejected where it is not accompanied by corporate qualification papers nor by any reference to a serial number where such information is to be found, as required by 43 CFR 3102.4-1.

Where a simultaneous drawing entry card culminates in lease issuance and it is subsequently ascertained that the serial number represented by the offeror to contain the corporate qualification papers, relates to "Christiansen Oil and Gas, Inc.," rather than to the offeror-lessee, Christiansen Oil, Inc., the lease is properly canceled, since the offeror was not the first-qualified offeror.

Christiansen Oil, Inc., 37 IBLA 52 (Sept. 18, 1978)

Under 30 U.S.C. § 184(h)(2) (1976) and 43 CFR 3102.1-2(a), BLM properly dismissed a protest and refused to cancel an oil and gas lease which had been assigned to a bona fide purchaser, even though the lease might have been subject to cancellation prior to the assignment if the offeror/assignor's original offer was defective under 43 CFR 3102.7 and 3112.5-2.

Robert G. Pace, Clyde E. Boggs, 37 IBLA 162 (Oct. 10, 1978)

Where the official record of an oil and gas lease contains nothing either showing that an oil and gas lease applicant's $10 filing fee was included in a check which was dishonored by the drawee bank, or rebutting the applicant's assertion that his filing fee was instead included in another check processed by BLM without incident, BLM's decision to cancel a lease issued pursuant to this offer because no filing fee was paid as required by 43 CFR 3103.2-1(a) will not be sustained for that reason.

Where eight individuals enter into a single agreement with a leasing service whereby the service supplies parcel numbers, and the eight individuals file offers on two of these parcels and pay all their filing fees by a single check, there is a strong implication that each of the individuals has an interest in all of the offers filed on these parcels. Where one of these individuals, whose offer has resulted in the issuance of a lease, fails to respond to an order by this Board directing him to submit details of the agreement between himself and the other individuals by which to determine

OIL AND GAS LEASES--Continued

CANCELLATION--Continued

whether the requirements of 43 CFR 3102.6-1 and 3112.5-2 have been violated, it will be presumed that the indicated violations have occurred, and the cancellation of the lease will be affirmed on that basis.

Where a decision canceling an oil and gas lease has been issued by BLM and received at the lessee's address of record, any subsequent assignment of the lease will not be protected under the provisions of 30 U.S.C. § 184(i) (1976), and whether or not the purported assignee is a bona fide purchaser is a moot question.

Robert A. Chenoweth, 28 IBLA 205 (Dec. 13, 1976)

Under 43 CFR 3102.1-2(a), BLM properly dismisses a protest and refuses to cancel an oil and gas lease which has been assigned to a bona fide purchaser prior to the initiation of the protest, regardless of the truth of allegations that the lease was subject to cancellation because the offeror/assignor's original offer was defective under 43 CFR 3102.7 and 3112.5-2.

Geosearch, Inc., 39 IBLA 49 (Jan. 16, 1979)

An oil and gas lease issued for land available for leasing, but in violation of an administrative regulatory requirement, need not be canceled in the absence of an intervening qualified applicant or some overriding policy consideration.

Merle C. Chambers, 40 IBLA 144 (Mar. 29, 1979)

An oil and gas lease issued on July 1, 1951, is not controlled by P.L. 83-555, effective July 29, 1954, and the lease therefore does not terminate automatically by operation of law if annual rental is not paid timely, as this law does not apply retroactively to the lease in the absence of written notice from the lessees that they have elected to subject their lease to this law. Rather, the mineral leasing law in effect prior to July 29, 1954, controls, under which the lessees' failure to pay annual rental subjects the lease to cancellation only after BLM gives them 30 days' notice of their failure to pay the rental timely. BLM's decision canceling such lease will be vacated where it did not give the lessees the required notice.

Allied Chemical Corp. et al., 40 IBLA 292 (Apr. 18, 1979)

COMMUNITIZATION AGREEMENTS

A bond for not less than $1,000 is properly required to be filed when all or any part of the land in a noncompetitive lease is included within the limits of a known geologic structure of a producing oil and gas field. That the land is included in a communitized producing unit does not vitiate that requirement.

Duncan Miller, 20 IBLA 9 (Apr. 14, 1975)

In order for a communitization agreement to qualify a lease as containing a "well capable of producing oil or gas" within the meaning of 30 U.S.C. § 188(b) (1970) and thus not subject to rental requirements, the agreement must be approved by the Secretary of the Interior.

C. J. Iverson, 21 IBLA 312 (Aug. 14, 1975) 82 I.D. 386

OIL AND GAS LEASES--Continued

COMMUNITIZATION AGREEMENTS--Continued

In the absence of an approved communitization agreement involving a Federal oil and gas lease, production from fee land within a State spacing unit cannot be attributed pro rata to Federal leases within the spacing unit, and where there is no drilling operation, producing well or well capable of production on such lease, such lease expires at the end of its primary term.

Kirkpatrick Oil Co., 32 IBLA 329 (Oct. 11, 1977)

Sec. 31 of the Mineral Leasing Act, as amended, 30 U.S.C. § 188 (1970), providing for the automatic termination of a lease, not containing a well capable of production of oil and gas in paying quantities, for nonpayment of the annual rental, does apply to a lease which is entitled to an extension beyond its initial 10-year term because of termination of an approved communitization agreement under 30 U.S.C. § 226(j) (1970), even though notice of the extension was not given to the lessee in time for him to receive it and return the rental so that the payment would be received by BLM no later than the 11th anniversary date of the lease.

Jack L. McClellan, Marton Majoros, 34 IBLA 53 (Feb. 16, 1978)

A notice of appeal from Geological Survey's failure to approve a communitization agreement must be filed within 30 days after appellant is served with the decision thereof or the doctrine of administrative finality generally bars consideration of the same issue in a later appeal.

Where approval of a communitization agreement has been denied, and other authorization is not present, production from an oil and gas lease within a State spacing unit cannot be attributed to another Federal lease, and absent production that lease expires at the end of its term.

Gulf Oil Corp., 44 IBLA 292 (Dec. 26, 1979)

COMPETITIVE LEASES

Where high bids, not clearly spurious or irresponsible, tendered at a competitive sale of oil and gas leases, are rejected solely on the statement of a field official that the bids are inadequate, and no basis whatever for that conclusion is reflected in the case record, the decision will be set aside and the case will be remanded for the compilation of a proper record and readjudication of the acceptability of the bids.

Arkla Exploration Co., 22 IBLA 92 (Sept. 22, 1975)

Frances J. Richmond, 24 IBLA 303 (Apr. 5, 1976)

The provisions of the Mineral Leasing Act for Acquired Lands, 61 Stat. 913, 30 U.S.C. § 351 et seq. (1970), and those of the Mineral Leasing Act, 41 Stat. 437, 30 U.S.C. § 181 et seq. (1970), authorize the Secretary of the Interior to reject high bids for upland oil and gas lease based on the inadequacy of the bonus bid if such rejection has a reasonable basis in fact.

An oil and gas lease bidder appealing from the rejection of his tender on the basis of inadequacy of the bonus bid must show by substantial evidence either (1) the criteria utilized in establishing the minimum bid value failed to include all relevant considerations, or included factors that were not relevant; or (2) the criteria were incorrectly applied.

H & W Oil Co., Inc., 22 IBLA 313 (Nov. 10, 1975)

OIL AND GAS LEASES--Continued

COMPETITIVE LEASES--Continued

Rejection of the high bid(s) tendered for parcel(s) of land offered at a sale of competitive oil and gas leases will be affirmed on appeal where the case file contains memoranda from the U.S. Geological Survey sufficient to establish that the pre-sale minimum evaluation for the tract(s) was accomplished by a GS lease sale committee consisting of an engineer and a geologist, and their reasoned evaluation was considerably in excess of appellant's bid(s).

The U.S. Geological Survey is the Secretary's technical expert in matters concerning geologic evaluation of tracts of land offered at a sale of competitive oil and gas leases, and the Secretary is entitled to rely on its reasoned analysis.

Under 43 CFR 3120.3-1, the United States reserves the right to reject any and all bids submitted at a competitive oil and gas lease sale. However, a decision involving the exercise of administrative discretion must be supportable on a rational basis.

Arkla Exploration Co., 25 IBLA 220 (June 21, 1976)

Frances J. Richmond, 29 IBLA 137 (Mar. 3, 1977)

In the absence of specific statutory authority to lease, the Secretary of the Interior has implied authority, as guardian of the public's natural resources, to lease an oil and gas deposit under his jurisdiction when it is in danger of being drained by wells drilled on adjacent land. However, such protective leases may be issued only by competitive bidding.

James L. Scott, 25 IBLA 390 (July 6, 1976)

The requirement that a bidder in a competitive oil and gas lease sale must submit one-fifth of the amount bid with his bid is mandatory and will not be waived.

Sarkeys, Inc., 26 IBLA 181 (Aug. 2, 1976)

The Secretary of the Interior has the authority to reject a high bid in a competitive oil and gas lease sale on the basis of an inadequate bonus where the rejection has a reasonable basis in fact.

Where high bids tendered at a competitive oil and gas lease sale, which are not clearly spurious or irresponsible, are rejected solely on the basis of a statement by an official that the bids are inadequate and no factual basis for that conclusion appears in the case record, the decision will be set aside and the cases remanded for compilation of a proper record and readjudication of the acceptability of the bids.

Yates Petroleum Corp., 27 IBLA 224 (Oct. 12, 1976)

Where the ostensible high bidder for an oil and gas lease sold by competitive bidding is determined to be unqualified under the regulations and notice of sale, and the second high bid, proper in all respects, greatly exceeds the Government's presale evaluation for the parcel, it is proper to consider such second high bid and to issue a lease therefor, if it is in the Government's best interest to do so.

Phillips Petroleum Co., 28 IBLA 175 (Nov. 24, 1976)

OIL AND GAS LEASES--Continued

COMPETITIVE LEASES--Continued

The provisions of 30 U.S.C. §§ 188(b) and (c) (1970), and decisions of the Board discussing those provisions, are generally applicable to both competitive and noncompetitive oil and gas leases on which there is no well capable of producing oil or gas in paying quantities.

Oil Resources, Inc., 28 IBLA 394 (Feb. 7, 1977)
84 I.D. 91

In order to constitute a clear and definite offer, a bid for an outer continental shelf oil and gas lease must adequately identify the tract which is the subject of the bid.

It is not the responsibility of Bureau of Land Management employees to decipher ambiguous bids for outer continental shelf oil and gas leases in order to save the bidder from the consequences of his own negligence. A bid which was apparently intended for one tract and contains data appropriate for that tract, but identifies a different tract as the subject of the bid, is properly considered, and rejected as too low, for the identified tract.

A rejected bid in an outer continental shelf oil and gas lease sale may be reconsidered and accepted when it is in the public interest to do so. The essential elements in allowing such a reconsideration are the fairness and impartiality of the sale toward all bidders. In a situation where a bid was initially rejected as too low for the tract identified in the bid and the bidder immediately requests reconsideration because he intended to bid for a different tract, where the tract number stated in the bid corresponds to the block number of the intended tract, where all other relevant data in the bid corresponds to the intended tract and only to the intended tract, and where no other person submitted a bid for the intended tract, it is proper to reconsider the bid to determine if it is in the public interest to accept the bid for the intended tract.

Alaska Oil and Minerals Corp., 29 IBLA 224 (Mar. 23, 1977)
84 I.D. 116

A rejection of a high bid tendered for a parcel of land offered at a sale of competitive oil and gas leases will be affirmed on appeal where the record contains sufficient information from the U.S. Geological Survey to establish that the pre-sale minimum evaluation for the tract, which greatly exceeded the rejected bid, was not arbitrary or capricious, it having been arrived at by a lease sale committee consisting of two geologists and three engineers which in addition to considering the results of a computer analysis took into account a hand compilation and the judgment and knowledge of the committee.

The U.S. Geological Survey is the Secretary's technical expert in matters concerning geologic evaluation of tracts of land offered at a sale of competitive oil and gas leases and the Secretary is entitled to rely on its reasoned analysis.

Coquina Oil Corp., 29 IBLA 310 (Mar. 30, 1977)

The Secretary of the Interior has the discretionary authority to reject a high bid in a competitive oil and gas lease sale where the record discloses a rational basis for the conclusion that the amount of the bid was inadequate.

Where the high bid tendered at a competitive onshore oil and gas lease sale is not clearly spurious or irresponsible, and is rejected solely on the basis of a statement by an official that the bid is inadequate and no factual basis for that conclusion appears in

OIL AND GAS LEASES--Continued

COMPETITIVE LEASES--Continued

the case record, the decision will be set aside and the case remanded for readjudication of the acceptability of the bid.

Yates Petroleum Corp., 32 IBLA 196 (Sept. 15, 1977)

The Bureau of Land Management may not accept a bid in a competitive lease sale where the bid proposes a royalty different from that set out in the lease sale notice.

In a competitive lease sale, the royalty provisions in the lease are those specified in the notice of sale.

The highest bidder in a competitive lease sale does not forfeit his deposit of one-fifth the amount of the bid where he is ineligible to be awarded the lease because he conditions his bid upon royalty provisions other than those set out in the lease sale notice.

Lee E. Loeffler, 33 IBLA 18 (Nov. 22, 1977)

The Secretary of the Interior has the discretionary authority to reject a high bid in a competitive oil and gas lease sale where the record discloses a rational basis for the conclusion that the amount of the bid was inadequate.

Where the high bid tendered at a competitive onshore oil and gas lease sale is not clearly spurious or irresponsible, and is rejected solely on the basis of a statement by an official that the bid is inadequate and no factual basis for that conclusion appears in the case record, the decision will be set aside and the case remanded.

Basil W. Beasel, 34 IBLA 29 (Feb. 16, 1978)

BLM is without authority to alter an ambiguous competitive oil and gas lease bid in order to make it valid.

R. E. Price, 34 IBLA 61 (Feb. 16, 1978)

The Secretary of the Interior has the discretionary authority to reject a high bid in a competitive oil and gas lease sale where the record discloses a rational basis for the conclusion that the amount of the bid was inadequate.

The U.S. Geological Survey is the Secretary's technical expert in matters concerning geologic evaluation of tracts of land offered at a sale of competitive oil and gas leases and the Secretary is entitled to rely on its reasoned analysis.

Where the high bid tendered at a competitive upland oil and gas lease sale, which is not clearly spurious or irresponsible, is rejected solely on the basis of a conclusory statement that the bid is inadequate and the factual basis for that conclusion does not appear in the case record, the decision will be set aside and the case remanded for compilation of a more complete record and readjudication of the bid.

Gerald S. Ostrowski, 34 IBLA 254 (Mar. 28, 1978)

OIL AND GAS LEASES--Continued

COMPETITIVE LEASES--Continued

Before issuance of a competitive oil and gas lease for land within the area of an approved unit agreement, it is proper to require the successful bidder to file evidence that he has entered into an agreement with the unit operator for development of the land in the lease under the terms and provisions of the approved unit agreement or to file a statement giving satisfactory reasons for failure to enter such agreement.

Where high bidder for a competitive oil and gas lease within the area of an approved unit agreement fails to file evidence showing joinder to the unit agreement or to submit satisfactory reasons for failure to enter into agreement with the unit operator, it is proper to reject his bid and to refund the bonus payment tendered with the bid.

Gordon H. Barrows, 36 IBLA 160 (July 31, 1978)

Where a high bid was timely filed prior to the deadline for bids, but was subsequently mislaid by BLM and was not relocated until after another lower bid was declared high, BLM properly accepted the true high bid and retracted its declaration regarding the lower bid.

Jack M. Chodar, 36 IBLA 324 (Aug. 23, 1978)

The failure of a high bidder, in an upland competitive lease sale, to submit one-fifth of the amount bid with his bid in the proper form of remittance, may not be waived where the bidder submitted a sight draft, and thus retained control of the fund until presentment and final payment.

Mesa Petroleum Co., 37 IBLA .03 (Sept. 28, 1978)

Where the high bidder in a competitive oil and gas lease sale submits a bid in which the per acre component bid is inconsistent with the total bid, clarification of the bid will be permitted where the intent of the bidder is discernible from the evidence of the bid form, itself.

Patrick Petroleum Corp., 38 IBLA 93 (Nov. 15, 1978)

Where the high bid tendered at a competitive upland oil and gas lease sale, which is not clearly spurious or irresponsible, is rejected, and on appeal the offeror makes assertions which, if true, would undermine the factual basis for the rejection of the offer, the decision rejecting the offer will be set aside and the case remanded for the compilation of a more complete record and readjudication of the acceptability of the bid.

Ojai Oil Co., 39 IBLA 173 (Jan. 30, 1979)

The Secretary of the Interior has the authority to reject a high bid in a competitive oil and gas lease sale on the basis of an inadequate bonus where the rejection has a reasonable basis in fact.

Where high bids tendered at a competitive oil and gas lease sale, which are not clearly spurious or irresponsible, are rejected solely on the basis of a conclusory statement by an official of the Geological Survey that the bids are inadequate, and no factual basis for that conclusion appears in the case record, and a request for supporting documentation has been refused, the decision will be reversed as arbitrary and capricious.

Steven and Mary Lutz, 39 IBLA 386 (Feb. 28, 1979)

OIL AND GAS LEASES--Continued

COMPETITIVE LEASES--Continued

Under 43 CFR 3120.3-1, rejection of the high bid tendered for a parcel of land offered at a sale of competitive oil and gas leases will be affirmed where there is a rational basis for the conclusion that the highest bid was too low.

R. E. Price, 40 IBLA 85 (Mar. 22, 1979)

The Secretary of the Interior has the authority to reject a high bid in a competitive oil and gas lease sale on the basis of an inadequate bonus where the rejection has a reasonable basis in fact.

Where a high bid tendered at an uplands competitive oil and gas lease sale, which is not clearly spurious or irresponsible, is rejected solely on the basis of statements by an official of the Geological Survey that the bid is inadequate, and no substantial factual basis for that conclusion appears in the case record, and a request for supporting documentation has been refused by the Geological Survey, the decision will be reversed and the case remanded to the Bureau of Land Management for its evaluation of the acceptability of the bids.

Charles B. Hinkle, Chevron, U.S.A., Inc., 40 IBLA 250 (Apr. 16, 1979)

The Secretary of the Interior has the discretionary authority to reject a high bid in a competitive oil and gas lease sale where the record discloses a rational basis for the conclusion that the amount of the bid was inadequate.

The U.S. Geological Survey is the Secretary's technical expert in matters concerning geologic evaluation of tracts of land offered at a sale of competitive oil and gas leases and the Secretary is entitled to rely on its reasoned analysis.

Where an uplands competitive oil and gas lease high bid is not clearly spurious or unreasonable on its face and the record fails to disclose the factual basis for the conclusion that the bid is inadequate, the decision will be set aside and the case remanded for compilation of a more complete record and readjudication of the bid.

Southern Union Exploration Co., 41 IBLA 81 (May 31, 1979)

The requirement of forfeiture of the bid deposit if the qualified high bidder fails to enter a lease must be enforced to prevent those bidders with greater capital resources from gaining an unfair advantage.

Fred S. Gheleraducci, 41 IBLA 277 (June 28, 1979)

Failure to execute a lease results in forfeiture of the bid deposit by the high bidder in a competitive oil and gas lease sale.

Bernard F. Gencorelli, 43 IBLA 7 (Sept. 11, 1979)

Where the notice of a competitive oil and gas lease sale clearly provided that the lease would be subject to stipulations, by making a bid, the offeror was bound to accept the stipulations.

Falcon Oil and Gas Co., 43 IBLA 115 (Sept. 24, 1979)

OIL AND GAS LEASES--Continued

COMPETITIVE LEASES--Continued

Under 43 CFR Part 3120 an oil and gas "bid" must be submitted as well as a deposit, and where neither a per acre nor total bid amount is included, the bid submission must be rejected despite argument the bids amounts may be determined from the deposit amount.

Davis Oil Co., 43 IBLA 320 (Oct. 22, 1979)

Under 43 CFR 3120.3-1, the United States reserves the right to reject all bids, but any rejection must be based on a record sufficient to establish that the rejection has a reasonable basis in fact.

The U.S. Geological Survey is the Secretary's technical expert in matters concerning geologic evaluation of tracts of land offered at a sale of competitive oil and gas leases and the Secretary is entitled to rely on its reasoned analysis.

Under 43 CFR 3120.3-1, rejection of a high bid tendered at a sale of competitive oil and gas leases will be affirmed on appeal where the case file contains memoranda from the U.S. Geological Survey sufficient to establish that the rejection has a reasonable basis in fact.

Gerald S. Ostrowski (On Reconsideration after Remand), 44 IBLA 17 (Nov. 6, 1979)

Rejection of the high bid tendered for a parcel of land offered at a competitive oil and gas lease sale will be affirmed on appeal where it is supported on a rational basis by uncontradicted U.S. Geological Survey memoranda.

The U.S. Geological Survey is the Secretary's technical expert in matters concerning geologic evaluation of tracts of land offered at a sale of competitive oil and gas leases and the Secretary is entitled to rely on its reasoned analysis.

Basil W. Beagel, 44 IBLA 62 (Nov. 20, 1979)

CONSENT OF AGENCY

Where the Forest Service suggests a stipulation barring any occupancy and use of the surface as a condition precedent to the issuance of an oil and gas lease for public lands in a national forest, based only on the fact that the land is in an "inventoried roadless area," and where later the Forest Service agrees to a revised stipulation, the Bureau of Land Management decision to the extent it required the execution and filing of the "Roadless Area" stipulation will be set aside and the case remanded to the Bureau for submission of the substitute stipulation to the offeror for execution and filing.

James A. Krumhansl, 19 IBLA 56 (Feb. 21, 1975)

Where the Forest Service requests a stipulation effectively barring any occupancy or use of the surface as a condition precedent to the issuance of an oil and gas lease for lands in a national forest, based on the fact that the land is in an "inventoried roadless area," and where the Forest Service later substitutes a less restrictive stipulation, a Bureau of Land Management decision requiring the execution and filing of the roadless area stipulation will be vacated and the case will be remanded to the Bureau for submission of the substitute stipulation to the offeror for execution and filing.

Benjamin T. Franklin, 19 IBLA 94 (Mar. 4, 1975)

OIL AND GAS LEASES--Continued

CONSENT OF AGENCY--Continued

Where an application to lease land under the jurisdiction of another agency is rejected because of objections by that agency, and where on appeal that agency subsequently agrees to lease the land subject to certain special stipulations, such stipulations will be submitted to the offeror for execution.

Shell Oil Co., 20 IBLA 282 (May 27, 1975)

The Mineral Leasing Act for Acquired Lands of 1947, *as amended*, 30 U.S.C. §§ 351-359 (1970), requires that the consent of the administrative agency having jurisdiction of the acquired land described in a lease offer be obtained prior to the issuance of an oil and gas lease for such land. The Department of the Interior has no discretionary authority to lease such land where the consent is withheld.

Frederick L. Smith, 21 IBLA 239 (Aug. 11, 1975)

Sallie E. Sanford, 24 IBLA 31 (Feb. 17, 1976)

Charles F. Bajek and Frederick L. Smith, 29 IBLA 330 (Mar. 31, 1977)

Geo, Inc., 34 IBLA 27 (Feb. 14, 1978)

Where the Forest Service requests imposition of a stipulation effectively barring any occupancy or use of the surface as a condition precedent to the issuance of an oil and gas lease for lands in a national forest, the case will be set aside and remanded for consideration of a less stringent stipulation which the Forest Service has agreed to in other cases arising in the same and other national forests in Utah.

G. W. Anderson, 21 IBLA 328 (Aug. 14, 1975)

The execution of special stipulations as a condition precedent to issuance of oil and gas lease for land located in a national forest may be required at the discretion of the Secretary of the Interior in order to protect environmental and other land use values. The need for the stipulation should be clear and the stipulation should be a reasonable means to the intended purpose. The Forest Service's recommended stipulations will be carefully considered by the Department, but the final authority for oil and gas leasing on public domain land rests in this Department.

Earl B. Wilson, 21 IBLA 392 (Aug. 27, 1975)

The execution of special stipulations as a condition precedent to the issuance of oil and gas leases for land located in national forests may be required at the discretion of the Secretary of the Interior in order to protect environmental, recreational and other land use values. In each case the need for the stipulation should be clear and the means to accomplish the intended purpose should be reasonable.

Bill J. Maddox, 22 IBLA 97 (Sept. 22, 1975)

The Secretary of the Interior may require execution of special stipulations reasonably designed to protect identifiable resource values as a condition precedent to issuance of an oil and gas lease. Stipulations proposed by the Forest Service will be carefully considered by this Department, but the final decision for oil and gas leasing on public domain land rests with this Department. A "no surface occupancy" stipulation proposed in order to protect a recreation area cannot

CONSENT OF AGENCY--Continued

stand if it might preclude surface occupancy unreasonably beyond the boundaries of the recreation area.

Beverley Lasrich, 22 IBLA 202 (Oct. 15, 1975)

An applicant for an acquired lands oil and gas lease must execute any special stipulations required by the agency administering the land as a condition precedent to the issuance of the lease, or suffer rejection of the offer.

Sallie B. Sanford, 22 IBLA 289 (Oct. 30, 1975)

National forest public lands which have not been withdrawn from oil and gas leasing but are under study by the Forest Service as a proposed wilderness area are available for leasing in the discretion of, and under conditions imposed by, the Secretary of the Interior. Such discretion is not properly exercised when the Bureau of Land Management rejects an offer solely upon the recommendation of the Forest Service that land is a "candidate" for a proposed wilderness area without making an independent determination that leasing, with appropriate protective stipulations, is or is not in the public interest.

Esdras K. Hartley, 23 IBLA 102 (Dec. 23, 1975)

The recommendations of the Forest Service are important in determining whether or not an oil and gas lease should issue for public lands but are not conclusive. Ultimately, the Secretary of the Interior is entrusted with the responsibility of determining whether or not to issue a lease.

Where the Bureau of Land Management rejects an oil and gas lease offer for public lands within a national forest solely on the objection of the Forest Service and where the Bureau officials did not make an independent determination whether leasing the lands is or is not in the public interest, the rejection is not a proper exercise of discretion and the case will be remanded to the Bureau for further consideration.

Stanley M. Edwards, 24 IBLA 12 (Feb. 4, 1976)
83 I.D. 33

The Mineral Leasing Act of 1920 vests the Department of the Interior with the discretion to lease public lands for oil and gas, including public lands in the national forests. Although this Department gives most careful consideration to the recommendations of the Forest Service, the latter does not have a veto power over public land leasing.

Chevron Oil Co., 24 IBLA 159 (Mar. 15, 1976)

The Secretary of the Interior may require an oil and gas lease applicant to accept stipulations reasonably designed to protect environmental and other land use values as a condition precedent to the issuance of a lease. Where a Bureau of Land Management districtwide environmental analysis record establishes the likelihood that significant archaeological values are prevalent in the district and may be found in the land embraced by leases in that district, a special protective stipulation is not unreasonable solely because no archaeological values have yet been discovered in the lease offer.

Cecil A. Walker, Alan C. F. Dille', 26 IBLA 71 (July 9, 1976)

CONSENT OF AGENCY--Continued

The Secretary of the Interior may require execution of special stipulations reasonably designed to protect environmental and other land use values as a condition precedent to the issuance of an oil and gas lease. But where a State Office of the Bureau of Land Management seeks to impose a "no surface occupancy" stipulation, the most stringent of stipulations, without a showing that it has considered less stringent stipulations, the decisions will be set aside. Where the stated basis for the imposition of the stipulation is the threat of oil and gas activities to automobile racing, the decision will be set aside particularly where the lease offers include land primarily outside the boundaries of the racing grounds withdrawal.

Vern K. Jones et al., 26 IBLA 165 (Aug. 4, 1976)

When the Forest Service recommends against issuing an oil and gas lease for public land because the land has been included within a wilderness candidate study area, the Bureau of Land Management must make an independent determination on whether the lease, with stipulations, should be issued. A case will be remanded for such a determination especially where the Forest Service on appeal has reconsidered and recommends leasing with certain stipulations.

Fred P. Blume, 28 IBLA 58 (Nov. 9, 1976)

When the Forest Service recommends against issuing an oil and gas lease for public land because the land has been included within a wilderness candidate study area, the Bureau of Land Management must make an independent determination on whether not to issue a lease or whether issuance of a lease subject to appropriate stipulations is in the public interest. A case will be remanded to the Bureau of Land Management for an independent determination where it is evident that such has not been done.

Kenneth F. Cummings and A. W. Fleming, Empire Resources, Inc., 28 IBLA 73 (Nov. 12, 1976)

Under the Mineral Leasing Act for Acquired Lands of 1947, *as amended*, 30 U.S.C. §§ 351-359 (1970), if the lands embraced within an oil and gas lease application are under surface jurisdiction of a service or bureau within the Department of the Interior, as are the National Park Service and the Bureau of Reclamation, the consent of the Secretary of the Interior, is necessary under the Act to the leasing of the land. Where the National Park Service recommends that oil and gas leases for lands within the boundaries of the Chickasaw National Recreation Area be rejected in order to maintain the area for the purposes for which it was established, it is proper to accept this recommendation and reject the offers.

Daphine Shear, David L. Shear, 29 IBLA 33 (Feb. 10, 1977)

The Bureau of Land Management must reject a noncompetitive oil and gas lease offer for acquired lands under the jurisdiction of the Department of the Air Force where the latter agency withholds its consent from the issuance of a lease.

Capitol Oil Corp., 33 IBLA 392 (Jan. 26, 1978)

OIL AND GAS LEASES--Continued

CONTRACTS FOR SALE OF ROYALTY OIL OR GAS

The Department may not sell royalty oil to an ineligible refinery, unless the Secretary of the Interior finds that the crude oil needs of refiners eligible to purchase crude oil under 30 U.S.C. § 192 (1970) are being met in the open market.

A regulation defining "eligible refiners" under the Act of July 13, 1946, providing for the sale of Government royalty oil or gas, as owners of existing refineries (including refineries not in operation) who qualify as a small business enterprise under the rules of the Small Business Administration and who are unable to purchase in the open market an adequate supply of crude oil to meet the needs of their existing refinery capacities, is an implementation of the Act within the ambit of the Secretary of the Interior's authority to prescribe rules and regulations.

Thunderbird Resources, Inc., 20 IBLA 248 (May 16, 1975)

Where consideration of an application to participate in the Government royalty oil sales program filed after the deadline could interfere with the rights of other applicants and would unduly interfere with the orderly conduct of the program, the application is properly rejected.

A. Johnson & Co., Inc., 38 IBLA 182 (Dec. 6, 1978)

DESCRIPTION OF LAND

An oil and gas lease offer will not be rejected on the basis of a defective land description merely because some of the land applied for is not available for leasing where the offeror has submitted advance rental for all of the land described. Generally, where an offer describes an entire section and only part of that land is available for leasing, a lease will be issued for the land available and the offer rejected for the balance of the land in the section.

The description of an entire section of land modified by the word "available" in an oil and gas lease application is an offer to lease all of that section, subject to availability for leasing. An offer containing such a description need not be rejected for lack of a legally sufficient description where the offer is accompanied by the required rent for all of the land described therein.

Milan S. Papulak, 30 IBLA 77 (Apr. 18, 1977)

BLM is not required to alter, modify, or correct an over-the-counter oil and gas lease offer in order to resolve a disparity in the land description contained therein.

C. C. Hughes, 33 IBLA 237 (Dec. 28, 1977)

Where an offer for an oil and gas lease describes lands in a section number followed by several aliquot parts and concludes with the words "(all available)," those words refer only to lands available within the aliquot parts and not to other aliquot parts of the section not specifically listed.

Jean Oakason, 34 IBLA 355 (Apr. 26, 1978)

OIL AND GAS LEASES--Continued

DESCRIPTION OF LAND--Continued

A metes and bounds description, with courses and distances between successive angle points and appropriate ties to the nearest official survey corner, is properly required pursuant to 43 CFR 3101.2-3(a) where the description of lands in an oil and gas lease offer cannot be conformed to the public land surveys.

Wilfred Plomis, 44 IBLA 264 (Dec. 19, 1979)

DISCRETION TO LEASE

The Department has discretionary authority to issue or not to issue leases under the Mineral Leasing Act for Acquired Lands, 30 U.S.C. §§ 351-59 (1970).

In exercising its discretion to lease or not to lease oil and gas under the Mineral Leasing Act for Acquired Lands, 30 U.S.C. §§ 351-59 (1970), the Department may reject an oil and gas lease offer filed thereunder, where the minerals are held in trust for the Shoshone and Arapaho Indians and are leasable under the Act of Aug. 21, 1916, 39 Stat. 519.

General Crude Oil Co., 18 IBLA 326 (Jan. 7, 1975)

Where an oil and gas lease offer for public lands within 1 mile of the exterior boundaries of a naval petroleum reserve is rejected because the Department of the Navy recommends against the leasing of the land despite the Geological Survey's determination that operations on the subject land would not adversely affect the naval reserve through drainage from known productive horizons, the decision rejecting the lease offer will be reversed. The recommendations of the Federal agency exercising jurisdiction over a naval petroleum reserve, while important, are not conclusive. The final determination rests with the Department, and where the Geological Survey after full consideration of pertinent technical considerations recommends leasing, a lease will issue.

R. Garvin Berry, Jr., 18 IBLA 331 (Jan. 9, 1975)

Oil and gas lease offers embracing lands within an area under consideration as a potential wild and scenic river area pursuant to sec. 5(d) of the Wild and Scenic Rivers Act, 16 U.S.C. § 1276(d) (1970), or within adjacent areas having special resource values which might be damaged by oil and gas leasing may be properly rejected in the exercise of the Secretary's discretion in leasing.

John Oakason, Beard Oil Co., 19 IBLA 191 (Mar. 18, 1975)

Rosita Trujillo, 21 IBLA 289 (Aug. 11, 1975)

Under the Mineral Leasing Act of 1920, *as amended*, 30 U.S.C. § 181 *et seq.* (1970), the first-qualified applicant has a preference right to receive an oil and gas lease where the Department of the Interior has in the exercise of its discretion, determined to issue such a lease. But a lease offer does not create a vested interest where there has been no determination to lease the lands embraced in the lease offer. In the latter instance, the application for a lease is a hope or expectation rather than a valid claim against the Government, and the lease offeror has acquired no rights which are violated by issuance of a patent to the State of Alaska for the lands embraced in the lease offer.

Duncan Miller, 20 IBLA 1 (Apr. 14, 1975)

OIL AND GAS LEASES--Continued

DISCRETION TO LEASE--Continued

The Department of the Interior has full and final authority to determine whether or not to issue oil and gas leases. Where the lands embraced within an oil and gas lease offer contain established archaeological sites and in the opinion of the responsible Departmental officials oil and gas exploration activities would destroy or impair the sites, a lease offer is properly rejected, absent an affirmative showing on behalf of the offeror that exploration activities would not infringe upon the archaeological resources of the area.

Rosita Trujillo, 20 IBLA 54 (Apr. 24, 1975)

Sec. 6(b) of the Alaska Statehood Act providing for recognition of valid existing claims does not apply to an oil and gas lease offer filed pursuant to the Mineral Leasing Act of 1920. While an oil and gas lease offeror may have a right to a lease where the Department has exercised its discretion to issue a lease, and the offeror is entitled to a statutory priority right over other offerors, his application does not rise to the level of a "claim" or "right" within the savings clause of the Alaska Statehood Act where there has been no such determination to lease.

Regulation 43 CFR 2627.3(b)(2) requires that conflicting oil and gas lease offers filed pursuant to the Mineral Leasing Act of 1920, except for preference right applications, whether filed prior to, simultaneously with, or after the filing of an Alaska State selection, must be rejected when and if the selection is tentatively approved. The preference right referred to in the regulation does not apply to an oil and gas lease offeror who receives a priority right as the first-qualified applicant in the event the Department decides to issue a lease.

Richard W. Rowe, Daniel Gaudiane, 20 IBLA 59 (Apr. 24, 1975)
82 I.D. 174

An offer for an oil and gas lease under the Mineral Leasing Act for Acquired Lands may properly be rejected where there is uncertainty regarding the title to the oil and gas deposits.

Shell Oil Co., 20 IBLA 292 (May 27, 1975)

Under sec. 17 of the Mineral Leasing Act of 1920, *as amended*, the Secretary of the Interior has discretion to refuse to issue an oil and gas lease in the interest of conservation, wildlife protection, and other purposes in the public interest.

The general prohibition against oil and gas leasing in wildlife refuges contained in 43 CFR 3101.3-3 (unless there is drainage) is a formal exercise of the Secretary's discretion under sec. 17 of the Mineral Leasing Act of 1920, *as amended*.

The Secretary's authority to withdraw public lands is separate from, and in addition to, the Secretary's discretionary authority under sec. 17 of the Mineral Leasing Act of 1920, *as amended*. Therefore, public lands which are described in a public land order as not withdrawn from leasing under the mineral leasing laws remain subject to an exercise of the Secretary's discretion under sec. 17 of the Mineral Leasing Act of 1920, *as amended*.

T. R. Young, Jr., 20 IBLA 333 (June 11, 1975)

OIL AND GAS LEASES--Continued

DISCRETION TO LEASE--Continued

The prohibition in 43 CFR 3101.3-3(a)(1) against leasing for oil and gas in wildlife refuge lands, except where there is drainage, applies to areas withdrawn for waterfowl production, even though the withdrawal order did not prohibit leasing. Offers for such lands and lakebeds riparian thereto are properly rejected.

A. G. Golden, 21 IBLA 76 (June 25, 1975)

On appeal from decision(s) rejecting oil and gas lease offer(s) insofar as they include land(s) within a lava flow under consideraton for primitive or natural area status, when the Bureau of Land Management indicates that it is willing to lease some of the land(s) under a no-surface-occupancy stipulation, and the offeror(s) indicate they would accept such a stipulation for all the land(s) at issue, the decision(s) will be set aside and the case(s) remanded for consideration of issuance of lease(s) containing no-surface-occupancy stipulation(s) on the land(s) in the lava flow.

Houston Oil and Minerals Corp., Leland A. Hodges (Trustee), 22 IBLA 172 (Sept. 30, 1975)

Leland A. Hodges (Trustee), 23 IBLA 142 (Dec. 23, 1975)

The provisions of the Mineral Leasing Act for Acquired Lands, 61 Stat. 913, 30 U.S.C. § 351 *et seq.* (1970), and those of the Mineral Leasing Act, 41 Stat. 437, 30 U.S.C. § 181 *et seq.* (1970), authorize the Secretary of the Interior to reject high bids for upland oil and gas leases based on the inadequacy of the bonus bid if such rejection has a reasonable basis in fact.

H & W Oil Co., Inc., 22 IBLA 313 (Nov. 10, 1975)

National forest public lands which have not been withdrawn from oil and gas leasing but are under study by the Forest Service as a proposed wilderness area are available for leasing in the discretion of, and under conditions imposed by, the Secretary of the Interior. Such discretion is not properly exercised when the Bureau of Land Management rejects an offer solely upon the recommendation of the Forest Service that land is a "candidate" for a proposed wilderness area without making an independent determination that leasing, with appropriate protective stipulations, is or is not in the public interest.

Esdras K. Hartley, 23 IBLA 102 (Dec. 23, 1975)

In the absence of a withdrawal of land from mineral leasing, public lands are subject to leasing for oil and gas in the discretion of and under conditions imposed by the Secretary of the Interior.

Where the Bureau of Land Management rejects an oil and gas lease offer for public lands within a national forest solely on the objection of the Forest Service and where the Bureau officials did not make an independent determination whether leasing the lands is or is not in the public interest, the rejection is not a proper exercise of discretion and the case will be remanded to the Bureau for further consideration.

Stanley T. Edwards, 24 IBLA 12 (Feb. 4, 1976)
83 I.D. 33

OIL AND GAS LEASES--Continued

DISCRETION TO LEASE--Continued

While the Secretary of the Interior has the authority to reject oil and gas lease offers in the public interest, such rejection must be rationally related to that public interest. Where an offer to lease lands in an "elk winter pasture" is rejected a few months after issuing a similar lease to another person for lands within the same area, which lands are apparently indistinguishable from the lands in the rejected lease offer, such offer will be remanded for reconsideration.

L. A. Idler, 24 IBLA 28 (Feb. 11, 1976)

National forest lands, some of which are in a wilderness area, a roadless area, or a memorial parkway, which have not been withdrawn from oil and gas leasing, are subject to leasing in the discretion of and under conditions imposed by the Secretary of the Interior. However, where the Secretary of the Interior has specifically determined by formal publication of a memorandum that lands in a certain section of a national forest are to be withheld from leasing, he has exercised his plenary discretion to refuse to issue leases, and subsequent offers for lands in this designated area restricted from leasing are properly rejected.

James Donoghue et al., 24 IBLA 210 (Mar. 23, 1976)

Uncertainty of title to oil and gas in an acquired land tract is sufficient ground for the rejection of a lease offer in the exercise of the Secretary's discretionary authority over leasing. The burden is on the lease applicant to demonstrate that the minerals he seeks to lease are owned by the United States as an acquired interest. A decision rejecting an offer will be affirmed where appellant has failed to meet this burden and a significant question of title remains.

Don Jumper, 24 IBLA 218 (Mar. 24, 1976)

The Secretary of the Interior may, in his discretion, reject any offer to lease public lands for oil and gas deposits upon a proper determination that the leasing would not be in the public interest, even though the land applied for is not withdrawn from leasing under the Mineral Leasing Act.

While the Bureau of Land Management may reject oil and gas lease offers or require stringent protective stipulations in order to protect the environment, such action must be supported by facts of record. Where such action is taken and is supported only by statements that leasing would not be in the public interest, the case will be remanded to the Bureau for a more complete exposition of the basis for the action.

Cartridge Syndicate, 25 IBLA 57 (May 20, 1976)

When the Secretary of the Interior determines that an oil and gas lease is to be issued for a particular tract, it must be issued to the first-qualified applicant. An applicant is not qualified because of his failure to comply with 43 CFR 3112.2-1(a) when he fails to provide the name of the State in which the parcel of land is located.

Ishmael Guerra, 26 IBLA 116 (July 26, 1976)

The Secretary of the Interior may require execution of special stipulations reasonably designed to protect environmental and other land use values as a condition precedent to the issuance of an oil and gas lease. But where a State Office of the Bureau of Land Management seeks to impose a "no surface occupancy" stipulation, the most stringent of stipulations, without a showing that it has considered less stringent stipulations, the decisions will be set aside. Where the stated basis for the imposition of the stipulation is the threat of oil and gas activities to automobile racing, the decision will be set aside particularly where the lease offers include land primarily outside the boundaries of the racing grounds withdrawal.

Vern K. Jones et al., 26 IBLA 165 (Aug. 4, 1976)

The Secretary has discretionary authority to reject an oil and gas lease offer where Federal title to the oil and gas deposits is uncertain.

Leonard E. McSwain, David A. Provinse, 26 IBLA 376 (Sept. 9, 1976)

Where title to the minerals in a tract of acquired land which is the subject of an oil and gas lease offer cannot be determined from records in the possession of the BLM, the burden is on the applicant to search the land records to ascertain the chain of title and establish the eligibility of the tract for leasing. Applicant may be required to furnish evidence from the county recorder's office in the nature of a title abstract sufficient to allow the Solicitor to render a legal opinion regarding title to the oil and gas in the tract sought for leasing. Rejection of the offer in the exercise of the Secretary's discretion over leasing is proper where applicant declines to provide such information.

Where there is uncertainty regarding title to the oil and gas in an acquired land tract embraced in an oil and gas lease offer, and the evidence provided by the applicant is not sufficient basis for a legal opinion as to the status of title, the offer is properly rejected by the BLM. However, if the applicant provides new evidence on appeal tending to show the existence of a United States interest in the oil and gas in the tract, the case may be remanded for consideration of the new evidence.

Jean Oakason, 27 IBLA 41 (Sept. 22, 1976)

The Secretary of the Interior has the authority to reject a high bid in a competitive oil and gas lease sale on the basis of an inadequate bonus where the rejection has a reasonable basis in fact.

Yates Petroleum Corp., 27 IBLA 224 (Oct. 12, 1976)

Steven and Mary Lutz, 39 IBLA 386 (Feb. 28, 1979)

Charles B. Hinkle, Chevron, U.S.A., Inc., 40 IBLA 250 (Apr. 16, 1979)

The Secretary of the Interior may, in his discretion, reject any offer to lease public lands for oil and gas upon a proper determination that the leasing would not be in the public interest, even though the land applied for is not withdrawn from leasing under the Mineral Leasing Act. Where the land is part of a designated winter pasture for a large elk herd, and it has been determined that oil and gas operations would adversely

OIL AND GAS LEASES--Continued

DISCRETION TO LEASE--Continued

affect that use of the land to a substantial extent, rejection of the lease offer will be affirmed.

L. A. Idler (Supp.), 28 IBLA 8 (Nov. 5, 1976)

When the Forest Service recommends against issuing an oil and gas lease for public land because the land has been included within a wilderness candidate study area, the Bureau of Land Management must make an independent determination on whether the lease, with stipulations, should be issued. A case will be remanded for such a determination especially where the Forest Service on appeal has reconsidered and recommends leasing with certain stipulations.

Fred P. Blume, 28 IBLA 58 (Nov. 9, 1976)

When the Forest Service recommends against issuing an oil and gas lease for public land because the land has been included within a wilderness candidate study area, the Bureau of Land Management must make an independent determination on whether not to issue a lease or whether issuance of a lease subject to appropriate stipulations is in the public interest. A case will be remanded to the Bureau of Land Management for an independent determination where it is evident that such has not been done.

Kenneth F. Cummings and A. W. Fleming, Empire Resources, Inc., 28 IBLA 73 (Nov. 12, 1976)

The Secretary of the Interior may, in his discretion, reject any offer to lease public lands for oil and gas deposits upon a proper determination that leasing would not be in the public interest.

The Secretary of the Interior may reject a noncompetitive offer to lease for oil and gas when he determines that it is in the public interest to do so because the lands applied for are within the Interstate 70 scenic corridor and are under consideration for inclusion in a primitive area.

The Secretary in the exercise of his discretionary authority, may refuse to lease public lands for oil and gas, even though the lands are not withdrawn from oil and gas leasing.

Pinnacle Mining and Exploration Co., Inc., 28 IBLA 249 (Dec. 20, 1976)

Neither the filing of an over-the-counter oil and gas lease offer, nor the holding of a drawing of simultaneously filed offers to determine the first-qualified offeror, creates any right to a lease or any property rights in the offeror that diminish the Secretary's discretion whether or not to issue a noncompetitive oil and gas lease on a given tract.

An oil and gas lease is not *issued* until it is signed by the authorized officer; the acceptance of first year's rental in advance as required by regulation does not create a lease contract. Until lease issuance, the Secretary retains his discretion to lease or not to lease a given tract.

James W. Canon et al., 1 SEC. 1 (Apr. 15, 1977)
84 I.D. 176

OIL AND GAS LEASES--Continued

DISCRETION TO LEASE--Continued

When the Secretary of the Interior has exercised his discretionary authority over the issuance of oil and gas leases to promulgate a Public Land Order closing an area of public lands to oil and gas leasing for the purpose of preserving and developing the potash deposits therein belonging to the United States, it is proper to reject oil and gas lease offers for such withdrawn lands.

AA Minerals Corp., 30 IBLA 259 (May 31, 1977)

The Secretary of the Interior may, in his discretion, reject an offer to lease public lands for oil and gas deposits upon a proper determination that the leasing would not be in the public interest, even though the land applied for is not withdrawn from leasing under the Mineral Leasing Act.

Duncan Miller, 30 IBLA 350 (June 8, 1977)

Duncan Miller, 31 IBLA 351 (July 25, 1977)

Duncan Miller, 31 IBLA 371 (Aug. 4, 1977)

Robert P. Kunkel, 41 IBLA 77 (May 31, 1979)

The Secretary of the Interior has the discretionary authority to reject a high bid in a competitive oil and gas lease sale where the record discloses a rational basis for the conclusion that the amount of the bid was inadequate.

Yates Petroleum Corp., 32 IBLA 196 (Sept. 15, 1977)

Basil W. Beagel, 34 IBLA 29 (Feb. 14, 1978)

Gerald S. Ostrowski, 34 IBLA 254 (Mar. 28, 1978)

Southern Union Exploration Co., 41 IBLA 81 (May 31, 1979)

The Secretary of the Interior may in his discretion reject any offer to lease public lands for oil and gas upon a proper determination that leasing would not be in the public interest, even though the land applied for is not withdrawn from leasing under the Mineral Leasing Act. Where part of the lands applied for are in the Bonneville Salt Flats, and the Bureau of Land Management determines that oil and gas leasing activities are not compatible with the primary management objective to prevent irreparable damage to a significant resource, rejection of the lease offers or the requirement of execution of surface occupancy stipulations will be affirmed.

Vern K. Jones et al., Esdras K. Hartley, 33 IBLA 74 (Dec. 6, 1977)

The decision to issue an oil and gas lease to the first-qualified offeror is within the discretion of the Secretary of the Interior, and offers within proposed wild and scenic river areas may be rejected to protect such areas.

Questa Petroleum Co., 33 IBLA 116 (Dec. 16, 1977)

OIL AND GAS LEASES--Continued

DISCRETION TO LEASE--Continued

Oil and gas lease offers may be rejected where legal title to the lands in issue is uncertain. It is not improper for BLM to refuse to suspend the offers pending determination of the title issue.

N L Industries, Inc., 34 IBLA 99 (Feb. 23, 1978)

The Secretary of the Interior may, in his discretion, reject any offer to lease public lands for oil and gas, upon a determination supported by facts of record that the leasing would not be in the public interest because it is incompatible with uses of the lands which are worthy of preservation. Where the land is being used as a habitat for endangered animals, is a natural scenic asset, and has potential recreational value, and where BLM determines that oil and gas operation would result in unavoidable adverse impact on these attributes, rejection of the lease offer will be affirmed in the absence of countervailing compelling reasons.

Dell K. Hatch, Amoco Production Co., 34 IBLA 274 (Apr. 11, 1978)

The Secretary of the Interior may require execution of special stipulations reasonably designed to protect environmental and other land use values as a condition precedent to the issuance of an oil and gas lease. Oil and gas lease offers within area proposed for inclusion in the wild and scenic river system may be rejected to protect such areas.

Dean W. Howell, 37 IBLA 387 (Nov. 6, 1978)

The BLM may reject any offer to lease public lands for oil and gas, upon a determination supported by facts of record that the leasing would not be in the public interest because it is incompatible with uses of the lands which are worthy of preservation. Where the land is being used as a habitat for mule deer and elk, is a natural scenic asset, and has recreational, archaeological and paleontological values, and where BLM determines that oil and gas drilling operations would result in unavoidable adverse impact on these attributes, rejection of the lease offer will be affirmed, in the absence of compelling countervailing reasons.

James O. Breene, Jr., 38 IBLA 281 (Dec. 13, 1978)

Under sec. 17 of the Mineral Leasing Act of 1920, as amended, and the regulations issued pursuant to that Act, the Secretary of the Interior has discretion to refuse to issue an oil and gas lease. The Secretary, through BLM, his duly authorized representative, may reject any offer to lease public lands for oil and gas upon a determination supported by facts of record that the leasing would not be in the public interest because it is incompatible with uses of the lands which are worthy of preservation. When the land, situated in Hell's Half Acre, has geological, ecological, scenic, and recreational values and is under study for its wilderness potential, and where BLM recommends that the lands not be leased pending further studies of the area, rejection of the lease offer will be affirmed, in the absence of compelling countervailing reasons.

R. C. Hoefle, 41 IBLA 174 (June 22, 1979)

OIL AND GAS LEASES--Continued

DISCRETION TO LEASE--Continued

A decision rejecting an oil and gas lease offer because it would result in undue degradation of the environment will be set aside where the record does not clearly support the conclusion reached by BLM.

John M. Lefkion, 43 IBLA 67 (Sept. 19, 1979)

Under sec. 17 of the Mineral Leasing Act of 1920, as amended, 30 U.S.C. § 226 (1976), the Secretary of the Interior has discretion to refuse to issue an oil and gas lease in the interest of conservation, wildlife protection, and other purposes in the public interest.

The general prohibition against oil and gas leasing in wildlife refuges contained in 43 CFR 3101.3-3 (unless there is drainage) is a formal exercise of the Secretary's discretion under sec. 17 of the Mineral Leasing Act of 1920, as amended, 30 U.S.C. § 226 (1976).

Tucker and Snyder Exploration, Inc., 43 IBLA 235 (Oct. 10, 1979)

It is within the discretion of the Bureau of Land Management to impose the requirement of a no surface occupancy stipulation upon an oil and gas lease, where there has been a determination that it is in the public interest to do so because the lands applied for have important archaeological values, are within the Interstate 70 scenic corridor, and are under consideration for inclusion in a primitive area.

James M. Chudnow, 43 IBLA 375 (Oct. 31, 1979)

Under 43 CFR 3120.3-1, rejection of a high bid tendered at a sale of competitive oil and gas leases will be affirmed on appeal where the case file contains memoranda from the U.S. Geological Survey sufficient to establish that the rejection has a reasonable basis in fact.

Gerald S. Ostrowski (On Reconsideration after Remand), 44 IBLA 17 (Nov. 6, 1979)

The Secretary of the Interior has the authority to refuse to lease Federal lands for oil and gas purposes, even if the lands have not been withdrawn from the operation of the mineral leasing laws. The refusal to lease must be supported by facts to demonstrate that the leasing would not be in the public interest. Mere conclusory findings not so supported by factual data, are insufficient to predicate a rejection in the circumstances.

David H. Yates, 44 IBLA 121 (Nov. 27, 1979)

The Department, may, in its discretion, reject offers to lease public lands for oil and gas, but such rejections must be based on facts of record and background data indicating that leasing would be contrary to the public interest.

Placid Oil Co., 44 IBLA 209 (Dec. 11, 1979)

The Bureau of Land Management, on behalf of the Secretary of the Interior, may condition issuance of a lease on the execution of a no surface occupancy stipulation where on appeal the record shows that the Bureau has adequately considered the factors involved and the

OIL AND GAS LEASES--Continued

DISCRETION TO LEASE--Continued

stipulation is a reasonable means to accomplish proper Departmental purposes.

H. E. Shillander, 44 IBLA 216 (Dec. 11, 1979)

DRAINAGE

Lands situated within the boundaries of incorporated cities, towns, or villages are excluded from oil and gas leasing under the Mineral Leasing Act, *as amended*, 30 U.S.C. § 181 (1970). If drainage occurs on such lands by reason of wells drilled on adjacent lands, agreements with the owners thereof may be entered into by the Bureau of Land Management pursuant to 43 CFR 3100.3.

Hawthorn Oil Co., 37 IBLA 91 (Sept. 22, 1978)

DRILLING

Where only preliminary steps had been taken looking toward conducting drilling operations by the expiration date of an oil and gas lease, but there were no actual drilling operations, a lease could not be extended under 30 U.S.C. § 226(e) (1970), however "primary term" of the lease in that section is defined in the regulations.

Inexco Oil Co., 20 IBLA 134 (May 5, 1975)

To qualify for a 2-year extension of an oil and gas lease pursuant to 30 U.S.C. § 226(e) (1970), it must be shown that actual drilling operations were diligently prosecuted on the leasehold on the last day of the lease term, with bona fide intent to complete a producing well, as demonstrated by subsequent circumstances, *i.e.*, by a showing that the operation was thereafter expeditiously carried forward to such an extent that the effort constituted an acceptable test of a geologic stratum where it could reasonably be anticipated that commercial quantities of oil and/or gas might be discovered.

D. L. Cook, 20 IBLA 315 (June 4, 1975)

Charles M. Goad, 25 IBLA 130 (June 7, 1976)

Under the provisions of 43 CFR 3107.2-1(b)(2) (1973) an oil and gas lease which had been committed to a unit and extended as a result of production occurring within that unit, is not within its primary term but rather is held by production. Therefore, the diligent drilling extension provision of 43 CFR 3107.2-3 is not available as a method of further extension since that provision is limited to leases in their primary term.

Tenneco Oil Co., Sun Oil Co., 21 IBLA 130 (July 14, 1975)

To qualify for a 2-year extension of an oil and gas lease pursuant to 30 U.S.C. § 226(e) (1970), it must be shown that actual drilling operations were being diligently prosecuted on the leasehold on the last day of the lease term, with good faith intent to complete a producing well as demonstrated by all the circumstances. Where 1) approval of the Geological Survey had not been obtained for any drilling, 2) proper bonds had not been obtained before the expiration date of the leases, and 3) an adequate environmental analysis had not been filed, drilling that did occur on the last day of the leasehold was not diligent in good faith and the lease must be held to have expired.

Daisy E. Hook et al., 21 IBLA 147 (July 16, 1975)

An oil and gas lease is extended by operation of law for 2 years beyond the expiration of its primary term when actual drilling operations were commenced on the lease (or for the lease under a unit plan) prior to the expiration of the primary term and such operations are being diligently prosecuted on the expiration date, even though the lease may also have production at that time.

Rio Blanco Natural Gas Co., 30 IBLA 191 (May 19, 1977)
84 I.D. 198

An oil and gas lease is extended by operation of law for 2 years beyond the expiration of its primary term when actual drilling operations were commenced on the lease (or for the lease under a unit plan) prior to the expiration of the primary term and such operations are being diligently prosecuted on the expiration date.

A unitized oil and gas lease is entitled to an extension for 2 years where production testing operations are being conducted on the unit well on the expiration date of the lease. Such testing qualifies as "actual drilling operations" as defined by 43 CFR 3107.2-1 which includes not only the physical drilling of a well, but the testing, completing, or equipping of such well for production of oil or gas.

Shell Oil Co., 36 IBLA 253 (Aug. 15, 1978)

To qualify for a 2-year extension of an oil and gas lease, pursuant to 43 CFR 3107.2-3, it must be shown that "actual drilling operations" were diligently prosecuted on the last day of the lease term, with reference made to subsequent circumstances. Efforts to secure a large or full-size rig, which are frustrated by unforeseen delays on the part of the contractor supplying the rig so that "actual drilling operations" are not undertaken for more than 60 days do not constitute diligent drilling operations.

To qualify for a 2-year extension of an oil and gas lease pursuant to 43 CFR 3107.2-3, it must be shown that "actual drilling operations" were diligently prosecuted on the last day of the lease term, with the good faith intent to complete a producing well as demonstrated by all of the circumstances. Where prior approval of the Geological Survey had not been obtained for a change in hole and casing arrangements, drilling that did occur on the last day of the lease term was not undertaken in good faith and the lease must be held to have expired.

Classic Mining Corp., 37 IBLA 338 (Oct. 27, 1978)

Nothing in the regulations requires an oil and gas lessee to request approval of a drilling plan from the Geological Survey more than 30 days in advance of the expiration of his lease. The regulations contemplate both a lessee's giving notice of intention to begin work and the district engineer's giving permission to proceed orally in cases of emergency.

An oil and gas lessee is required to post bond before he may initiate drilling operations on his lease. Where it is noted in a decision appealed from that

OIL AND GAS LEASES--Continued

DRILLING--Continued

neither the lessee nor his operator have posted bond, and the lessee does not controvert this fact on appeal, it is properly found that there was no bond coverage.

Where a lessee is required by law to post bond before commencing drilling and fails to do so, any drilling operations actually undertaken by him do not constitute "diligent prosecution" of "actual drilling operations" in good faith under 43 CFR 3107.2-3, and he is therefore not entitled to an extension of his lease.

Richard P. Smoot, 39 IBLA 1 (Jan. 8, 1979)

The actions of a lessee in reentering a well to a depth of 11,640 feet where said well has been previously drilled to a depth of 12,895 feet do not constitute actual drilling operations within the terms of 30 U.S.C. § 226(e) (1976) so as to entitle the lessee to a 2-year extension of an oil and gas lease by drilling over the terminal date of the lease.

To obtain an extension to an oil and gas lease by drilling over the terminal date, actual drilling operations must be conducted in such a way as to be an effort which one seriously looking for oil and gas could be expected to make in that particular area, given existing knowledge of geological and other pertinent facts.

To qualify for an extension of a lease under 30 U.S.C. § 226(e) (1976), the evidence must show that actual drilling operations were diligently pursued on the leasehold on the last day of the lease, with bona fide intent to complete a producing well, as demonstrated by circumstances, *e.g.*, by a showing that the operation was thereafter expeditiously carried forward to such an extent that the effort constituted an acceptable test of a geologic stratum where it could reasonably be anticipated that commercial quantities of oil and/or gas might be discovered.

The bona fide intent of the lessee and the diligence with which he carries out that intent must be tested in accordance with the regulations, 43 CFR 3107.2-1 *et seq.*, not only by the activity in progress at midnight of the last day, but by what transpires subsequently.

Phoenix Resources Co., 39 IBLA 153 (Jan. 29, 1979)

An application for permit to drill for oil and gas in a designated Potash Area is properly denied where the applicant fails to show that his application comes within either of the two exceptions to the policy in favor of potash development enunciated in an Order of the Secretary, dated Oct. 7, 1975, 40 FR 51486.

Belco Petroleum Corp., 42 IBLA 150 (Aug. 16, 1979)

EXTENSIONS

Where only preliminary steps had been taken looking toward conducting drilling operations by the expiration date of an oil and gas lease, but there were no actual drilling operations, a lease could not be extended under 30 U.S.C. § 226(e) (1970), however "primary term" of the lease in that section is defined in the regulations.

Inexco Oil Co., 20 IBLA 134 (May 5, 1975)

OIL AND GAS LEASES--Continued

EXTENSIONS--Continued

To qualify for a 2-year extension of an oil and gas lease pursuant to 30 U.S.C. § 226(e) (1970), it must be shown that actual drilling operations were diligently prosecuted on the leasehold on the last day of the lease term, with bona fide intent to complete a producing well, as demonstrated by circumstances; *e.g.*, by a showing that the operation was thereafter expeditiously carried forward to such an extent that the effort constituted an acceptable test of a geologic stratum where it could reasonably be anticipated that commercial quantities of oil and/or gas might be discovered.

E. L. Cook, 20 IBLA 315 (June 4, 1975)

When an oil and gas lease, extended beyond the primary term because of production, no longer has a well capable of producing oil or gas in paying quantities, the lease terminates by operation of law if within 60 days after cessation of production no approved reworking or drilling operations are begun on the lease.

Estate of Anna Aronow, 20 IBLA 344 (June 11, 1975)

Under the provisions of 43 CFR 3107.2-1(b)(2) (1973) an oil and gas lease which had been committed to a unit and extended as a result of production occurring within that unit, is not within its primary term but rather is held by production. Therefore, the diligent drilling extention provision of 43 CFR 3107.2-3 is not available as a method of further extension since that provision is limited to leases in their primary term.

Tenneco Oil Co., Sun Oil Co., 21 IBLA 130 (July 14, 1975)

To qualify for a 2-year extension of an oil and gas lease pursuant to 30 U.S.C. § 226(e) (1970), it must be shown that actual drilling operations were being diligently prosecuted on the leasehold on the last day of the lease term, with good faith intent to complete a producing well as demonstrated by all the circumstances. Where 1) approval of the Geological Survey had not been obtained for any drilling, 2) proper bonds had not been obtained before the expiration date of the leases, and 3) an adequate environmental analysis had not been filed, drilling that did occur on the last day of the leasehold was not diligent in good faith and the lease must be held to have expired.

Daisy E. Hook et al., 21 IBLA 147 (July 16, 1975)

In order to support extension of an oil and gas lease on the basis of production within a pre-existing unit to which the lease was not previously committed, the lessee must reach an agreement with the parties to the unit agreement and the unit operating agreement in accordance with the procedures for subsequent joinder outlined therein and submit evidence of such agreement for approval of the Oil and Gas Supervisor, United States Geological Survey, prior to expiration of the lease. The mere sending of notice by the lessee to the Bureau of Land Management announcing his intention to commit his lease to an existing unit agreement is not sufficient.

Duncan Miller, 25 IBLA 125 (June 7, 1976)

OIL AND GAS LEASES--Continued

EXTENSIONS--Continued

To qualify for a 2-year extension of an oil and gas lease pursuant to 30 U.S.C. § 226(e) (1970), it must be shown that actual drilling operations were diligently prosecuted on the leasehold on the last day of the lease term, with bona fide intent to complete a producing well as demonstrated by subsequent circumstances, *i.e.*, by a showing that the operation was thereafter expeditiously carried forward to such an extent that the effort constituted an acceptable test of a geologic stratum where it could reasonably be anticipated that commercial quantities of oil and/or gas might be discovered.

Assertions, even if established, that employees of the Bureau of Land Management assured an oil and gas lessee that drilling a leasehold on the last day of the lease term was sufficient, without more, to extend the lease, and that the lessee relied upon such representations, afford the lessee no relief. Rights not authorized by law cannot be acquired through misinformation given by employees of the Bureau of Land Management.

Charles M. Goad, 25 IBLA 130 (June 7, 1976)

Where an oil and gas lease in its extended term because of production has ceased production for a known period and the Geological Survey questions whether the lease is currently capable of production, the lease will not terminate by operation of law if the lessee can show that any of three sets of conditions or circumstances exist: (1) reworking or drilling operations were begun on the lease within 60 days after cessation of production; (2) operations or production had been suspended by order or with the consent of the Secretary; and (3) the lessee can make an acceptable showing within 60 days after notice from the Survey that there is a well in a producing status on the leasehold.

Emily H. Oien, 25 IBLA 193 (June 16, 1976)

An oil and gas lease will expire by operation of law at the end of its primary term unless oil or gas is being produced in paying quantities at that time or actual drilling operations were commenced prior to the end of the primary term and are being diligently prosecuted, thereby entitling the lessee to an extension of the lease. A once productive well which ceases its productive capability during the initial term will not prevent expiration of the lease.

Rajac Industries, Inc., 26 IBLA 202 (Aug. 11, 1976)

An oil and gas lease issued effective Oct. 1, 1966, for a term of 10 years expired at midnight on Sept. 30, 1976, unless extended by some provision of statute or regulation.

Duncan Miller, 28 IBLA 62 (Nov. 10, 1976)

The lessee of an oil and gas lease, issued after Sept. 2, 1960, which has reached the end of its primary term, must submit the rental for the first year of an anticipated extended term under 30 U.S.C. § 226(e) (1970), on or before the regular anniversary date of the lease. Failure to submit the rental timely will result in the automatic termination of the lease by operation of law under 30 U.S.C. § 188(b) (1970). Unless the lessee can show that he is entitled to reinstatement of his lease under 30 U.S.C. § 188(c) (1970), he cannot obtain the extension.

The discretionary authority granted to the Secretary of the Interior by 30 U.S.C. § 188(d) (1970), to reinstate oil and gas leases terminated for failure to pay rental timely, which leases are eligible for extensions under 30 U.S.C. § 226-1(d) (1970), because drilling operations commenced prior to the end of the term of the lease and were being diligently prosecuted at that time, applies only to oil and gas leases issued before Sept. 2, 1960. An oil and gas lease issued after that date, which has terminated for failure to pay rental timely, can be reinstated only under the provisions of 30 U.S.C. § 188(c) (1970).

Oil Resources, Inc., 28 IBLA 394 (Feb. 7, 1977)
84 I.D. 91

A Bureau of Land Management decision extending the lease term of an oil and gas lease for 2 years following the termination of the unit agreement of which the lease was a part is premature, where the lessee has appealed the Geological Survey's determination of the effective date of termination of the unit agreement. The Bureau of Land Management decision will be set aside and the case remanded to await the final outcome of the lessee's appeal of the Geological Survey determination.

Tenneco Oil Co., 29 IBLA 157 (Mar. 7, 1977)

An oil and gas lessee, who files the necessary subsequent joinder documents with the Area Oil and Gas Supervisor, Geological Survey, in accordance with the subsequent joinder procedures outlined in the unit agreement, will have his lease committed to the unit as of the date of filing with the Area Oil and Gas Supervisor for the purpose of extension of the lease on the basis of production within the unit. However, the commitment does not become effective for determining the benefits and obligations under the unit agreement, as to the parties to the agreement, until the first day of the month following the filing.

Bruce Anderson, 30 IBLA 179 (May 19, 1977)

An oil and gas lease is extended by operation of law for 2 years beyond the expiration of its primary term when actual drilling operations were commenced on the lease (or for the lease under a unit plan) prior to the expiration of the primary term and such operations are being diligently prosecuted on the expiration date, even though the lease may also have production at that time.

Rio Blanco Natural Gas Co., 30 IBLA 191 (May 19, 1977)
84 I.D. 198

The lessee of an acquired lands oil and gas lease issued after Sept. 2, 1960, which has reached the end of its primary term, must submit the rental for the first year of an anticipated extended term under 30 U.S.C. § 226(e) (1970), on or before the regular anniversary date of the lease. Failure to submit the rental timely will result in the automatic termination of the lease by operation of law under 30 U.S.C. § 188(b) (1970). Unless the lessee can show that he is entitled to reinstatement of his lease under 30 U.S.C. § 188(c) (1970), the lease must be deemed to have terminated at the end of its stated term.

Shell Oil Co., 30 IBLA 290 (June 1, 1977)

OIL AND GAS LEASES--Continued

EXTENSIONS--Continued

By the terms of the mineral leasing laws, unit agreement, and by regulation, unitized oil and gas leases issued after Sept. 2, 1960, which reach the end of a 2-year extended term by drilling expire by operation of law if there is not production of oil or gas in paying quantities within the unit at that time.

Corrine Grace, 30 IBLA 296 (June 1, 1977)

To qualify for a 2-year extension of an oil and gas lease under the diligent drilling provision of 30 U.S.C. § 226(e) (1970), it must be shown that actual drilling operations were being prosecuted on the leasehold on the last day of the lease term, with good faith intent to complete a producing well. Good faith attempts to initiate "actual drilling operations" which are frustrated by inclement weather, personnel shortages and equipment failures so that "actual drilling operations" are not being prosecuted on the lease on the last day of the lease term do not serve to gain the lease an extension.

Burton W. Hancock, 31 IBLA 18 (June 17, 1977)

Noncompetitive oil and gas leases are issued for a primary term of 10 years. Such leases expire automatically by operation of law at the end of their 10-year terms unless the presence of one of the statutory grounds for extension of the term is established.

Duncan Miller, 33 IBLA 83 (Dec. 8, 1977)

A 20-year oil and gas lease which has been renewed for successive 10-year periods, and which at the time of expiration of a 10-year period is committed to an approved unit plan of development, is not entitled to another 10-year renewal, but is extended pursuant to 30 U.S.C. § 226(j) (1976).

Anne Burnett Tandy et al., 33 IBLA 106 (Dec. 16, 1977)

Texaco, Inc., 33 IBLA 296 (Jan. 10, 1978)

Texaco, Inc., 40 IBLA 294 (Apr. 27, 1979)

For a noncompetitive oil and gas lease issued subsequent to Sept. 2, 1960, to be entitled to a 2-year extension for drilling over, actual drilling operations must be commenced on the leasehold, or for the benefit of the leasehold under an approved cooperative or unit plan of development, prior to the end of the primary term of 10 years, and be diligently prosecuted at that time.

Where the term of a noncompetitive oil and gas lease issued subsequent to Sept. 2, 1960, has been extended beyond its 10-year primary term, and actual drilling operations are being conducted on the terminal date, there is no entitlement to a 2-year extension for drilling over unless the drilling operations were commenced prior to the end of the 10-year primary term and had been diligently prosecuted thereafter. It makes no difference whether the extension beyond the 10-year primary term was given because of segregation in accordance with 43 CFR 3107.4-3 (partial commitment of lease to an approved unit agreement), or because of elimination of lease from an approved unit agreement under 43 CFR 3107.5.

Yates Petroleum Corp., 34 IBLA 7 (Feb. 8, 1978)

Texaco, Inc., 34 IBLA 127 (Mar. 7, 1978)

OIL AND GAS LEASES--Continued

EXTENSIONS--Continued

An oil and gas lease is extended by operation of law for 2 years beyond the expiration of its primary term when actual drilling operations were commenced on the lease (or for the lease under a unit plan) prior to the expiration of the primary term and such operations are being diligently prosecuted on the expiration date.

A unitized oil and gas lease is entitled to an extension for 2 years where production testing operations are being conducted on the unit well on the expiration date of the lease. Such testing qualifies as "actual drilling operations" as defined by 43 CFR 3107.2-1 which includes not only the physical drilling of a well, but the testing, completing, or equipping of such well for production of oil or gas.

Shell Oil Co., 36 IBLA 253 (Aug. 15, 1978)

Where a Federal oil and gas lessee commits a portion of his lease to a proposed unit agreement, thereafter assigns all that committed portion to another, which assignment is approved, and subsequently the proposed unit is approved by the Geological Survey, the lessee is not entitled to a 2-year extension under 30 U.S.C. § 226(j) (1970), for the retained portion of the lease.

R. M. Tully, 37 IBLA 62 (Sept. 18, 1978)

Noncompetitive oil and gas leases are issued for a primary term of 10 years. Unless one of the statutory grounds for extension is established, such leases expire by operation of law at the end of their primary term.

Duncan Miller, 37 IBLA 129 (Oct. 4, 1978)

James E. and Mary F. Groboski, 43 IBLA 94 (Sept. 19, 1979)

To qualify for a 2-year extension of an oil and gas lease under the diligent drilling provision of 30 U.S.C. § 226(e) (1970), it must be shown that actual drilling operations, that is, penetration of the ground by a drilling bit, were being prosecuted on the lease, or under an approved cooperative or unit plan of development or operation for the benefit of the lease, on the last day of the primary term of the lease. Preliminary work including site preparation and grading of access road is not "actual drilling operations" sufficient to qualify the lease for an extension of 2 years.

Estelle Wolf et al., 37 IBLA 195 (Oct. 12, 1978)

To qualify for a 2-year extension of an oil and gas lease, pursuant to 43 CFR 3107.2-3, it must be shown that "actual drilling operations" were diligently prosecuted on the last day of the lease term, with reference made to subsequent circumstances. Efforts to secure a large or full-size rig, which are frustrated by unforeseen delays on the part of the contractor supplying the rig so that "actual drilling operations" are not undertaken for more than 60 days do not constitute diligent drilling operations.

To qualify for a 2-year extension of an oil and gas lease pursuant to 43 CFR 3107.2-3, it must be shown that "actual drilling operations" were diligently prosecuted on the last day of the lease term, with the good faith intent to complete a producing well as demonstrated by all of the circumstances. Where prior approval of the Geological Survey had not been obtained for a change in hole and casing arrangements, drilling that did occur on the last day of the lease term was not undertaken in good faith and the lease must be held to have expired.

Classic Mining Corp., 37 IBLA 338 (Oct. 27, 1978)

Nothing in the regulations requires an oil and gas lessee to request approval of a drilling plan from the Geological Survey more than 30 days in advance of the expiration of his lease. The regulations contemplate both a lessee's giving notice of intention to begin work and the district engineer's giving permission to proceed orally in cases of emergency.

An oil and gas lessee is required to post bond before he may initiate drilling operations on his lease. Where it is noted in a decision appealed from that neither the lessee nor his operator have posted bond, and the lessee does not controvert this fact on appeal, it is properly found that there was no bond coverage.

Where a lessee is required by law to post bond before commencing drilling and fails to do so, any drilling operations actually undertaken by him do not constitute "diligent prosecution" of "actual drilling operations" in good faith under 43 CFR 3107.2-3, and he is therefore not entitled to an extension of his lease.

Richard P. Smoot, 39 IBLA 1 (Jan. 8, 1979)

The actions of a lessee in reentering a well to a depth of 11,640 feet where said well has been previously drilled to a depth of 12,895 feet do not constitute actual drilling operations within the terms of 30 U.S.C. § 226(e) (1976) so as to entitle the lessee to a 2-year extension of an oil and gas lease by drilling over the terminal date of the lease.

To obtain an extension to an oil and gas lease by drilling over the terminal date, actual drilling operations must be conducted in such a way as to be an effort which one seriously looking for oil and gas could be expected to make in that particular area, given existing knowledge of geological and other pertinent facts.

To qualify for an extension of a lease under 30 U.S.C. § 226(e) (1976), the evidence must show that actual drilling operations were diligently pursued on the leasehold on the last day of the lease, with bona fide intent to complete a producing well, as demonstrated by circumstances, *e.g.*, by a showing that the operation was thereafter expeditiously carried forward to such an extent that the effort constituted an acceptable test of a geologic stratum where it could reasonably be anticipated that commercial quantities of oil and/or gas might be discovered.

The bona fide intent of the lessee and the diligence with which he carries out that intent must be tested in accordance with the regulations, 43 CFR 3107.2-1 *et seq.*, not only by the activity in progress at midnight of the last day, but by what transpires subsequently.

Phoenix Resources Co., 39 IBLA 153 (Jan. 29, 1979)

Where production has ceased on an oil and gas lease extended by production, and the record is unclear whether the conditions prescribed by 30 U.S.C. § 226(f) (1976) precluding termination of the lease have occurred, the case will be remanded to the Bureau of Land Management to reconsider with the Geological Survey if the lease has terminated, including a determination whether the lessee began reworking or drilling operations within 60 days after cessation of production and diligently prosecuted such operations before attaining production

as asserted by him on appeal. A hearing should be held, if necessary, to resolve disputed facts.

Vern R. Bolinder and Julienne J. Bolinder, 40 IBLA 164 (Apr. 3, 1979)

The provision in a unit agreement allowing suspension of production requirements for unavoidable delays does not supplant the lessee's responsibility to comply with the procedure set out in the regulation for obtaining a suspension. A written application for suspension must be filed in triplicate with the area oil and gas supervisor prior to the expiration of the leases.

Suspension of production requirements for leases on which there are no wells capable of producing in paying quantities must be approved by the Secretary; this authority is not delegated to other officers below the Secretarial level.

"A well capable of producing oil or gas in paying quantities." The provision in 30 U.S.C. § 226(f) (1976) referring to a well capable of producing oil or gas in paying quantities refers to a well which is actually in physical condition to produce a sufficient quantity of oil or gas to yield a reasonable profit over and above the costs of operating the well and marketing the product. A satisfactory test of a well to establish its capability as of the termination date is necessary. Evidence which only supports inferences is not sufficient, nor is a showing only of a potential prospect for profitable operation at some future time.

American Resources Management Corp., 40 IBLA 195 (Apr. 5, 1979)

An oil and gas lease is properly extended for 2 years pursuant to 30 U.S.C. § 226(e) (1976) and 43 CFR 3107.2-3 where prior to the expiration of the primary term of the lease, the lease is committed to an approved cooperative unit or plan and actual drilling operations are being conducted on behalf of the lease within the unit plan. For the purpose of qualifying for the extension, the determinative date of approval of the unit agreement is the effective date of the approved agreement rather than the actual date it is signed by U.S. Geological Survey.

Integrity Oil and Gas Co., 42 IBLA 222 (Aug. 22, 1979)

A hearing is properly ordered where there exist issues of fact the resolution of which will determine whether an oil and gas lease concluding its primary term was converted from rental status to royalty status. Appellant shall have the burden of proof to establish by a preponderance of the evidence (a) that the Dolezal-Government #1 well was capable of producing oil and gas in paying quantities on Oct. 31, 1978, or (b) that there was a discovery of oil or gas in paying quantities on lease W 15891 on Oct. 31, 1978. If either (or both) of these propositions is established, the subject lease was not subject to automatic termination by law for failure to make timely rental payment.

Coronado Oil Co., 42 IBLA 235 (Aug. 22, 1979)

An oil and gas lease in its extended term because of the termination of an approved unit plan to which it was committed, on which lease there is no well capable of production in paying quantities, terminates automatically by operation of law where the annual rental is not paid on or before the anniversary date of the

OIL AND GAS LEASES--Continued

EXTENSIONS--Continued

lease. The pendency of an appeal regarding the termination date of the extension does not excuse the failure to maintain the lease in good standing by timely payment of the annual rental.

Tenneco Oil Co., Cordillera Corp., 44 IBLA 171 (Nov. 30, 1979)

FIRST-QUALIFIED APPLICANT

Where an unamended senior offer for a noncompetitive fractional oil and gas lease on acquired lands is not in compliance with 43 CFR 3130.4-4, a junior offer obtains priority to extent of conflicts between competing filings, and the junior offeror's protest must be sustained.

Frederick L. Smith et al., 19 IBLA 162 (Mar. 14, 1975)

Oil and gas lease applications, action on which was suspended under Public Land Order 4582, 34 FR 1025 (1969), are properly rejected when the lands are subsequently patented to the State of Alaska under selection applications even though the latter postdate the oil and gas lease applications; the first-qualified oil and gas lease applicant has no right or interest in the land applied for which is protected by the savings clauses of the Alaska Statehood Act and the Alaska Native Claims Settlement Act.

Haruyuki Yamane et al., 19 IBLA 320 (Apr. 7, 1975)

Regulation 43 CFR 2627.3(b)(2) requires that conflicting oil and gas lease offers filed pursuant to the Mineral Leasing Act of 1920, except for preference right applications, whether filed prior to, simultaneously with, or after the filing of an Alaska State selection, must be rejected when and if the selection is tentatively approved. The preference right referred to in the regulation does not apply to an oil and gas lease offeror who receives a priority right as the first-qualified applicant in the event the Department decides to issue a lease.

Richard W. Bowe, Daniel Gaudiane, 20 IBLA 59 (Apr. 24, 1975) 82 I.D. 174

An oil and gas offer must be rejected when the land applied for has been leased to a senior offeror under a proper offer.

Connie Moll, 22 IBLA 307 (Nov. 10, 1975)

Where an offeror failed to take an appeal from a decision issuing a noncompetitive oil and gas lease but erroneously rejecting certain available lands while correctly rejecting other lands in the offer and the offeror failed to retender rental for the erroneously rejected lands, and where the error could be readily apparent to the offeror, and the offeror acquiesced for a year and a half in the lease as issued, such failure precludes the amendment of the lease and the offeror is deemed to have abandoned his preference right as the first-qualified applicant to lease the land which was erroneously rejected.

John Oakason, 23 IBLA 336 (Jan. 21, 1976)

OIL AND GAS LEASES--Continued

FIRST-QUALIFIED APPLICANT--Continued

When the Secretary of the Interior determines that an oil and gas lease is to be issued for a particular tract, it must be issued to the first-qualified applicant. An applicant is not qualified because of his failure to comply with 43 CFR 3112.2-1(a) when he fails to provide the name of the State in which the parcel of land is located.

Ishmael Guerra, 26 IBLA 116 (July 26, 1976)

An oil and gas lease offer filed on behalf of a corporation may incorporate evidence of qualifications by reference to the serial number of a case record in which such evidence has already been filed with the Bureau of Land Management (BLM). However, reference to a file which contains no evidence of the authority of the officer signing the lease offer to execute such instruments on behalf of the corporation is not sufficient and requires rejection of the offer. The fact that the required evidence is on file in another State office of the BLM under another serial number will not avail applicant where the lease offer contains no reference to that file.

An oil and gas lease offer filed by a corporation under the simultaneous filing procedures, 43 CFR Subpart 3112, which is defective for failure to provide evidence of corporate qualifications may not be cured by subsequent filing of supplemental evidence after the drawing is held and must be rejected.

Churchill Corp., 27 IBLA 234 (Oct. 12, 1976)

Where a rubber stamp constitutes an offeror's signature on a simultaneous oil and gas lease entry card, the Bureau of Land Management need not presume that the offeror rather than an agent stamped the card, and where no agent's statement has been submitted, BLM may take appropriate action to establish the circumstances under which the signature was stamped on the card.

Evelyn Chambers, 27 IBLA 317 (Nov. 4, 1976) 83 I.D. 533

Where an agent of an offeror for a simultaneous oil and gas lease signs the entry card by affixing a rubber-stamped facsimile of the offeror's signature, the requirements of 43 CFR 3102.6-1 apply and separate statements of interest by both offeror and the agent must be filed, or the offer will be rejected.

Where a person files an oil and gas lease offer through a leasing service under an arrangement whereby the leasing service advances the first year's rental, selects the land, and controls the address at which the offeror may be reached, but no enforceable agreement is entered into whereby the offeror is obligated to transfer any interest in any lease to be issued to the leasing service, the service is not a party in interest in the offer merely because it may have a hope or expectancy of acquiring an interest, and the offeror is not precluded from stating that he is the sole party in interest in the offer.

L. E. Pack, 30 IBLA 166 (May 19, 1977) 84 I.D. 192

Improper issuance of a noncompetitive oil and gas lease in response to a defective drawing entry card in the simultaneous filing procedure does not foreclose the right of the second drawn applicant whose drawing entry card was complete when filed to a lease for the parcel named; the erroneously issued lease must be canceled,

OIL AND GAS LEASES--Continued

FIRST-QUALIFIED APPLICANT--Continued

and upon cancellation, the second drawee must be awarded a lease to the parcel, all else being regular.

Gerald L. Christensen, Edward C. Green, 30 IBLA 303 (June 6, 1977)

Where an oil and gas lease offer is signed by an agent on behalf of the offeror, the regulations with respect to qualifications of lessees require evidence of the authority of the agent and separate statements by the offeror and the agent regarding the nature and extent of any interest the agent has in the lease. The same requirement applies where the offeror's facsimile signature is affixed on the offer by an agent. An offer must be rejected where this information is not filed.

The Bureau of Land Management (BLM) has a responsibility to issue noncompetitive oil and gas leases only to the first-qualified offeror. A rubber-stamped or other form of facsimile signature, unlike a handwritten signature, does not give rise to a presumption that it was personally executed by the offeror. The BLM may inquire of the circumstances under which the signature was stamped on the offer to determine whether compliance with 43 CFR 3102.6-1 was required.

Charlotte L. Thornton, William M. Weaver, Jr., Robert L. Smith, 31 IBLA 3 (June 15, 1977)

An over-the-counter oil and gas lease offer, properly rejected because it failed to meet the requirements of the regulations, may be considered as having priority as of the date the defect is cured where the curative action was taken during an appeal from the rejection of the offer.

Emerald Oil Co., 31 IBLA 119 (June 24, 1977)

Where an agent of an offeror for a simultaneous oil and gas lease signs the entry card by affixing a rubber-stamped or other facsimile of the offeror's signature, the requirements of 43 CFR 3102.6-1 apply, and separate statements of interest by both offeror and the agent must be filed, or the offer will be rejected.

Ray H. Thames, 31 IBLA 167 (July 5, 1977)

A first-drawn simultaneous drawing entry card which is filed by a partnership but which is not accompanied by statements required by the pertinent regulation or which does not refer to the file serial number of the record where the statements have previously been filed is defective and must be rejected.

Norcross Partners, 31 IBLA 181 (July 5, 1977)

When an individual files an oil and gas lease offer through a leasing service under an agreement where the leasing service is authorized to act as the sole and exclusive agent to negotiate for sublease, assignment or sale of any rights obtained by the offeror; where the offeror is required to pay the leasing service according to a set schedule, even if the offeror negotiates the sale; and where such agency to negotiate is to be valid for 5 years, the leasing service has an enforceable right to share in the proceeds of any sale of the lease or any interest therein. Such an agreement creates for the leasing service an interest in the lease as that term is defined in 43 CFR 3100.0-5(b).

Lola I. Doe, 31 IBLA 394 (Aug. 19, 1977)
Continued--

OIL AND GAS LEASES--Continued

FIRST-QUALIFIED APPLICANT--Continued

Sidney H. Schreter, William F. Hogg, Jr., 32 IBLA 146 (Sept. 12, 1977)

Where an applicant fails to file five copies of a noncompetitive lease offer as required by the regulations in 43 CFR 3111.1-1(a) the lease offer is properly rejected. Failure to submit the required number of copies is not included in the list of curable defects in 43 CFR 3111.1-1(e) and, therefore, is fatal to the oil and gas offer.

John P. Frreko, Jr., 32 IBLA 191 (Sept. 15, 1977)

If a noncompetitive oil and gas lease is issued for a particular parcel of land, it must be issued to the first-qualified applicant. Under the simultaneous drawing procedures, a defective entry card must be rejected.

Walter H. Sorensen, 32 IBLA 345 (Oct. 21, 1977)

When an individual files an oil and gas lease offer through a leasing service under an agreement where the leasing service is authorized to act as the sole and exclusive agent to negotiate for sublease, assignment or sale of any rights obtained by the offeror; where the offeror is required to pay the leasing service according to a set schedule, even if the offeror negotiates the sale; and where such agency to negotiate is to be valid for 5 years, the leasing service has an enforceable right to share in the proceeds of any sale of the lease or any interest therein. Such an agreement creates for the leasing service an interest in the lease as that term is defined in 43 CFR 3100.0-5(b).

Where an individual files an oil and gas lease offer through a leasing service under an agreement with the service which has been determined by this Department to create an interest in the lease for the service, and the service files a waiver of that interest with the BLM prior to a simultaneous drawing, without communicating such waiver to the client, and without any contractual consideration running from the client to the leasing service, the waiver is without effect as a matter of law and the successful drawee is required to make a showing as to sole party in interest under 43 CFR 3102.7.

Alfred L. Easterday, 34 IBLA 195 (Mar. 22, 1978)

A lease erroneously issued in violation of regulations which prohibit leasing fractional interests to one who would own only a minority of operating rights in the leased property must be canceled if a lease is awarded to another applicant in a drawing held among the first and other offers simultaneously filed following repeal of the regulations.

Wilfred Plomis, 34 IBLA 222 (Mar. 27, 1978)

It is proper for the Bureau of Land Management to reject an over-the-counter offer for an oil and gas lease of land formerly included in a lease erroneously canceled, because under 43 CFR 3112.1-1 land in canceled leases is subject to the filing of new noncompetitive lease offers only in accordance with simultaneous filing procedures.

An over-the-counter oil and gas lease offer filed for land formerly embraced in an oil and gas lease which has expired by operation of law, which land has not been placed on the list of lands available for the

OIL AND GAS LEASES--Continued

FIRST-QUALIFIED APPLICANT--Continued

filing of simultaneous oil and gas lease offers under 43 CFR Subpart 3112, must be rejected.

David A. Provinse, 35 IBLA 217 (May 26, 1978)

When, in a drawing of simultaneously filed oil and gas lease offers, the first-drawn offeror is notified to submit the advance rental, that rental must be received by the proper office within the prescribed 15 days. Automatic disqualification may not be avoided by allegations that delivery was delayed by the postal service, as the rule is that the postal authorities are the agents of the sender in such cases.

Where BLM records show that the first-drawn applicant for an oil and gas lease paid his rental 1 day late, and is therefore disqualified, there is a legal presumption of regularity which supports the official acts of public officers and the proper discharge of their official duties.

Where a first-drawn oil and gas applicant offers evidence to show that his first year's advance rental was mailed sufficiently in advance so that, even if delayed, it would have arrived within the prescribed time, a legal presumption is raised that the payment was timely delivered.

Where, in a drawing of simultaneously filed oil and gas lease offers, the first-drawn applicant fails to submit his advance rental within 15 days after notice, as prescribed by 43 CFR 3112.4-1, disqualification is automatic, and no excuse may be considered, no discretion exercised, no grace period invoked, and the right of the next drawee to receive first consideration attaches *eo instante*.

Donald E. Jordan, 35 IBLA 290 (June 2, 1978)

An oil and gas lease offer filed in the name of a corporation is properly rejected where it is not accompanied by corporate qualification papers nor by any reference to a serial number where such information is to be found, as required by 43 CFR 3102.4-1.

Where a simultaneous drawing entry card culminates in lease issuance and it is subsequently ascertained that the serial number represented by the offeror to contain the corporate qualification papers, relates to "Christiansen Oil and Gas, Inc.," rather than to the offeror-lessee, Christiansen Oil, Inc., the lease is properly canceled, since the offeror was not the first-qualified offeror.

Christiansen Oil, Inc., 37 IBLA 52 (Sept. 18, 1978)

A first-drawn simultaneous oil and gas lease offer filed by an association which is not accompanied by evidence of the qualifications of the association to hold an oil and gas lease or which does not refer to the case record in which the evidence had previously been filed, as required by 43 CFR 3102.3-1(a), must be rejected.

SID Partnership, 37 IBLA 165 (Oct. 10, 1978)

An application for an oil and gas lease filed in the name of a person deceased at the time of filing is properly rejected as there then was no offeror qualified to hold a lease.

Estate of Charles D. Ashley, 37 IBLA 367 (Nov. 2, 1978)
85 I.D. 403

OIL AND GAS LEASES--Continued

FIRST-QUALIFIED APPLICANT--Continued

A noncompetitive oil and gas lease may only be issued to the first-qualified applicant. A first-drawn drawing entry card oil and gas lease offer signed by an agent but which is not accompanied by the statements required by regulation must be rejected because the offeror is not the first-qualified applicant.

Cotton Petroleum Corp., 38 IBLA 271 (Dec. 13, 1978)

The first-drawn entry card of a corporation which has failed to comply with the regulations governing qualifications must be rejected.

Appellant's request that it be permitted to furnish the evidence of qualifications on appeal is denied. In simultaneous oil and gas leasing, the only difference between the drawing entry cards is the order in which they are drawn. The applications are considered to have been simultaneously made. Giving an unqualified first-drawn entrant additional time to file infringes on the rights of the second-drawn qualified offeror.

University of the Trees, 40 IBLA 74 (Mar. 16, 1979)

A first-drawn simultaneous drawing entry card which is defective because of noncompliance with a mandatory regulation must be rejected and may not be "cured" by submission of further information.

Charles J. King, 40 IBLA 276 (Apr. 18, 1979)

When, in a drawing of simultaneously filed oil and gas lease offers, the first-drawn offeror is notified to submit the first year's advance rental, that rental must be received by the proper office within the prescribed 15 days. Automatic disqualification, stemming from failure to pay timely, will not be avoided by allegations that payment was mailed far enough in advance to arrive at BLM timely.

American Petrofina Co. of Texas, 41 IBLA 126 (June 13, 1979)

A first-drawn entry card creates no vested right therein; the offeror gains merely a right of priority in consideration. The Department is authorized to accept only the offer of the first-qualified applicant, one who has fully complied with all mandatory regulations.

Harry A. Zuckerman et al., 41 IBLA 372 (July 23, 1979)

An oil and gas lease may be awarded to the first-qualified applicant only. The regulations governing qualifications are mandatory, and strict compliance therewith is required.

A defective drawing card offer for an oil and gas lease is not curable by submission of required evidence of qualifications after the drawing, for the reason that the rights of the second- and third-drawn qualified offerors have intervened. Where appellant's offer was third drawn and eventually accorded priority and then ultimately disqualified, the parcel described therein must be included in a subsequent list of lands available for simultaneous filing.

Don C. Bell II (Trustee), 42 IBLA 21 (July 25, 1979)

OIL AND GAS LEASES--Continued

FIRST-QUALIFIED APPLICANT--Continued

Where an applicant with first priority dies after filing an oil and gas lease application but prior to issuance of the lease, his personal representative, heirs, or devisees are entitled to the lease provided there is filed in all cases an offer to lease in compliance with 43 CFR 3102.8. Such offer will be effective as of the date of the original lease offer filed by the deceased.

Lamar M. Richardson, Jr., 42 IBLA 333 (Aug. 30, 1979)

Where a protest, with accompanying supporting evidence, alleges that the oil and gas lease offer drawn first in a simultaneous filing-drawing procedure violated the regulations because a party in interest was not disclosed and there was a multiple filing, the Bureau of Land Management should first afford the drawee an opportunity to respond to the protest before rejecting the offer based on facts alleged in the protest. The error, however, is rendered harmless where on appeal the offeror has full opportunity to make factual submissions and respond to the allegations.

H. J. Enevoldsen, 44 IBLA 70 (Nov. 20, 1979)
86 I.D. 643

Where an applicant with first priority dies after filing an oil and gas lease application but prior to issuance of the lease, his personal representative, heirs, or devisees are entitled to the lease provided there is filed an offer to lease in compliance with 43 CFR 3102.8.

Estate of F. J. Bradshaw, 44 IBLA 107 (Nov. 20, 1979)

FUTURE AND FRACTIONAL INTEREST LEASES

In a noncompetitive oil and gas lease offer for acquired lands in which the United States owns a fractional present interest, 43 CFR 3130.4-4 requires offeror to submit a statement detailing the extent of his ownership in operating rights not owned by United States, regardless of whether the United States owns 50 percent or more of operating rights.

Where an unamended senior offer for a noncompetitive fractional oil and gas lease on acquired lands is not in compliance with 43 CFR 3130.4-4, a junior offer obtains priority to extent of conflicts between competing filings, and the junior offeror's protest must be sustained.

Frederick L. Smith et al., 19 IBLA 162 (Mar. 14, 1975)

An acquired lands oil and gas lease offer, for lands in which the United States owns only a fractional mineral interest, successfully drawn at a noncompetitive lease simultaneous drawing, is defective and is properly rejected when the applicant fails to accompany his offer with the statement required by the regulation showing the extent of his ownership of operating rights to the fractional mineral interest not owned by the United States.

George H. Isbell, Jr., 20 IBLA 312 (May 30, 1975)

James E. Belden, Henry Y. Yoshino, 23 IBLA 216 (Jan. 6, 1976)

Thelma Wright, Geral Beveridge, 27 IBLA 198 (Oct. 4, 1976)

OIL AND GAS LEASES--Continued

FUTURE AND FRACTIONAL INTEREST LEASES--Continued

The failure of the offeror for a noncompetitive oil and gas lease to complete that part of item 2 of the lease offer form calling for the extent of the interest of the United States in oil and gas if less than 100 percent does not by itself necessitate rejection of the offer as the offer is held to include "any and all" lands described therein and whatever mineral interest the United States owns in said lands and thus becomes an offer for whatever interest is available.

An acquired lands lease offer for land in which the United States owns only a fractional mineral interest is defective and subject to rejection when the applicant fails to accompany his offer with the statement required by the regulations showing the extent of his ownership of operating rights to the fractional mineral interest not owned by the United States. Under the regular or "over-the-counter" filing procedure, however, if the offeror subsequently submits his statement regarding ownership of operating rights prior to a final decision rejecting the offer, the defect may be considered cured with priority of filing as of the time the statement was filed.

John Oakason, Jean Oakason, 21 IBLA 185 (July 25, 1975)

An acquired lands oil and gas lease offer for lands in which the United States owns only a fractional mineral interest is defective and is properly rejected when the applicant fails to accompany the offer with the statement required by the regulation showing the extent of ownership of operating rights to the fractional mineral interest not owned by the United States.

Margaret Hughes Boggs, 22 IBLA 146 (Sept. 30, 1975)

Michael Shearn, 24 IBLA 259 (Mar. 29, 1976)

Robert L. Williams, 24 IBLA 311 (Apr. 20, 1976)

Mary Nan Spear, 25 IBLA 34 (May 5, 1976)

Beatrice E. Marchand, 26 IBLA 180 (Aug. 9, 1976)

In accordance with the policy established by 43 CFR 3130.4-4, the Department ordinarily issues oil and gas leases only to offerors who, upon issuance of the lease, will own at least 50 percent of the operating rights of a lease.

L. F. Lindsay, Sr., et al., 23 IBLA 218 (Jan. 6, 1976)

An acquired lands oil and gas lease offer for lands in which the United States owns only a fractional mineral interest is defective and is properly rejected when the applicant fails to accompany his offer with the statement required by 43 CFR 3130.4-4 showing the extent of his ownership of operating rights for the fractional mineral interest not owned by the United States.

June Brooks, 25 IBLA 326 (June 30, 1976)

A simultaneous acquired lands oil and gas lease offer for lands in which the United States owns only a fractional mineral interest is defective and is properly rejected when the applicant fails to accompany his offer with the statement required by the regulation showing the extent of his ownership of operating rights to the fractional mineral interests not owned by the United States, nor can such defect be cured by submitting the information on appeal.

Jelenko Stefanovic, 26 IBLA 229 (Aug. 17, 1976)

OIL AND GAS LEASES--Continued

FUTURE AND FRACTIONAL INTEREST LEASES--Continued

An oil and gas lease offer for land in which the United States owns a fractional mineral interest must be accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States. An offer which is defective for failure to comply with this mandatory regulation must be rejected.

Grady Argenbright, 27 IBLA 24 (Sept. 17, 1976)

An acquired lands oil and gas lease offer, for lands in which the United States owns only a fractional mineral interest, is defective and is properly rejected when the applicant fails to accompany its offer with the statement required by the regulation showing the extent of its ownership of operating rights to the fractional mineral interest not owned by the United States. Under the regular or "over-the-counter" filing procedure, however, if the offeror submits its statement of operating rights with its appeal, the defect may be considered cured with priority of filing as of that time.

Arkansas Western Gas Co., 27 IBLA 207 (Oct. 6, 1976)

An oil and gas lease offer for acquired lands in which the United States owns a fractional mineral interest must be accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States. An offer which is defective for failure to comply with this mandatory regulation must be rejected.

An oil and gas lease offer for lands in which the United States owns a fractional mineral interest must be accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States. If an agent signs such statement, rather than the offeror, the regulations require that evidence be filed of the authority of the agent to sign the statement. The agent's signature will be acceptable only if the authorization meets the specifications of the regulations.

An oil and gas lease offer for lands in which the United States owns a fractional mineral interest which is not accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States is defective and such defect cannot be cured by the submission of further information.

Frank G. Wells, 28 IBLA 113 (Nov. 15, 1976)

An oil and gas lease offer for acquired lands in which the United States owns a fractional mineral interest must be accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States. An offer which is defective for failure to comply with this mandatory regulation must be rejected.

Susan B. Smith, 28 IBLA 173 (Nov. 24, 1976)

An oil and gas lease offer for acquired lands in which the United States owns a fractional mineral interest, filed before Sept. 30, 1976, must have been accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States. An offer which was defective for failure to comply with this

OIL AND GAS LEASES--Continued

FUTURE AND FRACTIONAL INTEREST LEASES--Continued

mandatory regulation must be rejected where it was filed in the simultaneous drawing procedure.

Duncan Miller, 29 IBLA 1 (Feb. 7, 1977)

Mary Nan Spear, 31 IBLA 386 (Aug. 16, 1977)

An oil and gas lease offer for acquired lands in which the United States owns a fractional mineral interest must be accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States. When an offeror submits, on appeal, a copy of such statement but the date on the statement differs from the date on the card, and the offeror does not allege he filed the statement simultaneously with the offer, such offer must be rejected for failure to comply with a mandatory regulation.

Duncan Miller, 29 IBLA 43 (Feb. 16, 1977)

An oil and gas lease offer for acquired lands in which the United States owns a fractional mineral interest, filed before Oct. 28, 1976, must have been accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States. An offer which was defective for failure to comply with this mandatory regulation must be rejected where it was filed in the simultaneous drawing procedure.

Vernon C. Howell, 30 IBLA 70 (Apr. 18, 1977)

Where the regulation, 43 CFR 3130.4-4 (1975), in effect at the time of filing, required that an oil and gas lease offer for land in which the United States owns a fractional mineral interest must be accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States, a simultaneously filed lease offer which is not accompanied by the required statement must be rejected, and the defect may not be "cured" by submission of the statement at a later time.

David F. Owen, 31 IBLA 24 (June 20, 1977)

Where the United States owns only fractional mineral interest in the land, an offer filed before Sept. 30, 1976, for a simultaneous oil and gas lease drawing, must be rejected where it is not accompanied by a statement showing extent of offeror's ownership of operating rights in fractional mineral interest not owned by the United States.

Bruce T. Cameron, Carol Heller, 31 IBLA 234 (July 12, 1977)

Where the regulation, 43 CFR 3130.4-4 (1975), in effect at the time of filing, required that an oil and gas lease offer for acquired land in which the United States owns a fractional mineral interest must be accompanied by a statement showing the extent of the offeror's ownership of the operating rights to the fractional mineral interest not owned by the United States, a simultaneously filed oil and gas lease offer which is not accompanied by the required statement must be rejected.

Where a regulation requires that an acquired lands oil and gas lease offer be accompanied by a separate statement as to the offeror's ownership of operating rights to the fractional mineral interest not owned by the

OIL AND GAS LEASES--Continued

FUTURE AND FRACTIONAL INTEREST LEASES--Continued

United States, and the offer is rejected for noncompliance therewith, the offeror's bald assertion that he filed such statement is insufficient to prove such a fact without corroboration. A presumption of regularity supports the official acts of public officers and, absent clear evidence to the contrary, it will be presumed that they have properly discharged their official duties.

M. J. Langley, 32 IBLA 118 (Sept. 12, 1977)

Regulations in force prior to Oct. 28, 1976, prohibited, in the absence of extraordinary circumstances, the issuance of oil and gas leases for fractional interests to one who would own less than 50 percent of operating rights in the leased property. The later determination that such a policy may not in general serve the public interest and the expression of the new policy in a revised regulation does not constitute an extraordinary circumstance.

Repeal of regulations which prohibit leasing fractional interests to one who would own only a minority of operating rights in the leased property gives priority to an otherwise regular offer which would have had to be rejected under the former regulations, as of the effective date of the repeal, provided that no offers qualified under the former regulation have been received prior to repeal, and that the offer has not been rejected prior to repeal.

A lease erroneously issued in violation of regulations which prohibit leasing fractional interests to one who would own only a minority of operating rights in the leased property must be canceled if a lease is awarded to another applicant in a drawing held among the first and other offers simultaneously filed following repeal of the regulations.

Wilfred Plomis, 34 IBLA 222 (Mar. 27, 1978)

Where BLM rejected appellant's offer for oil and gas lease because it failed to receive from him fractional interest statement required by 43 CFR 3130.4-4 (1975), and evidence affidavits by appellant and his wife were filed on appeal reciting that he mailed such statement with his entry card for simultaneous drawing, the presumption of administrative regularity obtains and appellant must be deemed to have not borne his risk of nonpersuasion.

Charles J. Babington, 36 IBLA 107 (July 14, 1978)

KNOWN GEOLOGIC STRUCTURE

A determination by the Geological Survey that lands are within an undefined known geologic structure will not be disturbed in the absence of a clear showing that the determination was improperly made.

Where the Geological Survey has determined that any part of the lands described in a noncompetitive oil and gas lease is within an undefined known geologic structure, the lessee is required to pay increased rental in accordance with 43 CFR 3103.3-2(b)(1), and to furnish a lease bond as required by 43 CFR 3104.1.

Duncan Miller, 19 IBLA 86 (Mar. 3, 1975)

OIL AND GAS LEASES--Continued

KNOWN GEOLOGIC STRUCTURE--Continued

The effective date of a determination that lands are within a known geologic structure of a producing oil and gas field, within the meaning of 30 U.S.C. § 226(b) (1970) and 43 CFR 3100.7-3, is the date of the ascertainment of the facts supporting the determination. After that date the Bureau of Land Management has no authority to issue an oil and gas lease pursuant to the noncompetitive lease provisions of the Mineral Leasing Act of 1920, 30 U.S.C. § 226(c) (1970).

The assertion that the Geological Survey has followed a different practice in classifying lands as within a known geologic structure on other lands is relevant insofar as it may show that the lands at issue were erroneously classified as presumptively productive, but a showing of the difference in practice would not by itself prove error.

A party challenging a determination that lands are within a known geologic structure has the burden of making a clear and definite showing of error in the determination; material indicating that the geologic formation at issue is irregular in quality and productivity does not constitute a showing that the lands are not presumptively productive, *i.e.*, that the lands are not within the known or inferred limits of the multiple and overlapping producing intervals involved.

When an appellant asserts facts which do not on their face sustain the contentions on appeal, this Board will deny a request for a hearing to determine the asserted issues of fact. 43 CFR 4.415.

Nola Grace Ptasynski, Barbara C. Lisco, 19 IBLA 129 (Mar. 5, 1975)

A bond for not less than $1,000 is properly required to be filed when all or any part of the land in a noncompetitive lease is included within the limits of a known geologic structure of a producing oil and gas field. That the land is included in a communitized producing unit does not vitiate that requirement.

Duncan Miller, 20 IBLA 9 (Apr. 14, 1975)

It is the date of the ascertainment by the Geological Survey of the producing character of a structure underlying a tract of land and not the date of the pronouncement of said fact which is determinative of rights depending on whether or not the land is situated within a known geological structure (KGS). A noncompetitive oil and gas lease offer must be rejected if, at any time before a lease actually issues, the land described therein becomes within a KGS, even if the offer was filed prior to the ascertainment of the KGS.

A noncompetitive oil and gas lease must be canceled where the land described therein is determined by the United States Geological Survey to be within a known geological structure of a producing oil or gas field as of the date of the signing of the lease on behalf of the United States by the authorized officer.

One who attacks a determination by the Geological Survey that lands are situated within the known geological structure of a producing oil or gas field has the burden of showing that the determination is in error and the determination will not be disturbed in the absence of a clear and definite showing of error.

An addition may be made to an existing known geological structure on the basis of drill stem test information which gives rise to the reasonable inference that a producing reservoir extends under the land included in the addition. It is not necessary that the well from which the information is derived be completed to a producing status before such conclusion is reached where the test information discloses the presence of two

OIL AND GAS LEASES--Continued

KNOWN GEOLOGIC STRUCTURE--Continued

reservoirs which are present and productive in the adjoining producing field.

William T. Alexander, 21 IBLA 56 (June 18, 1975)

Lands within a known geologic structure of a producing oil or gas field may only be leased by competitive bidding pursuant to 43 CFR 3120, and a noncompetitive oil and gas lease offer filed for such lands is properly rejected.

One who attacks a determination by the Geological Survey that lands are situated within the known geologic structure of a producing oil or gas field has the burden of showing that the determination is in error and the determination will not be disturbed in the absence of a clear and definite showing of error.

James A. Wallender, 26 IBLA 317 (Aug. 30, 1976)

The signing of an oil and gas lease offer by the authorized officer of the Bureau of Land Management is the act that constitutes issuance of the lease and creates a binding contract; such a lease contract is not subject to cancellation by reason of inclusion of leased land in a known geologic structure as of a date subsequent to lease issuance.

Barbara C. Lisco, 26 IBLA 340 (Sept. 7, 1976)

Where part of the lands in an oil and gas lease are included within the known geologic structure of a producing oil or gas field, the annual rental rate will be increased for all of the land in the lease and a bond required.

H. B. Cahoon Investment Co., John Oakason, 27 IBLA 210 (Oct. 6, 1976)

When a noncompetitive oil and gas lease has been issued and includes land within a known geologic structure which was ascertained prior to the issuance of the lease, the lease was erroneously issued and must be canceled to the extent that it included land within the KGS.

In the absence of an express revocation, the determination of an unnamed, undefined known geologic structure is not canceled when the structure is omitted from a redefinition of a neighboring but separate field, nor is such a determination canceled by an erroneous certification on a lease that the lands therein are not within a KGS.

David A. Provinse, 27 IBLA 376 (Nov. 5, 1976)

Ordinarily, the signing of an oil and gas lease offer by the authorized officer of the Bureau of Land Management is equivalent to issuance of the lease and creates a binding contract. However, where a Secretarial Order provides that all oil and gas noncompetitive offers must, prior to issuance of a lease, be referred to Geological Survey for a determination of whether the lands are within a known geological structure, and the authorized officer fails to follow such procedure prior to the signing, such signing is not authorized and, therefore, not binding on the Secretary.

Nola Grace Ptasynski (Supp.) (On Court Remand), 28 IBLA 256 (Dec. 20, 1976)

OIL AND GAS LEASES--Continued

KNOWN GEOLOGIC STRUCTURE--Continued

Where the record does not disclose sufficient facts upon which to make determinations whether a Bureau of Land Management officer who signed an oil and gas lease possessed the authority to do so, when the date of ascertainment of a known geologic structure actually occurred, and whether the United States Geological Survey had sufficient information to make a known geologic structure determination, a hearing may be ordered so that a complete record may be developed.

William T. Alexander, 28 IBLA 277 (Dec. 22, 1976)

Except for establishing priority of filing, the drawing of an offer for a noncompetitive oil and gas lease creates no vested rights in the offeror. If subsequent to the filing of a noncompetitive oil and gas lease offer and prior to issuance of a lease the land described therein is determined to be in a known geological structure of a producing oil or gas field, the noncompetitive lease offer must be rejected.

Guy W. Franson, 30 IBLA 123 (May 12, 1977)

Lands within a known geologic structure of a producing oil or gas field may be leased only by competitive bidding pursuant to 43 CFR 3120, and a noncompetitive oil and gas lease offer filed for such lands is properly rejected where either before or after the filing of the offer, but prior to the issuance of the lease, the land is determined to be within the known geologic structure of a producing oil or gas field.

An applicant for an oil and gas lease who challenges a determination by the Geological Survey that lands are situated within the known geologic structure of a producing oil or gas field has the burden of showing that the determination is in error and the determination will not be disturbed in the absence of a clear and definite showing of error.

Curtis Wheeler, 31 IBLA 221 (July 7, 1977)

Lands within a known geological structure of a producing oil or gas field may only be leased by competitive bidding pursuant to 43 CFR 3120, and a noncompetitive oil and gas lease offer filed for such lands is properly rejected.

Curtis D. Wheeler, 31 IBLA 354 (July 25, 1977)

Where a Bureau of Land Management decision rejects in part a simultaneous oil and gas lease offer because certain lands encompassed by the offer are within a known geologic structure, but appellant submits a Geological Survey letter which appellant states admits that such determination was based on erroneous information, the Bureau decision will be set aside and the case remanded for further appropriate consideration.

William E. Frazier, Jr., 32 IBLA 320 (Oct. 3, 1977)

Land included within a known geologic structure of a producing oil or gas field may be leased only by competitive bidding.

A noncompetitive oil and gas lease must be canceled where the land described therein was determined by the United States Geological Survey to be within a known geologic structure of a producing oil or gas field

OIL AND GAS LEASES--Continued

KNOWN GEOLOGIC STRUCTURE--Continued

prior to the date of signing the lease on behalf of the United States by the authorized officer.

Amerada Hess Corp., 33 IBLA 293 (Jan. 10, 1978)

A timely appeal from rejection of an oil and gas lease offer because of a determination of known geologic structure suspends the rejection pending decision by this Board, and where the Geological Survey rescinds the KGS determination as having been erroneously made during the pendency of the appeal, the status quo ante of land involved is restored.

Where land was omitted from an oil and gas lease only because of an erroneous KGS determination, and the applicant has preserved his priority by timely appealing the rejection, it is proper to amend such lease to include such omitted land when the Geological Survey rescinds its erroneous KGS determination.

David A. Provinse, 33 IBLA 312 (Jan. 13, 1978)

Where an offeror submits a bid in a competitive sale, under the law and regulations governing such sales, he accepts the premise that the land is within the known geologic structure of a producing field.

Gerald S. Ostrowski, 34 IBLA 258 (Mar. 28, 1978)

Under 30 U.S.C. § 226(b) (1976) land within the known geologic structure of a producing oil or gas field may only be leased by competitive bidding and where land is determined to be within such a structure while a noncompetitive lease offer is pending, the offer must be rejected.

An applicant for a noncompetitive oil and gas lease who challenges a determination by the Geological Survey that land is within the known geologic structure of a producing oil or gas field has the burden of showing that the determination is in error.

"Known geologic structure." A known geologic structure is technically the trap in which an accumulation of oil or gas has been discovered by drilling and determined to be productive, the limits of which include all acreage that is presumptively productive.

When on appeal a sufficient showing is made to call into question a determination that land lies within a known geologic structure of a producing oil or gas field, and a hearing is requested, the decision may be set aside and remanded for hearing.

Jack J. Bender, 40 IBLA 26 (Mar. 9, 1979)

The failure of the BLM officer to follow the procedure set out in a Secretarial Order requiring all offers, prior to issuance of a lease, to be sent to Geological Survey for a determination of whether the lands are within a known geologic structure, renders the signing of the lease unauthorized, and thus not binding on the Secretary.

Generally, the signing of an oil and gas lease by the authorized officer of the Bureau of Land Management is the act that constitutes issuance of the lease. When land is determined to be within a known geologic structure prior to authorized issuance of a lease, noncompetitive lease offers must be rejected and the land may be leased only by competitive bidding.

One who challenges the classification of lands as within a known geologic structure has the burden of showing

OIL AND GAS LEASES--Continued

KNOWN GEOLOGIC STRUCTURE--Continued

that the determination is in error, and the classification will not be disturbed in the absence of a clear and definite showing of error.

United States v. William T. Alexander (On Court Remand), 41 IBLA 1 (May 21, 1979)

Where a noncompetitive oil and gas lease is rejected on the ground that the land lies within an undefined known geologic structure, but the Geological Survey indicates its willingness to amend such classification based on verification of information to be supplied by the offeror, the case will be remanded for further consideration.

Jean Szczepanski, 44 IBLA 206 (Dec. 11, 1979)

LANDS SUBJECT TO

Where an oil and gas lease offer for public lands within 1 mile of the exterior boundaries of a naval petroleum reserve is rejected because the Department of the Navy recommends against the leasing of the land despite the Geological Survey's determination that operations on the subject land would not adversely affect the naval reserve through drainage from known productive horizons, the decision rejecting the lease offer will be reversed. The recommendations of the Federal agency exercising jurisdiction over a naval petroleum reserve, while important, are not conclusive. The final determination rests with the Department, and where the Geological Survey after full consideration of pertinent technical considerations recommends leasing, a lease will issue.

R. Garvin Berry, Jr., 18 IBLA 331 (Jan. 9, 1975)

Land formerly included in a canceled or relinquished lease or in a lease terminated or expired by operation of law shall be subject to filing of new lease offers only as provided in 43 CFR 3112.

Duncan Miller, 19 IBLA 188 (Mar. 18, 1975)

Oil and gas lease offers embracing lands within an area under consideration as a potential wild and scenic river area pursuant to sec. 5(d) of the Wild and Scenic Rivers Act, 16 U.S.C. § 1276(d) (1970), or within adjacent areas having special resource values which might be damaged by oil and gas leasing may be properly rejected in the exercise of the Secretary's discretion in leasing.

John Oakason, Beard Oil Co., 19 IBLA 191 (Mar. 18, 1975)

Rosita Trujillo, 21 IBLA 289 (Aug. 11, 1975)

An oil and gas lease offer must be rejected when, before the lease offer has been accepted, the land applied for has been patented with no reservation of oil and gas to the United States.

It is proper to reject an oil and gas lease offer for Alaskan land to the extent of conflict with an Alaskan selection application after the application has been tentatively approved even though the offer was filed before the selection application.

Lloyd W. Levi, 19 IBLA 201 (Mar. 19, 1975)

Yolana Bochar et al., 19 IBLA 204 (Mar. 19, 1975)

OIL AND GAS LEASES--Continued

LANDS SUBJECT TO--Continued

Under the policy of the Secretary of the Interior of maintaining on file oil and gas lease offers for lands in Alaska filed prior to the issuance of Public Land Order 4582 on Jan. 17, 1969, an offer which would ultimately require rejection because of the unavailability of the land at the time the offer was filed, will not be retained on file, but may be properly rejected at any time when the case is reached for adjudication.

An oil and gas offer, for lands in a terminated or relinquished lease, must be filed in compliance with the simultaneous filing procedure in 43 CFR 3112. If such an offer is not so filed, it is properly rejected.

Vance W. Phillips and Aelisa A. Burnham, 19 IBLA 211 (Mar. 21, 1975)

The Mineral Leasing Act of 1920 is not applicable to lands of the Wind River Indian Reservation which were ceded by the Indians to the United States in trust for disposition but were subsequently restored to tribal ownership. Such lands may be leased only under the Act of May 11, 1938, 25 U.S.C. § 396a *et seq*. (1970).

The Mineral Leasing Act of 1920 is not applicable to the ceded but undisposed of lands of the Wind River Indian Reservation. Such lands may be leased only under the Act of Aug. 21, 1916, 39 Stat. 519.

General Crude Oil Co., 19 IBLA 205 (Mar. 28, 1975)

Oil and gas lease applications, action on which was suspended under Public Land Order 4582, 34 FR 1025 (1969), are properly rejected when the lands are subsequently patented to the State of Alaska under selection applications even though the latter postdate the oil and gas lease applications; the first-qualified oil and gas lease applicant has no right or interest in the land applied for which is protected by the savings clauses of the Alaska Statehood Act and the Alaska Native Claims Settlement Act.

Haruyuki Yamane et al., 19 IBLA 320 (Apr. 7, 1975)

A noncompetitive oil and gas lease offer is properly rejected where the land which is the subject of such offer was formerly included in a terminated oil and gas lease, and which may be leased only in compliance with the simultaneous filing procedures set out in 43 CFR 3112.

Duncan Miller, 20 IBLA 19 (Apr. 16, 1975)

An offer for an oil and gas lease under the Mineral Leasing Act for Acquired Lands may properly be rejected where there is uncertainty regarding the title to the oil and gas deposits.

Shell Oil Co., 20 IBLA 292 (May 27, 1975)

Oil and gas lease offers embracing lands withdrawn or reserved for any agency of the Department of Defense may not be granted without the consent of that Department. 43 U.S.C. § 158 (1970). Such lease offers must be rejected where such consent is withheld as inconsistent with the military use, and the offers may not be suspended to await the possible availability of the lands for leasing.

Mobil Oil Corp., 20 IBLA 296 (May 27, 1975)

OIL AND GAS LEASES--Continued

LANDS SUBJECT TO--Continued

"Waterfowl production areas" are within the meaning of "wildlife refuge lands" in 43 CFR 3101.3-3(a) and, therefore, are subject to the prohibition against oil and gas leasing (except where drainage is involved) contained in 43 CFR 3101.3-3(a)(1).

L. B. Young, Jr., 20 IBLA 333 (June 11, 1975)

An oil and gas lease application covering lands in an outstanding lease, whether that lease is valid, void or voidable, must be rejected. A noncompetitive oil and gas lease offer covering lands in a known geologic structure must be rejected, such lands being subject to lease only by competitive bidding.

Duncan Miller, 21 IBLA 21 (June 16, 1975)

The prohibition in 43 CFR 3101.3-3(a)(1) against leasing for oil and gas in wildlife refuge lands, except where there is drainage, applies to areas withdrawn for waterfowl production, even though the withdrawal order did not prohibit leasing. Offers for such lands and lakebeds riparian thereto are properly rejected.

A. G. Golden, 21 IBLA 76 (June 25, 1975)

Where a Federal oil and gas lease has issued covering land which has been patented with no mineral reservation to the United States in the patent, the oil and gas lease is properly canceled as to such land.

O. D. Presley, 21 IBLA 190 (July 28, 1975)

It is proper to reject an oil and gas lease offer to the extent of conflict with an Alaska State selection application after the application has been tentatively approved even though the offer was filed before the selection application.

C. Burglin et al., 21 IBLA 234 (Aug. 11, 1975)

When several offers for a noncompetitive oil and gas lease are filed for the same parcel during a simultaneous filing period and all are withdrawn after the drawing but before a lease is issued, the land is not thereby made available for an over-the-counter offer but must be included in a subsequent list of lands available for filing under the simultaneous drawing procedure.

Edward M. Digneo, 22 IBLA 4 (Sept. 4, 1975)

Land included in an oil and gas lease which terminates by operation of law for failure to pay rental timely, is subject to filing of new oil and gas lease offers only in accordance with the provisions of the regulations relating to simultaneous filing of oil and gas lease offers, and the filing of an over-the-counter lease offer will not interdict the simultaneous filing procedure as to that land.

Vern H. Bolinder, 22 IBLA 130 (Sept. 26, 1975)

OIL AND GAS LEASES--Continued

LANDS SUBJECT TO--Continued

Land included within an outstanding oil and gas lease is not available for leasing and an application filed for such land must be rejected.

Land, formerly in a canceled, relinquished, terminated, or expired lease, is not subject to over-the-counter filing, and may be leased only in compliance with the drawing procedure established by 43 CFR 3112.

John F. Brown, 22 IBLA 133 (Sept. 26, 1975)

Where the reasons given for rejection of an oil and gas lease offer are that several archaeological sites, possibly other such archaeological sites, and scenic values of certain lands might be endangered by oil and gas development, but the field report relied upon does not delineate the archaeological sites and fails to describe the scenic values that would be affected, the decision may be set aside and the case remanded for further investigation to determine if oil and gas leasing could be allowed with protective stipulations, or, if not, to substantiate the basis for rejection.

Phillip S. Mahoney, 22 IBLA 136 (Sept. 26, 1975)

Where oil and gas deposits in lands acquired by the United States and devoted to use for military purposes become "surplus property" under the Federal Property and Administrative Services Act, such deposits may be leased only under the provisions of that Act, and are not subject to leasing under the Mineral Leasing Act for Acquired Lands.

Paradox Oil and Gas Co., 22 IBLA 242 Oct. 22, 1975)

National forest public lands which have not been withdrawn from oil and gas leasing but are under study by the Forest Service as a proposed wilderness area are available for leasing in the discretion of, and under conditions imposed by, the Secretary of the Interior. Such discretion is not properly exercised when the Bureau of Land Management rejects an offer solely upon the recommendation of the Forest Service that land is a "candidate" for a proposed wilderness area without making an independent determination that leasing, with appropriate protective stipulations, is or is not in the public interest.

Esdras K. Hartley, 23 IBLA 102 (Dec. 23, 1975)

When an agency with jurisdiction over acquired lands has requested a short-term suspension of oil and gas lease offers, a decision rejecting the offers may be remanded to consider processing the offers in a manner consistent with that of a similar offer for which the agency has also accepted a suspension.

Chevron Oil Co., 23 IBLA 163 (Dec. 23, 1975)

A noncompetitive oil and gas lease offer for acquired land in an incorporated city, is properly rejected since the Mineral Leasing Act for Acquired Lands specifically excludes such lands from its provisions.

Sallie B. Sanford, 23 IBLA 312 (Jan. 16, 1976)

OIL AND GAS LEASES--Continued

LANDS SUBJECT TO--Continued

Public lands in national forests are presently open to oil and gas leasing regardless of whether they are part of an officially designated wilderness area. However, where the land is within such an established wilderness area, the Secretary of Agriculture has the statutory authority to prescribe reasonable stipulations for the protection of the wilderness character of the land consistent with the use of the land for the purpose of the lease, although only the Secretary of the Interior may close the land to leasing or prohibit the issuance of a lease.

Stanley M. Edwards, 24 IBLA 12 (Feb. 4, 1976)
83 I.D. 33

National forest lands, some of which are in a wilderness area, a roadless area, or a memorial parkway, which have not been withdrawn from oil and gas leasing, are subject to leasing in the discretion of and under conditions imposed by the Secretary of the Interior. However, where the Secretary of the Interior has specifically determined by formal publication of a memorandum that lands in a certain section of a national forest are to be withheld from leasing, he has exercised his plenary discretion to refuse to issue leases, and subsequent offers for lands in this designated area restricted from leasing are properly rejected.

James Donoghue et al., 24 IBLA 210 (Mar. 23, 1976)

The amount of acreage contained in an oil and gas lease may be reduced where, upon resurvey of the land, it is determined that the area under lease is actually smaller than the area shown by the original survey.

Grace M. Brown et al., 24 IBLA 301 (Apr. 1, 1976)

Because the Mineral Leasing Act for Acquired Lands specifically excludes the leasing of land located within an incorporated city, town, or village, a noncompetitive oil and gas lease offer for acquired land within the boundaries of such a city, town, or village is properly rejected.

In the absence of specific statutory authority to lease, the Secretary of the Interior has implied authority, as guardian of the public's natural resources, to lease an oil and gas deposit under his jurisdiction when it is in danger of being drained by wells drilled on adjacent land. However, such protective leases may be issued only by competitive bidding.

James L. Santy, 25 IBLA 390 (July 6, 1976)

Where an oil and gas lease offer is rejected because the land was received by the United States as part of a sec. 8, Taylor Grazing Act exchange, and the record does not indicate such an exchange took place the case will be remanded for consideration in light of the actual record.

Husky Oil Co. of Delaware, 26 IBLA 194 (Aug. 11, 1976)

Land included within an outstanding oil and gas lease is not available for leasing and an oil and gas lease offer filed for such land must be rejected.

OIL AND GAS LEASES--Continued

LANDS SUBJECT TO--Continued

The Secretary has discretionary authority to reject an oil and gas lease offer where Federal title to the oil and gas deposits is uncertain.

Leonard E. McSweyn, David A. Provinse, 26 IBLA 376 (Sept. 9, 1976)

When the Forest Service recommends against issuing an oil and gas lease for public land because the land has been included within a wilderness candidate study area, the Bureau of Land Management must make an independent determination on whether the lease, with stipulations, should be issued. A case will be remanded for such a determination especially where the Forest Service on appeal has reconsidered and recommends leasing with certain stipulations.

Fred P. Blume, 28 IBLA 58 (Nov. 9, 1976)

When the Forest Service recommends against issuing an oil and gas lease for public land because the land has been included within a wilderness candidate study area, the Bureau of Land Management must make an independent determination on whether not to issue a lease or whether issuance of a lease subject to appropriate stipulations is in the public interest. A case will be remanded to the Bureau of Land Management for an independent determination where it is evident that such has not been done.

Kenneth F. Cummings and A. W. Fleming, Empire Resources, Inc., 28 IBLA 73 (Nov. 12, 1976)

An oil and gas offer embracing land in the bed of a navigable river, which is State land, is properly rejected.

Leonard E. McSweyn, 28 IBLA 100 (Nov. 15, 1976)
83 I.D. 556

The Secretary of the Interior may, in his discretion, reject any offer to lease public lands for oil and gas deposits upon a proper determination that leasing would not be in the public interest.

The Secretary of the Interior may reject a noncompetitive offer to lease for oil and gas when he determines that it is in the public interest to do so because the lands applied for are within the Interstate 70 scenic corridor and are under consideration for inclusion in a primitive area.

Pinnacle Mining and Exploration Co., Inc., 28 IBLA 249 (Dec. 20, 1976)

An oil and gas lease offer made pursuant to the Mineral Leasing Act for Acquired Lands is properly rejected where the subject lands are not acquired lands but, rather, are patented with a reservation of mineral rights in the United States.

John O. Clay, 28 IBLA 353 (Jan. 24, 1977)

Where the Bureau of Land Management has determined that lands listed under the simultaneous oil and gas leasing system should not have been listed solely because the lands lie within "a critical watershed which is to be the subject of an Environmental Impact Statement," the first-drawn offer will not be rejected but may remain in suspended state until completion of the EIS and determination at that time whether the lands may be leased subject to stipulations for protection of the watershed.

Adrian Overton, 29 IBLA 66 (Feb. 18, 1977)

Lands withdrawn for the protection of Alaska Natives' selection rights are not available for oil and gas leasing under the Mineral Leasing Act. 43 U.S.C. § 1621(i) (Supp. III 1973).

James W. Cance et al., 1 SEC. 1 (Apr. 15, 1977)
84 I.D. 176

When the Secretary of the Interior has exercised his discretionary authority over the issuance of oil and gas leases to promulgate a Public Land Order closing an area of public lands to oil and gas leasing for the purpose of preserving and developing the potash deposits therein belonging to the United States, it is proper to reject oil and gas lease offers for such withdrawn lands.

AA Minerals Corp., 30 IBLA 259 (May 31, 1977)

An oil and gas lease offer must be rejected as to lands applied for which are held in trust for Indians and are not available under the Mineral Leasing Act. Even though the minerals in these lands have been reserved to the United States, mineral development is not possible at this time because the language of the exchange act under which the lands were acquired requires further promulgation of special regulations by the Secretary as a condition precedent to such development.

Thomas D. Chace, 31 IBLA 13 (June 17, 1977)

43 CFR Subpart 3112 renders invalid an over-the-counter oil and gas lease offer filed for lands in canceled or relinquished leases or leases which have terminated by operation of law, for such lands are subject to simultaneous offers only.

Robert S. Bickel, 31 IBLA 201 (July 6, 1977)

Land included within an outstanding oil and gas lease is not available for leasing and an oil and gas lease offer filed for such land must be rejected.

Curtis D. Wheeler, 31 IBLA 354 (July 25, 1977)

Alvel C. Duncan, 39 IBLA 144 (Jan. 29, 1979)

A noncompetitive oil and gas lease offer is properly rejected where the land which is the subject of such offer has not been posted as available as prescribed by 43 CFR subpart 3112.

A junior oil and gas lease offer is properly rejected when the senior offer subsequently is accepted and the lease is properly issued.

David A. Provinse, 33 IBLA 312 (Jan. 13, 1978)

OIL AND GAS LEASES--Continued

LANDS SUBJECT TO--Continued

Where the Bureau of Land Management rejects in part an oil and gas lease offer because the subject lands are within a coal permit, and where a general policy determination as to the compatibility of concurrent development of these minerals is pending, the case will be remanded to be suspended and subsequently acted upon in light of whatever general policy is formulated.

Thomas F. Manners, 33 IBLA 362 (Jan. 23, 1978)

Lands acquired for military purposes and subsequently disposed of as surplus property under the Federal Property and Administrative Services Act with a reservation of mineral rights to the United States are not subject to leasing under the Mineral Leasing Act for Acquired Lands. Oil and gas leases on such land may issue only under the provisions of the Federal Property and Administrative Services Act, which requires competitive bidding.

Capitol Oil Corp., 33 IBLA 392 (Jan. 26, 1978)

Oil and gas lease offers may be rejected where legal title to the lands in issue is uncertain. It is not improper for BLM to refuse to suspend the offers pending determination of the title issue.

E L Industries, Inc., 34 IBLA 99 (Feb. 23, 1978)

Regulations in force prior to Oct. 28, 1976, prohibited, in the absence of extraordinary circumstances, the issuance of oil and gas leases for fractional interests to one who would own less than 50 percent of operating rights in the leased property. The later determination that such a policy may not in general serve the public interest and the expression of the new policy in a revised regulation does not constitute an extraordinary circumstance.

Wilfred Plomis, 34 IBLA 222 (Mar. 27, 1978)

An oil and gas lease offer for lands in a reservoir right-of-way is properly rejected pursuant to the Act of May 21, 1930, 30 U.S.C. §§ 301-306 (1970), and 43 CFR 3100.0-3(d)(1) which limit the right to lease deposits of oil and gas in and under rights-of-way to the owner of the right-of-way or his assignees.

Republic Oil & Mining Co. and *Margaret V. Coombs*, 35 IBLA 212 (May 26, 1978)

It is proper for the Bureau of Land Management to reject an over-the-counter offer for an oil and gas lease of land formerly included in a lease erroneously canceled, because under 43 CFR 3112.1-1 land in canceled leases is subject to the filing of new noncompetitive lease offers only in accordance with simultaneous filing procedures.

An over-the-counter oil and gas lease offer filed for land formerly embraced in an oil and gas lease which has expired by operation of law, which land has not been placed on the list of lands available for the filing of simultaneous oil and gas lease offers under 43 CFR Subpart 3112, must be rejected.

David A. Provinse, 35 IBLA 217 (May 26, 1978)

OIL AND GAS LEASES--Continued

LANDS SUBJECT TO--Continued

Unsurveyed fast lands, formed by accretion to public land or to lands patented with an oil and gas reservation, riparian to a navigable river and lying within the meander lines of that navigable river, as recorded on the official plat, may be leased provided that a proper offer is received and the other relevant conditions precedent to leasing are met.

Federal law determines the legal characterization of accretions, avulsions, and relictions to land riparian to navigable bodies of water, where title to the land or reserved interests in the land remains in the United States.

The boundary of an oil and gas lease covering lands riparian to a navigable river is the meander line indicated on the official plat of survey and not the waterline. Thus, lands accreted to the leased lands may be separately leased.

David A. Provinse, 35 IBLA 221 (May 26, 1978)
85 I.D. 154

A noncompetitive oil and gas lease offer is properly rejected where the land which is the subject of such offer is in an expired or terminated lease and has not been posted as available, as prescribed by 43 CFR Subpart 3112.

Robert P. Marshall, 36 IBLA 279 (Aug. 21, 1978)

Robert W. Enfield, 36 IBLA 303 (Aug. 31, 1978)

Oil and gas under a reservoir right-of-way may not be leased under the Mineral Leasing Act of 1920, 30 U.S.C. § 181 *et seq.* (1970), but may only be leased to the holder of the right-of-way, his assignee, or to adjacent owners or their lessees in accordance with the Act of May 21, 1930, 30 U.S.C. § 301 (1970); therefore, offers filed under the Mineral Leasing Act for such lands are properly rejected.

Alice Hays, 36 IBLA 313 (Aug. 23, 1978)

Where land was previously included in an oil and gas lease and thereafter listed for the simultaneous filing of offers pursuant to 43 CFR 3112, and two offers were filed, both of which were rejected, the land is not thereafter open to the filing of over-the-counter offers to lease, but must again be posted for simultaneous filing.

L. B. Walstrom, Jr., 36 IBLA 397 (Sept. 5, 1978)

Lands situated within the boundaries of incorporated cities, towns, or villages are excluded from oil and gas leasing under the Mineral Leasing Act, *as amended*, 30 U.S.C. § 181 (1970). If drainage occurs on such lands by reason of wells drilled on adjacent lands, agreements with the owners thereof may be entered into by the Bureau of Land Management pursuant to 43 CFR 3100.3.

Hawthorn Oil Co., 37 IBLA 91 (Sept. 22, 1978)

Lands or minerals in lands were not "withdrawn" and "restored from a withdrawal" as those terms are used in the public land laws merely because an erroneous title opinion that the minerals are not owned by the United States is corrected to reflect that they are owned by the United States, and the oil and gas simultaneous filing procedures are applicable where those minerals

OIL AND GAS LEASES--Continued

LANDS SUBJECT TO--Continued

were in a lease which expired before the correction of the status of the minerals was made.

Regardless of whether lands have been withdrawn from leasing and later restored, or were not withdrawn, an over-the-counter oil and gas lease offer must be rejected where the land involved was formerly embraced in an oil and gas lease which has expired by operation of law and has not been placed on the list of lands available for the filing of simultaneous oil and gas lease offers under 43 CFR Subpart 3112.

David A. Provinse, 38 IBLA 347 (Dec. 22, 1978)

Erroneous issuance by BLM of oil and gas lease on other withdrawn land in area of tract for which appellant submitted lease offer does not effect restoration to leasing of latter withdrawn tract.

F. M. Tully, 39 IBLA 137 (Jan. 29, 1979)

"Lands not available for leasing." Under 43 CFR 3110.1-3(a), lands are deemed to be not available for leasing when they are surrounded by lands contained within patents with no oil and gas rights reserved to the United States, when they are segregated from oil and gas leasing by withdrawal, or are embraced within an outstanding lease with an effective issuance date prior to the filing date of the subject offer.

Helen E. Reid, 39 IBLA 378 (Feb. 28, 1979)

A noncompetitive oil and gas lease issued for lands which, at the time of the lease application, had been posted erroneously as available for leasing but were then included in a prior lease, will be allowed to continue in effect where the first lease expired before the second lease issued and no questions of public policy or third party rights are contravened by the lease issuance.

Reed Gilmore, 40 IBLA 139 (Mar. 29, 1979)

Oil and gas offers, filed for lands withdrawn by PLO No. 5418, must be rejected. The order was issued under the authority of the Pickett Act, 43 U.S.C. §§ 141-142 (1970), repealed by FLPMA, and the order was not arbitrary, capricious, or an abuse of discretion.

Bristol Bay Native Corp., 41 IBLA 85 (June 4, 1979)

Under sec. 17 of the Mineral Leasing Act of 1920, as amended, and the regulations issued pursuant to that Act, the Secretary of the Interior has discretion to refuse to issue an oil and gas lease. The Secretary, through BLM, his duly authorized representative, may reject any offer to lease public lands for oil and gas upon a determination supported by facts of record that the leasing would not be in the public interest because it is incompatible with uses of the lands which are worthy of preservation. When the land, situated in Hell's Half Acre, has geological, ecological, scenic, and recreational values and is under study for its wilderness potential, and where BLM recommends that the lands not be leased pending further studies of the area, rejection of the lease offer will be affirmed, in the absence of compelling countervailing reasons.

R. C. Hoefle, 41 IBLA 174 (June 22, 1979)

The Mineral Leasing Act for Acquired Lands does not exclude from oil and gas leasing those lands underlying the Missouri River within the boundaries of the Fort Berthold Indian Reservation as established by the Treaty of Fort Laramie (1851) and the Executive Order of Apr. 12, 1870, which were reacquired by the United States from the Indian tribes. The exclusion in the Act for submerged lands refers to submerged coastal lands, as set forth in 43 CFR 3101.2-1(g).

Tarel Energy Corp., 42 IBLA 105 (Aug. 16, 1979)

Land within the National Desert Wildlife Range is not subject to noncompetitive oil and gas leasing.

Kenneth F. Cummings, 43 IBLA 110 (Sept. 24, 1979)

It is within the discretion of the Bureau of Land Management to impose the requirement of a no surface occupancy stipulation upon an oil and gas lease, where there has been a determination that it is in the public interest to do so because the lands applied for have important archaeological values, are within the Interstate 70 scenic corridor, and are under consideration for inclusion in a primitive area.

James M. Chudnow, 43 IBLA 375 (Oct. 31, 1979)

Lands which were acquired for development of their uranium deposits are not subject to oil and gas leasing under the Mineral Leasing Act for Acquired Lands.

Esdras K. Hartley, 44 IBLA 66 (Nov. 20, 1979)

NONCOMPETITIVE LEASES

The effective date of a determination that lands are within a known geologic structure of a producing oil and gas field, within the meaning of 30 U.S.C. § 226(b) (1970) and 43 CFR 3100.7-3, is the date of the ascertainment of the facts supporting the determination. After that date the Bureau of Land Management has no authority to issue an oil and gas lease pursuant to the noncompetitive lease provisions of the Mineral Leasing Act of 1920, 30 U.S.C. § 226(c) (1970).

Nola Grace Ptasynski, Barbara C. Lisco, 19 IBLA 125 (Mar. 5, 1975)

When noncompetitive oil and gas lease offers are rejected by the Secretary of the Interior in the exercise of his discretion, the offers will not be held in suspense pending a future determination that the lands described in the offers should be leased.

John Oakason, Beard Oil Co., 19 IBLA 191 (Mar. 18, 1975)

An oil and gas lease offer must be rejected when, before the lease offer has been accepted, the land applied for has been patented with no reservation of oil and gas to the United States.

It is proper to reject an oil and gas lease offer for Alaskan land to the extent of conflict with an Alaskan selection application after the application has been tentatively approved even though the offer was filed before the selection application.

Lloyd W. Levi, 19 IBLA 201 (Mar. 19, 1975)

Continued--

OIL AND GAS LEASES--Continued

NONCOMPETITIVE LEASES--Continued

Yolana Rockar et al., 19 IBLA 204 (Mar. 19, 1975)

An offeror is properly disqualified under 43 CFR 3112.4-1 from receiving a noncompetitive oil and gas lease on an offer drawn with the first priority at a simultaneous drawing when he/she fails to pay the first year's rental within 15 days (or the first business day thereafter) of receipt of the notice that such payment is due.

Mar-Win Development Co., 20 IBLA 383 (June 12, 1975)

John Paul Pratt, 24 IBLA 110 (Mar. 1, 1976)

Carma M. Pooley, 29 IBLA 304 (Mar. 30, 1977)

Jack Koegel, 30 IBLA 143 (May 12, 1977)

An oil and gas lease application covering lands in an outstanding lease, whether that lease is valid, void or voidable, must be rejected. A noncompetitive oil and gas lease offer covering lands in a known geologic structure must be rejected, such lands being subject to lease only by competitive bidding.

Duncan Miller, 21 IBLA 21 (June 16, 1975)

A noncompetitive oil and gas lease must be canceled where the land described therein was determined by the United States Geological Survey to be within a known geological structure of a producing oil or gas field as of the date of the signing of the lease on behalf of the United States by the authorized officer.

William T. Alexander, 21 IBLA 56 (June 18, 1975)

It is proper to reject an oil and gas lease offer to the extent of conflict with an Alaska State selection application after the application has been tentatively approved even though the offer was filed before the selection application.

C. Burglin et al., 21 IBLA 234 (Aug. 11, 1975)

An oil and gas offer must be rejected when the land applied for has been leased to a senior offeror under a proper offer.

Connie Mull, 22 IBLA 307 (Nov. 10, 1975)

Where an offeror failed to take an appeal from a decision issuing a noncompetitive oil and gas lease but erroneously rejecting certain available lands while correctly rejecting other lands in the offer and the offeror failed to retender rental for the erroneously rejected lands, and where the error could be readily apparent to the offeror, and the offeror acquiesced for a year and a half in the lease as issued, such failure precludes the amendment of the lease and the offeror is deemed to have abandoned his preference right as the first-qualified applicant to lease the land which was erroneously rejected.

John Oakason, 23 IBLA 336 (Jan. 21, 1976)

OIL AND GAS LEASES--Continued

NONCOMPETITIVE LEASES--Continued

An offeror is properly disqualified under 43 CFR 3112.4-1 from receiving a noncompetitive oil and gas lease on an offer drawn with the first priority at a simultaneous drawing when he fails to pay the first year's rental within 15 days (or the first business day thereafter) of receipt of the notice that such payment is due. An attempt to make payment after the close of office hours on the day the payment is due will not prevent the disqualification.

W. Duane Kennedy, 24 IBLA 152 (Mar. 10, 1976)

Where an oil and gas lease offer is rejected because the land was received by the United States as part of a sec. 8, Taylor Grazing Act exchange, and the record does not indicate such an exchange took place the case will be remanded for consideration in light of the actual record.

Husky Oil Co. of Delaware, 26 IBLA 194 (Aug. 11, 1976)

Lands within a known geologic structure of a producing oil or gas field may only be leased by competitive bidding pursuant to 43 CFR 3120, and a noncompetitive oil and gas lease offer filed for such lands is properly rejected.

James A. Wallender, 26 IBLA 317 (Aug. 30, 1976)

Curtis D. Wheeler, 31 IBLA 354 (July 25, 1977)

An offeror is properly disqualified from receiving a noncompetitive oil and gas lease on an offer which is drawn first from a group of simultaneously filed offers when he fails to pay the first year's advance rental within 15 days of his receipt of notice that such rental is due, and the delay is attributable to his posting of the rental check with insufficient postage.

Edgar C. Pennington, Jr., 28 IBLA 65 (Nov. 10, 1976)

Regardless of whether offeror is described as "*un*qualified" or "*dis*qualified," 43 CFR 3112.5-1 requires that upon successful drawees' failure to pay first year's rental, the lands shall be listed subsequently under the simultaneous drawing procedure rather than leased under the regular over-the-counter procedure in 43 CFR Subpart 3111.

Robert G. Lynn, 28 IBLA 310 (Jan. 14, 1977)

Where the Bureau of Land Management has determined that lands listed under the simultaneous oil and gas leasing system should not have been listed solely because the lands lie within "a critical watershed which is to be the subject of an Environmental Impact Statement," the first-drawn offer will not be rejected but may remain in suspended state until completion of the EIS and determination at that time whether the lands may be leased subject to stipulations for protection of the watershed.

Adrian Overton, 29 IBLA 66 (Feb. 18, 1977)

OIL AND GAS LEASES--Continued

NONCOMPETITIVE LEASES--Continued

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, including leases issued pursuant to the simultaneous filing procedures, even though the lease offers were drawn with first priority prior to the specified date.

Raymond N. Joeckel, 29 IBLA 170 (Mar. 18, 1977)

Milton J. Lebsack, 29 IBLA 316 (Mar. 30, 1977)

Doris M. Sterkel, Richard L. Sterkel, 30 IBLA 39 (Apr. 12, 1977)

K O Exploration, Inc., 30 IBLA 209 (May 20, 1977)

Francis L. Hill, 32 IBLA 202 (Sept. 16, 1977)

Thomas G. Faile et al., 32 IBLA 302 (Sept. 30, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, including leases issued pursuant to the simultaneous filing procedures, even though the lease offers were drawn with first priority prior to the effective date of the increase.

Raymond N. Joeckel et al., 30 IBLA 32 (Apr. 11, 1977)

Karen Cotter et al., 30 IBLA 88 (Apr. 27, 1977)

Duncan Miller, 30 IBLA 90 (Apr. 27, 1977)

William C. Kirkwood, 31 IBLA 178 (July 5, 1977)

Duncan Miller, 31 IBLA 349 (July 22, 1977)

Fred Goodstein, 32 IBLA 25 (Aug. 31, 1977)

Paul Landis, 32 IBLA 378 (Oct. 31, 1977)

Jerry Chambers, 33 IBLA 323 (Jan. 16, 1978)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date.

Jerry J. Hunnicutt et al., 30 IBLA 86 (Apr. 27, 1977)

Except for establishing priority of filing, the drawing of an offer for a noncompetitive oil and gas lease creates no vested rights in the offeror. If subsequent to the filing of a noncompetitive oil and gas lease offer and prior to issuance of a lease the land described therein is determined to be in a known geological structure of a producing oil or gas field, the noncompetitive lease offer must be rejected.

Guy M. Franson, 30 IBLA 123 (May 12, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, including leases to be issued pursuant to the simultaneous filing procedures where the drawing was held prior to the effective date of the rent increase, and leases to be issued for a regular over-the-counter offer where the offer was filed prior to the effective date.

Casey C. Jensen et al., 30 IBLA 134 (May 12, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, including leases to be issued to successful offerors at simultaneous drawings held prior to the effective date of the rate increase.

Melvin B. Hobgood, 30 IBLA 163 (May 18, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, including leases issued pursuant to the simultaneous filing procedures, even though the lease offers were drawn prior to the effective date of the increase.

Marie A. Fiel et al., 30 IBLA 308 (June 6, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, even though the lease offers were filed prior to the specified date.

Guy H. Willis, 30 IBLA 344 (June 8, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate applies to all leases issued after that date, regardless of the date the offer to lease or drawing entry card was filed.

Duncan Miller, 30 IBLA 350 (June 8, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, even though the lease offer was filed prior to the date of the regulation. The imposition of the increased rate is not discriminatory as it applies to all leases issued after a certain date.

Guy H. Willis, 30 IBLA 373 (June 10, 1977)

The filing of a noncompetitive oil and gas lease offer, prior to acceptance, does not create any right to a lease or legal interest which restricts the discretionary authority of the Secretary of the Interior over lease issuance. Thus, an amended regulation raising the lease rental charge may be applied to lease offers which have been previously filed but not accepted and such action is not violative of the Fifth Amendment.

Barbara A. Joeckel, 30 IBLA 376 (June 10, 1977)

43 CFR Subpart 3112 renders invalid an over-the-counter oil and gas lease offer filed for lands in canceled or relinquished leases or leases which have terminated by operation of law, for such lands are subject to simultaneous offers only.

Robert S. Bickel, 31 IBLA 201 (July 6, 1977)

Lands within a known geologic structure of a producing oil or gas field may be leased only by competitive bidding pursuant to 43 CFR 3120, and a noncompetitive oil and gas lease offer filed for such lands is properly rejected where either before or after the filing of the offer, but prior to the issuance of the lease, the land is determined to be within the known geologic structure of a producing oil or gas field.

Curtis Wheeler, 31 IBLA 221 (July 7, 1977)

A simultaneous oil and gas offeror is properly disqualified under 43 CFR 3112.4-1 from receiving lease when she fails to pay the first year's rental within 15 days of receipt of the notice that such payment is due.

Karen L. Brown, 31 IBLA 239 (July 12, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, including leases issued pursuant to over-the-counter filing procedures, even though the lease offers were submitted prior to the effective date of the increase.

Brad J. Hays, 31 IBLA 374 (Aug. 5, 1977)

Cecil C. Wall, 32 IBLA 27 (Aug. 31, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, including leases to be issued for a regular over-the-counter offer where the offer was filed prior to the effective date.

Altex Oil Corp., 32 IBLA 18 (Aug. 31, 1977)

Altex Oil Co., 32 IBLA 44 (Sept. 2, 1977)

Altex Oil Corp., 32 IBLA 390 (Nov. 7, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date pursuant to over-the-counter offers or pursuant to the simultaneous filing procedures, even though the offers or entry cards were filed with BLM prior to the specified date.

An oil and gas lease offer under the Mineral Leasing Act, *as amended*, 30 U.S.C. § 181 *et seq.* (1970), does not create a property right in the offeror but is merely a hope or expectation. It is not a "vested right," a present legal or equitable "title," "interest" or "ownership" or "perfected right," to come within the protection of the Fifth or Fourteenth Amendment.

D. E. Gaither et al., 32 IBLA 106 (Sept. 12, 1977)

The filing of an application for a noncompetitive oil and gas lease, prior to acceptance, does not create a right to a lease immune from application of a subsequently amended administrative regulation. An increased rental rate is properly applied to an oil and gas lease offer pending before the effective date of the rate change but which has not been accepted prior to that time.

Viola J. Kirkwood, 32 IBLA 199 (Sept. 16, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, even though the lease offers were filed prior to the specified date. The filing of an application for a lease prior to its acceptance does not create a right to a lease which is immune from application of a subsequently amended administrative regulation, nor does administrative delay in the processing of the lease offer preclude proper application of such regulation.

Paul C. Rohlman, 32 IBLA 240 (Sept. 21, 1977)

Increased per acre rental, as directed under Jan. 5, 1977, revision of 43 CFR 3103.3-2(a), is applicable to all noncompetitive oil and gas leases issued after Feb. 1, 1977, including leases for which offers, both simultaneous and over-the-counter, were filed prior to revision of the regulation.

Duncan Miller et al., 32 IBLA 289 (Sept. 27, 1977)

Noncompetitive oil and gas leases are issued for a primary term of 10 years. Such leases expire automatically by operation of law at the end of their 10-year terms unless the presence of one of the statutory grounds for extension of the term is established.

Duncan Miller, 33 IBLA 83 (Dec. 8, 1977)

The Secretary's policy against appealing the rejection of oil and gas lease offers to the Interior Board of Land Appeals separately from an appeal of the decision to issue conveyance, confers on the Alaska Native Claims Appeal Board exclusive jurisdiction over decisions rejecting noncompetitive oil and gas lease offers because of conflicts with land selections by Native Corporations under ANCSA.

Appeal of Terry E. Price and J. Burglin, 2 ANCAB 247 (Dec. 28, 1977) 84 I.D. 1007

Appeal of Jerry E. Roach, 2 ANCAB 277 (Jan. 26, 1978)

Appeals of Ethyl E. and Charles J. Clasby, Ruth Carpenter, et al., & Mary Francis Antwell, 2 ANCAB 302 (Feb. 21, 1978)

Appeal of Clifford C. Burglin, 3 ANCAB 37 (July 3, 1978)

30 U.S.C. § 188(b) (1970), and its implementing regulation 43 CFR 3108.2-1, requiring a notice of deficiency on a form approved by the director apply only to rental payments due on the anniversary dates

OIL AND GAS LEASES--Continued

NONCOMPETITIVE LEASES--Continued

of noncompetitive oil and gas leases, and are inapplicable to deficient initial rental payments for noncompetitive oil and gas lease offers.

Evelyn Chambers, 33 IBLA 271 (Jan. 5, 1978)

A junior oil and gas lease offer is properly rejected when the senior offer subsequently is accepted and the lease is properly issued.

David A. Provinse, 33 IBLA 312 (Jan. 13, 1978)

Where it is first alleged on appeal that a first-drawn simultaneous oil and gas entry card has been rejected in order for the lease to be awarded to the offeree first drawn in a prior drawing, which prior drawing was void because of an omitted entry card, but the record as to the second drawing is incomplete and an affected party has not been given opportunity to participate, the case may be remanded for augmentation of the record and initial consideration by Bureau of Land Management.

W. J. Langley, 34 IBLA 213 (Mar. 27, 1978)

An offer to lease for oil and gas is properly rejected where payment for the first year's advance rental is not received in the appropriate office of the Bureau of Land Management within 15 days after a Notice of Rental Due is received by the offeror pursuant to 43 CFR 3112.4-1.

Susan Dawson, 35 IBLA 123 (May 15, 1978)

Noncompetitive oil and gas leases are issued for a primary term of 10 years. Unless one of the statutory grounds for extension is established, such leases expire by operation of law at the end of their primary term.

Duncan Miller, 37 IBLA 129 (Oct. 4, 1978)

James E. and Mary E. Groboski, 43 IBLA 94 (Sept. 19, 1979)

Where an offeror for a noncompetitive, over-the-counter oil and gas lease certifies that he is a United States citizen, his failure to disclose whether he is a native-born or naturalized citizen will not support rejection of his offer where an offeror for a noncompetitive, simultaneous oil and gas lease is not required to disclose similar information.

Jas. O. Greene, Jr., 39 IBLA 43 (Jan. 16, 1979)

Under 30 U.S.C. § 226(b) (1976) land within the known geologic structure of a producing oil or gas field may only be leased by competitive bidding, and where land is determined to be within such a structure while a noncompetitive lease offer is pending, the offer must be rejected.

An applicant for a noncompetitive oil and gas lease who challenges a determination by the Geological Survey that land is within the known geologic structure of a producing oil or gas field has the burden of showing that the determination is in error.

Jack J. Bender, 40 IBLA 26 (Mar. 9, 1979)

OIL AND GAS LEASES--Continued

NONCOMPETITIVE LEASES--Continued

When a State Office rejects the offer of a first-drawn applicant in a drawing under the simultaneous oil and gas leasing program, an appeal by the applicant raises the issue of his qualifications to hold the lease. The qualifications of the second-drawn applicant are irrelevant until such time as the offer of the first-drawn applicant is rejected and all his avenues of appeal are exhausted. However, it is not improper for BLM to name the second-drawn applicant as an adverse party in a decision rejecting the first-drawn applicant.

Thomas B. Flickinger, William S. Flickinger, et al., 40 IBLA 53 (Mar. 16, 1979)

OPTIONS

Where a person files an oil and gas lease offer through a leasing service under an arrangement whereby the leasing service advances the first year's rental, selects the land, and controls the address at which the offeror may be reached, but no enforceable agreement is entered into whereby the offeror is obligated to transfer any interest in any lease to be issued to the leasing service, the service is not a party in interest in the offer merely because it may have a hope or expectancy of acquiring an interest, and the offeror is not precluded from stating that he is the sole party in interest in the offer.

E. E. Pack, 30 IBLA 166 (May 19, 1977) 84 I.D. 192

PATENTED OR ENTERED LANDS

An oil and gas lease offer must be rejected when, before the lease offer has been accepted, the land applied for has been patented with no reservation of oil and gas to the United States.

It is proper to reject an oil and gas lease offer for Alaskan land to the extent of conflict with an Alaskan selection application after the application has been tentatively approved even though the offer was filed before the selection application.

Lloyd W. Levi, 19 IBLA 201 (Mar. 19, 1975)

Yolana Bochat et al., 19 IBLA 204 (Mar. 19, 1975)

An oil and gas lease offer must be rejected when approval is given to a subsequently filed State selection embracing the same lands, including the mineral rights. Following issuance of patent to the State, the Department loses jurisdiction over the patented land.

Duncan Miller, 20 IBLA 1 (Apr. 14, 1975)

The Department of the Interior has neither jurisdiction over nor authority to issue oil and gas leases for lands patented to the State of Alaska.

Richard W. Rowe, Daniel Gaudiane, 20 IBLA 59 (Apr. 24, 1975) 82 I.D. 174

It is proper to reject an oil and gas lease offer to the extent of conflict with an Alaska State selection application after the application has been tentatively approved even though the offer was filed before the selection application.

C. Burglin et al., 21 IBLA 234 (Aug. 11, 1975)

OIL AND GAS LEASES--Continued

PREFERENCE RIGHT LEASES

Regulation 43 CFR 2627.3(b)(2) requires that conflicting oil and gas lease offers filed pursuant to the Mineral Leasing Act of 1920, except for preference right applications, whether filed prior to, simultaneously with, or after the filing of an Alaska State selection, must be rejected when and if the selection is tentatively approved. The preference right referred to in the regulation does not apply to an oil and gas lease offeror who receives a priority right as the first-qualified applicant in the event the Department decides to issue a lease.

Richard W. Rowe, Daniel Gaudiane, 20 IBLA 59 (Apr. 28, 1975) 82 I.D. 174

PRODUCTION

Reasonable transportation costs of production from oil and gas leases from the field to the first available market are allocable to the Federal or Indian royalty interest.

Kerr-McGee Corp., 22 IBLA 124 (Sept. 26, 1975)

An oil and gas lease on which there is no well capable of production in paying quantities will terminate by operation of law if the annual rental payments are not submitted on or before the anniversary date. A well capable of production in paying quantities on the anniversary date is one which can actually produce enough oil to exceed the cost of its extraction. Neither the production of water nor the production of meager quantities of oil, albeit with hopes for paying production at some time in the future, constitute production in paying quantities on the anniversary date of the lease.

The Polumbus Corp., 22 IBLA 270 (Oct. 30, 1975)

An oil and gas lease terminated by operation of law for failure to pay the advance rental timely will be reinstated when the lessee shows that its failure to pay the rental on or before the anniversary date was justifiable.

Great Basins Petroleum Co., 24 IBLA 117 (Mar. 1, 1976)

"Production" as used in all Federal oil and gas leases includes all oil and gas withdrawn from a reservoir.

Response to Feb. 17, 1976, Request from the General Accounting Office: Interpretation of Mineral Leasing Act of 1920, and Outer Continental Shelf Lands Act Royalty Clause, M-36888 (Oct. 4, 1976) 84 I.D. 54

Oil or gas that is wasted is in a category by itself, distinctly separable from "production," when it is oil or gas that is lost on the surface or in the subsurface through the negligence of the lessee, *i.e.*, without the specific sanction of the supervisor.

Computation of Moneys Due the United States on Oil and Gas Lost as a Result of Pennzoil's Blowout, M-36888 (Supp.) (Jan. 19, 1977) 84 I.D. 64

OIL AND GAS LEASES--Continued

PRODUCTION--Continued

A 10-year renewal of a 20-year oil and gas lease expires by its own terms where no timely application for further renewal is made by the lessee. Such lease is not held by production and terminates automatically on its final anniversary date notwithstanding the existence of a producing well on the leasehold.

Peacock Oil Company, Inc., Twin Arrow, Inc., 29 IBLA 74 (Feb. 23, 1977)

A 10-year renewal of a 20-year oil and gas lease expires by its own terms where no timely application for further renewal is made by the lessee, pursuant to 43 CFR 3107.8-2; however, the language of the regulation is permissive and a delay in filing a renewal application may be excused in the presence of special circumstances.

Peacock Oil Company, Inc., Twin Arrow, Inc., 30 IBLA 103 (May 2, 1977)

An oil and gas lease is extended by operation of law for 2 years beyond the expiration of its primary term when actual drilling operations were commenced on the lease (or for the lease under a unit plan) prior to the expiration of the primary term and such operations are being diligently prosecuted on the expiration date, even though the lease may also have production at that time.

Rio Blanco Natural Gas Co., 30 IBLA 191 (May 19, 1977) 84 I.D. 198

The U.S. Geological Survey is the technical expert of the Department of the Interior in matters concerning geologic evaluations. The Bureau of Land Management is entitled to rely on mineral determinations of Survey, such as qualification of a test well as a discovery well defined by a unit agreement, in the absence of a clear and definite showing of error.

Corrine Grace, 30 IBLA 296 (June 1, 1977)

The Department of the Interior has the authority to issue orders to oil and gas lessees to protect all of the natural resources of the Continental Shelf. An order which requires lessees to shut in wells during welding or burning operations will be sustained on appeal as not being arbitrary or unjustified where the record shows that a number of companies had followed the practice even when it was not required, where the order is not so prohibitive as to effect a *pro tanto* cancellation of the lease, and where departures from the order may be granted in certain situations.

Exxon Corp., 36 IBLA 185 (Aug. 1, 1978) 85 I.D. 347

An oil and gas lease is extended by operation of law for 2 years beyond the expiration of its primary term when actual drilling operations were commenced on the lease (or for the lease under a unit plan) prior to the expiration of the primary term and such operations are being diligently prosecuted on the expiration date.

Shell Oil Co., 36 IBLA 253 (Aug. 15, 1978)

OIL AND GAS LEASES--Continued

PRODUCTION--Continued

An oil and gas lease issued for a primary term of 10 years on which there is no production will expire by its own terms where the lessee has not commenced drilling operations on the leasehold at the end of the term, and payment of compensatory royalty will not extend the lease where there has been no showing that the leasehold is subject to drainage from wells on an adjoining property.

Webb Resources, Inc., 38 IBLA 330 (Dec. 19, 1978)

An oil and gas lease issued for a primary term of 10 years and extended for 2 years by drilling cannot be extended further by payment of compensatory royalty where there is no showing that the leasehold is suffering drainage from an adjoining tract, and no compensatory royalty has been assessed by the district supervisor under 30 CFR 221.21(c).

Chaparral Resources, Inc., 39 IBLA 269 (Feb. 15, 1979)

"A well capable of producing oil or gas in paying quantities." The provision in 30 U.S.C. § 226(f) (1976) referring to a well capable of producing oil or gas in paying quantities refers to a well which is actually in physical condition to produce a sufficient quantity of oil or gas to yield a reasonable profit over and above the costs of operating the well and marketing the product. A satisfactory test of a well to establish its capability as of the termination date is necessary. Evidence which only supports inferences is not sufficient, nor is a showing only of a potential prospect for profitable operation at some future time.

American Resources Management Corp., 40 IBLA 195 (Apr. 5, 1979)

"Paying Quantities." The term "paying quantities," used in the Brady (Deep) Unit Agreement to determine whether or not a participating area of a unit should include additional tracts where the existence of hydrocarbons in paying quantities is disputed, refers to cost of drilling and production plus a reasonable profit.

The U.S. Geological Survey is the technical expert of the Department in matters concerning geologic evaluation of oil and gas lease production, and the Secretary is entitled to rely on the Survey's determinations, as to the extent of the participating area of a unit, absent a clear showing of error.

Amoco Production Co., 41 IBLA 348 (July 11, 1979)

REINSTATEMENT

An oil and gas lease terminated by operation of law for failure to pay the advance rental timely will be reinstated where it is shown, upon reconsideration of an earlier Board decision, that lessee's failure to pay the rental timely was not due to a lack of reasonable diligence. Evidence which establishes that the payment due on May 1, 1974, at the Eastern States Office, Bureau of Land Management, Silver Spring, Maryland, was mailed in Dallas, Texas, on Apr. 25, 1974, 5 days before the due date, is sufficient to demonstrate due diligence despite the fact that the envelope containing the payment was postmarked Apr. 30, 1974.

W. A. Fitzhugh (On Reconsideration), 18 IBLA 323 (Jan. 6, 1975)

OIL AND GAS LEASES--Continued

REINSTATEMENT--Continued

It is proper to deny a request for reinstatement of an oil and gas lease terminated by operation of law for failure to pay advance rental timely where the petitioner has not shown that his failure to pay the rental on or before the anniversary date of the lease was justifiable or not due to a lack of reasonable diligence.

Frank J. Germano, 18 IBLA 390 (Feb. 6, 1975)

Richard V. Bowman, 19 IBLA 261 (Mar. 31, 1975)

It is proper to deny a petition for reinstatement of an oil and gas lease terminated for failure to pay rental as required by sec. 31 of the Mineral Leasing Act of 1920, *as amended*, 30 U.S.C. § 188(b) (1970), where the petitioner has not shown that his failure to pay the rental on or before the anniversary date of the lease was justifiable or not due to a lack of reasonable diligence.

Charles L. Parks, 18 IBLA 404 (Feb. 10, 1975)

An oil and gas lease terminated by operation of law for failure to pay the advance rental on time may be reinstated only when the lessee shows that the failure to pay the rental on or prior to the anniversary date was either justifiable or not due to a lack of reasonable diligence.

W. E. Hester, Jr., 18 IBLA 420 (Feb. 12, 1975)

Ray E. Rush, 19 IBLA 280 (Apr. 7, 1975)

Margaret C. Ross, 19 IBLA 307 (Apr. 7, 1975)

Jimmy V. Bowling, 20 IBLA 146 (May 5, 1975)

It is proper to deny a request for reinstatement of an oil and gas lease terminated by operation of law for failure to pay advance rental timely where it is not shown that the failure to pay the rental on or before the anniversary date of the lease was justifiable or not due to a lack of reasonable diligence. Mistake as to the date the payment is due, misplacement of the courtesy notice, and the decease of appellant's husband some 2 years prior to the date payment is due, do not afford a sufficient predicate for reinstatement of an oil and gas lease.

Mary A. Christopher, 19 IBLA 53 (Feb. 21, 1975)

Reasonable diligence in sending a rental payment due on the anniversary date includes transmitting the payment so that it will normally be received in the appropriate office on the anniversary date considering the method of transmission, normal delays in handling, and the distance involved.

Failure to pay advance rentals on or before the anniversary date may be justifiable only if the reason for such failure is proximate in time to the anniversary date and may reasonably be considered to be the proximate cause of the failure to submit the payment on time.

The burden of proving that failure to pay advance rentals on or before the anniversary date was either justifiable or not due to a lack of reasonable diligence is the obligation of the one who failed to make timely payment.

M. J. Harvey, Jr., 19 IBLA 230 (Mar. 25, 1975)

OIL AND GAS LEASES--Continued

REINSTATEMENT--Continued

An oil and gas lease, terminated by operation of law because the annual rental payment was not received until 1 day after the due date, may be reinstated upon proper application where the delay in payment is due to accidental injury which prevented lessee's business from being conducted in normal manner.

David Kirkland, 19 IBLA 305 (Apr. 7, 1975)

A lessee's request that its oil and gas lease be reinstated because it relied on a regulation which has been changed is properly rejected where the lease expired by operation of law at the end of its extended term and there is no statutory authority whereby it can be reinstated.

Inexco Oil Co., 20 IBLA 134 (May 5, 1975)

An oil and gas lease terminated by operation of law for failure to pay the annual rentals on time may be reinstated where the lessee's delay in making payment was due to his seeking clarification of an illegible notice of payment sent by the Bureau of Land Management, and his action demonstrates his reliance on the notice.

Joseph E. Steger, 20 IBLA 206 (May 8, 1975)

An oil and gas lease terminated by operation of law for failure to pay the advance annual rental on time may be reinstated only when the lessee shows that his failure to pay the rental timely was either justifiable or not due to lack of reasonable diligence. The neglect of office personnel to follow appellant's instructions to make payments while he was away from his office on a combined business and vacation trip is not a predicate for either basis for relief.

Charles C. Sturdevant, 20 IBLA 280 (May 22, 1975)

An oil and gas lease terminated by operation of law for failure to pay the advance rental on time may be reinstated only on a showing by the lessee that failure to pay on or before the anniversary date was either justifiable or not due to lack of reasonable diligence. Failure to raise credible reasons that illness prevented timely payment, with no other justification for late payment, requires denial of reinstatement.

Mrs. Charles H. Blake, 20 IBLA 322 (June 6, 1975)

An oil and gas lease which has terminated by operation of law due to late payment of the annual rental may not be reinstated where the failure to pay on time was due to a lack of reasonable diligence. Where a payment is sent from a town in eastern Texas to Salt Lake City, Utah, on Oct. 30, and does not arrive until after Nov. 1, and where the Post Office indicates that regular mail sent that distance would not normally arrive in 2 days, the lessee has not exercised reasonable diligence.

William N. Cannon, 20 IBLA 361 (June 12, 1975)

OIL AND GAS LEASES--Continued

REINSTATEMENT--Continued

It is proper to deny a request for reinstatement of an oil and gas lease terminated by operation of law for failure to pay rental on or before the anniversary date where the petitioner has not shown either that her failure was justifiable or not due to a lack of reasonable diligence.

Faye A. Nicholas, 21 IBLA 69 (June 25, 1975)

An oil and gas lease terminated by operation of law for failure to pay the advance rental on time may be reinstated only on a showing that failure to pay on or before the anniversary was either justifiable or not due to lack of reasonable diligence. Appellant's misinterpretation of the due date on the courtesy notice does not justify his late payment of the rent.

Norman E. Parker, 21 IBLA 144 (July 15, 1975)

The difficulties of a lessee in obtaining sufficient money to pay an oil and gas lease's advance rental is not a "justifiable" reason such as would permit the reinstatement of an oil and gas lease terminated for failure to timely pay the advance rental.

Anthony Theophilus, 21 IBLA 287 (Aug. 11, 1975)

Before relief may be granted to the lessee of a terminated oil and gas lease, he must comply with the prerequisites set forth in 30 U.S.C. § 188 (1970). The Secretary has no authority to waive such statutory prerequisites.

Reliance upon receipt of a courtesy notice can neither prevent the lease from terminating by opertion of law nor serve to justify a failure to pay the lease rental timely.

The Secretary has no authority to reinstate a terminated oil and gas lease unless the rental payment is tendered within 20 days of the due date. Such authority also does not exist if a valid oil and gas lease has been issued covering any of the lands in the terminated lease.

A Notice of Termination is sent to the lessee of a terminated oil and gas lease only if he has tendered payment of the rental within 20 days after the anniversary date.

C. J. Iverson, 21 IBLA 312 (Aug. 14, 1975) 82 I.D. 386

Where the rent for an oil and gas lease was not mailed by the lessee until 14 days after due date because the lessee was away from his residence where he received his mail and the courtesy notice of rental payment due did not receive proper attention when it arrived, rejection of the petition for reinstatement for lack of reasonable diligence or circumstances causing the neglect to be justifiable is proper.

L. E. Weiner, 21 IBLA 336 (Aug. 18, 1975)

A petition for reinstatement of an oil and gas lease terminated for lack of timely payment of the rental is properly denied where the lessee does not show reasonable diligence in mailing the payment or a justifiable excuse for the delay in payment. The fact the courtesy

OIL AND GAS LEASES--Continued

REINSTATEMENT--Continued

rental notice did not come to the attention of the lessee until 6 days after the rental due date is not a justifiable excuse for late payment of the rental.

Levi T. Bellah, 22 IBLA 1 (Sept. 4, 1975)

Where it is alleged that a bank erroneously dishonored a check drawn thereon, and an official of the bank admits that the payment was refused by mistake, the error of the bank will not vitiate the otherwise proper payment of rent.

Nikoa, Inc., 22 IBLA 6 (Sept. 4, 1975)

Pauline V. Trigg, John H. Trigg, 31 IBLA 296 (July 22, 1977)

An oil and gas lease terminated by operation of law for failure to pay the advance rent on time may be reinstated only on a showing by the lessee that his failure to pay on or before the anniversary date was either justifiable or not due to a lack of reasonable diligence. A failure to exercise reasonable diligence is justifiable when caused by a factor outside the control of the lessee. A lessee's personal illness does not justify late payment unless it is of such a debilitating nature that it actually prevents the lessee from posting payment. Appellant's ability to attend to other business shows that his illness did not prevent him from making timely payment of the rent.

Milan de Lacy, 22 IBLA 47 (Sept. 16, 1975)

An oil and gas lease, terminated by operation of law for failure to make timely payment of the advance rental, may be reinstated only when the failure to make payment of the annual rental on or before the anniversary date was justifiable or not due to a lack of reasonable diligence. Mailing the rental payment from California to Montana the day before its due date does not constitute reasonable diligence.

Joseph Wachter, 22 IBLA 95 (Sept. 22, 1975)

An oil and gas lease terminated by operation of law for failure to pay the advance rental on time may be reinstated only upon a showing that failure to pay on or before the anniversary date was either justifiable or not due to lack of reasonable diligence. Inability to pay the rent on time does not justify late payment.

Peter T. Creamer, 22 IBLA 175 (Sept. 30, 1975)

No petition for reinstatement of an oil and gas lease terminated by operation of law, 30 U.S.C. § 188(b) (1970), may be entertained if the full amount of rental due was not paid within 20 days after the anniversary date of the lease.

Joseph Francis, 22 IBLA 277 (Oct. 30, 1975)

Failure to pay advance rental on or before the anniversary date of an oil and gas lease may be justifiable only if the reason for such failure is proximate in time to the anniversary date and may reasonably be considered to be the proximate cause of the failure to timely submit the payment.

Phillip Stimatze, 22 IBLA 309 (Nov. 10, 1975)

OIL AND GAS LEASES--Continued

REINSTATEMENT--Continued

An oil and gas lease terminated by operation of law for failure to pay the advance rental on time may be reinstated only when the lessee shows that his failure to pay the rental on or prior to the anniversary date was either justifiable or not due to a lack of reasonable diligence. Neither the absence of lessee on vacation nor non-receipt of an advance courtesy notice satisfies the statutory criteria.

Joseph M. Nosachi, 23 IBLA 148 (Dec. 23, 1975)

An oil and gas lease terminated by operation of law for failure to pay the advance rental on time may be reinstated only when the lessees show that their failure to pay the rental on or prior to the anniversary date was either justifiable or not due to a lack of reasonable diligence. The absence of a lessee either on vacation or on job training is insufficient to satisfy the statutory criteria.

Sara Turcsan, Donna Turcsan, 23 IBLA 370 (Jan. 23, 1976)

An oil and gas lease terminated by operation of law for failure to pay timely the advance rental may be reinstated only where the lessee shows that his failure to pay the rental on or prior to the anniversary date was either justifiable or not due to a lack of reasonable diligence. Past adherence to the requirement of timely payment does not justify a subsequent failure to make timely payment. Mailing a rental payment at Chicago, Illinois, to Salt Lake City, Utah, 1 day before the due date does not constitute reasonable diligence.

Henry Carter, 24 IBLA 70 (Feb. 24, 1976)

A petition for reinstatement of an oil and gas lease which has expired by operation of law for failure to make payment of the annual rentals on time will be denied where the petition is filed with the appropriate office more than 15 days after receipt of notification of termination of the lease.

Where the advance rental check is received within 20 days after the anniversary date, the Bureau may deposit said check in an "unearned" account in order to preserve the right of the lessee to petition for reinstatement of the terminated lease and to safeguard the check, create a record of the payment, and bring it under accounting control. This does not signify acceptance of the payment, or indicate that the lease has not terminated, or create an estoppel against the Government.

John J. Nordhoff, Dean Kirk, 24 IBLA 73 (Feb. 24, 1976)

A lessee who is out of town on vacation on the lease anniversary date and who mails the lease rental payment 6 days after the due date is not reasonably diligent.

Extenuating circumstances outside the control of the lessee occurring near the anniversary date of the lease may constitute justifiable cause for a late rental payment where the circumstances are the proximate cause of the failure to make timely payment. However, where appellant has delayed payment until just before the due date and has entrusted the function to an agent whose subagent neglects to make payment timely, the lack of diligence on the part of the lessee and/or his agent and/or subagent, and not the adverse circumstances confronting appellant's agent, constitute the proximate

OIL AND GAS LEASES--Continued

REINSTATEMENT--Continued

cause of the late payment and a decision denying reinstatement will be affirmed.

Lucille Lirrhardt, 24 IBLA 81 (Feb. 25, 1976)

An oil and gas lease terminated by operation of law for failure to pay the advance rental on time cannot be reinstated when the petitioner fails to show that the late payment of rental was justifiable or not due to a lack of reasonable diligence. Loss of a checkbook through theft 5 days before the due date for payment does not establish causality sufficient to constitute a justifiable excuse.

John E. Stengel, 24 IBLA 98 (Feb. 25, 1976)

An oil and gas lease terminated by operation of law for failure to pay the advance rental timely may be reinstated only if the lessee shows by satisfactory evidence that the failure to pay the rental on or before the anniversary date was either justifiable or was not due to a lack of reasonable diligence. Allowing 1 day for the rental payment to reach Billings, Montana, from Eau Claire, Michigan, is not an exercise of reasonable diligence, and inability to pay is not a justifiable reason for failure to make timely payment.

Frank Thompson, 24 IBLA 105 (Mar. 1, 1976)

An oil and gas lease terminated because of failure to pay rental timely, may be reinstated only where it is shown that such failure was either justifiable or not due to a lack of reasonable diligence. The burden of satisfying either of those criteria rests upon appellant.

Reasonable diligence requires that the payment be sent sufficiently in advance of the due date to account for normal delays in handling and delivery of the mails. Absent reasonable diligence, a lease may be reinstated if the delay was justifiable. This generally envisages factors beyond appellant's control, which were the proximate cause of the failure to pay timely. Thus, proximity in time and causality of the untoward occurrence are essential elements required to be shown.

Earl Chancellor, 24 IBLA 121 (Mar. 1, 1976)

Under 30 U.S.C. § 188(c) (1970), the Secretary of the Interior has no authority to reinstate an oil and gas lease terminated by operation of law for failure to make timely payment of rental, unless the rental payment is tendered at the proper office within 20 days of the due date.

Cashing of an oil and gas rental check, received more than 20 days after due, does not constitute a waiver which would permit reinstatement of a terminated lease in violation of 30 U.S.C. § 188(c) (1970), despite wording on the check that "by endorsement this check when paid is accepted in full payment."

Edward Malz, 24 IBLA 251 (Mar. 26, 1976)
83 I.D. 106

Reasonable diligence requires transmitting a rental payment so that it would normally be received in the appropriate office on or before the anniversary date considering the method of transmission, normal delays in handling, and the distance involved. A payment that is late because it was inadvertently sent by the lessee

OIL AND GAS LEASES--Continued

REINSTATEMENT--Continued

to the wrong address is neither justifiable nor the result of reasonable diligence.

Mike Bell Mining & Oil Co., Inc., 24 IBLA 255 (Mar. 29, 1976)

An oil and gas lease which has terminated by operation of law for failure to pay the annual rental on or before the due date may not be reinstated unless, among other things, payment has been tendered at the proper office within 20 days of the anniversary date.

Merilyn F. Buxton, C. E. Sharpe, 24 IBLA 269 (Mar. 29, 1976)

A. E. White et al., 28 IBLA 91 (Nov. 12, 1976)

Beatrice G. Wood, 42 IBLA 148 (Aug. 16, 1979)

An oil and gas lease may be reinstated where it appears that the lessee's failure to pay annual rental on time is due to the death of a member of the family in close proximity to the anniversary date of the lease.

Fredres E. Laubaugh, 24 IBLA 306 (Apr. 5, 1976)

An oil and gas lease, terminated for failure to pay annual rental on or before the anniversary date of the lease, can be reinstated only if the petitioner shows that the failure was either justifiable or not due to a lack of reasonable diligence.

Pollis Arnold, 24 IBLA 352 (Apr. 23, 1976)

An oil and gas lease terminated by operation of law for failure to pay the advance rental timely will be reinstated when the lessee shows that his failure to pay the rental on or before the anniversary date was not due to a lack of reasonable diligence.

An oil and gas lease, terminated because the advance rental was received 1 day after the due date, may be reinstated where it is shown that the lessee mailed the rental payment 3 days prior to the due date from the main post office in the same city where the BLM's field office is located and the postal authorities verify that there had been a delay in the processing of the mail at that particular time. Under these circumstances, the lessee will be considered to have mailed the payment with due diligence.

A. Melander, 25 IBLA 54 (May 18, 1976)

An oil and gas lease which has terminated by operation of law due to late payment of the annual rental may not be reinstated where the failure to pay on time was due to a lack of reasonble diligence and was not justifiable. Late payment due to a mistaken address is neither justifiable nor demonstrative of reasonable diligence.

Warren Koch, 25 IBLA 61 (May 28, 1976)

An oil and gas lease terminated by operation of law for failure to pay the advance rental on or before the anniversary date may be reinstated only upon a showing that the failure to pay on time was either justifiable

OIL AND GAS LEASES--Continued

REINSTATEMENT--Continued

or not due to lack of reasonable diligence. Inadvertence of the lessee's employee in misplacing the courtesy notice does not justify late payment.

Samuel J. Testagrossa, 25 IBLA 64 (May 28, 1976)

In order to constitute justifiable cause for lessee's failure to make timely rental payment for an oil and gas lease, the asserted extenuating circumstances must be the proximate cause of the late payment. A petition for reinst.tement is properly denied where lessee's own statements disclose that this is not the case.

Arthur J. Jakobiak, 25 IBLA 147 (June 8, 1976)

An oil and gas lease terminated by operation of law for failure to pay the advance rental on time cannot be reinstated when the petition fails to show that the late payment was justifiable or not due to a lack of reasonable diligence. A payment that is late because it was inadvertently sent by the lessee to the wrong address is neither justifiable nor the result of reasonable diligence.

Frank H. Crosby, 25 IBLA 160 (June 14, 1976)

The regulations require that a petition for reinstatement of an oil and gas lease, terminated by operation of law for failure to make timely payment of the rental, must be filed within 15 days of receipt of notice by the lessee of such termination. A petition for reinstatement filed more than 15 days after receipt of such notice of termination, which notice informed lessee of the 15-day requirement, is properly denied.

Joseph S. Calabrese, 25 IBLA 241 (June 22, 1976)

A petition for reinstatement of an oil and gas lease terminated for lack of timely payment of the rental is properly denied where the appellant does not show reasonable diligence in mailing the payment or a justifiable excuse for the delay in payment. The inadvertence or negligence of the appellant's employee does not justify late payment of the rental.

The fact that the courtesy rental notice did not come to appellant's attention until 6 days after the rental due date is not a justifiable excuse for late payment of the rental.

James Donoghue, 25 IBLA 280 (June 25, 1976)

An oil and gas lease which has terminated by operation of law due to late payment of the annual rental may be reinstated only when the lessee shows that his failure to pay the rental on or prior to the anniversary date was justifiable or not due to a lack of reasonable diligence. Mailing the payment after noon on the day the payment is due shows a lack of reasonable diligence. Belief that the payment would arrive on time if deposited in a "special box" does not justify the late payment.

Constitution Petroleum Co., Inc., et al., 25 IBLA 319 (June 30, 1976)

OIL AND GAS LEASES--Continued

REINSTATEMENT--Continued

An oil and gas lease terminated by operation of law for failure to pay the advance rental timely will be reinstated where it is shown that the lessee's failure to pay the rental timely was not due to a lack of reasonable diligence. Evidence which establishes that the payment due on Dec. 1, 1975, at the Eastern States Office, Bureau of Land Management, Silver Spring, Maryland, was delivered to a postal carrier on Nov. 11, 1975, is sufficient to demonstrate due diligence despite the fact that the envelope containing the payment was postmarked Dec. 8, 1975, and not received until Dec. 11, 1975, where a credible explanation of the delay has been furnished by the Post Office.

Paul D. Beaird, Jr., and Leon F. Scully, Jr., 26 IBLA 79 (July 13, 1976)

The Bureau of Land Management has no authority to reinstate an oil and gas lease terminated by operation of law for failure to pay rental on or before the anniversary date when a valid lease for the same land has been issued prior to the filing of the petition for reinstatement. Therefore, unless the first lease is deemed not to have terminated, it is erroneous to cancel the subsequent valid lease.

S. Norman Stark, 26 IBLA 87 (July 19, 1976)

An oil and gas lease, terminated by operation of law, 30 U.S.C. § 188(b) (1970), for failure to make timely payment of the rental on or before the anniversary date, can be reinstated only if the lessee shows that the failure was either justifiable or not due to a lack of reasonable diligence.

Where the facts of a case lend circumstantial support and credibility to lessees' assertion that they posted their rental payment sufficiently in advance of the time necessary to account for normal postal delays, the lease may be reinstated on the basis that the failure to make timely payment was not due to a lack of reasonable diligence.

Elliott and Leon Davis, 26 IBLA 91 (July 19, 1976)

An oil and gas lease terminated by operation of law for failure to pay the advance rental on or before the anniversary date may be reinstated only upon a showing that the failure to pay on time was either justifiable or not due to a lack of reasonable diligence. Late payment of the rental is not justified by confusion concerning proper processing of the rental payment which resulted when the duty to make payment was transferred from the company's land manager to its accountant.

The fact that the courtesy rental notice was delayed in reaching appellant because it was sent to appellant's former address is not a justifiable excuse for late payment.

Seric Exploration Co., 26 IBLA 106 (July 26, 1976)

Under 30 U.S.C. § 188(c) (1976), the Secretary of the Interior has no authority to reinstate an oil and gas lease terminated by operation of law for failure to make timely payment of rental, unless rental payment is tendered at the proper office within 20 days after the due date.

Albert DiGiulio, Jr., Genuino J. Grande and Jeffrey V. Cohen, 26 IBLA 169 (Aug. 4, 1976)

Vern H. Polinder, 30 IBLA 26 (Apr. 11, 1977)

Continued--

OIL AND GAS LEASES--Continued

REINSTATEMENT--Continued

Susan Krammes Sammis, 37 IBLA 269 (Oct. 19, 1978)

Sigmund Matejko, 43 IBLA 96 (Sept. 20, 1979)

An oil and gas lease terminated by operation of law for failure of the lessee to pay the annual rental on or before the due date may be reinstated only if the late payment is justifiable or not due to a lack of reasonable diligence. Sending a payment 2 days before the due date does not constitute reasonable diligence, nor does the fact that lessee was unaware of the terms of his lease render his tardiness justifiable.

L. J. Arrieta, 26 IBLA 188 (Aug. 10, 1976)

No petition for reinstatement of an oil and gas lease terminated by operation of law may be entertained if the full amount of rental due was not paid within 20 days after the anniversary date of the lease.

Where an oil and gas lease has terminated pursuant to 30 U.S.C. § 188(b) (1970), a petition for reinstatement is properly denied which fails to provide any explanation to show that the lessee's failure to tender the full amount of the rental when due was either justified or not attributable to the lessee's lack of diligence.

Where, by prearrangement, as part of a business negotiation, a third party assumes responsibility for the payment of the annual rentals for two oil and gas leases which subsequently terminate by operation of law when the rental check is dishonored by the drawee bank, the leases will not be reinstated on the strength of the lessee's naked assertion that the uncollectability of the check was deliberately contrived as part of a scheme to deprive him of the lease so that the third party could be granted the leases unlawfully by a Federal employee.

Stanley J. Pirtle, 26 IBLA 348 (Sept. 7, 1976)

An oil and gas lease, terminated for failure to pay annual rental on or before the anniversary date of the lease, can be reinstated only if the petitioner shows that the failure was either justifiable or not due to a lack of reasonable diligence. Mailing the rental payment after it is due does not meet the reasonable diligence requirement.

In petitioning for reinstatement of an oil and gas lease terminated by operation of law for failure to submit the rental payment on or before the anniversary date of the lease, forgetfulness, simple inadvertence, or ignorance of the regulations are not justifiable excuses for delay in making the rental payment.

Lula Mai Martin, 27 IBLA 360 (Nov. 4, 1976)

An oil and gas lease terminated by operation of law for failure of the lessee to pay the annual rental on or before the due date may be reinstated only if the late payment is justifiable or not due to a lack of reasonable diligence. Sending a payment over a long distance 2 days before the due date does not constitute reasonable diligence.

Royal and Jean Clausing, 28 IBLA 129 (Nov. 19, 1976)

OIL AND GAS LEASES--Continued

REINSTATEMENT--Continued

Where a lessee makes a deficient rental payment for his oil and gas lease claiming that such payment was determined in accordance with the rental or acreage figure stated in the lease, he will not be entitled to a Notice of Deficiency, pursuant to 43 CFR 3108.2-1, when it is shown that he received notice of an increase in the lease rental and, therefore, was not justified in relying on the original rental figure in the lease.

An oil and gas lease terminated by operation of law for failure to pay the full advance rental timely can only be reinstated when the lessee shows that his failure to pay the rental on or prior to the anniversary date was justifiable or not due to a lack of reasonable diligence.

Lone Star Producing Co., 28 IBLA 132 (Nov. 19, 1976)

There is no basis for reinstating an oil and gas lease, terminated for failure to pay rental timely, because of alleged reasonable diligence when the payment was mailed no earlier than the date the rental was due.

An oil and gas lease terminated for failure to pay rental timely may not be reinstated where the delay in paying the rental was not "justifiable" within the meaning of the Mineral Leasing Act, 30 U.S.C. § 188(c) (1970), because it was due to financial and other difficulties not within the contemplation of the Act.

Dolores B. Beggie, 28 IBLA 272 (Dec. 20, 1976)

If the postmark on the rental payment envelope does not demonstrate reasonable diligence in the lessee's mailing of the payment, the Board will not go beyond it in the absence of exceptional circumstances. Substantial evidence will be required to corroborate any allegation to the contrary. A mere reference to a statement indicating that a check in payment of the rent was issued or sent on a certain date is not, by itself, sufficient.

Agnes M. French, 28 IBLA 282 (Dec. 27, 1976)

An oil and gas lease, terminated by operation of law for failure to pay timely the advance rental, will not be reinstated where the sole reason offered as justification for the tardy payment is the confusion and business disruption which attended the remodeling of the corporate lessee's office space. Employee neglect or inadvertence likewise will not serve as justification.

Mono Power Co., 28 IBLA 289 (Dec. 27, 1976)

The discretionary authority granted to the Secretary of the Interior by 30 U.S.C. § 188(d) (1970), to reinstate oil and gas leases terminated for failure to pay rental timely, which leases are eligible for extensions under 30 U.S.C. § 226-1(d) (1970), because drilling operations commenced prior to the end of the term of the lease and were being diligently prosecuted at that time, applies only to oil and gas leases issued before Sept. 2, 1960. An oil and gas lease issued after that date, which has terminated for failure to pay rental timely, can be reinstated only under the provisions of 30 U.S.C. § 188(c) (1970).

The provisions of 30 U.S.C. §§ 188(b) and (c) (1970), and decisions of the Board discussing those provisions, are generally applicable to both competitive and noncompetitive oil and gas leases on which there is no well capable of producing oil or gas in paying quantities.

An oil and gas lease which has terminated by operation of law for failure to pay the annual rental timely may

OIL AND GAS LEASES--Continued

REINSTATEMENT--Continued

not be reinstated under 30 U.S.C. § 188(c) (1970), unless, among other things, payment has been tendered at the proper office within 20 days of the date due.

Oil Resources, Inc., 28 IBLA 394 (Feb. 7, 1977)
84 I.D. 91

An oil and gas lease terminated by operation of law for failure of the lessee to pay the annual rental on or before the anniversary date of the lease may be reinstated only if the late payment is justifiable or not due to a lack of reasonable diligence. Where information concerning the terminal illness of lessee's brother demonstrates the requisite proximity and causality to justify the delay in payment, the lease may be reinstated.

Billy Wright, 29 IBLA 81 (Feb. 23, 1977)

A petition for reinstatement of an oil and gas lease terminated for lack of timely payment of the rental is properly denied where the appellant does not show reasonable diligence in mailing the payment or a justifiable excuse for the delay in payment. A number of factors caused by the inadvertence or negligence of appellant's employees which combined to cause late payment of the rental do not justify the failure to make a timely payment.

Phillips Petroleum Co., 29 IBLA 114 (Feb. 23, 1977)

Reasonable diligence normally requires sending or delivering payments sufficiently in advance of the anniversary date to account for normal delays. A lessee whose payment is mailed 6 days after the due date is not reasonably diligent.

Extenuating circumstances outside the control of the lessee occurring near the anniversary date of the lease may constitute justifiable cause for a late rental payment where the circumstances are the proximate cause of the failure to make timely payment. However, where appellant has entrusted payment to an agent who becomes ill, and a subagent, who assumes the agent's responsibilities neglects to make payment timely, the illness of the agent is not the proximate cause of the late payment where no connection is made between the date of the agent's illness and the due date of the rental and a decision denying reinstatement will be affirmed.

The burden of proving that the late payment was either justifiable or not due to a lack of reasonable diligence is on the lessee, and this burden includes showing the proximity of the occurrence to the anniversary date.

Lucyann W. Cameron, 29 IBLA 141 (Mar. 4, 1977)

An appeal to the Board of an automatic termination of an oil and gas lease will be dismissed as not ripe where appellant sends the appeal to the Board before a Notice of Termination of Lease has been issued and a Petition for Reinstatement rejected by the State Office, Bureau of Land Management.

Read & Stevens, Inc.; Franklin, Aston & Fair, Ltd.; and Colorado Interstate Gas Co., 29 IBLA 154 (Mar. 4, 1977)

OIL AND GAS LEASES--Continued

REINSTATEMENT--Continued

A late payment of rental due for an oil and gas lease results in termination of the lease, and the lease will not be reinstated, where the lessee relied upon a third party to pay the rental, but no acceptable justification is shown for the delay.

Lynn Schusterman, 29 IBLA 182 (Mar. 18, 1977)

Reasonable diligence normally requires sending or delivering payments sufficiently in advance of the anniversary date to account for normal delays. A lessee whose payment is mailed more than 16 days after the due date is not reasonably diligent.

Reliance upon receipt of a courtesy notice can neither prevent the lease from terminating by operation of law nor serve to justify a failure to pay the lease rental timely.

Energy Reserves, Inc., 30 IBLA 11 (Apr. 4, 1977)

Reasonable diligence normally requires sending or delivering payments sufficiently in advance of the anniversary date to account for normal delays. Where payment is mailed 3 days after the anniversary date and where due to a combination of trips in other vehicles, farm chores, and simple inadvertence, it was left on a car seat for 4 days, the failure to exercise reasonable diligence is not justifiable because the factor causing the delay is not one which is ordinarily outside of the control of the lessee.

Mildred W. Bernthal, Shirley M. Bernthal, 30 IBLA 18 (Apr. 7, 1977)

A lessee whose oil and gas lease terminated by operation of law for failure to pay rental timely may be found to have exercised "reasonable diligence" in mailing the rental payment on Oct. 29 when it was due on Nov. 1, and the lease should therefore be considered for reinstatement.

George C. Ott, 30 IBLA 146 (May 16, 1977)

An oil and gas lease, terminated for failure to pay annual rental on or before the anniversary date of the lease, can be reinstated only if the petitioner shows that the failure was either justifiable or not due to a lack of reasonable diligence. Mailing the rental payment after it is due does not meet the reasonable diligence requirement.

In petitioning for reinstatement of an oil and gas lease terminated by operation of law for failure to submit the rental payment on or before the anniversary date of the lease, simple inadvertence, or ignorance of the regulations are not justifiable excuses for delay in making the rental payment.

Under 30 U.S.C. § 188(c) (1970), the Secretary of the Interior has no authority to reinstate an oil and gas lease terminated by operation of law for failure to make timely payment of rental, unless the rental payment is tendered at the proper office within 20 days of the due date.

Apostolos Paliombeis, 30 IBLA 153 (May 16, 1977)

Reasonable diligence normally requires sending or delivering payments sufficiently in advance of the anniversary date to account for normal delays. A lessee who mails payment from New York City to Cheyenne, Wyoming, 2 days before the anniversary date is not reasonably diligent.

Rosemary Weaver et al., 30 IBLA 227 (May 26, 1977)

An oil and gas lease terminated by operation of law for failure to pay the advance rental on time may be reinstated only when the lessee shows that his failure to pay the rental on or prior to the anniversary date was either justifiable or not due to a lack of reasonable diligence. Mailing the rental payment after it is due does not satisfy the reasonable diligence requirement, nor does the absence of lessee's president from the company office serve to justify the lack of reasonable diligence.

Helena Silver Mines, Inc., 30 IBLA 262 (May 31, 1977)

A petition for reinstatement of an acquired lands oil and gas lease terminated for lack of timely payment of the rental is properly denied where the lessee fails to show reasonable diligence in mailing the payment or a justifiable excuse for the delay in payment. The error of an employee in failing to recognize that rental payment was required for the leases in question does not justify the failure to make a timely payment.

Shell Oil Co., 30 IBLA 290 (June 1, 1977)

An oil and gas lease terminated by operation of law for failure to pay advance rental on time may be reinstated only when the lessee shows that his failure to pay the rental on or before the anniversary date was either justifiable or not due to lack of reasonable diligence. Mailing the rental due in Reno from Las Vegas on the day before the anniversary date does not constitute reasonable diligence nor is the inexperience or lack of knowledge of any employee a justifiable reason for the late payment.

An oil and gas lease terminated by operation of law for failure to pay the annual rental on or before the anniversary date will not be reinstated solely because the State Office deposited the late rental check.

Nevada Western Oil Co., 30 IBLA 379 (June 10, 1977)

The Board of Land Appeals will entertain and grant a motion by the Bureau of Land Management to remand an oil and gas lease case on appeal to the Board from a decision holding the lease had terminated and denying a petition to reinstate the lease, where BLM discovered, while the case was on appeal, that its decision was predicated on an erroneous factual basis in that annual rental for the lease had actually been paid on time, but the check had been misplaced by BLM and was later found.

Kathryn A. Dalton, 31 IBLA 1 (June 15, 1977)

Reasonable diligence normally requires sending or delivering payments sufficiently in advance of the anniversary date to account for normal delays. Instances of forgetfulness, simple inadvertence or ignorance of the regulations are not covered. Where payment is mailed from Binghamton, New York, to Salt Lake City, Utah, 1 day before the anniversary date the lessee cannot be said to be reasonably diligent.

An estoppel of the Government to refuse acceptance of late rental payments is not created where in the past the BLM accepted rental payments after the anniversary date pursuant to 43 CFR 3103.3-2(e)(1) providing if the office to receive payment is closed on the anniversary date, payment will be considered timely if received on the next official working day.

A prerequisite of the reinstatement process is the tender of payment within 20 days of the anniversary date which protects the right of the lessee to petition for reinstatement. The check is then deposited in an unearned account to create a record of it, and bring it under accounting control, however, depositing of the check does not create an estoppel against the Government.

Adolph F. Muratori, 31 IBLA 39 (June 21, 1977)

A lessee generally has not demonstrated reasonable diligence where the rental payment was postmarked in California the day before it was due in Utah. An allegation that the payment was mailed prior to the postmark date must be corroborated by sufficient evidence. A suggestion that the rental check was mailed on the date written and allegations of poor services by the local post office are not sufficient alone to overcome the postmark date.

David M. Gregg, 32 IBLA 293 (Sept. 28, 1977)

A lessee requesting reinstatement of an oil and gas lease terminated for failure to pay rental timely must show that he deposited the rental payment in the mail sufficiently in advance of the due date to account for normal delays in the collection, transmittal, and delivery of the mail in order to demonstrate reasonable diligence under 30 U.S.C. § 188(c) (1970).

Reliance on receipt of a courtesy billing notice from the Bureau of Land Management is not a justifiable excuse for reinstatement of an oil and gas lease terminated for failure to pay rental timely. The failure of the Bureau of Land Management to change a lessee's address of record resulting in the lessee not receiving the courtesy notice does not relieve the lessee from the obligation to pay rental timely.

Richard C. Corkyn, 32 IBLA 296 (Sept. 28, 1977)

An oil and gas lease, terminated by operation of law for failure to pay annual rental timely, may be reinstated only if, among other things, the lessee exercised reasonable diligence, *i.e.*, the lessee sent the rental payment sufficiently in advance of the due date to account for normal delays in the collection, transmittal and delivery of the mail, or if the lessee can show his failure to pay timely was justifiable, *i.e.*, the delay was caused by factors outside his control, which were the proximate cause of the failure.

The oil and gas lessee of record is responsible for paying rental timely and for meeting the reinstatement requirements. The fact that a lessee attempts to assign his lease does not absolve him of the rental and reinstatement requirements until the assignment is approved by the Bureau of Land Management.

A rental payment mailed in Houston, Texas, the day before it was due in Denver, Colorado, does not alone show an exercise of reasonable diligence. An argument that the failure of a rental payment to arrive timely

OIL AND GAS LEASES--Continued

REINSTATEMENT--Continued

was the fault of the U.S. Postal Service does not provide justifiable excuse for reinstatement of the lease in the absence of reasonable diligence.

Leonard A. J. Tancredi, 32 IBLA 325 (Oct. 11, 1977)

An oil and gas lease, terminated for failure to pay annual rental on or before the anniversary date of the lease, can be reinstated only if the petitioner shows that the failure was either justifiable or not due to a lack of reasonable diligence. Where the evidence of a postmark indicating that a rental payment was mailed after its due date is unrebutted, it must be held that reasonable diligence on the part of the lessee has not been shown.

Iola D. Long, 32 IBLA 333 (Oct. 18, 1977)

A lessee generally has not demonstrated reasonable diligence where the rental payment was postmarked in California the day before it was due in Nevada. An allegation that the payment was mailed prior to the postmark date must be corroborated by sufficient evidence. An assertion that the rental check was mailed 2 days before the due date and allegations of poor service by the local post office are not sufficient alone to overcome the postmark date.

Richard L. Triplett II, 32 IBLA 369 (Oct. 31, 1977)

Ordinarily the postmark date on a letter will be deemed the date of mailing. This inference may be rebutted on showing satisfactory, circumstantial evidence to lend credibility to an earlier date. A letter from postal authorities, acknowledging that a posted pickup schedule erroneously indicated pickups on Sundays and holidays, especially where the letter is accompanied by a photograph of the posted schedule, sufficiently corroborates lessee's contention that he mailed the rental payment prior to a Sunday and Monday holiday to rebut the inference resulting from a postmark of the following Tuesday.

Reasonable diligence normally requires sending or delivering payments sufficiently in advance of the anniversay date to account for normal delays in the collections, transmittal, and delivery of the payment considering the distance involved. Where a letter is to be mailed from Brooklyn, New York, to Salt Lake City, Utah, allowing 1 day for delivery demonstrates lack of reasonable diligence, whereas allowing 3 or 4 days generally is diligent.

Edward Malz, 33 IBLA 22 (Nov. 22, 1977)

The timeliness of filing Federal tax returns and payments and of making rental payments for Federal oil and gas leases are governed by different statutes and regulations and are not the same. Receipt in the proper Bureau of Land Management office determines the timeliness of rental payment, whereas the Internal Revenue Service uses a postmark date. The postmark date is relevant in considering a Federal oil and gas lease rental only to determine if the lessee exercised reasonable diligence so as to warrant reinstatement of a lease terminated for failure to pay the rental timely.

In determining whether an oil and gas lessee exercised reasonable diligence to warrant reinstatement of a terminated lease the postmark date on the rental payment envelope is generally deemed the date of mailing unless there is satisfactory evidence to support an assertion that mailing occurred at an earlier date.

Generally, the mailing of a rental payment for an oil and gas lease 1 day before the payment date cannot be considered reasonable diligence to warrant reinstatement of a terminated lease.

Receiving the Bureau of Land Management's courtesy rental due notice too late to meet a lessee's usual business practice for mailing checks is not a justifiable excuse for delay in transmitting the payment to warrant reinstatement of a terminated lease.

The inadvertent or negligent failure of an employee or other person entrusted to mail payments for an oil and gas lessee is not a justifiable excuse for delay in transmitting the payment to warrant reinstatement of a terminated lease. Nor is the fact his prior payments have been timely filed such an excuse.

David R. Smith and Darla L. Smith, 33 IBLA 63 (Dec. 5, 1977)

The standards of reasonable diligence and justifiable delay govern reinstatement of oil and gas leases as well as geothermal leases, and principles established in oil and gas lease reinstatement cases generally govern cases involving reinstatement of geothermal leases as well.

Page T. Jenkins, 33 IBLA 135 (Dec. 19, 1977)

An oil and gas lease terminated for failure to timely pay the annual advance rental can only be reinstated where the lessee shows to the satisfaction of the Secretary, or his delegate, that the failure to timely pay the advance rental was not due to a lack of reasonable diligence, or that such failure was justifiable.

Doris Belnap, 33 IBLA 231 (Dec. 28, 1977)

In order for the failure to pay oil and gas lease rental timely to be considered justifiable, it must be caused by factors outside the lessee's control, which were the proximate cause of the failure. Severe winter weather and other circumstances which prevent the lessee from mailing the rental payment in a timely fashion constitute such a factor which renders the failure to pay the rental timely justifiable.

Genevieve C. Aabye, 33 IBLA 285 (Jan. 5, 1978)

Reasonable diligence normally requires sending or delivering payments sufficiently in advance of the anniversary date to account for normal delays in the collection, transmittal, and delivery of the payment considering the distance involved. Allowing 1 day for delivery demonstrates lack of reasonable diligence.

Payment of the annual rental on an oil and gas lease is not made until a proper form of remittance is received by the appropriate office of the Bureau of Land Management.

Failure to make payment of the annual rental on time is justifiable when owing to factors ordinarily outside the lessee's control the reasonable diligence test cannot be met. Natural disasters or the physical condition of the lessee or members of the lessee's immediate family, will justify late payment where they are the proximate cause of the late payment. Ignorance of the

OIL AND GAS LEASES--Continued

REINSTATEMENT--Continued

law, a pleasure or business trip, or disregard of regular mail collection schedules will not justify late payment.

Lloyd H. and Adelheid A. Patterson, 34 IBLA 68 (Feb. 22, 1978)

When rental payment for an oil and gas lease is mailed after the date it is due, there can be no basis for reinstating the lease because of reasonable diligence.

A lessee's failure to make timely payment of annual rental on an oil and gas lease is not justified because it results from his misplacing the courtesy notice that rental is due.

Where a lessee presents no evidence that illnesses of his family members were so disruptive as to prevent him from carrying on his employment and other routine activities as usual, the late payment of rental on an oil and gas lease is not justified by these illnesses.

Albert R. Fairfield, 34 IBLA 132 (Mar. 8, 1978)

Reinstatement of an oil and gas lease terminated by operation of law may be allowed only where the lessee can establish to the satisfaction of the Secretary of the Interior that the failure to make timely payment was either justifiable or not due to a lack of reasonable diligence. 30 U.S.C. § 188(c) (1970). When the only "payment" tendered timely consists of an unsigned check, it is not sufficient to satisfy the exculpatory standards of the reinstatement law and regulations.

An oil and gas lessee of record is responsible for paying rental timely. The fact that a lessee attempts to assign his lease does not absolve him of the rental payment requirements until the assignment is approved by the Bureau of Land Management.

Auburn C. Hunsucker, 34 IBLA 316 (Apr. 24, 1978)

In order for the failure to pay oil and gas lease rental timely to be considered justifiable, it must be caused by factors outside the lessee's control, which were the proximate cause of the failure. Where the lessee has gone on a trip intending to return by mid-month but is delayed by the necessity of caring for an old and ill friend whom he visited, so that he does not return until the first of the next month, the anniversary date of the lease, his failure to pay the rental timely is justifiable and the lease is to be reinstated.

C. M. Winters, 34 IBLA 350 (Apr. 26, 1978)

Failure to pay oil and gas lease rental timely may be justifiable where it was caused by factors outside the lessee's control which were the proximate cause of the late payment. A lessee's head injuries requiring hospitalization during the month before the anniversary date of the lease constitutes proximate cause sufficient to justify late payment of the rental and to warrant reinstatement of the lease.

Hubert W. Scudder, 35 IBLA 58 (May 10, 1978)

OIL AND GAS LEASES--Continued

REINSTATEMENT--Continued

An oil and gas lease, terminated for failure to pay annual rental on or before the anniversary date of the lease, can be reinstated only if the petitioner shows that the failure was either justifiable or not due to a lack of reasonable diligence. Mailing the rental payment on the day it is due does not meet the reasonable diligence requirement.

In petitioning for reinstatement of an oil and gas lease terminated by operation of law for failure to submit the rental payment on or before the anniversary date of the lease, simple forgetfulness or inadvertence are not justifiable excuses for delay in making the rental payment.

Jones K. Mullinax, 35 IBLA 73 (May 12, 1978)

An oil and gas lease, terminated automatically by operation of law for failure to pay rental timely, may be reinstated if, among other things, the failure to pay timely was justifiable or not due to a lack of reasonable diligence on the part of the lessee. Mailing the rental payment after the due date does not constitute reasonable diligence. An automobile accident occurring 25 days before the rental was due, is not a justifiable reason for reinstating the lease where it is not shown that its occurrence prevented the lessee from making timely payment. Reliance on receipt of a courtesy notice does not justify failure to pay rental timely.

Emma Pace, 35 IBLA 143 (May 22, 1978)

A Federal oil and gas lease reinstatement petition is properly denied where the petitioner avers merely that she mailed a rental check to the proper office of the Bureau of Land Management well before the anniversary date of the lease, and no evidence of this attempted payment, other than petitioner's statement, appears in the record.

Emma Sabsevitz, 35 IBLA 177 (May 23, 1978)

An oil and gas lease, terminated for failure to pay annual rental on or before the anniversary date of the lease, can be reinstated only if the petitioner shows that the failure was either justifiable or not due to a lack of reasonable diligence. Mailing the rental payment after it is due does not meet the reasonable diligence requirement.

Reliance on receipt of a courtesy billing notice from the Bureau of Land Management is not a justifiable excuse upon which to predicate reinstatement of an oil and gas lease terminated for failure to pay rental timely. The failure of the Bureau of Land Management to change a lessee's address of record resulting in the lessee not receiving the courtesy notice does not relieve the lessee from the obligation to pay rental timely.

Apostolos Paliomkeis, 35 IBLA 180 (May 23, 1978)

It is proper for the Bureau of Land Management to reject an over-the-counter offer for an oil and gas lease of land formerly included in a lease erroneously canceled, because under 43 CFR 3112.1-1 land in canceled leases is subject to the filing of new noncompetitive lease offers only in accordance with simultaneous filing procedures.

David A. Provinse, 35 IBLA 217 (May 26, 1978)

OIL AND GAS LEASES--Continued

REINSTATEMENT--Continued

Under 30 U.S.C. § 188(c) (1970) and 43 CFR 3108.2-1(c), the Department has no authority to reinstate an oil and gas lease terminated by operation of law for failure to make timely payment of annual rental unless rental payment has been made or tendered within 20 days of the due date.

"Tender." Placing a check for annual rental for oil and gas leases in the mails does not constitute a tender of payment of annual rental, within the meaning of 43 CFR 3108.2-1(c). Rather, a lessee makes a tender of payment only when he submits payment to the BLM office administering his leases, and when BLM has the opportunity either to receive or decline it. Accordingly, placing rental in the mails does not constitute a tender of payment which would allow the Department to consider the merits of a petition for reinstatement of an oil and gas lease terminated for failure to make timely payment of annual rental.

Mobil Oil Corp., 35 IBLA 265 (June 2, 1978)

An oil and gas lease terminates automatically by operation of law for failure to pay rental timely when the rental check, although timely received by the appropriate BLM office, is not honored by the bank on which it is drawn. However, if a lessee provides adequate evidence, such as an admission by a bank official, that the bank erroneously dishonored the check, the error of the bank may not vitiate the otherwise proper payment of rental to BLM.

An oil and gas lease terminated for nonpayment of rent may be reinstated under 30 U.S.C. § 188(c) (1970) if the failure to pay was either justifiable or not due to a lack of reasonable diligence on the part of the lessee. Where a lessee files his rental check timely, but the check is nonnegotiable because insufficient funds are on deposit in the particular bank, the lessee has not exercised reasonable diligence. Failure to pay rental timely may be justifiable where it is caused by factors outside the lessee's control which were the proximate cause of the failure. Where the lessee provides no evidence or circumstances of an alleged unaccountable delay in the electronic transfer of funds from one bank to another which resulted in the lessee's rental check being dishonored, there is no basis for reinstatement of the lease.

Don C. Wiley, 35 IBLA 302 (June 2, 1978)

A lessee requesting reinstatement of an oil and gas lease terminated for failure to pay rental timely must show that he deposited the rental payment in the mail sufficiently in advance of the due date to account for normal delays in the collection, transmittal, and delivery of the mail in order to demonstrate reasonable diligence under 30 U.S.C. § 188(c) (1970).

Reliance on receipt of a courtesy billing notice from the Bureau of Land Management is not a justifiable excuse requiring reinstatement of an oil and gas lease terminated for failure to pay rental timely. The failure of the Bureau of Land Management to change a lessee's address of record which results in the courtesy notice's arriving late does not relieve the lessee from the obligation to pay rental timely.

Gilbert Mark Castillo, 36 IBLA 32 (June 27, 1978)

OIL AND GAS LEASES--Continued

REINSTATEMENT--Continued

An oil and gas lease which has terminated automatically by operation of law for failure to pay rental timely can be reinstated only if, among other things, the failure to pay timely was not due to a lack of reasonable diligence or was justifiable.

In most cases, the date of the postmark on the envelope containing an oil and gas lease rental payment is deemed the date the payment was mailed. A contention that the payment was deposited in the mail prior to the postmark date must be supported by satisfactory evidence in order to rebut this inference from the postmark date.

Harrel Petroleum Corp., 36 IBLA 39 (June 27, 1978)

When an oil and gas lease terminates automatically by operation of law because the annual rental was not paid on or before the anniversary date, the lessee must show, among other things, that the failure to pay rental timely was not due to a lack of reasonable diligence or that there was a justifiable excuse for the delay in order to have the lease reinstated. Making oil and gas lease rental payments 19 days after they are due does not constitute reasonable diligence.

To constitute a justifiable excuse for delay in making an oil and gas lease rental payment sufficient to warrant reinstatement of a lease terminated for late payment of rental, a lessee must generally show the delay was caused by factors outside his control which were the proximate cause of his failure to pay the rental timely. The following are not ordinarily justifiable excuses: (1) reliance on receipt of a courtesy notice of rental; (2) selling a house and moving to another; (3) failure to show a causal link between the illness of lessee's friend and the failure to pay timely.

Frederick C. Farrington, George P. Hoffman, 36 IBLA 70 (June 30, 1978)

An oil and gas lease which has terminated for failure to pay rental timely may be reinstated upon a satisfactory showing that, among other things, the failure to pay the rental on or before the anniversary date was either justifiable or not due to a lack of reasonable diligence. Generally, mailing the payment the day before it is due does not constitute reasonable diligence. A prolonged business trip will generally not constitute a justifiable excuse for the late payment.

J. R. Oil Corp., 36 IBLA 81 (July 12, 1978)

An oil and gas lease terminated by operation of law for failure of the lessee to pay the annual rental on or before the anniversary date of the lease may be reinstated only if the late payment is justifiable or not due to a lack of reasonable diligence. Where the death of a lessee's father occurs on Feb. 28, the rent is mailed no earlier than Feb. 28, and the rent is due and payable on Mar. 1, the requisite proximity and causality to justify the delay in payment is not demonstrated.

Robert W. Scudder, Eileen Scudder, 36 IBLA 191 (Aug. 3, 1978)

Reasonable diligence normally requires sending or delivering payments sufficiently in advance of the anniversary date to account for normal delays in the collection, transmittal, and delivery of the payment considering the distance involved. Where a letter is mailed on Feb. 25 from Windom, Minnesota, to Cheyenne, Wyoming, where it is due on Mar. 1, reasonable diligence has been exercised.

John D. Holt, 36 IBLA 257 (Aug. 15, 1978)

The postmark date on a letter bearing payments of annual rental on oil and gas leases will be deemed to be the date of mailing in the absence of satisfactory evidence corroborating the lessee's assertion that the payments were mailed before the postmark date.

Mailing payments of annual rental on oil and gas leases on Sunday in New York City 3 days before they are due in Salt Lake City, Utah, does not constitute a reasonably diligent attempt to pay the rental in a timely manner, in the absence of a clear showing that the payor had good cause to believe that the letter would be collected from the mailbox that same day.

Daniel Ashley Jenks, 36 IBLA 268 (Aug. 17, 1978)

While an oil and gas lease, terminated for failure to pay annual rental on or before the anniversary date of the lease, can be reinstated under 30 U.S.C. § 188(c) (1970), if the petitioner shows that the failure was either justifiable or not due to a lack of reasonable diligence, generally forgetfulness is not a justifiable excuse for delay in making the rental payment, and mailing the payment after the due date does not constitute reasonable diligence.

Gent Davis, 36 IBLA 311 (Aug. 21, 1978)

An oil and gas lease terminated by operation of law for failure to pay advance rental timely will be reinstated when lessee shows that failure to pay the rental on or before the anniversary date was not due to a lack of reasonable diligence in that payment was mailed in California 6 days before due in Wyoming State Office.

Mercedes M. Peratt, 36 IBLA 331 (Aug. 28, 1978)

An oil and gas lease, terminated for failure to pay annual rental on or before the anniversary date of the lease, can be reinstated only if the petitioner shows that the failure was either justifiable or not due to a lack of reasonable diligence. Mailing the rental payment either on the day before it is due, or after it is due, does not meet the reasonable diligence requirement.

To constitute a justifiable excuse for delay in making an oil and gas lease rental payment sufficient to warrant reinstatement of a lease terminated for late payment of rental, a lessee must show that the delay was caused by factors outside his control which were the proximate cause of his failure to pay the rental timely. Negligence of an employee in making timely rental payments and subsequent false statements to her employer that timely payments were made does not relieve the employer from responsibility to verify the employee's action and to make timely payment.

Ram Petroleums, Inc., & Ramoco, Inc., 37 IBLA 184 (Oct. 11, 1978)

An oil and gas lease terminated by operation of law for failure to pay rental timely may be reinstated only where, among other things, it is shown that the failure to pay the rental timely was either justifiable or not due to a lack of reasonable diligence. Mailing a properly identified rental check after the due date does not constitute reasonable diligence, nor is there justification for the late payment because an unidentified check was received by BLM prior to the due date but returned for identification of the account to be credited.

S. Delos Chamraign, 37 IBLA 377 (Nov. 6, 1978)

"Payment." A noncompetitive oil and gas lease on which there is no well capable of production in paying quantities terminates by operation of law for failure to pay the annual rental on or before the due date. A check for rental does not constitute payment until it is received at the proper office.

The applicable statute limits the authority of the Department of the Interior in reinstating leases only to those situations where it is shown that the failure to pay the rental timely was either justifiable or not due to a lack of reasonable diligence. Reasonable diligence normally requires sending or delivering payment to the proper office sufficiently in advance of the anniversary date to account for normal delays in the collection, transmittal, and delivery of the payment. Late payment of the rental is justifiable only where failure to make timely payment is the result of causes beyond the control of the lessee, and simple inadvertence in mailing the payment to the wrong office does not justify failure to send timely payment to the proper office.

Gretchen Capital, Ltd., 37 IBLA 392 (Nov. 8, 1978)

A petition for reinstatement of an oil and gas lease terminated for lack of timely payment of the rental is properly denied where the appellant does not show reasonable diligence in mailing the payment or a justifiable excuse for the delay in payment. A number of factors caused by appellant's inadvertence, negligence, or lack of communication with its assignor, which combined to cause late payment of the rental do not justify failure to make timely payment.

Placid Oil Co., 38 IBLA 115 (Nov. 20, 1978)

A lessee's forgetfulness and inadvertence are not justifiable excuses for failure to pay the annual rental on or before the anniversary date of the oil and gas lease. Nor does mailing payment 4 days after the due date constitute reasonable diligence. The timeliness of filing Federal tax returns and payments and of making rental payments on oil and gas leases are governed by different statutes and regulations and are not the same.

Fred Purcheck, 38 IBLA 275 (Dec. 13, 1978)

An oil and gas lessee who submits payment of annual rentals with checks postdated by 15 days is not reasonably diligent in attempting to make payment thereof. So doing with the expectation that negotiation of the checks will not be delayed past the anniversary date unreasonably anticipates either that BLM will withhold processing the checks until they become valid or that the drawee bank will honor them despite the postdating.

The inadvertent error of a person entrusted to mail payments for an oil and gas lease is not a justifiable excuse for delay in making the payment to warrant reinstatement of a terminated lease.

The absence of a lessee on vacation does not justify a failure to make timely rental payment.

Benjamin T. Franklin, 38 IBLA 291 (Dec. 14, 1978)

OIL AND GAS LEASES--Continued

REINSTATEMENT--Continued

A lessee may be entitled to reinstatement of the lease if it is shown, among other things, that reasonable diligence was exercised in mailing the payment, or that the delay in remitting the rental is justifiable. Where a lessee is unable to make the requisite showing, a petition for reinstatement is properly denied.

Reasonable diligence generally requires mailing the rental payment sufficiently in advance of the anniversary or due date to account for normal delays in collection, transmittal, and delivery of the mail. Mailing the rental payment 1 day before or on the anniversary date of the lease does not constitute reasonable diligence.

A lack of diligence may be justifiable if it is demonstrated that at or near the anniversary date there existed sufficiently extenuating circumstances outside the lessee's control which affected his or her actions in paying the rental fee. Instances of simple forgetfulness, inadvertence, ignorance of the regulations, reliance on BLM courtesy notices, and similar occurrences do not excuse diligence.

Ronald C. and Mary A. Hill, 38 IBLA 315 (Dec. 19, 1978)

A petition for reinstatement of an oil and gas lease terminated for lack of timely rental payment is properly denied where the appellant does not show reasonable diligence in mailing the payment or a justifiable excuse for the delay in payment.

Helen Bacha, 39 IBLA 146 (Jan. 29, 1979)

An oil and gas lease which has terminated by operation of law due to late payment of annual rental will not be reinstated where it appears that the rental payment was not mailed early enough to account for the normal delays in the transmission of the mail.

Reynolds Mining Corp., 39 IBLA 405 (Mar. 2, 1979)

The burden of showing that the failure to pay annual rent for an oil and gas lease on or before the anniversary date of the lease was justifiable or not due to a lack of reasonable diligence is on the lessee. The fact that the lessee retained a leasing service which misrepresented that it would file appropriate assignment documents prior to the anniversary date does not justify late payment. Mailing of the annual rental payment on a date after it is due does not constitute reasonable diligence.

Sage, Bacon and Bolan, P.C., 40 IBLA 5 (Mar. 6, 1979)

A lessee may be entitled to reinstatement of the lease if it is shown, among other things, that reasonable diligence was exercised in mailing the payment, or that the delay in remitting the rental is justifiable. Where a lessee is unable to make the requisite showing, a petition for reinstatement is properly denied.

Reasonable diligence generally requires mailing the rental payment sufficiently in advance of the anniversary or due date to account for normal delays in collection, transmittal, and delivery of the mail. This board has repeatedly held that reasonable diligence has not been exercised where a rental payment is posted at a time that one could not assume delivery before the statutory terminal date of the lease.

Lack of diligence may be justifiable if it is demonstrated that at or near the anniversary date there existed sufficiently extenuating circumstances outside the lessee's control which affected his or her actions in paying the rental fee.

Bernard W. Crowe, 40 IBLA 114 (Mar. 27, 1979)

Even if it were true that termination of an oil and gas lease was in part the result of Bureau of Land Management's failure to act timely on an assignment application, there is no authority either to withhold the effect of termination under 30 U.S.C. § 188(b) (1976) or to reinstate the lease under sec. 188(c), where there has been no payment of the full rental within 20 days after termination.

Reichhold Energy Corp., 40 IBLA 134 (Mar. 29, 1979)

A lease terminated automatically for untimely payment of annual rental may be reinstated only upon proof that reasonable diligence was exercised, or that the lack of diligence was justified. In the absence of such proof, a petition for reinstatement is properly denied.

Reasonable diligence ordinarily requires mailing the payment sufficiently in advance of the anniversary date to account for normal delays in the collection, transmittal, and delivery of the mail.

Untimely payment of the annual rental may be justified if proximately caused by extenuating circumstances outside the lessee's control which occurred at or near the anniversary date of the lease.

Estate of Kenneth F. Krammes, 40 IBLA 147 (Mar. 29, 1979)

A lessee generally has not demonstrated reasonable diligence where the rental payment was postmarked in Austin, Tex., the day before it was due in Santa Fe, N.M. An allegation that the payment was mailed prior to the postmark date must be corroborated by sufficient evidence. An assertion that the rental check was mailed 2 days before the due date and an allegation that mail service between Texas and New Mexico "is overnight" is not sufficient alone to overcome the postmark date.

Manuel F. Cueto, Jr., 40 IBLA 265 (Apr. 16, 1979)

An oil and gas lessee may be entitled to reinstatement of the lease if it is shown, among other things, that reasonable diligence was exercised in mailing the payment, or that the delay in remitting the rental is justifiable. Where a lessee is unable to make the requisite showing, a petition for reinstatement is properly denied.

Under 30 U.S.C. § 188(c) (1976), the Secretary of the Interior has no authority to reinstate an oil and gas lease terminated by operation of law for failure to make timely payment of rental, unless rental payment is tendered at the proper office within 20 days after the due date.

John A. Steele, Jr., 41 IBLA 49 (May 29, 1979)

The postmark date on an envelope bearing payment of annual rental on oil and gas lease will be deemed to be the date of mailing in the absence of evidence to the contrary.

OIL AND GAS LEASES--Continued

REINSTATEMENT--Continued

An oil and gas lease which has terminated for failure to pay rental timely may be reinstated under 30 U.S.C. § 188(c) (1976) if the failure was either justifiable or not due to a lack of reasonable diligence, and where neither has been shown the application must be rejected.

Joseph W. Semien, 41 IBLA 185 (June 22, 1979)

Reinstatement of an oil and gas lease is properly denied where the lease holder of record delegated responsibility for payment to a purported assignee who failed to make timely payment of the advance rental to the proper BLM office.

Bryan Wagner and Sidney Lazard, 41 IBLA 188 (June 22, 1979)

The postmark date on a letter bearing payments of annual rental for an oil and gas lease will be deemed to be the date of mailing, in the absence of satisfactory evidence corroborating the lessee's assertion that the payments were mailed before the postmark date.

Where appellant alleges he mailed payment from York, Pennsylvania, to Salt Lake City, Utah, on Nov. 28, 1978, a Wednesday, and payment was due there on Dec. 1, 1978, a Friday, but was not received until Dec. 4, 1978, the following Monday, and envelope was postmarked Nov. 30, 1978, these facts ordinarily do not constitute a reasonably diligent attempt to pay the rental in a timely manner.

Glen C. Chronister, 41 IBLA 346 (July 11, 1979)

An oil and gas lease on which there is no well capable of producing oil and gas in paying quantities automatically terminates if the lessee fails to pay the annual rental on or before the anniversary date of the lease. A terminated lease can be reinstated only if, among other requirements, the lessee shows his failure to pay on time was either justifiable or not due to a lack of reasonable diligence.

Reasonable diligence requires mailing the rental payment sufficiently in advance of the anniversary date to account for normal delays in collection, transmittal, and delivery of the mail. Mailing the rental the day it is due does not constitute reasonable diligence.

Where a lessee presents no evidence that illness of a family member or a heavy work load were so disruptive as to prevent him from carrying on his other routine activities as usual, the late payment of rental on an oil and gas lease is not justified by the illness or the work.

Victor Holz, 42 IBLA 284 (Aug. 27, 1979)

An oil and gas lease, terminated for failure to pay annual rental on or before the anniversary date of the lease, can be reinstated only if the petitioner shows that the failure was either justifiable or not due to a lack of reasonable diligence. Mailing the rental payment after it is due does not meet the reasonable diligence requirement.

Reliance on receipt of a courtesy billing notice from BLM is not a justifiable excuse upon which to predicate reinstatement of an oil and gas lease terminated for failure to pay rental timely. The fact that the courtesy rental notice was delayed in reaching appellant because it was sent to appellant's former address is not a justifiable excuse for late payment.

William E. Steiskal, 42 IBLA 304 (Aug. 27, 1979)

Where the failure to pay rental on or before the anniversary date of a lease is attributable to a breakdown in mailing procedures within the parent company of the lessee, neither reasonable diligence nor justification is shown to support a petition for reinstatement.

The Secretary may reinstate a lease terminated by operation of law for failure to pay on or before the anniversary date the full amount of rental due where it is shown to the satisfaction of the Secretary that such failure was either justifiable or not due to a lack of reasonable diligence on the part of the lessee. 30 U.S.C. § 188(c) (1976). Reasonable diligence normally requires sending or delivering payments sufficiently in advance of the anniversary date to account for normal delays in the collection, transmittal, and delivery of the payment. 43 CFR 3108.2-1(c)(2) (1977).

Fuel Resources Development Co., 43 IBLA 19 (Sept. 11, 1979)

Failure to pay the annual rental for an oil and gas lease on or before the anniversary date results in the automatic termination of the lease by operation of law. A lease may be reinstated if the failure to pay the rental timely was either justifiable or not due to a lack of reasonable diligence on the part of the lessee.

In order for the failure to pay oil and gas lease rental timely to be considered justifiable, it must be caused by factors outside the lessee's control, which were the proximate cause of the failure.

Reasonable diligence normally requires sending the payment sufficiently in advance of the due date to account for normal delays in the collection, transmittal, and delivery of the payment.

When rental payment for an oil and gas lease is mailed after the date it is due, there can be no basis for reinstating the lease because of reasonable diligence.

When appellant's failure to mail his rental payment timely is caused by carelessness or inadvertance, his petition for reinstatement of an oil and gas lease is properly denied.

James E. Kordosky and Robert A. Weiss, 43 IBLA 63 (Sept. 18, 1979)

An oil and gas lease, terminated automatically by operation of law for failure to pay rental timely, may be reinstated if, among other matters, the failure to pay timely was justifiable or not due to a lack of reasonable diligence on the part of the lessee.

Reasonable diligence normally requires sending the payment sufficiently in advance of the due date to account for normal delays in the collection, transmittal, and delivery of the payment. When rental payment for an oil and gas lease is mailed after the date it is due, generally there can be no basis for reinstating the lease because of reasonable diligence.

The burden of showing that late payment of annual rental for an oil and gas lease is justifiable is on the lessee. An assertion of personal reasons without further explanation, is insufficient to meet this burden. Nor

OIL AND GAS LEASES--Continued

REINSTATEMENT--Continued

does reliance on receipt of a courtesy notice justify failure to pay rental timely.

William A. King, 43 IBLA 255 (Oct. 10, 1979)

Failure to pay the annual rental for an oil and gas lease on or before the anniversary date results in the automatic termination of the lease by operation of law. A lease may be reinstated if the failure to pay the rental timely was either justifiable or not due to a lack of reasonable diligence on the part of the lessee.

In order for the failure to pay oil and gas lease rental timely to be considered justifiable, it must be caused by factors outside the lessee's control, which were the proximate cause of the failure.

Reasonable diligence normally requires sending the payment sufficiently in advance of the due date to account for normal delays in the collection, transmittal and delivery of the payment.

Bureau of Land Management's cashing a late rental check and depositing it in its unearned account does not constitute acceptance of rental payment or a determination that a terminated oil and gas lease will be reinstated.

Eugene H. and Allieene A. Jankoski, 43 IBLA 323 (Oct. 29, 1979)

"Reasonable diligence." Allowing 1 day for mail delivery of an oil and gas lease rental demonstrates a lack of reasonable diligence, because reasonable diligence normally requires sending or delivering payments sufficiently in advance of the anniversary date to allow for normal delays in the collection, transmittal, and delivery of the payment.

"Justifiable." For a delay in submission of an oil and gas lease rental payment to be justifiable, lessee must show that the delay would not have occurred except for factors outside of his control.

"Justifiable excuse." The fact that a courtesy rental notice did not come to oil and gas lessee's attention until 1 day prior to rental due date is not a justifiable excuse for late payment of the rental.

Reid E. Motley, 43 IBLA 360 (Oct. 29, 1979)

An oil and gas lease on which there is no well capable of production terminates by operation of law if the annual rental payment is not actually received by the Bureau of Land Management State Office on or before the anniversary date.

A terminated oil and gas lease may be reinstated only if the failure to make timely payment was either justifiable, *i.e.*, due to events outside the lessee's control, or not due to a lack of reasonable diligence. Reasonable diligence generally requires sending the payment sufficiently in advance of the due date to account for normal delays in the collection, transmittal, and delivery of the payment. Mailing rental payment the day before it is due does not constitute reasonable diligence.

The postmark date of a rental payment for an oil and gas lease is generally deemed to be the date of mailing, unless there is satisfactory corroborating evidence to support the lessee's assertion that the mailing occurred at a date earlier than indicated by the postmark.

Annie Mae Buckley, 44 IBLA 99 (Nov. 20, 1979)

OIL AND GAS LEASES--Continued

REINSTATEMENT--Continued

An oil and gas lease terminated by operation of law for failure of the lessee to pay the annual rental on or before the anniversary date of the lease may be reinstated only if the late payment is justifiable or not due to a lack of reasonable diligence. Where, for the first time on appeal, there are assertions concerning the death of lessee's husband, the case will be remanded to BLM for an initial determination as to whether circumstances demonstrate the requisite proximity and causality to justify the delay in payment, and reinstatement of the lease.

Agnes James, 44 IBLA 133 (Nov. 27, 1979)

A lessee may be entitled to reinstatement of the lease if it is shown, among other things, that reasonable diligence was exercised in mailing the payment, or that the delay in remitting the rental is justifiable. Where a lessee is unable to make the requisite showing, a petition for reinstatement is properly denied.

Reasonable diligence generally requires mailing the rental payment sufficiently in advance of the anniversary or due date to account for normal delays in collection, transmittal, and delivery of the mail. Mailing the rental payment 2 days before the anniversary date of the lease does not constitute reasonable diligence.

A lack of diligence may be justifiable if it is demonstrated that at or near the anniversary date there existed sufficiently extenuating circumstances outside the lessee's control which affected his or her actions in paying the rental fee. A lessee's suffering severe, incapacitating injuries during the month before the anniversary date of the lease may constitute proximate cause sufficient to justify late payment of the rental and to warrant reinstatement of the lease.

Norman C. Stroink, 44 IBLA 188 (Nov. 30, 1979)

Failure to pay the annual rental for an oil and gas lease on or before the anniversary date results in the automatic termination of the lease by operation of law. A lease may be reinstated if the failure to pay the rental timely was either justifiable or not due to a lack of reasonable diligence on the part of the lessee.

In order for the failure to pay oil and gas lease rental timely to be considered justifiable, it must be caused by factors outside the lessee's control which were the proximate cause of the failure.

Reasonable diligence normally requires sending the payment sufficiently in advance of the due date to account for normal delays in the collection, transmittal, and delivery of the payment.

Robert H. Schaerbusch, 44 IBLA 229 (Dec. 11, 1979)

The Secretary may reinstate an oil and gas lease, terminated for failure of the lessee to make timely payment of the rental due if, *inter alia*, it is shown to the satisfaction of the Secretary that such failure was either justifiable or not due to a lack of reasonable diligence.

Ordinarily, the postmark on a letter will be assumed to indicate the date and place of mailing in the absence of evidence to the contrary. Reasonable diligence is found where a rental payment, due in Billings, Montana, on June 1, 1979, was actually mailed from Wilmington, Delaware, on May 29, 1979, despite the fact that the

OIL AND GAS LEASES--Continued

REINSTATEMENT--Continued

envelope containing such payment bears only a Billings, Montana, postmark of June 2, 1979.

Phyllis Lane Zehr, Alice M. Conte, 44 IBLA 261 (Dec. 19, 1979)

The sending of an unsigned check for the annual rental of an oil or gas lease does not constitute timely payment, even if received on or prior to the anniversary date of the lease. BLM has no obligation to present an unsigned check for payment since such a check is not a negotiable instrument.

A lessee's failure to make timely payment of annual rental on an oil and gas lease is not justified when based on ignorance of the applicable law and regulations requiring payment on or prior to the lease anniversary date.

A contention that appellants were unclear as to the anniversary date of the lease which thereupon resulted in an untimely payment of the rental will not be sustained where the Department's records correctly show the anniversary date, or the lessee has actual knowledge of the correct due date prior thereto.

C. J. Streit and Bernard J. Streit, 44 IBLA 285 (Dec. 26, 1979)

RELINQUISHMENTS

The unilateral mistake of an oil and gas lease offeror in withdrawing his offer does not relieve him of the consequences of the withdrawal, which is, that the offer is terminated when the Bureau of Land Management receives the withdrawal.

An original letter is not needed to withdraw a lease offer. The requirements are that the withdrawal is properly filed and the person making the withdrawal is properly identified.

John J. Sexton (On Reconsideration), 20 IBLA 187 (May 7, 1975)

An application for assignment of an undivided partial interest in an oil and gas lease is properly approved by BLM effective the first day of the lease month following the date of filing of the application. In the interim between the filing of the application and the effective date of the assignment, the prospective assignor remains the sole lessee, and, as such, is the only person who may relinquish rights under the lease.

A document expressly relinquishing all rights to an oil and gas lease, signed by the sole lessee, may not be disregarded unless the lessee or one with clear authority to act on his behalf revokes the relinquishment in advance of its filing.

Sol Singer, Gretchen Capital, Ltd., 35 IBLA 361 (June 23, 1978)

Upon failure of a lessee to pay full rental on or before the anniversary date of a lease, for any lease on which there is no well capable of producing oil or gas in paying quantities, the lease automatically terminates by operation of law, despite a partial payment submitted on the basis of a partial relinquishment which is not yet effective.

An oil and gas lease may be relinquished only by the record title holder, and a partial relinquishment is

OIL AND GAS LEASES--Continued

RELINQUISHMENTS--Continued

not effective if it is filed by an applicant for an assignment which has not been approved.

Reichhold Energy Corp., 40 IBLA 134 (Mar. 29, 1979)

An oil and gas lease on which there is no well capable of producing oil or gas in paying quantities will automatically terminate on the anniversary date of the lease upon failure of lessee to pay the minimum annual rental, despite a partial payment submitted on the basis of a partial relinquishment, which was ineffective because not filed by the record title holder pursuant to 43 CFR 3108.1, and despite issuance of a Bureau of Land Management decision subsequent to the anniversary date confirming a decreased annual rental.

E. J. Bradshaw, 44 IBLA 181 (Nov. 30, 1979)

RENEWALS

Where a 20-year oil and gas lease, committed to an approved unit agreement prior to the end of its initial term in 1962 and thereby extended beyond the original term, is eliminated from the unit agreement in 1972 and its term is automatically extended for 2 years and so long thereafter as oil or gas is produced in paying quantities, such a lease is not eligible for further 10-year renewals and an application for such a renewal filed in 1974 is properly rejected.

Marathon Oil Co., Chevron Oil Co., 19 IBLA 1 (Feb. 20, 1975)

When an assignment of an oil and gas lease, made prior to lease renewal, has been approved after renewal and thereafter it appears that there is a controversy whether the parties contemplated that the assignment of the base lease would extend to the renewal lease, the Department will not take action on a protest requesting rescission of the assignment approval, but will maintain the status quo for a period sufficient to permit the parties to institute litigation or take other action to resolve their dispute.

Joseph Alstad, 19 IBLA 104 (Mar. 4, 1975)

A 10-year renewal of a 20-year oil and gas lease expires by its own terms where no timely application for further renewal is made by the lessee. Such lease is not held by production and terminates automatically on its final anniversary date notwithstanding the existence of a producing well on the leasehold.

Peacock Oil Co., Inc., Twin Arrow, Inc., 29 IBLA 74 (Feb. 23, 1977)

A 10-year renewal of a 20-year oil and gas lease expires by its own terms where no timely application for further renewal is made by the lessee, pursuant to 43 CFR 3107.8-2; however, the language of the regulation is permissive and a delay in filing a renewal application may be excused in the presence of special circumstances.

Peacock Oil Co., Inc., Twin Arrow, Inc., 30 IBLA 103 (May 2, 1977)

OIL AND GAS LEASES--Continued

RENEWALS--Continued

A 20-year oil and gas lease which has been renewed for successive 10-year periods, and which at the time of expiration of a 10-year period is committed to an approved unit plan of development, is not entitled to another 10-year renewal, but is extended pursuant to 30 U.S.C. § 226(j) (1976).

Anne Burnett Tandy et al., 33 IBLA 106 (Dec. 16, 1977)

Texaco, Inc., 33 IBLA 296 (Jan. 10, 1978)

Texaco, Inc., 40 IBLA 294 (Apr. 27, 1979)

To obtain a renewal of a 20-year oil and gas lease the lessee should file an application for renewal at least 90 days prior to the expiration of the lease term. However, this requirement is permissive and a delay in filing the application may be excused in the presence of special circumstances.

Homestake Oil and Gas Co., 40 IBLA 262 (Apr. 16, 1979)

RENTALS

An oil and gas lease terminated by operation of law for failure to pay the advance rental timely will be reinstated where it is shown, upon reconsideration of an earlier Board decision, that lessee's failure to pay the rental timely was not due to a lack of reasonable diligence. Evidence which establishes that the payment due on May 1, 1974, at the Eastern States Office, Bureau of Land Management, Silver Spring, Maryland, was mailed in Dallas, Texas, on Apr. 25, 1974, 5 days before the due date, is sufficient to demonstrate due diligence despite the fact that the envelope containing the payment was postmarked Apr. 30, 1974.

W. A. Fitzhugh (On Reconsideration), 18 IBLA 323 (Jan. 6, 1975)

It is proper to deny a request for reinstatement of an oil and gas lease terminated by operation of law for failure to pay advance rental timely where the petitioner has not shown that his failure to pay the rental on or before the anniversary date of the lease was justifiable or not due to a lack of reasonable diligence.

Frank J. Germano, 18 IBLA 390 (Feb. 6, 1975)

It is proper to deny a request for reinstatement of an oil and gas lease terminated by operation of law for failure to pay advance rental timely where it is not shown that the failure to pay the rental on or before the anniversary date of the lease was justifiable or not due to a lack of reasonable diligence. Mistake as to the date the payment is due, misplacement of the courtesy notice, and the decease of appellant's husband some 2 years prior to the date payment is due, do not afford a sufficient predicate for reinstatement of an oil and gas lease.

Mary A. Christopher, 19 IBLA 53 (Feb. 21, 1975)

Where the Geological Survey has determined that any part of the lands described in a noncompetitive oil and gas lease is within an undefined known geologic structure, the lessee is required to pay increased rental in accordance with 43 CFR 3103.3-2(b)(1), and to furnish a lease bond as required by 43 CFR 3104.1.

Duncan Miller, 19 IBLA 86 (Mar. 3, 1975)

OIL AND GAS LEASES--Continued

RENTALS--Continued

An oil and gas lease offer drawn first in a simultaneous filing is properly rejected under 43 CFR 3103.3-1 and 3111.1-1(e)(1) where the offer is deficient in the first year's rental by more than 10 percent. The amendment of the regulations to eliminate the requirement that the advance rental must be submitted with simultaneous filings, effective Sept. 17, 1973, was of prospective effect only, and may not be invoked to cure a defect in rental payment in a simultaneously filed lease offer pending on Sept. 17, 1973.

Duncan Miller, 19 IBLA 133 (Mar. 5, 1975)

Where the advance annual rental for an oil and gas lease was timely submitted by a personal check, but the check was erroneously dishonored by the drawee bank, the rental will be held to have been tendered when first received in the proper Bureau of Land Management office.

Donald S. Childs, 19 IBLA 240 (Mar. 26, 1975)

It is proper to deny a request for reinstatement of an oil and gas lease terminated by operation of law for failure to pay advance rental timely where the petitioner has not shown that his failure to pay the rental on or before the anniversary date of the lease was justifiable or not due to a lack of reasonable diligence.

Any oil and gas lease is automatically terminated by operation of law where an unsigned rental check is tendered prior to the anniversary date of the lease but is not signed and returned until after the anniversary date.

Richard V. Bowman, 19 IBLA 261 (Mar. 31, 1975)

An oil and gas lease terminated by operation of law for failure to pay the advance rental on time may be reinstated only when the lessee shows that the failure to pay the rental on or prior to the anniversary date was either justifiable or not due to a lack of reasonable diligence.

Ray E. Bush, 19 IBLA 280 (Apr. 7, 1975)

Margaret C. Rose, 19 IBLA 307 (Apr. 7, 1975)

Jimmy V. Bowling, 20 IBLA 146 (May 5, 1975)

An oil and gas lease terminated by operation of law for failure to pay the annual rentals on time may be reinstated where the lessee's delay in making payment was due to his seeking clarification of an illegible notice of payment sent by the Bureau of Land Management, and his action demonstrates his reliance on the notice.

Joseph E. Steger, 20 IBLA 206 (May 8, 1975)

An oil and gas lease terminated by operation of law for failure to pay the advance annual rental on time may be reinstated only when the lessee shows that his failure to pay the rental timely was either justifiable or not due to lack of reasonable diligence. The neglect of office personnel to follow appellant's instructions to make payments while he was away from his office on a combined business and vacation trip is not a predicate for either basis for relieve.

Charles C. Sturdevant, 20 IBLA 280 (May 22, 1975)

An oil and gas lease terminated by operation of law for failure to pay the advance rental on time may be reinstated only on a showing by the lessee that failure to pay on or before the anniversary date was either justifiable or not due to lack of reasonable diligence. Failure to raise credible reasons that illness prevented timely payment, with no other justification for late payment, requires denial of reinstatement.

Mrs. Charles H. Blake, 20 IBLA 322 (June 6, 1975)

An oil and gas lease which has terminated by operation of law due to late payment of the annual rental may not be reinstated where the failure to pay on time was due to a lack of reasonable diligence. Where a payment is sent from a town in eastern Texas to Salt Lake City, Utah, on Oct. 30, and does not arrive until after Nov. 1, and where the Post Office indicates that regular mail sent that distance would not normally arrive in 2 days, the lessee has not exercised reasonable diligence.

William N. Cannon, 20 IBLA 361 (June 12, 1975)

An offeror is properly disqualified under 43 CFR 3112.4-1 from receiving a noncompetitive oil and gas lease on an offer drawn with the first priority at a simultaneous drawing when he fails to pay the first year's rental within 15 days (or the first business day thereafter) of receipt of the notice that such payment is due.

Where an offer is drawn with first priority in a simultaneous drawing, and the offeror fails to pay the first year's rental timely, his failure to do so cannot be excused because of the asserted "apparent inefficiency of the United States Mails."

Mar-Win Development Co., 20 IBLA 383 (June 12, 1975)

An oil and gas lease terminated by operation of law for failure to pay the advance rental on time may be reinstated only on a showing that failure to pay on or before the anniversary was either justifiable or not due to lack of reasonable diligence. Appellant's misinterpretation of the due date on the courtesy notice does not justify his late payment of the rent.

Norman E. Marker, 21 IBLA 144 (July 15, 1975)

Where it is alleged that a bank erroneously dishonored a check drawn thereon, and an official of the bank admits that the payment was refused by mistake, the error of the bank will not vitiate the otherwise proper payment of rent.

Wikoa, Inc., 22 IBLA 6 (Sept. 4, 1975)

Pauline V. Trigg, John H. Trigg, 31 IBLA 296 (July 22, 1977)

An oil and gas lease terminated by operation of law for failure to pay the advance rent on time may be reinstated only on a showing by the lessee that his failure to pay on or before the anniversary date was either justifiable or not due to a lack of reasonable diligence. A failure to exercise reasonable diligence is justifiable when caused by a factor outside the control of the lessee. A lessee's personal illness does not justify late payment unless it is of such a debilitating nature that it actually prevents the lessee from posting payment. Appellant's ability to attend to other business shows that his illness did not prevent him from making timely payment of the rent.

Milan de Lany, 22 IBLA 47 (Sept. 16, 1975)

An oil and gas lease, terminated by operation of law for failure to make timely payment of the advance rental, may be reinstated only when the failure to make payment of the annual rental on or before the anniversary date was justifiable or not due to a lack of reasonable diligence. Mailing the rental payment from California to Montana the day before its due date does not constitute reasonable diligence.

Joseph Wachter, 22 IBLA 95 (Sept. 22, 1975)

An oil and gas lease terminated by operation of law for failure to pay the advance rental on time may be reinstated only upon a showing that failure to pay on or before the anniversary date was either justifiable or not due to lack of reasonable diligence. Inability to pay the rent on time does not justify late payment.

Peter T. Creager, 22 IBLA 175 (Sept. 30, 1975)

The successful drawee in a drawing under the special simultaneous filing procedure for noncompetitive oil and gas lease offers is automatically disqualified if he fails to pay rental within 15 days from receipt of notice that such payment is due. A statement by such a drawee that he did not receive a notice and that his office records where his oil and gas records are contained lack any copy of the rental notice is insufficient to overcome the presumptive effect of evidence that Bureau of Land Management officials mail copies of the notice of rental, a notice of stipulations to be signed, and the stipulations in the same envelope, and it is clear the envelope containing the stipulations was received at the drawee's office.

A. G. Golden, 22 IBLA 261 (Oct. 24, 1975)

An oil and gas lease on which there is no well capable of production in paying quantities will terminate by operation of law if the annual rental payments are not submitted on or before the anniversary date. A well capable of production in paying quantities on the anniversary date is one which can actually produce enough oil to exceed the cost of its extraction. Neither the production of water nor the production of meager quantities of oil, albeit with hopes for paying production at some time in the future, constitute production in paying quantities on the anniversary date of the lease.

Where a lessee fails to pay the annual rental on or before the anniversary date, and where the lessee knew, or should have known, that the payment was due, estoppel will not operate to relieve the lessee of the consequent automatic termination of the lease.

The Polumbus Corp., 22 IBLA 270 (Oct. 30, 1975)

Where the deficiency in rental paid on or before the anniversary date of a lease is nominal and a notice of deficiency is sent to the lessee, the lease terminates by operation of law when the balance is not paid within 15 days from receipt of the notice or until the anniversary date, whichever is later.

No petition for reinstatement of an oil and gas lease terminated by operation of law, 30 U.S.C. § 188(b)

OIL AND GAS LEASES--Continued

RENTALS--Continued

(1970), may be entertained if the full amount of rental due was not paid within 20 days after the anniversary date of the lease.

Joseph Francis, 22 IBLA 277 (Oct. 30, 1975)

An oil and gas lease terminated by operation of law for failure to pay timely the advance rental may be reinstated only where the lessee shows that his failure to pay the rental on or prior to the anniversary date was either justifiable or not due to a lack of reasonable diligence. Past adherence to the requirement of timely payment does not justify a subsequent failure to make timely payment. Mailing a rental payment at Chicago, Illinois, to Salt Lake City, Utah, 1 day before the due date does not constitute reasonable diligence.

Henry Carter, 24 IBLA 70 (Feb. 24, 1976)

Where the advance rental check is received within 20 days after the anniversary date, the Bureau may deposit said check in an "unearned" account in order to preserve the right of the lessee to petition for reinstatement of the terminated lease and to safeguard the check, create a record of the payment, and bring it under accounting control. This does not signify acceptance of the payment, or indicate that the lease has not terminated, or create an estoppel against the Government.

John J. Nordhoff, Dean Kirk, 24 IBLA 73 (Feb. 24, 1976)

An oil and gas lease terminated by operation of law for failure to pay the advance rental on time cannot be reinstated when the petitioner fails to show that the late payment of rental was justifiable or not due to a lack of reasonable diligence. Loss of a checkbook through theft 5 days before the due date for payment does not establish causality sufficient to constitute a justifiable excuse.

John E. Stengel, 24 IBLA 98 (Feb. 25, 1976)

An oil and gas lease terminated by operation of law for failure to pay the advance rental timely may be reinstated only if the lessee shows by satisfactory evidence that the failure to pay the rental on or before the anniversary date was either justifiable or was not due to a lack of reasonable diligence. Allowing 1 day for the rental payment to reach Billings, Montana, from Eau Claire, Michigan, is not an exercise of reasonable diligence, and inability to pay is not a justifiable reason for failure to make timely payment.

Frank Thompson, 24 IBLA 105 (Mar. 1, 1976)

An offeror is properly disqualified under 43 CFR 3112.4-1 from receiving a noncompetitive oil and gas lease on an offer drawn with the first priority at a simultaneous drawing when he/she fails to pay the first year's rental within 15 days (or the first business day thereafter) of receipt of the notice that such payment is due.

Where an offer is drawn with first priority in a simultaneous drawing, and the offeror fails to pay the first year's rental timely, his/her failure to do so cannot be excused because of the asserted delay of the postal service.

OIL AND GAS LEASES--Continued

RENTALS--Continued

John Paul Pratt, 24 IBLA 110 (Mar. 1, 1976)

Carma M. Pooley, 29 IBLA 304 (Mar. 30, 1977)

Jack Koegel, 30 IBLA 143 (May 12, 1977)

An oil and gas lease terminated by operation of law for failure to pay the advance rental timely will be reinstated when the lessee shows that its failure to pay the rental on or before the anniversary date was justifiable.

Great Basins Petroleum Co., 24 IBLA 117 (Mar. 1, 1976)

An offeror is properly disqualified under 43 CFR 3112.4-1 from receiving a noncompetitive oil and gas lease on an offer drawn with the first priority at a simultaneous drawing when he fails to pay the first year's rental within 15 days (or the first business day thereafter) of receipt of the notice that such payment is due. An attempt to make payment after the close of office hours on the day the payment is due will not prevent the disqualification.

W. Duane Kennedy, 24 IBLA 152 (Mar. 10, 1976)

The retention of the proceeds from a check, submitted as advance rental during the adjudication of an oil and gas lease offer, does not constitute the creation of a contract.

Robert L. Williams, 24 IBLA 311 (Apr. 20, 1976)

An oil and gas lease terminated by operation of law for failure to pay the advance rental timely will be reinstated when the lessee shows that his failure to pay the rental on or before the anniversary date was not due to a lack of reasonable diligence.

An oil and gas lease, terminated because the advance rental was received 1 day after the due date, may be reinstated where it is shown that the lessee mailed the rental payment 3 days prior to the due date from the main post office in the same city where the BLM's field office is located and the postal authorities verify that there had been a delay in the processing of the mail at that particular time. Under these circumstances, the lessee will be considered to have mailed the payment with due diligence.

A. Helander, 25 IBLA 54 (May 18, 1976)

An oil and gas lease terminated by operation of law for failure to pay the advance rental on or before the anniversary date may be reinstated only upon a showing that the failure to pay on time was either justifiable or not due to lack of reasonable diligence. Inadvertence of the lessee's employee in misplacing the courtesy notice does not justify late payment.

Samuel J. Testagrossa, 25 IBLA 64 (May 28, 1976)

OIL AND GAS LEASES--Continued

RENTALS--Continued

An oil and gas lease terminated by operation of law for failure to pay the advance rental on time cannot be reinstated when the petitioner fails to show that the late payment was justifiable or not due to a lack of reasonable diligence. A payment that is late because it was inadvertently sent by the lessee to the wrong address is neither justifiable nor the result of reasonable diligence.

Frank H. Crosby, 25 IBLA 160 (June 14, 1976)

An oil and gas lease terminated by operation of law for failure to pay the advance rental timely will be reinstated where it is shown that lessee's failure to pay the rental timely was not due to a lack of reasonable diligence. Evidence which establishes that the payment due on Dec. 1, 1975, at the Eastern States Office, Bureau of Land Management, Silver Spring, Maryland, was delivered to a postal carrier on Nov. 11, 1975, is sufficient to demonstrate due diligence despite the fact that the envelope containing the payment was postmarked Dec. 8, 1975, and not received until Dec. 11, 1975, where a credible explanation of the delay has been furnished by the Post Office.

Paul D. Beaird, Jr., and Leon F. Scully, Jr., 26 IBLA 79 (July 13, 1976)

An oil and gas lease terminated by operation of law for failure to pay the advance rental on or before the anniversary date may be reinstated only upon a showing that the failure to pay on time was either justifiable or not due to a lack of reasonable diligence. Late payment of the rental is not justified by confusion concerning proper processing of the rental payment which resulted when the duty to make payment was transferred from the company's land manager to its accountant.

Serio Exploration Co., 26 IBLA 106 (July 26, 1976)

Under 30 U.S.C. § 188(c) (1970), the Secretary of the Interior has no authority to reinstate an oil and gas lease terminated by operation of law for failure to make timely payment of rental, unless the rental payment is tendered at the proper office within 20 days of the due date.

Albert DiGiulio, Jr., Genuino J. Grande and Jeremy V. Cohen, 26 IBLA 169 (Aug. 4, 1976)

Apostolos Paliombeis, 30 IBLA 153 (May 16, 1977)

When an oil and gas lease offeror whose entry card was drawn first in a simultaneous drawing fails to pay the rental within 15 days after receiving notice that payment is due, he is automatically disqualified under 43 CFR 3112.4-1 from receiving the lease.

Frank De Jong, 26 IBLA 327 (Aug. 30, 1976)

Where, by prearrangement, as part of a business negotiation, a third party assumes responsibility for the payment of the annual rentals for two oil and gas leases which subsequently terminate by operation of law when the rental check is dishonored by the drawee bank, the leases will not be reinstated on the strength of the lessee's naked assertion that the uncollectability of the check was deliberately contrived as part of a scheme to deprive him of the lease so that the third party could be granted the leases unlawfully by a Federal employee.

Stanley J. Pirtle, 26 IBLA 348 (Sept. 7, 1976)

Where a noncompetitive oil and gas lease is canceled for failure of the lessee to make full payment of the first year's rental, the Department may return the rental pursuant to the repayment statute, 43 U.S.C. § 1374 (1970), in appropriate circumstances where the lessee has derived no benefit from the possession of the lease and there are no other factors militating against repayment.

Albert J. Piper, 27 IBLA 61 (Sept. 27, 1976)

Where part of the lands in an oil and gas lease are included within the known geologic structure of a producing oil or gas field, the annual rental rate will be increased for all of the land in the lease and a bond required.

H. E. Cabcon Investment Co., John Cakason, 27 IBLA 210 (Oct. 6, 1976)

Where the Bureau of Land Management sends notice to an offeror, pursuant to 43 CFR 3103.3-1, that the first year's rental accompanying an oil and gas lease offer is deficient in the amount of 41 cents, and that the deficiency must be paid within 30 days from notice under penalty of cancellation of the lease, the lease will be canceled where the lessee receives the notice, yet fails to pay.

Zona B. Jackson, 27 IBLA 217 (Oct. 6, 1976)

Where the Bureau of Land Management sends notice to an offeror at his record address, pursuant to 43 CFR 3103.3-1, that the first year's rental accompanying his noncompetitive oil and gas lease offer is deficient and such notice is returned to the Bureau marked "Unclaimed" by the post office, the cancellation of the lease will be set aside and the notice will not be considered to have been served on the offeror, pursuant to 43 CFR 1810.2(b), when the post office has failed to forward the notice in accordance with a request by the offeror to forward all mail and other mail has, in fact, been forwarded.

Jack R. Coombs, 28 IBLA 53 (Nov. 9, 1976)

An offeror is properly disqualified from receiving a noncompetitive oil and gas lease on an offer which is drawn first from a group of simultaneously filed offers when he fails to pay the first year's advance rental within 15 days of his receipt of notice that such rental is due, and the delay is attributable to his posting of the rental check with insufficient postage.

Edgar C. Bennington, Jr., 28 IBLA 65 (Nov. 10, 1976)

Where a lessee makes a deficient rental payment for his oil and gas lease claiming that such payment was determined in accordance with the rental or acreage figure stated in the lease, he will not be entitled to a Notice of Deficiency, pursuant to 43 CFR 3108.2-1, when it is shown that he received notice of an increase in

OIL AND GAS LEASES--Continued

RENTALS--Continued

the lease rental and, therefore, was not justified in relying on the original rental figure in the lease.

An oil and gas lease terminated by operation of law for failure to pay the full advance rental timely can only be reinstated when the lessee shows that his failure to pay the rental on or prior to the anniversary date was justifiable or not due to a lack of reasonable diligence.

Lone Star Producing Co., 28 IBLA 132 (Nov. 19, 1976)

Where the BLM deposits the advance rental tendered with the filing of an oil and gas lease offer, that action does not signify acceptance of the offer, nor does it create a contract to lease the land applied for, nor does it give rise to an estoppel against the Government.

Pinnacle Mining and Exploration Co., Inc., 28 IBLA 249 (Dec. 20, 1976)

There is no basis for reinstating an oil and gas lease, terminated for failure to pay rental timely, because of alleged reasonable diligence when the payment was mailed no earlier than the date the rental was due.

An oil and gas lease terminated for failure to pay rental timely may not be reinstated where the delay in paying the rental was not "justifiable" within the meaning of the Mineral Leasing Act, 30 U.S.C. § 188(c) (1970), because it was due to financial and other difficulties not within the contemplation of the Act.

Dolores B. Meggie, 28 IBLA 272 (Dec. 20, 1976)

An oil and gas lease, terminated by operation of law for failure to pay timely the advance rental, will not be reinstated where the sole reason offered as justification for the tardy payment is the confusion and business disruption which attended the remodeling of the corporate lessee's office space. Employee neglect or inadvertence likewise will not serve as justification.

Mono Power Co., 28 IBLA 289 (Dec. 27, 1976)

Where, after a drawing of simultaneously filed oil and gas lease offers, the authorized officer mails a notice to the successful drawee informing him of his priority and the requirement that the advance rental must be paid within the allotted time, which letter is received at his address of record, his subsequent failure to remit the rental timely will disqualify his offer even though he asserts that the person who received and signed for the notice, and then failed to give it to him promptly, was not his designated agent for receipt of mail.

After a drawing of simultaneously filed oil and gas lease offers the requirement that the first year's rental be received in the proper office within the allotted time after notice to the applicant is mandatory, and consideration of excuses for failure to comply is not permitted. Specifically, no relief will be afforded where the delay is attributed to the Postal Service.

Edgar C. Bennington (On Reconsideration), 28 IBLA 355 (Jan. 31, 1977)

OIL AND GAS LEASES--Continued

RENTALS--Continued

The lessee of an oil and gas lease, issued after Sept. 2, 1960, which has reached the end of its primary term, must submit the rental for the first year of an anticipated extended term under 30 U.S.C. § 226(e) (1970) on or before the regular anniversary date of the lease. Failure to submit the rental timely will result in the automatic termination of the lease by operation of law under 30 U.S.C. § 188(b) (1970). Unless the lessee can show that he is entitled to reinstatement of his lease under 30 U.S.C. § 188(c) (1970), he cannot obtain the extension.

Oil Resources, Inc., 28 IBLA 394 (Feb. 7, 1977)
84 I.D. 91

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, including leases issued pursuant to the simultaneous filing procedures, even though the lease offers were drawn with first priority prior to the specified date.

Raymond N. Joeckel, 29 IBLA 170 (Mar. 14, 1977)

Milton J. Letsack, 29 IBLA 316 (Mar. 30, 1977)

Doris B. Sterkel, Richard L. Sterkel, 30 IBLA 35 (Apr. 12, 1977)

K C Exploration, Inc., 30 IBLA 209 (May 20, 1977)

Francis L. Hill, 32 IBLA 202 (Sept. 16, 1977)

Thomas G. Fails et al., 32 IBLA 302 (Sept. 30, 1977)

A late payment of rental due for an oil and gas lease results in termination of the lease, and the lease will not be reinstated, where the lessee relied upon a third party to pay the rental, but no acceptable justification is shown for the delay.

Lynn Schusterman, 29 IBLA 182 (Mar. 18, 1977)

When an oil and gas lease is in royalty status and acreage containing the well is segregated into a new lease by approval of an assignment, the nonproductive base lease does not terminate for failure to pay rental timely if the Bureau of Land Management does not inform the lessee of the segregation until after the anniversary date of the lease.

Odessa Natural Corp., 30 IBLA 26 (Apr. 11, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, including leases issued pursuant to the simultaneous filing procedures, even though the lease offers were drawn with first priority prior to the effective date of the increase.

Continued--

OIL AND GAS LEASES--Continued

RENTALS--Continued

Jerry Chambers, 33 IBLA 323 (Jan. 16, 1978)

An oil and gas lease is not *issued* until it is signed by the authorized officer; the acceptance of first year's rental in advance as required by regulation does not create a lease contract. Until lease issuance, the Secretary retains his discretion to lease or not to lease a given tract.

James W. Canon et al., 1 SEC. 1 (Apr. 15, 1977)
84 I.D. 176

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date.

Jerry J. Hunnicutt et al., 30 IBLA 86 (Apr. 27, 1977)

Where a noncompetitive oil and gas lease is canceled for having been erroneously issued because the lands involved were part of an incorporated city (43 CFR 3101.1-1(a)(3) the Department may return the rentals pursuant to the repayment statute, 43 U.S.C. § 1374 (1970), in appropriate circumstances where the lessees have derived no benefit from the possession of the lease and there are no other factors militating against repayment.

Bruce Anderson, 30 IBLA 118 (May 2, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, including leases to be issued pursuant to the simultaneous filing procedures where the drawing was held prior to the effective date of the rent increase, and leases to be issued for a regular over-the-counter offer where the offer was filed prior to the effective date.

Casey C. Jansen et al., 30 IBLA 134 (May 12, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, including leases to be issued to successful offerors at simultaneous drawings held prior to the effective date of the rate increase.

Melvin B. Hobgood, 30 IBLA 163 (May 18, 1977)

Reasonable diligence normally requires sending or delivering payments sufficiently in advance of the anniversary date to account for normal delays. A lessee who mails payment from New York City to Cheyenne, Wyoming, 2 days before the anniversary date is not reasonably diligent.

Rosemary Weaver et al., 30 IBLA 227 (May 26, 1977)

OIL AND GAS LEASES--Continued

RENTALS--Continued

The lessee of an acquired lands oil and gas lease issued after Sept. 2, 1960, which has reached the end of its primary term, must submit the rental for the first year of an anticipated extended term under 30 U.S.C. § 226(e) (1970), on or before the regular anniversary date of the lease. Failure to submit the rental timely will result in the automatic termination of the lease by operation of law under 30 U.S.C. § 188(b) (1970). Unless the lessee can show that he is entitled to reinstatement of his lease under 30 U.S.C. § 188(c) (1970), the lease must be deemed to have terminated at the end of its stated term.

Shell Oil Co., 30 IBLA 290 (June 1, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, including leases issued pursuant to the simultaneous filing procedures, even though the lease offers were drawn prior to the effective date of the increase.

Doris A. Fiel et al., 30 IBLA 308 (June 6, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, even though the lease offers were filed prior to the specified date.

Guy B. Willis, 30 IBLA 344 (June 8, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, the increased rate applies to all leases issued after that date, regardless of the date on which the offer to lease was originally submitted.

Wanda C. and William B. Schmidt, et al., 30 IBLA 346 (June 8, 1977)

William S. Schichtanz, 32 IBLA 20 (Aug. 31, 1977)

Vern K. Jones et al., Esdras K. Hartley, 33 IBLA 74 (Dec. 6, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate applies to all leases issued after that date, regardless of the date the offer to lease or drawing entry card was filed.

Duncan Miller, 30 IBLA 350 (June 8, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, even though the lease offer was filed prior to the date of the regulation. The imposition of the increased rate is not discriminatory as it applies to all leases issued after a certain date.

Guy B. Willis, 30 IBLA 373 (June 10, 1977)

OIL AND GAS LEASES--Continued

RENTALS--Continued

The filing of a noncompetitive oil and gas lease offer, prior to acceptance, does not create any right to a lease or legal interest which restricts the discretionary authority of the Secretary of the Interior over lease issuance. Thus, an amended regulation raising the lease rental charge may be applied to lease offers which have been previously filed but not accepted and such action is not violative of the Fifth Amendment.

Barbara A. Joeckel, 30 IBLA 376 (June 10, 1977)

A simultaneous oil and gas offeror is properly disqualified under 43 CFR 3112.4-1 from receiving lease when she fails to pay the first year's rental within 15 days of receipt of the notice that such payment is due.

Where the check submitted in payment of the first year's rental for an oil and gas lease offer is dishonored by the drawee bank due to error on the part of the drawer, the offer is properly rejected in accordance with 43 CFR 3112.4-1.

Karen L. Brown, 31 IBLA 239 (July 12, 1977)

An oil and gas lease offer is properly rejected where the offer is deficient in the first year's rental by more than 10 percent.

Duncan Miller, 31 IBLA 371 (Aug. 4, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, including leases issued pursuant to over-the-counter filing procedures, even though the lease offers were submitted prior to the effective date of the increase.

Brad J. Bays, 31 IBLA 374 (Aug. 5, 1977)

Cecil C. Wall, 32 IBLA 27 (Aug. 31, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, including leases to be issued for a regular over-the-counter offer where the offer was filed prior to the effective date.

Altex Oil Corp., 32 IBLA 18 (Aug. 31, 1977)

Altex Oil Co., 32 IBLA 44 (Sept. 2, 1977)

Altex Oil Corp., 32 IBLA 390 (Nov. 7, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date pursuant to over-the-counter offers or pursuant to the simultaneous filing procedures, even though the offers or entry cards were filed with BLM prior to the specified date.

Bureau of Land Management Instruction Memorandum No. 77-37 outlined a general policy for the assessment of additional rental on oil and gas lease offers pending when the rental rate was increased by regulation, but left to the discretion of the State Offices the particular implementing procedures. Procedures used by a State Office which may be different from other State

Offices, but which do not prejudice the offerors' right to receive oil and gas leases if leases are issued on the lands applied for, are not arbitrary and capricious as to require reversal of the decisions assessing additional rental.

Assuming, *arguendo*, the applicability of the rulemaking provisions of the Administrative Procedure Act, 5 U.S.C. § 553 (1970), to an amendment of 43 CFR 3102.3-2 increasing the rental rate of noncompetitive oil and gas leases, the provisions of the Act were satisfied where the proposed increase was published as proposed rulemaking on Mar. 18, 1976, to be effective July 1, 1976, and final rulemaking was published Jan. 5, 1977, changing the effective date of the rental increase to Feb. 1, 1977.

E. R. Gaither et al., 32 IBLA 106 (Sept. 12, 1977)

The filing of an application for a noncompetitive oil and gas lease, prior to acceptance, does not create a right to a lease immune from application of a subsequently amended administrative regulation. An increased rental rate is properly applied to an oil and gas lease offer pending before the effective date of the rate change but which has not been accepted prior to that time.

Viola J. Kirkwood, 32 IBLA 199 (Sept. 16, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, even though the lease offers were filed prior to the specified date. The filing of an application for a lease prior to its acceptance does not create a right to a lease which is immune from application of a subsequently amended administrative regulation, nor does administrative delay in the processing of the lease offer preclude proper application of such regulation.

Paul C. Kohlman, 32 IBLA 240 (Sept. 21, 1977)

Increased per acre rental, as directed under Jan. 5, 1977, revision of 43 CFR 3103.3-2(a), is applicable to all noncompetitive oil and gas leases issued after Feb. 1, 1977, including leases for which offers, both simultaneous and over-the-counter, were filed prior to revision of the regulation.

Duncan Miller et al., 32 IBLA 289 (Sept. 27, 1977)

Reliance on receipt of a courtesy billing notice from the Bureau of Land Management is not a justifiable excuse for reinstatement of an oil and gas lease terminated for failure to pay rental timely. The failure of the Bureau of Land Management to change a lessee's address of record resulting in the lessee not receiving the courtesy notice does not relieve the lessee from the obligation to pay rental timely.

Richard C. Corbyn, 32 IBLA 296 (Sept. 28, 1977)

The oil and gas lessee of record is responsible for paying rental timely and for meeting the reinstatement requirements. The fact that a lessee attempts to assign his lease does not absolve him of the rental and

OIL AND GAS LEASES--Continued

RENTALS--Continued

reinstatement requirements until the assignment is approved by the Bureau of Land Management.

Leonard A. J. Tancredi, 32 IBLA 325 (Oct. 11, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to all leases issued subsequent to that date, including leases issued pursuant to the simultaneous filing procedures, even though the lease offers were drawn with first priority prior to the effective date of the increase.

Where the Bureau of Land Management issued a decision notifying a successful lease offeror of the increased advanced rental rate from $.50 to $1 per acre as per the regulation change in 43 CFR 3103.3-2, effective Feb. 1, 1977, and no right of appeal was granted from that decision, the offeror was not bound to appeal from that decision in order to preserve his priority status. When the offeror took an appeal from a subsequent decision rejecting the offer, that appeal suspended the effect of both BLM decisions pending the result of the appeal before this Board and upon our affirmation, appellant now will be given 15 days to comply with the original requirements before his offer is rejected.

Paul Landis, 32 IBLA 374 (Oct. 31, 1977)

Where a noncompetitive oil and gas lease is issued to the successful applicant in a drawing of simultaneously filed offers and the lessee's personal check in payment of the first year's rental is returned by the drawee bank as uncollectible, a decision canceling the lease will be affirmed in the absence of a showing of error on the part of the bank.

Norman Monath, 32 IBLA 392 (Nov. 8, 1977)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, such increased rate is applicable to an over-the-counter offer filed prior to the specified date.

Dean W. Rowell, 33 IBLA 30 (Nov. 22, 1977)

Where the Bureau of Land Management issued a decision notifying a successful drawee in the simultaneous oil and gas filing program of the increased advance rental rate from 50 cents to $1 per acre pursuant to a regulation change effective Feb. 1, 1977, 43 CFR 3103.3-2, and no right of appeal was granted from that decision, the offeror was not bound to appeal from that decision in order to preserve his priority status. When the offeror took an appeal from a subsequent decision rejecting the offer, that appeal suspended the effect of both BLM decisions pending the result of the appeal before this Board. Payment of the required increased rental during the appeal period is deemed timely and a lease may issue.

George Gabriel, 33 IBLA 44 (Nov. 25, 1977)

OIL AND GAS LEASES--Continued

RENTALS--Continued

Congress has provided that failure to pay annual rental timely for an oil and gas lease shall cause the lease to terminate automatically by operation of law under 30 U.S.C. § 188(b) (1970). An oil and gas lease is not deemed to have terminated for failure to pay rental timely where, because of misleading communications from the Geological Survey and the Bureau of Land Management, it appeared the lease was in a royalty status and the lessee did not have reason to know that the rental was due.

Davis Oil Co. et al., 33 IBLA 53 (Nov. 25, 1977)

The timeliness of filing Federal tax returns and payments and of making rental payments for Federal oil and gas leases are governed by different statutes and regulations and are not the same. Receipt in the proper Bureau of Land Management office determines the timeliness of rental payment, whereas the Internal Revenue Service uses a postmark date. The postmark date is relevant in considering a Federal oil and gas lease rental only to determine if the lessee exercised reasonable diligence so as to warrant reinstatement of a lease terminated for failure to pay the rental timely.

In determining whether an oil and gas lessee exercised reasonable diligence to warrant reinstatement of a terminated lease the postmark date on the rental payment envelope is generally deemed the date of mailing unless there is satisfactory evidence to support an assertion that mailing occurred at an earlier date.

Generally, the mailing of a rental payment for an oil and gas lease 1 day before the payment date cannot be considered reasonable diligence to warrant reinstatement of a terminated lease.

Receiving the Bureau of Land Management's courtesy rental due notice too late to meet a lessee's usual business practice for mailing checks is not a justifiable excuse for delay in transmitting the payment to warrant reinstatement of a terminated lease.

The inadvertent or negligent failure of an employee or other person entrusted to mail payments for an oil and gas lessee is not a justifiable excuse for delay in transmitting the payment to warrant reinstatement of a terminated lease. Nor is the fact his prior payments have been timely filed such an excuse.

David R. Smith and Darla L. Smith, 33 IBLA 63 (Dec. 5, 1977)

Where an oil and gas lease is canceled in part because it was erroneously issued as to that part, there is no authority for the Department to pay to the lessee unrealized anticipated profits or to refund the rental for the portion of the lands retained in the lease. By signing the simultaneous oil and gas drawing card, the offeror agreed to accept a lease for those portions of the tract found by BLM to be available for leasing.

Paul N. Temple, 33 IBLA 98 (Dec. 16, 1977)

An oil and gas lease which is in rental status terminates when the annual advance rental is not properly received in the State Office by the anniversary date of the lease.

Doris Belnar, 33 IBLA 231 (Dec. 28, 1977)

30 U.S.C. § 188(b) (1970), and its implementing regulation 43 CFR 3108.2-1, requiring a notice of deficiency on a form approved by the director apply only to rental payments due on the anniversary dates of noncompetitive oil and gas leases, and are inapplicable to deficient initial rental payments for noncompetitive oil and gas lease offers.

Where the Bureau of Land Management notifies an oil and gas lessee of a deficiency in initial rental and the deficiency is not paid to the Bureau within the time prescribed, but is paid some 5 months later, the delay being ascribed to "oversight" the lateness of the payment will not be excused and the cancellation of the lease for failure to pay the rental timely is properly sustained.

Evelyn Chambers, 33 IBLA 271 (Jan. 5, 1978)

A successful offeror in a BLM simultaneous filing procedure who fails to pay the first year's advance rental within 15 days from the receipt of notice that such payment is due will be disqualified as an offeror.

When BLM sends a notice of an advance rental obligation to the address of record of a successful offeror in a simultaneously filed oil and gas lease drawing and such notice is returned by the post office, the offeror is properly deemed to have "receipt of notice" under 43 CFR 1810.2.

An undocumented and unsupported assertion by an oil and gas lease offeror that his agents made a timely tender of advance rental payment will be disregarded on appeal where BLM records indicate that no such tender was made within the period allowed for payment of the advance rental.

Charles M. Brady, 33 IBLA 375 (Jan. 25, 1978)

Sec. 31 of the Mineral Leasing Act, *as amended*, 30 U.S.C. § 188 (1970), providing for the automatic termination of a lease, not containing a well capable of production of oil and gas in paying quantities, for nonpayment of the annual rental, does apply to a lease which is entitled to an extension beyond its initial 10-year term because of termination of an approved communitization agreement under 30 U.S.C. § 226(j) (1970), even though notice of the extension was not given to the lessee in time for him to receive it and return the rental so that the payment would be received by BLM no later than the 11th anniversary date of the lease.

Jack L. McClellan, Marton Majoros, 34 IBLA 53 (Feb. 16, 1978)

Payment of the annual rental on an oil and gas lease is not made until a proper form of remittance is received by the appropriate office of the Bureau of Land Management.

Lloyd M. and Adelheid A. Patterson, 34 IBLA 68 (Feb. 22, 1978)

A check tendered prior to the due date of an oil and gas lease annual rental payment, which is properly dishonored by the drawee bank, does not constitute timely payment. But where return of the check results from a confirmed bank error, subsequent collection and payment of the check relates back to the time of the original tender, and payment is timely.

Annual rental payments on oil and gas leases are sent to depositories designated by the Secretary of the Treasury if their location permits the deposit to be hand carried; otherwise, the deposits are mailed to the Denver Branch of the Kansas City Federal Reserve Bank. Washington, D.C., offices of the Bureau of Land Management may send deposits to the Cash Division of the Treasury Department. All checks drawn on foreign banks or foreign branches of United States banks must be sent for deposit to the Cash Division of the Treasury Department.

An oil and gas lease rental payment check returned to the Bureau of Land Management because a Federal Reserve Bank will not accept for collection checks drawn on foreign banks, but which could be collected through the Cash Division of the Treasury Department and would be honored by the drawee bank, is not "uncollectible."

Pipeline Petroleum Corp., 34 IBLA 73 (Feb. 22, 1978)
85 I.D. 70

When rental payment for an oil and gas lease is mailed after the date it is due, there can be no basis for reinstating the lease because of reasonable diligence.

A lessee's failure to make timely payment of annual rental on an oil and gas lease is not justified because it results from his misplacing the courtesy notice that rental is due.

Where a lessee presents no evidence that illnesses of his family members were so disruptive as to prevent him from carrying on his employment and other routine activities as usual, the late payment of rental on an oil and gas lease is not justified by these illnesses.

Albert B. Fairfield, 34 IBLA 132 (Mar. 8, 1978)

An oil and gas lessee of record is responsible for paying rental timely. The fact that a lessee attempts to assign his lease does not absolve him of the rental payment requirements until the assignment is approved by the Bureau of Land Management.

Auburn C. Hunsucker, 34 IBLA 316 (Apr. 24, 1978)

When BLM adjudicates issue and offeror does not appeal, doctrine of administrative finality, which is administrative counterpart of res judicata, generally bars consideration of new appeal arising from later proceeding involving same lease and same issue. Accordingly, BLM acted properly in dismissing appellant's protest, filed Nov. 18, 1977, against oil and gas lease annual rental adjudicated on July 27, 1977.

Wilfred Plomis, 35 IBLA 1 (May 3, 1978)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after a specified date, the increased rate is applicable to leases to be issued subsequent to that date for over-the-counter offers filed prior to the effective date of the regulation.

Tipperary Oil and Gas Corp., 35 IBLA 120 (May 15, 1978)

Reliance on receipt of a courtesy billing notice from the Bureau of Land Management is not a justifiable excuse upon which to predicate reinstatement of an oil and gas lease terminated for failure to pay rental timely. The failure of the Bureau of Land Management to change a lessee's address of record resulting in the lessee not receiving the courtesy notice does not

OIL AND GAS LEASES--Continued

RENTALS--Continued

relieve the lessee from the obligation to pay rental timely.

Apostolos Paliombeis, 35 IBLA 180 (May 23, 1978)

"Payment." Placing a check for annual rental for oil and gas leases in the mails does not constitute "payment" of annual rental. Rather, the lessee must cause the rental to be received by the office administering his leases, and, until such time as it is received, no "payment" of annual rental has occurred. Accordingly, where a check is mailed prior to the due date but does not arrive until more than 20 days after this due date, no "payment" was made prior to that time, so that the lease automatically terminated by operation of law, and the Department is without authority to consider a petition for reinstatement of the lease.

"Tender." Placing a check for annual rental for oil and gas leases in the mails does not constitute a tender of payment of annual rental, within the meaning of 43 CFR 3108.2-1(c). Rather, a lessee makes a tender of payment only when he submits payment to the BLM office administering his leases, and when BLM has the opportunity either to receive or decline it. Accordingly, placing rental in the mails does not constitute a tender of payment which would allow the Department to consider the merits of a petition for reinstatement of an oil and gas lease terminated for failure to make timely payment of annual rental.

Mobil Oil Corp., 35 IBLA 265 (June 2, 1978)

When, in a drawing of simultaneously filed oil and gas lease offers, the first-drawn offeror is notified to submit the advance rental, that rental must be received by the proper office within the prescribed 15 days. Automatic disqualification may not be avoided by allegations that delivery was delayed by the postal service, as the rule is that the postal authorities are the agents of the sender in such cases.

Where BLM records show that the first-drawn applicant for an oil and gas lease paid his rental 1 day late, and is therefore disqualified, there is a legal presumption of regularity which supports the official acts of public officers and the proper discharge of their official duties.

Where a first-drawn oil and gas applicant offers evidence to show that his first year's advance rental was mailed sufficiently in advance so that, even if delayed, it would have arrived within the prescribed time, a legal presumption is raised that the payment was timely delivered.

Where, in a drawing of simultaneously filed oil and gas lease offers, the first-drawn applicant fails to submit his advance rental within 15 days after notice, as prescribed by 43 CFR 3112.4-1, disqualification is automatic, and no excuse may be considered, no discretion exercised, no grace period invoked, and the right of the next drawee to receive first consideration attaches *eo instante*.

Donald E. Jordan, 35 IBLA 290 (June 2, 1978)

It is the responsibility of a lessee to see that any payment tendered for annual rental under an oil and gas lease is so identified that the appropriate State office can credit the payment to the proper lease account. However, where an appellant demonstrates that the rental money was received timely by the appropriate State Office, and the evidence indicates that the lessee subsequently gave timely and proper instructions

OIL AND GAS LEASES--Continued

RENTALS--Continued

as to its application, the lease is properly deemed to have not terminated.

Pacific Transmission Supply Co., 35 IBLA 297 (June 2, 1978)

An oil and gas lease terminates automatically by operation of law for failure to pay rental timely when the rental check, although timely received by the appropriate BLM office, is not honored by the bank on which it is drawn. However, if a lessee provides adequate evidence, such as an admission by a bank official, that the bank erroneously dishonored the check, the error of the bank may not vitiate the otherwise proper payment of rental to BLM.

An oil and gas lease terminated for nonpayment of rent may be reinstated under 30 U.S.C. § 188(c) (1970) if the failure to pay was either justifiable or not due to a lack of reasonable diligence on the part of the lessee. Where a lessee files his rental check timely, but the check is nonnegotiable because insufficient funds are on deposit in the particular bank, the lessee has not exercised reasonable diligence. Failure to pay rental timely may be justifiable where it is caused by factors outside the lessee's control which were the proximate cause of the failure. Where the lessee provides no evidence or circumstances of an alleged unaccountable delay in the electronic transfer of funds from one bank to another which resulted in the lessee's rental check being dishonored, there is no basis for reinstatement of the lease.

Don C. Wiley, 35 IBLA 302 (June 2, 1978)

An oil and gas offer which is accompanied by advance rental of $0.50 per acre may not be rejected as not including sufficient advance rental, per 43 CFR 3102.3-2, 3111.1-1(d) and (e)(1), if the regulation raising the rental to $1 is not in effect when the offer was filed.

Mobil Oil Corp., 35 IBLA 375 (June 23, 1978)
85 I.D. 225

Reliance on receipt of a courtesy billing notice from the Bureau of Land Management is not a justifiable excuse requiring reinstatement of an oil and gas lease terminated for failure to pay rental timely. The failure of the Bureau of Land Management to change a lessee's address of record which results in the courtesy notice's arriving late does not relieve the lessee from the obligation to pay rental timely.

Gilbert Mark Castillo, 36 IBLA 32 (June 27, 1978)

In the absence of joint lessees establishing the existence of a prior agreement that a particular lessee was responsible for payment of the oil and gas lease rental, the failure of the joint lessees to pay the rental timely is a joint failure and the joint lessees must each satisfy the reinstatement requirements of 30 U.S.C. § 188(c) (1970). In the absence of reasonable diligence, the lease cannot be reinstated unless each joint lessee can show that he has a justifiable excuse for failing to pay the rental timely.

Frederick C. Farrington, George F. Hoffman, 36 IBLA 70 (June 30, 1978)

OIL AND GAS LEASES--Continued

RENTALS--Continued

An oil and gas lease which has terminated for failure to pay rental timely may be reinstated upon a satisfactory showing that, among other things, the failure to pay the rental on or before the anniversary date was either justifiable or not due to a lack of reasonable diligence. Generally, mailing the payment the day before it is due does not constitute reasonable diligence. A prolonged business trip will generally not constitute a justifiable excuse for the late payment.

J. R. Oil Corp., 36 IBLA 81 (July 12, 1978)

The automatic termination provision in sec. 31 of the Mineral Leasing Act, *as amended*, does not apply to a situation where, due to other contingencies, additional rental may become due on a date other than the anniversary date of a lease.

American Resources Management Corp., 36 IBLA 157 (July 31, 1978)

Where the official record of an oil and gas lease offer contains no indication either of when BLM received payment of first-year rental on the lease or of when BLM believes it received this payment, and where the only indication of when the payment was made is a photocopy, submitted on appeal, of a portion of an unidentified, undated receipt which does not bear either the offeror's name or the serial number of his offer or the control number of the document, and which is not included in the official record, BLM's decision rejecting the offer under 43 CFR 3112.4-1 for failure to make this payment within 15 days of the offeror's receipt of notice that the rental was due will be reversed.

Willis L. Lawson, 36 IBLA 178 (July 31, 1978)

A successful offeror in a BLM simultaneous filing procedure who fails to pay the first year's advance rental within 15 days from the receipt of notice that such payment is due is properly disqualified as an offeror.

Gavino San Diego, 36 IBLA 300 (Aug. 21, 1978)

An oil and gas lessee is properly required to pay the higher rental prescribed by duly promulgated regulations of the Department where all or part of the lands in the lease have been included within the known geologic structure of a producing oil or gas field. However, where a discovery is made on the leased lands, at the expiration of that lease year the lease goes on a minimum royalty basis. 43 CFR 3103.3-5.

Andrew W. Brainerd, 36 IBLA 304 (Aug. 21, 1978)

An oil and gas lease terminated by operation of law for failure to pay advance rental timely will be reinstated when lessee shows that failure to pay the rental on or before the anniversary date was not due to a lack of reasonable diligence in that payment was mailed in California 6 days before due in Wyoming State Office.

Mercedes M. Peratt, 36 IBLA 331 (Aug. 28, 1978)

OIL AND GAS LEASES--Continued

RENTALS--Continued

A rental check for an oil and gas offer need not be signed necessarily by the offeror.

Lillian Sweet, 37 IBLA 25 (Sept. 14, 1978)

Where BLM sends by certified mail a notice to an offeror at his record address, pursuant to 43 CFR 3102.3-1, that the first year's rental is due within 15 days of receipt of the notice, and the letter is returned to BLM marked "moved left no address" by the post office, and it is established that the nondelivery by the post office was erroneous, the rejection of the lease offer will be set aside and the notice will not be considered to have been served on the offeror pursuant to 43 CFR 1810.2(b).

Joan L. Harris and Jonathan T. Ames, 37 IBLA 96 (Sept. 25, 1978)

The rent for oil and gas lease rights obtained in a simultaneous oil and gas lease drawing must be received in the proper office of the Bureau of Land Management within 15 days from the date of receipt of notice that such payment is due. Where there is no proof that service of the notice that payment is due was made upon offeror more than 15 days before the payment is received by the proper office of BLM, such payment will be deemed as timely made.

Kathleen A. Rubenstein, 37 IBLA 117 (Sept. 29, 1978)

A noncompetitive oil and gas lease on which there is no well capable of production in paying quantities terminates by operation of law and not by the action of any official if the annual rental is not paid on or before the due date. Submission of a rental check without identifying the lease number precluded the Bureau of Land Management from accepting the check as payment for the lease, and a lease is properly held to terminate in the absence of a timely identified payment of the rental.

S. Delos Champaign, 37 IBLA 377 (Nov. 6, 1978)

"Reasonable diligence." Where an oil and gas rental check bearing the due date of the lease is submitted a few days in advance thereof, but the check is returned by the Bureau of Land Management and thereupon a new check is promptly submitted, even if it could be considered that the lease had terminated, it would be eligible for reinstatement under 30 U.S.C. § 188(c) (1976) because there has been reasonable diligence on the part of lessee.

Lillie Belle Higgins, 38 IBLA 254 (Dec. 8, 1978)

A lessee's forgetfulness and inadvertence are not justifiable excuses for failure to pay the annual rental on or before the anniversary date of the oil and gas lease. Nor does mailing payment 4 days after the due date constitute reasonable diligence. The timeliness of filing Federal tax returns and payments and of making rental payments on oil and gas leases are governed by different statutes and regulations and are not the same.

Fred Burcheck, 38 IBLA 275 (Dec. 13, 1978)

OIL AND GAS LEASES--Continued

RENTALS--Continued

Where an offer is drawn No. 1 for a tract consisting of 39.97 acres, BLM requests payment specifically of $40 advance rental, and the offeror remits $39.97 within the 15-day period spelled out in 43 CFR 3112.4-1, the submittal of $39.97 does not constitute satisfactory payment within the ambit of that regulation.

Milton Knoll, 38 IBLA 319 (Dec. 19, 1978)

Where the Department, through a duly promulgated regulation, has increased the rental rate on all noncompetitive oil and gas leases issued after Feb. 1977, the increased rate is applicable to leases issued subsequent to that date where the over-the-counter offer was filed prior to effective date of the regulation.

Phillips Petroleum Co., 38 IBLA 344 (Dec. 22, 1978)

BLM does not waive its right to declare a lease expired by cashing an advance annual rental check and placing funds in an unearned account.

Richard P. Smoot, 39 IBLA 1 (Jan. 8, 1979)

A noncompetitive oil and gas lease offer for acquired lands, filed "over-the-counter," is properly rejected when the accompanying rental payment is deficient by more than 10 percent. However, where the balance of the rental is tendered with the notice of appeal, the offer may be reinstated with priority from the date the deficiency was corrected.

George S. Swan, 39 IBLA 47 (Jan. 16, 1979)

An oil and gas lease which has terminated by operation of law due to late payment of annual rental will not be reinstated where it appears that the rental payment was not mailed early enough to account for the normal delays in the transmission of the mail.

Reynolds Mining Corp., 39 IBLA 405 (Mar. 2, 1979)

An oil and gas lease issued on July 1, 1951, is not controlled by P.L. 83-555, effective July 29, 1954, and the lease therefore does not terminate automatically by operation of law if annual rental is not paid timely, as this law does not apply retroactively to the lease in the absence of written notice from the lessees that they have elected to subject their lease to this law. Rather, the mineral leasing law in effect prior to July 29, 1954, controls, under which the lessees' failure to pay annual rental subjects the lease to cancellation only after BLM gives them 30 days' notice of their failure to pay the rental timely. BLM's decision canceling such lease will be vacated where it did not give the lessees the required notice.

Allied Chemical Corp., et al., 40 IBLA 272 (Apr. 18, 1979)

Under 43 CFR 3112.4-1, a successful drawee who fails to submit the first year's advance rental within 15 days of his receipt of notice that it is due is automatically disqualified to receive the lease.

Donald E. Jordan (Supp.), 41 IBLA 60 (May 31, 1979)

OIL AND GAS LEASES--Continued

RENTALS--Continued

When, in a drawing of simultaneously filed oil and gas lease offers, the first-drawn offeror is notified to submit the first year's advance rental, that rental must be received by the proper office within the prescribed 15 days. Automatic disqualification, stemming from failure to pay timely, will not be avoided by allegations that payment was mailed far enough in advance to arrive at BLM timely.

American Petrofina Co. of Texas, 41 IBLA 126 (June 13, 1979)

Where the rental payment accompanying a noncompetitive oil and gas lease offer for acquired lands, filed over-the-counter, is deficient by more than 10 percent due to an increase in the rental rate subsequent to the filing of the offer, and Bureau of Land Management requests submission of the deficient rental within 30 days, BLM may properly reject the lease offer when the additional rental is not submitted within the 30 days.

Hansen Brothers, 42 IBLA 40 (July 31, 1979)

An oil and gas lease on which there is no well capable of producing oil and gas in paying quantities automatically terminates if the lessee fails to pay the annual rental on or before the anniversary date of the lease. A terminated lease can be reinstated only if, among other requirements, the lessee shows his failure to pay on time was either justifiable or not due to a lack of reasonable diligence.

Reasonable diligence requires mailing the rental payment sufficiently in advance of the anniversary date to account for normal delays in collection, transmittal, and delivery of the mail. Mailing the rental the day it is due does not constitute reasonable diligence.

Where a lessee presents no evidence that illness of a family member or a heavy work load were so disruptive as to prevent him from carrying on his other routine activities as usual, the late payment of rental on an oil and gas lease is not justified by the illness or the work.

Victor Holz, 42 IBLA 284 (Aug. 27, 1979)

Reliance on receipt of a courtesy billing notice from BLM is not a justifiable excuse upon which to predicate reinstatement of an oil and gas lease terminated for failure to pay rental timely. The fact that the courtesy rental notice was delayed in reaching appellant because it was sent to appellant's former address is not a justifiable excuse for late payment.

William E. Steiskal, 42 IBLA 304 (Aug. 27, 1979)

Where an offer is drawn No. 1 in a simultaneous oil and gas lease drawing and the offeror is notified by BLM that the rental due is $1,955, the offer will be disqualified under 43 CFR 3112.4-1 when the offeror submits a check for $1,954 within the time required, but fails to submit the $1 deficiency within the allowed time.

C. Ennos, 42 IBLA 326 (Aug. 30, 1979)

OIL AND GAS LEASES--Continued

RENTALS--Continued

Where the failure to pay rental on or before the anniversary date of a lease is attributable to a breakdown in mailing procedures within the parent company of the lessee, neither reasonable diligence nor justification is shown to support a petition for reinstatement.

The Secretary may reinstate a lease terminated by operation of law for failure to pay on or before the anniversary date the full amount of rental due where it is shown to the satisfaction of the Secretary that such failure was either justifiable or not due to a lack of reasonable diligence on the part of the lessee. 30 U.S.C. § 188(c) (1976). Reasonable diligence normally requires sending or delivering payments sufficiently in advance of the anniversary date to account for normal delays in the collection, transmittal, and delivery of the payment. 43 CFR 3108.2-1(c)(2) (1977).

Fuel Resources Development Co., 43 IBLA 19 (Sept. 11, 1979)

Failure to pay the annual rental for an oil and gas lease on or before the anniversary date results in the automatic termination of the lease by operation of law. A lease may be reinstated if the failure to pay the rental timely was either justifiable or not due to a lack of reasonable diligence on the part of the lessee.

In order for the failure to pay oil and gas lease rental timely to be considered justifiable, it must be caused by factors outside the lessee's control, which were the proximate cause of the failure.

Reasonable diligence normally requires sending the payment sufficiently in advance of the due date to account for normal delays in the collection, transmittal, and delivery of the payment.

When rental payment for an oil and gas lease is mailed after the date it is due, there can be no basis for reinstating the lease because of reasonable diligence.

When appellant's failure to mail his rental payment timely is caused by carelessness or inadvertance, his petition for reinstatement of an oil and gas lease is properly denied.

James E. Kordosky and Robert A. Weiss, 43 IBLA 63 (Sept. 18, 1979)

Where BLM sends by certified mail a request for payment of advance rental to the address of record of a successful offeror in a simultaneously filed oil and gas lease drawing and such request is returned by the Post Office, marked "Moved, left no address," the offeror is properly deemed to have "receipt of notice" under 43 CFR 1810.2. Where the address of record of the offeror is that of a leasing service and the leasing service moves, filing a change of address form with the Post Office in the name of the leasing service, but not in the name of appellant, the Post Office properly returned the notice addressed to the offeror to BLM.

A successful offeror in a BLM simultaneous filing procedure who fails to pay the first year's advance rental within 15 days from the receipt of notice that such payment is due will be disqualified as an offeror.

Roy Lindgren, 43 IBLA 139 (Sept. 28, 1979)

OIL AND GAS LEASES--Continued

RENTALS--Continued

An oil and gas lease, terminated automatically by operation of law for failure to pay rental timely, may be reinstated if, among other matters, the failure to pay timely was justifiable or not due to a lack of reasonable diligence on the part of the lessee.

Reasonable diligence normally requires sending the payment sufficiently in advance of the due date to account for normal delays in the collection, transmittal, and delivery of the payment. When rental payment for an oil and gas lease is mailed after the date it is due, generally there can be no basis for reinstating the lease because of reasonable diligence.

The burden of showing that late payment of annual rental for an oil and gas lease is justifiable is on the lessee. An assertion of personal reasons without further explanation, is insufficient to meet this burden. Nor does reliance on receipt of a courtesy notice justify failure to pay rental timely.

William A. King, 43 IBLA 255 (Oct. 10, 1979)

It is not the transfer of the lease account between the Bureau of Land Management and the Geological Survey which determines the rental amount; rather it is the status of the lease that determines which agency maintains the account and what rental applies.

Marathon Oil Co., Union Oil Co. of California, 43 IBLA 309 (Oct. 22, 1979)

Failure to pay the annual rental for an oil and gas lease on or before the anniversary date results in the automatic termination of the lease by operation of law. A lease may be reinstated if the failure to pay the rental timely was either justifiable or not due to a lack of reasonable diligence on the part of the lessee.

In order for the failure to pay oil and gas lease rental timely to be considered justifiable, it must be caused by factors outside the lessee's control, which were the proximate cause of the failure.

Reasonable diligence normally requires sending the payment sufficiently in advance of the due date to account for normal delays in the collection, transmittal and delivery of the payment.

Bureau of Land Management's cashing a late rental check and depositing it in its unearned account does not constitute acceptance of rental payment or a determination that a terminated oil and gas lease will be reinstated.

Eugene E. and Allienne A. Jankoski, 43 IBLA 323 (Oct. 29, 1979)

Where BLM sends by certified mail a request for payment of advance rental to the address of record of a successful offeror in a simultaneously filed oil and gas lease drawing and such notice is returned by the Post Office, marked "Moved, left no address," the offeror is properly deemed to have "receipt of notice" under 43 CFR 1810.2, where the offeror's address of record is that of a leasing service and the leasing service moves, filing a change of address form with the Post Office in the name of the leasing service, but not in the name of appellant.

A successful offeror in a BLM simultaneous filing procedure who fails to pay the first year's advance rental within 15 days from the receipt of notice that such payment is due will be disqualified as an offeror.

Clyde K. Rohrman, 43 IBLA 370 (Oct. 29, 1979)

OIL AND GAS LEASES--Continued

RENTALS--Continued

When, following a drawing of simultaneously filed oil and gas lease offers, BLM notifies the first-drawn offeror to submit the first year's rental, that payment must be received by the proper office within the prescribed 15 days. An unsigned check, though received timely, does not constitute acceptable payment and is properly returned by BLM to the offeror. Where the offeror does not thereafter submit acceptable payment within the 15 days, BLM properly disqualifies the lease offer.

Delay caused by or attributable to the U.S. Postal Service is not sufficient to excuse late payment of rental except where reinstatement of a lease is at issue under 30 U.S.C. § 188(c) (1976). When BLM returns unacceptable payment to the offeror, a charge that delay in the return of the payment by the Postal Service caused his or her subsequent late rental payment is also an insufficient excuse absent evidence that the Postal Service acted improperly. There is a legal presumption of regularity which supports the official acts of public officers, and in the absence of clear evidence to the contrary, it will be presumed that they have properly discharged their official duties.

Gary Milske, 44 IBLA 21 (Nov. 6, 1979)

Where a successful drawee demonstrates on appeal that his first year's advance rental was timely received by BLM, but that BLM erroneously failed to credit his remittance and rejected his offer, the case will be remanded to the State Office of BLM with instructions to issue the lease to the successful drawee, all else being regular.

Vincent F. Duncan, 44 IBLA 42 (Nov. 6, 1979)

A check is a valid form of remittance for payment of an oil and gas lease filing fee and advance rental. However, it is subject to collection and final payment without cost to the Government. Where a check is returned from a bank as uncollectible, generally, the check cannot be considered as a proper tender of payment.

A check returned from a bank may be considered a tender of payment where the return of the check is shown to have resulted from a confirmed bank error, and the subsequent collection and payment of the check relates back to the time it was originally tendered to BLM. If an oil and gas lease has been canceled and applications rejected because checks have been returned from a bank and the appellant shows bank error, the case is remanded for further consideration.

Jose V. Lim, 44 IBLA 96 (Nov. 20, 1979)

An oil and gas lease in its extended term because of the termination of an approved unit plan to which it was committed, on which lease there is no well capable of production in paying quantities, terminates automatically by operation of law where the annual rental is not paid on or before the anniversary date of the lease. The pendency of an appeal regarding the termination date of the extension does not excuse the failure to maintain the lease in good standing by timely payment of the annual rental.

Tenneco Oil Co., Cordillera Corp., 44 IBLA 171 (Nov. 30, 1979)

OIL AND GAS LEASES--Continued

RENTALS--Continued

Failure to pay the annual rental for an oil and gas lease on or before the anniversary date results in the automatic termination of the lease by operation of law. A lease may be reinstated if the failure to pay the rental timely was either justifiable or not due to a lack of reasonable diligence on the part of the lessee.

In order for the failure to pay oil and gas lease rental timely to be considered justifiable, it must be caused by factors outside the lessee's control which were the proximate cause of the failure.

Reasonable diligence normally requires sending the payment sufficiently in advance of the due date to account for normal delays in the collection, transmittal, and delivery of the payment.

Robert R. Schnurbusch, 44 IBLA 229 (Dec. 11, 1979)

The sending of an unsigned check for the annual rental of an oil or gas lease does not constitute timely payment, even if received on or prior to the anniversary date of the lease. BLM has no obligation to present an unsigned check for payment since such a check is not a negotiable instrument.

A lessee's failure to make timely payment of annual rental on an oil and gas lease is not justified when based on ignorance of the applicable law and regulations requiring payment on or prior to the lease anniversary date.

A contention that appellants were unclear as to the anniversary date of the lease which thereupon resulted in an untimely payment of the rental will not be sustained where the Department's records correctly show the anniversary date, or the lessee has actual knowledge of the correct due date prior thereto.

C. J. Streit and Bernard J. Streit, 44 IBLA 265 (Dec. 26, 1979)

RIGHTS-OF-WAY LEASES

Where a protest against the United States entering into a compensatory royalty agreement pertaining to oil and gas underlying a railroad right-of-way pursuant to the Act of May 21, 1930, 46 Stat. 373, 30 U.S.C. § 301 *et seq.* (1970), is based upon an assertion that the protestants have title to the oil and gas under the right-of-way, the protest will be properly dismissed if it is found the United States has title to those minerals.

Although the grants of a right-of-way to a railroad under sec. 2 of the Act of July 1, 1862, and of title to odd-numbered sections of land under sec. 3 of that Act were grants *in praesenti*, the railroad's interest in the right-of-way land stems solely from sec. 2. There is no difference in its interest in portions of the right-of-way land which cross even-numbered sections of land and in portions which cross odd-numbered sections. Minerals underlying the right-of-way were reserved to the United States in both instances.

Title to the oil and gas deposits underlying the right-of-way granted to a railroad by the Act of July 1, 1862, 12 Stat. 489, did not pass under a patent to the land that the right-of-way crosses. Rather, title remains in the United States.

Brown W. Cannon, Jr., et al., 24 IBLA 166 (Mar. 16, 1976)
83 I.D. 80

OIL AND GAS LEASES--Continued

RIGHTS-OF-WAY LEASES--Continued

The Secretary of the Interior does not have authority under the Right-of-Way Oil and Gas Leasing Act of May 21, 1930, 30 U.S.C. § 301 *et seq.* (1970), to dispose of deposits of oil and gas underlying a railroad right-of-way granted pursuant to the Act of Mar. 3, 1875, when the lands traversed by the right-of-way were later patented under the Act of Apr. 24, 1820, without any reservation for minerals. In such case, title to the mineral estate was included within the grant to the patentee.

It is improper to dismiss a protest against issuance of an oil and gas lease applied for pursuant to the Act of May 21, 1930, 30 U.S.C. § 301 *et seq.* (1970), for lands underlying a railroad right-of-way granted under the Act of Mar. 3, 1875, when the lands traversed by the right-of-way were later patented without a reservation for minerals. In such case title to the mineral estate underlying the right-of-way is no longer held by the United States and, therefore, a lease issued pursuant to the 1930 Act is void and must be canceled.

Amerada Hess Corp., 24 IBLA 360 (Apr. 27, 1976)
83 I.D. 194

Where the official records of the Bureau of Land Management show a reservoir right-of-way affecting certain land, the oil and gas therein may not be leased under the Mineral Leasing Act of 1920, 30 U.S.C. § 181 *et seq.* (1970). This result follows even though the reservoir right-of-way may have been issued improperly or should have been terminated.

Republic Oil & Mining Co. and Margaret V. Coombs,
35 IBLA 212 (May 26, 1978)

ROYALTIES

The minimum royalty required under an oil or gas lease following discovery, but prior to actual production, of oil or gas, must be satisfied; if advance royalties have been paid on take or pay payments made to a lessee-seller by a buyer in lieu of receiving production from the lease, they may be credited to the amount due for royalties on actual production in subsequent years, but only to the extent they are in any year in excess of the amount of the minimum royalties prior to the actual production.

Generally, the Government is not estopped from demanding oil and gas lease royalty payments it is owed, even if its employees may have made prior mistakes in accepting or computing the royalty.

Gulf Oil Corp. et al., 21 IBLA 1 (June 16, 1975)

Even where statute, regulation, and the oil and gas lease itself do not specifically provide for the payment of prejudgment interest on royalties owed to the United States, such interest may be imposed by the United States; equity principles may authorize such imposition. A charge for such interest may be imposed despite delays in processing the debtor's appeals, where the debtor assertedly relied upon an earlier Departmental decision which, only when taken out of context, would tend to support the debtor's posture.

An Oil and Gas Supervisor of the Geological Survey has authority to demand prejudgment interest based upon the failure of an oil and gas lessee to pay timely royalties owed to the Government, despite the fact that the Supervisor is an employee of the Executive Branch.

Where an oil and gas lessee appeals from a decision of an Oil and Gas Supervisor's determination that additional royalties are due to the Government, and simultaneously files a request for suspension of the ruling, which is granted by the Geological Survey "until further notice," prejudgment interest continues to accrue during the period of the suspension. This conclusion is premised on the doctrine that interest is compensation for delay in payment.

A demand by the Geological Survey for prejudgment interest for delayed payment of additional royalties owed to the Government is not necessarily unenforceable in the courts because it was not asserted as a counterclaim under Rule 13(a) of the Federal Rules of Civil Procedure.

Atlantic Richfield Co., 21 IBLA 98 (June 30, 1975)
82 I.D. 316

In interpreting provisions of State leases which have been validated under sec. 6 of the Outer Continental Shelf Lands Act, 43 U.S.C. § 1335 (1970), the Department will give great weight to judicial and administrative interpretations rendered by officials of that State. Where, however, there is a conflict of opinion between State officials as to the proper interpretation of a provision of a State lease, the Department of the Interior will independently interpret that section, applying the general rules of contract construction.

Ocean Drilling & Exploration Co., Chevron Oil Co.,
21 IBLA 137 (July 15, 1975)

Reasonable transportation costs of production from oil and gas leases from the field to the first available market are allocable to the Federal or Indian royalty interest.

Kerr-McGee Corp., 22 IBLA 124 (Sept. 26, 1975)

"Production." "Production" as used in all Federal oil and gas leases includes all oil and gas withdrawn from a reservoir.

In the absence of a specific statutory bar, such as is found in secs. 16 and 19 of the Mineral Leasing Act of 1920, royalty is due in the "amount or value" of all production from a Federal oil and gas lease, including vented and flared gas and gas or oil leaked, spilled or used in producing operations.

An assessment greater than the normal royalty charge may be required for oil and gas that are wasted.

Response to Feb. 17, 1976, Request from the General Accounting Office: Interpretation of Mineral Leasing Act of 1920, and Outer Continental Shelf Lands Act Royalty Clauses, M-36888 (Oct. 4, 1976) 84 I.D. 54

"Production." Oil or gas that is wasted is in a category by itself, distinctly separable from "production," when it is oil or gas that is lost on the surface or in the subsurface through the negligence of the lessee, *i.e.*, without the specific sanction of the supervisor.

The loss through waste to the lessor compensable under 30 CFR 250.30 is either the royalty or the full value and the choice between them is a matter which is committed to the sound exercise of the supervisor's discretion.

Whereas 30 CFR 221.46 and 221.50 clearly indicate the lessee must pay royalty on all production, the lessee is obligated to pay full value on all gas wasted

(221.35), and the supervisor has no discretion to collect less than the full value of gas wasted.

Computation of Moneys Due the United States on Oil and Gas Lost as a Result of Pennzoil's Blowout. M-36888 (Supp.) (Jan. 19, 1977) 84 I.D 64

The Oct. 4, 1976, Solicitor's Opinion (M-36888), in effect, found that the Secretary, by permitting exemptions from royalty requirements for oil and gas used for production purposes or unavoidably lost, was alienating the royalty interest of the United States on certain leases without authority to do so.

Court cases indicate that it is in the Secretary's discretion to apply the corrected interpretation of the statutes in the collection of additional royalty retroactively or prospectively based on equitable considerations.
